DIED, at the residence of her son-in-law, Dr. Thophilus Price, Tuckerton, Burlington Co., N. J., First mo 8th, 1874, HANNAH, widow of the late Timoth Pharo, in the 87th year of her age. She was always member of Little Egg Harbor Monthly Meeting, and for many years a beloved overseer thereof. Being a retiring disposition, and an example of simplicity she appeared as one waiting for the coming of her Lord, desiring to depart and be at rest. Her friends have a consoling belief that her end was peace.

—, at his residence in Frankford, Pennsylvania WILLIAM R. DUTTON, in the forty-fourth year of his age, a member of Frankford Monthly and Particular Meetings. Though for many years he has been at times a great sufferer from attacks of disease yet his removal was, at the last, sudden and in an unexpected manner. He was preserved in much patience through extreme suffering during his last illness, although unable to articulate much, his peaceful frame of mind throughout, gave those who witnessed it the consoling trust that through the unmerited mercy of his Saviour, the work had been silently carried on, and the end an admittance granted him into a mansion of peace and rest. "Be ye also ready, for in such an hour as ye think not, the Son of man cometh."

WILLIAM H. PILE, PRINTER.

No. 422 Walnut Street.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, SECOND MONTH 7, 1874.

NO. 25.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,  
PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

John Heald.

For "The Friend."

(Continued from page 187.)

"8th mo. 12th. We had a meeting at Samuel Hathaway's, in which I was favored with a testimony. A sense of too much ease and indifference in the minds of those present attended me, and to arouse to a more diligent and lively concern seemed to be the aim of my labor. Solemnity and tenderness prevailed, after which I was engaged in supplication. After sitting a while, I thought it to be suitable time to conclude the meeting, and after shaking hands with several, I arose, and though I sat as far from the door as any person there, I went to the door and passed out first.

13th. Attended a meeting near Ephraim Butterfield's. I felt an engagement to supplicate for that assistance which is necessary to aid in religious performances, in which I felt encouraged, and engaged in testimony; but it seemed as if the people were fixed and closed, and I could get no entrance. I ended with sorrowful sensations on their account, but on my own that I had endeavored to do the best I could. It seemed to me that the world had the first place in their minds, and religion was only a secondary care."

John Heald mentions in his journal that Joshua Peeley, who acted for a short time as his guide, had formerly lived in his own neighborhood, but that losing his wife, and being left with a family of young children, the youngest a babe, he had returned more than 100 miles and settled again in New England. Under the pressure of many and humbling trials, his mind became concerned in regard to his religious welfare. He married again, and his second wife was religiously disposed, but her inclinations were not towards Friends, and she joined another religious society. After some time she was brought down near unto death, and when in that condition saw that she must use the plain language of thee and thou instead of you to a single person. The doctor was attending on her at the time, and when she knew that he had come, and felt that if she were faithful she must not decline the use of this language to him, she covered her head to hide her face, through fear of the loss on the one hand, and of unfaithfulness on the other. She dreaded reproach, and

dreaded disobedience, lest she should come under condemnation, and break her peace, not knowing but she might soon go off the stage of time with wilful disobedience weighing her down with guilt. Thus she was greatly tried, but, yielding obedience to that which was required of her, she found it not so hard as she expected, and enjoyed the reward of inward peace.

"16th. At Leeds, a full meeting, and only a few Friends. I said that all Christians agree that it is our duty to worship God, but there are many ways of performing what is called worship. I went on to show that some had tried many ways and had not found that which their souls longed for, and deep sorrow had taken hold of their minds, and fervent desires were breathed to the Father of mercies, that He would be pleased to look on their afflictions and afford help. When He saw meet to let them feel His love diffused into and spread over their minds, it satisfied their souls. Here they needed no form of prayer, but asked for what they felt they stood in need of. When gratitude and praises inspired the mind for mercies received, according to the degree felt and known, so the mind was prepared to acknowledge the favor. How needless are lifeless forms to these!

18th. We had a meeting at the house of the widow Estes, near Poland. It was mostly made up of such as were not members of our Society. The silence continued longer than one of them was easy with, who began to speak and continued some time; but it seemed to me the meeting lost by the communication. After a time I stated my expectation, that all professors of Christianity believed the Scriptures to be written by divine inspiration, and to be relied on as such, and that this was my belief. In those writings, we find in the sayings of our Lord, that, 'where two or three are met together in my name, there am I in the midst of them.' There is nothing mentioned of preaching being necessary, in order to be so favored with the Divine presence. Again, 'Of yourselves, without me, ye can do nothing;' and, 'If any man have not the Spirit of Christ, he is none of His.' Yet, a manifestation of the Spirit is given to every man to profit withal. Take heed that ye be not deceived in a matter of such consequence as that of the salvation of the soul. O, how my mind is clothed with mourning and sorrow on account of the professors of Christianity satisfying themselves with a name to live, without knowing that Spirit or Grace of God that brings salvation, and hath appeared to all men! Though they own the scriptures to be written by Divine inspiration, they do not believe any man to have the Spirit of Christ to guide him.

We dined at the place where the meeting was held, and Simon Estes conducted us to Raymond, to Obadiah Gould's. We attended the meeting, the 19th, in which I was silent, till near the close, when I said, this oppor-

tunity may yet be profitable to some, if they consider what the attention of the mind has been to; whether it has been directed to the Master, or whether it has been to the servant. Is not the Supreme Being, the right object of worship, and should the attention of the mind be placed on the creature instead of the Creator? I fear there has been loss sustained by many, both preachers and others; by some, from entertaining a strong desire to hear, and by others, to be heard, and thus indulging the craving of natural inclination. Some may be or have been induced to say, 'Thus saith the Lord,' and the Lord never sent them, but what is delivered is a gratification of sense, and gratifying to nature. Can we, by nature, do the acceptable will of Heaven?

My mind had endured much humiliating exercise in the meeting, and was enabled to wait to know my allotted duty; and way opened for me to clear myself with a short testimony."

The caution which John Heald in this instance extended to those who might not have rightly improved the time of silence, is one of wide application both within the pale of our Society, as well as without. Many thoughtful persons of other religious professions have regretted the absence in their meetings for worship of intervals of solemn silence in which the heart might enter into communion with our great Creator, without the attention being constantly engaged in outward performances. It has become so customary to confound the idea of worship with preaching, praying, &c., that many do not think of the possibility of performing that great duty without these accessories, which are by no means essential. Hence, if the preacher is absent, they think no worship can be performed. It is interesting to note from time to time, evidences of the attention of others being drawn to this subject. In a recent number of *The Christian Union*, there is a communication by a professed minister of another religious society, in which the writer says:—

"I would like to put in a plea for stillness as a spiritual reality having a title to recognition in both public and social religious exercises. 'The Lord is in His holy temple: let all the earth keep silence before him.' Here is an expression for something as profoundly real and as clearly necessary as anything indicated in the other scripture, 'In His temple doth every one speak of His glory.' What speech, indeed, cries out for God like the silence of a deeply reverent soul? We have, then, a silence which is of faith, and which is not sin.

"Our Quaker brethren have seen this very clearly, and have borne a solemn testimony to the truth and import of silent service. All Christians, doubtless, recognize the same truth in their closets, in their private meditations; and to this recognition they owe much of whatever is enlivening in their religious conferences.

"The chief trouble in the case seems to be that the faithful are looking for God to give fellowship and stimulus only in speech. Therefore they rule out, with a kind of impatience, all intervals of stillness from their reckoning of profitable and comfortable communion. Their communion is with the Father and the Son, not in the unity of the same Spirit brooding silently in the hearts of all; but in the unity of the same Spirit speaking by some mind and mouth, by whose means they glorify God.

"Now as all good words are generated silently in the laboratory of the soul, they should be waited for in no unbelieving, barren and impatient way. Stillness, even in the social re-union, should be at once and frankly elevated to the sphere of faith and responsibility. Why does not some one speak—pray—sing? Because all are keeping silence before God—speaking, praying, singing in the spirit. By-and-by the gift of tongues will come, and they will teach and admonish one another."

We resume the extracts from the journal: "20th. At Windham, I warned the people against trusting in any opinions for safety while they know an indulging in wrong doings; nor in imputative righteousness, without they faithfully endeavor to yield obedience to divine requiring. O the delusion there is in the doctrine of all being saved, and having Christ's righteousness imputed to them, though they indulge in that they know to be wrong! Shall not the Lord of all the earth do right? Shall those who indulge in every abominable thing that inclination leads into, be made partakers with the righteous who have been faithful unto death?"

(To be continued.)

*Japanese Tea.*—A blue book, issued under the auspices of the British Government, the compilation of Consul Robertson and Secretary Lawrence, of the British service in Japan, contains some interesting particulars of the cultivation of tea in that country. It appears that the plant has been grown in Japan for at least a century and a half, but previous to the opening of the country to foreign trade, little attention seems to have been given to the plantations. During the last seventeen years, however, the cultivation has been rapidly extended, and Mr. Robertson estimates that, should no unfavorable reaction set in, an increase in the production to the extent of about 15 per cent. per annum may be counted on for the next few years. What the actual yield amounts to there appears to be no means of ascertaining. The best tea, we are told, is produced in Yamashiro, a small province about ninety miles long by five and twenty broad. Other provinces produce a much larger crop, but the smaller yield of Yamashiro is of more value on account of its superior quality. The reason seems chiefly to be that the climate of this province is very mild as well as damp, snow falling but rarely, and seldom or never to a greater depth than an inch. But the quality depends largely also on the nature of the soil. In conversation with Mr. Lawrence, a native grower, he estimated the amount of land in Yamashiro capable of producing tea of the very best quality at no more than twenty-five acres, of which he himself possessed about a tenth part. He also estimated the entire yield of the province as worth about £300,000, two-thirds being of

good quality. But, although the extent of land under tea cultivation is yearly increasing, he did not expect an increase of the first quality tea. There is not soil of the right kind to produce it. Tea is planted from the seeds, which are gathered in the autumn, when the nuts containing them have attained a full dark color. The nuts are well dried until they open, and then stored until March, when the seeds are sown. According to a Japanese work, quoted by Mr. Robertson, the ground should be prepared as for vegetables, well manured, and laid out in ridges. A hole about two feet in diameter should be dug, and the seed placed therein, mixed with guano to keep off the moles. The plant shows up well in about fifty days; at the end of the first year it attains a height of about two inches; at the end of the second year about nine or ten, throwing out two branches. The third year it grows to about a foot and a half, with five branches. It should never be allowed to exceed five feet. In the fourth year the leaves are first gathered. According to the information collected by Mr. Lawrence, "the older the tree the better the crop. The trees which produce the tea worth five dollars the pound in Minobei's plantation are, he told me, from 400 to 500 years old. In these the trunks are from five to six inches in diameter. This plantation has been possessed by Minobei's family for six generations." The picking begins in different districts at different times. In Yamashiro, the first picking occurs in May, and as many as four crops are gathered during the year.

Japanese tea is exported almost exclusively to America. The leaf naturally is rather green than black, and the Japanese, as yet at least, are not adepts, as the Chinese are, in the art of coloring. Indeed, they seem to be very unskilful even in the proper preparation of the leaf. In China, in the preparation of black tea, the leaf is taken when fresh, wetted and put into baskets, where it is allowed to ferment slightly; but the Japanese have not yet adopted this method, and when the teas reach the foreign merchant they are no longer in a fit condition for undergoing the process.

Selected for "The Friend."

*To Friends of the Foremost Rank of the Rising Generation, and those in the Prime of Life.*

The following, from "Memoirs and Letters of Samuel Fothergill," though not particularly addressed to Friends hereaway or of this day, contains matter suggestive and profitable, and well worthy of the serious consideration of us all:—

"Let, I beseech you, the seeming foremost rank amongst you *look closely* to their own steps, and consider carefully whether they have not *by some means* contributed to the general decay of lively zeal and care, through their own declension and lukewarmness. Return therefore, I beseech you, oh ye chiefs amongst the people, to your first love, and do your first works, lest greater desolation ensue, and He, who walketh in the midst of the seven golden candlesticks, come unto you quickly, and remove yours out of its place; for why should the candlestick remain, when the light and lustre of the candle is extinguished? And, dearly beloved Friends of the rising generation, and ye in the prime of life, suffer and receive the word of exhortation from one who tenderly loves you. Remember your Creator and your Judge; let

not the foolish amusements, or vain conversation of this world, prevail to turn you aside from your great and everlasting interest. Remember there is not any thing of this world can lay the foundation of eternal peace; it is an earnest, humble seeking after the sanctifying Hand, and submission to its virtue, which can alone fashion you as vessels of honor, and fit you for the heavenly kingdom; *cherish the secret drawings of Divine love; be not ashamed of its tendering, restraining effects; why should you sell your souls for a thing of nought? for such will be the smiles and frowns of this world in a day that is hastily approaching.* Let not, therefore, the evil example of others, nor the reproach of the scornful, prevail to your hurt, but retain the fear of God, which will keep the heart clean, and be an excellent enduring treasure, when everything else shall vanish as a vapor."

*The Meinam.*—The great river of Siam though of immense value to the country, is of limited advantage for the purposes of navigation. A bar at its mouth obliges all except the smaller vessels to find anchorage in an open roadstead from six to ten miles from the shore. If the bar is once crossed, however, there is deep water and easy navigation, even for ships of the largest class, into the very midst of the city of Bangkok, thirty miles from the mouth of the river. Formerly it was navigable for a much longer distance. The ancient annals of Siam report that in the seventh century, Chinese junks ascended the Meinam as far as Sangkhalok, which is a distance of 360 miles from the sea. At present the river is navigable for only about sixty miles. There are about ten waterfalls within the space of seven or eight leagues, but non impassable, and during six months of the year the great floods cause them to disappear.

These great floods, the regular inundation of the Meinam, constitute the great event of the year in Siam, as does the inundation of the Nile in Egypt. An area of not far from twenty thousand square miles of territory is enriched by this annual overflow, and so enriched as to make it, in fertility and productivity, the very garden of the world. It is safe to say that no equal area on the face of the globe exceeds the valley of the Meinam in possibilities of vegetable wealth. Some of the phenomena of the great inundation have been collected and recorded by Sir John Bowring. He says: "The Meinam has its annual inundation. Charged with the rich soil which it brings from the interior, in the month of June its waters begin to rise, and in August overflow the banks to a height sometimes exceeding six feet above the ordinary level. In the first public audience I had with the king, he called my attention to the inundation of the river as the main source of the fertility of the soil; the rice fields become green and more promising as the waters spread which generally remain till the month of November, the land having the appearance of a lake. Boats traverse it in all directions, temporary canals being formed among the rice fields to facilitate their circulation. Palliox affirms that though the high lands are submerged for several months, the lower regions of the country, at a distance of thirty miles from the sea, are never inundated, which he attributes to the strength of the tide, which in rising, drives back the descending water with an irresistible force, and at the ebb the

make their way by the ordinary stream to the ocean, so that they have no time to spread themselves over the adjacent lands. A failure of the inundation is ruin to a large portion of the rice-crops.

But the country sometimes suffers fearfully from these inundations. That of 1831 nearly destroyed all the sugar plantations, and three or four feet of water continuing to cover the face of the country, almost all the cattle perished. The rice harvest was seriously affected, and the finest fruit trees swept away, so that it was said only one durion tree was left in Siam. But fruit abounded, fruit of singular variety and excellence in 1855, and the mischief of the floods appeared to be wholly repaired.

When the waters of the Meinam are supposed to have reached their highest point, the king deputed one hundred Bonzes (Buddhist priests), who are instructed to command the inundation to proceed no further. These functionaries embark on state barges, issue the royal mandate to the waters, bidding them turn back in their course, and they accompany their intervention with exorcisms which are sometimes ineffectual, and show that the falling of the waters is no more subject to the commands of the sovereign of Siam than were the tides on the British shores controlled by the Danish king."

### Memoirs and Letters of Sarah Hillman.

(Continued from page 191.)

"1830. Fifth mo. 1st. Deep and painful are the baptisms through which those who are called to be mouth to the people have to pass, even as it were to go down to the bottom of Jordan, having the earth with her bars about them. Yet if mercifully favored to feel that the everlasting arms are underneath, the tribulated mind will be supported in and through all, having the consoling language of our adorable Redeemer verified in its experience. In the world ye shall have tribulation, but in me peace. These, though they may be brought to the state David was in when he said, My flesh trembleth for fear of Thee; and I am afraid of Thy judgments; they may feel constrained, though in weakness and fear and trembling, to tell unto Jacob his transgression, and to Israel his sin; yet these, amid all their secret conflicts are at times comforted with the assurance that the Saviour's grace is sufficient for them; and made to feel that through the strengthening power of the Lord Jesus, they can do all things He requires. Oh! may the Lord Almighty, in the riches of his love and mercy, abilitate his poor servant, who feels herself less than the least of all saints, to fulfil His glorious will, and serve Him faithfully in the work of the gospel, that so the ministry received may be fulfilled; and in the awful day of chastening judgment, my soul being clear of the blood of all men, may be admitted into that glorious holy city, which needeth not the light of the sun nor of the moon, but the glory of God doth lighten it, and the Lamb is the light thereof."

While it is most true, as S. H. represents, that those "called to be mouth to the people"—one channel of communication between Christ the Head, and the church—have to experience "deep and painful" and self-abasing baptisms, wherein no flesh can glory, like to going "down to the bottom of Jordan"

truly, yet at the same time, as she also sets forth, there are none who in seasons of their Lord's condescension can more rejoice in Him; more set up Ebenezers of gratitude and praise to Him; neither are more permitted and strengthened to bring up stones of precious memorial to His eternally glorified and excellent name. It is those who deeply suffer with the Saviour, whether ministers or not, that shall reign with Him. And the lower the foundation of the spiritual building, through deep digging, is laid upon Christ the Rock, the more will such be enabled to withstand assailing storms and to rejoice in Him even after the experience of David's joy: "I waited patiently for the Lord; and he inclined unto me, and heard my cry. He brought me up also out of an horrible pit, out of the miry clay, and set my feet upon a rock, and established my goings. And he hath put a new song in my mouth, even praises unto our God." Again it is written, "As the sufferings of Christ abound in us, so our consolation also aboundeth by Christ." And it was the dying testimony of James Naylor, "There is a spirit which I feel" that "never rejoiceth but through sufferings; for with the world's joy it is murdered." "In God alone it can rejoice, though none else regard it, or can own its life." "I found it alone; being forsaken."

May these truths take fast hold of our minds; remembering that the will of the Lord—whatever it calls for or leads into—and our true interest and happiness are inseparable. Surrounded as we are by the genial attractions of time and sense, there is great danger of our almost insensibly becoming leavened more or less with them and into the spirit of this world, so as not to keep clearly in view what life is for, and whether the great work of preparation is keeping pace with the rapid advance of the great end. The love of ease and self-indulgence, so harmonizing with the propensities of our fallen nature, are strongly antagonistic to this needful and pleaded for suffering and baptism, and faithful maintenance of the cross of Christ which crucifies to the world and the world unto us. Moreover all the art and device of the cruel enemy is brought to bear upon our incipient faith, our weak and struggling resolutions, perhaps again and again formed not to indulge therein, lest we lose our hold on the crown unspeakably precious and immortal. But how should such be helped and encouraged by the interrogatories, Can we love the world and Christ our Master too? Can we be heirs of two kingdoms? Can we avoid the indispensable judgments of the Swift Witness for Truth upon the transgressing nature, and at the same time become the new creatures we are called to in Christ Jesus? Can we expect, if neglectful of Him in the day of His mercy, that we can escape His final justice? Or can a few short years of pleasure so-called, or even of prosperity in this unsatisfying and deceitful world, counterbalance for an eternity lost of peace and bliss and joy forever? These questions seriously and truthfully answered, would almost disarm the man of sin with his fallacious reasonings within us.

Then let us be faithful to the Lamb of God, who taketh away the sin of the world, by submitting to His turning, cleansing, refining, sanctifying, all-powerful hand upon us. Let us patiently endure tribulation after tribulation, baptism upon baptism, chastening added to chastening, if thereby repentance unto life,

and grace to help in time of need, may but be our richly compensating experience. For, be it remembered, the Lord of life and glory first endured the "contradiction of sinners against himself, and though rich, for our sakes became poor; and hath promised still to be with His in the furnace of trial, to comfort and sustain; who though he maketh "the depths of the sea a way for the ransomed to pass over;" hath also said, "Call upon me in the day of trouble; I will deliver thee, and thou shalt glorify me."

To Ann Jones.\*

Philadelphia, 7th mo. 16th, 1830.

My Beloved Friend,—Thine of the 12th I received this day, very opportunely as I conceive; as faith and hope were well nigh spent, and so great the poverty and desertion my poor mind was in, I was almost ready to sink. It seemed to strengthen my faith a little, and to confirm my hope, that He in whom I have believed, would not wholly forsake or give me over to be tempted beyond what he would preserve through. Ah! potent indeed is that grand adversary who beguiled our first parents, and who does still endeavor to destroy those who are concerned to seek after a better and an enduring substance. These had need to prepare their souls for temptation, by humbly waiting for the arising of the Spirit and power of their Redeemer; which is and ever will prove a standard against him. I feel no disposition to complain, my dear friend, of any or all the provings and trials from within or without which have been mine, or may yet await; though these have been such, at seasons, as have caused deep searching of heart, and I have been ready to query, why am I thus? In the midst of all this so lonely has been my situation, I scarce dare to speak to any of my friends of any of these things. Had thou been in reach, as I said in my heart, I could unbosom these feelings unto my dear mother, and she could perhaps understand me. Sometimes I have been bound to show myself, and at others have had to suffer deeply.

In order to strengthen up this feeble frame if possible by a change of air, I have passed a few days in Jersey. While there, I was at my dear friend E. Collins'; who is much as when we were there. She seemed entirely comfortable; and said she had not a wish for a change. Said, too, that all her bed had been made by Him, who had been her morning light, and the strength of her life; and who, I doubt not, will be her evening song. So that, as I said in my heart, if such may be my evening, surely all that can be done and snuffed, will not be too much to endure. She desired her affectionate love to thee. In attending their Monthly Meeting I was brought into a great strait; for I was obliged to give proof of my love to my divine Lord by bending at His holy footstool. No one near me knew me; but, through adorable mercy and help I returned home sweetly consoled in spirit. At Cropwell and Moorestown had poor, dull seasons. The people are so earnest to gather the riches of this world, that those which neither moth nor rust can corrupt I fear are but little sought. Oh! when I consider these things and my own danger, how do I crave preservation, let the purifying dispensations be as bitter as they may, rather

\* Who was then on a religious visit in the State of New York.

than to settle on my lees in an unconcerned state, while the seed, the pure immortal seed, is oppressed even as a cart with sheaves. Truly so many and so great are the dangers which surround us, that had we not just such a great and merciful High Priest, we must surely perish; while without His daily support how could we be kept alive? We are poor prisoners; without any capacity to think any thing good as of ourselves, yet prisoners of hope; and provided with the stronghold, unto which we are invited to turn; and as we accept the invitation we realize the gracious promises of the gospel, and are enabled, through faith, to participate in the joys reserved in heaven for those, who through many tribulations, and having their robes washed in the blood of the Lamb, are clothed in white, and bear in their hands the victor's palm, ascribing 'salvation and strength to the Lamb.'

Dear E. Pitfield is well, I believe, and so far as I know, doing her Master's bidding. The prospect of seeing thee is pleasant; but it is so closely associated with thy departure home as to cause mingled emotions of joy and grief. Thou wilt live in the hearts of some of us when far separated; and I trust wilt remember us for good before thy Father's throne. Be pleased to continue thy care for thy little friend, who feels less than the least of all the flock and family; and alike unworthy of the many mercies bestowed by a kind Providence, as of the affection thou hast for her.

Affectionately farewell,

S. HILLMAN.

P. S.

'My fears and doubts and cares, are known, O Lord, to thee,  
Give me but strength to do thy will, and that sufficeth me.'

is a couplet I have somewhere seen, which seems to me to be so accordant with my feelings as to induce me to pen it here. My heart often so speaks.

(To be continued.)

*Jaguars.*—A number of Jaguars, forced probably from the woods by the scarcity of game since the destructive hurricane, had been committing great havoc among the goats, pigs, &c., belonging to the inhabitants [of Blewfields, Central America.] In order to put a stop to these depredations, traps were set in the most likely places, but for a long time without success. However, one night, an old lady, one of the last of the original white settlers, hearing a commotion among her live stock, ran out to see what was the matter; her surprise, no doubt, was great when she found herself face to face with a large jaguar. She did not lose her presence of mind, but flourishing an umbrella, the only thing she had in her hand, she suddenly opened it full in the animal's eyes; upon which he was so startled, that possibly desiring to escape, and seeing only one opening, he immediately sprang through the door of the trap, which closed upon him securely, and the next morning he was executed without difficulty.—*Wickham's Journey.*

A good man showeth favor and lendeth; he will guide his affairs with discretion. Surely he shall not be moved forever: the righteous shall be had in everlasting remembrance; he shall not be afraid of evil tidings; his heart is fixed, trusting in the Lord.

#### A REVIEW OF LIFE.

I'm thirty years of age to-day!  
The thought is full of pain—  
How much of life has passed away!  
How little is the gain!  
The gain that *Everlasting Love*  
Would crown with endless bliss;  
The treasures of the world above,  
The crowning joy of this,—  
The few short years of childhood too!  
Of manhood's opening flowers!  
Oh hadst thou naught, my soul, to do  
But sleep the golden hours?

Alas! hadst thou a willing heed,  
In earlier life, have given,  
To mercies which alone can plead  
Before the bar of Heaven;  
An early sacrifice had then  
Been offered up to Him,  
Who loveth more the gift, than when  
The "lamp of life" is dim.

Then thou hadst early learned to know  
The paths of "peace in God"—  
The living fountain streams that flow  
Beneath His chastening rod;  
A drinking deep to thirst no more,  
A living, not by bread alone—  
A laying up a goodly store,—  
The treasures of the world to come.

Then youth had been a joyful spring,  
With all its buds and flowers,  
Whose cruel storms would only bring  
The soul-refreshing showers.  
And thou hadst hoped, in summer heat  
Of manhood's ardent noon,  
To bind the sheaves of golden wheat  
And bear the harvest home.  
But be it thine to work and wait  
And hope still tremblingly,  
That though the offering come so late  
The *Master loveth thee.*

#### IF WE WOULD.

If we would but check the speaker  
When he spoils his neighbor's fame,  
If we would but help the erring  
Ere we utter words of blame;  
If we would, how many might we  
Turn from paths of sin and shame!

Ah, the wrong that might be righted  
If we would but see the way!  
Ah, the pains that might be lightened  
Every hour and every day,  
If we would but hear the pleadings  
Of the hearts that go astray.

Let us step outside the stronghold  
Of our selfishness and pride;  
Let us lift our fainting brothers,  
Let us strengthen ere we chide;  
Let us, ere we blame the fallen,  
Hold a light to cheer and guide.

Ah, how blessed—ah, how blessed  
Earth would be, if we'd but try  
Thus to aid and right the weaker,  
Thus to check each brother's sigh  
Thus to talk of duty's pathway.  
To our better life on high.

In each life, however lowly,  
There are seeds of mighty good;  
Still, we shrink from souls appealing  
With a timid, "if we could";  
But a God who judges all things  
Knows the truth is "if we would."

#### Scientific Notes.

It is said that a stone suitable for houses, and rivalling in quality and texture the best Turkey stone, has been discovered in immense quantity in Newfoundland.

*The Oldest Coin.*—H. N. Humphreys says: "By a very high authority, an Ionian coin of the city of Miletus, now in the British Museum, has been considered to exhibit marks of more ancient fabric than any coin hitherto

Original.

discovered." The type of this coin, which is probably of the 8th century B. C., is a lion's head, frequently associated by the Greeks with their mythological legends, especially in the worship of Cybele. It is a gold coin, and of very rude workmanship.

*Accidents in Wood-working Machinery.*—Owing to the high rates of speed at which circular saws, and the cutters of moulding machines are run, accidents are frequent. Indeed most of those who have long been employed in wood-working mills, carry about them scars, which indicate that they have learned caution by the things they have suffered. The majority of accidents are the result of carelessness. In a recent work by I. Richards, on Wood-working Factories, there are some interesting observations respecting the connection between the mental characteristics of the workman, and the liability to accident. Men who perform their duties in a mechanical way, whose minds are apt to become absorbed in matters foreign to the work they have in hand, are specially unsuited to attend upon a circular saw. I. Richards says, that by attentively observing the dispositions of the workmen, he was enabled to reduce the accidents in a large establishment to a minimum. Whenever he detected a man day-dreaming or engrossed in thought, and found it to be the result of his natural temperament, he gave him some less dangerous employment, and kept those who were always clear-headed and attentive, to work the circular saws.

*Loss of Power in Machinery.*—Professor Jenkin, of Edinburgh University, in a recent address to his students, called their attention to this important subject. In a cotton mill, a portion of the power goes to drive the engine itself, a portion to drive the shafting, a portion to drive the scutching, carding, roving and spinning machinery, and a residuum is employed in actually scutching, carding or spinning the cotton itself. We are so accustomed to consider the work done in driving, say the carding machine, as useful work, that it may be a little difficult to see the distinction, between the work of driving the shafts, drums and levers of the machine, and the work of actually carding the cotton. The only really useful work, is the work of dragging the fibres of cotton into parallel directions. This would require some power, even if our machines were so perfect as to be without friction. The overcoming of this friction, and of resistance in the bearings of the shafting is a waste of power, though inevitable. To ascertain what this waste really amounts to, an experiment was tried in a large cotton factory in Bolton, one-eighth of which was placed at the Professor's disposal. The machinery of this one-eighth was kept running with the rest of the mill, but the 20,000 threads of cotton which it would have spun were broken off, so that it did no work, and the difference in the power employed was carefully noted. The conclusions at which he arrived were, that more than one-third of the whole power of the steam is required to overcome the friction of the engine and shafting alone. More than one-half of the power is spent in driving the machines used in the preparation and spinning of the cotton. Less than one-sixth, perhaps as little as one-tenth of the whole power, does the actual work of preparing and spinning the cotton, the other five-sixths or nine-tenths being wasted.

*Purification of Drinking Water.*—Water may

Selected.

contain a large quantity of peaty organic matter—as much as 4 or 5 grains to the gallon—and be harmless; whilst a very small fraction of this quantity of another kind of organic matter may make it a deadly poison. Soils generally are acid, and the drainage-waters from them are comparatively harmless. But, under conditions which are often found in tropical countries, putrefactive decomposition will commence, and malaria be the result. In the drainage-water from such a tract of country, the germs of fatal diseases are almost certain to be present.

That the poison is in the water, rather than in the air, is well illustrated by a circumstance related by Dr. Woods. Two ships were dispatched simultaneously with troops from Algeria to France, both under similar circumstances, except that the supply of water had been drawn in one case from the low marshy lands where ague was prevalent, whilst the other ship had taken water from a locality situated at a greater elevation, and where the disease was unknown. The passengers on board the first transport were quickly seized with remittent fever, whereas no case of illness occurred on board the second vessel.

To remove the putrefying organic matter from water, a writer in the *Chemical News*, recommends a mixture of permanganate of potash, and sulphate of alumina. He says he has seen the sewage of large cities converted by such means, in the course of a quarter of an hour, from an offensive-looking, vile-smelling liquid, into water bright, clear, inodorous and tasteless, and so free from injurious matter as to allow delicate fish to live and thrive in it.

For "The Friend."

### Degeneracy.

It is cause of mourning and sorrow, to consider the declension from first principles, that is taking place in our once highly favored Society; more especially in England, where were first raised up those worthies who proclaimed the everlasting gospel of our Lord and Saviour Jesus Christ in its purity, after the long night of apostacy and ritualism, in which the professing church had been involved. Though there had been some advances made from Romanism before, it was left for George Fox, and his coadjutors, to proclaim to the world again, that pure spiritual religion and worship, so abundantly testified of by Christ and his apostles in the New Testament. They not only proclaimed it to others, but exemplified by their lives and conduct its efficacy, and showed to the world their sincerity by suffering for their principles, which they considered of more value than their natural lives. Not only our first Friends, but since their day, there has been raised up in that land, down to but a very few years back, those who have stood, not only in words, but in their lives, for the same blessed cause and principles; and some, in a particular manner, warned Friends, over and over again, of what has now come upon them there; who, by the spirit of prophecy beheld the degeneracy that was coming on our Society in that country. Of these, we may name the following devoted ministers of the gospel of latter time, who were concerned thus to warn them:—Daniel Wheeler, Sarah Lynes Grubb, Thomas Shillitoe, George and Ann Jones, and John Barclay, who have no doubt gone to their everlasting rest in heaven; and their predictions, alas! how soon have they come to pass. The pro-

ceedings of the conference of the members of London Yearly Meeting show, that things have got to a low ebb there, as far as the principles of our religious Society are concerned. They seem to have let fall one principle after another, until there is very little left of true Quakerism, or pure spiritual Christianity but the name. Oh, how has the gold become dim—how is the most fine gold changed; they have gone back nearly to what early Friends came out of; and now, instead of waiting on the Minister of the Sanctuary and listening to His teaching, they seem to prefer to listen to the teaching of poor, fallen, finite man; and to the reading of the letter of the Scriptures, and to the explanations that men can put on them; instead of looking to that source of whom it was said formerly, "and He opened their understandings," that they might understand the Scriptures," and not to the intellectual powers of man. The scribes and pharisees read the Scriptures in their synagogues every Sabbath day, and yet neither understood them nor obeyed them. Well might the Lord say of them, as he did by the prophet to his degenerate people formerly: "My people have committed two evils, they have forsaken me, the Fountain of living waters, and hewn out to themselves cisterns, broken cisterns, that can hold no water;" substituting the teaching of men for the teaching of the Holy Spirit, which cannot err. And it might be said of this people as it was of Israel of old, "I have spoken unto you, rising early and speaking, but ye have not hearkened. And the Lord has sent unto you all his servants, the prophets, rising early and sending them, but ye have not hearkened nor inclined your ear to hear." The world has made sad inroads on our Society, in England as well as in this country; they have ladened themselves as it were with thick clay; which made the prophet cry out formerly, "Oh! earth, earth, earth, bear the word of the Lord," to some in like condition. For I believe, when the Lord shall turn again the captivity of Zion, we will be again redeemed from the earth, as it was with the company that John saw, who "were redeemed from the earth," or earthly nature, and "redeemed from among men;" it was such as these who were permitted to stand with the Lamb upon Mount Zion above, with harps in their hands, and sung the new song before the Throne. Though things look very discouraging at this time in our Society, I still believe there will be a remnant preserved who will not bow the knee to the image of Baal. Though the Lord said of his people formerly, "My people are bent to backsliding from me;" yet He says, "How shall I give thee up, Ephraim! how shall I deliver thee, Israel! how shall I make thee as Admah! how shall I set thee as Zeboim!" which shows the great mercy and compassion of the Lord for his people formerly; for as the prophet said, "It is of the Lord's mercies that we are not consumed, because His compassions fail not;" so we might say now. And as the Lord turned again the captivity of Israel formerly, so, I believe, He will again visit us, and raise up Ezras and Nehemiahs, who will again build the walls of our Zion, and set up the gates thereof. But we must first turn unto Him with all our hearts, and put away the strange gods from amongst us, and serve Him alone. That is, we must put away all of our own inventions in religion and worship—the

contrivances of man—and all will worship, and come back to that pure spiritual worship instituted by Christ himself; which He unfolded to the woman of Samaria when personally upon earth, and which was practiced by Friends in the beginning of our Society, and from then to the present time, by all faithful Friends. I believe, if those few in England who wish to stand for the original doctrine of Friends, would stand firm and have the zeal and courage to face opposition which early Friends had, and not give away their strength in any way, by going in with any of these new things by which some in this day are endeavoring to improve old-fashioned Quakerism, that things would soon be different there. For their and our encouragement, I want us to remember how it was with Richard Davies, who stood alone in Wales for some time, though he seemed to be set upon on every side by opposition of different kinds; but through all, he patiently and faithfully maintained his testimony; and in time there was a large meeting gathered there of faithful men and women, who were willing to suffer with him for the good cause which he had espoused, of truth and righteousness in the earth;—and so it was in the early days of our Society, in a great many other places. Wherever there were faithful Friends that patiently and faithfully bore their testimony before the world, and in the face of all the opposition that could be brought to bear against them, they soon became as a city set upon a hill, that could not be hid, and there was a gathering unto them of many seeking souls, who had been wandering up and down, seeking the living amongst the dead—the dead forms of an empty profession—going from one set of forms to another, yet not satisfied, but burdened and groaning under their sins; and when they found our crucified and risen Lord, and his spiritual religion and worship unencumbered by forms and ceremonies and outward observances, as practiced by Friends, which they had so long sought in vain, they joined with them in upholding it before the world. So now, if the same standard was again set up by Friends,—the same doctrine and testimonies faithfully maintained, and the same everlasting gospel proclaimed under the same authority as it was then—there would, I have no doubt, be a gathering again of those who are weary with empty forms and outward performances, "which can never make the comers thereunto perfect." But it is not worth while for us to endeavor to increase our numbers, or even to retain what we have, by lowering the standard of Quakerism to suit the world and the worldly-minded professors, who want an easier way than that east up for the ransomed and redeemed to walk in; for there is enough already of that kind of religion in the world. But what is needed now is, pure spiritual Christianity revived—that set up by Christ himself, and practiced by the early Christians and by faithful Friends—not the mere will-worship of man, or the forms and ceremonies set up in the apostacy.

J. H.

Ohio, 1st mo., 1874.

*Forests and Rainfall.*—George May Powell, chairman of the Committee on Forestry, read the following report:

Some remarks made at the club two weeks ago, seem to call for the following statements. The Oriental Topographical, in the service of

which I was when I wrote the letter from Mount Lebanon (some points of which were then discussed by the club), has no connection with the general government, nor with the British society, its American branch or any other of the worthy organizations doing so much good in that Eastern field, both for science and for Bible study. This corps is a private, independent corporation. With regard to the acid mulberry, granting that it must be confined to Southern climes, and that it is short-lived—neither of which I think is correct—I would suggest, that as this club is a part of the American Institute, our Southern friends may have some interest in the matter.

The inaccuracy of the statement that the great size of the grapes grown in the vicinity of Hebron is owing entirely to the manner of trimming, will be seen by any one examining the grapes grown in any other part of Asia or Africa. In many portions of these regions the grapevines are trimmed in precisely the same way as there, but nowhere else are the grapes, as far as I have seen, half as large as these.

The statements of Dr. Smith, of the great fertility of the soil of Palestine (specimens of which the Oriental Topographical Corps has, and, if the club please, will exhibit), are, I am sure, borne out by the facts, where culture and water are applied. The portions where culture and water are applied are small in comparison with the whole country, but they are rapidly increasing both in size and number. In relation to trees promoting rainfall, permit me respectfully to submit a few of the bewildering number of "stubborn facts" on this head. Palestine, portions of Europe drained by the Elbe, and of this State drained by the Hudson, and also portions of the Ohio Valley have been deforested. The Jordan is four feet lower than in the time of Josephus. The Elbe is ten feet lower than when its banks were clothed with trees. Dry cultivated lands are in the former beds of perennial trout streams in the Adirondacks, and the length of the season of navigation of the Ohio is not only reduced one-half, but that half is available only for boats of half the size of twenty-five years ago. On the other hand, the French in Algeria, and the Austrians and Egyptians in portions of their countries, have vigorously pursued a tree planting policy, and in each of these lands several rainy days have been added to the year. By the same policy in Utah, Salt Lake has been raised seven feet, and the streams greatly increased in volume. Humboldt significantly calls attention to the same classes of facts noticed in his travels. Turning from facts to philosophy, it would certainly seem probable that trees would promote the good effects of rainfall by their roots loosening the soil, so that, like a sponge, it should absorb the rain, preventing its sudden plunge into the streams, causing freshets, and retaining it to prevent droughts; the roots also clasping the soil and preventing its being carried to the streams to impoverish the hills. The trees in turn, through their leaves, gradually pump back the moisture into the air, and by their cooling influence on the air help to compress the aerial sponge, bringing the moisture down again, and by this double action regulate the rainfall, as the governor regulates the steam-engine. The experiments of Von Pettinkofer and other German and French botanists demonstrate that the leaves thus pump a greater volume of moisture into

the air in a given area, where there are forests, than the rainfall itself, showing that the deep fountains of the streams are thus made to subsolve the distribution of the life-giving water.

The general opinions expressed on this subject coincide, in the main, with those put forth by Mr. Powell. All agreed that trees, whether forest or fruit, tended to promote the fertility of the soil on which they grew. Some, however, said that corn was quite as effective as trees in regulating the rainfall, and they expressed a decided preference for its cultivation.

Selected.

It is a circumstance worthy of observation, that the Discipline of our Society, can never be faithfully administered, where the peculiar testimonies are not strictly maintained. A neglect of any one of these testimonies, whether it be as regards plainness in dress, address, or manner of living; the known scruple of Friends against war, oaths, an hireling ministry; moderation in trade and business, or the due attendance of our meetings for Divine worship, necessarily disqualifies a person for laboring to reclaim those who may have violated the rules of the Society in other particulars. Hence it becomes highly important, that all those who are actively engaged in the affairs of the church, should exercise a watchful care over their own conduct, and that of their families—that, as far as lies in their power, no occasion of reproach may be brought upon the high profession we make of being the self-denying followers of Jesus Christ. And as we believe the Discipline to have been instituted in the wisdom and under the guidance of the Holy Spirit, and founded upon the restoring love of the Gospel, so nothing short of this influence of a degree of the same Divine Spirit, can qualify for duly administering it.

### Birds and their Food.

#### THE VORACITY OF INSECT LIFE.

Some interesting information relating to the ravages of insects, was given says the *London Times*, by C. O. Groom Napier, to the House of Commons Committee of last session on the protection of wild birds. In 1782 the caterpillars of the brown-tail moth were so numerous as to defoliate the trees of a very large part of the south of England. The alarm was so great that public prayers were offered in the churches that the calamity might be stayed. The poor were paid one shilling per bushel for collecting caterpillar's webs, to be burnt under the inspection of the overseers of the parish; and fourscore bushels were collected daily in some parishes. The brown-tail moth is a beautiful little white insect, about an inch in expanse of wings. C. Napier noticed that in 1853 it defoliated about 20 feet of a hedge near Parkstone, Poole; and in 1855 the caterpillars riddled and deprived of their leaves two plum trees in his garden at Lewes, one of which died. The caterpillar of the gamma moth is one of the most injurious to garden plants; it principally feeds at night, and, concealing itself by day, is unperceived. The gamma moth overran France about a century ago, and devoured a very large proportion of the crops, but fortunately, the corn was not attacked. The antler moth is sometimes extremely destructive to grass crops. Mr. Napier once saw millions of these on the Wrekin, and in the following summer

the grass of that mountain was in a miserable state. The lackey moth is very destructive to filbert plantations, cherry orchards, at other tree plantations. The buff tip, the cabbage moth, and the small ermines are very destructive to the leaves of fruit trees at garden shrubs.

But, on the other hand, the benefits derive from the labor of some insects should not be overlooked; some species feed only on noxious weeds, and others prey on still more noxious insects. One of the greatest friends of the agriculturist is the family of ichneumon flies which lay their eggs in living caterpillars, in which they are hatched, thus destroying them; although the caterpillar, after being "ichneumon," has still a voracious appetite. The caterpillars which feed on the cabbage eat twice their weight in a day; the larvae of some of the fleck flies eat a much larger proportion than this. The productive powers of insects vary very much. Some lay only two eggs; others, such as the white ant, 40,000,000, laying them at the rate of 60 a minute. The queen of the hive bee is capable of laying 50,000 in a season; the female wasp 30,000. The majority of insects, however, lay but about 100; in general, the larger the insect, the fewer eggs it lays. Most insects have two generations in the year; some have 20; others take seven years from the time the egg is laid until their natural death in perfect state. But probably not above five per cent. of the eggs laid become perfect insects.

Of his kind the daddy-long-legs is one of the most destructive, especially in France; it feeds on the roots of grass, and C. Napier in 1859 noticed meadows in La Manche devastated by it. The starling is a bird most useful in destroying these larvae, and those of the horse and cattle flies. The orthopteron insects, of which the locust, grasshopper and cockchafer are examples, are very destructive. The numerous species of grasshoppers lessen the amount of our grass crops. Locusts are seldom found in England now in sufficient numbers to do any damage, but they have done considerable damage here in former generations. Their greatest enemies are the starling and the rose-colored pastor, which follow them in flocks and decapitate them by hundreds. The beetles are immensely numerous, as regards species. In 1574 the cockchafers gathered in such numbers on the banks of the Severn as to prevent the working of the watermills. On another occasion in Galway, they formed a black cloud that darkened the sky for the distance of a league and destroyed the vegetation so completely that summer seemed turned into winter. They made a noise resembling the sawing of wood. The people, threatened with famine were obliged to devour them. In 1804 they were alarmingly numerous in Switzerland. The female lays about 30 eggs; in six weeks they are hatched. They live from three to four years in the larva state. The first year they do not do a great amount of damage; but in the second year they attack the roots of all plants within their reach. They often ruin the crops of corn, lucerne, strawberries, and various plants on which man depends for food. Our insectivorous birds are diligent in destroying the larvae of insects, but they will not do all that is required; hand labor is also needed. C. Napier is of opinion that the extensive diffusion of information on the

bits and means of destroying our more vicious insects would be the means of saving millions of pounds' worth of valuable food every year. He says that in the United States the importance of this subject is felt, and almost every State has a government entomologist, whose business it is to make inspections and reports of the ravages of insects, and show the remedy. In France, government returns were published, from which it appeared that the damage done in Normandy by the cockchafer alone amounted to 25,000,000 francs. A law was passed in France a few years since for the protection of birds. It, however, that all birds are to be welcomed; the sparrow does more harm than good, by feeding so much on green crops, and the wood-pigeon does much mischief. But, the whole, C. Napier is certain birds do a great deal more good than harm.—*Late paper.*

Selected.

A sister of the family of Penn, in Buckinghamshire, a young woman delighting in the joys and pleasures of the world, was seized with a violent illness which proved mortal to her. In the time of her sickness she fell into a state of distress of soul, bitterly bewailing the want of that inward peace which makes a man's bed easy to the righteous. After several days languishing, a little consolation appeared in this manner. She was some hours in a state of trance; in which she apprehended she was brought into a place where Christ was; and whom if she could deliver her petition, she would be relieved. But her endeavors increased her pain; for as she pressed to deliver, he turned his back upon her; and would do so much as look toward her. What added to her sorrow, was, "that she beheld others admitted." However, she gave not over imitating Him; and when almost ready to die, and her hope to sink, "He turned one side of his face towards her, and reached forth his hand, and received her request: at which her troubled soul found immediate consolation." Turning to those about her, she related what had befallen her; adding, "Bring me my new clothes; take off the lace and jewelry;" and charged her relations, "Not to dress and adorn themselves after the manner of the world; for that the Lord Jesus, whom she had seen, appeared to her in the likeness of a plain country man, without any trimming or ornament whatever; and that his servants ought to be like Him."—*No Cross No Crown.*

#### Underground Railway in London.

The Metropolitan Underground Railway in London is situated on the north side of the River Thames, and consists of a main line with several branches. What may be termed the main line, and which will be sufficient to give an idea of the whole system, will, when completed, form an irregular oval, commencing at the Tower, following up the river beneath the new "Thames Embankment," as it is called, the Houses of Parliament, thence inland to Kensington, curving north through Kennington by Pembroke square to Paddington, thence along the north side of the city, through Marylebone road by King's Cross and St. Pancras, back through the city proper to the place of beginning, being in the neighborhood of fourteen miles long, and touching the principal railway depots in the city. It does not follow the streets, cuts through blocks in every direction, and generally

passes beneath the gas and water pipes and sewers. The great Fleet-ditch, one of the largest sewers in London, is carried across in a wrought-iron duct resembling a tubular bridge, at one of the open cuttings near King's Cross.

As to construction, the road is for the most part in a tunnel, the open cuttings averaging less than one-third of the distance. The excavations are described as being mostly in clay, with occasional veins of sand and gravel.

The tunnel is solidly built of brick in the shape of "a horseshoe," with an average width of twenty-eight feet, and is nowhere less than 15½ feet high. The foundations are laid in concrete, and the haunches of arch carried up with same material to nearly the level of the crown, the whole top of the tunnel and haunches being covered with a layer of asphalt one and a half inches thick, to render the arch water-proof, and any water that may collect thereon is carried by an earthen pipe 4 inches in diameter to the drain beneath the road-bed. The open cuttings average twenty-five feet in width, and are generally about fifteen feet below the surface, the sides of which are kept in place by "retaining walls," built up on a batter of about one inch to the foot to the surface, upon which are erected parapet walls nine feet in height. In some places these open cuts are covered, as in passing under a street or building, in which case the side projections are carried up to receive cast-iron girders, on which arches of brick are built from one to another, and filled in with brickwork or concrete, over which lays the material and pavement of streets. When passing close under buildings, wrought-iron girders are used.

Double tracks are laid throughout, and trains run both ways every five minutes. The locomotives are small and compact, emitting neither smoke nor steam, and burn coke.

The carriages are lighted with gas, and are built with compartments in the usual European style, with doors at the sides, allowing the rapid exit and entrance of passengers, which, notwithstanding their other faults, is a great consideration in their favor for rapid city transit. The ventilation of the tunnel is stated as being "very far from perfect" and "often oppressive," but it does not appear to affect the passengers or employes, although two persons died on this road in 1867, but in neither case did the coroner's inquest refer the cause directly to want of ventilation.

The gross cost of construction and right of way amounts to about \$2,900,000 per mile, in currency, and has proved a financial failure, although at one time supposed otherwise.—*Late Paper.*

#### Walking in the Spirit.

Whosoever will be a follower of Christ must first learn to deny himself. We must turn from whatsoever the eternal light in our own hearts shows us to be selfish, though it may seem never so much to our disadvantage; and by denying ourselves we shall abundantly deny the author of all evil motions.

Pride, pleasure and unrighteous gain, are baits that have caught many; all which, with many other things, we must deny and turn from if we will be followers of Christ in a righteous life; and by such denials we shall find the root of iniquity wither, and grace grow; sinful motions will diminish, and heavenly desires increase; the small seed will be-

come the tallest herb, and the lump come to be one in nature with the leaven.

But this denial must be whilst the cockatrice is yet in the shell; whilst sin is in the motion, before it comes to action; for sinful motions may be turned from, but sinful actions are past recall. And what can show us the rising of evil motions? Preachers cannot; books cannot; nothing that is without can effectually show us what is within; it must be an inward light; it must be the candle of the Lord, the eternal Spirit that was in the beginning given unto man for an instructor.

There were in the creation good men, faithful men, self-denying men, when there were no preachers, nor books, that we read of: and who was their teacher but the eternal Spirit? What guide had they but the light of righteousness in their own hearts? And did our present preachers make it their concern to turn people's minds to eye this inward guide, and to become faithful followers thereof, we should have more good men, faithful men, and self-denying men, than can now be found.

Men or angels could not give better advice to a people that was turned to this inward light than Paul gave to the Galatians, when he exhorted them to "Walk in the Spirit;" for if we are not guided by a right spirit we can never lead a righteous life.—*Hugh Turford.*

## THE FRIEND.

SECOND MONTH 7, 1874.

When setting out on the voyage of life, we are prone to think that we can command, all the order and discipline necessary for encountering the storms that may arise, or for bearing up against the adverse gales that may cross our course. Ignorant of the serious nature of the responsibilities resting upon us, and that all our capacious powers include no one that can, of itself, guide us to the knowledge of ourselves, or of Him whom to know is eternal life, what would become of us were it not that He "whose way is in the sea, and whose footsteps are not known," cares for us with a father's love, and offers to be our guardian and guide, so that by obeying his directions, our false notions may be corrected, the fallen spirit transformed, and the newly created man staid in perfect peace upon Him.

This wondrous work, this miraculous change, if witnessed, must be carried on between the soul that has sinned, and Him who not only made it, but who has provided the means whereby it may escape from the guilt and power of sin, and, being born again, know what it is to grow from a babe to a strong man in Christ Jesus.

All are called to perfect holiness in the fear of the Lord. The command to all is "Be ye holy in all manner of conversation." When the true Light shineth in the heart, as in a dark place, how quickly are we made sensible, that, highly gifted in natural talents as we may be, they give us not the capacity to fathom the corruption of the unregenerate heart, nor to detect all the temptations congenial to our evil propensities, nor to foresee the consequences that will follow yielding to them. Experience also soon teaches us we have not the innate power to extricate ourselves from the force of temptation assailing our frail nature; much less to perfect holiness in the

fear of the Lord. But the religion of Christ is adapted to meet all the needs of humanity, and all the exigencies of life. While it provides for the forgiveness of the past sins of the repentant sinner, and reconciliation of the contrite soul to its justly offended Creator, it includes its purification by the washing of regeneration and the renewing of the Holy Ghost; which as it is submitted to, renders it susceptible to the enjoyment of that peace which passeth understanding, while at the same time, it "receives new faculties; or learns at least more worthily to employ the powers it owned before," so as to appropriate with a keener zest the beauties of the outward creation.

The outpouring of the Holy Spirit upon all flesh [all mankind], and thus placing the divine law in the hearts of all; foretold by the prophet Joel as characterizing these last days, or the gospel dispensation, is therefore an "unspeakable gift." For it is by obedience to this law of the Spirit of Life in Christ Jesus, that any are set free from the law of sin and death, which, through transgression, reigns in the natural man. Nothing then can be trivial or unimportant that contravenes this divine law.

If we are sincere in the prayer, "Thy will be done on earth, as it is done in heaven," that will must be done by us in all things. To have ready access to a knowledge of that will, we must seek to Him to communicate it by his Spirit to the soul, in its specific requirements; to point out how it is to be done, and to furnish the ability to perform it. The apostle, addressing the Elders of Ephesus, says: "I commend you to God and to the word of his grace, which is able to build you up and to give you an inheritance among all them which are sanctified." This is the gospel preached in every soul, and is the power of God unto salvation to every one that believes, whereby "the righteousness of God is revealed from faith to faith." It is by obedience to this word of Divine Grace, that the law in our members that opposes this law of the Spirit of Life, in order to keep the soul or to bring it into the captivity of sin, is overcome, and we introduced into the glorious liberty of the children of God.

How truly does the apostle, in describing the struggle for supremacy between these two laws, express the almost despairing feeling of the newly enlisted disciple, still feeling the strength of the law in his members, but learning to take up the daily cross and follow his crucified Lord as He is manifested within: "O wretched man that I am, who shall deliver me from the body of this death!" But if obedience is yielded as knowledge is received, the victory is sure, and the soul enabled, through living experience, to return thanks therefor through Jesus Christ, who proves himself a perfect Saviour both by his work without us and his work within.

#### SUMMARY OF EVENTS.

**FOREIGN.**—The elections for members of Parliament are progressing in England amid much excitement. In 56 elections held last week, the Conservatives returned 31 members and the Liberals 25. Gladstone, Bright and others, are addressing large meetings. Both Liberals and Conservatives seem confident of success.

The weekly return of metropolitan pauperism shows that the total number of paupers in London at the end of the first week in 1874, was 105,795, of whom 36,226 were in workhouses, and 69,569 were in the receipt of out-door relief. Compared with the corresponding

weeks in the years 1873, 1872 and 1871, these figures show a decrease of 4056, 16,852 and 44,581 respectively.

The receipts of tea in Great Britain have steadily fallen off during the last three years, although the consumption has increased. The decrease has been in the trade in tea with the continent of Europe, whose buyers are now making direct shipments from China. The consumption in the United Kingdom in 1871 amounted to 123,500,000 pounds; in 1872 it increased to 127,750,000 pounds, and in 1873 reached 132,000,000 pounds.

While the express passenger train from Edinburgh for Glasgow was running at great speed, it came into collision with another train. Several of the cars were demolished, sixteen persons instantly killed, and many others received severe injuries.

London, 2d mo. 2d.—The rate of interest at the Stock Exchange on government securities is 3 per cent.

Liverpool.—The markets for cotton and breadstuffs quiet and unchanged.

In Alsace the French candidates for the Reichstag have been elected by large majorities. A profound sensation has been caused at Versailles by articles in the North German Gazette, urging restrictions on the freedom of the Church and Ultramontane press in France and Belgium.

A special dispatch from Berlin to the Post says, the Shah has made an explanation to the foreign Powers regarding the annulment of the concessions to Baron Reuter. He says responses to inquiries made while he was in Europe led him to believe that the undertaking would not receive the necessary financial support, and therefore the six months' grace which was urgently requested before the commencement of the work was refused.

Information has been received from the Gold Coast that the British forces had penetrated about thirteen miles beyond the river Prah. A large number of the troops who were disabled by sickness, have been sent back to England.

The cholera has broken out in Acheen. It is rumored that the Sultan has died of it and that the war is virtually over.

The reported successes of the Carlists in the north of Spain are denied at Madrid.

The diplomatic representatives of Spain have been provisionally recalled from Berlin, Vienna and other European capitals.

A Constantinople dispatch of the 2nd says, a fire in this city last night destroyed over a hundred houses, including the residence of the Grand Vizier.

Herr Brenan, the German explorer of Africa, in a letter to Dr. Peterman, of Gotha, dated at Zanzibar, says Dr. Livingstone died on August 15th. This date differs from that of the previous report; but all doubt has been set at rest by an official dispatch received by the government to-day from Zanzibar.

The dispatch says, circumstantially, that Livingstone died in Lobesa after crossing the marshes, with the water at one time for three days consecutively above his waist. The sufferings of his whole party were terrible, and ten of them died in consequence. The members of the Cameron expedition were suffering from fever and ophthalmia, but would await the arrival of the Doctor's remains and bring them to Ujiji. From the latter place they would be taken to Zanzibar, where they will arrive probably next month.

**UNITED STATES.**—The Public Debt amounted on the first inst., less cash in the Treasury, to \$2,157,470,114, which is \$1,845,211 less than it was a month previous.

There were 518 deaths in New York city last week. The interments in Philadelphia from the 24th to the 31st ult., were 276 in number, including 83 children under two years of age. There were 43 deaths of consumption and 19 inflammation of the lungs.

The mean temperature of the First month, by the Pennsylvania Hospital record, was 37.03 deg., the highest during the month 65.50, and the lowest 11 deg. The rainfall 4.21 inches. The average of the mean temperature of the First month, for the past 85 years, is stated to be 31.40 deg., the highest mean in that entire period occurred in 1790, and was 44 deg., the lowest was in 1857, 22.37 deg.

The weather was intensely cold last week in Canada and portions of the north-eastern States, the temperature at times ranging from zero to 48 deg. below, in some situations.

On the 29th ult. a large edifice, on Market street between 12th and 13th streets, Philadelphia, known as the Olympic Theatre, was destroyed by fire, together with some of the adjoining property. Total loss about \$200,000.

The sugar crop of Louisiana is estimated for this season at 100,000 hogsheads, last years crop having yielded 108,520 hogsheads.

The Board of Indian Commissions, in their fifth annual report to the President, express satisfaction with the encouraging results of the peace policy of the government in its management of Indian affairs. With partial and unimportant exceptions, the policy has been followed by peace since 1868. The temper of the Indians has, they believe, so improved under this treatment that they will soon be submissive to all reasonable requirements. Several of the wild tribes are soliciting schools and appliances of civilization, and others ask for reservations.

**The Markets, &c.**—The following were the quotations on the 2nd inst. **New York.**—American gold, 111 U. S. sixes, 1881, 117 $\frac{3}{4}$  a 118 $\frac{3}{4}$ ; ditto, 1867, 117 $\frac{3}{4}$ ; ditto, 10-40 5 per cents, 110 $\frac{1}{4}$ . Superfine flour, \$5.90 a \$6.2 State extra, \$6.55 a \$6.85; finer brands, \$7 a \$11. No. 1 Chicago spring wheat, \$1.60; No. 2 do., \$1.54 a \$1.5 red western, \$1.65; amber do., \$1.70; white Michigan \$1.94. Oats, 60 a 64 cts. Western mixed corn, 82 85 cts.; yellow, 86 a 87 cts. **Philadelphia.**—Upland and New Orleans cotton, 16 a 17 cts. Superfine flour \$5 a \$5.50; extras, \$6 a \$6.65; finer brands, \$7 a \$10.5 Red wheat, \$1.60 a \$1.65; amber, \$1.68 a \$1.70 white, \$1.80 a \$1.85. Rye, 96 cts. New yellow corn 78 a 81 cts.; white, 85 cts. Oats, 55 a 64 cts. Lar 9 $\frac{1}{2}$  a 10 cts. Clover seed, 8 $\frac{1}{2}$  a 9 cts. Beef cattle were in demand and higher. Sales of 2000 head at 7 $\frac{1}{2}$  a 7 cts. per lb. gross for extra; 6 a 7 cts., for fair to good and 4 a 5 $\frac{1}{2}$  cts. for common. Sheep sold at 5 a 7 $\frac{1}{2}$  c per lb. gross and hogs at \$9.25 a \$9.50 per 100 lb. **Baltimore.**—Yellow corn, 76 cts.; white, 80 a 83 c Oats, 50 and 56 cts. Wheat, \$1.75 a \$1.78. **Chicago.**—No. 1 spring wheat, \$1.24; No. 2 do., \$1.20; No. do., \$1.15. No. 2 mixed corn, 58 $\frac{1}{2}$  cts. Oats, 43 c Rye, 80 a 82 cts. Spring barley, \$2 a \$2.05. **St. Louis.**—No. 2 winter red wheat, \$1.67 a \$1.70; No. 2 spring, \$1.25. Corn, 61 a 61 $\frac{1}{2}$  cts. Oats, 46 $\frac{1}{2}$  cts. Spring barley, \$1.75. Rye, 85 cts. Lard, 8 $\frac{3}{4}$  cts. **Cincinnati.**—Wheat, \$1.45 a \$1.48. Corn, 58 a 61 cts. Oats, a 54 cts. Lard, 9 a 9 $\frac{1}{2}$  cts.

#### WANTED.

Superintendent and Matron for Emlen Institution for benefit of boys of African and Indian descent, Farm in Bucks county, Pa.: a good practical farmer, and wife, a tidy managing housekeeper, both qualified for the proper training of youth for usefulness on earth and a preparation for heaven. Address, Israel H. Johnson, No. 16 North Seventh St. Thos. Stewardson, Jr., cor. Mill and Chew Sts. Germantown, Philadelphia. 1st mo. 27th, 1874.

"The Germantown Employment Society for Women has for sale, at a low price, a large supply of substantial clothing for men, women and children, suitable to send to the Freedmen and Indians. To those purchasing to the amount of \$20 or over, we will make a reduction of 10 per cent. Application may be made to Sarah Ann Matlack, corner of Shoemakers Lane and Wakefield St.; or, Martha H. Garrett, corner of Green and Court streets.

#### WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of this Institution are expected to be vacated at the close of the Winter Session, in the 4th month next, Friends who may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee, Nathaniel N. Stokes, Cinnaminson Post-office, Burlington Co., N. J.

Charles Evans, No. 702 Race St., Philadelphia.

Deborah Rhoads, Haddonfield, N. J.

Rebecca S. Allen, No. 335 S. Fifth St., Philadelphia.

#### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WORTINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

DIED, at his residence, near Trenton, New Jersey, 11th mo. 11th, 1873, SAMUEL ELLIS DECOU, a member of Chesterfield Monthly Meeting, in the 62d year of his age.

WILLIAM H. PILE, PRINTER.  
No. 422 Walnut Street.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, SECOND MONTH 14, 1874.

NO. 26.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

stage, when paid quarterly in advance, five cents.

For "The Friend."

## Account of Recent Adventures and Suffering in the Arctic Regions.

An account entitled "Two Tragedies in the Arctic Regions," has lately appeared in the French journal, *La Nature*, which, besides its intrinsic interest, contains so instructive a moral, that it has been thought well to translate it for the readers of "The Friend." It is right to state that some passages have been slightly altered, and some, describing details of a very dreadful character, altogether suppressed; the account is substantially as follows:—

The Historical Society of Paris owes to the French Consul at Christiania, and to the Minister of Foreign Affairs, a detailed recital of two tragedies, one of which has been briefly produced in *The Official Journal*, taken from Norwegian papers, the other is almost unknown in France. The two catastrophes demonstrate once more how vain have been the hopes of the geographers, who thought to find, through the Arctic ice, ready communication between the two continents, and the two great oceans of our globe; and also how insufficient of themselves are the well appointed houses of refuge which have been established in the far north for the shelter of explorers obliged to winter there.

The Norwegian vessel, "The Freya," was, in 1872, one of those strong fishing vessels which Norway sends every year in pursuit of seals and walrus among the icebergs of the pole. Her commander, Captain Tobiesen, had made a good voyage, and was preparing to return to Norway, when, at the end of the sixth month, contrary to expectation, he found himself entangled in ice on the north coast of Nova Zembla. After vain attempts to break the ice or discover a passage through it, Captain Tobiesen informed his crew that they must resign themselves to go into winter quarters: this proposition was the more alarming, as it involved a residence of nearly nine months in a country without resources, in the midst of the solitude and darkness of the polar night, with the apprehension that the day, already excessive in the middle of autumn, could not fail to become fearful in the winter. One truly alarming feature of the situation was the absence of the food necessary for such

a sojourn, for they were only provisioned for the voyage of 1872, and it was unheard of that the sea should be closed before the last days of the Tenth month. They took an account of their stock and found on close calculation that it was insufficient for the crew, which was composed of eleven men, there being only food enough for four or five persons even were the rations distributed with the most parsimonious economy. To attempt to keep all together was to devote the crew to certain death, seven sailors, therefore, decided to quit the ship, taking with them a sailboat, some boxes of matches, two guns, a small supply of powder and lead, a compass, a spyglass, fourteen biscuits, some tea and molasses, enough bears' meat for one meal, one sauce pan, one pot, and a hatchet. With this meagre provision they undertook their journey, leaving on board Captain Tobiesen, his son, the first mate and the cook.

The seven sailors at first dragged their boat on the ice for several leagues and set it afloat in an open passage, turning the head towards the south in the hope of either meeting a ship or of reaching the Waigatz Islands, where they were almost certain of finding at least an encampment of the Samoïades. Their eatables were soon exhausted, a bear and some seals which they succeeded in killing, furnished them with insufficient nourishment during their voyage; the sea became more and more rough, the wind more violent, and the cold greater. They proceeded thus for about three weeks, when they descried land and two small houses thereon, these they eagerly entered hoping to find there some provisions, but their hope was disappointed; the houses were deserted and completely empty: they had belonged to two Russians who had lately abandoned them. The Norwegians soon recognized that they were on Goose Island. Meanwhile the journey which they had just made under such trying circumstances had reduced them to such a state of disease and fatigue that they resolved to stay in this poor shelter, if it was only long enough to reestablish their strength; all had swollen feet, and some frozen extremities.

The two most healthy took their guns and went out to hunt, while their comrades proceeded to make some preparation for their accommodation, they were so happy as to kill a seal, two blue foxes, and four reindeer, but the game soon became alarmed and could no longer be found, it was therefore impossible to prolong their stay in this inhospitable spot. The Russians had left a little sledge, which was more useful than the boat, because they could proceed along the shore towards the south on the sea, which was frozen to a considerable distance from the coast.

After three weeks of comparative repose, they placed all their utensils in the sledge, to which they harnessed the men who did not carry guns, and thus followed the line of the coast, always hoping to reach the Waigatz

Islands. This second journey on foot was as suffering as the voyage in the boat, the cold was extreme, and blinding snowstorms caused them to lose their way. In one of these storms the two hunters disappeared, and with them the hope of the little provision which so far they had been able to obtain. They reflected upon their situation with alarm. What should they do? Should they pursue their journey with almost the certainty of perishing with hunger? Or, should they return to the abandoned houses, there to encounter prolonged sufferings? In their distress they resolved to cast lots: the lot decided that they should continue their journey. They had still some food which they economized as much as possible, and proceeded on their way slowly and painfully. At night they dug holes in the snow in which to sleep, one of their number always mounting guard at the mouth of the hole, both to keep off the bears and to prevent the snow so accumulating as to break in the roof of the cavern, and so smother the poor fellows to whom it offered so miserable a shelter, and also to arouse the sleepers who would otherwise have died in their stupor.

On the sixth night one of them died,—the others, exhausted, scarcely able to resist the tendency to sleep, famished and sick, abandoned their sledge and almost all their utensils, to drag on a little further. In this way they made fourteen miles in two days; all seemed over, when they discovered a pile of wood and tracks of a sledge, which the snow had not yet effaced. Were there men then in the vicinity? Hope electrified the unhappy travellers, who were reduced almost to the condition of corpses, and they dragged themselves with renewed energy along the track, which extended four or five leagues, and finally reached a cabin inhabited by Samoïades, on the southern extremity of Goose Island, at a spot called Gausenonos. The inhabitants of the cabin received them with every evidence of the liveliest commiseration; they were seven in number, three men, three women, and a young boy. This little group administered to the needs of the unhappy Norwegians with so much tenderness as to restore them to their feet.

The camp of the Samoïades was well supplied with provisions of all sorts, and particularly with reindeer flesh, flour, tea and sugar. They possessed two old flint-lock guns, which they used very skilfully, and they used in hunting not only the sledges whose tracks had been the means of saving the nearly dying sailors, but also small light boats which were very useful in the pursuit of seals. Here the Norwegians passed the rest of the winter, hunting with their hosts, when the weather permitted, and amusing themselves with games in the cabin when they could not go out. This healthful regimen completely re-established the strength of all with the exception of one man, who having been badly frost bitten remained in bed the whole winter.

In the Third month, their firewood being exhausted, they deserted their cabin and used the materials for fuel, substituting for it a tent of reindeer skin. The Samoiades, never passed a day without taking exercise in the open air, they were also in the practice of drinking the warm blood of the animals they killed, and by these habits they were preserved from scurvy. In many particulars their character was that of savages, their intellects dull, and their temper suspicious. They had been under the care of Russian priests, whose language they spoke, but their views on religious subjects seemed very different from the principles of Christianity; if they failed in killing important game, they fired a shot at the sun to make the Deity more favorable to them on another occasion. They frequently quarrelled, but never forgot the courtesy which they owed to their guests; they neglected no effort to find the body of the man who had died on the way, that they might bury it, but their efforts were unsuccessful.

(To be continued.)

John Heald.

(Continued from page 194.)

"8th mo. 23d. At Limington, a large meeting collected, mostly not of our Society. We were preciously favored, though in the forepart it felt to me that the strength of desire in the minds of the people was to hear words, and my mouth was shut for a time. Way opened to show that it was our duty individually to worship God, that we could not do this one for another. Could we call an attention to preaching, worship? Was it reasonable to suppose that the hearing of words is performing acceptable worship, when we consider that the Lord seeth not as man seeth; man looketh at the outward appearance, but the Lord looketh at the heart?

The communication was impressive and had place with them, and I felt thankful for the favor."

At Parsonsfield, on the 24th, John Heald was again exercised on the same subject, and pressed upon his hearers the need there was for each one to labor for himself in religious meetings. That worship could not be performed through the medium of the ear; and that one cannot worship for another.

"30th, First-day. We went in the afternoon to South Sandwich, where was a great collection of people of various descriptions. A weight of exercise lay on my mind, which I sat under for some time. Men of note and distinction were present, and way opening I went on to show that my concern was to do my duty and no more, so that I might have a conscience void of offence toward God. It was suitable and necessary that we should know what was required, and attend to doing it, but our own will should be brought into subjection to the Divine will. We might learn a form of words which we might use in prayer, but our hearts might not feel them. We may have learned that excellent prayer taught by our Lord to His disciples, so as to repeat it very correctly, and say: 'Our Father who art in heaven, hallowed be thy name, thy kingdom come, thy will be done'—when this act may be done in the creaturely will. Here is asking for His will to be done in doing our own will, and our will done and not His! Yet the soul that is humbled and feels what it

stands in need of, finds words that are understood by Him, to whom intercession is rightly made, and who delights to be called on in sincerity; and is graciously pleased to hear and grant the humble, breathing intercession made according to His will.

9th mo. 2d. My confidence is low and my mind humble. O how can I stand before the people, while I feel so poor and weak! Think on me, O my God. The meeting [at Gilming-ton] was attended by a considerable number of people of different appearances. The public exercise was very trying, because that which I delivered seemed to have little or no entrance in their minds. I expressed sympathy with a discouraged state, which discouragement I apprehended was increased by the unfaithfulness of some who made a high profession.

4th. At Concord, New Hampshire, I felt very great weakness, seeming as if I could scarcely hold up my head, but before the close of the meeting I felt a little strength revived, and I dropped a few expressions in regard to the profitableness of humility. At our lodging a very precious opportunity took place with a considerable number of young people. In it, I felt a renewal of strength and confidence. Thankfulness filled my heart for the favor.

6th. At Weare, I set forth the privilege of free Gospel ministry; that as I did not look to man for pay or applause, I was not bound on that ground to deviate to please or displease, as I only expected, if I obtained any good reward, to receive it from the Dispenser of good. On this ground, I thought myself under no temptation to gratify any with words.

13th. At Richmond, being First-day, many came in and filled the house. I said, most thoughtful, religiously-concerned people, I suppose, when they assemble in this capacity, desired to find some profit, or gain some instruction by it. If this desire tends to quicken the attention so as to avoid that which is offensive to the great Giver of the desired favor, then it will be profitable. Evil will be avoided, and the desire will be extended to doing acceptable service. Here, ceasing to do evil, and learning to do well, will be experienced; and this desire will be known to be a living desire, living and abiding in the heart. As it is thus attended to, and that which is known to be wrong avoided, there will be a portion of peace of mind enjoyed; but if, at any time, such should indulge in what they know to be wrong, then condemnation ensues. This accords with what an apostle testified, If our heart condemn us, God is greater and knows all things, but if our heart condemn us not, then have we hope toward God.

14th. Israel Laben conducted us to Pelhans, about forty miles. In this place we were told that David Buffum had a plantation worth \$2500 sold for priests' wages, the demand \$8. This is the last meeting in New England Yearly Meeting, and I have attended one or more meetings at each meeting-place of Friends in this Yearly Meeting. While I note this, I think it as humbling a prospect as at the first—the meeting time now coming on. How much satisfaction may be missed of, if I should be so unguarded as to advance counsel not called for by the Head of the church, or withheld through human weakness. May I be preserved, and be faithful, and the reward is sure.

15th. I passed the meeting in silence, only a few words by way of remark.

19th. We passed on into the State of New York, to a meeting called White Creek. A I rode on the way to-day, I felt a particular satisfaction on a review of my past labors, no discovering that I had omitted anything required, and that I had been careful not to exceed my bounds. I now hope that if I get through the remainder of my prospect, I am favored to return home, it will be in peace.

20th. We attended the aforesaid meeting. My labor was on the subject of worship, holding it to be a Christian duty. If it be dispensed with, what is Christianity without it? Can there be anything profitable in profession without knowing a performance of it?

22d. We went to Mount Holly Meeting which lays easterly, and crossed the Green Mountains on the way. We rode over rock and stones, through woods and mud. The Author of my existence knows my painful steps, and my desire to serve Him in sincerity. To Him I look for preservation, and on Him do I depend for support, and I look to none else for reward for what I pass through. He has hitherto been my helper in the time of need, and bountifully rewarded me. O my mercies and favors be continued, and may I be faithful to Him, that I may bless and praise His holy name, who is now and ever lastingly worthy thereof. Amen.

27th. Attended Ferrisburg Meeting. I felt a weight of concern on my mind. The testimony went to arouse the careless, the profigate, and such as were desirous to stifle conviction and live to the delights of sense; and also to encourage the well-disposed to continue in a humble, watchful state of mind. watchfulness is neglected, a state of ease and formality is likely to follow.

30th, At a meeting on Grand Isle, Lake Champlain, I endeavored to impress on the children the necessity of obeying the command, 'Children, obey your parents in the Lord, for this is right.' When this was done I said, 'Parents, bring up your children to the nurture and admonition of the Lord, and do not provoke them to wrath.' When parents do not walk in the paths of piety, how can they train up their children in those paths? Will it do to say to them: 'This is the way that leads to happiness. I would have you walk in it; I entertain strong desires for your welfare, but I am not ready to set you an example, that I want you to follow; I want you to leave practices that I am practicing?' How can a parent instruct a child to walk in the way he should go, and not go in it himself?

The meeting became a solemn, instructive one, because of the overshadowing of Heavenly regard—praised be the Giver of the blessing."

10th mo. 1st. At a meeting at Peru, among other matters, J. Heald spoke of the anxious attention which was given in settling temporal accounts, to have everything in readiness at the time of trial, so that the persons might get his just rights, though the matters at issue were comparatively unimportant and contrasted it with the carelessness evincing in regard to the day of final decision, which some seemed scarcely to remember.

"4th. At Montpelier. The meeting was quiet, thronged, mostly of other people, Friends being few. My exercise became weighty, and I found it my place to bear testimony among them, to encourage them to a religio-

course of living; in the first place, 'Forsake ye the assembling of yourselves together as ye have done in the manner of some is.' I endeavored to show that it is our reasonable service to offer ourselves living sacrifices, wholly acceptable to God. Towards the close, I said, People had various motives for going to meetings. Some went with desires of doing their duty. I apprehend some went to watch and look out for faults, and having found what they suppose to be one, they treasure it up, they converse about it, so that it gains a great part of their attention, and the mind comes to live on it, and it is *very poor living*, there is scarce poorer; whereas if there was a looking out for something useful and wholesome, it would be better found."

The pithy remark of J. Heald, as to *poor living*, brings to mind the case of a Friend, who lived in Eastern Ohio. He had taken so much offence at something that had taken place among his friends, that for some time he declined to attend religious meetings with them. Whilst in this condition, a meeting was appointed near his home by a travelling Friend, which he attended. The minister rose with this remark, "He that lives on the faults of others is in danger of starving to death," and so unfolded to him his situation, that he was enabled to cast out of his heart the hard feelings that had estranged him, and again to show the love of the brethren to prevail. Ever afterwards, he was peculiarly solicitous to avoid every thing which would destroy or injure the unity of the meeting.

(To be continued.)

*Crocodiles in Siam.*—Crocodiles are more numerous in the river at Paknam-Ven than in any other at Chantaboun. I continually saw them row themselves from the banks into the water; and it has frequently happened that careless fishers, or persons who have imprudently fallen asleep on the shore, have become their prey, or have afterwards died of the wounds inflicted by them. The latter has happened twice during my stay here. It is amusing, however—for one is interested in observing the habits of animals all over the world—to see the manner in which these creatures catch the apes, which sometimes take a fancy to play with them. Close to the bank lies the crocodile, his body in the water, and only his capacious mouth above the surface, ready to seize any thing that may come within reach. A troop of apes catch sight of him, seem to consult together, approach little by little, and commence their frolics, by turns actors and spectators. One of the most active of the most impudent jumps from branch to branch, till within a respectful distance of the crocodile, when, hanging by one claw, and with the dexterity peculiar to these animals, he advances and retires, now giving the crocodile a blow with his paw, at another time only pretending to do so. The other apes, enjoying the fun, evidently wish to take a part in it; but the other branches being too high, they form a sort of chain by laying hold of each others paws, and thus, swing backwards and forwards, while any one of them who comes within reach of the crocodile torments him to the best of his ability. Sometimes the terrible jaws suddenly close, but not upon the audacious ape, who just escapes; then there is a cry of exultation from the tormentors, who gambol about joyfully. Occasionally, however, the paw is entrapped, and the victim

dragged with the rapidity of lightning beneath the water, when the whole troop disperse, groaning and shrieking. The misadventure does not, however, prevent their recommencing the game a few days afterwards. —*Moukot's Travels.*

#### The State of the Primitive Churches.

Most men will acknowledge that the primitive churches, to whom Paul wrote his epistles, exceeded in many respects the professors of christianity in our present age; and good grounds they have so to believe; for the said apostle, in his epistles, told the Corinthians "That their bodies were the temples of the Holy Ghost;" he told the Ephesians "That they were fellow-citizens with the saints, and of the household of God;" he told the Philippians "That their conversation was in heaven;" he told the Colossians "That they were delivered from the power of darkness, and translated into the kingdom of the dear Son of God;" he told the Hebrews "That they were come to the city of the living God, the heavenly Jerusalem." And Peter, in his general epistle to the churches, told them "That they were a chosen generation; a royal priesthood; a holy nation, a peculiar people."

But is this our state? Can we say, from a sensible feeling, that the Holy Spirit of God dwells in us? That our bodies are the temples, in which we may behold his presence, feel his power, fear, worship, and serve him? Can we say that our conversations are in heaven? That we are translated into the kingdom of the dear Son of God, and live under the sceptre of his government? That we are come to the heavenly Jerusalem, where the great God is worshipped in spirit and in truth? Or are we not strangers to all these things, and yet persuade ourselves that we are the people of God, and good christians?

The primitive churches had the honorable name of saints; we can give ourselves no better name than miserable sinners; and what is the reason? Most of the forementioned churches, before their conversion, were but heathens; they were not born of christian parents, nor trained up in the christian faith, as we think we are; and after conversion they had but little preaching, in comparison to what we have; neither were they furnished with books so plentifully as we are.

We cannot conclude that the kingdom of Christ, that then appeared in power, did, (as the sun in the firmament sometimes doth) show itself in the morning and be no more seen all day; for the kingdom of Christ is an everlasting kingdom, and the new covenant that was made with the house of Jacob an everlasting covenant. Neither may we conclude that God hath withdrawn himself from the children of men; for he never forsakes us, unless we first forsake him.

The apostle foresaw that there would be a falling away from the grace in which many primitive christians were established; which soon after his decease came to pass. But our preachers say, "That the dark night of apostasy is over, and that we live in gospel days again;" but if so, where are the fruits? We may, I confess, hear gospel words; but where is the gospel power, by which believers come to be the sons of God, and to bear his image in righteousness? Why are not we, who are called christians, grown to the stature of them that were born heathen, and brought up in blindness and ignorance? Why are not we

sanctified and made a holy people, as well as they? Why are not our bodies cleansed and made a habitation for the eternal Spirit, as theirs were? Why are not our conversations in heaven, or at least more heavenly than they be? The reason, to me, is this: we have not built upon the same foundation that they built upon; for this we are to understand, that the heathen had not the Scriptures, as we have, and so could not frame a form of godliness therefrom, as many since have done, made up with good words, calling that godliness, and resting in an outward performance thereof, without any true conversion, or sense of that inward life and power that the primitive christians came to feel; and found in themselves, through faith, and the operation of the eternal quickening Spirit of Jesus.

The heathens, as well as others, were of God's creation, (all nations being made of one blood,) and so had in themselves, as every man hath, a good spirit, as well as a bad; light, as well as darkness; something that reproveth them for sin, as well as something that tempted them to sin. And being, by the apostle, turned from the darkness that was in them to the light; from that which tempted them to sin, to that which convicted and reproveth them for sin; they cleaved thereunto, confided therein, and became followers thereof; and by cleaving to the good, they were delivered from evil; by following the light they came to be translated out of the kingdom of darkness, and to have their conversations in heaven whilst they were upon earth.

These built on a sure rock, a living foundation, on Christ, as he in all ages was, and still is, in his spiritual appearance, the light of the world, and life of righteousness; and, taking his eternal Spirit in themselves for their guide, turned from whatsoever they were thereby convicted of, and reproveth for; by which Esau, or the first nature, came to be supplanted, and He, whose right it is to reign, came to have the rule in them, and the government over them.

And as the darkness that eclipsed the brightness of the sun of righteousness in them came to be removed, they came to have a clear discerning what was of God, and what was selfish, and to be denied; and turning from every motion that was not of God, the body of sin became mortified, their insides became cleansed, the lump became leavened; such as were carnal became spiritual; and this made them a peculiar people.

And did we walk in their foot-steps we might rise to their attainment; but if we build on words, and outward services without spirit and life, we can never rise; for, as Paul said in another case, "If I speak with the tongue of men and angels, and have not charity, I am become as sounding brass;" so say I in this case, if we hear men and angels, if we could live continually under the sound of good words, if we have no regard to that inward light which discovers the rising of evil motions, and power from God to turn from them, we can never mortify sin, cleanse our souls, and become a holy people. The work of sanctification is inward, and to be effected by inward means; nothing but inward light can expel inward darkness; nothing less than eternal life can deliver our souls from the power of death.

Since men came to be persuaded that though they sow tares they shall reap wheat; though they go down into the grave sinners, they

shall rise saints, and attain in another world what the primitive Christians attained to in this world, their conversations have not been in heaven, but in the earth; they have walked in darkness and not in the light; the god of this world hath been served, and not the God of heaven. And what future happiness this can produce, let the wise in heart judge.—*Hugh Turford.*

#### Scientific Notes.

*Waste Substances.*—A recent work on this subject shows that considerable progress has been made in rendering useful many substances that formerly were thrown away as refuse; though there is still great room for improvement in that direction. Among the most important matters that claim further care are the sewage of towns; the offal from cattle killed for their hides, horns and tallow—as is done in large quantities in South America; and the refuse of cod and other fisheries. Most of these are capable of being converted into concentrated manures, which have become an indispensable adjunct in the improved systems of farming.

Cotton-seed was formerly used as manure. The weight of the seed is twice that of the fibre, so that immense quantities of it are annually produced. Now oil is largely pressed from it, and the cake which remains is used for feeding cattle.

In the neighborhood of the large saw-mills of Norway, vast heaps of saw-dust formerly remained unutilized, but now they are made to yield spirit, pyroligneous acid, charcoal, potash, &c.

In France, and other parts of Europe, the fur and skin of rats are sold at remunerative prices, as well as their flesh.

*Nebule.*—An article on this subject, by Prof. Young, in the *Boston Journal of Chemistry*, gives the total number at present known as not quite 8000. Of these about a dozen are visible to the naked eye, the brightest of which is in Andromeda, and the second in brilliance in Orion. Some of them are clusters of stars, which are so exhibited by telescopes of high power, and others will probably present a similar appearance, as more improved forms of optical instruments are brought into use; but the majority show no such structure, but even under the highest telescopic power remain mere blotches of hazy light. In form they are most commonly oval, and somewhat brighter in the middle. In many instances they are nearly circular and of uniform brightness throughout. There are also a few annular nebulae which seem to be rings of the shining mist; and there are double nebulae, which, like the double stars, probably revolve around each other in elliptical orbits; and spiral nebulae, whose filaments are so arranged as to suggest almost irresistibly the idea of a whirlpool-like movement of the whole mass. Besides these there are a multitude, in which the nebulous matter is distributed in streaks and patches of most fantastic and unaccountable formation. To this class belongs the great nebula of Orion.

The spectroscopic study of these interesting masses confirms the conclusion arrived at by the elder Herschel, that many of them are masses of cloud-like substance, mainly gaseous. They are in various stages of condensation; some granulating into star-dust, and some apparently collecting themselves around a single centre to form a single sun.

*The Corrosive Action of Salt-water on Iron and Copper.*—A recent paper on this subject calls fresh attention to the well-known chemical action, and corrosion which takes place when these metals are brought into contact and immersed in salt-water. The rapid increase in the number of iron vessels gives especial importance to the use of all precaution which may ensure their safety or prolong their existence. The writer shows that, for example, if a copper tube connected with a ship's pump be lowered into the bilge water in the hold of an iron ship, though it does not come into contact with the iron plating, yet through the handle of the pump on the deck, a metallic communication may be made with the outside iron, which will form a galvanic circuit, and lead to the corrosion of the plating.

*Drainage and Health.*—Berlin has long been in an unsatisfactory state as regards drainage, &c. An article on the cleaning and draining of that city states, that the rate of mortality has increased from 25.1 per 1000 in 1861, to 38.9 in 1871. The mortality is greatest in summer. Its phases correspond to the rising and sinking of the underground water. This sinks in hot weather, and allows the free decomposition of impurities. The causes of death are largely infectious diseases, like diphtheria, dysentery, &c., which may in general be traced to the decomposition of organic substances.

*Carrier Pigeons.*—With regard to the dispatch of pigeons from balloons, it was observed by Birt and Gay Lussac many years ago, that they did not return to their cots, unless the balloon had been allowed to descend near the ground before they were liberated; otherwise the air was too rare to fly in, and the animals fell with accelerated velocity. In France some of the journals have a pigeon service. The *National*, e. g. employs for its later dispatches from Versailles, ten carrier pigeons, the service costing about 30 francs daily. The time of flight lasts from 15 to 20 minutes, according to the state of the atmosphere and direction of the wind. In storms the birds are often delayed.

*Sounds we cannot hear.*—To many persons the voice of the field-mouse is inaudible. Some cannot hear the voice of the cricket, and a few are deaf to the voice of the sparrow, while but very few can hear the voice of the bat. Some people will not hear the bat however close they may be to it, while others can hear it flying about in the open air, and indeed consider it to be a noisy animal. The voice of the bat is probably the shrillest sound audible to human ears, consequently all animals having voices still more acute, are inaudible to us. An ant-hill, for instance, may be as noisy to the inhabitants as a rookery is to us, and they might be totally unable to hear any sound whatever from human voices, in consequence of the different range of hearing.

A medusa was lately received at the Paris Aquarium, and immediately placed in a tank. It was soon observed that all the other marine creatures around it perished. The water had been turned into vinegar. This showed that this was one of those rare specimens which secrete an acetic acid liquid.

Principles can only be strong by the strength of understanding, or the cogency of religion.—*Dr. Johnson.*

#### A MOTTO FOR BOYS.

A boy who does a stroke and stops,  
Will ne'er a great man be;  
'Tis the aggregate of single drops  
That makes the sea the sea.

The mountain was not at its birth  
A mountain, so to speak;  
The little atoms of sand and earth  
Have made its peak a peak.

Not all at once the morning streaks  
The gold above the gray;  
'Tis thousand little yellow gleams  
That make the day, the day.

Not from the snow-drift May awakes  
In purples, reds and greens;  
Spring's whole bright retinue it takes  
To make her queen of queens.

Upon the orchard rain must fall,  
And soak from branch to root,  
And blossoms bloom and fade withal,  
Before the fruit is fruit.

The farmer needs must sow and till,  
And wait the wheaten bread,  
Then cradle, thresh, and go to mill,  
Before the bread is bread.

Swift heels may get the early shunt,  
And spite of all the din,  
It is the patient holding out,  
That makes the winner win.

Make this your motto then at start,  
'Twill help to smooth the way,  
And steady up both hand and heart—  
"Rome wasn't built in a day!"

*Alice Cary.*

#### THE WORLD'S COMPLAINT.

Selected.

Through all the changes of unnumber'd years  
I've rolled around the life-bestowing sun;  
Yet still each season fresh and bright appears  
As when my onward course was first begun!  
Spring with its new-born beauty does not shun,  
Awakening as of old the sleeping earth;  
And Summer in its brightness loseth none  
Of all its early loveliness and worth,  
Still blooms the flower, and glows the ripen'd fruit,  
And through the ground the tender rootlets shoot.

And yet, alas! I long have been misnamed  
A desert wilderness,—a worthless clod;  
And man, vain man, is not a whit ashamed  
Thus to abuse the bounty of his God,  
And say that, till he rests beneath the sod,  
There's nothing worthy of his noble thought,  
But, day by day, he still must toil and plod,  
And seek but never find the object sought;  
And me he calls a waste, a fleeting show,—  
A dismal charnel-house for man below.

*Charlotte Young.*

*Coati.*—The little animal called "quash" by the creoles, and "coati" by the Spaniards, is sometimes seen in captivity in the Indian lodges; it is somewhat like the raccoon. The nostrils are arranged at the end of its long snout in such a manner as effectually to prevent earth and sand from getting up the nose while it is grubbing for worms, roots, &c. this snout is exceedingly muscular, pliant and sensitive: the creature has a curious way of protecting it from a blow or threatened injury by putting down its head, and covering the snout carefully with its fore-paws. The arms and legs are stout and strong, and the feet are armed with claws like those of miniature bear. The habits of the tam "quash" in my possession, which now run about the house like a cat, are very dull and interesting; it has formed a strong attachment to the little spider monkey, and they never seem tired of playing and frolicking together, their principal point of disagreement being

at Quash is generally sleepy during the day, and Jacko takes a mean advantage of it, and pulls him most unmercifully about his long brushy tail, only to be disturbed his turn as he nods and dozes in front of the fire after tea, by which time Quash has come very sprightly, and bustles about the room with an air of busy importance, carrying his bushy tail straight behind him, with gracefully undulating movement.

While at the Blewfield's Mission-House, Quash was a source of great amusement and me trouble; he was very friendly with all the dogs, and, unless securely shut up, on Monday he would invariably follow Mr. and Mrs. Lündberg to the service; and on one occasion, when unable to do so, he got into the leony opposite the church, and having perched himself on the extreme ledge, made such a disturbance with his peculiar cry that no one had to be despatched to take him back.—*Wickham's Journey in Central America.*

For "The Friend."

The pages of "The Friend" seem to offer a suitable medium for drawing the attention of Friends to the following subject:—

The apostle Paul used this language in reference to the gift of ministry: "We have this treasure in earthen vessels that the excellency of the Power (by which alone it can be rightly exercised) may be (seen to be) of God, and not of us;" and again he says: "Not that we are sufficient of ourselves to think any thing as of ourselves, but our sufficiency is of God; who so hath made us able ministers of the New Testament, (or New Covenant), not of the letter, but of the Spirit: for the letter killeth, but the Spirit giveth life." And, indeed, the life of all true ministry is by the Spirit; and Paul saith again, "As every man hath received the gift, even so minister the same one to another, as good stewards of the manifold grace of God. If any man speak, let him speak as the oracles of God; if any man minister let him do it as of the ability which God giveth, that God in all things may be glorified through Jesus Christ, to whom be praise and dominion forever and ever. Amen." And writing of the dispensation of the gospel which was committed to him, he says: "Whereof I am made a minister according to the gift of the grace of God, given unto me by the effectual working of His power."

The writer concludes that there is not an individual in the position of a minister in our society who is not sensible of mistakes, and of his liability to err, and of the consequent need of constant watchfulness unto prayer, that he may be kept upon the right ground in his ministry; that is, made sensible from time to time, of a fresh baptism and renewed exercise on that account; for is not the language of our Holy Redeemer applicable here, "For every one shall be salted with fire, and every sacrifice salted with salt."

Isaac Penington says: "The ministry of the New Testament is a ministry of the Spirit, and it cannot be without the Spirit. He that will be a true minister must receive both his gift, his ministry, and the exercise of both from the Lord."

In drawing this high character for a true ministry, it is far from my aim to place the smallest impediment in the way of the least child of the Heavenly Father's family, upon whom He hath laid his hand to bring them forth in this weighty service—I entertain no

doubt whatever that what is of him, He will own. Wherever a true concern is given, there will be a way made for it, and in due time an evidence will be granted of the unity of the true church with such.

These may be always distinguished by the absence of self-sufficiency or self-confidence, and are always willing rather to bear than to burden others, until the Lord shall be pleased to make way for them. They are kept in the child's state, which is willing to receive help and instruction.

Where there is a right capacity for judgment, we shall not have to observe one dear Friend seeing one way upon the subject, and another another way. The judgment will not turn upon natural partiality, or that the truths uttered are delivered agreeably, or that what is generally understood by the term gospel truth, has been brought forward in due proportions.

There is a great difference in persons—the natural temperament, the association, the education, the self-possession, natural or acquired, the easy choice of language and flow of it almost without effort—each of these furnish cause for additional caution on the part of the individual concerned, and not less so on the part of those upon whom devolves the duty of exercising a true judgment.

In the present condition of our Society I know of no question of equal importance to its welfare—except the primary one of individual vital religion—than this question of the ministry.

There is still another class for whom I am deeply concerned, both for their own sakes and on behalf of the Truth. To those persons esteemed more or less highly as ministers in the various religious bodies now existing in the world, this concern has no reference; but to those, whether standing in the position of recorded ministers or not, who claim to be Friends.

The confusion that must follow the granting of an equal claim to Divine authority and sanction, for discordant views on the most vital doctrines of the gospel, is so apparent that it cannot be admitted. I therefore conclude that where an individual in our society persistently maintains and promulgates views of religious belief, at variance with the acknowledged doctrines of the gospel, as ever held by the society of Friends, he must be under a mistake as to his being called to the work of the ministry of the gospel within the pale of the society, when such principles, if adopted, would change the foundation upon which it can alone stand, and defeat its testimony to the world. This point is brought forward under a deep sense of its importance to individuals, and also to draw the attention of those who are in influential positions in the society, to the duties and responsibilities of their stations. Truth should be dearer to us than everything else, and to be a faithful watchman upon the walls is a weighty thing. Well may the poor instrument cry out, "Who is sufficient for these things?"

While I have thus written, it has been under the thankful belief, that we have at the present time many evidences that the Lord is at work himself, and that He is seeking to set up His own Kingdom in many hearts; drawing away from the many voices that are abroad in the world to himself; which is undoubtedly as much the design of Him who is the Lord of life and glory, to day, as it hath

been in any age of the world, and equally important for all to experience for their own establishment on the everlasting Rock and foundation.

We must never fail to remember that we do not go to meeting to hear words, but to wait upon and to worship Him who is a spirit, and that unless we attain to a sense of this in some degree, we do not realize the full benefit of such a duty; and where there is an itching ear, an undue desire for words, the spring of true ministry is often obstructed.

May it not be said of a truth, that it is a day when the call is going forth for a deeper inward travail of spirit in our meetings, for the arising of that which is the true life of the church; when the language should be more feelingly known and read in the lines of our own experience, "Deep calleth unto deep at the noise of thy water spouts, all thy waves and thy billows are gone over me." Then in the Lord's own time He will arise, cause his dependent, trusting, waiting children to sit down at His table; He will gird himself and come forth and serve them. We should enter into His courts with thanksgiving, and into His gates with praise.

*Adventures with Canada Wolves.*—Along the line of the Grand Trunk railroad, between the Island Pond Station and the French village of Canticook, in Canada, a distance of eighteen miles, the country is almost an unbroken forest, and wild animals are frequently seen beside the road staring in wonder at the passing trains, while deer, foxes, lynxes and wolves often bound across the rails in front of the locomotive. Some years since the latter animals were remarkably plenty, sometimes appearing in droves of a dozen or twenty.

One evening, late in the autumn, a young man had occasion to pass along this lonesome way on foot, and had not accomplished more than half the distance when he heard a crackling in the bushes at the side of the track, denoting the presence of some wild animal. Thinking to frighten the creature he threw a stone toward the place where it appeared to be.

This was answered by a howl from the wolf, for such it was; and what added to the discomfort of the situation, various other howls were echoed and re-echoed by wolves from all sides, and they soon began to close in around the now thoroughly frightened man, who started on a run, but was soon obliged to slacken his pace from sheer exhaustion. Although the pack of wolves now numbered about twenty, they still, for some reason, failed to attack him, but surrounded him at the distance of a few paces, each moment growing bolder and bolder. In his desperation he picked up stones and threw toward them, at which they would scatter for a brief period, and he would make another effort to escape them, which, however, would prove useless, for as soon as he turned to run they would again surround him, and the only method by which he could keep them at bay was to keep up the shower of missiles, shouting at the top of his voice.

But even this resource was fast failing him, as he was well nigh exhausted and ready to drop with fatigue and fright, when suddenly unexpected assistance arrived. He heard afar off a low rumble and knew that a train was approaching. Could he only hold his fierce enemies at bay until its arrival he felt that

he would be safe. He redoubled his efforts, and soon the rumble of the train grew louder, and the headlight of the locomotive appeared around a curve. The hunted man now gave up the unequal contest with the savage brutes, and, facing the approaching train, threw up his arms and concentrated all his energies in a loud call for help, which was heard above the rattle of the cars. The engineer whistled "down brakes," the train came to a stand still, and the poor fellow, more dead than alive, climbed into the cab of the engine and fainted, and it was only after the arrival at the next station that he was able to relate his terrible experience.

For "The Friend."

#### Inconsistencies; or a Departure from Simplicity in our Dwellings and Families.

When I look at the costly modern residences of some of our members, with the rich surroundings outwardly, and the style, the decorations, the fulness, the excess within, I can hardly suppress the exclamation or enquiry, Are these the dwellings of self-denying Quakers, who claim for themselves a higher standard, and one calling for greater plainness and simplicity than other religious professors? Surely, then, may such professors query, wherein lies the difference between us? If you, say they, are a cross-bearing, world-renouncing people, following a meek and lowly and crucified Saviour, who, though Lord of all, had not where on earth to lay his head; if you as strangers and pilgrims here below, are walking in the straight and narrow way to his kingdom above, then away with self-denial and the restraints of the cross; since, in the expressive language of conduct, things discordant can be so reconciled as to admit, notwithstanding the Saviour's negative, of serving two masters—God and the world; and also while taking our fill of earthly enjoyments, to allow the keeping of the heavenly inheritance in reversion, after all of this life shall have ceased to please and to captivate the affections and the heart.

Is it not to be feared that the accumulated wealth of Friends, with all the flesh-loving appliances it can purchase, has had the effect to dim the spiritual vision, to infatuate the heart, and to cause the affections to be more set upon the things of earth, with which we are so intimately surrounded and associated, than on the things of heaven—the recompense of the reward of a well spent life beyond? Thus causing us to lose, in measure, our spirituality and meekness, our simplicity and humility, and to become more conformed to the world, and thence reconciled to the fashion and luxury and ways of the carnal mind, which is enmity against God; and verifying the Saviour's words: "Where your treasure is, there will your hearts be also." O, then, let us search our houses, and above all our hearts! After the exhortation of the prophet, "Let us search and try our ways, and turn again to the Lord." That is, let us see if there is any thing in or about us, over which we have influence, that His controversy is with! What a precious entreaty was that of the Psalmist, and its record a rich legacy to us:—"Search me, O God, and know my heart; try me, and know my thoughts; and see if there be any wicked way in me, and lead me in the way everlasting." Whereupon, may the language of each of our hearts be, Let not Thine eye

spare, neither have Thou pity, till thou hast brought forth judgment unto victory.

I remember hearing that on an occasion of Dr. Johnson going to see David Garrick, who then had just had his house repaired, expanded, and richly furnished, the former said to him, "David, David, these are what make death beds terrible; these are what make death beds terrible." This suggests the thought, that we should, while making provision for the poor body a little while here, keep pre-eminently in view the enduring inheritance in heaven for the dedicated and faithful; as well as how we shall look upon the fleeting things of time when the solemn message comes, to bid a final farewell and leave them; remembering the preceptive line,

"They build too low, who build beneath the skies."

The effect of these things is perhaps noticeable most upon, and prejudicial to the susceptible minds of children. The desire of appearances and outward greatness in them, being without the ballast of religious weight and depth, is likely to elate the heart and lead into a disregard of our Christian principles and testimonies; and thus if not the parents, at least their precious offspring, for whom they must give an account, are likely to be carried away by the overflowing flood of show and worldliness thus setting in upon them. Thus their tender minds, may be, through the unfaithfulness of those set over them, become gradually corrupted from the simplicity that is in Christ. So that instead of helping this interesting class against that which would dim the beauty of their minds, parents may unadvisedly put stumbling blocks in their way; and, it is sometimes to be feared, offend the Divine witness and meek and lowly appearance of the Saviour in their bosoms. Moreover these earthly attractions so coinciding with the natural, fallen propensities of the human heart, to which "the lust of the flesh, the lust of the eye, and the pride of life," are so congenial, and having the example and therefore sanction of the parents superadded, they anon take deep root in human nature's fruitful soil, and thence, unless Divine grace powerfully interposes, become confirmed with years, and bring forth fruit after their kind; and inducing a state of mind in which there is but little entrance for the suggestive truth:

"Man needs but little here below,  
Nor needs that little long."

The subjoined are extracts relative to this subject from the pen of several writers.

"Picture to thyself," says John Barclay, "any set of people raised up to a deep sense of religion, and carrying out their watchfulness and self-denial to *all branches of their conduct*, and endeavoring to follow that exhortation, 'Be ye holy in all manner of conversation,' and whatsoever ye 'do in word or deed, do all to the glory of God,' &c. Would they not soon come to be distinguished from other people, who follow the course of this world, or who secretly yearn after their own heart's lusts, and comfort themselves with trying to think there is nothing in this and the other little thing, and that religion does not consist in these things? Would they not soon find themselves to be 'a peculiar people,' a singular people, a very simple people;—their outward appearance, their manners, their very gestures, restrained and regulated after a mode totally contrary to the generality of

those around them? According to that striking passage in one of the Apocryphal writings setting forth the language of the ungodly respecting the righteous, so will it be respecting such a people or person as I have described. 'He is not for our turn, he is clean contrary to our doings; he was made to reprove our thoughts; he is grievous unto us even to behold; for his life is not like other men's, his ways are of another fashion.'

(To be concluded.)

*The Greatest Crop of the World.*—A question widely discussed involves the relative value of the wheat, cotton, tea and hay crop of the world. Which of these products employs the greatest amount of the world's capital? It is said that hay leads the rest, and the items that enter into the account stated are somewhat startling. Cotton and tea are local crops, while hay is produced everywhere the world over, and thus the hay crop greatly outweighs either of the other two. The aggregate reported value of a farm products for 1870 was \$2,447,538,658 but as this includes additions to stocks, "berments," &c., it is probably too high. No the hay crop for that year—that is the grass dried and cured for use or sold—is reported over 27,000,000 tons. This, at half the selling price in the large cities, would amount to \$405,000,000, and is far greater than the aggregate home value of the cotton crop or any other crop. But the cured "hay" is but a portion of the grass crop. The other portion is used on the ground, and it requires considerable calculation to get at the value so used, even in the roughest way.

In the first place live stock, including horned cattle, horses, sheep, swine, &c., to the value of \$1,525,000,000, were fed from it that year. Averaging the lives of these at five years we have one-fifth of that sum as representing the grass fed to them in 1870, namely: \$305,000,000; next we find the value of the animals slaughtered for food in that year to be \$309,000,000, and as this is an animal product, the whole of it will for the present be credited to the grass crop; next we find that the butter crop of 1870 was 514,000,000 pounds, which at the low average of 25 cents, amounts to \$128,000,000, and this goes to the credit of grass; next we have 235,000,000 gallons of milk, which, averaged at the low estimate of 10 cents per gallon, adds \$23,500,000 more to the credit of the grass crop; then we have 100,000,000 pounds of wool at 25 cents per pound, adding \$25,000,000 more; and, finally 53,000,000 pounds of cheese, at 10 cents, adding \$5,300,000 to the total of these credits to the grass crop of 1870, which aggregate \$887,000,000.

Now let us add the value of the "hay" crop as given above—viz: \$405,000,000—and we have a grand total for "hay" and the products of grass consumed on the ground amounting to \$1,292,000,000. This is, of course, subject to the deduction, as the meat, butter, milk, cheese, and wool-producing animals consume other food beside grass and hay. To make ample allowance for this, we deduct the entire value of the corn and oat crops of 1870 estimated at \$270,000,000 and this leaves a remainder of \$1,022,000,000 to be credited to the hay and grass crop of that year, which the reported aggregate of all the farm products was \$2,448,538,658. If our estimate make even the roughest approach to accuracy

e value of that crop was two-fifths of the aggregate value of all farm products, and hence we may infer that two-fifths of the capital then invested in agricultural pursuits was devoted to the grass crop, and this in the United States equals (in round numbers) \$575,000,000. From these figures the deduction is palpable that King Cotton is unshaken and dethroned, and we may be forced to admit that all "flesh" and all else is hay fit for "grass."—*Memphis Appeal.*

Selected for "The Friend."

"Woe to that man by whom the offence cometh."—(Mt. xviii. 7.)

The following is a part of an epistle to the Corinthian church in that day, written by the apostle Clement; whom, says William Paley, ancient writers, without any doubt or scruple, assert to have been the Clement whom the apostle Paul thus mentions, (Phil. iv. 3.) With Clement also, and other of my fellow-laborers, whose names are in the book of Revelation. W. P. goes on to introduce it by saying, "The meekness of the Christian character shines throughout the whole of that excellent epistle. The occasion called for it. It was to compose the dissensions of the church of Corinth, and the venerable hearer of the apostle does not fall short, in the display of this principle, of the finest passages of their writings. He calls to the remembrance of the Corinthian church its former character, in which 'ye were all of you,' he tells them, 'umble-minded, not boasting of anything, desiring rather to be subject than to govern, to give than to receive, being content with the portion God had dispensed to you, and seeking diligently to his words; ye were enlarged in your bowels, having his sufferings as ways before your eyes. Ye contended day and night for the whole brotherhood, that with compassion and a good conscience the number of his elect might be saved. Ye were sincere, and without offence, towards each other. Ye bewailed every one his neighbor's sins, esteeming their defects your own.' His prayer for them was the 'return of peace, long-suffering, and patience,' and his advice to those, who might have been the occasion of dissension in the society, is conceived in the same spirit, and with a perfect knowledge of the Christian character: 'Who is there among you that is generous? Who that is compassionate? Who that has any charity? Let me say: If this sedition, this contention, and these schisms be upon my account, I am ready to depart, to go away whithersoever ye please, and do whatsoever ye shall command me, only the flock of Christ be in peace with the elders who are set over it. He that shall do this, shall it to himself a very great honor in the Lord; and there is no place but what will be ready to receive him: for the earth is the Lord's, and the fullness thereof. These things they, who have their conversation towards God, ought to be repented of, both have done, and will always be ready to do.'"

"1850, 3d mo. 11th. There is need of more religious depth and feeling in many, to qualify them for service in the church. \* \* \* The present state of the Society, calls for a more arduous travail, on the part of those who are sensible of it, and a more united application to the Great Head of the church, for wisdom and strength to labor for reformation among us.—*Journal of William Evans.*

*The Values of Gold and Silver.*—Many people have a desire to know the value of gold and silver in bulk, and to this end we have secured the following from Professor J. F. L. Schirmer, superintendent of the branch mint in this city, and it may be relied upon as correct. The fineness of Colorado gold and the calculation of values on gold and silver are also given. It is a matter of considerable value, and should be cut out and preserved.

One ton (2,000 pounds avoirdupois) of gold or silver contains 29,163 troy ounces, and, therefore the value of a ton of pure gold is \$602,799.21, and of a ton of silver is, \$37,704.84.

A cubic foot of pure gold weighs 1,218.75 pounds avoirdupois; a cubic foot of pure silver weighs 656.25 pounds avoirdupois.

One million dollars gold coin weighs 3,685.8 pounds avoirdupois; one million dollars silver coin weighs 58,929.9 pounds avoirdupois.

If there is one per cent. of gold or silver in one ton of ore, it contains 291.63 ounces, troy, of either of these metals.

The average fineness of the Colorado gold is 781 in 1,000, and the natural alloy: gold, 781; silver, 209; copper, 10; total 1,000.

The calculations at the mint are made on the basis that 43 ounces of standard gold, or 900 fine (coin), is worth \$800, and 11 ounces of silver, 900 fine (coin), is worth \$12.80.—*Denver News.*

Corrupting food! for any to feed upon the faults of others. These things stagnate the circulation of life in meetings, and may be compared to the foxes which spoil the precious vines.

## THE FRIEND.

SECOND MONTH 14, 1874.

The matter of first moment for the welfare of our religious Society, is that its members should be brought individually under the government of the Spirit of Truth; in order that they may be begotten into the one Divine life, and grow up in true brotherly love and fellowship. Were this happily the case, though there might be less need for the frequent exercise of the gift of gospel ministry, as each one would be better prepared to receive strength, encouragement and instruction immediately from the fullness of Christ, it would be still an invaluable blessing to the church, and the danger would be greatly lessened of a spurious ministry springing up or being tolerated, or its evil effects widely spreading.

But in the present state of the Society, with some crying Lo! here is Christ, and others Lo! He is there, it is of the utmost importance that all who desire to stand firmly for the doctrines and testimonies of the gospel, which the Head of the church requires Friends to maintain and illustrate before the world, should not allow themselves to be moved from the ground on which Friends have always rested their claim to possess a true, gospel ministry—a ministry prepared and authorized by Him who is Head over all things to his church. We are therefore glad that this subject has been discreetly treated by a valued correspondent, whose views will be found in our columns to day.

We think no one whose spiritual faculties

are not benumbed, can fail to know, that while we are yet blessed with a living gospel ministry, there is also a ministry of words, or of the letter, acquired by imitation or study and practice: often accompanied with fluency of speech and fervency of manner, but lacking the baptizing power of the Holy Ghost. The latter may tickle the ears and arrest the attention of those who prefer to be amused by fluent doctrinal teaching, to striving to have their minds turned to the gift of grace within, and waiting, in the silence of all flesh, to attain to that worship which is in spirit and in truth; but it begets its own likeness, and though the words may be sound, and be received in the understanding, they cannot build any one up on the most holy faith of the gospel: "The kingdom of God is not in word, but in power."

Daniel Wheeler said in one of our meetings, "There is a ministry in this land which, if not checked, will eat out every green thing." Have not its ravages been fearfully extensive in some parts of the heritage? It is one of the natural consequences of an unauthorized and spurious ministry, to enlist others in the same superficial work, and to make restraint, and the judgment of those who may not unite with their services, irksome and intolerable. Hence the efforts made to break down the good order and discipline relating to the acknowledgment of ministers, the appointment and duty of elders, and the regulating of their select meetings. These have no little self-confidence, and charge intolerance and lordship over the heritage, upon those who, in some measure of the discerning spirit that clothed the apostle, strive to know "not the speech of them which are puffed up, but the power."

The anointed minister of the gospel may rightly magnify his office; while the sense of its inseparable responsibilities, and his own many frailties, and entire dependence on his Master for his gift, and power to exercise it aright, will keep him humble and teachable. The divinely gifted elder will always be in close sympathy with the truly baptized minister; travailing with him or her for the arising of divine life, rejoicing with him when it springs up, and united to him in the fellowship of suffering, when it is under oppression. Both need to bear constantly in mind that the subtlety of evil in the human heart, if admitted or tampered with, acts upon them as upon others; and that from the positions they occupy, there may be increased danger of their attention being diverted from close self-examination, and watchfulness over their own spiritual life. There is such a thing as a temptation to assume a sort of official piety, which may be supposed to adhere to the stations; and that the one being engaged in promulgating the truths of the gospel, and the other in watching over, counselling and upholding the ministry, each is in itself a sufficient assurance of experiencing the application and efficacy of those truths for the salvation of the soul.

There is another danger to which ministers who may have been rightly called to and qualified for service, are exposed; especially those who are in the way of travelling about a great deal, and whose services may be longed for by almost every audience; which is, falling into a formal habit of preaching, as though it was a stated duty connected with their relation to the church, and as though

their position and standing could, of themselves, give sanction or life to what they utter. It is possible in this way to lose the gift, without hardly being aware of it.

In every case, with both minister and elder, preservation is to be experienced by keeping near to the feet of their compassionate, omniscient Lord and Master; who sees all the snares set for their feet; who remembers that they are but dust, and gives grace to overcome in proportion to the subtlety and power of the temptation; and who is ever ready to keep them clothed with the armor of light, that so no weapon formed against them shall prosper, and every tongue that shall rise in judgment they shall condemn. This is the heritage of the servants of the Lord, and their righteousness is of me, saith the Lord.

#### SUMMARY OF EVENTS.

**FOREIGN.**—The elections for members of Parliament have been attended with great excitement, and in many instances with rioting and violence. The result has been unfavorable to the Liberal party. The returns announced up to the 9th inst. showed that 91 Conservatives had been elected to seats formerly filled by Liberals, and that 27 Liberals had been chosen in place of Conservatives. It was no longer doubted that the latter would have control of the government.

Gladstone will await the conclusion of the elections before deciding as to what course he and his colleagues will take. Some of the London papers, however, think it quite certain that the Gladstone ministry will resign before the new Parliament assembles.

The success of the Conservatives is attributed to the division of the Liberal party in regard to female suffrage, the education act and other measures, and the violent language sometimes used by the supporters of the workingmen's candidates.

On the 5th inst. a dispatch was received in London from Sir Garnet Wolseley, in which he says: "All the white prisoners held by the Ashantees have been delivered to me. The king accepts my terms for the cessation of hostilities, which he asked, and has agreed to pay an indemnity of £200,000. We halt for a few days thirty miles from Coomassie."

A London dispatch of the 9th says: So far in the Parliamentary election, 509 members have been chosen. Of this number 267 are Conservatives, and 242 Liberals and Home-rulers.

London, 2d mo. 9th.—Consols 92. U. S. sixes, 1865, 108 $\frac{3}{4}$ ; new fives, 102 $\frac{3}{4}$ .

Liverpool.—Uplands cotton 7 $\frac{7}{8}$ d.; Orleans, 8 $\frac{1}{4}$  a 8 $\frac{3}{8}$ d. Average California white wheat, 13s. 4d. a 13s. 8d. per 100 lb. Red winter wheat, 12s. 3d. a 12s. 6d.; spring, 11s. 10d. a 12s. 5d.

The latest advices from Sumatra show that the Achehese chiefs still hold out, and are building forts in the interior.

A great anti-Catholic meeting was held in Berlin on the 7th inst., and was attended by many persons of distinction. A resolution was adopted thanking the people of England for their recent manifestation of sympathy for Germany in its contest with the papacy.

The following particulars are given of the component elements of the newly elected German Parliament: Out of 392 members, there are 225 Ministerial Liberals and 10 doubtful Liberals, or about 235 on whom the Government may rely for support. The opposition number 157, consisting of 100 Ultramontanes, 10 Particularists, 15 Poles and Danes, 10 Alsations, 10 Conservatives and 12 Socialists.

Archbishop Ledochowski has been arrested and sent to Ostrow, in the province of Posen, where he will be imprisoned in accordance with the sentence of the court. The emperor has declined to intervene in the case, notwithstanding the great influences brought to bear in the archbishop's favor.

Thirty thousand unemployed workmen in Vienna have petitioned the government for relief.

Buffet has been re-elected President of the French Assembly.

Nine hundred Communists remain in prison awaiting trial.

The Budget Committee have voted to recommend an appropriation of \$300,000 for repairing the damage done during the last days of the Commune to the public buildings of Paris, including the Tuilleries and Palais Royal.

Intelligence has been received in Madrid of a severe

engagement near Lerida, between the Republicans and Carlists, in which the latter were defeated. The Carlists were about opening the bombardment of Bilbao. The city is provisioned for two months, and the government will take measures for its relief.

Gen. Sickles, U. S. Minister, has taken final leave of the Spanish government, and placed his Secretary in charge of the Legation.

The cholera has appeared in Buenos Ayres. The insurrection in Entro Rio was not entirely ended. Some bands hold out in the interior.

A special dispatch to the Daily News from St. Petersburg, says Russia has refused to send goods to the Exhibition to be held in Philadelphia in 1876, alleging that it is a private undertaking.

Mexican advices state that the revolution in Yucatan is gaining strength. The Indians have plundered and burned the town of Canatchel, in that State. Complaints are made that the merchants of Balize sell arms and ammunition to the Yucatan insurgents.

The press complains of injury to Mexican interests caused by the introduction into foreign commerce of the new United States trade dollar.

Judge Ramirez, of the Supreme Court, says Mexico is a Republic only in name, being in reality governed by a military despotism.

A new company has been organized to lay a light cable from the coast of Great Britain to Halifax, by way of the Azores. The capital is £380,000, and the prospectus says it is the intention of the company to convey messages at the rate of one shilling per word.

The insurgent refugees from Cartagena who have not been convicted of crime, have been released by the French authorities at Oran. Two of the leaders, Contreras and Ferrey, refused to accept their discharge. Contreras is writing an account of the siege of Cartagena.

Venezuela journals of the 22d ult., contain a proclamation of the President of the republic, inviting immigration, and offering facilities and assistance to immigrants.

**UNITED STATES.**—There were 479 interments in New York city last week.

The interments in Philadelphia numbered 306, including 106 children under two years of age. There were 80 deaths of consumption, 14 typhoid fever, 10 scarlet fever, and 38 inflammation of the lungs.

The War Department has prepared a statement in response to a resolution of the House of Representatives, showing that from April 12th, 1861, to August 20th, 1865, during the late war, the disbursements by army paymasters were \$1,091,500,000. The whole number of paymasters employed was 541.

The industry of the State of Maine is reported to be prosperous and growing in importance. The total number of cotton factories in the State is 27, and the amount of production for the year 1873 \$12,427,670. Five new companies are about to go into operation. There are 112 manufactories of boots and shoes, with a capital of \$1,863,964. In the fisheries 861 vessels are employed, the total value of the product exceeding \$800,000. The value of the leather tanned and carried was \$3,187,300. There are 329 saw-mills which produce lumber to the value of \$5,184,445, the whole number of saw-mills is 1109, and the total production about \$10,000,000. Ship building has revived, and last year 276 vessels were built, with a tonnage of 89,817, valued at \$5,399,000.

The last report of the American Iron and Steel Association represents that branch of industry in a depressed condition. The recent commercial panic affected the iron interest in a greater degree than almost any other. At a recent date one-third of the blast mills and two-thirds of the rail mills of the country were idle, the blast furnaces having 12,522 hands unemployed, and the rail mills 11,400 hands idle, and 10,150 working on half time. The rate of wages paid has also been greatly reduced. The building of railroads was for the present almost entirely ceased.

The national House of Representatives has passed a resolution, by a vote of 170 to 64, declaring it to be within the constitutional power of Congress by law so to regulate commerce among the States, as to protect that portion of our internal commerce which is among the several States from unjust or oppressive tolls, taxes, obstructions or other burdens, whether imposed by railroad companies or by combinations thereof, or by other common carriers, and that the present condition and magnitude of the commerce among the States demand the prompt and wise exercise of those powers and duties.

**The Markets, &c.**—The following were the quotations on the 9th inst. *New York.*—American gold, 112. U. S. sixes, 1881, 119 $\frac{1}{2}$ ; ditto, 5-20, 1868, 119 $\frac{1}{4}$ ; ditto,

10-40 5 per cents, 115 $\frac{1}{4}$ . Superfine flour, \$6 a \$6.3 State extra, \$6.60 a \$7; finer brands, \$7.50 a \$11. N 1 Chicago spring wheat, \$1.60; No. 2 do., \$1.55 a \$1.5 red western, \$1.62 a \$1.64; white Michigan, \$1.9 Jersey oats, 54 a 57 $\frac{1}{2}$  cts.; western, 60 a 63 cts. Ne western mixed corn, 81 a 84 cts.; do. white, 85 cts Jersey yellow, 80 a 82 cts. *Philadelphia.*—Midlin cotton, 16 a 17 cts. Superfine flour, \$5 a \$5.50; extra \$6 a \$6.50; finer brands, 7 a \$10.50. Red wheat, \$1. a \$1.65; amber, \$1.68 a \$1.70; white, \$1.85 a \$1.90 No. 1 spring, \$1.60 a \$1.72. Yellow corn, 76 a 78 c Rye, 96 cts. Oats, 58 a 64 cts. Clover seed, 8 $\frac{1}{2}$  a 9 cts. Lard, 9 $\frac{1}{2}$  a 10 cts. Sales of about 3000 beef catt at 7 $\frac{1}{2}$  a 8 cts. per lb. gross for extra; 6 a 7 cts., for fat to good, and 4 a 5 $\frac{1}{2}$  cts. for common. Sheep sold at a 7 $\frac{1}{4}$  cts. per lb. gross and hogs at \$9.25 a \$9.50 per 10 lb. net for corn fed. Receipts 5000 head. *Chicago.*—No. 1 spring wheat, \$1.24; No. 2 do., \$1.19; No. do., \$1.16. Corn, 57 $\frac{1}{2}$  cts. Oats, 42 $\frac{1}{2}$  cts. Spring harle \$1.70 a \$1.75. Lard, 9 cts. *St. Louis.*—No. 2 sprir wheat, \$1.22 cts.; No. 3 fall, \$1.44. No. 2 mixed corn 59 cts. No. 2 oats, 47 cts. *Cincinnati.*—Wheat, \$1.4 a \$1.50. Corn, 59 a 63 cts. Oats, 46 a 54 cts. Ry 97 a 99 cts. *Baltimore.*—Red wheat, \$1.50 a \$1.6 Western oats, 58 a 62 cts.

#### WANTED.

Superintendent and Matron for Emlen Institiutic for benefit of boys of African and Indian descent Farm in Bucks county, Pa.: a good practical farmer and wife, a tidy managing housekeeper, both qualified for the proper training of youth for usefulness on earth and a preparation for heaven. Address,

Israel H. Johnson, No. 16 North Seventh St.  
Thos. Stewardson, Jr., cor. Mill and Chew S  
Germantown, Philadelphia.

1st mo. 27th, 1874.

#### WESTTOWN BOARDING SCHOOL.

A Stated Meeting of the Committee on Instruction will be held on Seventh-day, the 21st instant, at 10 A. M. in the Committee-room, Arch St. Meeting-house.

CHARLES J. ALLEN,  
Philada. 2d mo. 11th, 1874. *Clerk.*

#### WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of th Institution are expected to be vacated at the close of th Winter Session, in the 4th month next, Friends w may feel drawn to undertake the duties attached them, are requested to communicate thereon with eith of the following named members of the Committee.

Nathaniel N. Stokes, Cinnaminson Post-offi  
Burlington Co., N. J.  
Charles Evans, No. 702 Race St., Philadelphia.  
Deborah Rhoads, Haddonfield, N. J.  
Rebecca S. Allen, No. 335 S. Fifth St., Philad

#### FRIENDS' BOARDING SCHOOL FOR INDIA CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Spring term. Also a Friend to as an assistant matron.

Application may be made to  
Ebenezer Worth, Marshallton, Chester Co., Pa  
Joseph Scattergood, 413 Spruce St., Philada.  
Aaron Sharpless, Street Road P. O., Chest  
Co., Pa.  
Thomas Wistar, Fox Chase P. O., Philada.

#### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia  
Physician and Superintendent—JOSHUA H. WORT

INGTON, M. D.  
Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, at Wilmington, Del., 1st mo. 19th, 1874, the 27th year of her age, ELIZABETH T., wife of Jol R. Bringham, and daughter of Joseph and Sarah I Tatnall, a member of Wilmington Monthly Meetin Her relatives and friends are comforted in the beli that her end was peace.

First month 26th, 1873, SARAH M., wife John M. Saunders, in the 53d year of her age, a member of Woodbury Monthly and Particular Meetin New Jersey.

WILLIAM H. PILE, PRINTER.  
No. 422 Walnut Street.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, SECOND MONTH 21, 1874.

NO. 27.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Single copy, when paid quarterly in advance, five cents.

For "The Friend."

Account of Recent Adventures and Suffering in the Arctic Regions.

(Continued from page 292.)

At the end of the Fourth month, suddenly appeared among them, the two hunters who had been lost in one of the snowstorms, on their journey, as before related: their names were Ole Olsen and Henrik Nielsen. How had they passed almost six months, enveloped in polar darkness, and how had they survived a fatigue which seemed beyond human ability to bear? They gave the following account themselves to their companions: When they found themselves separated from their fellow-travellers their distress was great, the snow which fell in squalls had entirely effaced the track of the sledge, and they thought that their comrades, deprived of their aid, would not be able to pursue their journey but would return to the Russian houses. They returned to care for themselves, not without difficulty, for the weather was so unfavorable that four days were occupied in accomplishing the journey, and they had at the time of the separation only about a pound of flesh in their possession. Finally, when near the cabin, Nielsen looking back perceived that he had lost his companion; too weak to go in search of him, he dragged himself as well as he could to one of the little houses, struck a fire, roasted some bits of fox flesh, ate a few mouthfuls and fell to a deep sleep or stupor near the fire. Olsen had fallen on the snow without strength and voiceless, and lay there for some time in swoon; when he came to himself hunger tormented him cruelly, he gnawed with his teeth some bits of fresh reindeer skin which served him as a garment, and dragged himself a few steps more towards the houses, which he had perceived, but his strength failed him again, and seeing the abandoned boat he crept into it. Rest restored his strength in some degree, and making a last effort he succeeded in reaching the little house, there he gnawed at the bones which his companion had broken, and fell by the side of Nielsen. In the morning the two unhappy men arranged matters as well as they could, despairing of the lives of their comrades, whom they believed to be engulfed in the snow, and assigned themselves to winter quarters which

they would have to occupy for more than five months. During the first fifteen days they took no game; they continued to gnaw the bits of bone which they had thrown away during their previous stay in the cabin, but which they now carefully collected, this, however, would not have been sufficient of itself for forty-eight hours, if they had not found buried under the snow, in the neighborhood of the little houses, some bits of frozen flesh of seals and bears which their predecessors, the Russians, had killed. Near the end of the Twelfth month they succeeded in killing a reindeer, but found to their dismay on returning from the chase, that their fire had gone out, and that they had no more matches; but happily they succeeded in setting on fire, by the aid of their guns, some shreds of hemp which they had extracted from a bit of cord age. Thus they were again supplied with fire, but as wood was failing, they had to destroy one of the two little houses for fuel. Again they had to exert all their ingenuity, for we may remember that they had none of the few tools which had been supplied from the ship to the little company, these having been carried on in the sledge, at the time of their separation from their comrades; they detached from the abandoned boat, a bar of iron which they flattened by beating with a stone until they shaped it into a sort of knife. Nails from the boat, treated in a similar manner, were afterwards transformed into coarse needles, by the aid of which they could make for themselves garments of reindeer skin. They made thread of slender strips cut from the skins, or of small twine fabricated from hair, or fibres taken from the sails of the boat. During their stay they succeeded in killing eleven reindeer and one bear, thus they survived until near the end of the Fourth month. At this period there remained to them only three charges of powder, and impelled by the prospect of famine, they abandoned their refuge and directed their course towards the south, thus unconsciously moving directly towards the cabin of the Samoïades, where the meeting with their companions seemed scarcely less miraculous to one party than to the other.

The now united company of Norwegians remained at Gansenonos for three weeks; meanwhile the provisions collected by the Samoïades being exhausted more rapidly than ever, they perceived that there was danger of involving these poor savages in a common catastrophe if they continued longer with them. After so many adventures, five of these heroic sailors attempted another,—the sixth, Johan Anderson, could not make up his mind to quit his good friends, the Samoïades, and remained with them,—the others departed for the Russian house to seek the abandoned boat, which they found without difficulty. They were obliged to drag it over the ice for two days, but as it was so heavy, and as a large portion of the stern was demolished,

they cut it in two and returned to Gansenonos with the forward end. After spending three days here, aided by the Samoïades, they replaced the stern of the boat by a large seal-skin, and it was in this strange vessel that our five navigators embarked upon the open sea. By dint of rowing they managed in six days to land on the Waïga'z Islands, where they found another encampment of Samoïades who proved themselves as kindly disposed as the first, but it was difficult to communicate with them, for they spoke neither Russian nor Finnish. After resting eight days they were transported by their hosts on a sledge towards the south of the island, there they hailed a vessel which conveyed them to their country without further adventures worthy of note: they were but four in number, the fifth, Lars Larsen, remained with the last company of Samoïades, induced by the pleasures of their hospitality.

So in the Eighth month, 1873, four men only of the crew of The Freya were restored to their homes after a wonderful succession of hardships, one had died buried in the snow, where no doubt the bears had devoured his body, and two others remained with the Samoïades; as to Captain Tobiesen, his son, the cook and the first mate, no news has been received of them.

In striking contrast with the foregoing account of difficulties overcome by the sailors of "The Freya," is the history of the catastrophe of Mitterhuk.

A severe frost which occurred in the polar regions in the Ninth month, 1872, had shut up in the ice, to the north of Spitzbergen, a number of Norwegian fishing vessels; this unusual circumstance, sad as it was, did not excite extreme alarm in Norway for the safety of the sailors, for it was known that the government had taken the precaution to erect at Mitterhuk, one of the points of Cape Thorsden, a solid wooden house, furnished with abundance of provisions of every kind. The captains of the vessels frequenting those desolate shores, knew of the existence of this asylum, and it was hoped that the greater part of those belonging to the vessels so caught, would take up their winter quarters there. In point of fact this was the case with a number whose crews, after having vainly awaited in their vessels a return of fine weather, comprehended early in the Tenth month that they must decide to winter there.

About the middle of the Tenth month two boats crossed the arm of the sea which separates Graahuk from Mitterhuk, the thermometer at that time indicating a temperature of from 14 degrees above to 4 degrees below zero, Fahrenheit. This extreme reduction of the temperature in the midst of autumn, afforded a singular contrast to the condition of the sea which was still navigable. This phenomenon was attributable to the effect of certain streams of warm water brought by one of the branches of the Gulf Stream.

The house of refuge at Mitterbuk was large and warm; it contained not only abundant provisions in food, in clothing, in combustible material, and other things, but also implements suited to encourage activity in those who might become its occupants, for it is only by brisk exertion of the muscular forces that one is able to combat the two most terrible maladies of those countries, namely, lethargy and scurvy. The seamen who arrived there, as before mentioned, were seventeen in number, one had died during the journey. They belonged chiefly to the crew of "The Mattilas," which, like "The Freya," had left part of her men to try to pass the winter on board. It is probable that among the refugees there was no intelligent and energetic head, but that each man abandoned himself to his own inclination.

(To be concluded.)

For "The Friend."

### Inconsistencies; or a Departure from Simplicity in our Dwellings and Families.

(Concluded from page 206.)

"I may truly say, that nearly as long as I have been privileged by an acquaintance with the homes and families of Friends (which though I was born a member, is not long), I have at times almost mourned at the great relaxation from gospel strictness, and simplicity of living, so evident amongst us. Surely, I have thought, if we were to cast out the crowd of opinions, which have got the first place in our minds,—opinions founded or cherished by custom, example and education in the good, and by vanity or something worse, in the bad; and if we were coolly and calmly to listen to the silent dictates of best wisdom, we should clearly see, that the holy principle which we profess (to use the words of John Woolman), inevitably 'leads those who faithfully follow it, to apply all the gifts of Divine Providence to the purposes to which they are intended.' I venture to say, we should then find a greater necessity laid upon us, to exercise self-denial in what we are apt to think little matters, than is now often thought of; we should have such a testimony to bear against superfluity, extravagance, ostentation, inconsistency, and the unreasonable use of those things which perish with the using, as we now profess to have, against the more flagrantly foolish customs and fashions of the world."

John Woolman, "On the right use of the Lord's outward gifts," writes. "As our understandings are opened by the pure light, we experience that through an inward approaching to God, the mind is strengthened in obedience; and that by gratifying these desires which are not of his begetting, these approaches to him are obstructed, and the deceivable spirit gains strength.

"These truths being as it were engraven on our hearts, and our everlasting interest in Christ evidently concerned therein, we become fervently engaged, that *nothing may be nourished* that tends to feed pride or self-love in us. Thus in pure obedience, we are not only instructed in our duty to God, but also in the affairs which necessarily relate to this life, and the Spirit of Truth which guides into all truth, leavens the mind with a pious concern, that 'whatsoever we do in word or deed, may be done in His name.'

"Hence such buildings, furniture, food and raiment, as *best answer our necessities*, and are

least likely to feed that selfish spirit which is our enemy, are the most acceptable to us.

"As my meditations have been on these things, compassion hath filled my heart toward my fellow creatures, involved in customs, *which have grown up in the wisdom of this world*, which is foolishness with God." O that the youth may be so thoroughly experienced in an humble walking before the Lord, that they may be his children, and know him to be their refuge, their safe unfailing refuge, through the various dangers attending this uncertain state of being."

Thomas Shillitoe, in closing an address to Friends, thus writes: "I must now conclude, with expressing the earnest solicitude I feel, that we may each of us be found willing to unite with that all-sufficient help, which, I believe, yet waits our acceptance; and suffer it so to operate in and upon us, that we may become a people *wholly separated* in heart and mind, love and affection, *from everything* that has a tendency to dim our brightness, to prevent us from being as lights in the world; and be clothed with those beautiful garments, which so adorned our worthy ancestors—humility, self denial, and an entire dedication of heart to the work and service of our God; a disposition truly characteristic of the disciples of him, who declared, 'My kingdom is not of this world:' and thus may the enemy no longer be permitted to rob and spoil us, but the language go forth respecting us, 'Happy art thou, O Israel, who is like unto thee, O people; saved by the Lord.'"

From the "Memoirs of William Lewis," the following testimony is extracted: "Can there be stronger delusions in judgment than to suppose the seeking riches and honor and the enjoyment of sensual pleasure in this present world, compatible with the example of our Lord and Saviour Jesus Christ? Does it not seem as if the first great deceiver and foe of man had so spread his delusive influence in the human mind, as to pervade all its powers? seeing the bulk of professors conclude they have taken him, the Messiah, for their Law-giver and pattern, whilst they are not only *allowing* but *seeking* softness and elegance in their dwellings; fulness of bread, and in some instances 'abundance of idleness' in their daily course; and in most, less attentions and solitudes God-ward, than contrivances and expense to have the fruits of the earth before the sun can put them forth! \* \* \*

We may, though having eyes, be yet so blind as not to see the open, glaring contrariety exhibited in the allowed practice of the day, to the plain doctrines and uniform example of a world-renouncing Lord; such blindness may (through our conformity to its manners) come upon us who are professors; but this, I think, we may be assured of, that the enemies of the Lord Jesus, deists and infidels of every class, are, and will continue to be more quick-sighted; the broad sneer of derision will be on their countenances; sarcastic strictures will be freely allowed and remain unrepelled. 'These pilgrims and strangers, say they, seem to get a little reconciled to this foreign clime, though so far from their native country and their father's house; this howling wilderness, as they call it, appears, some how or other, to have received a manure that hath so enriched the soil as to render it capable of producing very pleasant fruits, even to their refined taste; and like us who know of no better portion than our good things in this life, they

seem to sit down, each under his own vine ar under his own fig tree; so that, though seems we are to be forever separated at the end of the journey—they raised up to everlasting glory for having followed, as they phrase it, a crucified Lord, and *we* consigned to shame and everlasting contempt for having denied him, yet we really appear to be travelling in the same direction; at least we go in great harmony together, and walk through this vale of tears as friends."

He continues, "Oh how long! how long shall the enemies of the cross of Christ have cause thus to triumph?" &c.

For "The Friend."

### Maryville Report.

A visit to the schools, from Okolona, Miss., up to this place, and other very urgent claims on my time, have delayed the issuing of "The Monitor." A double sheet is being prepared with an account of the action of the Committee, the occupation of the new building, the progress of Normal Class, &c. It was thought not best to print till it could be done with full information; and especially not until suitable acknowledgments could be made to the kindness of Friends in England and elsewhere. This last consideration is the cause of the present writing.

Y. WARNER.

Maryville, 2d mo. 4th, 1874.

*Wild Animals in Siam.*—Moukot, in the course of his explorations in the more thinly peopled portions of the country, had frequent opportunities of witnessing the dangers and losses occasioned the natives by elephants, tigers, leopards and other unwelcome neighbors. In one place he observes: "In this part of the country the Siamese declare they cannot cultivate bananas on account of the elephants, which at times come down from the mountains and devour the leaves, of which they are very fond. The royal and other tigers abound here; every night they prowl about in the vicinity of the houses, and in the mornings we can see the print of their large claws in the sand and in the clay near streams. By day they retire to the mountain, where they lurk in close and inaccessible thickets. Now and then you may get near enough to one to have a shot at him, but generally, unless suffering from hunger, they fly at the approach of man. A few days ago I saw a young Chinese who had nineteen wounds in his body, made by one of these animals; he was looking out from a tree about nine feet high, when the cries of a kid, tied to another tree at a short distance, attracted a large tiger. The young man fired at it, but, though mortally wounded, the creature, collecting his strength for a final spring, leaped on his enemy, seized him and pulled him down, tearing his flesh frightfully with teeth and claws, as they rolled on the ground. Happy for the poor man, it was a dying effort, and in a few moments more the tiger relaxed his hold and breathed its last."

While still sojourning in this neighborhood he says: "I had come to the conclusion that there was little danger in traversing the woods here, and in our search for butterflies and other insects, we often took no other arms than a hatchet and hunting knife, while Nih had become so confident as to go by night with Phrai to lie in wait for stags. Our sense of security was, however, rudely shaken when one evening a panther rushed upon one of the

ogs close to my door. The poor animal uttered a heart-rending cry, which brought us all out, as well as our neighbors, each torch in hand. Finding themselves face to face with a panther, they in turn raised their voices in loud screams; but it was too late for me to get my gun, for in a moment the beast was out of reach."

For "The Friend."

John Heald.

(Continued from page 203.)

"10th mo. 5th. We went on to Danville. There was no meeting there, but a few Friends, who had become members at their own request, and lived 30 miles from the nearest meeting. With these and their neighbors we had a meeting, in which as way opened, I was favored to treat of several things to satisfaction. Some of them, I understood, said they thought there was something suitable for each to take present, and many were tendered. We travelled thirty miles there and thirty back, and lodged at Joseph Austin's. In the course of the evening, we were favored with a precious opportunity, in which a young woman was remarkably tendered.

6th. We returned to Montpelier, called a short time at J. Austin's, and had a sweet parting season. I felt the renewal of the foregoing opportunity; in sweet feeling of love I bid a final farewell to these dear, old friends, and also the precious young woman. It appears most likely that I may never see her again, and oh, how I desire she may be faithful.

8th. We attended the meeting at Starksborough, at which was accomplished the marriage of Thomas Taber and Miriam Worth. The meeting was long before it gathered. I had trying exercise in it in silence, and more so while engaged in testimony. There is that which withholdeth more than is meet, and it endeth to poverty. This I first stated, and bowed that neglecting our duty tendeth to poverty, and doing more than is required endeth to poverty also, and indulging in that we know to be wrong, impoverishes and keeps us poor. Such as abide in a watchful state, and carefully attend to duty, and do not exceed, will come to know that though there is scattering abroad, an increase will be known. Several bore testimony afterwards, for there are many who are public [ministers] here, both old and young, men and women.

After having some refreshments, Elisha Hoag took us in his carriage to Lincoln, where we had notice sent on of two meetings, one at 10, the other at 3 o'clock.

9th. At the morning meeting, my mind was easy, and no prospect for a while of saying anything, but a small concern presented, and attending to that, way opened for more. Near the close of my testimony, I came on the subject of forgiving those who injure us and trespass against us, so that we may pray to be forgiven as we forgive. This lesson is hard to be learned, but necessary.

The afternoon meeting was favored. The feelings of many were touched with tenderness, and supplication for a continuation of favor was made by Elisha Hoag. The meeting concluded with thankfulness.

The next day we went to Joseph Hoag's, where we were received and entertained in a plain but comfortable manner. On the 12th Joseph accompanied us to Shoram, where there were a few Friends living, who had become

concerned to meet together, even before they became members, and had continued to meet since. We had a meeting on the 13th, with them and some of their neighbors. I was concerned to bear testimony to the usefulness of silent waiting, and that our final close was a suitable subject for silent meditation, that though it was profitable, yet it was a concern much neglected by many. When I was clear, our conductor followed. It was a good meeting, I think, and it was a comfort to my mind to have a sense that the Master still owned us.

14th. At Granville, in the early part of the meeting, Amy Dillingham appeared in a short but pertinent supplication for ability, whereby we might acceptably worship God." John Heald says, that this concern so lived in his mind, that he came forth in a testimony on that great duty, showing that it was a Christian practice to meet together to wait upon and worship God; that our Saviour practised it when upon earth, and his disciples continued it, and one of his apostles left us the injunction, "Forsake not the assembling of yourselves together, as the manner of some is." But he thought there was reason to fear that the practice was continued by some in a merely formal way. In speaking to the assembly, he was sensible of the difficulty of so dividing the word that each should take what was suitable for him—for the humble ones might reject the word of encouragement, from a sense of their own unworthiness, and take to themselves the warnings designed for the formalists, who on the other hand would neglect the word of reproof, and appropriate that which was pleasant, and which belonged to others. He closes his account as follows: "The labor in this meeting was uncommonly hard and close, but I endeavored to do it honestly."

"16th. Came in the evening to Greenfield, to Elisha Anthony's, and were kindly entertained. We were soon invited into a sitting-room, where we had none of the company of any of the family, only the man himself, though he had a large family. I like it better not to be separated from them while in the family.

17th. We had a full meeting of Friends and others, and my mind was under no small exercise. I became prepared to enter into vocal labor, and said, that I thought it to be my duty to set out from my habitation, and to leave my near and dear connections, and most of what men count dear, and to go where I believed I should be nearest in my duty to go; and when there, I have informed some of my friends that I wanted an interview with Friends thereaway, and such of their neighbors as would choose to attend. Not seeing any thing further to be done, we come together; and if that is all I find to do, I then do no more; and some seem to be satisfied with being thus notified, and others appear to be not quite so well satisfied; but I do not consider myself warranted to attempt to deliver testimony to please others, merely because they might suppose they would be gratified with it. When I feel as I apprehend a necessity to communicate, I attend to it, but not otherwise. As I do not expect a reward from man, if I am found worthy to have a reward I depend for obtaining it from the Author of my existence. Now I want you to consider how careful you are to yield obedience to the Divine requiring. I urged the

example of the householder that went out early to hire laborers into his vineyard, and agreed with them for a penny a day, and again he went at other times of the day, and they were employed to labor under the direction of the master; with much more. It was a meeting I believe to profit.

19th. At Galway. After I had waited under trying concern until I believed the time had come, I said: To fear God and work righteousness is the way to be accepted of Him. Here it may be observed that we have no testimony that I know of that assures us that those who do wrong, and continue knowingly so to do, shall be accepted. Therefore it becomes people to consider timely what they are about. It was the Apostle Peter's testimony: I perceive God is no respecter of persons, but in every nation he that fears God and works righteousness is accepted of Him. Now consider, can we expect acceptance without working righteousness? and what do these righteous acts consist of? Do they consist in outward performances, and going closely into formality and formal service, and into worldly pursuits, pleasures, profits, amusements and gratifications? Is the attention given to these, fearing God and working righteousness? If we are laying up treasure on earth, and the heart and mind are set on these enjoyments, and pursuing them and delighting in them, how does this accord with working righteousness? When I had brought many ideas to view, and set them as close home as I could, I stopped, and addressed some feeling sentiments to a tried, humble state, deeply proved. The meeting closed in a solid manner with tender-heartedness.

20th. Attended Providence Meeting. In the silent exercise, I was ready to think no way would open to speak, but at length it did, and I labored to prevail with them to refrain from evil, from indulging in that which they knew to be offensive to God; but it felt to me to have but little entrance. I went on to show, that doing evil, and feeling conviction for it, and still continuing to do so, is the way to become darkened and hardened. I instanced our Saviour's weeping over Jerusalem, that He would have gathered them, but they would not, and that now the things belonging to their peace were hidden from their eyes; and then urged the Christian duty of meeting often together to worship God. A neglect of duty opens and prepares the way to hardness of heart. I also mentioned the description of the last judgment; and the pleading of those set on the left hand, 'Thou hast taught in our streets,' 'When saw we thee hungry, or athirst,' &c.; and I instanced the servants that had received the talents, each according to their several ability, that those who obeyed the command received the reward, 'Well done, good and faithful servant,' but the disobedient were ordered to be bound hand and foot, and cast into outer darkness. Near the conclusion, I recommended them to the word of grace in the heart. The latter part of the meeting felt to me to be increasingly tender and solemn, and I hope the honest-hearted felt encouraged to a faithful, humble obedience, and the careless were faithfully warned and counselled to yield obedience to duty."

(To be continued.)

The truest characters of ignorance  
Are vanity, and pride, and arrogance;  
As blind men use to bear their noses higher  
Than those who have their eyes and sight entire.

Selected.

## THE FIRE BY THE SEA.

There were seven fishers, with nets in their hands,  
And they walked and talked, by the sea-side sands,  
Yet sweet as the sweet dew-fall  
The words they spoke, though they spoke so low,  
Across the long dim centuries flow,  
And we know them one and all—  
Aye! know them and love them all.

Seven sad men in the days of old,  
And one was gentle, and one was bold,  
And they walked with downward eyes;  
The bold was Peter, the gentle was John,  
And they all were sad, for the Lord was gone,  
And they knew not if He would rise—  
Knew not if the dead would rise.

The livelong night, 'till the moon went out  
In the drowning waters, they beat about;  
Beat slow through the fog their way;  
And the sails drooped down with wringing wet,  
And no man drew but an empty net,  
And now 'twas the break of day—  
The great, glad break of day.

"Cast in your nets on the other side!"  
('Twas Jesus speaking across the tide,)  
And they cast and were dragging hard;  
But that disciple whom Jesus loved  
Cried straightway out, for his heart was moved:  
"It is our risen Lord—  
Our Master, and our Lord!"

Then Simon, girding his fishers coat,  
Went over the nets and out of the boat—  
Aye! first of them all was he;  
Repenting sore the denial past,  
He feared no longer his heart to cast  
Like an anchor into the sea—  
Down deep in the hungry sea.

And the others, through the mists so dim,  
In a little ship came after him,  
Dragging their net through the tide;  
And when they had gotten close to the land  
They saw a fire of coals on the sand,  
And, with arms of love so wide,  
Jesus, the crucified!

'Tis long, and long, and long ago  
Since the rosy lights began to flow  
O'er the hills of Galilee;  
And with eager eyes and lifted hands  
The seven fishers saw on the sands  
The fire of coals by the sea—  
On the wet, wild sands by the sea.

'Tis long ago, yet faith in our souls  
Is kindled just by that fire of coals  
That streamed o'er the mists of the sea;  
Where Peter, girding his fisher's coat,  
Went over the nets and out of the boat,  
To answer "Lov'st thou me?"  
Thrice over, "Lov'st thou me?"

Alice Cary.

## REASON.

Selected.

Dim as the borrowed beams of moon and stars  
To lonely, weary, wandering travellers,  
Is reason to the soul; and as on high  
Those rolling fires discover but the sky,—  
Not light us here,—so reason's glimmering ray  
Was lent, not to assure our doubtful way,  
But guide us upward to a better day,  
And as those nightly tapers disappear  
When day's bright lord ascends the hemisphere,  
So pale grows reason at religion's light,—  
So dies, and so dissolves in supernatural light.

—Dryden.

## Scientific Notes.

*Sugar-mite*.—Dr. Cameron, public analyst for Dublin, states that in one sample of raw sugar, he found in 10 grains weight, no fewer than 500 of these insects. In a sample of the same sugar, Dr. Hassall found at the rate of 42,000 per pound of sugar, and Dr. Barker at the rate of 268,000 to the pound. It is extremely rare to find a sample of raw sugar in which they are not present. Of the insect

itself, Dr. Cameron says, "it is a formidably organized, exceedingly lively, and decidedly ugly little animal. From its oval shaped body stretches forth a proboscis terminating in a kind of scissors with which it seizes upon its food. Its organs of locomotion consist of eight legs, each jointed and furnished at its extremity with a hook. In the sugar its movements from one place to another are extremely slow, but when placed on a perfectly clean and dry surface, it moves along with great rapidity." To examine this little creature, dissolve a small quantity of raw sugar in a wine-glass with cold water. The mites will soon come to the top, and may be skimmed off and examined under the microscope.

*The Potato-disease*.—A report has recently been presented to the Royal Agricultural Society of England, by a committee appointed to examine essays competing for a prize of £100, offered for the best essay on the potato-disease and its prevention. They had examined 94 essays. Among the more prominent causes assigned for the potato-rot, were, 1st, Degeneration of the tuber; 2nd, Fungus on the tuber; 3rd, Wet weather; 4th, Potato-fungus (*Peronospora infestans*) attacking the foliage; 5th, Electricity; and 6th, Succulent or diseased condition of the plant caused by specific manures. They did not think any one of the essays filled the conditions which were attached to the prize. They say the natural history of the potato fungus is well known from the time it attacks the foliage until the potatoes are harvested, and they recommend that a sum of money, (say £100), be granted for the purpose of inducing a competent person to investigate the life-history of this fungus in the interval between the injury to the potato plant, and its reappearance in the following year; also that valuable prizes be offered for the best disease-proof early potato, and the best disease-proof late potato.

It is reported that Professor Owen has recently discovered in the London clay, a fossil bird with teeth; no evidence of true teeth has been previously known in a bird. Prof. Owen describes it as web-footed and a fish-eater.

Dr. Voelcker says that the brown-colored sulphate of ammonia obtained from the products of gas-works, frequently causes injury when applied as a top-dressing, owing to the presence of highly poisonous cyanogen compounds.

According to the *Montpelier Medical*, seven persons were taken seriously ill after partaking of snails at dinner. Snails, it should be remembered, feed at times on poisonous plants, and should, therefore, undergo a few days' fasting before they are handed to the cook.

Charcoal with 33 per cent. of coal-tar, may be made into a light and porous powder, admirably adapted for dressing wounds. The charcoal is said to be of great assistance to the carbolic acid of the tar.

A curious case of skin-grafting is reported in the *Medical Times*, in which pieces of skin from a white man were transplanted to the cheek of a negro. At the end of the third month, the white skin had become black, the change in color commencing with a net-work of dark-colored lines, which gradually increased in size, until the whole piece of transplanted skin was completely covered.

In some experiments recently tried, with reference to the burning of human bodies as a substitute for interment, it was found that in a suitably arranged furnace about 150 lbs.

of wood were sufficient to reduce the soft part to ashes and calcine the bones. On collecting the cinders and bones that remained, Professor Brunetti reports that a corpse weighing 11 lbs. was reduced to about 4½ lbs.; and another weighing 90 lbs. to less than 2½ lbs.

*Creating an Inland Sea*.—There exists south of the Atlas Mountains in French Algeria, a chain of salt lakes called "Chotts," that grow from east to west, following a general depression which lies at an average depth of from 80 to 90 feet below the Mediterranean. There was probably a sea there formerly, of which these salt lakes are mere remnants. It would be easy to restore this inland gulf by opening a short canal from the Gulf of Gabes, according to the description recently given to the Société de Géographie by Captain Roudaire. He states that the chotts south of Biskra are a series of shallows, generally dry in summer and forming a chain about 225 miles long. Their surface is as smooth as the floor of a barn, and sprinkled with salts of magnesia. An insignificant chain of sandhills separate the Gulf of Gabes from the nearest of these. If this project were carried out, the effect upon the climate of Algeria would be considerable. The hot and dry air of the desert would become cooler and moister by passing over the surface of a body of water perhaps 20 miles long and 50 or 100 broad. The length of such a canal is estimated to be 30 miles or less.

## Memoirs and Letters of Sarah Hillman.

(Continued from page 196.)

The accompanying letter did not come to hand until too late to insert in the order of date. It is therefore given here.

To Elizabeth Collins.

"Philadelphia, 8th mo. 6th, 1825.

—, Does my beloved friend consider the very trying situation in which we are placed; and hast thou not felt a little disposed since we parted to help lift up the hands which are ready to hang down? Ah! this is a day of treading down and perplexity; and methinks such feeble folk as thy S., have need to pray fervently that their faith fail not. Well, I can truly say that my desire is to be found more willing to suffer for the cause of my dear Lord and Master, and more devoted to serve him. But alas! I feel myself scarcely entered upon the journey; and after having been endeavoring a number of years to walk before Him whom my soul loveth, find very little progress; and feel far, very far short of that standing to which we are called. Pray for thy poor friend; that haply she may be hid until the indignation be overpast. My heart often bends towards thy habitation, and much do I desire that as thou hast in days that are past entered into feeling with me, thou mayest be made instrumental to bear up and support one who feels herself very weak and unable (without Divine aid) to do any thing to advance the Redeemer's kingdom. Great is the work of our day; and few are there who seem loyal to our King. Oh how have I craved that He would purely purge away all my dross and tin; that I might be qualified to stand for His cause! Yea, and that His eye would not pity, nor His hand spare, until the church was purged from the many defiling things that now are found in her, causing her ministers to go round her walls mourning.

For "The Friend."

## Women's Indian Aid Association.

*Extracts from Letters—The Modocs.*

One hundred and thirty-two of these destitute Indians have been removed from Oregon and placed under care of Friends in the Quapaw Indian Agency. "The children of the Modocs, twenty-seven in number, have been placed in school, and are under the care of N. B. Yearly Meeting, which liberally provides for them; but the adults and those too small for school, are very destitute, and have not been assigned to any Yearly Meeting, and all the aid of any consequence that has been received, has been from Philadelphia. We are very much in need of shoes and stockings, for Modocs, both for men and women; we still hope government will come to our aid with an appropriation soon, which will relieve us of so much embarrassment; if they could only see how much cheaper it is to feed and clothe Indians than to fight them! to say nothing of the Christian view of the subject."

HIRAM W. JONES, *Agent.*

1st mo. 29th, 1874.

The box was taken to our quarters and opened, and our heartfelt gratitude and thanks offered to our compassionate Father for the very acceptable donation, both for the goods for the mission under our charge, and the poor destitute Modocs. The garden-seeds are in time and almost invaluable, so many of the Indians are without means. \* \* This evening our dining room, 13 x 24 feet, is full of the dear Indian children, engaged with a variety of objects for amusement as well as instruction; thus has an hour been whiled away by near three score of us. \* \* \* The children have been called to order and the old familiar story told them, how the good Father cares for the poor and needy, through the instrumentality of His loving children; how they, in common with the other missions, were objects of the sympathy and tender compassion of the Lord's dear children as well as of Himself, and I was thanking the dear friends for all their kind remembrance of us in this far off land, for making us so happy, and how the making the body comfortable was cause of gratitude to God, &c. We had the company of a newly converted Indian from Canada; he was arrested, from hearing, in 8th mo. last, some remarks upon that Scripture, "It is a faithful saying and worthy of all acceptance, that Christ Jesus came into the world to save sinners." After listening to our little discourse to the children, of how the Lord made a promise to His people, that "He would be mouth and wisdom, tongue and utterance," he stood and bore an honest testimony to the same, telling us that before he was converted, his mouth was not opened to talk to the people, but now he was learning all the time from what he saw, what he heard, and what he read; he tenderly entreated the children to be very careful to mind their instructors, telling them the Bible says, "Children obey your parents in the Lord, for this is right," adding, "if you please them you please the Lord." Our happy meeting was closed with our ever sweet little prayer, "Now I lay me down to sleep."

I must tell thee of a recent visit we had from a Modoc chief and wife, who came to see to the interests of their children; it is a matter of humble admiration to us, that so soon the Spirit has infused into them the feeling

Time will not permit my saying more than to add my unfeigned wish, that thou and my beloved husband may realize Him, who has been the guide of your youth, to be your comfort and support now in the evening of life unto its great end.

Farewell, in endeared affection,

SARAH."

Clouds, portent with trial and with sorrow, were now fast gathering in dread array around our beloved Society. The prayers of the faithful were earnest to Him, who bath his way in the sea, and who ruleth over all, for preservation. These talked together of the things that were happening, and were sad. But it is interesting to see, from the preceding letter, that our dear friend, with no doubt many others also, her fellow-laborers in the precious cause, were, as prisoners of hope, driven to their stronghold—the Arm Almighty—for refuge and deliverance. The Lord is good, a strong hold in the day of trouble; and he knoweth them that trust in him. He was never foiled in battle. He never said to the wrestling seed of Jacob, seek ye me in vain. His power is above every power. Whose promise was not yet is to his dependent, faithful children. Call upon me in the day of trouble; I will deliver thee, and thou shalt glorify me."

Confirming and strengthening also, is the foregoing record, that S. H. after endeavoring for a number of years to walk before Him whom her soul loved, could not presume that she had attained to much, or that she had been justified through faith in the blood, without submission and obedience to the grace and talking in the light of Him, who was given for our salvation through repentance unto life. Not on the contrary, as is evident, she felt herself poor and needy and childlike; and that without the daily bestowal of Heavenly blessings and mercies, she could do nothing toward the peace and welfare of her own soul, nor for the promotion and glory of the Redeemer's kingdom among men. She felt the need to pray fervently that her faith fail not; and desired to be found more devoted to the cause, and more willing to suffer with her dear Lord and Master, that she might in His own good time, rejoice and reign with Him. Precious indeed are her words: and may they in this day also of tribulation and backsliding, have their due place with all: "Oh! how I crave that He, our Heavenly King, would purely urge away all my dross and tin, that so I might be qualified to stand for His cause! yea, so, that His eye would not pity, nor His hand spare, until the church is purged from all many defiling things that now are found in her; causing her ministers to go around her walls mourning."

*To her Mother.*

Evesham, Seventh-day morn, 1830.

My dear Mother,—It may seem to thee as though I had forsaken home and its concerns; but there is a bond stronger than the ties of earth, and which I believe thou knowest thy poor daughter feels; though far, very far behind in the work of regeneration. While it may not be thought to be of any consequence for me to remain with these dear friends,\* I do feel as if my Heavenly Father designed it, and that He offers a little strength to me in this way. Ah! deeply do I feel the necessity for more watchful, persevering faithfulness in

the way and work of the Lord; and strong are my desires that this may be a season of renewal of covenant, of arising from the dust, of increase of strength in Him in whom are all our fresh springs; who has in adorable mercy plucked my feet out of much mire and clay, and in matchless loving kindness planted them in some little measure upon a Rock; and given me to believe that He designs to make use of me in the glorious work of reconciliation. So that I am ready at times, to say with the apostle, 'Unto me who am less than the least of all saints, is this grace given, that I may preach among the Gentiles the unsearchable riches of Christ.' You know how tenderly my heart throbs on this subject, but yet He who knows the end from the beginning, knows how to make use of poor, contemptible instruments, and to fit them for his service; and it does feel to me as though my life has not been spared for myself only, neither for my dear mother and sisters; but for His name and Truth's sake. May His will be done.

\* \* \* Oh! what a precious state of mind true christian resignation is. It is a jewel of inestimable value, which I desire to be in possession of myself, and that you all may be sharers with me. Separation is said sometimes to strengthen the ties of natural affection. Ours, I think, needed not this to unite us more together. The family reading never felt to me of more value than since absent from it this time. We feel in its omission almost as if we had not finished breakfast. But as we ride along the road, one of us usually reads a chapter; so that makes up.\*

The trials among us at home (no doubt alluding to those of the church) are not forgotten by me; and here is not a place to rejoice. There is a disposition to say, 'We will eat our own bread, and wear our own apparel; only let us be called by thy name, to take away our reproach.' Ah! what will be the end of these things! The enemy is busy everywhere in doing all he can to scatter, tear, and slay; yet I believe he never will be able to scatter the true sheep; for they know the Shepherd's voice, and Him they follow. May we keep very close unto the Lord Jesus Christ, that so in the shakings, the turnings, and overturnings which are yet to come, we may be preserved under the shadow of the Almighty. Such can and will be able with David to 'say of the Lord, He is my refuge, and my fortress: my God; in him will I trust.' Ah! some of us know Him through adorable mercy. Oh! let us be willing to become more and more conformable unto His death. So long as our trust is in Him, although every thing round about us speaks trouble, we shall not be confounded; but in humble confidence make our appeal unto Him, and acknowledge that our record is in heaven, and our refuge on high."

\* The wholesome practice to which allusion is here made of daily reading a portion of that which is "given by inspiration of God," and is profitable "for correction and instruction in righteousness," and thus seeking to turn the mind to its best interests, is justly commended by our friend S. H. Is it not to be feared that in families, where perhaps it is mostly done when such are alone, it is sometimes neglected when company is on hand, either from too great diffidence or deference, or from the apprehension that it may not be grateful to them; or as though that which is good for the one was not for the other. But what will be the probable tendency of such a course? and how must the susceptible minds of dear children, if such there are, resolve such expediency?

(To be continued.)

\* George and Ann Jones.

of love and forgiveness, and how they can testify to the kind interposition of the Lord in their behalf. The chief was Steamboat Frank, he joined in our evening exercises, and solemnly admonished the children to do all in their power to put away all that was bad, and be willing to be taught in the good way, imposing the responsibility upon "Little Jim," our chief and interpreter for the band of boys and girls of the MODOCS; he seems thoughtful, and while he knows but little of God and his religion, yet, said he, putting his hand upon his breast, "I feel a good deal about it in here."

ASA C. TUTTLE.

For "The British Friend."

#### How Others See Us.

Dear Friend,—It is well to get light from all quarters, and often instructive to see ourselves as others see us in a corporate, as well as individual capacity. As a religious body, differing materially in doctrine and practice from other professors of the Christian name, Friends could not expect to escape criticism in various ways from the leaders and expositors of public opinion, and the late Conference in London, on the state of the Society, has brought us again rather conspicuously to the front. That we are diminishing in numbers is generally admitted, and if this diminution continue, we are told, we shall soon, as a religious body, become extinct. My object in this letter is not to dilate upon cause and effect, but to quote, from various sources, a few paragraphs to show the views entertained by intelligent and thoughtful men on the past and present condition of our religious Society, some of whom estimate our principles more highly, and comprehend them more clearly than others who profess to be members of the Society of Friends.

*The Athenæum Remarks* :—"The sect is certainly decreasing in numbers, and in time it will probably disappear as a separate organization in our religious life. But when the day of its final disappearance comes, it will be found to disappear, not because it has been a failure in the world of thought, but on account of its great success. It will disappear because its mission in the world of English life will have been fulfilled."

With a satiric touch, characteristic of its pages, the *Saturday Review* observes :—"Since the backsliding tendencies of the rising generation of Friends, wrung from the sorely grieved elders the virtual abandonment of the broad brim and drab, our eye affords little or no index to the extent of Quaker profession. The chignon may, for all we know, cover a pietism as orthodox and staid as the prim and straitly fitting bonnet, while as demure and unruffled a heart may beat under silks gay with the hues of the rainbow as under the sober stuffs and panniers of stricter days. But the spirit of the age has, we fear, been too much for the spirit of Fox and Penn. The license of intermarriage with Gentiles has laid open the Quaker dove-cote to hawks of every feather, and the scandal of commercial misadventure has made free with many an honored name. The end can hardly be far off. Let it never be forgotten, however, that the Society had, in its day, a work to do, and did it well. As a protest against vice, frivolity, and unmanliness in dress and manners, it has been met half way by the Gentile

world itself. If it is to be absorbed henceforth in the general system, the Quaker blood will remain an element of force in the veins of the natural life."

One more London journal concludes the extracts from this class of publication. *The City Press* writes :—"We are Conservative enough to wish that certain institutions and societies—and among them the Society of Friends—should victoriously resist the touch of time. We would not, for any consideration, have the old meeting houses in Bishopgate and elsewhere modernized. In days when no bonnets are worn, and when fashion inflicts, as its penalty, unlimited ear-ache and neuralgia, we view the Quaker bonnet as a sermon to the time. In days when apparently it is a matter of so much difficulty for people to say plainly what they mean, what should we do without certain amongst us who are honest enough simply to say 'Yea, yea; nay, nay.'"

Most readers of "Sarter Resartus," by Thomas Carlyle, have probably seen his tribute to the character of George Fox, "as one of those to whom, under ruder or purer form, the divine idea of the universe is pleased to manifest itself, and across all the hills of ignorance and earthly degradation, shine through in unspeakable awfulness, unspeakable beauty, on their souls; who, therefore, are rightly accounted prophets, God-possessed, or even gods, as in some period it has chanced."

And this from *Charles Kingsley* :—"In England, too, arose the great religious movements of the seventeenth and eighteenth centuries, and especially that of a body which I can never mention without most deep respect—the Society of Friends. At a time when the greater part of the Continent was sunk in spiritual sleep, these men were reasserting doctrines concerning man and his relation to his Creator, which, whether or not all believe them (as I believe them) to be founded in eternal fact, all must confess to have been of incalculable benefit to the cause of humanity and civilization."

From an article in one of the religious journals, taking a general survey of our position as a religious body, I quote the following as most to my purpose, not wishing to extend this communication beyond due limits :—"How far any attempts to impregnate Quakerism with a new vitality are likely to prove ultimately successful, may be considered doubtful in the highest degree. Great, indeed, would be the gain, at once to English manliness and to the free development of the motive power of English religion, could a large infusion of the original Quaker spirit be poured afresh into the veins of the existing Quaker body. But the present attitude of that venerable body reminds us of nothing so forcibly as of the grotesque endeavor of some elderly dame, who, at the taunt of inactivity, should don a new apron over her black silk, and patter about her old tasks, in vain forgetfulness of the fact that she is no longer the rosy stirring lass she was, when, as a gawky girl, she wore short frocks and a Holland pinafore."

In the golden age of its youth and vigorous prime, the Society of Friends presented the spectacle of a genuine and powerful awakening of the spiritual life, now and then overflowing, as might be expected, into the extravagances which are inseparable from all real enthusiasm at its height, but preserving for the most part a simplicity of demeanor, a self control, and directness of moral purpose,

which were the visible evidence of sincerity and strength.

The inference that may be drawn from these varied utterances of the outer world, fragmentary as they are, will, I think, show that the writers generally appreciate and acknowledge as true Quakerism no other than a counterpart of that which was exhibited to the world as such in the seventeenth and eighteenth centuries; that whatever reputation we have gained, or moral influence we have exercised in the world, is mainly to be attributed to the self-denying labors and exemplary lives of our forefathers in the truth. The chairman of the Baptist Union, in addressing his audience at their autumnal meeting, said in reference to Ritualism, "With the exception of the Society of Friends the hands of other denominations are not clean, nor their testimony clear in this matter." How long we shall retain this honorable distinction remains to be seen when we are told, "that even the stern simplicity of Quaker worship is shown to afford no guarantee for exemption from the fatal taint." How then can we regain our original position, or hope to witness a revival worthy of the name, but by a return to first principles, to that from whence we are fallen, for it cannot be gainsaid, that "it is not to arrangements, however perfect, but to individual faithfulness to Christ, in daily dependence upon the help of the Holy Spirit that we can look for a growth in the truth and vitality in the Church." Were this our end and aim we should realize as a Church the condition thus indicated in the Yearly Meeting Epistle for 1852, and become strong in the Lord and in the power of His might.

In conclusion, dear Friends, it is our concern that we may become a watchful, lowly minded, retiring people; that we may live more distinct from the spirit of the world, that our affections may be thoroughly fixed upon heavenly things, not in anywise seeking our own glory or desiring to occupy conspicuous positions in the world, but rather that we may individually serve God in our generation according to His will.—Thy sincere Friend,

X.

1st mo., 1874.

From "The British Friend."

#### The Conference and the 1836 Epistle.

Dear Friend,—In looking over the proceedings of the recent Conference, as reported in *The British Friend*, it is impossible not to notice the fact, that the causes which have been silently at work, producing the declining condition of the Society, are so seldom referred to. Of these causes, no one of them has operated so insidiously, nor yet so disastrously as the introduction and tacit acceptance by the Society of unsound doctrines—of doctrines proved to be inconsistent with, and in some respects antagonistic to those set forth by the early Friends. Certainly, the knowledge of the seat of a disease is half its cure. Those present at the Conference, however, with one noteworthy exception, to be afterwards referred to, and a very few instances besides have carefully avoided all allusion to this primary cause of declension.

It was not likely, in the nature of things, that a Society, which had stood its ground in the face of so much obloquy for over two centuries, should have become dissatisfied with its practice in the performance of one of its highest duties—duties in connection with the

## THE FRIEND.

SECOND MONTH 21, 1874.

public worship of an all-wise and beneficent creator, if the seeds of contrary doctrine had not been sown, taken root and fructified, may be in a congenial soil. We may say, with one of Job's friends, that "affliction cometh not forth of the dust, neither doth trouble spring out of the ground." Undoubtedly, in this case, the declension that has overtaken the Society, which is conspicuous by its expressed desire to change its mode of conducting meetings for worship has not risen out of nothing, but contrariwise is the logical and natural outcome of *other principles* which have been, times without number, shown to be out of harmony with the true and original principles of Friends. A large and influential Yearly Meeting, on the American Continent, so long ago as 1847, containing within its limits many valuable friends of large experience, declared, in reference to these new principles, that "Should this superficial religion prevail, it would introduce the spirit and maxims of the world into the very bosom of the Society." And again, "were the Society to conform to the unscriptural opinions, advocated in the work under notice, it would be carried back to [what are] the beggarly elements." Thus the *very existence* of the Society would be destroyed.

There were causes at work, sufficient in the estimation of that Yearly Meeting, to bring about a decided change in the Society, if not to jeopardise its existence, and as this "superficial religion" has been suffered to grow, spread its roots, and bring forth its legitimate fruit, it has come to pass now, in this day, that "the spirit and the maxims of the world" have been introduced largely into our Society, and, notably, the leading error has attained such a growth, that reading the Scriptures is openly advocated in meetings for worship, as both necessary and desirable. And, indeed, there are many more practices, equally foreign to the views of Friends, which must follow one after another in logical sequence; the reading of the Scriptures in the way proposed being simply the first or initiatory step.

The Report agreed to by the Conference brings out clearly the existence of opposing and contradictory sentiments, and when presented to the Yearly Meeting there will be found, as at the conference, quite as many for the adoption of that permissive legislation, which confers on a Monthly Meeting the power to alter long-standing usages, provided that the change is attended by a decent show of unanimity. Yet it is evident that there is a considerable feeling of dissatisfaction at this continued bringing down of portions of the goodly edifice of Doctrine and practice erected by our worthy predecessors. It is not welcome nor acceptable to not a few who claim to belong to the same body. These must know that the troubles of the Society did not spring out of the ground; they are the growth of one or two generations—of connivance at error—of a sacrifice of principles for the sake of peace; and the sort of fruit that may be looked for, they were plainly enough warned of long ago.

It ought ever to be borne in mind that the Society itself, by its public documents, prepared the way for the advocated change in the mode of holding our Meetings for Worship. The Epistle of 1836 contains much in reference to the Scriptures, which is plainly

contrary to the well-understood views of Friends. In short, it is in my view, fundamentally unsound, yet, it was adduced at the recent Conference, as indisputably containing the sentiments of the Society in relation to the Scriptures! When such were put forth by authority thirty-seven years ago, need we wonder at the present aspect of affairs? The views enunciated in the Yearly Meeting's Epistle of 1836 were objected to by the Yearly Meeting of Philadelphia in 1837, as containing expressions not in accordance with the sentiments of our primitive Friends. But what did it signify? the objectionable matter must stand. It was pretty much from the pen of one who had an unenviable share in destroying the unity of the Society of Friends. And it was reserved for his biographer to revive the unsound and unfriendly passages, and singularly enough, as an appropriate commentary thereon, the Conference all but decided that the Scriptures should be read in one at least of Friends' Meetings for worship on a First-day. Thus objectionable doctrine gives sanction and countenance to objectionable practices, and the seed sown in 1836 promises to bear fruit in 1874, not to the advancement, but to the dishonor of the precious cause of Truth, as professed by Friends.

D.

12th mo. 22d, 1874.

*An Intelligent Cat.*—The following incident is published in the *Virginia (New) Enterprise*. Policeman Hayton of this city, it is stated, has a cat which recently gave evidence of more than ordinary sympathy and intelligence. This cat came to his master, and by scratching at his legs and mewing attracted his attention. Thinking this behavior of the animal was an intimation of hunger, Hayton gave the cat a slice of beef, when he at once ran away with it. In about a minute he reappeared and again began begging. Hayton thought it strange that the cat was so hungry, but cut for him another and larger piece of meat. This the cat took in his mouth and again went off. Hayton followed, and saw him go out upon the sidewalk and drop the meat through a knot-hole. On going to the place and looking through the knot-hole, it was discovered that there were three small kittens under the walk, so young that their eyes were scarcely open. No mother cat was near, nor was there a place any where in the vicinity where a cat could have found a hole through which to have crawled under the walk. It would seem that in his rambles Tom had found the kittens, and understanding from their cries that they were hungry, had set about providing for their wants in the manner related.

I saw that a humble man, with the blessing of the Lord, might live on a little; and that where the heart was set on greatness, success in business did not satisfy the craving; but that commonly with an increase of wealth, the desire of wealth increased. There was a care on my mind, so to pass my time that nothing might hinder me from the most steady attention to the voice of the true Shepherd.—*John Woolman.*

True religion shows its influence in every part of our conduct; it is like the sap of a living tree, which penetrates the most distant boughs.

In the present number will be found two communications made to *The British Friend*, from which we take them, on the present condition of the Society in England. We rejoice whenever we see such written evidences of regard for the principles and practices which Friends must ever maintain; especially when given by those in Great Britain who have not been carried away by the popular current of modern innovation. The seed of the present widespread defection from sound religious principles, was first sown in England, and there the necessary religious labor and exercise to have it eradicated, ought to be undertaken and perfected. It is particularly encouraging when the true cause of departure from Quakerism, or primitive Christianity, is brought into view, viz., the unsound doctrines held by a very large portion of the members; which is done by one of these writers. There can be no effectual recurrence to first principles, and the testimonies of Truth growing out of them, so long as those unsound doctrines promulgated by influential members in London Yearly Meeting are not repudiated as inconsistent with the scriptural religion held and published to the world by Fox, Barclay, Penn, Penington and their coadjutors.

The spiritually minded men who gave dignity and weight to Philadelphia Yearly Meeting, not only, as one of these writers states, detected the leaven of these unsound doctrines in the London epistle of 1836, but they bore a noble and unequivocal testimony against them in 1847. However this testimony may be despised, misrepresented, or denied, by those who favor the doctrines therein disowned, it may safely be left to the revelation of their fruits as time rolls on, to prove the correctness of the exceptions taken to the opinions reviewed, and to vindicate the clear perception, the spiritual foresight, and the unfeigned religious concern of that Yearly Meeting when it made its Appeal for the Ancient Doctrines of Friends.

William Penn speaks of "The Light of Christ within, as God's gift for man's salvation," as the doctrine that particularly distinguished Friends from other orthodox professors, and from this "as the root," he rightly states, grew "the goodly tree" of doctrines and testimonies which Friends were, and are, called to exemplify to the world. As these doctrines and testimonies run counter to the will of the natural man, and are in opposition to the spirit and maxims of the world, nothing but this Light of Christ within, or Divine Grace, could originate them or enable the believer in them faithfully to act up to them. But the modern reformers in our Society, keep this doctrine altogether in the back ground, if they believe in or inculcate it at all; while great stress is laid upon entire dependence on the atoning sacrifice of Christ, and the study of the Scriptures as the means to become acquainted with the "system of truth for our salvation;" so that the *believer*, made so by that faith which "is a faculty of the human mind," "may accept the mercy of God in Christ Jesus, and apply it to his own condition," by which "it follows in reason that the believer is saved."

The "root" being changed, the branches

must be changed to correspond, and the fruit (or testimonies) borne by the "goodly tree" springing from the original root, will not perfect on the modern substitute. Where these modern doctrines have supplanted the original faith of Friends, it is the natural result, as every day reveals, that the testimonies which Friends have so long believed in and supported, will be discarded; and the course of a very large proportion of the members in the Society demonstrates how widely these doctrines have spread.

London Yearly Meeting has so far deserted the ground on which it formerly stood, is so changed in regard to the doctrines and testimonies ever held by Friends, and which it once unhesitatingly advocated, that it can no longer be recognized as the representative of that noble army of convinced and thorough-going Quakers, that came up from the dales of the North, and proclaimed the great truths of the gospel among the restless, turbulent crowds of London, professors and profane; or who gladly filled its noisome prisons, to die there, if need be, rather than compromise the testimonies of Truth; several of which are now disclaimed or disregarded. But neither these doctrines nor testimonies will be allowed, by the great Head of the church, to want witnesses to their truth and value. If the children hold their peace, the stones of the streets will cry out, and the original faith of Friends, as promulgated by Fox, Penn, Barclay, &c., will again be acknowledged in its entirety and purity, in the Lord's own time. Blessed are all they who hasten the day, by their suffering or their service.

#### SUMMARY OF EVENTS.

**FOREIGN.**—A London dispatch of the 14th, says that Taylor's Pantechnicon and furniture repository was burned last evening. The fire broke out at 4 p. m., and raged until midnight. Five houses and several large stables adjacent were partially destroyed. There were a number of accidents, and two firemen were killed. The fire attracted an immense and unruly crowd, and the military were called out to preserve order. The total loss is estimated at \$15,000,000. Taylor's building contained five hundred carriages, and a great number of mirrors and pictures, together with a vast amount of other property. Up to the close of last week, 346 Conservatives and 297 Liberals and Home-rulers had been returned to Parliament. The House of Commons will contain 216 new members.

It is expected that the Emperor of Russia will visit England in the Fourth month.

The correspondent of the Times with the Ashantee expedition, in his dispatch announcing the successful termination of the war, says that General Wolsely has made arrangements for himself and his white troops to leave Africa for England on the first of next month.

A violent gale, accompanied with snow, prevailed off the south-west coast of Ireland on the 12th inst., causing some marine disasters. The German bark Hercules was wrecked, and eleven of her crew perished.

The same gale caused the Baltic sea to overflow the entire coast of Schleswig-Holstein. The dikes protecting the low lands were burst in many places, and large tracts of country were flooded. The damage to property has been very heavy.

The total emigration from Ireland since 1851, is stated to be 2,252,743 persons, or about two-fifths of the present population of the island. In 1873 the emigration consisted of 90,149 persons, viz: 51,930 males, and 38,219 females.

On the 16th the British Ministry resolved to resign immediately. Gladstone will advise the Queen to send for Disraeli, who will probably form a new cabinet.

The *Pull Mall Gazette* publishes a report that the British forces took possession of Coomassie, the capital of Ashantee, on the 20th of last month, and would commence their march back to the coast on the 22d inst.

London, 2d mo. 16th.—Consols 92. U. S. sixes, 1867, 109½; new fives, 103½.

Liverpool.—Middleings cotton, 7½d. a 8¼d. for uplands and Orleans.

A Madrid dispatch says: It is probable that the form of government in Spain will be decided by a *plebiscite*. In such an event Castelar will support Serrano as a candidate for the Presidency of the Republic.

Republican troops were advancing upon Bilbao, and it was expected the Carlists would soon be obliged to raise the siege of that city. The national forces have defeated the Carlists before Tolossa and re-occupied the place.

The Spanish government has agreed to an exchange of prisoners with the Carlists.

Francis Joseph, Emperor of Austria, arrived in St. Petersburg the 13th inst., and was cordially received by the Czar and imperial family.

Cardinal Tarquini, a zealous and able champion of the papacy, died in Rome the 14th inst. He was an earnest advocate of the infallibility dogma when it was propounded to the ecumenical council, and was in thorough accord with the Pope.

A letter from Rouher is published, advocating a *plebiscite* to decide between an Empire and Republic, when President MacMahon's term expires.

The mail steamer from South America reports that the yellow fever continues unabated in Rio Janeiro, and the cholera is raging with great violence in Buenos Ayers and Montevideo, and thousands of the inhabitants had fled from those cities.

Ex-President Santa Anna has arrived in Havana, from Nassau, en route to Mexico. He says he returns under President Lerdo's proclamation of amnesty, and is firmly resolved to take no part in Mexican politics.

The population of Japan, by the official census of 1872, was 33,110,825.

The south-eastern portions of Europe have been visited by heavy gales, which did much damage. On the Black Sea there were many disasters to shipping.

In the German Reichstag on the 16th, General Moltke, in the course of a speech in support of the military, said: "What we acquired in six months, we shall have to protect by force of arms for half a century to come. France, notwithstanding a majority of her people are convinced of the necessity of peace, is imitating our army organization."

A deputy from Alsace moved a plebiscite to be taken in Alsace and Lorraine on the question of nationality.

The exports of grain of all kinds from Russia were in 1873, 86,309,347 bushels, in 1872, 75,871,937 bushels, and in 1871, 105,861,137 bushels.

**UNITED STATES.**—The interments in Philadelphia last week numbered 284. There were 39 deaths of consumption, 19 inflammation of the lungs, 11 inflammation of the brain, and 11 scarlet fever. On the 13th an ice house at Thirty-first and Master streets, near Fairmount, fell, and a number of men who were engaged in filling it with ice were buried in the ruins. Of these about twelve appear to have been killed, and as many more severely injured.

The number of voters registered for the next election is 153,462, exclusive of a part of one of the wards. In 1873 the assessors returned 167,094 voters.

In the Girard College there were at the opening of the present year 547 pupils. The residuary fund for the support of the college, is stated to amount to \$5,219,258, invested mostly in real estate in Philadelphia and Columbia and Schuylkill counties.

In Congress the questions of currency and finance have been discussed at great length, but so far without any practical result.

The U. S. Senate, after long debate, adopted an act which they return to the House as a substitute for the bill passed by that body repealing the bankrupt law. In the proposed new law it is provided that at least one-fourth in number of the creditors, and representing at least one-third of the amount of the debts, must unite in the petition to create an involuntary bankruptcy. Other changes, believed to be improvements, are introduced.

From the *Paper Trade Journal* it appears that during 1872 there were in operation in the United States 912 mills, owned by 705 firms, and representing a value of \$35,000,000. The mills employ 13,420 male and 7700 female hands, besides 922 children—a total of 22,042 laborers, whose wages amount to \$10,000,000. The production of these mills during the year was 317,357 tons, valued at \$66,475,825.

The President has ordered that the court of inquiry in the case of General Howard, who is charged with mismanagement of the Freedmen's Bureau, shall be composed of Generals Sherman, McDowell, Pope, Meigs and Holt. Major Gardiner, Judge Advocate. The court has been ordered in compliance with a resolution of Congress respecting such an investigation.

*The Markets, &c.*—The following were the quotations on the 16th inst. New York.—American gold, 112½

U. S. sixes, 1881, 120½; ditto, 1862, 118; ditto, 10-4 5 per cents, coupon, 115½; registered, 113½. Superfine flour, \$5.75 a \$6.20; State extra, \$6.50 a \$6.80; fine brands, \$7 a \$11. White Michigan wheat, \$1.82; No. 1 Milwaukee spring \$1.58; No. 1 Chicago, \$1.55; No. 2 do., \$1.50 a \$1.51; No. 3 do. \$1.42 a \$1.43. Oats, 5 a 6½ cts. Rye, \$1.03. Western mixed corn, old, 8 cts.; new, 76 a 78 cts.; white, \$1 a \$2 cts. Philadelphia—Cotton, 16½ a 17½ cts. for uplands and New Orleans Superfine flour, \$5 a \$5.50; extras, \$6 a \$6.50; fine brands, \$7 a \$10.25. White wheat, \$1.80 a \$1.85; amber, \$1.68 a \$1.78; red, \$1.58 a \$1.68. Rye, 96 ct Yellow corn, 77 cts. Oats, 58 a 65 cts. Smoked ham, 12 a 14 cts. Lard, 9½ a 9¾ cts. Sales of about 300 beef cattle at 7½ a 7¾ cts. per lb. gross for extra; 6 a 7 cts., for fair to good, and 4 a 5½ cts. for common. Sheep, sold at 5 a 8 cts. per lb. gross and corn fed hogs at \$3.50. \$9 per 100 lb. net. Chicago.—Spring extra flour, \$5.50 \$6. No. 1 spring wheat, \$1.21½; No. 2 do., \$1.17. No. 2 corn, 56½ cts. No. 2 oats, 41½ cts. Rye, 82 cts. No. 2 spring barley, \$0 a 90 cts. Lard, 9 cts. Baltimore.—Penna. red wheat, \$1.73 a \$1.75. Yellow corn, 73 a 75 cts.; white, 75 a 80 cts. Oats, 55 a 59 cts. St. Louis.—No. 2 winter red wheat, \$1.37; No. 2 spring, \$1.20. No. 2 corn, 59 cts. No. 2 oats, 46 cts. Lard, 8½ cts.

#### FRIENDS' FREEDMEN'S ASSOCIATION.

With nineteen schools in N. Carolina and Virginia in successful operation, and 2193 scholars in attendance involving an expense of \$1,000 per month for the next three months, the Association has but a small amount in its treasury. We commend the subject to the serious attention of Friends.

RICHARD CADBURY, Treasurer.

JAMES E. RHOADS, Pres't of Executive Board.

Philadelphia, 2d mo. 13th, 1874.

#### ERRATUM.

The date of the death of Sarah M. Saunders, published last week, should have been First month 26th 1874, instead of 1873.

#### WESTTOWN BOARDING SCHOOL.

A Stated Meeting of the Committee on Instruction will be held on Seventh-day, the 21st instant, at 10 A. M. in the Committee-room, Arch St. Meeting-house.

CHARLES J. ALLEN,

Philada. 2d mo. 11th, 1874.

Clerk.

#### WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of the Institution are expected to be vacated at the close of the Winter Session, in the 4th month next, Friends who may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee.

Nathaniel N. Stokes, Cinnaminson Post-office Burlington Co., N. J.

Charles Evans, No. 702 Race St., Philadelphia.

Deborah Rhoads, Haddonfield, N. J.

Rebecca S. Allen, No. 335 S. Fifth St., Philada.

#### FRIENDS' BOARDING SCHOOL FOR INDIA CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Spring term. Also a Friend to act as assistant matron.

Application may be made to

Ebenezer Worth, Marshallton, Chester Co., Pa.

Joseph Scattergood, 413 Spruce St., Philada.

Aaron Sharpless, Street Road P. O., Chester Co., Pa.

Thomas Wistar, Fox Chase P. O., Philada.

#### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia Physician and Superintendent—JOSHUA H. WORTINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

MARRIED, on the 10th of Second month, 1874, Friends' Meeting-house, on Sixth street, Philadelphia RICHARD W. BACON to REBECCA ELKINTON, daughter of George M. Elkinton, all of this city.

On the 12th of Second month, 1874, Friends' Meeting-house, Mansfield, N. Jersey, ELI BRANSON, of Philadelphia, to JANE, daughter of Joel Bishop, of Columbus, Burlington Co., N. J.

WILLIAM H. PILE, PRINTER.

No. 422 Walnut Street.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, SECOND MONTH 28, 1874.

NO. 28.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,  
PHILADELPHIA.

Single stage, when paid quarterly in advance, five cents.

For "The Friend."

Memoirs and Letters of Sarah Hillman.

(Continued from page 213.)

"1830, 8th mo. 18th. Our beloved friends, George and Ann Jones, returned to us the 10th of last month, after an absence of nearly three months, wherein they had visited many meetings within the Yearly Meeting of New York. Since which it has been my privilege to be much with them at home, as well as at them and Abington Quarterly Meetings. Their services have borne the stamp of the King's seal at all times and in all places where my lot has been with them. And I assuredly believe they leave many seals of their apostleship in this land, who will be as stones in their own of rejoicing in that day when the Lord Jesus shall assemble worlds before his seat.

Dear Ann Jones is, to some few little trembling children, whom it has pleased the blessed head of the church to entrust with a gift of the Gospel, a mother, whose removal we shall deeply feel. Oh! may we be strengthened to look to the same Almighty Helper, through whose Holy aid she was made so eminently useful! That we too may be enabled to fulfil the ministry He has committed; being willing to be accounted fools for his sake. Yea, to spend and be spent if we may in any wise be permitted to receive the answer of well done.

To Ann Jones.

Philadelphia, 9th mo. 17th, 1830.

My dear and valued Friend,—I sit down to address a few lines to thee under feelings of painful sadness, from the apprehension that the little committed to my care will never be occupied in such sort as to produce that kind peaceful enjoyment which results from perfect obedience, and unreserved dedication of heart. Ah! deep indeed are the baptisms which some have to pass through in order to prepare them for the service and work unto which they are called and appointed; and verily I believe except supported by the ever-acting Arm, (though unseen) in seasons of trial and dismay, the poor, conflicted, tribulated, trembling disciple would sink. But through adorable, unutterable mercy, He, who when the poor disciples said to him 'Master, rest thou not that we perish,' arose, and commanded a calm, and the winds and the sea

obeyed, does give us to see in his own time, that He sitteth upon the flood, and that He is King forever. Thus enabling us to persevere in that tribulated way, which leads to His heavenly kingdom. Thou art oft, yea daily remembered with thy dear partner, by very many friends here, whose tender inquiries are 'Have you heard any tidings of our dear friends?' and I cannot but speak out at times, of the blank we feel; but am endeavoring in the simplicity of a little child, to have a single eye to the Shepherd and Bishop, desiring to become weaned from every other dependence. Nevertheless, I do believe there is strength in unity, and that as we are engaged to be found walking in the light, there is a blessed fellowship enjoyed while here on earth with all the living, and in the fresh flowings of love, we can desire others to 'Come and have fellowship with us, for our fellowship is with the Father and with his son Jesus Christ.' And I do also believe that it is allowable, as in the days of captivity formerly, for those who fear the glorious, holy Name, to speak often one to another, and that he not only hearkens and hears, but keeps a book of remembrance, and will remember and spare these, when he makes up his jewels, as a man spareth his only son that serveth him. So that I do very affectionately desire your united remembrance and sympathy, yea prayers too, that the whole burnt offering may be made; that however I may be led, by a way I have not known, and comparatively alone, the path may be plain, darkness may be made light, and crooked paths made straight, that His blessed holy will may be wrought in, and upon, and through me, who is worthy of the very best of all our faculties; that so when this mortal shall put on immortality, the soul disrobed of this mortal of flesh, may be prepared to assimilate with those pure spirits which surround the throne, who having come through great tribulation, and having known their robes washed in the blood of the Lamb, are employed in saying, 'Worthy is the Lamb that was slain to receive riches and honor and glory and blessing; for thou has redeemed us by thy blood.'

Our beloved friend, H. Paul, took E. P. and self, to Haddonfield Quarterly Meeting, yesterday. I thought it a good meeting, though as to myself have only to speak of infirmities. It was like at Woodbury, where also I bore the burden home with me. Oh! shall I ever be able to say, 'It is done as thou hast commanded,' the fears are so many and great that assail my poor mind. 'My backslidings are many,' is oft the language of my heart; but He who knows all things, sees the bent of the mind; the desires are raised by Him for strength to do or to suffer according to his will, and notwithstanding all my fears and cares and tears, in moments when the light of His glorious countenance is a little lifted up, can rejoicingly believe that He will help to the end, and can trust him for all that is to

come. Ah! then pray for me that in and through all, His glorious, holy Name may be exalted, whether it be by life or death. And be enabled to say:—

'Good when he gives, supremely good,  
Nor less when He denies;  
E'en crosses from His bounteous hand,  
Are blessings in disguise.'

My dear mother and sisters desire their affectionate love to you; also dear E. Pitfield and M. Bacon.

With tenderest love to thee and thy valued affectionate husband, am thy attached,  
S. HILLMAN.

No date.—This time last month, went with my dear friends E. P. and K. P., to the Western Monthly Meeting, where my good and great Master required, as I believe, a sacrifice; which through his mercy, was enabled to yield up before his holy footstool! Oh! how does my spirit crave preservation through future steppings; that no shade may be wrought upon the blessed cause through me. Thankfulness was felt for the ability granted to do His holy will, and I returned in peace. Several times since have had to come home in that poverty which results in withholding more than is meet, and though at times so awfully do I feel the responsible state of the watchman, as to be ready to fear my unfaithfulness will in the end close the door against me, that surely an entrance into that glorious, holy city, whose gates are praise, will not be ministered unto me. Yet at others, through the renewed goodness and tender loving kindness of my adorable Redeemer, have been constrained to break forth in a few words, to the consolation of my own poor mind, if no other good may result therefrom; and to bow my knees before the God and Father of our Lord Jesus Christ, imploring a little help. Oh, may my soul bow low as at his blessed feet who died for me, and rose again; who set us an example that we should follow his steps, who said to his immediate followers, 'Ye also ought to wash one another's feet.' And when we have done all say, we are unprofitable servants."

To Hannah Paul.

Philadelphia, 3d mo. 24th, 1831.

Thou, my beloved friend, wast so sweetly with me last night in my sleep, that I am ready to conclude thy sympathetic mind has bended a little this way at times of late. Thy language, after the manner of dreams was, 'I am so concerned about Sarah Hillman that I scarcely know what to do?' Now, my dear friend, hast thou any particular concern on my account? If so withhold it not from me. I trust it will be received in that love which I know thou dost feel for me. In reply I said, my concern is great for myself, and very earnestly do I desire to be preserved amid all the temptations and trials which may be permitted to assail, and to anchor in faith on that immovable foundation which is laid in Zion,

considering Him who endureth the cross, despising the shame, for our sakes, &c. Much in this way passed between us; and on awaking my mind seemed a little strengthened. I do long to be more thoroughly washed, yea to be sanctified in body, soul and spirit, that so all things may be pure. But oh! so far from this state do I find myself, that I am ready to faint many times; and whilst through adorable mercy, sensible at seasons of a renewed call to labor in the ministry of reconciliation, so destitute do I feel of every qualification for this awful service, that the language of my heart is, 'I am a worm, and no man;' 'I cannot speak for I am a child.' But oh! how has the language been, 'say not, I am a child, for thou shalt go,' &c. 'Be not dismayed at their faces, lest I confound thee before them.' Ah then, dear friend, pray for me, that I may abide in the very bottom of Jordan all the time appointed; and that holy resignation may be witnessed, to be, do, or suffer, according to His righteous will: that in entire dedication, thy poor feeble friend may prove herself more attached to her Divine Lord, than any earthly joy. 'If ye love me,' says He, 'keep my commandments.'

Affectionately thy S. H."

(To be continued.)

For "The Friend."

#### Account of Recent Adventures and Suffering in the Arctic Regions.

(Concluded from page 210.)

From the time of their arrival until the beginning of the polar night, whose deep shadows continued for three months and were only dissipated at intervals by displays of aurora borealis, the refugees occupied themselves in hunting, but we must believe that only a small number did so, and with little energy, for their journal mentions as the whole of the game killed, two bears, two blue foxes and a few reindeer. When the night came on they shut themselves up in the house, from which they scarcely ever went out: a few of the men occupied themselves for a time in joiner work which however they soon abandoned, and the greater number appear to have thought that being well warmed, well fed, well clothed, and well lighted, they had only to give themselves up to inaction and the enjoyment of the comforts by which they were surrounded. They crowded together into one room, where they built a great fire; they did not even take the trouble to cook or to give attention to the commonest measures of cleanliness, or to take other precautions for the preservation of their health. They were contented to consume the provisions which required no preparation, and their indolence was so great that the larger part of their stock of Liebig's essence of beef was used without having been even diluted with hot water.

This inertia, this carelessness, and the filth which they created, were not long in producing their natural effects. On the second of Twelfth month, the first man sickened, on the nineteenth another, and by the twenty-fourth nearly all of them were attacked by scurvy. It was now necessary to occupy another chamber; here the sick were laid on good mattresses, and were nursed by the only two of their comrades who remained well. The temperature which had varied during the Twelfth month from 4 degrees to 13 degrees below zero, fell on the seventh of First month

to 20 degrees, and aggravated the sickness in a frightful manner; on the nineteenth, two men died.

At this period, notwithstanding the steadiness of the cold, the journal mentions that the waters of the fiord of Mitterhuk were not yet frozen. The sanitary condition of the refugees experienced no change for several days, but in the latter half of the Second month their illness increased. On the 21st the third death took place, the cold then was 30 degrees below zero, but the first rays of the sun were dawning upon the horizon: meanwhile one of the nurses who had remained well fell sick in his turn, and left the keeping of the journal to one of his companions, who thus writes: "There remains but one well man to take care of all the rest, may the Lord have pity upon us!"

From this time the journal only records thermometric observations and the dates of fresh deaths. On the 28th of Second month, the temperature was 34 below zero, the coldest of the winter. In the first fortnight in the Third month the weather moderated, the temperature varying from 4 to 20 degrees below zero, but by the fourth of Fourth month the cold had increased again, and on the latter date was 30 below zero. After this the record of the temperature ceased. Ten additional deaths had been registered up to that day, an eleventh is noted on the 19th, by a new hand, and the mention of this death is followed by an expression which seems to indicate delirium in the writer. There are no further entries.

Such, in short, according to the indications of the journal, are the principal and mournful incidents of this fearful winter residence at Mitterhuk. It remains to us now to tell in what condition the house was found when Captain Mack's ship arrived there the 18th of last Sixth month. On the 16th, Captain Mack had arrived at Isfjord, but after several vain attempts had been obliged to give up the effort on that day to reach the house of shelter. On the morning of the 17th, he sent a boat commanded by a harpooner; after ten hours absence the man returned, bringing information that there was no one living at Mitterhuk, he had only been able to find corpses, upon one of which was fastened a note of Captain Telessen, of Bergen, commander of the steamer Ellida: this note stated that the captain of the Ellida had landed there the day before, and had collected all the papers which he could find.

Next day the Ellida returning from Advent Bay, met Captain Mack's ship, and the two captains landed together, reaching the building about 3 o'clock in the afternoon. At the end of the house were piled up clothes, bed covers, furs and other articles; this pile was composed no doubt of the garments and bedding of the deceased men, and indicated that the survivors feared, whether rightly or otherwise, that the disease was contagious. At a short distance off their eyes lighted on a square pile of wood, covered with a tarred cloth; they approached, and lifting the cover, the visitors recoiled with affright at the sight of five corpses; this spectacle, nevertheless, was almost nothing in comparison with that which they were about to find in the interior of the building. \* \* \* The refugees had occupied two chambers; in that to the right six corpses were extended, emaciated, decomposed, mouldy and of hideous aspect. In that

to the left three dead bodies were lying in beds, and a fourth was stretched upon a chest \* \* \* This latter was the most carefully clothed, he wore a fur vest and cap; on his hands were white woolen gloves; the exterior side of his face was well preserved, the other side must have been badly wounded, for stream of blood had flowed from it the length of the chest. It was thought that he was the last survivor, and that seeing himself alone in the midst of death, he had been seized with delirium and had wounded himself in the head. \* \* \* \* \*

All the bodies were buried by the crew of the Ellida, this sad duty accomplished, they returned to the building to make an inventory of the provisions. There still remained food of every kind, and fuel in abundance. The hermetically sealed meats were almost entirely untouched; it was so too with the case of preserved vegetables; these unhappy men having supported themselves to the last on salt meat, mostly raw, lard, condensed milk and Liebig's paste.

In reviewing these two narratives, we are much struck with the contrast; on one side we see the sailors of "The Freya" battling with the elements with heroism, their resources were nought, or nearly so, not only as to food, but also as to clothing, implement fuel and ammunition; no one was safe for a hour. It was constantly necessary to use a most superhuman efforts to escape impending death; their waking hours were without repose, their sleep without shelter, nevertheless their lives were preserved in the midst of the gravest dangers. They had to struggle against cold, bears, hunger, lethargy and death, but of seven sailors of "The Freya" six survive by brave efforts for seven months, their preservation during the latter part of the time being doubtless largely due to their following the example of their hosts, the Samoians in taking brisk daily exercise in the open air regardless of the weather, in fearlessly hunting white bears, seals, walrus and reindeer and in drinking the warm blood of their game when captured. On the other hand, we see a considerable company of men who arrive in full health at an establishment almost comfortable, who gave themselves up to indolence and sleep, neglected the most essential precautions for the preservation of life, and perished miserably, leaving, after their death one of the most hideous spectacles recorded in the annals of maritime suffering.

The moral is easy to draw: it brings into relief the old proverb, "Help thyself at heaven will help thee." There are in fact many wonderful results in the indefatigable energy of the sailors of "The Freya," as misery arising from the apathy of the refugees of Mitterhuk.

For "The Friend."

John Heald.

(Continued from page 211.)

"10th mo. 21st. Attended the meeting at Northampton: It was small and dull in the forepart, and though mostly of other societies I felt willing to suffer, but after long suffering I engaged in testimony to the Truth—stating that there were some who did all their work to be seen of men, and we should do our work to please God. We are required to fear Him that can destroy both soul and body, and to worship Him, 'Fear God and give glory to His name, who made heaven and earth, the

as and the fountains of water.' I went on to show the danger of resting in outward performances; that it was not the name of religion, nor outward rites and ceremonies, not the putting away of the filth of the flesh, but the answer of a good conscience [that now weeth us;] that singing what is called Psalms and hymns in meetings was calculated more to please the carnal mind, than to aid in the most solemn act and approach of the mind of man to his Maker; that there appeared to be danger of the mind being so taken up with and attached to outward performances, that inward attention was in danger of being neglected while the outward was observed. As to trusting to what the learned tell us, and asking our eternal welfare on hearsay, can a man or woman of rational, intelligent understanding be satisfied with such a dependence? Is there not room to suspect, that in something essentially necessary, [the teacher] might be negligent? Such a reliance is inconsistent with what our Lord and Saviour said to the people, 'Why judge ye not for yourselves, what is right?' He knew what people should do, and what would be profitable employ for them in order to salvation. My mind was humble, and afterwards I did not know but that in some things I might have gone too far; but on a quiet review I feel satisfied, not finding any word or sentence to give uneasiness. I therefore leave it to the Divine disposer, to whose service I have been devoted.

22d. After a meeting at Mayfield, we went to Levi Saymore's. My companion had the evening before fallen under discouragement, remained still, and eat no supper nor breakfast, and could take scarce any satisfaction in any thing. It appeared most proper to be still, though I wanted to press on to accomplish the work, so that I might return home without omitting what I ought to attend to. As I write the aspiration arises, May the will of the Lord be done!

24th. We spent at Levi Saymore's, when it seemed there was no way to go, or to me all directions to travel seemed alike. My companion wanted to go back to Providence, and his uneasiness increasing, we conversed with a few friends, and the result was to go back.

25th. Attended the meeting at Providence. In it we were favored together. My companion expressed some sentences, and he came away relieved, and we returned that evening to Levi Saymore's.

28th. Went to Lee Meeting, crossing the Mohawk River, where we met with our beloved friends Catlet Jones and Samuel Davis, from our own Quarterly Meeting, on a religious visit also. We rejoiced to see each other. It was so unexpected a meeting, that I could not, for sometime after sitting down in meeting, feel my mind composed, but as the people gathered I felt my mind brought into the labor and prepared to speak, and engaging in it, I delivered a testimony, which reached to solemnize many. Catlet made a remark near the close like confirming what I had delivered. We all went to Zaccheus Hill's to lodge, and agreeably spent the evening in conversing and enquiring concerning home affairs.

30th. At an appointed meeting among some friendly people, but none of them members of our Society. I had been informed there was an openness in that place towards Friends, and finding my mind caught, I ventured, and we had a favored meeting with them. My

companion first said, Except a man be regenerated and born again he cannot enter the kingdom of heaven. This may seem strange to some, as it did to Nicodemus, who said, how can these things be. Pardon Macomber followed on the subject of worship, with suitable sentiments; and my way opened to follow. I said that which is born of the flesh is flesh, and that which is born of the spirit is spirit. I then showed that whatever is brought forth in the will of the creature, is born of the flesh, and it is gratifying to the flesh; and we see those who are corrupt in their morals can sing and join in singing, they can learn it and practise it too; and it appears to me to be born of the flesh. But when people become prepared to sing as the apostle described concerning prayer, that he would pray with the spirit and with the understanding also; if the mind be thus prepared, then it may be performed; but if the mind be prepared, it will be humble; and it will not be mere gratification, but a humbling duty, when it is performed in an acceptable manner. We cannot in our own wills perform acceptable worship, for we cannot in our own wills worship the Father in spirit and in truth, and such He seeketh to worship Him. I went into several things or points a considerable way, and the minds of many were very tender. Perhaps we have not had a more satisfactory meeting in our journey. I desired the people to ascribe the praise to the Author of our existence, who is worthy of it.

11th mo. 5th. Rode to Brownville, where I had felt a draught for more than a week, and a kind of dread or dismay, but now the time had come to go to the conflict. Notice had been sent, and on the 6th we attended, and a considerable number met, and several of the first rank in the place. After a short, simple introduction, I brought some close, feeling sentiments to view, and the people became remarkably still, having been restless before. The meeting concluded more satisfactorily than I expected, but I thought and said that the friendship of this world is at enmity with God. I believe that the world, and its friendship, was greatly hindering some from making progress in religion; and I mournfully believed that I felt religion was in danger of being smothered by the world. However, I came away comfortable on my own account, but sorrowful on theirs; so ended this trying exercise that had for several days attended my mind. General Jacob Brown attended this meeting. On seeing his house and other possessions, and the style of grandeur they appeared to be in, and thinking that much of this was obtained at the risk of his life in battle, and as a recompense for taking the lives of our fellow mortals, so that all appeared to be stained with blood, it reminded me of David, who, when he received the water from the men who obtained it at the risk of their lives, would not drink it.

9th. At Indian River, for a long time I felt nothing like bearing testimony, and endeavored to keep my place. I sat silent but resigned. When the time was far spent, I believed it best to speak to the people, and said, Paul may plant and Apollos water, but God giveth the increase; but neither Paul nor Apollos, in their own wills, could either plant or water that [which] God would grant an increase to; nor do I believe that any man in his own will, can, in our day, plant or water or preach the Gospel to the people to real profit. If man

in his own will can plant or water and preach the gospel, then he can save himself and his brother also. I went into several things beyond my expectation when I began, and it may be that it may be to the benefit of some.

10th. This morning we set our faces to go into Canada. I felt it impressed on my mind for several months at times, and I thought it seemed like a right sense, but I hoped I might be permitted to go home, before it would be necessary to go to that part. But now finding the time to be come, and seeing no clearness any other way for the present, nor any further service here, we set out, having Moses Child as a conductor. We lodged at a tavern, and in the morning continued our journey, crossed Indian River, and Oswegochocheo River. We breakfasted at Morristown, and went into a flat boat, and were ferried over the great river St. Lawrence into Canada.

14th. We desired the widow Brewer [at whose house they were entertained] to have notice given of a meeting, which being done, the people came together at her house. I felt an exercise which I attended to, and at length said, I have been thinking of what constitutes a Christian. I believe it will be profitable for some here to consider what was required to make one in the time of Christ's being on earth, and in the days of His followers, the apostles. I believe nothing can be added nor diminished. As the branch cannot bear fruit of itself, except it abide in the vine, no more can ye, except ye abide in Him. 'If any man will be my disciple, let him take up his daily cross and follow me.' We may plan and devise ways to suit our inclinations, but they that have not the Spirit of Christ are none of His. 'Ye are my friends, if ye do whatsoever I command you.' 'If ye love me, keep my commandments'—with more. I thought a solemn attention was given, and I hope the pure mind was stirred up.

15th. At Amestown Meeting, which appeared to be a very weak, poor one. After endeavoring to impress the minds of the audience, it seemed to me to have no entrance. I then stopped and told them, that if counsel had no more place than I apprehended the present communication had, that if the most eloquent orator were to speak consistent truths to them from the rising of the sun to the going down of the same, it would be of no avail, unless there was a disposition to put in practice. I then labored for some time and thought the solemnity rather increased."

(To be continued.)

#### Cottonseed Oil, Cake and Meal.

A new value has been given to a part of the product of the cotton plant which before was only used as a fertilizer, but which within the last five years has become an article of export as well as of domestic manufacture. The cottonseed, the removal of which from the cotton was long an expensive and puzzling problem, has been discovered to be as valuable as almost any other part of that wonderful plant, and demand for it abroad is now greater and more constant than the supply, which is limited, owing partly to the indifference and partly to the prejudices of the cotton-planters. Several manufactories of cottonseed oil, cake and meal, have been established at New Orleans—an elaborate report on the nutritive and agricultural value of which products has been made by Professor Joseph Jones, of the Medical University of Louisiana, after careful

chemical examination. The learned doctor shows the great use and value of these products from the hitherto almost worthless cottonseed, and states the fact that the intelligent European farmers regard the cake as so valuable for cattle feed that it readily commands from them from £6 to £8 per ton, equivalent at present to about \$40 in our currency. The works of the Louisiana Oil Company alone consume 15,600 tons of cottonseed annually, yielding 3,605,600 gallons of oil of a superior quality, and 6899 tons of decorticated cottonseed cakes, used as cattle feed. The works furnish steady employment to more than one hundred men. There are several other similar establishments in Louisiana, and one in the city of Mobile, which receives more orders than they can fill.

The value of the cottonseed as an efficient fertilizer has long been known to the southern planters, but these new uses to which the seed has been put greatly enhance its value. On submitting to strong pressure the oily seeds of the cotton plant a valuable and agreeable-smelling and pleasant-tasting oil is obtained, which in a purified state is now employed for the usual purposes in commerce, the arts and pharmacy for which other kinds of oils and fats are employed. Large exportations of this oil and cake, as well as of the cottonseed, are now annually made to France, England and other European countries, whence comes a constantly increasing demand. About 50,000 tons of seed are annually worked up in the five Louisiana mills, producing more than a million and a half gallons of oil, and about 19,000 tons of oil-cake and meal. The exports of this oil last year have been 34,544 barrels, of which 6459 barrels went to Europe, and 28,085 to northern ports. Of the oil-cake the exports have been 202,873 sacks, of which 19,356 went to northern States, and 181,735 to Europe. This is but one of many illustrations which go to prove that the southerner is awaking under the pinch of adversity, and learning the lesson of utilizing and developing the lavish gifts of nature, which he has hitherto put to so little use. The south has long been famous for her corn-cake; her cotton-cake is a more recent production, and bids fair to be equally popular and profitable.—*Harper's Magazine.*

Selected for "The Friend."

"In the beginning was the Word, and the Word was with God, and the Word was God."—John i. 1.

The Word of God was in the beginning, before any creatures were made, and by it all things remain unto this day. The Word endures forever, and by it all things in heaven and earth are brought to pass which God doth. It is from everlasting, without beginning and without end. It is powerful, dividing and discerning all things, even the secret thoughts of every man's heart. It is a two-edged sword, and as a fire, and like a hammer, to cut up, to burn, and to beat down. The Word of the Lord reconciles man again to Him, and His Word is in the mouth, and in the heart. The servants of the Lord handled, tasted, saw and felt the Word of Life, and from it, (the Word) spake forth the scriptures, as they were moved by the Holy Ghost through the eternal Spirit. They (the scriptures) are a declaration of the Word of Life, which was in the beginning, and endures for ever, and declares what the saints received, believed and enjoyed. None can understand (the scriptures) without the

same spirit that gave them forth, and to such who have the same spirit, the scripture is profitable. But many have the scriptures, that have not the Word, neither know it; but they that have the Word cannot but own the scriptures, and this is the truth as it is in Jesus, testified to all the world by us, who deny them that hereof give any other testimony.—*Edward Burrough—London, 1667.*

#### YOUTH AND AGE.

With cheerful step the traveller  
Pursues his early way,  
When first the dimly-dawning east  
Reveals the rising day.

He bounds along his craggy road,  
He hastens up the height,  
And all he sees and all he hears,  
Administers delight.

And if the mist, retiring slow,  
Roll round its wavy white,  
He thinks the morning vapors hide  
Some beauty from his sight.

But when behind the western clouds  
Departs the fading day,  
How wearily the traveller  
Pursues his evening way!

Sorely along the craggy road  
His painful footsteps creep,  
And slow with many a feeble pause  
He labors up the steep.

And if the mists of night close round,  
They fill his soul with fear;  
He dreads some unseen precipice,  
Some hidden danger near.

So cheerfully does youth begin  
Life's pleasant morning stage;  
Alas! the evening traveller feels  
The fears of wary age.

*Robert Southey.*

#### TREES IN THE CITY.

'Tis beautiful to see a forest stand,  
Brave with its moss-grown monarch and the pride  
Of foliage dense, to which the south wind bland  
Comes with a kiss, as lover to his bride;  
To watch the light grow fainter, as it streams  
Through arching aisles, where branches interlace,  
Whose sombre pines rise o'er the shadowy gleams  
Of silver birch, trembling with modest grace.

But they who dwell beside the stream and hill,  
Prize little treasures there so kindly given:  
The song of birds, the babbling of the rill,  
The pure unclouded light and air of heaven.  
They walk as those who seeing cannot see,  
Blind to this beauty even from their birth;  
We value little blessings ever free;  
We covet most the rarest things of earth.

But rising from the dust of busy streets  
These forest children gladden many hearts;  
As some old friend their welcome presence greets  
The toil-worn soul, and further life imparts.  
Their shade is doubly grateful when it lies  
Above the glare which stifling walls throw back,  
Through quivering leaves we see the soft blue skies,  
Then happier tread the dull, unvaried track.

*Alice B. Neal.*

*Mild Winters.*—The mildness of the present season, says the *Pall Mall Gazette*, though unusual, bears no comparison to that of some winters "long gone by." In 1172 the temperature was so high that leaves came out on the trees in January, and birds hatched their broods in February. In 1289 the winter was equally mild, and the maidens of Cologne wore wreaths of violets and corn flowers at Christmas and on Twelfth Day. In 1421 the trees flowered in the month of March, and the vines in the month of April. Cherries ripened in

the same month, and grapes appeared in May. In 1572 the trees were covered with leaves in January and the birds hatched their young in February, as in 1172; in 1585 the same thing was repeated, and it is added that the corn was in the ear at Easter. There was in France neither snow nor frost throughout the winters of 1538, 1607, 1609, 1617 and 1655 finally, in 1662, even in the north of Germany the stoves were not lighted, and trees blossomed in February. Coming to later date the winter of 1846-47, when it thundered in Paris on the 28th of January, and that of 1866, the year of the great inundation of the Seine, may be mentioned as exceptional mild.—*Late Paper.*

For "The Friend."

#### Golden Baits.

Are not the following reflections, penned by John Barclay in 1832, painfully applicable to the state of things in some places in 1874?

"As I proceed in my pilgrimage, I trust my confidence is increasing, that the great 'I Am,' the King of Sion, still reigns, and will reign to the overthrow of all his enemies; and that he alone is equal to take care of his church, and to overrule all things for the good of his little dependent ones. Yet, O! how awful do the times appear in which we live, and how awfully critical is our standing among the various professions around us, doubtless, it always has been so, perhaps more so, than those of any particular age may have thought. Every period has had its dangers, its temptations, its responsibilities. Yet surely ours are, if not new, very specious snares, and when I look around, I am ready to think who, even among the highest in knowledge, faith, or in gifts, is not fearfully liable to fall into some of these snares. O! I have this day seen, as I think, in the light of the Lord, the enemy endeavoring to deceive, if it be possible, the very elect. There are baits already laid, golden baits, which if they are not seen and shunned, will even devour those who devour them. I see not how some who no take the lead amongst us, will or can escape being carried away, as with a sweeping flood, by that which they are now swimming in, unless the Lord prevent, I see not how the Society can escape being landed, yea stranded, on a rock. Every day, every fresh occasion of witnessing the spirit and proceeding of these times, convinces me beyond all hesitation, that we are fast verging to a crisis—an alarming crisis, and a shaking sifting crisis—when every foundation will be discovered every covering removed. And though man will say, 'Lo here is Christ, and lo there!' he not with us, and do we not own him and follow him? Yet a clean separation will take place between the chaff and the wheat; and nothing will be able to endure the refining heat of that day, besides the beaten gold. O how loose, how crude, how mixed are the views of many; how accommodating, how shifting is the ground they stand upon; how lofty and superficial is their edifice, though beautiful and apparently solid also. O, for more humiliation, fasting, waiting! O! for less activity, less self-conceit, less taking the name of Christ in vain! May such a view of things conduce to drive and keep me yet nearer to the Source of all safety and of all succour, that I may abide in Him, and grow up in Him in all things, who is the Head."

Second mo. 1874.

Review of the Weather for First month, 1871.

The average temperature for the First month was 36.7°. The range of the thermometer was from 7° on the 18th, to 69° on the 7th.

Rain fell to the depth of 4.12 inches. There were 4 inches of snow.

For "The Friend."

Natural and Grafted Fruit.

Joseph Lancaster was the author of the lancasterian system of school training, by means of monitors, which occasioned considerable discussion forty or fifty years ago, and brought its author into a temporary notoriety. In speaking of a worthy Friend, who resided in England, he made use of this comparison. She was naturally a crab apple tree, on which some very good fruit had been grafted. When one partook of the fruit which grew on the grafted branches, and whose taste and qualities had been sweetened and changed by the influence of the graft, he would find it to be truly excellent. But occasionally an apple was gathered from a branch below the graft, and that was very sour.

How just these remarks may be as applied to the individual, I know not. She was undoubtedly a woman, not only of religious faith, but of natural force of character, and strength of mind. These qualities, when brought under the control of Divine Grace, often enable their possessors to become persons of more than ordinary usefulness in the world. Yet when the holy watch (wherein only we are safe) is intermitted, and an unguarded action or expression is allowed to escape, the natural fruit thus coming from below the graft, is often known to be very distasteful, and those who at other times rejoiced in the beauty and sweetness of the grafted fruit such have borne, have been sorely hurt and stumbled at the contrast. It is very possible, even for those who have been long and usefully employed in the Lord's cause, to permit their own wills to give tone to their proceedings, even in the transaction of the affairs of the church. If they have long been prominent in their meetings for discipline, they may gradually (perhaps unconsciously to themselves) come to assume an undue share of the management of the business. When younger members, under a

sense of duty, take a more active part, especially if they differ in judgment from themselves as to the right disposition of any concern coming before the meeting, the older ones may feel as if their authority and influence were being invaded. Such an ungrafted fruit as this feeling, if not kept in restraint by watchfulness and humility, may prompt to words or actions, not in accordance with that forbearance and love of each other which our excellent discipline enjoins. If such a prompting should be yielded to, the mischief done will be great in proportion to the standing and previous good services of the individual. For when one who ought to be an example to the flock, thus exhibits the sour fruits of a lack of humility and gentleness, it is exceedingly discouraging to the younger members, and tends to open their minds to the suggestion of the enemy of all good, that religion is more of a profession than a reality.

On the other hand, it is the duty of those who observe these evidences of weakness in others, to remember that we all have our treasures in earthen vessels, and are all liable to go astray, except as we keep under the guidance and influence of that Holy Spirit, which is profitable to direct. If such will look within, and consider their own cases, they will acknowledge, that though Divine Grace has often visited them, causing tenderness of heart and awakening strong desires after holiness and peace with God, and even enabling them to make some progress in the path that leads Zionward; yet they are conscious that they have many times fallen short in their duty, through unwatchfulness or unfaithfulness. This consideration should preserve them from being much unsettled by the actions of others, and should lead them rather to desire the preservation of their friends, and to mourn over the exhibitions of human weakness, than to be greatly offended thereby.

How instructive is the language of Isaac Penington: "It is of the infinite mercy and compassion of the Lord, that His pure love

visiteth any of us; and it is by the preservation thereof alone, that we stand. If He leave us at any time, but one moment, what are we? and who is there that provoketh Him not to depart? Let him throw the first stone at him that falls.

"In the Truth itself, in the living power and virtue, there is no offence; but that part which is not perfectly redeemed hath still matter for the temptation to work upon, and may be taken in the snare. Let him that stands take heed lest he fall; and, in the bowels of pity, mourn over and wait for the restoring of him that is fallen. That, which is so apt to be offended, is the same with that which falls. O! do not reason in the high-mindedness, against any that turn aside from the pure Guide; but fear, lest the unbelieving and fleshly-wise part get up in thee also. O know the weakness of the creature in the withdrawing of the life! and the strength of the enemy in that hour! and the free grace and mercy, which alone can preserve! and thou wilt rather wonder that any stand, than that some fall."

*Snakes in Martinique.*—The bane of this delightful paradise is a serpent—what paradise is without its bane?—called by the fearfully suggestive name of the "iron lance." This reptile, with venomous taste, chooses the coolest and most delightful places in the garden for his retreat, and it is literally at the risk of one's life that one lies down on the grass, or even takes a rest in an arbor. The wounds inflicted by these serpents are very apt to be fatal unless immediately cared for. The whole island is infested with this dangerous reptile, and it is said that, on an average, nearly eight hundred persons are bitten every year, of which number from sixty to seventy cases prove fatal, while many others result in nervous diseases which are almost as bad as death. A few years ago, when Prince Arthur of England visited this island, a grand fete was given in his honor in the Jardin des Plantes. In the evening the grounds were beautifully illuminated, and thousands of people santered through its cool and shady avenues. A large number were bitten by the "iron lance," and many of them never recovered from the effects of the poison. The fondness of this terrible reptile for cool and shady places is a serious drawback on the pleasure of rambling through the charming groves of Martinique. A rest on the grass under the shadow of some spreading tree is always haunted by the dread of unseen dangers, and one cannot even cross a field without exercising extreme caution. The advent of a modern St. Patrick would be heartily welcomed in Martinique, and if he would purge the island of poisonous reptiles as thoroughly as the ancient saint swept the Emerald Isle, he would have his picture in every house and a shrine in every church.—*Harper's Magazine.*

*The Way.*—Deep sufferings and baptisms must be known by all who retain their place in the Lamb's army; but such is the equity and truth of our Captain, that if patience have her perfect work, his true followers, even through the region and shadow of death, fear no evil. May the Stay of the righteous in every generation thus direct our steps, in the midst of the paths of judgment, to the honor of his cause, the dignifying his name, and to our own peace.—*Samuel Fothergill.*

## Siberian Dogs.

A HARDY AND USEFUL ANIMAL.

The Esquimaux, or Siberian dog, is found nearly all over the most northern parts of North America and Siberia, and, although perhaps he is of more importance to the numerous tribes which inhabit those inhospitable regions than any other breed of dogs is to any other people on the face of the earth, yet many naturalists and writers on "The Dog" only notice this animal in a very cursory manner. The Esquimaux dog, which is found with very little variation in shape, size or color, on both sides of Behring's straits, is, in many respects, to the settled tribes inhabiting those districts, what the reindeer is to the Laplander, and the camel to the Arab. He is their only beast of burden, and is generally employed in drawing materials in a sledge over the boundless and dreary deserts of snow, where the cold is so intense that no other domestic animal, except the reindeer, could exist, and bear the hardships this animal is called upon to undergo. Messrs. Dall and Kennan's record of experiences and travels over extensive tracts of Arctic soil, on the respective sides of Behring's straits, during their explorations in the service of the Russo American Telegraph Company, organized in 1864, furnished some most interesting evidence of the invaluableity of these animals to the Koraks and other tribes owning them. The latter gentleman says that these dogs are little better than half domestic Arctic wolves, whose instincts and peculiarities they still retain in a great measure; but there is probably no more hardy and enduring animal in the world. Although he is often compelled to sleep in the snow, with no covering or protection of any kind, when the temperature is 70 below zero, to draw heavy loads until his feet crack open and paint the snow with blood, and go without food for days, until he is brought to such a state of starvation as to eat up his harness, yet his strength and spirits seem alike unconquerable. "I have driven a team of nine of these dogs," says Kennan, "more than 100 miles in a day and a night, and have frequently worked them hard 48 hours without being able to give them a particle of food. In general, they are fed once a day, their allowance being simply a dried fish, weighing, perhaps, a pound and a half or two pounds. This is given to them at night, so that they begin another day's work with empty stomachs. The sledge to which they are harnessed is about ten feet in length and two feet in width, made with seasoned birch timber, and combines, to a surprising degree, the two most desirable qualities of strength and lightness. It is simply a skeleton framework fastened together with lashings of dried seal skin and mounted on broad curved runners. No iron whatever is used in the construction, and it does not weigh more than 20 pounds, yet it will sustain a load of 400 to 500 pounds, and endure the severest shocks of rough mountain travel, occasionally rendered more than ordinarily severe by the erratic behavior of the dogs, who sometimes, should a deer or fox cross their route, cannot overcome their wolfish propensities, but give chase in a most determined manner, heedless alike of the driver's shouts and the load behind them, dragging the sledge and its contents at lightning speed over bluffs, and down steep inclines, often not being brought to a

stand still until submerged several feet in a snow-drift. The number of dogs harnessed to the sledges varies from seven to fifteen, according to the nature of the country to be traversed, and the weight of the load. Under favorable circumstances, 11 dogs will make from 40 to 50 miles a day with a man and a load of 400 pounds. They are harnessed to the sledge in successive couples, by a long, central thong of seal-skin, to which each dog is attached by a collar and a short trace. They are guided and controlled entirely by the voice, not by the whip, (as stated by some writers on the subject,) and by a leader dog, who is especially trained for that purpose. The driver carries no whip, but has instead a thick stick, about four feet in length and two inches in diameter, called an *erstel*. This is armed at one end with a long iron spike, and is used to check the speed of the sledge in descending hills, and to stop the dogs when they leave the road in pursuit of reindeer and foxes. The spiked end is thrust down in front of one of the knees or uprights of the runners and dragged in that position through the snow, the upper end being firmly held by the driver, in whose hands it forms a powerful lever by which he can check his team if inclined to be unruly. These animals, although treated very indifferently, are absolutely essential to the existence of these semi-barbarous tribes. The great distance of the settlements one from another, and the absence of any means of inter-communication in summer, make each village dependent on its own resources, and prevent any mutual support and assistance, so that should the winter be extra severe a famine often sets in, and these improvident people never think of stirring until the last dried fish in store has been devoured, so that their only hope lies in their dog teams, which are often called upon to commence a journey, on an empty belly, of 150 or 200 miles over deep snow, in search of some friendly tribe of wandering Koraks, having been on scanty rations perhaps for a week or a fortnight previously.

When these tremendous journeys are made the natives are often compelled to travel all night as well as all day, and they have a practice of deluding the dogs into the belief that they have slept all night, by allowing them to stop and sleep an hour or so before sunrise, when they wake them to continue the wearisome journey. This deception, I believe, generally answers, and the animals resume their labors with renewed cheerfulness and energy. The sacrifice of these dogs is considered by the natives as the surest method of appeasing the anger of the evil spirits, and twenty or thirty of them may be seen suspended by the hind legs on long poles over a single encampment. The Siberian dogs exhibit many of the characteristics of the dingo and other wild types, they have the sharp, tapering muzzle, pricked ears, and bushy tail, of these latter, but are not so ferocious. Their bodies are long, feet large, limbs well formed and exceedingly muscular. The coat is rather coarse, but has an undergrowth of a thick, soft and woolly nature. The color ranges from grayish red to dark dun, sometimes brindle, and usually with black muzzle. The bark or rather semi-howl, of these animals, much resembles the long, faint, wailing cry of a human being in the last extremity of suffering, and, when a hundred or more dogs join in the chorus, the effect in the

stillness of an Arctic midnight is described as wild and unearthly, and sends the startle blood of the listener bounding through his veins, and for a time earth seems filled with yelling, shrieking fiends.—*Land and Water*.

Selected for "The Friend."

*The Testimony of Priscilla Cotton to Friends the day she died.*

"All my dear friends, who have found you Redeemer, oh! wait upon him at all time that you may stand continually in his presence where life is, that with the light you receive from Him, you may see your thoughts and deny them, that in stayedness you may be kept, when the hasty, forward spirit would arise, and keep it down. With the measure of God's spirit all may be weighed, the word to what they tend, that no lightness may appear in your words, nor unsavoriness, that no offence come, but edification by all you speak. Let the elders watch, that at no time the younger may see lightness, laughter, or words of offence, but that you may always keep down the evil in yourselves, and administer grace to all you have to do with that God's spirit be not grieved. So keep the field clean, that was once ploughed up and made green and beautiful, that no stone or hurtful weeds grow in it to oppress the seed.

Friends, the cross is the power of God and when you flee the cross, you lose the power; that which pleaseth self, is above the cross, and that which pleaseth man, is above the cross; and that which shuns the cross yields to the carnal part, and loses its dominion. Though the cross seems foolishness stand in it; though it seems weak, stand in it; though it be a stumbling block to the wise, stand in it; there the dominion, authority, and crown are received. This is not for you to be exercised in for a time only, as a your first conviction, but daily, even to the death, as long as a desire, will, or thought remaineth in you, contrary to God's pur light, and judge it by it; and as you wait the light you will come to know a cross, in the use of meat, drink, and apparel, and keep to the cross when alone, or in company; where the pure mind of God stands against in you that the cross is against.

So Friends, watch daily to keep Christ's command, 'Take up your daily cross;' be not at liberty one day, but deny thy own will, thy own thoughts, and thy own self. Taking up the cross, you feel the power, the strength of the Lord God, which breaks down all, keep in order, in safety, and in peace. This preserves from stubbornness, wilfulness, an headiness, and brings all to be subject, a dear children, unto God, and subject one unto another as brethren. In the light and in the cross, there are no evil thoughts, no harsh speeches, no contention, no having pre-eminence; but as brethren and sisters, pitiful tender-hearted, courteous, forgiving, forbearing, long-suffering, and supporting one another. Here the power of the cross is known, which brings all to God's praise, and to his honor and glory, and to his children's prosperity and peace: so let it be. Amen.

PRISCILLA COTTON.

And they that know thy name, will put their trust in Thee, for thou, Lord! hast not forsaken them that seek thee.

Dear Sister  
 I am much  
 better, & had company  
 yesterday it quite  
 me up so I am  
 fine morning  
 out today for the 12th  
 in the weeks I wanted  
 not to strength. Then  
 hope you are well as  
 am doing some business  
 a change it is quite  
 nice to do it again  
 as usual have  
 to all as ever  
 Sallie W

Gangetia Delta, an elephant, with its two attendants, cost little more than £2 a month. The amount is now fully double, and in other drier parts of India, where forage is scarce, it reaches the high figure of £6 or £7. Saturday Review.

Selected.

dear ancient Friends, be careful never forget, nor depart from your tenderness; and all you younger not so fully known it, wait diligently that you may know the blessed it, as the ancients have done, that the fear of God placed in the heart, we and dread of offending the Lord, come to say with them: Oh! that I never speak a word, nor do any action to grieve His good Spirit, nor break with Him. May I never eat nor excess, nor wear any thing in apparel to the pure Truth; neither be found in carriage or behavior, in conversation or communications, whereby the Truth may be obscured. This was and is the desire and cry of the faithful, and of those that truly fear the Lord.—John Banks.

*Moralization at Jerusalem.*—The London correspondent of the *Jewish Messenger* says, he is in receipt of a private letter from Jerusalem, which gives a sad account of the state of things in the Holy City. Beggars many, laborers few. It is, indeed, sad to read these continued descriptions from impartial witnesses, of the miserable beggarly situation of the Jews of Jerusalem. A great deal of the present misery of the Jerusalem Jews is directly traced to the misplaced, ill-advised generosity of the European Jews, who think they are discharging a religious duty, as well as performing a charitable act, by sending money in the form of *Cheluchah* to Jerusalem. Old men, middle aged men, and even young lads, who can and ought to be made to work for their living, centre their whole object in life upon sharing in the funds obtained from the Jews outside of Jerusalem. The worst of it is, that the young children follow, and, in fact, are made to follow the pernicious example of their parents. There must eventually come a time when concerted action will be taken by the Jews of Europe upon this question. Undoubtedly great good could be done with the money now sent to Jerusalem, if a better system of distribution were organized. As it is, under the present system, the money does much more harm than good.

*Transforming Work of Grace.*—Whence come pride and haughtiness, contention and strife, fraud and deceit, oppression and cruelty, but from the author of all wickedness? Where the flesh, with the affections thereof, is crucified, such things are not to be found; and, let us pretend to what religion we will, whilst such things are practised, we keep alive what ought to be mortified.

Where an evil spirit is uppermost, men know no limit; their ears, eyes, tongues, hands and feet, are at liberty to hear evil reports, behold vanity, speak proudly, rashly, unadvisedly and deceitfully, to do violence, take bribes, and go where they list.

But where a right spirit rules, every member of the body is under a limit; the ear is turned from fables, and the eye from behold-

ing vanity; they cannot, as too many do, cover, dissemble and lie, to accomplish self-ends; vain communication is not allowed to come out of their mouths; hands are limited from taking bribes, using of violence, or doing any wrong; the paths of rioters they cannot walk in, but are lovers of righteousness, and haters of iniquity in themselves and others. And to this estate we might all come, by denying such motions as the light of righteousness in our own hearts manifests to be evil. IIRGH TURFORD.

THE FRIEND.

SECOND MONTH 28, 1874.

If we may trust the experience of those who have been the most apt scholars in the school of Christ, and attained to the profoundest knowledge of the mysteries of his Kingdom, we may rest assured that the deepest religious feeling arises from the secret operation of Divine grace on the soul. It makes but little noise or creaturely demonstration, but fixes the attention and the expectation on Christ alone, and manifests its supernatural origin and power, by producing compliance with the Divine will, in taking up the daily cross.

Much is lost where we are deceived into thinking that the life of religion consists in outward activity. A man's enemies are those of his own house. To overcome them, to know the strong natural man bound, and all his goods spoiled, the unrelenting warfare must be carried on within, and he who maintains the contest victoriously knows how frequent and how great are the fear, the trembling and the suffering he has to undergo, before his triumph is achieved, through the power of the Lamb, and he girded with the whole armor of God, and able to stand against the wiles of the devil.

For true growth in this religious life, it is of primary importance to keep the word of the Lord's patience, so as to know Him to keep us from the hour of temptation, which we are assured will come to try all that dwell upon the earth. This patience is one of the most beautiful, and not the least costly, of all the jewels that adorn the sanctified soul. It restrains the flesh and keeps the temper unruffled under provocation; it bridles the tongue, subdues pride, and strengthens the tried or mourning spirit. Hence the injunction of our Saviour to his disciples, when forewarning them of the persecution and suffering they would have to meet, "In your patience possess ye your souls."

In one of the epistles addressed by Edward Burrough and Francis Howgil, to those in London who had been recently convinced of the truth of the principles held by Friends, and were striving to walk conformably therewith, they say: "Look not out at words, for that which feeds there, is for famine. But dwell in the Light, joining with the immortal principle which receives nourishment from the eternal Fountain, and which the world knows not of nor comprehends. As you grow in the Pure, and in the Life, so you are unknown to the world; and your growth will appear by your obedience in the cross of Christ. Stumble not at the cross; for such as do, have no part in the eternal inheritance. But walk in the cross, which is life to the

conveyance are, where the convenience is not essential, of the very great inconvenience to residents of the plains. The owner of an elephant has besides a far greater guarantee for respectability than the owner of a gig. It is not to be imagined, however, that elephants cost nothing, or can prosper without care and attendance. A prudent person will guard his elephant from the deluge of a tropical rain, and to this end a high-roofed barn must be constructed, with open sides large enough to admit something of the size of an ordinary haystack. Then the bath is as indispensable to the elephant as it was to an old Roman; and after a daily plunge and a swim, during which nothing is done to the animal but the tip of his trunk, he lies down on its side at a signal from the driver, and submits to be oiled, cleaned and washed, while thorns or foreign substances are extracted from the toes. When these operations are concluded, a chain is fastened round one hind leg and made secure to a post or tree, and the remainder of the day is passed by the elephant in obliterating the traces of the bath by showers of water, or in driving away the flies with a leafy bunch. The food generally consists of several pounds of coarse rice, the stem of a plantain tree and a whole cartload of tender branches recently cut off. To procure this latter supply is the daily duty of one of the attendants, who, in Indian phraseology, is termed "a mahout," the title of "mahout" being reserved for the head keeper. Not every kind of leaf is palatable, and whole tracts of country covered with forest trees are absolutely useless for the feeding of elephants. When on a march, or in the jungles, elephants will endeavor to feed all day, and will snatch at anything edible. Formerly in the

Siberian Dogs.

A HARDY AND USEFUL ANIMAL.

The Esquimaux, or Siberian dog, is found nearly all over the most northern parts of North America and Siberia, and, although perhaps he is of more importance to the numerous tribes which inhabit those inhospitable regions than any other breed of dogs is to any other people on the face of the earth, yet many naturalists and writers on "The Dog" only notice this animal in a very cursory manner. The Esquimaux dog, which is found with very little variation in shape, size or color, on both sides of Behring's straits, is, in many respects, to the settled tribes inhabiting those districts, what the reindeer is to the Laplander, and the camel to the Arab. He is their only beast of burden, and is generally employed in drawing materials in a sledge over the boundless and dreary deserts of snow, where the cold is so intense that no other domestic animal, except the reindeer, could exist, and bear the hardships this animal is called upon to undergo. Messrs. Dall and Kennan's record of experiences and travels over extensive tracts of Arctic soil, on the respective sides of Behring's straits, during their explorations in the service of the Russo American Telegraph Company, organized in 1864, furnished some most interesting evidence of the invaluableity of these animals to the Koraks and other tribes owning them. The latter gentleman says that these dogs are little better than half domestic Arctic wolves, whose instincts and peculiarities they still retain in a great measure; but there is probably no more hardy and enduring animal in the world. Although he is often compelled to sleep in the snow, with no covering or protection of any kind, when the temperature is 70 below zero, to draw heavy loads until his feet crack open and paint the snow with blood, and go without food for days, until he is brought to such a state of starvation as to eat up his harness, yet his strength and spirits seem alike unconquerable. "I have driven a team of nine of these dogs," says Kennan, "more than 100 miles in a day and a night, and have frequently worked them hard 48 hours without being able to give them a particle of food. In general, they are fed once a day, their allowance being simply a dried fish, weighing, perhaps, a pound and a half or two pounds. This is given to them at night, so that they begin another day's work with empty stomachs. The sledge to which they are harnessed is about ten feet in length and two feet in width, made with seasoned birch timber, and combines, to a surprising degree, the two most desirable qualities of strength and lightness. It is simply a skeleton framework fastened together with lashings of dried seal skin and mounted on broad curved runners. No iron whatever is used in the construction, and it does not weigh more than 20 pounds, yet it will sustain a load of 400 to 500 pounds, and endure the severest shocks of rough mountain travel, occasionally rendered more than ordinarily severe by the erratic behavior of the dogs, who sometimes, should a deer or fox cross their route, cannot overcome their wolfish propensities, but give chase in a most determined manner, heedless alike of the driver's shouts and the load behind them, dragging the sledge and its contents at lightning speed over bluffs, and down steep inclines, often not being brought to a

stand still until submerged several feet in a snow-drift. The number of dogs harnessed to the sledges varies from seven to fifteen, according to the nature of the country traversed, and the weight of the load. Under favorable circumstances, 11 dogs from 40 to 50 miles a day with a load of 400 pounds. They are harnessed to the sledge in successive couples, the central thong of seal-skin, to which is attached by a collar and a strap. They are guided and controlled entirely by the voice, not by the whip, (as stated by writers on the subject,) and by a leader who is especially trained for that purpose. The driver carries no whip, but has a thick stick, about four feet in length and two inches in diameter, called an *arste*, is armed at one end with a long iron spike and is used to check the speed of the dogs in descending hills, and to stop the dogs when they leave the road in pursuit of reindeer or foxes. The spiked end is thrust down in front of one of the knees or uprights of the runners and dragged in that position through the snow, the upper end being firmly held by the driver, in whose hands it forms a powerful lever by which he can check his team if inclined to be unruly. These animals, though treated very indifferently, are a most essential to the existence of these barbarous tribes. The great distance of settlements one from another, and the absence of any means of inter-communication in summer, make each village dependent on its own resources, and prevent any mutual support and assistance, so that should the winter be extra severe a famine often sets in, and the improvident people never think of stirring until the last dried fish in store has been devoured, so that their only hope lies in their dog teams, which are often called upon to commence a journey, on an empty belly, of 150 or 200 miles over deep snow, in search of some friendly tribe of wandering Koraks, having been on scanty rations perhaps for a week or a fortnight previously.

When these tremendous journeys are made the natives are often compelled to travel all night as well as all day, and they have a practice of deluding the dogs into the belief that they have slept all night, by allowing them to stop and sleep an hour or so before sunrise, when they wake them to continue the wearisome journey. This deception, I believe, generally answers, and the animals resume their labors with renewed cheerfulness and energy. The sacrifice of these dogs is considered by the natives as the surest method of appeasing the anger of the evil spirits, and twenty or thirty of them may be seen suspended by the hind legs on long poles over a single encampment. The Siberian dogs exhibit many of the characteristics of the dingo and other wild types, they have the sharp, tapering muzzle, pricked ears, and bushy tail, of these latter, but are not so ferocious. Their bodies are long, feet large, limbs well formed and exceedingly muscular. The coat is rather coarse, but has an undergrowth of a thick, soft and woolly nature. The color ranges from grayish red to dark dun, sometimes brindle, and usually with black muzzle. The bark or rather semi-howl, of these animals, much resembles the long, faint, wailing cry of a human being in the last extremity of suffering, and, when a hundred or more dogs join in the chorus, the effect in the

...the cross  
...and loses its do  
... Though the cross seems foolishness  
stand in it; though it seems weak, stand in  
it; though it be a stumbling block to the  
wise, stand in it; there the dominion, author  
ity, and crown are received. This is not for  
you to be exercised in for a time only, as at  
your first conviction, but daily, even to  
the death, as long as a desire, will, or thought  
remaineth in you, contrary to God's pure  
light, and judge it by it; and as you wait in  
the light you will come to know a cross, in  
the use of meat, drink, and apparel, and keep  
to the cross when alone, or in company; what  
the pure mind of God stands against in you  
that the cross is against.

So Friends, watch daily to keep Christ's  
command, 'Take up your daily cross;' be not  
at liberty one day, but deny thy own will, thy  
own thoughts, and thy own self. Taking up  
the cross, you feel the power, the strength of  
the Lord God, which breaks down all, keeps  
in order, in safety, and in peace. This pre  
serves from stubbornness, wilfulness, and  
headiness, and brings all to be subject, as  
dear children, unto God, and subject one unto  
another as brethren. In the light and in the  
cross, there are no evil thoughts, no hard  
speeches, no contention, no having pre-emi  
nence; but as brethren and sisters, pitiful  
tender-hearted, courteous, forgiving, forbear  
ing, long-suffering, and supporting one another.  
Here the power of the cross is known, which  
brings all to God's praise, and to his honor  
and glory, and to his children's prosperity  
and peace: so let it be. Amen.

PRISCILLA COTTON.

And they that know thy name, will put  
their trust in Thee, for thou, Lord! hast not  
forsaken them that seek thee.

*The Service of Elephants.*—In India the possession of an elephant or two is by no means confined to royal or princely families. Landholders and English gentlemen, engaged in commercial or agricultural pursuits in the interior of the country, find such an animal to be well worth his keeping in many ways. It brings in the collections of rent from an outstation to head quarters. It takes important matters or supplies right across the country. It will carry half a dozen servants, with bed, baggage and cooking apparatus, to any place where these adjuncts or necessities cannot be relied on. It enables the native agents of a colony to travel about with security against accidents or robbery. Where roads have not been constructed, or are impassable for vehicles during the rainy season, the elephant is equal to any emergency. To swim rivers, to wade through swamps, to step cleverly over fences, to fray a path through reeds, to break down forest trees firmly connected by long, trailing creepers, is a comparatively easy task to this sagacious, powerful and obedient servant. It is true that three or four miles an hour is the average rate of progress, and that it is hardly fair to exact more than fifteen or twenty miles of a march in a day. It must be admitted, too, that practice is necessary to accustom the traveller to the motion, and that the paces of all elephants are not the same. Some are so smooth as most to invite slumber; on others the unsteady occupant of the cushion rolls about as on a sea, and arrives at his journey's end with sore pains in his joints. But the docility of the beast and the security of this mode of conveyance are, where rapidity of communication is not essential, of the very greatest convenience to residents of the plains.

The owner of an elephant has besides a far greater guarantee for respectability than the owner of a gig. It is not to be imagined, however, that elephants cost nothing, or can prosper without care and attendance. A prudent person will guard his elephant from the deluge of a tropical rain, and to this end a high-roofed barn must be constructed, with open sides large enough to admit something of the size of an ordinary haystack. Then the bath is as indispensable to the elephant as it was to an old Roman; and after a daily plunge and a swim, during which nothing is seen of the animal but the tip of his trunk, he lies down on its side at a signal from the driver, and submits to be oiled, cleaned and washed, while thorns or foreign substances are extracted from the toes.

When these operations are concluded, a chain is fastened round one hind leg and made secure to a post or tree, and the remainder of the day is passed by the elephant in obliterating the traces of the bath by showers of dust, or in driving away the flies with a leafy branch. The food generally consists of several pounds of coarse rice, the stem of a plantain tree and a whole cartload of tender branches recently cut off. To procure this latter supply is the daily duty of one of the attendants, who, in Indian phraseology, is termed "a mate," the title of "mahout" being reserved for the head keeper. Not every kind of leaf is palatable, and whole tracts of country covered with forest trees are absolutely useless for the feeding of elephants.

When on a march, or in the jungles, elephants will endeavor to feed all day, and will catch at anything edible. Formerly in the

Gangetia Delta, an elephant, with its two attendants, cost little more than £2 a month. The amount is now fully double, and in other and drier parts of India, where forage is scarce, it reaches the high figure of £6 or £7. —*London Saturday Review.*

Selected.

And my dear ancient Friends, be careful that you never forget, nor depart from your first love and tenderness; and all you younger who have not so fully known it, wait diligently for it, that you may know the blessed effects of it, as the ancients have done, that through the fear of God placed in the heart, and an awe and dread of offending the Lord, you may come to say with them: Oh! that I may never speak a word, nor do any action that may grieve His good Spirit, nor break my peace with Him. May I never eat nor drink to excess, nor wear any thing in apparel contrary to the pure Truth; neither be found in any carriage or behavior, in conversation or communications, whereby the Truth may suffer. This was and is the desire and cry of all the faithful, and of those that truly fear the Lord.—*John Banks.*

*Demoralization at Jerusalem.*—The London correspondent of the *Jewish Messenger* says, that he is in receipt of a private letter from Jerusalem, which gives a sad account of the state of things in the Holy City. Beggars are many, laborers few. It is, indeed, sad to hear these continued descriptions from impartial witnesses, of the miserable beggarly position of the Jews of Jerusalem. A great deal of the present misery of the Jerusalem Jews is directly traced to the misplaced, ill-advised generosity of the European Jews, who think they are discharging a religious duty, as well as performing a charitable act, by sending money in the form of *Cheluchah* to Jerusalem. Old men, middle aged men, and even young lads, who can and ought to be made to work for their living, centre their whole object in life upon sharing in the funds obtained from the Jews outside of Jerusalem. The worst of it is, that the young children follow, and, in fact, are made to follow the pernicious example of their parents. There must eventually come a time when concerted action will be taken by the Jews of Europe upon this question. Undoubtedly great good could be done with the money now sent to Jerusalem, if a better system of distribution were organized. As it is, under the present system, the money does much more harm than good.

*Transforming Work of Grace.*—Whence come pride and baughtiness, contention and strife, fraud and deceit, oppression and cruelty, but from the author of all wickedness? Where the flesh, with the affections thereof, is crucified, such things are not to be found; and, let us pretend to what religion we will, whilst such things are practised, we keep alive what ought to be mortified.

Where an evil spirit is uppermost, men know no limit; their ears, eyes, tongues, hands and feet, are at liberty to hear evil reports, behold vanity, speak proudly, rashly, and unadvisedly and deceitfully, to do violence, take bribes, and go where they list.

But where a right spirit rules, every member of the body is under a limit; the ear is turned from fables, and the eye from behold-

ing vanity; they cannot, as too many do, cover, dissemble and lie, to accomplish self-ends; vain communication is not allowed to come out of their mouths; hands are limited from taking bribes, using of violence, or doing any wrong; the paths of rioters they cannot walk in, but are lovers of righteousness, and haters of iniquity in themselves and others. And to this estate we might all come, by denying such motions as the light of righteousness in our own hearts manifests to be evil.

HUGH TURFORD.

## THE FRIEND.

SECOND MONTH 28, 1874.

If we may trust the experience of those who have been the most apt scholars in the school of Christ, and attained to the profoundest knowledge of the mysteries of his Kingdom, we may rest assured that the deepest religious feeling arises from the secret operation of Divine grace on the soul. It makes but little noise or creaturely demonstration, but fixes the attention and the expectation on Christ alone, and manifests its supernatural origin and power, by producing compliance with the Divine will, in taking up the daily cross.

Much is lost where we are deceived into thinking that the life of religion consists in outward activity. A man's enemies are those of his own house. To overcome them, to know the strong natural man bound, and all his goods spoiled, the unrelenting warfare must be carried on within, and he who maintains the contest victoriously knows how frequent and how great are the fear, the trembling and the suffering he has to undergo, before his triumph is achieved, through the power of the Lamb, and he girded with the whole armor of God, and able to stand against the wiles of the devil.

For true growth in this religious life, it is of primary importance to keep the word of the Lord's patience, so as to know Him to keep us from the hour of temptation, which we are assured will come to try all that dwell upon the earth. This patience is one of the most beautiful, and not the least costly, of all the jewels that adorn the sanctified soul. It restrains the flesh and keeps the temper unraffled under provocation; it bridles the tongue, subdues pride, and strengthens the tried or mourning spirit. Hence the injunction of our Saviour to his disciples, when forewarning them of the persecution and suffering they would have to meet, "In your patience possess ye your souls."

In one of the epistles addressed by Edward Burrough and Francis Howgil, to those in London who had been recently convinced of the truth of the principles held by Friends, and were striving to walk conformably therewith, they say, "Look not out at words, for that which feeds there, is for famine. But dwell in the Light, joining with the immortal principle which receives nourishment from the eternal Fountain, and which the world knows not of nor comprehends. As you grow in the Pure, and in the Life, so you are unknown to the world; and your growth will appear by your obedience in the cross of Christ. Stumble not at the cross; for such as do, have no part in the eternal inheritance. But walk in the cross, which is life to the

new man and death to the old, and so through death, life is made manifest; and the pure life of God arising in all, the world will be trampled upon and denied by you. But such amongst you that choose the world, wrath from God, we declare [will be] against you. *And you who know the way and cast off the truth, and for the love of that which is visible, turn from the truth, you cannot escape the damnation of hell.*"

What an unspeakable favor would it be, if all the trumpets that are sounding amongst us in the present day, were calling the people to inward reverential waiting upon Christ, as He reveals himself by his light to the soul. How surely and truly would it teach those who accepted it as their guide, of their entire dependence on Him as the atoning sacrifice, by which He purchased for them, forgiveness and reconciliation, as the justifier and sanctifier of his true born children, and as the wisdom of God and the power of God; thus imparting to them that knowledge of the only true God and of Jesus Christ his son which is life eternal. This is the only way by which true Quakers can be made. To such truly convinced ones, small as the church may be, "the call goes forth that she gather to the place of pure, inward prayer, and her habitation is safe."

#### SUMMARY OF EVENTS.

**FOREIGN.**—The *London Times* says, the final result of the elections may be exactly stated as follows: The Conservatives returned 351; the Liberals and Home-rulers 302. The total number of votes polled in Great Britain and Ireland was about 2,500,000, which is a considerable falling off from the vote at the last general election, and shows that many persons abstained from voting.

On the 16th inst. Gladstone waited on the Queen at Windsor Castle, and formally tendered his resignation and that of his colleagues, which was accepted, and Benjamin Disraeli was invited to form a new Cabinet. On the 20th it was officially announced that the ministry was constituted as follows: First Lord of the Treasury, Disraeli; Chancellor of the Exchequer, Sir Stafford Northcote; First Lord of the Admiralty, Ward Hunt; Secretary of State for the Home Department, Richard Assheton Cross; for the Foreign Department, Earl of Derby; for the Colonial Department, Earl of Carnarvon; for War, Gathorne Hardy; for India, Marquis of Salisbury; Lord High Chancellor, Lord Cairns; Lord of the Privy Seal, Earl of Malmesbury; Lord President of the Council, Duke of Richmond. Lord John Manners is appointed Postmaster General. The new ministry is wholly composed of men who have held office in former Conservative administrations. The action of Disraeli in limiting his cabinet to twelve members is generally approved. Gladstone's Cabinet had fifteen members.

It is represented that Gladstone has determined to no longer take an active part in Parliamentary proceedings.

The *Times* says a telegraphic dispatch was received at Cape Coast Castle on the 25th ult. from the expeditionary force, announcing that Coomassie, the capital of Ashantee, had surrendered to the British forces, and the king and his family were prisoners.

Dr. Beke, the English traveller, reports that he has discovered the true Mount Sinai. It is situated a day's journey northwest of the village of Akaba, Arabia, at the altitude of 500 feet above the level of the sea. Dr. Beke says he found remains of animals that had been sacrificed. He also discovered Sinaitic inscriptions, which he copied.

The Faraday, a steamship of five thousand tons burden, built for the special purpose of laying telegraph cables in the Atlantic, has been launched at New Castle.

The Indian government telegraphs that it now has ample supplies of grain to meet every demand from the distressed districts. Intelligence has reached Calcutta that some persons have already died of famine, and multitudes are distressed from want of food. It is estimated that but for the aid furnished by the government, about five hundred thousand persons must have perished.

The total circulation of the United Kingdom at the close of 1872, is stated to have been £141,239,000 sterling, in coin and notes, equivalent in United States gold coin to \$686,421,540. The gold coin amounted to £84,551,000 sterling, and the silver to £15,000,000.

It is said that on the assembling of Parliament it will be immediately prorogued until the 12th of next month, so that the members who have accepted office in the new cabinet, may have an opportunity to go before their constituents for re-election.

The Queen, at the recommendation of Gladstone, has granted a pension to the children of Dr. Livingstone. It is no longer doubted that the report of his death is true.

A Madrid dispatch of the 22d says: Severe fighting has been going on in Biscay for several days. The heights above Somorostro are held by a Carlist force of 25,000 men. The Republicans have taken the first height. Their losses were heavy. A Bayonne dispatch says the Carlists have taken the town of Vinaroz, with its garrison of 200 men.

A Berlin dispatch of the 18th says: In the Reichstag to-day Bishop Metz, who is a member, asked the President for permission to be accompanied by interpreters during the sittings. His request was refused. A motion offered by an Alsatian deputy, that Alsace and Lorraine be permitted a plebiscitum to decide their nationality, was rejected by an overwhelming majority. The Alsatian delegates subsequently withdrew from the Reichstag and returned to Strasbourg.

A dispatch from Khartoum of 2d mo. 14th says: The Sultan of Darfur invaded the Egyptian territory, near the Bahrel Gazi, and captured a number of slaves. The Egyptian Governor, Zebra Beri, gave battle, and the fighting resulted in dispersing the Sultan's army, 10,000 strong, capturing four guns and killing the Vizier and many chiefs.

A formidable insurrection is said to have broken out in Japan. A dispatch from Nagasaki says, the insurrection is spreading, and the situation is critical. The insurgents are advancing on that place, and at the last accounts were so near that the foreign residents were preparing to leave.

The Emperor of Austria has left St. Petersburg and proceeded to Moscow.

A Paris dispatch says: The Minister of the Interior has sent a circular to the prefects, directing them to keep watch upon the citizens who leave their departments for Chislehurst, for the purpose of doing homage to the Prince Imperial on the occasion of his becoming of age.

The Hawaiian King, Lunalilo, died on the 3d inst. General Gonzales was installed as President of San Domingo on the 27th ult. The official declaration of the vote shows he was elected by a large majority. All the members of the family of ex-President Baez have been banished from the country.

There was an earthquake at Laguayra on the 6th inst., the severest since 1812. Much injury was done to persons and property.

**UNITED STATES.**—There were 315 interments in Philadelphia last week, including 97 children under two years. Of the deaths 36 were of consumption and 33 inflammation of the lungs, 11 typhoid fever, and 17 old age. At the municipal election held in this city on the 17th inst., 109,251 votes were polled. The candidates nominated by the Republican party for Mayor, City Solicitor and Receiver of Taxes, had majorities ranging from 10,995 to 13,717. The quantity of gas made at the city gas works during 1873, was 1,648,587,000 cubic feet, being an increase over the year 1872, of 161,618,000 feet. The street mains laid during the year were a little over twenty miles, making the entire length 605 miles. The profits of the year were \$305,758, nearly all of which has been expended in the permanent improvement of the works and laying mains. The number of consumers of gas increased 4708, and now amounts to 79,477.

The deaths in New York city last week were 533. During the past two weeks 1232 applications for patents were made at the Patent-office, Washington. This is a number unprecedented, in so short a time, in the history of that Department.

There have been passed during the present session of Congress in the House of Representatives, 115 bills, of which about fifty have become laws. Of this large number, but few are of general interest or importance. The Congressional committee, to whom was referred the memorial to recognize God and the Christian religion in the Constitution of the United States, have reported at length and pointedly against the proposition.

The Supreme Court of the Territory of New Mexico has decided that the Puebla Indians are citizens of the

United States, under the Treaty of Guadalupe-Hidalgo. This decision will add 4000 to the voting population that territory.

A temperance movement began recently in Ohio, directed especially against the drinking saloons which abound in all the villages and towns. The method adopted is for companies of women to visit the drinking places and endeavor to induce the venders of intoxicating drinks to abandon the business. In numerous cases the appeal has been successful. From Ohio the movement has spread into Indiana, Iowa, Illinois, Michigan and other States. It is said that more than one thousand drinking places have been closed in twenty-five towns. The laudable object of the women is, however, sometimes effected by questionable means, such as singing and praying before the saloons, and besieging them until the keepers promise to close them.

**The Markets, &c.**—The following were the quotations on the 21st inst. *New York.*—American gold, 112 U. S. sixes, 1881, registered, 120, coupon 12½; ditto 1862, 118; ditto, 10-40 5 per cents, registered, 111 coupon, 116. Superfine flour, \$5.90 a \$6.25; Standard extra, \$6.65 a \$6.80; finer brands, \$7 a \$11. No. 1 Chicago spring wheat, \$1.58; No. 2 do., \$1.54. Standard barley, \$1.80. Oats, 58 a 63 cts. Western yellow corn 77 a 82 cts.; southern yellow, 78 a 80 cts.; do. white 81 a 85 cts. *Philadelphia.*—Uplands and New Orleans cotton, 16 a 17 cts. Superfine flour, \$5 a \$5.50; extra \$5.75 a \$6.50; finer brands, \$7 a \$10.50. Red wheat \$1.60 a \$1.72; amber, \$1.68 a \$1.75; white, \$1.80 a \$1.85. Rye, 92 cts. Yellow corn, 74 a 76 cts. Oats 57 a 64 cts. Smoked hams, 12 a 14 cts. Lard, 9½ a 9½ cts. About 2500 beef cattle sold on the 23d inst. extra at 7½ a 7½ cts. per lb. gross, and common at 4½ a 5 cts., a few choice brought 7½ a 8 cts. Sheep sold at a 7½ cts. per lb. gross and corn fed hogs at \$3.50 a \$9 100 lb. net. *Chicago.*—No. 1 spring wheat, \$1.22 No. 2 do., \$1.20; No. 3 \$1.16½. No. 2 mixed corn, cts. *St. Louis.*—No. 2 spring wheat, \$1.20 a \$1.2 No. 2 winter red, \$1.51 a \$1.58. Oats, 47½ cts. *Cincinnati.*—Wheat, \$1.40 a \$1.43. Corn, 59 a 62 cts. Oats 48 a 53 cts. Lard, 8½ a 9 cts.

#### FRIENDS' FREEDMEN'S ASSOCIATION.

With nineteen schools in N. Carolina and Virginia in successful operation, and 2193 scholars in attendance involving an expense of \$1,000 per month for the next three months, the Association has but a small amount in its treasury. We commend the subject to the serious attention of Friends.

RICHARD CADBURY, Treasurer.

JAMES E. RHOADS, Pres't of Executive Board.  
Philadelphia, 2d mo. 13th, 1874.

#### WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of this Institution are expected to be vacated at the close of the Winter Session, in the 4th month next, Friends who may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee.

Nathaniel N. Stokes, Cinnaminson Post-office  
Burlington Co., N. J.

Charles Evans, No. 702 Race St., Philadelphia  
Deborah Rhoads, Haddonfield, N. J.

Rebecca S. Allen, No. 335 S. Fifth St., Philadelphia.

#### FRIENDS' BOARDING SCHOOL FOR INDIA CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Spring term. Also a Friend to act as assistant matron.

Application may be made to

Ebenezer Worth, Marshallton, Chester Co., Pa.  
Joseph Scattergood, 413 Spruce St., Philada.

Aaron Sharpless, Street Road P. O., Chester Co., Pa.

Thomas Wistar, Fox Chase P. O., Philada.

#### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia  
Physician and Superintendent—JOSHUA H. WORTINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, on Sixth-day, the 17th of 10th mo. 1873, the residence of her husband, George Haines, M. J. SARAH W. HAINES, in the seventy-second year of her age, a beloved member of Upper Evesham Monthly Meeting of Friends, New Jersey. Her relatives had the consoling belief her end was peace.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, THIRD MONTH 7, 1874.

NO. 29.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,  
PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

For "The Friend."

John Heald.

(Continued from page 219.)

"11th mo. 19th. Crossed the Bay of Cantry over rough water, and went to Joseph Hazard's to lodge. In the morning before day, rode by the light of the moon, and came time to the Select meeting before the monthly Meeting came on, in each of which I did some service."

In the latter of these, J. H. revived the query, "How much owest thou to my Lord," and called upon those present to consider whether they could safely keep back anything that was due to Him, in order to gratify their own desires. He referred to the danger there was that such would little by little have their attention and affections drawn away from Heavenly things, and placed on earthly things and earthly delights; and thus their hearts would become strongly fastened to the world, and a foundation laid for lasting heaviness of heart, for sorrow and sadness.

In the women's meeting he encouraged to faithfulness, and not to be looking out for excuses, such as "we are the weaker vessel, our brethren are stronger than we, let them be doing." He expressed his belief that the sisters standing in their allotment would need to set up and exalt the standard higher than it would be by the vigilance of the men alone without the sisters' aid. This aid they could be enabled to afford, if they were but faithful and did not despise the day of small things. He exhorted them not to neglect or despise a little gift, but with careful attention endeavor to do each one her duty.

"21st. First-day. The people assembled at Jacob Cronk's house. A large upper room was finished, the best I have seen in a private house in all my travels, but rather too small for those who attended. I thought we were preciously favored together. Some were tender. At the close of the meeting I met with a religious young woman that appeared rather shy. On giving her my hand, she pressed it, it was too much affected to speak, the tears flowing freely.

"23d. Had a meeting at Jonathan Bowerman's, the largest we have had in Canada. My mind soon became exercised. I said the diligent hand maketh rich. This is true in relation to temporals and spirituals. In out-

ward things, those who begin the world with their hands, if they are not diligent, we do not see them come into the possession of much; nor do we see people advance far in religious experience without a close application, for when we begin a religious course, we begin with a little, and if we advance we must be industrious. Going on with soft though moving language, I believe it was a meeting to profit to many. I was thankful for the favor.

"25th. A meeting was held at Samuel How's house. A considerable number came, and I thought we were divinely favored. I sat in silence near an hour, feeling my mind engaged in solemn, silent adoration. O the preciousness of the enjoyment that some poor feeble ones do partake of, and that the world knows not of, but it is revealed to these poor, these little ones, even so, Father, for so it seemed good in thy sight. After being thus silently engaged, I found it to arise in my mind, and said, In your patience possess ye your souls. Patiently wait and quietly hope for the salvation of God, and come to feel the owning of His love, a foretaste of heavenly joy, to strengthen and encourage to hold on the way; for they that wait on the Lord shall renew their strength. Many have come near to the enjoyment of precious favor, but for want of more faithfulness have not entered into rest, have not known their strength renewed, the blessing has not been received.

Oh the engagement I felt to labor to interest the people in their own welfare. I hope it will not be lost, and that this day's labor will be remembered to the honor and praise of the great Preserver of men. May the glory be ascribed to Him, and the creature remain in watchful humility, as at the King's gate, so that the King Immortal may be pleased to renew His favors again!

"12th mo. 1st. A small meeting at Uxbridge. It was dull and trying. After I believed it would be my lot to bear testimony, I waited for clearness, and at length said, Brethren, my heart's desire and prayer to God for Israel is, that they might be saved—and not only saved from the vanity and folly of this world, but from attempting to serve the living God with dead works. I was led to treat of the duty of serving God with a living concern, not formally, not carelessly. O beware of indifference. In the conclusion I endeavored to encourage a tried though sincere concern that lived among them, as I believed. I felt afraid that some, with whom I had been engaged to labor closely, might reject that and take this, I therefore added that some might be willing to receive the encouragement who were not willing to take the foregoing; and those for whom it was designed, might think themselves unworthy to receive it,—but oh for the encouragement of the honest-hearted.

"2d. We rode thirteen miles before we saw another habitation. We came to Samuel Lundy's, and dined near White Church, and then passed into Queen Street. We are now

near David Wilson's, who dissented from Friends some six years ago, and has made much disturbance among them. It is reported he is guilty of great enormities, scandalous and shameful. He has a meeting-house a short distance from Friends', where he preaches to the people. We are now in the midst of them. Oh Lord, preserve us and all thy tried children!

"3rd. We attended the meeting. I believe there is a precious seed in this place, that is designed to be dignified with Divine favor. The fresh feelings of love were felt among us.

"4th. We had an appointed meeting at White Church. I found a concern to show that the way to please God is to avoid that which is offensive to Him, and do that which He requires. This leads to taking up the daily cross and following the dear Redeemer. But this is often avoided, and we give way to that which is offensive to the Almighty, and here a disposition is manifested of not much caring whether He is pleased or not. I felt there was an unwillingness to give up. My companion mentioned something of brethren dwelling together in unity or love. I soon followed in a short testimony in regard to the excellence of love, as being the most precious enjoyment that dwells on the mind; but I had to leave them, as I feared, too much at a distance from the excellent favor.

Oh, how would the Lord favor the children of men, if they would obey Him. Thou knowest, O Lord, how thou hast humbled me, hast led me in ways that I had not known; that I have followed into many trying places, that I have said in secret, Who is there among all thy servants of as little use as I am. Oh, thou knowest how I have followed thee with sincerity, unfeignedly to obey thy requirements, but still how little do the children of men regard thy invitations through me. Still I desire to serve thee, but, O Lord, be pleased to deliver me from ways of deviation, and from those things too hard for me to be engaged in. But thou knowest what is best for me, and let thy will be done.

I have not yet known why religion should be so low in esteem hereaway. There seems to be great indifference in regard to this important concern. I have thought the most likely cause was, that the division before mentioned is degrading to vital religion, and to make open profession appears to be mean and contemptible in the eyes of the people, and their minds seem to be discouraged; while those who are in the separation are involved in great absurdities of conduct and practice. How have I secretly mourned on account of this declension! How have I lamented the sad estate of some who have been unhappily seduced and drawn into defilement and pollution! Oh, sad blindness and infatuation!

"6th. Henry Widdifield got a sleigh to carry us to Young Street Meeting, about four miles. On sitting down, exercise of mind attended. At length I said, It affords some consolation

to believe that we may be saved with an everlasting salvation; but to attain a state of unshaken belief, that if we continue faithful we shall be admitted into the mansions of rest and peace, is more than a belief that we may be saved. There is an attainment still further, which is [the conviction] that neither heights nor depths, principalities nor powers, things present nor to come, shall ever be able to separate us from the love of God in Christ Jesus, our Lord. Some were visited in mercy, but not yielding to the Divine requiring had neglected to obey in the day of visitation; and if it had been renewed, have refused to yield, though they have felt the love of God, and known that He loved them before they loved Him. After awhile such become easy, and heavenly love ceases to be revived, and they are left to themselves.

In this meeting I thought Truth came more into dominion than in any we have lately had."

As the day was stormy, and many were not at the meeting on account of the inclemency of the weather, J. H. consented that another should be appointed at the same place the following day. This proved to be large and favored. In it he was concerned to caution against mere formality, and to press the necessity of sincerity in our efforts to serve and worship the Almighty.

(To be continued.)

For "The Friend."

#### Animal Character.

The following extracts are taken from a work entitled Chapters on Animals, by P. G. Hamerton, and, it is believed, will prove acceptable to those who are interested in the lower orders of creation, and regard them as worthy of observation, independently of their usefulness to man.

"The sportsman thinks that if an animal is not either good to hunt or be hunted, does not play the part either of hound or hare, there can be no sufficient reason against its total extermination. So the agriculturist has his way of considering animals, with his two categories—the beasts that can work for him and the beasts that can be sold to the butcher. But there is another way besides these, that of the observer who studies the animal from some kind of interest in nature without reference to anything that it can do for him or produce for him. The selfish pre-occupation always hinders us from observing in the best and largest sense. I have seen men who had not the least insight into the characters of their own horses or their own dogs. It grates very unpleasantly on the feelings of any true lover of animals to see them treated as beings without any individuality of mental constitution. There are people to whom a horse is a horse, just as a penny postage-stamp is a penny postage-stamp; that is, a thing which will convey a certain weight for a certain regulated distance. But any one who knows animals knows that a horse has as much individuality as a man. And the more we know, even of inferior animals, the more distinct does their individuality become for us. It is only our ignorance and our indifference which confound them. The two bay horses in your carriage look exactly alike to the people in the street, but the coachman and groom could establish contrasts and comparisons after the manner of Plutarch. With the varieties of canine character we are all of us tolerably

familiar, because our dogs are more with us, happily for us and for them. Yet how difficult it is to arrive at any true conception of the mind of a lower animal! The truth is, that animals are both more intelligent and less intelligent than we fancy. A dog, and even a horse, notices a good deal that we little suspect him of noticing, but at the same time a great deal which we think he sees is perfectly invisible to him. The following account of the behavior of a cow gives a glimpse of the real nature of the animal!—

"These long-tailed cows," say Messrs. Huc and Gabet, 'are so restive and difficult to milk, that, to keep them at all quiet, the herdsman has to give them a calf to lick meanwhile. But for this device, not a single drop of milk could be obtained from them. One day a Lama herdsman, who lived in the same house with ourselves, came, with a long dismal face, to announce that his cow had calved during the night, and that, unfortunately, the calf was dying. It died in the course of the day. The Lama forthwith skinned the poor beast, and stuffed it with hay. This proceeding surprised us at first, for the Lama had by no means the air of a man likely to give himself the luxury of a cabinet of natural history. When the operation was completed we found that the hay-calf had neither feet nor head; whereupon it occurred to us that, after all, it was perhaps a pillow that the Lama contemplated. We were in error; but the error was not dissipated till the next morning, when our herdsman went to milk his cow. Seeing him issue forth, the pail in one hand and the hay-calf under the other arm, the fancy occurred to us to follow him. His first proceeding was to put the hay-calf down before the cow. He then turned to milk the cow herself. The mamma at first opened enormous eyes at her beloved infant; by degrees she stooped her head towards it, then smelt at it, sneezed three or four times, and at last proceeded to lick it with the most delightful tenderness. This spectacle grated against our sensibilities; it seemed to us that he who first invented this parody upon one of the most touching incidents in nature must have been a man without a heart. A somewhat burlesque circumstance occurred one day to modify the indignation with which this treachery inspired us. By dint of caressing and licking her little calf, the tender parent one fine morning nipped it; the hay issued from within, and the cow, manifesting not the slightest surprise nor agitation, proceeded tranquilly to devour the unexpected provender."

"The last touch entirely paints the brute. She has recognised her offspring by the smell chiefly, and never having heard of anatomy is not surprised when the internal organs are found to consist simply of hay. And why not eat the hay? The absence of surprise at the discovery, the immediateness of the decision to eat the hay, are perfectly natural in a cow, and if they surprise us it is only because we do not fully realise the state of the bovine mind. If we reflect, however, we must perceive that a cow can be aware of no reason why calves should not be constructed internally of hay. On the other hand, the bovine mind cannot be wanting in its own kind of intelligence, for oxen know their masters, and when in harness are remarkable for a very accurate and delicate kind of obedience; indeed the horse is light-headed and careless in comparison with them."

"None of us can imagine the feelings of a tiger when his jaws are bathed in blood and he tears the quivering flesh. The passion of the great flesh-eater is as completely unknown to civilised men, as the passion of the poet is to the tiger in the jungle. It is far more than merely a good appetite, it is an intense emotion. A quite faint and pale shadow of it still remains in men with an ardent enthusiasm for the chase, who feel a joy in slaughter, but this to the tiger's passion is as water to whisky. This impossibility of knowing the real sensations of animals—and the sensations are the life—stands like an inaccessible and immovable rock right in the pathway of our studies. The effort of dramatic power necessary to imagine the life of another person is very considerable, and few minds are capable of it, but it is much easier to imagine the sensations of a farmer than those of his horse. The main difficulty in conceiving the mental states of animals is, that the moment we think of them as human we are lost. Neither are they machines pushed by irresistible instincts, a human being as ignorant as a horse would be an idiot, and act with an idiot's lack of sense and incapacity for sequence. But the horse is not an idiot, he has a mind at once quite clear and sane, and is very observant in his own way. Most domestic animals are as keenly alive to their own interests as a man of business. They can make bargains, and stick to them, and make you stick to them also. I have a little mare who used to require six men to catch her in the pasture, but carried corn to her for a long time without trying to take her, leaving the corn on the ground. Next, I induced her to eat the corn whilst I held it, still leaving her free. Finally I persuaded her to follow me, and now she will come trotting half-a-mile at my whistle leaping ditches, fording brooks, in the darkness and rain, or in impenetrable fog. She follows me like a dog to the stable, and I administer the corn there. But it is a bargain she knowingly sells her liberty for the corn. The experiment of reducing the reward having been tried to test her behavior, she ceased to obey the whistle and resumed her former habits; but the full and due quantity having been restored she yielded her liberty again without resistance, and since then she is not to be cheated. On the other hand, she is very ignorant of much that a man of equal shrewdness would easily have picked up by the use of language. In our estimates of animal character we always commit one of two mistakes,—either we conclude that the beast has great knowledge because they seem so clever, or else we fancy that they must be stupid because we have ascertained that they are ignorant; so that, on the one hand, we constantly see animals severely punished for not having known what they could only have learned through human language, and, on the other hand, we find men very frequently underrating the wonderful natural intelligence of the brute creation, and treating animals without the least consideration for their feelings, which are often highly sensitive."

"It seems to me, that notwithstanding the insuperable difficulties which hinder us from a perfect comprehension of the brute nature in any of its forms, we may still, by careful observation and reflection, aided by a kindly sympathy and indulgence, arrive at notion about animal life not altogether without interest. Let us always try to bear in mind

those great necessities which are irresistibly felt by animals as a consequence of their peculiar organization, and preserve ourselves from the error of approving or blaming them according to human standards. When a tiger attacks a man, the act is not more blameable than the act of a man who opens and eats an oyster. We have the most absurd prejudices on this subject, which have taken root in infancy and not been disturbed by maturer reflection afterwards. Wolves and falcons seem cruel because their prey is rather large, but the little insect-eating birds are our pets, and cats are morally esteemed for catching mice."

*Last Words of Sir James Mackintosh.*—The following account of the last illness and death of this eminent man is given in the "Life of Sir J. Mackintosh," by his son: "On Monday, May 22d, he was finally taken ill. During Tuesday, Wednesday, and part of Thursday, our dear father knew those around him, and occasionally spoke to each of us in a way that proved he did; and even up to Saturday, the day he ceased to speak at all, there was a graciousness in his manner, when his medical friends approached his bedside, that affected us very much—he smiled so benignantly on them—did what they required of him so willingly, and once or twice expressed pleasure in seeing them, with such animation, and in a tone and manner so unusual with him. There was in all this no anxiety about himself visible; no eagerness for their help was expressed; it was as his friends that he seemed glad to see them. It was some mitigation of our sufferings during the succeeding days, that he appeared to be free from pain of any kind. Indeed, no word escaped from him by which we could have learned that any thing was the matter with him.

At the same time that he seemed so unconcerned about his body, the activity of his mind was truly amazing. Though all his ideas were in confusion, he poured out his accurate expressions of deep thought upon the many subjects that had been the study of his life, with an energy, and in a tone and manner, that reminded us of former years, and was so peculiar to him when in health and vigor. He had a look of deep thoughtfulness, spoke with a powerful voice, weighed his words, and sometimes stopped, not satisfied with a word he had used, and he did not go on until he found the one which pleased him. He watched us as we moved about him, but he continued talking; and if he asked a question, he waited for an answer. At one time he suddenly stopped and said, 'What is the name of that man who writes upon decrees and upon election?' None of us could satisfy him; and after repeating his question, he paused some time, and then added with a smile, 'He cannot frighten me now.'

On Saturday a great change took place; he became very silent, and had the appearance of one listening; the intelligence of his countenance did not diminish, it only changed its character; a look of peace and dignity was mingled with it, such as I had never witnessed in that dear face before. Whenever a word from the Scriptures was repeated to him, he always manifested that he heard it; and I especially observed that, at every mention of the name of Jesus Christ, if his eyes were closed, he always opened them, and looked at the person who had spoken. I said to him at the time, 'Jesus Christ loves you;' he answer-

ed slowly, and pausing between each word, 'Jesus Christ—love—the same thing.' He uttered these last words with a most sweet smile. After a long silence he said, 'I believe.' We said, in a voice of inquiry, 'In God?' He answered, 'In Jesus.' He spoke but once more after this. Upon our inquiry how he felt, he said he was 'happy.'

From that time to Wednesday morning when he breathed his last, we waited upon him and watched beside him, but he took no more notice of us, and judging by his unruflled brow, his calm though increasingly serious and solemn countenance, he willingly yielded up his spirit into the hands of Him whom he had proved to be indeed a most faithful Creator."

Mackintosh died in 1832, at the age of 67.

*A Sunbeam.*—The greatest of physical paradoxes is the sunbeam. It is the most potent and versatile force we have, and yet it behaves itself like the gentlest and most accommodating. Nothing can fall more softly or more silently upon the earth than the rays of our great luminary—not even the feathery flakes of snow which thread their way through the atmosphere as if they were too filmy to yield to the demands of gravity like grosser things. The most delicate slip of gold leaf, exposed as a target to the sun's shafts, is not stirred to the extent of a hair, though an infant's faintest breath would set it in tremulous motion. The tenderest of human organs—the apple of the eye—though pierced and buffeted each day by thousands of sunbeams, suffers no pain during the process, but rejoices in their sweetness, blesses the useful light. Yet a few of those rays insinuating themselves into a mass of iron, like the Britannia Tubular Bridge, will compel the closely-knit particles to separate, and will move the whole enormous fabric with as much ease as a giant would a straw. The play of these beams upon our sheets of water lifts up layer after layer into the atmosphere, and hoists whole rivers from their beds, only to drop them again in snows upon the hills or in fattening showers upon the plants. Let but the air drink in a little more sunshine at one place than another, and it desolates a whole region. The marvel is that a power which is capable of assuming such a diversity of forms, and of producing such stupendous results, should come to us so gentle, so peaceful, and in so unpretentious a manner.—*British Quarterly Review.*

*The Size of Whales.*—Capt. Scoresby, a very high authority on this subject, declares that the common whale seldom exceeds seventy feet in length, and is much more frequently under sixty. Out of three hundred and twenty-two whales which he assisted in capturing, not one exceeded fifty-eight feet, and the largest of which he knew the reported measurement to be authentic came up to sixty-seven feet. Two specimens of the razor-back whale have been observed to be one hundred and five feet in length. Other specimens have measured a hundred, and many others from eighty to ninety feet. One cast on shore at North Berwick, Scotland, and preserved by Dr. Knox, was eighty-three feet in length. The skeleton of one found in the Columbia river, belonged to a whale which when alive probably measured one hundred and twelve feet.

*Extract from the Diary of Samuel Scott.*—Seventh month 30th, 1780. Pretty early at the Park Meeting, a degree of solemnity clothed my mind, not without some presentations for a public ministry, which, on proving, appeared immature. How suitably adapted are the following precepts, not only to me, but to all who at any time appear in the ministry. "Be more ready to hear than to offer the sacrifice of fools." "Be not rash with thy mouth to utter any thing before God." And when thou speakest, "let thy words be few." "Be slow to speak."

Eighth month 1st. In the week-day meeting at Horsleydown, something opened by way of ministry; but waiting under the opening, silence seemed most advisable; and after long sitting, the meeting closed lively. I had rather refrain from speaking, when perhaps I might have spoken with a degree of profit, than at any time to speak unprofitably. There are, comparatively speaking, but few ministers left amongst us; yet frequently many words are uttered.

[May not the restraint vouchsafed to our departed Friend be an instructive caution at the present day?]

*Peanut Oil.*—The production of peanuts in this country has increased wonderfully during the past ten or twelve years. In this city alone over 600,000 bushels are annually sold, while the entire crop of the country reaches three times that quantity, or about 2,000,000 bushels, valued at \$3,000,000. Previous to the year 1860, according to the agricultural report, the total product of the United States did not amount to more than 150,000 bushels, of which North Carolina furnished 125,000 bushels. The great portion of the crop now is raised in Virginia, North Carolina, Tennessee, Georgia and South Carolina.

As an article of food they are valuable, but their importance in a commercial point of view is much greater on account of the oil they contain. The oil is in large demand, and serves every purpose for which olive or almond oil is used. It is now being extensively used in place of olive oil, particularly for table use, it being quite as good, and keeps a long time without becoming rancid. The amount of oil contained in the nut varies according to latitude and other favorable circumstances or conditions, and is proportionately large.

All the oil comes from the "meat," the husk being of no value. The oil is extracted by pressure, and the pressed cake is not thrown away, but is used both as food for cattle and as a manure. Most of the oil used in Europe is manufactured in the countries of the Mediterranean, the French depending principally upon Algiers, where the plant flourishes greatly, for their supply. The production of peanut oil in this country dates back to the war, when it was used to a large extent for table purposes in the south, the olive oil not being easily obtained. It was used quite generally as a substitute for lard. The cake residuum was made serviceable, too; after being roasted and ground, it was used in place of coffee and chocolate, making an excellent beverage.—*Late Paper.*

*The Church.*—As to the state of the church, I cannot say much; I think she is going into the wilderness, to the place her Husband hath prepared for her there; she is seldom visible

about the dwellings of her *nominal professors*; many make use of her name for fraudulent purposes and lucrative views, the filthy lucre of pre-eminence. I know them by this mark—they aspire to be great, and not by *becoming little*, and the servants of all, patient toward all men. They say they are zealous, some think them so, but where the eye is not single, no zeal can be there that is of the right sort. *Samuel Fothergill, 1759.*

#### PRODIGALS.

Again, in the Book of books, to-day  
I read of that Prodigal, far away

In the centuries agone,  
Who took the portion that to him fell,  
And went from friends and home to dwell  
In a distant land alone.

And when his riotous living was done,  
And his course of foolish pleasure run,  
And a fearful famine rose,  
He fain would have fed with the very swine,  
And no man gave him bread or wine,  
For his friends were changed to foes.

And I thought, when at last his state he knew  
What a little thing he had to do,  
To win again his place:  
Only the madness of sin to learn,  
To come to himself, repent, and turn,  
And seek his Father's face.

Then I thought however vile we are,  
Not one of us hath strayed so far  
From the things that are good and pure,  
But if to gain his home he tried  
He would find the portal open wide,  
And find his welcome sure.

My fellow-sinners, though you dwell  
In haunts where the feet take hold on hell,  
Where the downward way is plain;  
Think, who is waiting for you at home,  
Repent, and come to yourself, and come  
To your Father's house again!

Say, out of the depths of humility,  
"I have lost the claim of a child on Thee,  
I would serve Thee with the least!"  
And He will a royal robe prepare,  
He will call you son, and call you heir;  
And seat you at the feast.

Yea, fellow-sinner, rise to-day,  
And run till He meets you on the way,  
Till you hear the glad words said,—  
"Let joy through all the heavens resound  
For this, my son, who was lost is found,  
And he lives, who once was dead."

*Phebe Cary.*

#### OLD AGE AND DEATH.

The seas are quiet when the winds give o'er:  
So calm are we when passions are no more.  
For then we know how vain it was to boast  
Of fleeting things too certain to be lost.  
Clouds of affection from our younger eyes  
Conceal that emptiness which age desires;  
The soul's dark cottage, batter'd and decay'd,  
Lets in new light through chinks that time has made;  
Stronger by weakness, wiser, men become  
As they draw near to their eternal home:  
Leaving the old, both worlds at once they view  
That stand upon the threshold of the new.

—*Waller.*

*Eggs of Reptiles.*—I here tasted the eggs of the Iguana, of which the Indians had found great numbers, as this was the season for laying; in flavor they are not unlike ducks' eggs: two or three dozen were generally found together. The iguana, alligator and fresh-water turtle, all lay their eggs at this period, and bury them (much in the same manner) in the dry sand on the river's banks; but I was never able to conquer my aversion sufficiently to taste those of the alligator. The eggs are very artfully concealed, but the natives are

equally clever at discovering them. When, from the appearance of the sand, they imagine it has been disturbed, they cut a long, slight wand, and thrust it down a considerable depth; should the point, when withdrawn, have some moist particles adhering to it, they examine and smell them, and, having come to a satisfactory conclusion, immediately turn up the sand until they find the eggs; as the shell is exceedingly hard, they are thrown into a heap, and then taken down to the canoe. In the latter portion of our journey, we often stopped for this purpose, wherever the quick eyes of the Indians discerned a favorable spot.—*Wickham's Journey in Central America.*

For "The Friend."

#### Memoirs and Letters of Sarah Hillman.

(Continued from page 215.)

To her Mother.

"Potts Town, 6th mo. 14th, 1834.

My dear Mother,—We\* reached here last evening about 7 o'clock, as well as could be expected; and were favored with as much strength as was needful to bear the journey. S. P. kindly received us and made every thing as comfortable for us as she could, as did J. M. Though we have not many incidents of interest to note, it does seem pleasant to say to you we are here.

I do feel, deeply feel the awful embassy, and nothing but simple faith in the blessed Shepherd, and reliance upon His almighty power, can sustain any of us. May your prayers be daily put up for us, and may the Lord keep you and us, every moment that we may be permitted to enjoy a precious, peaceful meeting when the time comes, and have to commemorate the mercy which has been extended unto us, poor and unworthy as we are.

In tender affection your daughter and sister,  
SARAH HILLMAN.

To the same.

Muncy, 6th mo. 21st, 1834.

My dear Mother,—Closely engaged as we are in this arduous and awful service, there is little time for writing. It is now 9 o'clock, and we have but just done tea. We rode to-day 20 miles, and visited three families; the two preceding days thirteen families. So thou may see, poor and feeble as we are and feel, the great Shepherd does help us with a little help; and I can in deep humility acknowledge, He has been mouth and wisdom, tongue and utterance, yea sustained thus far, and opened a way for us, where there seemed to be none. May praise be on our lips, and in our hearts, for past mercies so unmerited; and humble hope and trust and reliance, increased in the divine Almighty Arm, until on the other side Jordan, one unending song shall be raised unto Him who hath redeemed our souls out of all trouble, and hath granted an entrance into the Kingdom of Heaven. 'Tis truly a fearful thing to declare the whole counsel to such as feel no need of salvation, and who seem to know not that they are sick. While there are here, who do love and fear, and desire to serve the Lord with the very best of the first fruits of their increase; and also a precious company of dear young people, who are asking the way to Zion, with their faces

\* She had for companions, Regina Shober and Charles Allen, as will more fully appear in the sequel of this visit.

set thither, to whom it is sweet to have the few crumbs, which may be given for them, at the same time there are others cold and hard and indifferent, who have never suffered the gospel plough to break up their fallow ground and to whom it seems like hard labor indeed to utter any word; yet it does not belong to the servant to choose his work, but to do cheerfully whatsoever the Master bids; and thus being faithful, he receives his pay as he goes, however small it may be; if no more than his life for a prey, it is worth suffering much to gain; for as obedience keeps pace with the knowledge received, at the end of the race it is the eternal crown.

Our dear friends here are very kind, and so mercifully has our kind, compassionate Saviour condescended to assure us that we are in our right places, that we dare not 'look back;' but feel bound, 'though faint,' to 'pursue' the 'things that make for peace, and things whereby one may edify another.' Oh if all that I have endured before I was made willing to give up to unfold this prospect, and all that in coming and suffering according to my small measure since, be a means of thoroughly breaking down and moulding my will to the will of my Heavenly Father,—making me wholly His, and fully given up to fulfil that part of the ministry of reconciliation, which I humbly believe He has committed to my trust,—I pray that this end may be effected, and that the cup may be drunk even to the dregs.

As to our return, it seems likely we shall be kept longer than we anticipated. There are many more Friends hereaway than was expected, including a large number of young people, evidently under the superintendence of that blessed Heavenly Shepherd, who laid down His precious life for the sheep; and whose watchful, compassionate eye sees a His habitable earth. He visits, and waters and keeps every moment, and I believe has preserved to himself a seed here, however obscure their situation and hidden from mortals who are under his special care, and shall be accounted unto Him for a generation. The feet of the messengers will, I believe, be turned thither more than has been the case; and perhaps in a day to come, we may have Quarterly Meeting added to our Yearly Meeting among these mountains.

\* \* \* You all feel dear; but I must leave you now to the care of the Great Shepherd and cleave closer and closer to Him, my Heavenly Leader, in simple dependence; doing all the little I can, as He calls for the sacrifice; hoping and believing as I do, that a will help to make the way to the kingdom of Heaven. How sweet is the verse, 'The more we toil and suffer here, the sweeter rest will be!' Our blessed and Holy Redeemer set us an example, that we should follow his steps, and His was no life of ease, but a cross-bearing life,—a life attended with many tribulation, and all the trials attendant upon poor humanity, in order that he might feel for us poor dust and ashes as we are; and moreover has become our adorable High Priest, an Advocate with the Father, and who has done, and ever will, I believe, help his poor children who trust in Him. He has, I may say to the praise of His grace, helped me, and oh! that day by day I may feel a little renewal of strength out of Zion's hill! That my return may be with peace. Not that I am looking for great things, but not to be

and of Him in peace at the last, when he takes up His jewels—even sealed His forever. Yours in the nearest affection. Farewell. By the Lord's blessing be upon you."

In the preceding letter, accompanied by the qualifying language "perhaps in a day to come," &c. our dear friend gives room for her pen to portray one of those prophetic visions which the Most High does at times give unto His humbled, dependent, watchful children. Fit to their being verified, the unalterable conditions must on our part be observed: viz. "The Lord is with you while ye be with Him." "Draw nigh to God, and He will draw nigh to you." "Walk worthy of the vocation wherewith ye are called—walk worthy of God, who hath called you unto his kingdom and glory." "For we are made partakers of Christ, if we hold fast the beginning of our confidence steadfast unto the end." It is faithfulness herein that draws down Divine blessings, yea, that opens the windows of heaven to the pouring out tokens of Heavenly favor towards any people. Humility, and contrition, and dedication of heart to the Lord, will now as ever cause such to bud and blossom as the rose; to take root downward and bear fruit upward, to the praise of the great Husbandman; so to abide as living branches in a living vine, as to bring forth fruit to the praise of His ever excellent name. While every opposite, lukewarm, or hostile course, must end in dwarfishness and unfruitfulness, in sorrow, and emptiness and bitterness of spirit. It is in knowing the life of Christ inwardly revealed! It is in bowing wholly to His yoke, and learning of Him! It is the submission of the heart, and allowing the government thereof to be upon the shoulder of the Prince of Peace whose blood was shed for us, that we can realize Him to set up His kingdom and reign over all within us to our becoming, after the testimony of the apostles, new creatures in Him. "If any man be in Christ, he is a new creature; old things are passed away; behold all things are become new."

#### To her Mother.

"Muncy, 7th mo. 1st, 1834.

My precious Mother,—Heart and flesh through mercy, at seasons a little revived, when almost ready to fail; so deep are the trials we have to pass through here in many places. We have paid thirty-two visits, including the Elklands. Dear friend Ellis is truly like a mother to us, exceeding kind and affectionate.

Truly my heart is at this moment so unqualified for writing, you must excuse me; the prospect of the meeting bears down my spirit. Were it not that I do believe in the promise which was in great mercy sweetly applied to my heart before I left home, 'My grace is sufficient for thee.' I should sometimes sink; but it has been verified at seasons to my humbling admiration. It remains also to be true that there is fullness in emptiness; and when the poor soul is ready to conclude over, the blessed Master, who sustained His poor disciples, and spoke peace to the troubled ocean, is found to be all in all. Oh, that we may each know Him to be made known to us, 'wisdom and righteousness, sanctification and complete redemption!' And this I believe we shall realize, if we hold fast the beginning of our confidence steadfast to the end.

May the Lord in mercy keep on the right hand and on the left, guide us by his counsel through the intricate mazes of this world that lieth in wickedness, and when our poor painful pilgrimage on earth shall be ended, grant us an admission into that glorious, holy city not made with hands, where the redeemed are now surrounding the throne singing Hallelujah's to Him who liveth and was dead, and has the keys of death, hell and the grave, says and prays your ever truly attached, ever affectionate daughter and sister.

SARAH HILLMAN.

(To be continued.)

*A Japanese Paper Mill.*—On the other side of the house from the garden, in the large yard, sat a dozen boys and girls on their heels, with a pile of twigs and boughs of the paper-mulberry tree (*Broussonetia papyrifera*) from which the great bulk of Japanese paper is made, and with which the hill and mountain-sides of the village were covered. The paper-mulberry grows to be from six to eight feet high. The boughs, after being cut, are dried and then macerated in water, until the outer green bark can be stripped from the inner white membrane. Engaged in this latter work, under a series of sheds, and bending over a stream of slowly-running water, were several dozen girls and women, who, by alternate picking and washing, separated the dark and brittle outer bark from the white elastic strips of inner membrane. Much time and patience were required to do this completely, and then the bundles of limp white strips were boiled until soft in a lye made from the ashes of rice straw. We next passed into a room where the boiled and softened bark was brought to two muscular fellows, who were dressed only in their loin-cloths, and who sat before large flat stones. With heavy wooden clubs they beat the bark nearly to a pulp. In another room was a man grinding boiled rice and a girl mixing it with a decoction of bark from another tree, something like slippery-elm, until a shiny, glutinous mixture, evidently intended as a size, was prepared. This size and the mass just taken from the beaters were thrown into the pulp-vat, which was about four feet long, three wide, and two high.

At each of these vats, on the most common seat in Japan—the heels or ankles—sat a girl vigorously stirring the pulp, using a single bamboo stick for an agitator. When she judged it to be of the proper consistency, she took a square piece of fine matting, made of parallel fibres of bamboo, set in a light square frame of wood, on which folded a "fly" like that of a printing press. The closeness of the bamboo fibres answered the purpose of our wire-frames. Dipping this by a sliding motion into the vat, she draws up a sheet of the pulp, and after waiting for it to drain, during which time her nimble fingers picked out any impurities or lumps, she throws back the fly, which is furnished with a raised edge, and spreads the sheet on the pile beside her. A dexterous girl can dip up about four hundred and fifty sheets per day.

The next process is to dry the sheets. For this purpose they are spread out flat and firm on upright boards, slanted in the sun, so that they dry with little shrinkage, hard and flat. In wet weather, or when business is pressing, the drying-boards are transferred to a room in which a hot charcoal fire is kept burning. The pressing of the paper is done by an or-

dinary wedge or lever press, and a finishing gloss is put on, in very much the same manner as leather is polished or ironed in our country.

All this would be insufferably tedious to an American manufacturer, and would not pay in a land of high wages, like ours. My host listened with mingled delight, and with the penumbra of a doubt in his face, to my description of the machines used on the Wissahickon, at Cohoes, and at Bath. I made inquiries concerning the wages paid to his employes per diem. The bark-pounders and dippers were paid eight *tempes* (cents) a day; the strippers and washers six cents. From his establishment, in which he employed forty persons in all, after paying wages, expenses for fuel, transportation, taxes, etc., he was able to lay up yearly a handsome sum—that is \$1000. He was considered a rich merchant.—*Overland Monthly.*

For "The Friend."

It is declared, that the Spirit of Truth, or that Divine light shed abroad in every heart, will, if heeded, lead out of all error, into all truth; and we have ample Scripture grounds for believing that the apostles and primitive believers were made what they were through its humbling, crucifying power; that there cannot be a doubt they accepted and received the doctrine of the spirituality of the New Dispensation, in all its fullness; that the holy manifestation of Life and Truth, Christ by his Spirit, did live abundantly in their hearts, a precious gift for their salvation. And are we not safe in assuming wherever vital christianity exists, the presence of this life will be sensibly felt and acknowledged—that in proportion as we turn our faces from it, whether individually or in the gathered church, shall we become spiritually lifeless, and formalism will take the place of heartfelt religion.

"My peace I leave with you, my peace I give unto you, not as the world giveth, give I unto you."

This precious assurance of the Saviour of men, must have awakened in the hearts of those to whom it was addressed, an earnest desire after holiness, and to be found worthy of so rich a blessing; and the constant zeal and devotion that marked the character of the early churches; the purity to which they attained; and their close spiritual communion with Him their glorified Leader, is deeply instructive; as is evident from the several epistles of Paul to the Corinthians, the Ephesians, and to other branches of the household of faith,

The child-like trust; simple obedience; the unwavering faith, and simplicity of life, that distinguished christianity at its dawn, and brightened that memorable era, in which the apostles and immediate followers of our Lord were engaged in spreading a knowledge of the Truth, furnishes much that we may profitably dwell upon, and an example worthy to be followed in after ages. The record of their constancy, and sufferings in its behalf; and the labor into which they were called, in healing the souls and bodies of men, is a legacy of inestimable value to us. But how sad it is to remember that in the lapse of a comparatively brief period, the Light which had glowed as a living flame, began to lose in the hearts of many believers, its Divine significance. There were those removed by death who had been valiant for the Truth; some in a natural way, and others by the hands of

cruel men. Others unwilling to bear the fierce persecutions of that idolatrous age, shrunk from the peril to which a faithful support of the Truth exposed them, and renouncing their former faith, walked no more as His followers.

There were then as in every period since, many adverse influences existing to the growth of vital religion; the love of the world, its honors, titles and riches; the prizes held forth to such as should through industry or preferment, attain to power and influence; the desire after popularity, the love of flattery, and the glittering charm so often presented, of realizing, as many vainly imagine they shall, the fullest measure of enjoyment by the attainment of all those temporal advantages they have struggled for. These are among the many entanglements that allure the feet of the unwatchful, whereby the kingdom of this world has been set up in the hearts of men in this and former generations, and His rule and peaceful authority denied. "My kingdom is not of this world," and He adds, "else would my servants fight; by which it is clear the weapons of their warfare were not to be carnal, but his servants were to be clothed from on High with wisdom and power, to the pulling down of the strongholds of sin. He is the life and glory of His own church, and it is toward Him in faith we are to look for the upbuilding of His cause, by the effectual working of His preparing, qualifying power in each and every heart. Thus it is any are enabled to wield the sword of the Spirit; and having overcome the house of Saul in their own souls, are therefore enabled to stand for the Truth; to speak of that of which their hands have handled, and thus to invite others into the sheep-fold. But it is not apparent, that the great body of Christian professors, do not practically come up to that indwelling, cross-bearing character, which is inseparable from the heart-changing dispensations, and spiritual proving of the religion to which the early believers were called? And it is remarkable, and worthy of serious thoughtfulness, that after the beauty and glory of the primitive church had passed away; having yielded to the lusts of the flesh, and denied to the Spirit its prerogative to rule, that a state followed comparable to midnight darkness in a moral and religious sense; and that centuries should have elapsed, before there was any clear dawning of the life and vigor of primitive days. In the words of Wm. Penn, during the long night of apostacy, "a false church existed and exercised authority; and though she was lost to purity, she would keep her good name of being the true church, and mother of the faithful; but in deed and in truth she was mystery Babylon, which with all her show and outside of religion, were adulterated and gone from the Spirit, nature and life of Christ, and has become vain, ambitious, cruel, &c. Then it was the true church fled as into the wilderness, from superstition and violence, to a retired and solitary state; hidden, as it were out of the sight of men, though in the world, and known to Him, its life and Head;" and he goes on to say, "many of her best children in several nations, and in the course of centuries fell by the cruelty of superstition, because they would not fall from their faithfulness to the truth." Of this long and gloomy period an interesting summary is given by the same valued author; in which it is shown how entirely the church, bearing the Christian name,

was perverted, and used to subjugate the Spirit, and to bring all who were animated and guided thereby under oppression. But these were few, retired and feeble in their efforts to bring the established church out of the formalism into which it had lapsed. Arrogating to itself both spiritual and temporal power, in the pride of its ambition, it became unmindful of the true God, and forgetful of its dependence. No longer did it represent the mission with which it had been charged, the conversion of the world, and the gathering in of that vast family beyond, who were in heathen darkness. With the precious testimony of the Scriptures at its command, and the valuable lesson of a most interesting history, embracing the Christian church in its early purity, the example of the Saviour himself, and His supporting power in cheering on, and helping all His faithful children, the so called church used its authority to quench this Divine life wherever shown; pursuing all who presumed to set up Christ as the great and only Teacher, with bitter persecutions and cruelty.

Professing christianity, the church had become apostate; separated from the Divine harmony, and really idolatrous, worshipping its own power, and every hurtful lust, and hence was not in a state effectually to evangelize others. The blood of those who thus suffered and died, as from one period to another these were qualified to know the Divine will as applicable to their own souls, did nourish the seed of the *true church*, and by degrees many were enabled to see clearly the prevailing corruption, and to what an extent the cause of truth and righteousness had been prostituted in the name of religion. When George Fox and others who became united to him in his public and private labor, were called to the work of the ministry, the world again heard the glad tidings of the gospel proclaimed in its ancient power and simplicity; and as they were guided in their preaching by the same authority that had wrought sanctification in their own hearts, the effects were marvellously apparent in the awakening produced; the hearts of thousands being effectually reached; that it may be said they were instrumental in reviving in the 17th century in greater fullness, and more abundant fruit, than is recorded of any other people, the work in which the early believers labored so zealously. They were chosen vessels; men and women appointed to plead for the restoration of vital truth, and to open the way in the midst of an arrogant, persecuting church and people, for the incoming of His spiritual kingdom and power. And, as they stood steadfast, and in faithfulness observed the discoveries of the Light which illuminated them, because they did not reject it, but received it with joy and thankfulness, as an infallible Teacher; their preservation in the path of safety; the spread of their principles; their growth in saving knowledge, and in the Christian graces, were indeed remarkable; and they became as a city set upon a hill—a living testimony to the all sufficiency of that grace which came by Christ. Truly they did not follow any cunningly devised fable, for in them was brought forth the peaceable fruits of righteousness.

I have often earnestly desired, that we of the present generation, their successors, and in the possession of many external advantages, the result of their abiding faith, labor

and suffering, might be enabled through renewed extension of Divine favor, to hold up in the face of a backsliding world, the truth as they presented it, in undiminished brightness. We live in a day of great lukewarmness, and there may be causes of deep discouragement; but I believe as we bow to the dispensations laid upon us, and are made willing to give to the fire that which should be burned, we shall in due time be fitted to stand in our places.

Then shall we realize the truth of the passage: "all thy children shall be taught of the Lord, and great shall be the peace of thy children." P. B.

Philadelphia, 2d mo., 1874.

#### The Bermuda Islands.

Within three days' travel from New York it is hardly possible to find so complete a change in government, climate, scenery, and vegetation as Bermuda offers. The voyage may or may not be pleasant, but is sure to be short. The Gulf Stream, which one is obliged to cross, has on many natures a subduing effect, and the sight of land is not generally unwelcome. The delight is intensified by the beauties which are spread out on every hand. The wonderful transparency of the water, the numerous islands, making new pictures at every turn, the shifting lights on the hills, the flowers, which almost hide houses that peep out here and there from their bowers, make up a scene as rare as it is beautiful.

The general direction of the islands is from northeast to southwest. They are in the latitude of Charleston, South Carolina, and the nearest point on the continent is Cape Hatteras, five hundred and eighty miles distant. They are of calcareous formation, "due entirely," says Colonel Nelson, "to the action of the wind in blowing up sand made by the disintegration of coral reefs. They present but one mass of animal remains in various stages of comminution and disintegration. The varieties of rock are irregularly associated, and without any order of superposition. Nearly every shell now known in the surrounding sea may be found in the rock quite perfect except in regard to color. Along the south shore are sand-hills which illustrate the formation of Bermuda. In one instance a cottage had been submerged, trees to the height of several feet, and the sand has ever travelled up a hill one hundred and eighty feet high. Nine miles north of the islands are four needle rocks, apparently the remnant of former islands. They are about ten feet above high-water mark, and vary from four to eight feet in diameter. They are of limestone, and are stratified like the mainland."

There are in all about one hundred islands though it is usually stated that there are three times as many. Not more than sixteen or twenty are inhabited, and of these the five largest are St. David's, St. George's, Bermuda proper, sometimes styled the Continent, Somerset and Ireland. They are about fifteen miles in length, and the greatest breadth is about five miles. There are no mountains, no rivers, and so, while they were without magnificence of scenery, in a quiet sort of beauty they are unique.

There are about one hundred and fifty miles of good hard roads, which are generally free from dust. In many places deep cuttings have been made, and the rock towers above the carriage even. The scenery is exceedingly

turesque, and changes continually. Now drive through wide stretches of country, and the landscape bears a striking resemblance to that of New England; then through narrow road, with high walls of rock on either hand, on the sides of which the maiden-fern grows in profusion, and the road is winding that every new view which bursts suddenly upon you is a surprise; and then there are delightful glimpses of the sea, with many islands. Walls of stone extend along the roadside, and over them clamber the morning glory, the prickly-pear, and the night-coming cereus. Great beds of geraniums, which mock our hot-houses in their profusion, grow wild.

Hedges of oleander line the roads or border cultivated patches of land, protecting them from the high winds which at times sweep over the islands. Thirteen varieties of it are found here, and wherever you go it is one of pink and white blossoms. The lantana also grows wild along all the hedges. The passion flower peeps out from its covert green leaves, creeping up the branches of the trees. The profusion of flowers is wonderful, and one can always have a bouquet for gathering. The winter is the regal time for them. About Christmas the roses, magnificent in size, and of great variety, are all in their glory. One gentleman assured me that he had upward of one hundred and fifty varieties. No great care seems to be taken to cultivate them. Here and there one sees a garden, but nothing that even approaches that might be accomplished with such a soil and climate.

The beauty and variety of flowers are everywhere equalled by the excellence and diversity of fruits. Oranges of superior quality are raised, though their culture is not general. The lemon grows wild. The mango, guava, pawpaw, pomegranate, fig, arceada pear—whose fruits (for they can be called nothing else) come eloquent in its praise—the custard apple, the banana—the lazy man's delight, being its wealth of fruit, and dying as it sheds its single bunch, while the new plants sprouting up about its dead stalk maintain and supply the year round—all these fruits grow very readily, and with due effort would grow abundantly. Apples and pears are raised, but lack the flavor they possess with us. Peaches, heretofore excellent, have been destroyed for two years past by an insect. Strawberries ripen from November till July. Grapes grow luxuriantly.

The most common tree is the Bermudian cedar, with which nearly all the hill-sides are covered. Occasionally one sees the mountain palm, while tamarind, tamarisk, palmetto, coconut, India rubber, mahogany, and calamba trees are quite common. In gardens many West Indian trees are found.—*Harper's Magazine.*

Selected for "The Friend."

#### On Plainness of Apparel, &c.

The Lord taught me that men generally value too much on external performances, and I guarded my mind against thinking too much of any thing outward. He opened my understanding to behold my duty in regard to outward plainness; that a plain, decent, and not costly dress and way of living in all things, was most agreeable to true Christian simplicity and self-denial; that rich, showy, or costly dress, house, food, or furniture, fed and

fostered pride and ostentation, robbed the poor, pleased the vain, and led into a great deal of unnecessary care, toil and solicitude, to obtain the means of this way of life and appearance; that it could not afford any true and solid satisfaction, but must unavoidably divert the mind from inward, feeling watchfulness, retard the work of mortification and true self-denial, and facilitate unprofitable association and acquaintance with such as would rather alienate the affections from God than unite the soul to Him.

Thus instructed, I bowed in reverence; and as it became from time to time necessary to procure new clothing, I endeavored to conform my outward appearance in this respect to the dictates of Truth, in which I found true peace and satisfaction. Also he instructed me to use the plain Scripture language, *thou* to one, and *you* to more than one.

The cross greatly offended me in regard to these things. This of language in particular, looked so trifling and foolish to the worldly-wise part in me, and the fear of the 'world's dread laugh' so powerfully opposed it, that it was very hard and trying to my natural will to give up to this duty. I thought if my right hand would excuse my compliance, I would gladly sacrifice it, or yield it up rather than give up to use such a despised language, and submit to be laughed at; as viewing religion concerned in such things as these. This may seem incredible to some, but it is true, and as fresh with me as almost any past exercise.

This exercise beset me day and night for some time, during which I shed many sorrowful and bitter tears, pleaded many excuses, and greatly wished some substitute might be accepted instead of the thing called for; but He who called me into the performance of these foolish things—*foolish to this world's wisdom*—was graciously pleased to show me, with indubitable clearness, that he would choose his sacrifice himself; and that neither a right hand nor a right eye, neither thousands of rams, nor ten thousands of rivers of oil, would by any means answer instead of his requirings. If he called for so weak or foolish a thing as the words *thou* and *thee* to a single person, instead of *you*, nothing else of my substituting would do instead of it; for 'the foolishness of God is wiser than men.'

Let none dispute the ground with Omnipotence, nor confer with flesh and blood, lest *therein, despising the day of small things, they fall by little and little.* For be assured, O thou called of the Lord! thou canst never become his *chosen*, unless thou obey his call, and come out of all he calls thee from. If thou art not *faithful in the little*, thou wilt not be made *ruler over much.*

Perhaps few will believe the fulness of heavenly joy which sprang in my bosom, as a well-spring of living waters, after my giving up in faithfulness to his requisition.—*Job Scott.*

Samuel Fothergill, in enlarging upon the love and unity, which ought to subsist among brethren, remarks, how cautious ought we to be of saying any thing detracting, one of another, or saying "Report," say they, "and we will report it." And how great ought to be the care on the minds of Friends, lest at any time they should be led to speak, in any way, to lessen an elder, minister or overseer, or any others before their children; and of what hurtful consequence such conduct might be to the

youth in fixing prejudices in their minds that could not be easily removed; so he would have Friends keep to that wisdom which is from above. He much desired that all such feelings might not have any place, and that none might give way to such a spirit, but be willing to suffer rather than contend, this was the true way to live in peace.

## THE FRIEND.

THIRD MONTH 7, 1874.

Having received several letters within a short time, written by Friends in different parts of our widely extended Society, in this country and in England, expressing the writers' satisfaction with the course pursued in our journal, for upholding the original principles and practices of Friends, and desiring the encouragement of those conducting it, we feel it right, in this way, to express our gratification at these evidences of unity of feeling, and to assure our friends their communications are fully appreciated.

Two, express much concern as to the course that should be pursued under circumstances which render it evident that the meetings they are connected with, have widely departed from the principles and testimonies of Friends, and have introduced reading the Scriptures or singing psalms or hymns, when assembled for divine worship.

While we believe that those who are in the practice of those things have no valid claim to the character or name of Friends, yet we apprehend the time has not come, when those who adhere to the doctrines and testimonies which Friends have ever held, and who alone are the true Society of Friends, are prepared to determine what further the Head of the church requires at their hands. If all who are groaning under these afflictions are but willing to bear their testimony against these defections openly and faithfully, as well as to seek for ability to suffer patiently, we believe they may rest assured that in his own time the Lord will make a way for the relief and upbuilding, of the few or the many who dare not compromise primitive Christianity, as it was republished by Fox, Barclay and Penn. He will preserve a seed that shall be counted unto Him for a generation, and Quakerism in its ancient purity will yet be set upon a hill, so that it cannot be hid; and those who see it, and are now saying it has been carried captive and despoiled of its former gospel characteristics, will have to acknowledge that it remains upon the foundation, against which the gates of hell cannot prevail, and it will once more prove the blessing it was designed to be, by Him who raised it up; for, to use the words of Francis Howgill, "The memorial of this nation [Friends] which is holy unto me, shall never be rooted out, but shall live through ages as a cloud of witnesses in generations to come."

Some who have kindly sent us contributions in prose or verse, or made selections for our columns, may feel disappointed that they have not been published. But our rule is positive that the name of the author of an original article must be communicated. Most of the selections have been in "The Friend" before.

## SUMMARY OF EVENTS.

**FOREIGN.**—A London dispatch of the 28th ult. says: The trial of the Tichborne claimant on the charge of perjury, committed during the trial for the possession of the estate, which has been in progress for upwards of one hundred and eighty days, was brought to a close this morning, and resulted in the conviction of the accused.

The jury, after being out a short time, brought in a verdict of guilty on all the charges, and the claimant was sentenced to fourteen years penal servitude. After the verdict was announced the claimant expressed a desire to address the court, but the Lord Chief Justice refused permission. He was taken from the court room by a seldom used exit, placed in a carriage, and rapidly driven to Newgate, much to the disappointment of an immense crowd which had gathered outside to see him pass.

The first intelligence announcing the success of the expedition against the Ashantees and the capture of Coomassie, &c., was incorrect. Reports soon after reached England of disaster and defeat, causing grave fears for the safety of the British army, which were not dispelled until the War Office received the following dispatch from General Wolseley: "Coomassie, Feb. 5, 1874—We reached here yesterday after five days' hard fighting. The troops behaved admirably. Our casualties are under three hundred. The king has left the town, but is close by. He promises to visit me to-day and sign a treaty of peace. We hope to start on our return to the coast to-morrow. The wounded are recovering, and the health of the remainder of the army is good." The Queen and her ministry have sent dispatches to General Wolseley congratulating him on his success.

The Company which issued proposals a few weeks ago for laying a light telegraph cable between England and America, has abandoned the enterprise because of the scanty support, and gives notice that the money deposited by the subscribers to its stock will be returned on demand.

A correspondent of the London News, in a letter to that paper descriptive of the Indian famine, says: "The scarcity spreads over a wide tract along the foot of the Himalaya boundaries of Nepal, stretching from Oude to near Darjeeling, remote districts removed from the railroads and other means of communication, and difficult of approach. Lord Northbrook informs me that the most serious distress is threatened in fifteen districts in addition to the Texas, comprising a total population of 26,000,000. It is however impossible to ascertain the exact condition of affairs. The absence of railroads in the remote districts is a serious disadvantage.

The bark Grace Darling, went ashore on the coast of Scotland, near Aberdeen, during the late gales, and became a wreck. The crew took to the rigging, but fifteen of them were washed off and drowned. Four men belonging to the life-saving station, who went to the rescue of the wrecked men, also lost their lives.

A terrific boiler explosion occurred on the 2d inst. at Blackburn, Lancashire. Twenty persons were instantly killed and thirty injured, many of them fatally.

London, 3rd mo. 2d.—Consols 92. U. S. five per cents, 103½.

Liverpool.—Uplands cotton, 7½d.; Orleans, 8½d.

The last advices from Madrid announce the failure of the attempt to relieve Bilbao, which for some time has been besieged by the Carlists. The Republican army under General Moriones, made successive attacks on the Carlist force before the city, and was repulsed each time. He informs the War Office that he had been unable to force the Carlists from their entrenchments, and that his own advance line has been broken by the insurgents. He asks for reinforcements and the appointment of his successor.

General Moriones army is said to have lost three thousand men in killed and wounded.

The fall of Bilbao is considered imminent. Typhus fever and small pox prevail in the city.

The Carlists have captured several small towns in Biscay.

Marshal Serrano has been declared President of the Republic of Spain, and General Zabala President of the Council of Ministry.

President Serrano and Admiral Topete, Minister of Marine, have left Madrid for the north. Zabala will act as President during Serrano's absence.

A Bayonne dispatch of the 2d says, a dispatch has been received by the Carlist Junta here, reporting that Bilbao has surrendered to the Royalists. Further serious defeats of the Republican forces are announced.

Thiers, ex-President of France, in a letter to a Republican candidate for the Assembly, declares that experience has rendered his conviction invincible that a

republic is the only possible government for France. This declaration gives great satisfaction to the members of the Left, and it was warmly expressed when Thiers the following day entered the Assembly.

The sale of the Conservative Republican journal, the Nineteenth Century, has been prohibited, because of the publication in its columns of an article insulting to Buffet, the President of the National Assembly.

The Berlin journals publish the result of a census taken last year of all the live stock in Prussia. There were in the country 2,970,946 families or private individuals possessing animals of some kind. These consisted of 2,278,724 horses, 934 mules, 8774 asses, 8,012,150 horned cattle, 19,624,758 sheep, 4,278,531 hogs, 1,477,335 goats, and 1,453,764 hives of bees.

Articles of agreement, which go into effect the 18th of Fifth mo. next, have been entered into between Switzerland and the United States, providing for an interchange of postal cards between the two countries, at the rate of two cents for the United States, and ten centimes for Switzerland—postage to be invariably pre-paid.

There was a serious fire in Panama on the 19th ult., which consumed a large part of the city. The loss is estimated at about one million of dollars, mostly insured in London.

It is stated that there are 30,000 workmen out of employ in Vienna. They appeal to the government for some measures of relief.

According to the Russian Railway Gazette, 287 persons were killed and 356 injured on the railroads of that country in 1873. Most of the accidents are attributed to the carelessness of the sufferers.

Ledru Rollin has been elected to the National Assembly, to fill a vacancy, by a large majority.

Dispatches have been received at the Indian office, London, from the Lieutenant Governor of Bengal, giving an alarming account of the condition of things in that presidency. He says fully one million of persons are starving to death, and all the poorer classes are beginning to feel the want of food.

UNITED STATES.—The deaths in New York last week were 487.

The interments in Philadelphia last week numbered 358, including 115 under two years.

According to the returns made to the Health Office, there were 18,702 births in Philadelphia in 1873, viz: 9,845 males and 8,857 females. The number of marriages registered during the year was 7,891. The total number of interments in the city during the year was 16,736. The record of deaths is believed to be nearly accurate, but in that of births and marriages there is probably a considerable deficiency. The principal causes of death were: Apoplexy, 279; cancer, 268; cerebro spinal meningitis, 246; consumption, 2291; cholera infantum, 1114; cholera morbus, 67; convulsions, 682; croup, 200; diphtheria, 110; scarlet fever, 319. An examination of the various tables appended to the report shows that during the years of the rebellion—1862, 1863, 1864—the deaths exceeded the births, thus showing the disastrous effects war has upon the natural increase of the population.

The mean temperature of the Second month, by the Pennsylvania Hospital record, was 33.75 deg., the highest during the month 72 deg., and the lowest 12 deg. The amount of rain 2.82 inches.

The average of the mean temperature of the Second month, for the past 85 years, is stated to be 30.85 deg., the highest during that entire period was 41.03 deg. in 1857, the lowest 24 deg. in 1815.

The mean temperature of the three winter months of 1873 and 1874, has been 36.38 deg., which is nearly 5 deg. above the average for the preceding 84 years.

A new census of Richmond, Virginia, has just been taken by the local authorities, and shows the population of the city to be 60,705, or about 9,000 more than in 1870. Galveston, Texas, has now a population of 34,350.

During the year 1873, the production of iron and steel rails in the United States was 850,000 tons, and the importations were 185,702 tons, making a total supply of 1,035,702 tons, which is much less than for the preceding year. But railroad construction was not as active in 1873 as in 1872, because of the difficulty of raising money for new works, and because of the entire prostration of railroad interests for the last four months of the year.

The public debt of the United States on the first inst., less cash in the Treasury, was \$2,154,880,067, having decreased \$2,590,047 during the preceding month.

**The Markets, &c.**—The following were the quotations on the 2d inst. *New York*.—American gold, 112½. U. S. sixes, 1881, 119½; ditto, 1868, 118½; ditto, 10-40, 5 per cents, 112½. Superfine flour, \$5.85 a \$6.10; State extra, \$6.40 a \$6.65; finer brands, \$7 a \$10.75. No. 1

Chicago spring wheat, \$1.54; No. 2 do., \$1.48 a \$1.52 red western, \$1.60 a \$1.62; white Michigan, \$1.75 a \$1.85. Oats, 60 a 63 cts. Rye, 95 a \$1. Western mixed corn, 76 a 79 cts.; yellow, 80 a \$1 cts. *Philadelphia*.—Cotton, 16 a 16½ cts. for middlings. Superfine flour, \$5 a \$5.38; extra, \$6.50 a \$7; finer brands, \$7 a \$10.25. Red wheat, \$1.60 a \$1.65; amber, \$1.72 a \$1.73. Rye, 90 cts. Oats, 58 a 62 cts. Yellow corn 74 a 75 cts. About 1600 beef cattle sold at the Avenue Drove-yard, extra at 7½ a 7¾ cts. per lb. gross; fair good, 6½ a 7 cts., and common, 5 a 5½ cts. Sheep so at 5 a 7½ cts. per lb. gross and hogs at \$8.50 a \$9 per lb. net. *Chicago*.—No. 1 spring wheat, \$1.21½; No. do., \$1.18½; No. 3 do., \$1.14. Corn, 59 cts. No. do., 43 cts. Rye, 85 cts. No. 2 spring barley, \$1.4 Lard, \$8.45 a \$8.70 per 100 lb.

## ANNUAL MEETING OF THE CONTRIBUTORS TO THE ASYLUM.

A Stated Annual Meeting of the "Contributors to the Asylum for the Relief of Persons Deprived of the Use of their Reason," will be held on Fourth-day, the 18th of Third month, 1874, at 3 o'clock, P. M., at Ar Street Meeting-house, Philadelphia.

WILLIAM BETTLE, Clerk.

## FRIENDS' FREEDMEN'S ASSOCIATION.

With nineteen schools in N. Carolina and Virginia in successful operation, and 2193 scholars in attendance involving an expense of \$1,000 per month for the next three months, the Association has but a small amount in its treasury. We commend the subject to the serious attention of Friends.

RICHARD CADBURY, Treasurer.

JAMES E. RHOADS, Pres't of Executive Board.  
Philadelphia, 2d mo. 13th, 1874.

## WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of the Institution are expected to be vacated at the close of the Winter Session, in the 4th month next, Friends who may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee.

Nathaniel N. Stokes, Cinnaminson Post-office  
Burlington Co., N. J.

Charles Evans, No. 702 Race St., Philadelphia.

Deborah Rhoads, Haddonfield, N. J.

Rebecca S. Allen, No. 335 S. Fifth St., Philad.

## FRIENDS' BOARDING SCHOOL FOR INDIA CHILDREN, TUNESASSA, NEW YORK.

A teacher of the school will be wanted at the commencement of the Spring term. Also a Friend to act as assistant matron.

Application may be made to

Ebenezer Worth, Marshallton, Chester Co., Pa.

Joseph Scattergood, 413 Spruce St., Philad.

Aaron Sharpless, Street Road P. O., Ches.

Co., Pa.

Thomas Wistar, Fox Chase P. O., Philad.

## FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia.  
Physician and Superintendent—JOSHUA H. WORTINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, at his father's residence, in Cherokee county, Kansas, Fifth mo. 10th, 1873, ADDISON CARTER, son of Milton and Louisa Ann Carter, aged nearly twenty years, a member of Spring River Monthly Meeting Friends. This young Friend by his many virtues, endeared himself to a large circle of relatives and acquaintances. Endowed with good abilities, he was anxious to improve his time and talents to the honor of his Creator, and willingly imparted to others whatever knowledge he obtained by making good use of spare moments. In the early part of his illness, suffering at times was very great, but he bore it with much patience and Christian resignation. For some time previous to, and during his illness, his mind seemed more than usually occupied with Heavenly things, saying, shortly before his departure "I want to go home." He is greatly missed from the circle in which he moved in a very exemplary manner, but his friends and relatives have the comforting assurance that his end was peace.

—, in this city, on the 24th of Eighth mo. 18. JOSHUA P. EDGE, in the 66th year of his age, an exemplary member of the Monthly Meeting of Friends of Philadelphia.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, THIRD MONTH 14, 1874.

NO. 30.

PUBLISHED WEEKLY.

Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

NO. 116 NORTH FOURTH STREET, UP STAIRS,  
PHILADELPHIA.

Single copies, when paid quarterly in advance, five cents.

## Herrnhut and the Moravians.

The following notices of the first settlement of the "United Brethren" at Herrnhut, taken from Walter White's Travels in Saxony, Bohemia and Silesia.

When the sanguinary Hussite wars ended and the triumph of the Jesuits, there remained in Bohemia and Moravia numbers of godly-minded Protestants, who, as the oppressor grew in strength, were forbidden the free exercise of their religion. They worshipped by stealth, hiding in caves and thickets, and suffered frightful persecution; but remained steadfast, and formed a union among themselves for mutual succor, and became the United Brethren. Their chief settlements were at Fulneck, in Moravia, and Lititz, in Bohemia. Though professing the principles of the earliest Christian church, many of them embraced the doctrines of Luther and Calvin, whereby they subjected themselves to aggravated persecutions; and cruelly were they visited by the calamities of the thirty year's war.

About 1710 a Roman Catholic carpenter set out from the little Moravian village, Semfletha to fulfil his three "wander-years," and gain experience in his trade. While working at Berlin, he frequented the Evangelical Lutheran Church; and afterwards at Gorlitz the impression made on his mind by a Lutheran preacher was such that he went back to his home a Protestant. He was a bringer of good tidings to some of his relatives who were among the persecuted. He could tell them of a kingdom beyond the frontier, where they might worship unmolested; of a youthful Count Zinzendorf, who had large estates in the hill-country of Saxony, and was already known as a benefactor to such as suffered for conscience sake.

It was on Whit-Monday, 1722, that Christian David—so the carpenter was named—brought the news. Three days later, two families, numbering ten persons, abandoned their homes, and under David's guidance came safely to Gorlitz, after a nine days journey. On the 8th of June the four men travelled to Ennersdorf, the residence of Zinzendorf's grandmother, who placed them under charge of the land-steward, with instructions that houses should be built for them. But as the

steward wrote to his master, "the good people seek for the present a place only under which they may creep with wife and children, until houses be set up." After much consideration it was resolved to build on the *Hutberg*, a hill traversed by the road from Laeban to Zittan, then a miserable track, in which vehicles sank to their axles. "God will help," replied the steward to one of his friends, who doubted the finding of water on the spot; and on the two following mornings he rose before the sun and went upon the hill to observe the mists. What he saw led him to believe in the existence of a spring; whereupon he took courage, and, as he tells the Count, "I laid the miseries and desires of these people before the Lord with tears, and besought Him that His hand might be with me, and prevent wherein my intentions were displeasing to Him. Further I said, 'On this place will I build the first house for them in thy name.'"

A temporary residence was found for the fugitives, the benevolent grandmother gave a cow that the children might have milk; and on June 17th the first tree was felled by Christian David. On the 11th of August the house was erected; the preacher at Berthelsdorf took occasion to refer to it as "a light set on the hill to enlighten the whole land," and in October it was taken possession of with prayer and thanksgiving.

The steward, writing about this time to inform the Count of his proceedings, says: "May God bless the work according to His goodness, and procure that your excellency may build on the hill called the *Hutberg*, a city which not only may stand under the *Herrnhut* (Lord's protection), but all dwellers upon the *Lord's watch*, so that day and night there be no silence among them." Here we have the origin of the name of the place.

Meanwhile the neighborhood laughed and joked about the building of a house in so lonely a spot, where it must soon perish; and still more when the digging for the spring was commenced. The land-steward had much ado to keep the laborers to their work. Fourteen days did they dig in vain; but in the third week they came to moist gravel, and soon after water streamed forth in superabundance.

In the next year, Christian David journeyed twice into Moravia. The priests, angered at the departure of the first party, had worried their relatives, and forbade them to emigrate under penalty of imprisonment; they would not let them live in peace at home, nor let them go. Aided, however, by the messenger, twenty-six persons forsook their little possessions, their all, and stole away by night. "Goods left behind," says the historian, "but faith in their Father in the heart." They reached the asylum, where, by the spring of 1724 five new houses were ready to receive them.

In this year came other fugitives, experienced in the church discipline of the old

Moravian Brethren; and as the number yet increased, they besought the Count to institute the same constitution and discipline in Herrnhut. But differences of opinion arose, and for three years the harmony and permanence of the colony were seriously endangered. The Count, however, was not a man to shrink from a good work; he was remarkable for his power of influencing minds; and on the 12th of May, 1727, after a three hours' discourse, he succeeded in reconciling all differences, and the Reformed Evangelical United Brotherhood of the Augsburg Confession was established. This day, as well as the 13th of August of the same year, when the whole community renewed and confirmed their union in the church at Berthelsdorf, are days never to be forgotten by the Brethren.

The success of Herrnhut was now secure. The number of residents had increased to three hundred, of whom one half were fugitives from Moravia. But they had still to endure privation; for they had abandoned all their worldly substance, and trade and tillage advanced but slowly; in the first six months, all that the two cutlers took from the passers by was but two pence. Friedrich von Watleville, however, a much beloved friend of Count Zinzendorf's, took a room in one of the houses that he might live among the struggling people, and help them in their endeavors.

Of the thirty-four small houses which then stood on both sides of the Zittan road, not one now remains. In their place large and handsome houses of brick have risen, which, though the place be but a village, give it the appearance of a city. An ample supply of water is brought in by wooden pipes, and two engines and eight cisterns in different quarters, are always ready against fire. There are covered stalls for the sale of meat and vegetables; a common wash-house and wood-yard and other buildings for the general accommodation. An almoner is appointed to succor indigent strangers. In 1852 he relieved 3668 tramping journeymen.

Year by year the Herrnhuters improved in circumstances, though often at hard strife with penury. However, they preferred hunger, with freedom of conscience, to the tender mercies of the Jesuits at Olmutz. The seven years' war, that brought misery to so many places, worked favorably for Herrnhut. Austrians and Prussians—fierce foes—rode alternately to buy shoes and other articles produced by the industrious villagers; and while Herrnhut flourished, many erroneous notions which had prevailed concerning it were removed by what the visitors saw of the simple life and manners of the brethren. So much was the shoes and other fabrics of the brethren in request, that it sometimes happened that from 1500 to 2000 dollars were received in one day.

To Abraham Dürninger, who established a manufactory of linen cloths, and whose skill and enterprise were only matched by his cease-

less activity, the colony owed the main stay of its commercial prosperity. Brother Düninger's linen and woven goods were largely exported, particularly to Spain, South America and the West Indies, and esteemed above all others in the market for the excellence of their quality. The trade has since fallen off, but not the reputation, as gold and silver medals awarded to the Herrnhuters by the governments of Prussia and Saxony for honest workmanship amply testify.

In 1760, notwithstanding that many colonies and missions had been sent out, the population numbered 1200. This was the highest. The number remained stationary until the end of the century; since then it has slowly decreased, owing, as is said, to the decline of trade. In 1852 it was 925. No new buildings have been erected since 1805, so that Herrnhut has the appearance of a place completely finished. The streets were paved, and flagged footways laid down, eighty years ago; and since 1810, all the roads leading from the village have been planted and kept in good condition.

Well-managed elementary schools supply all that is needful for ordinary education. Pupils who exhibit capabilities for higher training are sent to the school at Nisky, a village built by Bohemian refugees, near Gortitz. Theological students are trained at the seminary in Guadenfeld, in the principality of Oppeln; and those for the missions at Klein Welke, a village near Budisson.

Fifty-seven Moravian settlements and societies in different parts of the continent of Europe, Russia, Sweden, Holland, Germany, some founded by emigrants from Herrnhut, and all taking it for their pattern, mark the growth of the principles advocated by the brethren. In England they have eleven settlements, among which Fulneck, in Yorkshire, renews the name of the old Moravian village; and Oekbrook, in Derbyshire, is the seat of the conference which directs the affairs of the British settlements, but always with responsibility to the Conference of Elders at Berthelsdorf. Scotland has one community and Ireland seven. At the last reckoning in 1848 the number of real members was 16,000.

Besides these, there are seventy foreign mission stations, the duties of which are fulfilled by 297 brethren. The number of persons belonging to the several missions is 70,000. That in North America was commenced in 1734, Greenland 1733, Labrador 1770. The others are in the West Indies, Surinam, South Africa, Australia, &c.

John Heald.

For "The Friend."

(Continued from page 227.)

"12th mo. 17th. In the evening we came to Isaac Wilson's, and had some notice given of a meeting at Pelham. We went to bed as well as usual, but in the night I felt a pain under my left shoulder-blade, which hurt me when I drew a long breath. The meeting began at 2 o'clock. I said, Seek the Lord while He may be found, and call on Him, while He is near. I think it may be inferred from the passage that there is a time He may be found if sought after, and a time that He is near if called upon, and if it is neglected the time may come that He may be far off, and then not to be found. It does then my friends become us to make use of the privilege we are mercifully favored with of calling on the

Lord while He is to be found. If this is neglected, may not a time come, when He may not hear, though we may cry with a loud and bitter cry. Thus I was concerned to warn them of neglect and to invite them timely to attend to their own truest interest; and afterwards to comfort the true mourners, and to encourage to a continued faithful dedication of service.

19th. John Taylor took us in a sleigh to Black Creek. Before we left this place we proceeded to the great Niagara Falls. We stopped awhile to view the stupendous scene, but here I believe description will ever fall short to give an adequate idea of the prospect, so vast a quantity of water falling over an uneven rough rock or rocks, breaking into white foam, resembling snow in huge banks falling down into a deep gulf, in a most awful manner, this being one of the wonders of the world.

20th. We attended Black Creek Meeting, which was thronged with Friends and others. My companion asked the people to consider what they came to meeting for. I followed, saying, Take these things hence. It is written, My Father's house shall be a house of prayer for all people, but ye have made it a den of thieves. I believe there is more similarity between those our Lord reprimanded and many of the worshippers of the present day, than some have apprehended. I then went on to show how the minds of the people were taken up; some with the accumulation of profits, or amusements, or gratifications and delights which the world affords, and these occupy the attention. Is this the acceptable way to perform worship? Will it indeed be pleasing to Him who sees the disposition of the heart as it really is? for the most secret disposition thereof is not hid from Him. Know ye not that your body is the temple of the living God, and whoso defileth the temple of God, him will God destroy. But the heart is the place of prayer, and no true worship is performed without the heart and mind being engaged in it; and if these are otherwise employed and worldly delights take up the attention, should not these things be taken home, and should not the most solemn attention be devoted to the performance of the most solemn act, that the mind of man is capable of being engaged in?

The minds of the people became weighty, and I secretly thanked God before the meeting closed, which took place soon after I had requested them not to lay waste the sense of good on their minds by going into conversation hastily at the rise of the meeting.

21st. We parted with this kind family and went to the ferry over the Niagara River, just below Lake Erie, but the ice passed down so plentifully that we could not get over. So we returned to Black Creek to the house of Daniel Pound, near the lake. We rode along side of this great water, and are now where we can hear the roaring of the water like the sea.

They succeeded with some difficulty in crossing into New York State on the 23d, and on the 25th had an appointed meeting, in which sincere, heartfelt religion was earnestly recommended, and those present were pressingly entreated not to trust to that which is insufficient—the language of our Saviour being revived, "Whosoever heareth these sayings of mine and doeth them, I will liken him to a wise man," &c.

26th. At a meeting called Boston, J. F. felt an exercise on account of some dissipated practices. He spoke of the great bodily pain to which we are liable, and that few go out of the world without considerable of it. We knew not when the painful trial would come to us, and though the pain of the body might be great, yet the distress of the mind might be much greater because of our attachment to dissipation and folly. These may so far have gained the attention, as even to engage the mind in meeting in laying plans to accomplish our designs. He queried, what kind of foundation is here being laid up against the time to come, if the mind is drawn away not after living mercies, but lying vanities and vain pursuits. Then when pain assails the body, the mind looks round for help, and no one on earth can deliver. Such often cry for help, who in the time of health care but little whether the Almighty is pleased or displeased. But when the time of adversity overtake they then ask for favor. Such who have slighted the Lord and His cause often find under condemnation and lie down in sorrow while the mourners mourn for them.

He also encouraged the true mourners to wait on the Lord; those who under a living concern are brought to mourn on account of their doings; reviving for their encouragement the blessing pronounced by our Lord and Saviour, "Blessed are they that mourn for the shall be comforted."

"27th. Being First-day, we set out for Concord, ten miles or more. The Friend who went to conduct us not coming in time, we went on several miles before he overtook us, and with smart riding reached the meeting time. My lot was in exercised silence, though just at the close I said, I believe if there is an anxious a desire in some to improve, as the has been to hear testimony, an amendment will soon take place. My mind was deep exercised, and I believed I had best keep it myself, which I did, though pained under sense of a strong carnal desire to hear.

30th. Was at the Monthly Meeting, in which I had some service in the men's meeting, at a short testimony near the close in women's meeting. They conducted their business, thought, carefully. My companion informed the meeting, near the close of it, that he had a prospect of returning peacefully home from here; but I concluded I could see nothing of it. If he could go, he might; but I could not go and leave the concern in the situation then was, so I thought I must keep to my work, whether he staid or not; and desired the Friend to send word to a certain neighborhood that I intended to meet with them tomorrow at 11 o'clock, and the day following at Willink.

31st. My companion did not find himself so clear as he thought he was, so he went with me to the meeting, which was held in dwelling-house. It was some time before found my way open to speak, but when it did I have seldom known it to flow more like a river. I thought it was a good meeting, and said to them; that if they were faithful some of them would be prepared in a more eminent manner to stand for the dignity of the righteous cause, than they now expected.

1st mo. 3d, 1819. Went to Hamburg, a notice being spread, we had a full, crowded meeting. My companion and several others made short statements, and he three or four times, but I was silent until I thought it was

early time for the meeting to end. I had under much constant exercise for an hour more, and found no way to be released, and felt, I believed, the strong and anxious wishes of the people to hear words. Though I felt that which might have been profitable to them, had they been inward and not outward in their views, I waited until the time was far spent. I felt at liberty, and believed I would be easiest to remark to them, in regard to their great earnestness to [hear], and it might not only to have it to say they had heard such one, then perhaps they would be like some children I had seen, who applied to a parent for food, and even cried for it; and when it was furnished to them, though a piece of what they cried for, because it was not just such as they chose, they threw it away, and in the perverseness of their wills would not have it. One of the sayings of Solomon occurs to my mind; Seest thou a man wise in his own conceit, there is more hope of a fool than of him. And again, Better is a poor and wise child, than an old and foolish king, that will not more be admonished. Perhaps some are not willing to have this, though they may have wanted to have something, and thus are like in disposition to perverse children, crying for it and throwing it away and not improving it."

J. H. entered into other subjects on this occasion, and in the conclusion of his account, remarks: "I felt clear, and I believe the people satisfied." He thus continues his journal: "We dined at David Eddy's, and some friends being concerned to visit a family the way we were going, desired us to call with them. I had no objection. We sat down and felt poor. My companion expressed a few sentences, and two others did the like. The last mentioned the parable of the ten virgins. After him, I took that part concerning the foolish ones. They appeared to have time as well as the others, and a desire too, when the side-groom came, to enter with him into the chamber. While they went to procure oil, the door was shut, and afterwards they came crying, Lord, Lord, open unto us, but He said, I depart from me, I know you not. So they were not admitted. Remember death, and do not forget judgment. Many in our day and mine, whose cheeks bear the bloom of health, are desirous of admittance into rest, but like the foolish virgins do not prepare, do not get to readiness, but settle down in supineness and ease; and how involved in distress and sorrow some have been because of their inattention. I found after that Friends were taking this opportunity to reclaim one from the principles of Universalism, of which I had not been informed."

(To be continued.)

For "The Friend."

### Animal Character.

(Continued from page 227.)

#### THE DOG.

When the theory of selection has done its worst, I still cling to the belief that the relation between dog and man was as much foreseen and intended as that between sun and planet. Man has succeeded in domesticating several other animals, but where else has he found a spirit of unconquerable fidelity? It has not been developed by kind treatment, it has not even been sought for in itself, or made an aim in breeding. Ladies make pets of their dogs, but all the shepherds I see around me

pay them in kicks, and curses, and starvation. What does the obscure member of a pack of foxhounds know of his master's love? If these poor animals had not been made to love us, what excellent reasons they would have had for hating us! Their love has not been developed by care and culture, like the nourishing ears of wheat; but it rises like warm, natural springs, where man has done nothing either to obtain them or to deserve them.

There are thousands of anecdotes illustrating the wonderful affection which dogs bear to their masters, and as the world goes on thousands of other examples will be recorded, but no one will ever know the full marvel of that immense love and devotion. It is inexhaustible, like the beauty of what is most beautiful in nature, like the glory of sunset and the rich abundance of that natural loveliness which poets and artists can never quite reveal. We do not know the depth of it even in the dogs we have always with us. I have one who is neither so intelligent nor so affectionate as others I have known, and to my human ignorance it seemed that he did not love me very much. But once, when I had been away for weeks, his melancholy longing, of which he had said nothing to anybody, burst out in a great passionate crisis. He howled and clamored for admission into my dressing-room, pulled down my old things from their pegs, dragged them into a corner, and flung himself upon them, wailing long and wildly where he lay, till a superstitious fear came on all the house like the forerunner of evil tidings. Who can tell what long broodings, unexpressed, had preceded this passionate outburst? Many a dark hour had he passed in silent desolation, wondering at that inexplicable absence, till at length the need for me became so urgent that he must touch some cloth that I had worn.

So great is their power of loving that we cannot help assigning to dogs—not formally, but in our inward estimates—a place distinct from the brute creation generally. They are not mere animals, like sheep and oxen, that may be slaughtered as a matter of ordinary business without awakening regret. To kill a dog is always felt to be a sort of murder; it is the destruction of a beautiful though not immortal spirit, and the destruction is the more lamentable for its very completeness. When I was a boy I remember crossing a stream in Lancashire just as a workman came to the same place followed by a sharp-looking little brown terrier dog. It went snuffing about under the roots as such little dogs will, and then the man whistled and it came to him at full speed. He caressed it, spoke to it very kindly but very sadly, and then began to tie a great stone to its neck. 'What are you doing that for?' I asked. 'Because I cannot afford to pay the dog-tax, and nobody else shall have my little Jip.' Then he threw it into the stream. The water was not deep, and it was perfectly clear, so that we saw the painful struggles of the poor little terrier till it became insensible, and we were both fixed to the spot by a sort of fascination. At last the man turned away with a pale hard face, suffering, in that moment, more than he cared to show, and I went my way carrying with me an impression which is even now as strong as ever it was.

It is said that every dog is an aristocrat, because rich men's dogs cannot endure beggars and their rags, and are civil only to well-

dressed visitors. But the truth is that, from sympathy with his master, the dog always sees humanity very much from his master's point of view. The poor man's dog does not dislike the poor. I may go much farther than this, and venture to assert that a dog who has lived with you for years will make the same distinction between your visitors that you make yourself, inwardly, notwithstanding the apparent uniformity of your outward politeness. My dog is very civil to people I like, but he is savage to those I dislike, whatever the tailor may have done to lend them external charms. I know not how he discovers these differences in my feelings, except it be by overhearing remarks when the guests are gone. Without giving the reins to imagination, it may be presumed that some dogs know at least the names of different people, and may take note of the manner, cordial or otherwise, in which we pronounce them. Whatever they may know of spoken language, it is quite clear that they understand the language of manner, and have a very delicate appreciation of human behavior.

Dogs possess, in a much higher degree than man, the power of storing up energy in times of repose, and keeping it for future use. A dog spends his spare time in absolute rest, and is able to endure great drains of energy on due occasion. He lies idly by the fire, and looks so lazy, that it seems as if nothing could make him stir, yet at a sign from his master he will get up and go anywhere, without hesitation about the distance. In old age dogs know that they have not any longer these great reserves of force, and decline to follow their masters who go out on horseback, but will still gladly follow them on any merely pedestrian excursion, well knowing the narrow limits of human strength and endurance. Dogs in the prime of life accomplish immense distances, not without fatigue, for these efforts exhaust them for the moment, but they have such great recuperative power that they entirely recover by rest. I know a very small dog that was given by his master to a friend who lived sixty miles off. His new proprietor carried him in the inside of a coach; but the next morning the little animal was in his old home again, having found his way across country, and a most fatiguing and bewildering country too, covered with dense forests and steep hills. Has the reader ever observed how much swifter dogs are than their behavior would lead one to imagine? Here is an illustration of what I mean. I know a very rapid coach which is always preceded by a middling-sized dog of no particular breed. Well, this dog amuses itself within a yard of the horses' hoofs, turning round, leaping, looking at other vehicles, snapping at other dogs, barking at its own and other horses, and leading, in a word, exactly the same kind of life as if it were amusing itself in the inn-yard before starting. Now, consider a little the amazing perfection of organization, the readiness and firmness of nerve, required for motions so complicated as these, and the bodily energy, too, necessary to keep them up, not for a few yards, but mile after mile as the coach rattles along the road! One false step, one second of delay, and the dog would be under the hoofs of the horses, yet he plays as children play on the sea-shore before the slowly-advancing tide. With the dog's energy, and a wiser economy of it, a man could run a hundred miles without an interval of rest.

We make use of the delicate faculty of scent possessed by these animals to aid us in the chase, and are so accustomed to rely upon it that its marvellousness escapes attention. But we have no physical faculty so exquisite as this. It is clear that the dog's opinions about odors must be widely different from ours, for he endures very strong smells which to us are simply intolerable, and positively enjoys what we abominate; but as for true delicacy of nerve, which I take to be the power of detecting what is most faint, we cannot presume to the least comparison with him. Every one who has gathered wild plants knows what an immense variety of odors arise from the plants upon the ground—this is the first complication; next upon that (though we cannot detect it) are traced in all directions different lines of scent laid down by the passage of animals and men—this is the second complication. Well, across these labyrinths of misleading or disturbing odors the dog follows the one scent he cares for at the time (notwithstanding its incessant alteration by mixture) as easily as we should follow a scarlet thread on a green field. If he were only sensitive to the one scent he followed, the marvel would be much reduced, but he knows many different odors, and selects amongst them the one that interests him at the time.

In speaking of a power of this kind, possessed by another animal, we are liable to mistakes which proceed from our constant reference to our own human perceptions. We think, for instance, that the odor of thyme is strong, whilst for us the scent left by an animal in its passage may be so faint as to be imperceptible; but scents that are strong for us may be faint for dogs, and *vice versa*. Odors are not positive but relative, they are sensations simply, and the same cause does not produce the same sensation in different organisms. A dog rolls himself on carrion, and unreflecting people think this a proof of a disgustingly bad taste on his part; but it is evident that the carrion gives him a sensation entirely different from that which it produces in ourselves. I know a man who says that to him the odor of any cheese whatever, even the freshest and soundest, is disgusting beyond the power of language to express: is it not evident that cheese produces in him a sensation altogether different from what it causes in most of us? The smell and taste of dogs may be not the less refined and delicate that they differ widely from our own. The cause of the most horrible of all smells in my own experience is a mouse, but the same cause produces, it is probable, an effect altogether different upon the olfactory nerves of cats. These mysteries of sensation, in other beings, are quite unfathomable, and our human theories about delicacy of taste are not worth a moment's attention. The dog is quite as good an authority on these questions as the best of us.

I cannot think that it is very surprising that dogs should remember odors well, since odors so long retain the power of awakening old associations in ourselves. I distinctly remember the odor of every house that was familiar to me in boyhood, and should recognise it at once. In the same way dogs know the scent of a well-known foot-step, even after long separation. An officer returned home after the Franco-German war and did not meet his dog. After his arrival he watched for the dog through the window. He saw it at last in a

state of intense excitement, following his track at full speed, never raising its nostrils from the ground, and then came the joyful meeting—the scent had been recognised from the beginning, even in a much-frequented street.

Innumerable anecdotes might be collected to illustrate the reasoning power of dogs. A certain lawyer, a neighbor of mine, has a dog that guards his money when clients come into the office. There are two or three pieces of furniture, and sometimes it happens that the lawyer puts money into one or another of these, temporarily, the dog always watching him, and guarding that particular piece of furniture where the money lies. In this instance the dog had gradually become aware, from his master's manner, that money was an object of more than ordinary solicitude; in fact, he had been set to guard coin left upon the table.

(To be continued.)

### SORROW.

Selected.

All are not taken; there are left behind  
Living Beloveds, tender looks to bring,  
And make the day-light still a happy thing,  
And tender voices, to make soft the wind.  
But if it were not so—if I could find  
No love in all the world for comforting,  
Nor any path but hollowly did ring,  
Where "dust to dust" the love from life disjoined,  
And if, before those sepulchres unmoving,  
I stood alone (as some forsaken lamb  
Goes bleating up the moors, in weary dearth)  
Crying "Where are ye, O my loved and loving?"  
I know a voice would sound, "Daughter, I Am,  
Can I suffice for Heaven, and not for earth?"

E. B. Browning.

### ART THOU A MOTHER?

Selected.

Art thou a mother? Do thine eyes  
With transport overflow,  
To see thine olive plants arise,  
And round thy table grow?  
It is in truth a lovely sight—  
May it thy bosom fill  
With fond enjoyment and delight,  
And cheer thy dwelling still.

Art thou a mother? Ever bear  
This solemn truth in mind,—  
That thou must for their spirits care,  
Which are by nature blind.  
'Tis right to tend their mortal frames,  
And all their wants supply:  
But ah, their souls have stronger claims,  
For these shall never die.

Art thou a mother? Early teach  
Their infant lips to pray  
To Him, who, 'midst their faltering speech,  
Knows all they wish to say.  
Oh! bring them to the cross betimes,  
For, if the Lord's when young,  
Each life shall then be free from crimes,  
And from deceit each tongue.

Art thou a mother? Daily draw  
(As thou must still impart)  
New lessons from God's holy law  
To purify thy heart.  
Then as they grow in sense and age,  
Thy little ones shall see  
The precepts of the sacred page  
Exemplified in thee.

Art thou a mother? Watch and fear  
To be thyself deceived?  
An error once committed here  
Can never be retrieved.  
The seed that's on the billows tost  
May on some shore be thrown;  
But if a human soul be lost  
It is for ever gone!

Lamb and His followers will have the vic-  
tory!—R. Jordan.

### The Famine in India.

By mail and telegraph, accounts have for some weeks been received concerning the famine in India, where the drought of last summer and autumn has cut off the rice crop which constitutes almost the sole dependent for food of the dense population of the district under the government of the British. Our newspapers of 25th ult., contained the following item transmitted by telegraph, the contemplation of which is sufficient to impress us with the appalling gravity of the situation.

A correspondent of the London News, in a letter to that paper, descriptive of the India famine, says: "The scarcity spreads over a wide tract along the foot of the Himalay boundaries of Nepal, stretching from Oud to near Darjeeling, remote districts removed from the railroads and other means of communication, and difficult of approach. Lord Northbrook informs me that the most serious distress is threatened in fifteen districts in addition to the Teras, comprising a total population of 26,000,000.

"This is not all. Twelve other districts with 14,000,000 people, are threatened, and are described as almost entirely without road and water. The coolies and laborers feel the pinch most, owing to the total suspension of work in the rice fields. The government contemplated, prior to the outbreak of distress certain public works. First, irrigating canals; secondly, the Northern Bengal Railroad; and lastly, the embankment of the Gunduck river. In the first named, 32,600 laborers have been employed. Their wages were paid, and money exchanged for food at the adjacent government store. Lord Northbrook says, the government has arranged for sufficient food till May, with large reserves to meet any contingency.

"The calculations are based on former famines, but it seems doubtful whether they will prove adequate, owing to the fact that in previous famines large numbers died without asking for relief. The district at present is more remote, and transportation is growing difficult for want of food for the cattle."

"From what I have seen since my arrival in India I believe: First. That neither the government nor people can tell the precise actual position, nor prognosticate the future. Secondly. The government is most fully alive to its responsibility, and measures have been taken to fully cope with the difficulties. Thirdly. The absence of railroads in the remote districts is mostly dreaded, as the government is thus without means for the avoidance of grave obstacles."

The London Public Ledger of 11th ult. contains the following telegraphic news dated "Calcutta, February 10th, 1874." "The Allahabad officials draw a startling picture of the distress at Goruckpore. People are alarmed and suffer great privation; starving children are entering the Missionary Orphanage, and the relief works are crowded. Wages are two pence (four cents gold U. S. money) per day, and rice two pence per pound. In North Moorsheadabad the laborers exist on one meal daily. At Behar the price of rice is double the average." The government authorities are apparently doing all in their power to provide work for the needy laborers, in making extensive grants for new improvements to the amount of £261,800. Sir R. Temple is improving the Tirhoot transport; 100,000 la-

ers are employed on the new works, besides those on the railway and canal. Occasionally men of high caste and children, are forced to work on the roads, in order to earn sufficient to keep alive. The mails from Calcutta, bringing news to 1st mo. 23d, have particulars which are of much interest, showing that a population equal to the whole of that of the United States reduced to starvation, and unable to follow their usual avocations of raising crops of rice, hemp, jute, cotton, linseed, indigo, &c., owing to the ground being so thoroughly baked by the intense heat of the sun, and the long continued absence of rain, that planting and cultivation are quite impossible. We can have but a faint idea of the magnitude of the responsibility devolving upon the Bengal Government, which, notwithstanding its excellent intentions and prompt and far-reaching measures (it having early laid by in store-houses 5,000 tons of rice), cannot possibly prevent untold suffering, especially in the remote and out-lying districts where transportation is slow and difficult, even at the best of times. The evil, however, seems likely to result in the permanent improvement of the means of travel and transportation in indirectly promoting the building of new roads, canals and railroads, which will be of great use hereafter. It probably avert to some extent, a repetition of the famine. A prominent mercantile house in Calcutta says, under date of 1st mo. 2d, "1874 will be memorable for generations, as a year of scarcity, if not of absolute famine throughout Bengal; hard times have yet to be experienced during the next nine months, not longer. The present wholesale price of low grade rice in the districts where the famine is severe is four rupees per borzar maund equal to about twenty-two cents for ten pounds (probably the retail price is almost double this),—the average price for many years has been about one and a quarter rupees per maund or about seven cents for ten pounds.

As rice forms the staple food for about one-third of the human race, and in the tropical countries of the Eastern Continent almost the sole food of the great mass of the population, the importance of a failure in the crop cannot be over-estimated. The Burmese port of Rangoon alone, not unfrequently receives, at the time of year the crop is being marketed, 100 tons per day, which is sent far and near wherever is the best market. Calcutta, the great shipping port of Eastern India, exports rice very heavily, the quantity shipped thence averaging for the past ten years about 315,000 tons annually, of which about one-eighth goes to England. But the hungry millions of China and Japan create the largest demand for rice, which their own immense crops are entirely inadequate to supply. In the present year, the home demand in India changes the usual channels of trade, and rice is imported by the Bengal Government (largely from Burmah); not less than 50,000 tons having been brought in up to the 10th ult., besides a decrease in the export of about 45,000 tons for the past year compared with the average as given above. If there are as has been stated, as many as forty millions of people (about one-fifth of the entire population of India) in the districts most seriously affected by the scarcity of food, even the large quantity of 225,000 tons of rice, stored by the authorities, will be a very trifle (only twelve at a half pounds to each person), and we

have seen that over seven months must elapse before the next crop becomes available. The latest news, by telegrams, dated 2d inst., is that one million of the inhabitants are officially reported by the Lieutenant Governor of Bengal, as starving to death in the districts affected, and all the poorer classes are beginning to feel the want of food.

The Indian Office in London, and the whole British nation indeed, are becoming aroused to the alarming aspect of the famine, and to an appreciation of the fact that they are in the presence of one of the most terrible calamities of modern times. No doubt a system of relief will speedily be organized in England headed by the government; this, however complete it may be, cannot by any means cover the whole ground, nor reach many thousands in the remote country in time to prevent untold privation and suffering.

CIVIS.

Philadelphia, 3d mo. 3d, 1874.

P. S. 3d mo. 7th. Since the above was written, the terrible state of affairs in the famine stricken districts is brought more within our comprehension, by the receipt of some statistical particulars by telegraph from Lord Northbrook, the Governor-General of India. It is expected the government will be obliged to maintain 3,000,000 persons for three months; which, on an allowance of one pound per day for each person, will require over 120,000 tons of rice. The expenditures on account of the famine to the end of Second month, are estimated at \$7,500,000, and the number of applicants for labor on the government works, had increased from 15,000 to 30,000 within a week. The relief organization at Calcutta, is working excellently, but it can hardly meet the immense demands which will be made upon the government.

*Death of Polycarp.*—The following account of the last words of this faithful martyr for the testimony of Jesus, is given in Waddington's "History of the Church." Polycarp, bishop of Smyrna, was, it is said, appointed to that office by the Apostle John, and continued faithful to his charge, until his aged limbs were affixed to the stake. "Eighty-six years have I served Christ, and he hath never wronged me," was his reply to the inquisitorial interrogations of the Roman consul; and it will not be out of place here, to transcribe his striking prayer, which has reached us from the pen of one who witnessed his martyrdom.

"Father of thy beloved and blessed Son Jesus Christ, through whom we have knowledge of thee; God of angels and powers and of all creation, and of the whole family of the just who live in thy presence, I thank thee that thou hast thought me worthy of this day and this hour, that I may take part in the number of the martyrs in the cross of Christ for the resurrection of eternal life in the incorruptibility of the Holy Spirit—among whom may I be received in thy presence today, in full and acceptable sacrifice, as thou hast prepared, foreshown, and fulfilled, the faithful and true God. For this, and for everything, I praise thee, I bless thee, through the eternal High Priest, Jesus Christ, thy beloved Son." The martyrdom of Polycarp took place about 166 A. D.

Custom may lead a man into many errors, but it justifies none.

For "The Friend."

### Memoirs and Letters of Sarah Hillman.

(Continued from page 229.)

To her Mother and Sisters.

"Muncey, 7th mo. 9th, 1834.

My dear Mother and Sisters,—Our Heavenly Father has cared for us thus far; has furnished strength equal to the day, and at times when the spring seemed ready to fail, has, in mercy, sent a little help from his holy sanctuary, and renewed our faith and confidence in his sufficiency. How true it is, that His mercy is everlasting; and that His covenant is sure, and his righteousness unto all generations. He numbereth our days, and careth for the little sparrows. Then why should our feeble faith distrust His providence! His word is truth, and he hath said, 'Fear not, little flock, for it is your Father's good pleasure to give you the kingdom.'

Our travel through these parts, though rough, will I humbly hope prove one means of advancing in my own heart the reign of my blessed Redeemer, if no other good is effected by it. We dare not doubt that we are in our right places here, let come of it what may! The query that was addressed by the poor, mournful prophet, 'Seekest thou great things for thyself?' is oft remembered by me, with the command, not to do this; and I am almost ready to add, that to me the promise seems sealed, 'thy life shall be given thee for a prey;' and this is enough. Most earnestly and fervently do I often crave to be more thoroughly cleansed from every defilement of flesh and spirit, to be more willing to suffer for the name and the testimony of my divine Lord, and more worthy to be engaged in advancing His glorious cause and truth in the earth.

Charles Allen is a tender, affectionate, feeling friend and father, and I do feel quite attached to him. He says he feels well satisfied; and thinks if we live to get home, we shall all be glad we have been. It really seems as if it could not be, that we are among a people so ignorant of the law and the testimony, as many back here are, and at the same time are within the limits of our Quarterly Meeting. They appear willing to receive all that apply for admission among us, whether they are convinced of our testimonies or not. Nevertheless there is a true seed here, which I believe shall be accounted a generation for the Lord. Yes, I rejoice in believing there is a precious company of true mourners, having their Father's name written in their foreheads; who have been passed by when the destroying angel was sent forth.

Through mercy this morning at meeting, the little company met were sweetly refreshed by the presence of Him who giveth life; and a little ability was furnished to offer praise, and to ask heavenly blessings. So that now again this evening we have renewed cause to trust in His power for days to come.

I cannot doubt, my beloved mother and sisters, that your reward will be sure, for having so cheerfully resigned poor me to what seems to be my Heavenly Father's business. Though nature does keenly feel the separation, yet sweet will be the reunion when again permitted, should that be his righteous will. And then, when the days of our earthly pilgrimage are ended, what a precious, glorious prospect is it—how sweet the thought—to look forward with a secret, humble hope that we shall be a family in heaven.

And now, my dear sisters, it is in my heart to desire your increased surrender of body, soul and spirit to the direction and government of the Prince of Peace. He has called you, I believe, to come and follow Him; to enter more fully than has as yet been the case, into the work of this day, with the remembrance that the time is short. Lift up your eyes and look upon the fields white unto harvest; and be willing to come to the Fountain that is set open, enter and be healed. Fear not with the fears of the wicked, but attend to the dear Saviour's direction, Come unto me all ye that labor and are heavy laden; take my yoke upon you; and ye shall find rest unto your souls. Ah! His yoke is easy and His burden is light to the willing and obedient ones. May the Shepherd of Israel be your safe convoy through the intricate mazes of this wilderness world; support you by His power; guide you by His counsel; and grant in the riches of His mercy and tender compassion, an abundant entrance into one of those mansions which He hath prepared for all those who love our Lord Jesus Christ in sincerity. That this may be the portion of every one of us prays your affectionate, interested, attached and trembling sister,

S. HILLMAN."

The following P. S. on the same sheet, is from her companion, Regina Shober's hand. It is no doubt addressed to Sarah Hillman's mother: "I have been writing until my head aches, so I can do little more than tell thee, my dear friend, that thy Sarah is certainly better than when we left home; and gets along I have no doubt altogether—however she may feel at times—to her own comfort, and the real comfort and satisfaction of all her friends here. We travel in sweet unity and harmony of feeling from place to place; endeavoring to do the best we can for each other. She is a great deal better and more faithful than I am. Love to all. Thine affectionately,

REGINA."

To her Mother.

"Fishing Creek, 7th mo. 15th, 1834.

My dear Mother,—Arrived here pretty well except my poor back, which last night seemed almost ready to give out owing to our having so much travelling over very rough roads. Nevertheless, through mercy, we have been favored to get thus far without an accident of any kind. At noon we leave this place for Greenwood, and where we had a meeting last First-day afternoon, to visit four families. Then to-morrow we go thirty miles to Berwick to visit two families. Next day return to Catawissa and Roaring Creek, where are three families. And from thence expect to reach Maiden Creek on Seventh-day evening, should nothing unforeseen occur.

\* \* \* I sometimes think this may be the finishing work of thy poor, unworthy child; and that her pilgrim days may be near closing. However that may be, I desire in all things to be able to say, 'Thy will be done.' Full well I know myself to be an unprofitable servant; and mourn many times my unfaithfulness, &c. Yet can humbly acknowledge the goodness and mercy of my good Master during this arduous journey, in renewing my faith from time to time, and granting fresh supplies of strength from day to day; so that I dare not but praise Him for past mercies, and humbly beg for days to come.

Ah! my dear mother and sisters, you know

it is in fear and weakness and trembling, that every step is taken; and that every house we go into is a fresh trial, and requires a fresh anointing. I do most assuredly feel that I need the help and prayers of all who are interested in the spread of the gospel, and in the extension of the reign and government of the dear Redeemer. My fears are great; but I do know the work is not mine; and am helped to believe that He who promised to be with His poor disciples to the end of the world, has never failed to fulfil His promise to those who trusted in him. 'Fear not, worm Jacob,' was sweetly revived in my remembrance, for I will help thee. This comforts and consoles, and enables to make the appeal,

'My fears and doubts and cares,  
Are known, O Lord, to thee;  
Give me but strength to do Thy will,  
And that sufficeth me.'

My poor heart desires strength to *do* as well as *suffer* all that is required, however we may be accounted by the wise of this world! It does seem to me there never was any one so unqualified for such an awful mission; and yet I dare not doubt the coming to have been right, nor that my Heavenly Shepherd has been near at times. Oh! may He continue to be near and support to the end. I feel this moment that I cannot take one step without Him; and that it is truly in vain that Paul plants, or Apollos waters, except He, the great Husbandman, bless the labor, prosper the work, cause the seed to take deep root downward, and bless the springing thereof to the bearing fruit to His own praise.

And now, my dear mother and sisters, with brother T. and sister R., I do most affectionately desire to commend you to the safe keeping of the everlasting Shepherd. May He preserve you by His power through faith unto salvation, is the breathing of your sister in tribulation.

S. HILLMAN."

The language of our dear friend in the just recorded letter, viz: "You know it is in fear and weakness and trembling that every step is taken," &c., is very characteristic of the good old Pilgrim's Progress, rough and slow, but long-tried and sure way to the kingdom of heaven. "Work out your own salvation with fear and trembling," exhorts the apostle. And thereto take away all boasting or presuming, as though we were any thing, he subjoins, "For it is God (as ye are passive) that worketh in you both to will and to do of his own good pleasure." Again to the Corinthians, saith the same Christ-taught scholar: "I was with you in weakness, and in fear, and in much trembling. And my speech and my preaching was not with enticing words of man's wisdom, but in demonstration of the Spirit and of power: that your faith should not stand in the wisdom of men, but in the power of God." "Truly," as said that gifted seer, Isaac Penington on another occasion, "here is man very weak and contemptible (to the unanointed eye;) but God very glorious and powerful." The Lord's covenant was with Levi of life and of peace; and He gave it to him for the fear wherewith he feared Him and was afraid before His name. Is not this fear and trembling way, then, the true way to know His covenant to be with us of life and of peace, and grow in the mysterious life of a once crucified, but now risen and glorified Lord Jesus? Is not this the weakness of God that is stronger than men; and

the foolishness of God that is wiser than men? Is not this the state that the Saviour's grace and strength are specially promised and adapted to—the grace *sufficient* in every time of need, and the strength that is *made perfect* in weakness? Then in the humbling sense of this weakness and nothingness, this childlike fear and trembling state, let us deeply lay the foundation of that quickened, inner life which unknown to "the scribe," "the disputer of this world," "the wise and prudent," is revealed unto babes, being hid with Christ in God. And instead of looking for any change in the self-denying, flesh-abasing discipline of the cross unto the heavenly crown, look rather for that indispensable transformation and renewing *in ourselves* through submission to the all-powerful grace of the Lord Jesus, which reconciles the chastened and subdued heart to the one straight and narrow way that changeth not and leadeth to life. For can the way change when He who *is the way* is eternal, and whose command is, that we should follow His steps? How imperative, moreover to beware, lest the coveted change be only in our unhallowed imagination and effort, without the sanction of the Spirit of Truth—our alone guide into all truth.

(To be continued.)

#### Scientific Notes.

A new street pavement has been tried in San Francisco. It is called "hydro-carbolised brick," and is made of soft, porous bricks boiled in coal-tar, which, it is said, renders them tough and hard. A road-bed is made by levelling the sand and packing it with water. A layer of prepared brick is then laid flatwise, each brick being put in boiling tar as it is put down. This is overlaid by a second course of prepared bricks, put edgewise, each brick dipped as before. The interstices are filled with boiling tar, and the whole covered with a thin layer of screened gravel. The cost is about 37 cents per square foot.

An elaborate report has recently been made by the London City Surveyor on accidents to horses, in an attempt to settle the question as to what was the best pavement for carriage ways. He had notes taken of the number of horses falling on the asphalt, granite and wood-paved road-ways of the city. The following table indicates the average number of miles travelled by a horse before falling on each of these three kinds of pavement—both in dry and wet weather:

Asphalte, . . . . .	223 dry.	192 wet.
Granite, . . . . .	78 "	537 "
Wood, . . . . .	646 "	432 "

The advantages as to safety appear to be very decidedly in favor of wood.

A patent has recently been obtained in England for the preparation of "Savory Australian Meat." The meat is chopped fine, mingled with condiments, dried at a temperature of about 400° Fahr., and then canned in the usual way. The meat thus prepared is said to be excellent in every respect.

Richardson, the Geological Surveyor to the Dominion of Canada, reports in glowing terms of the mineral treasures of Vancouver's Island and the neighborhood. Iron, coal, copper, marble, &c., exist in large quantities. On Texada Island, the iron is in the shape of huge mountains, and of fine quality, while limestone and bituminous coal are found in abundance in the immediate vicinity.

A new biscuit, composed of one-third rye flour, one-third beef reduced to powder, and one-third pulverised sauerkraut, was used by the Russian troops in their recent expedition to Khiva. It is said to have been much resorted to by the soldiers, and to have preserved them in excellent health.

As an illustration of the mildness of the last winter in Great Britain, at a meeting of the Edinburgh Botanical Society, 138 species of flowers were laid on the table, which were sown in the Society's garden on the first day of the year. Thirty-five of these were spring-blooming plants, while the remainder were summer and autumn bloomers not yet dead or killed.

The planting of cinchona in India is, it is stated, proving to be a profitable speculation, partly from the intrinsic benefits conferred by the increased production of the valuable bark. At a recent sale as much as 5s. 9d. per pound was given for a lot of bark. The experiment cost altogether about £70,000, including the expenses of Markham's visits to Peru and India. The annual sales now realize a profit of between four and five thousand pounds, thus yielding a satisfactory interest on the expenditure.

The committee appointed by the Royal Agricultural Society on the potato-disease question, have recommended to the council of the Society, to offer three prizes of £100 each, for disease-proof potatoes. Competitors are to send in a given quantity of their tubers, which the committee will distribute to growers in various parts of the kingdom, and those potatoes which resist the disease the next year, will be tried for two years more. Prizes will also be offered for disease-proof potatoes raised from seed, to compete in 1879.

It is announced from Vienna, that a process for facilitating the fertilization of plants, has proved successful in the botanical gardens there. The process consists simply in touching the end of the pistil—that is, the stigma—in a flower, with a pencil dipped in honey; better, in honey having mixed in it some pollen of the plant to be operated on. A *Tibiscus mexicanus*, which had never yielded fruit, having undergone this treatment, produced quite a large quantity of good seeds. With several fruit trees the process also succeeded. After operating on certain branches only of trees which did not yield fruit, it was found that fruit formed on these, while the branches left in the natural state gave none. The effect, if real, may be explained by supposing that the honey retains the pollen grains on the stigma, and thus favors the formation of a pollen tube, which is indispensable to the fertilization.

Asbestos.—This material, prepared in a peculiar manner for steam-packing, is now most exclusively used for that purpose by the large steam companies in Liverpool. It is manufactured in Glasgow by the "Asbestos Packing Company," and is in great favor with several railway companies for cylinders. The raw material is imported from several of the Western States of America, and also from Italy, where it exists abundantly.

#### A CHEERFUL GIVER.

"Lay up for yourselves Treasures in Heaven."

Jesus loves the cheerful giver,  
And He surely will reward:  
Whosoever giveth freely,  
Only lendeth to the Lord.

*The Birth of an Iceberg.*—It would be impossible, with mere words alone, to convey any adequate idea of the action of this newborn child of the Arctic frosts. Think of a solid lump of ice, a third of a mile deep, and more than half a mile in lateral diameter, hurled, like a mere toy, away into the water, and set to rolling to and fro by the impetus of the act as if it were nature's merest foot-ball; now down one side, until the huge bulk was nearly capsized; then back again; then down the other side once more with the same unresisting force; and so on, up and down, and down and up, swashing to and fro for hours before it comes finally to rest. Picture this, and you will have an image of power not to be seen by the action of any other force upon the earth. The disturbance of the water was inconceivable fine. Waves of enormous magnitude were rolled up with great violence against the glacier, covering it with spray; billows came tearing down the fiord, their progress marked by the crackling and crumbling ice, which was everywhere in a state of the wildest agitation for the space of several miles. Over the smaller icebergs the water broke completely, as if a tempest was piling up the seas and heaving them fiercely against the shore. Then to add still further to the commotion thus occasioned, the great, wallowing iceberg, which was the cause of it all, was dropping fragments from its sides with each oscillation, the reports of the rupture reaching the ear above the general din and clamor.

Other bergs were set in motion by the waves, and these also dropped pieces from their sides; and at last, as if it were the grand finale of the piece—the clash of cymbals and the big bass drum of nature's grand orchestra—a monstrous berg near the middle of the fiord split in two; and, above the sound of breaking waters and falling ice, this last disruption filled the air with a peal that rang among the bergs and crags, and, echoing from hill to hill, died away only in the void beyond the mountain tops, while, to the noisy tune, the icebergs of the fiord danced their wild, ungainly dance upon the waters. It was many hours before this state of wild unrest was succeeded by the calm which had preceded the commencement of it; and when, at length, the iceberg that had been born came quietly to rest, and the other icebergs had ceased their dance upon the troubled sea, and the waves had ceased their lashing, it seemed to me that, in beholding this birth of an iceberg, I had beheld one of the most sublime exhibitions of the great forces of nature. It was, in truth, a convulsion.—*Dr. Hay's Land of Desolation.*

## THE FRIEND.

THIRD MONTH 14, 1874.

There is a certain kind of knowledge which is gained by experience alone; and the acquisition of that experience necessarily requires time and opportunity. Hence the common proverb, that "old heads are not to be looked for on young shoulders." The lesson this teaches or should teach is, that those who have passed over the "slippery paths" of youth, owe it as a duty, to make their experience available for guiding those who are still in those paths, so as to assist in guarding them from their many concealed dangers.

Children are soon sensible, and may be early taught there are two antagonistic principles in them; the one natural, prompting to self-indulgence and sin; the other spiritual, restraining from wrong-doing, and inciting to do that which is right. The former, affording or promising immediate gratification, but succeeded by discontent if not remorse; the latter, requiring the denial of self, but when obeyed, rewarding with lasting peace. The one speaks as with the wisdom of Solomon, "Rejoice, O young man, in thy youth, and let thy heart cheer thee in the days of thy youth; and walk in the ways of thy heart, and in the sight of thine eyes;" while the other, with a wisdom greater than Solomon's, utters the warning voice, "But know thou that for all these things, God will bring thee into judgment. Therefore remove sorrow from thy heart, and put away evil from thy flesh; for childhood and youth are vanity." This implies the doctrine of rewards and punishment, necessarily, from the condition of things in this world, not limited to this life, but reaching forward to the life that is to come.

The religion of Christ represents not only love, light and saving mercy, but equally the crucifixion of the evil propensities, safe guidance through the thickly strewn dangers of existence, and support under afflictions of every kind. The right enjoyment of all these, is inseparably connected with obedience to the measure of Divine Grace which He has bestowed on all, in order to bring them salvation. It is, therefore, of vital importance that the minds of children should be early impressed with these truths, if those who have their training are sincerely concerned they shall secure the blessing of preservation from evil, and press towards the mark of christian perfection in this life, and the eternal reward of the righteous in the world to come.

The education of the young, if rightly conducted, must then rest on a solid foundation of religion and virtue. If it is desired that the after character, shall approximate to the model of the perfect man portrayed in the New Testament, there must be clearly recognized and rightly appreciated, this central governing power of the Grace of God, to mould the whole man to the pattern set, by its enlightening, restraining and transforming influence. The acquisition of knowledge alone, will by no means suffice, for it may be used in the cause of evil, as well as in that of good; and the strength it affords, unless controlled by this supernatural gift, adds, perhaps, as much to the enormity of crime, as, under that control, it contributes to the defense and promotion of virtue.

Were children taught these cardinal christian principles, not only by persuasive precept, but by the more impressive instruction of example, they would not be slow to understand and embrace them, and our seminaries would become not merely schools for obtaining knowledge, but the nurseries of piety. The powerful influence of habit would lend its aid in implanting and applying the principles and practices which make up the christian character; and so far from there being a disposition to shrink from acknowledging our self-denying religion, teachers and pupils would rejoice in its exhibition, from the heartfelt conviction that "The fear of the Lord is the beginning of wisdom, and to depart from evil a good understanding."

Thus while the intellect was being developed,

in the efforts to appropriate the knowledge embodied in the books of study, it would be kept healthy and in rightly directed growth, from the impulse received by obedience to the supernatural Source of christian morals, and the investigations and discoveries of science and philosophy, would be rectified and applied under the influence of that light which emanates from Him who was with God in the beginning, and without whom nothing "was made, that was made."

#### SUMMARY OF EVENTS.

**FOREIGN.**—A dispatch has been received at the War Office, London, from Sir Garnet Wolseley, dated the 7th ult., saying: "Coomassie has been captured and burned. The king has fled. The British troops commenced their return march unhindered." Another dispatch, dated the 9th ult., says: "Ashantee messengers have just arrived requesting a treaty of peace. I will remain with the native troops until the 13th or 14th, to allow time for negotiations." A transport has arrived at St. Vincent with the first detachment of troops of the Ashantee expedition returning to Europe.

Lord Northbrook, Viceroy and Governor General of India, telegraphs to the Indian Office that it is expected the government will be obliged to maintain three millions of people for three months. The expenditures on account of the famine to the end of the second month, are estimated at \$7,500,000.

The new British Parliament assembled on the 5th inst. The opening proceedings in the House of Lords were formal and uninteresting. In the House of Commons a Conservative member proposed that Brand, Speaker of the last House, be declared Speaker of the present House. After eulogistic speeches the motion was carried by an unanimous vote.

Gladstone was most warmly received by the Liberal members when he entered the hall and took a seat on the first opposition bench. The impression that Gladstone has declined the active leadership of the opposition during the coming session is confirmed. The Marquis of Hartington is mentioned as his probable successor.

The search of the cellars of Parliament buildings, which has been customary since the gunpowder plot, was made before the assembling of the Lords and Commons.

It is remarkable that the Lord-Mayor of London, the Lord-Mayor of Dublin, and the Lord-Provost of Edinburgh, have all three been returned to serve in the new Parliament.

Proceedings are about to be instituted against several prominent persons on the charge of entering into a conspiracy to get possession of the Tichborne estate. Charles Orton has made a confession, which is published in the Globe, that the claimant is his own brother.

London, 3rd mo. 9th.—Consols 92. U. S. 5 per cents, 103½.

Liverpool.—Uplands cotton, 7½d.; Orleans, 8½d. Red western spring wheat, 11s. 4d. a 12s. per 100 lbs.

The reported capture of Bilbao by the Carlist forces was premature. At the latest dates it still held out, and the government was making great efforts for its relief. Marshal Serrano had arrived in the vicinity of the besieged city. The total number of Republican troops operating against the Carlists in the north of Spain, is stated to be 65,000. Bilbao is subjected to a constant bombardment from the Carlist batteries.

A Madrid dispatch says: The aggressive movements of the Carlists has served to arouse a feeling on the part of the people to aid the government by all the means in their power to crush the insurrection. Telegrams have been received from provincial authorities offering moral and material support.

The German Federal Council has ordered to be distributed to the States of the Empire, a further installment of 42,000,000 dollars of the French indemnity.

A Berlin dispatch says: In the Reichstag the motion under discussion to deprive the Governor of Alsace of power to declare a state of siege, Bismarck made a strong speech against the motion. He declared that he never expected that Alsace would greet our institutions with applause. Alsace shared the responsibility of the war. The motion was rejected by a vote of 138 to 76.

At Niederplanitz, near Zwickau, in Saxony, a vast bed of coal has been burning for over three hundred years. The ground above this subterranean bed of fire has become thoroughly warmed by this time, and an ingenious gardener has utilized it by planting upon it

a large nursery garden. Here he raises tropical plants of all kinds, with exotic fruits, which flourish with a vigor and luxuriance in the open air that the best forcing-house could not ensure.

A Paris dispatch of the 6th says: An order has been issued by the Minister of the Interior, prohibiting the sale of photographs of Count de Chambord.

In the Assembly, to-day, M. Christophle, Radical, asked why the government tolerated the *Figaro* newspaper, which advised President MacMahon to execute a *coup d'etat*, and treated with so much rigor the *Dix Neuvieme Siecle* for its remarks in regard to the President of the Assembly.

The Duke de Broglie replied that the *Figaro* supported the conservative policy, and had promptly disavowed the objectionable article. In the vote which followed, the Assembly supported the government by a vote of 388 to 311.

The French Academy's postponement in the contemplated reception to Emile Olivier is because he persists in retaining in his inaugural address a eulogy of Emperor Louis Napoleon.

A Berlin dispatch of the 9th says: The arrest of the Bishop of Treves last week caused much excitement among the Catholic population. It was followed to-day by the forcible closing of the Seminary attached to the Bishop's See, in accordance with the decrees of the courts and orders of the government.

Dispatches from General Wolseley were received in London on the 9th, in which he says: No means were left untried to effect a peaceful solution of the campaign. The kings palace was not touched till the last hour, and the troops left Coomassie without one article of plunder. The streams and marshes were swollen by rain, impeding the homeward movement of the troops. Of 34 officers sent out from England, four were killed, seven wounded, and three died of fever.

**UNITED STATES.**—*Miscellaneous.*—The Temperance agitation which commenced recently in the western States continues, and in some places has caused many of the drinking houses to be closed.

In Philadelphia, New York and other cities, where intemperance is a great curse, the public attention has been in measure turned to the need of remedies for the evil. In Philadelphia the law of 1855 prohibiting the sale of all intoxicating drinks on the first day of the week, has for a long time been totally disregarded, the taverns, liquor saloons, &c., being open as usual, and the sales on that day being larger than any other. The number of places where such drinks are sold is very large, amounting, it is stated, to nearly one for every hundred inhabitants of the city. In consequence of earnest representations made to the Mayor, he issued a proclamation on the 7th inst., inviting the citizens to co-operate with the authorities in enforcing the law, and announcing that orders had been issued to the police force to aid in bringing violators of its provisions to justice. On the 8th inst. there was a general observance of the law, there being no outward indications that many of the saloon-keepers were violating it as heretofore.

In New York city last week there were 488 interments.

In Philadelphia last week there were 311 interments, including 53 deaths of consumption and 27 inflammation of the lungs.

According to the report of the chief engineer of the Philadelphia water works, there was a daily average of 38,967,667 gallons pumped at all the works throughout the year 1873. The Fairmount works furnished daily 24,077,029 gallons. The engineer thinks that measures should be taken immediately for a further enlargement of the water supply.

The bill which passed the House of Representatives in relation to the Centennial celebration at Philadelphia, met with much opposition in the U. S. Senate. An amendment instructing the committee on appropriations to report an appropriation not exceeding \$3,000,000 towards defraying the expenses of the Exhibition, was rejected by a decided vote. As amended and referred the bill simply reads: "Be it enacted, &c., That the President be requested to extend a respectful and cordial invitation to the Governors of each one of the United States to be represented and take part in the National Exhibition, to be held in Philadelphia under the auspices of the United States, in the year, 1876." All references to an International Exposition are omitted, and no aid financially is to be expected from the government.

During the last six months 259 illicit distilleries have been suppressed, more than half of which were found in North Carolina and Tennessee.

Millard Fillmore, ex-President of the United States, died in Buffalo, N. Y., on the 8th inst., aged 74 years.

Travel on the Central Pacific Railroad has been temporarily suspended by a heavy fall of snow. On the 9th inst. the snow in Summit Valley lay twenty five feet deep on a level. All the freight trains caught in the snow were of necessity abandoned.

**The Markets, &c.**—The following were the quotations on the 9th inst. *New York.*—American gold, 111 U. S. sixes, 1881, 119 a 119½; ditto, 5-20, 1867, 118½ 119; ditto, 10-40, 5 per cents, 113. Superfine flour \$5.75 a \$6; State extra, \$6.35 a \$6.55; finer brand \$7 a \$10.75. No. 1 Chicago spring wheat, \$1.58; No. 2 do., \$1.53; red western, \$1.65; amber Penna., \$1.74 white Michigan, \$1.80. Oats, 63 a 66 cts. Western mixed corn, 85 a 88 cts. for new, 88 a 89 cts. for old yellow 88 a 89 cts. *Philadelphia.*—Uplands and No. Orleans cotton, 16 a 17 cts. Carolina rice, 8 a 8½ cts. Superfine flour, \$5 a \$5.50; extras, \$6 a \$6.50; fine brands, \$7 a \$10.25. Red wheat, \$1.60 a \$1.65; amber, \$1.70 a \$1.73; white, \$1.78 a \$1.85. Rye, 92 94 cts. Yellow corn, 79 a 81 cts. Oats, 58 a 61 cts. Lard, 9½ a 9½ cts. About 2500 beef cattle sold at the Avenue Drive-yard, extra at 7½ a 7½ cts. per lb. gross fair to good, 6 a 7 cts., and common, 4½ a 5½ cts. Sheep sold at 5½ a 7½ cts. per lb. gross, and hogs at \$8.25 \$8.37 per 100 lb. net for corn fed. *Baltimore.*—Choi white wheat, \$1.80; Penna. red, \$1.67 a \$1.72; Oh and Indiana, \$1.56; spring, \$1.45 a \$1.55. Western mixed corn, 81 a 83 cts.; yellow, 78 a 80 cts. Oats, 59 cts. *Chicago.*—Spring extra flour, \$5.50 a \$5.7 No. 1 spring wheat, \$1.24; No. 2 do., \$1.21½; No. do., \$1.16. No. 2 mixed corn, 63 cts. No. 2 oats, 49 cts. Rye, 86 cts. Spring barley, \$1.38 a \$1.52. *Louis.*—No. 2 winter red wheat, \$1.60; No. 3 red fall \$1.48; No. 2 spring, \$1.23. Corn, 60 a 61 cts. No. oats, 47 cts. No. 2 spring barley, \$1.75.

#### TRACT ASSOCIATION OF FRIENDS.

The Annual Meeting of the Tract Association of Friends, will be held in the Committee-room of Arc Street Meeting-house, on Fourth-day, the 25th instant at 8 o'clock, P. M. Friends are cordially invited to be present.

EDWARD MARIS, Clerk.

Third month, 1874.

#### FRIENDS' SELECT SCHOOLS.

A teacher is wanted for the Girls' School on Seventh street, to enter upon her duties in the Ninth mo. next. Application may be made to

Charles Ellis, 1734 Chestnut street,  
Maria B. Taylor, 631 North Seventh street.

#### ANNUAL MEETING OF THE CONTRIBUTORS TO THE ASYLUM.

A Stated Annual Meeting of the "Contributors to the Asylum for the Relief of Persons Deprived of the use of their Reason," will be held on Fourth-day, the 18th of Third month, 1874, at 3 o'clock, P. M., at Arc Street Meeting-house, Philadelphia.

WILLIAM BETTLE, Clerk.

#### WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of this Institution are expected to be vacated at the close of the Winter Session, in the 4th month next, Friends who may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee.

Nathaniel N. Stokes, Cinnaminson Post-office Burlington Co., N. J.

Charles Evans, No. 702 Race St., Philadelphia  
Deborah Rhoads, Haddonfield, N. J.  
Rebecca S. Allen, No. 335 S. Fifth St., Philad.

**FRIENDS' ASYLUM FOR THE INSANE.**  
Near Frankford, (Twenty-third Ward,) Philadelphia  
Physician and Superintendent—JOSHUA H. WORTINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, in Scipio, Cayuga Co., New York, 2d mo. 10th 1874, aged 54 years, ANN H. COOK, wife of Nathl. Cook, a beloved and consistent member of the religious Society of Friends. Her relatives and friends have the comforting evidence and belief that her end was peaceful, in Camden, N. J., on the 24th of Second month 1874, REBECCA LEWIS, in the ninety-second year of her age, a member of the late Southern District Monthly Meeting of Friends of Philadelphia.

WILLIAM H. PILE, PRINTER.

No. 422 Walnut Street.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, THIRD MONTH 21, 1874.

NO. 31.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

For "The Friend."

John Heald.

(Continued from page 235.)

1st mo. 6th, 1819. Went to Batavia. In this place our conductor and three others were imprisoned ten days in last month on a military account, in cold weather, where they suffered more than confinement.

7th. Attended Batavia Meeting; most of them were of other societies, and not much acquainted with silent waiting. I sat a considerable time, and then said: I find it necessary for me to avoid speaking in this way in my own will, and also that my own will does not hinder me when I ought to speak; and took occasion to show that we should learn to know our duty, and to yield obedience to Divine requiring. I put forth my own sheep, said the Good Shepherd, and go before them, and my sheep hear my voice, but the voice of a stranger they will not follow. I went on to show, that if we are His disciples, a disciple is a scholar, and if we are His scholars, then we should learn of Him; learn obedience to Him. Ye are my friends, if ye do whatsoever He command you. If ye love me, keep my commandments.

After dining at Isaac Shotwell's, in the evening, most of the heads of the families of this meeting being present, a good opportunity took place. I repeated the before-said sentence, and told them, I thought much depended on them, in regard to the welfare and prosperity of their meeting. I felt ability to encourage to faithfulness. Much tenderness appeared, and I felt thankfulness for the favor."

After visiting several other meetings in Western New York, J. Heald says: "15th. We attended a meeting in a dwelling-house, near the home of Caleb Macomber, who resided about sixteen miles from Rochester]. It was to me a dull, heavy, exercising time. I said, To our own Master we must stand or fall, and went on to show our accountability to our Master; that it was better for us to be severe and censorious with ourselves than others; that it would tend more to our true interest, and love would be more our feeling, if we were more disposed to forgive injuries. Who art thou that accusest another's servant to his master? Friends, we profess to believe in a

principle of light and truth and grace, which condemns us in ourselves for wrong doing, and in doing right we feel no condemnation; but profession is one thing, and possession is another. Each [should be] intent on attending to his own business, and more exact with himself than others, knowing that to our own Master we must either stand or fall. If in preaching, we are condemned for it in ourselves, or in withholding we are condemned, to our own Master we are accountable, and must every one receive our own reward for our own work. William Hubbard, I afterwards understood, was at this meeting, he who wrote what he called the errors of the Quakers.

21st. The day after Farmington Quarterly Meeting, was a great meeting for worship, and I thought eminently favored, and in a distinguished manner overshadowed with Heavenly regard. In the forepart my feelings were much tried, but in the latter part, and while dear Phebe Field was bearing testimony, I sat and comfortably partook of the repast, as she with demonstrative clearness and good language, held out the invitation to join in to help support the glorious cause, dignified with the crown of immortality. O! how precious was the season. Near the close I felt it to be my duty to add a little in confirmation, and to bind or rivet the testimony. She then entered into supplication, and thus sweetly ended this favored meeting.

28th. At Scipio Monthly Meeting, in which I delivered a testimony, expressing a fear I felt, that some were in danger of falling into disgrace, and piercing themselves through with many sorrows, and bringing reproach on the precious cause; and that the deviation began in a secret indulgence in wrong practices. O! the effects of wrong indulgence. We lodged at Joseph Tallcot's.

29th. Attended North Scipio Meeting, held at Charles Gifford's. I soon felt my mind turned to a remembrance of Pharaoh's butler. I stood up and said, 'I this day remember my faults;' and referred to Joseph who was sold into Egypt; and in tracing the account several instructive statements presented,—as his obedience when sent, the effect of resentment in his brethren, and his faithfulness in resisting temptation after he was sold into servitude. When we remember our faults, they afford us no real satisfaction, but contrariwise a certain secret dissatisfaction. I had a lengthy labor, but got through in a way to increase the attention of some who needed to be stirred up. There is an expectation in the reprovor, that such as are reprovor are capable of amending; that they are worthy of notice, and not abandoned. I believe it is a wrong idea in some who take offence at rebuke, as if what was aimed at was degrading them and making their character odious. This seems to me to be taking the dark and unfavorable side to view. If they would consider it as a mark of attention and regard, and lend an ear to hear,

if the reprovor be a wise one, what a benefit would be gained; for the reproofs of instruction are the way to life. I was favored to bring divers important views before the people, and the minds of many were brought to a solemn quiet.

2nd mo. 2nd. Went to Hector. My companion had eaten nothing after meeting at Salmon Creek [the day before] until he left me and went back to see a friend. I doubted the propriety of his going back, but he was resolute to go as well as not to eat, which caused unpleasant sensations to those we were among; and I have had some sensations not pleasant, since parting with him, as well as before, when thinking he refused to take advice, but would take his own way.

3rd. A considerable meeting assembled. I felt destitute, my companion away, and trying sensations occurred; but I endeavored to be quiet, and in a while I felt a renewal of strength to bear testimony to the all-sufficiency of grace and Truth. My mind was enabled to rise above the discouragements and depressions, and I acknowledged the favor with thankfulness. The minds of the people seemed to be settled and solemnized, and a feeling of tenderness was, I believed, witnessed.

7th. Went to Sempronius and attended their meeting, being First-day. The house was not large enough, and but few were Friends. After some time I found my way to engage in testimony, and I entered on it with fear, and earnest desire for preservation; but I was favored in it to my humble admiration, and many felt the weight. It was a time of remembering favors; for I showed how some endured great trials that we are exempt from, to have a conscience void of offence toward God; and compared their privations with our favored privileges and enjoyments. How easy we are while thus favored, as if our own peace was of less importance to us than theirs to them. O! how I am filled with love to the people, but O! how kind the Heavenly Father is to supply this love.

8th. Having Job Kenyon for a conductor, we rode to De Ruyter to Benjamin Mitchell's. 9th. I have walked the floor in silent and pensive thinking on the present situation I am in, waiting a day for the people to tell one another that we are come and want to see them, and thinking too how poor a creature I am, and how weak an instrument, and whether I might not have saved a little time by pressing on; and in the present case, by having a meeting to-day. O! the working of the mind, and especially when deeply trying exercise is drawing on renewedly to labor through. How shall expression bring to view the ideas that now and many other times press upon my mind. O Lord, thou knowest my heart, thou knowest I desire to serve thee, thou knowest how weak my capacity is, and how limited, how small, my abilities are to be engaged in so great a work. Thou hast

seen meet to try and humble me too, and now be pleased to be with me through the deeps, if through the deeps be the way for me to go. Remember in gracious kindness, if it please thee, my beloved wife, whom thou knowest that I love, and soothe her sad forebodings, and comfort her with the incomes of thy kindness and love. And O be pleased to bear up her mind and save it from sinking in discouragement. Be pleased graciously to watch over my dear children for good. Ah thou knowest how often the secret breathing prayer of my heart has been to thee for them. But in order to be given up to follow thee, I have left these dear objects of my love, and thou knowest the feeling of my tried mind on their account."

Of the meeting held at De Ruyter the following day, J. Heald remarks, that he thought it an instructive opportunity.

(To be continued.)

### Animal Character.

(Continued from page 236.)

#### THE CAT.

One evening before dinner-time the present writer had occasion to go into a dining-room where the cloth was already laid, the glasses all in their places on the sideboard and table, and the lamp and candles lighted. A cat, which was a favorite in the house, finding the door ajar, entered softly after me, and began to make a little exploration after his manner. I have a fancy for watching animals when they think they are not observed, so I affected to be entirely absorbed in the occupation which detained me there, but took note of the cat's proceedings without in any way interrupting them. The first thing he did was to jump upon a chair, and thence upon the sideboard. There was a good deal of glass and plate upon that piece of furniture, but nothing as yet which, in the cat's opinion, was worth purloining: so he brought all his paws together on the very edge of the board, the two forepaws in the middle, the others on both sides, and sat balancing himself in that attitude for a minute or two, whilst he contemplated the long glittering vista of the table. As yet there was not an atom of anything eatable upon it, but the cat probably thought he might as well ascertain whether this were so or not by a closer inspection, for with a single spring he cleared the abyss and alighted noiselessly on the table-cloth. He walked all over it and left no trace; he passed amongst the slender glasses, fragile-stemmed, like air-bubbles cut in half and balanced on spears of ice; yet he disturbed nothing, broke nothing, anywhere. When his inspection was over he slipped out of sight, having been perfectly inaudible from the beginning, so that a blind person could only have suspected his visit by that mysterious sense which makes the blind aware of the presence of another creature.

This little scene reveals one remarkable characteristic of the feline nature, the innate and exquisite refinement of its behavior. It would be infinitely difficult, probably even impossible, to communicate a delicacy of this kind to any animal by teaching. The cat is a creature of the most refined and subtle perceptions naturally. Why should she tread so carefully? It is not from fear of offending her master and incurring punishment, but because to do so is in conformity with her own ideal of behavior; exactly as a lady would feel vexed with herself if she broke anything in her own drawing-room, though no one

would blame her *maladresse* and she would never feel the loss.

The contrast in this respect between cats and other animals is very striking. I will not wrong the noble canine nature so far as to say that it has no delicacy, but its delicacy is not of this kind, not in actual touch, as the cat's is. The motions of the cat, being always governed by the most refined sense of touch in the animal world, are typical in quite a perfect way of what we call tact in the human world. And as a man who has tact exercises it on all occasions for his own satisfaction, even when there is no positive need for it, so a cat will walk daintily and observantly everywhere, whether amongst the glasses on a dinner-table or the rubbish in a farm-yard.

The quality of extreme caution, which makes the cat avoid obstacles that a dog would dash through without a thought, makes her at the same time somewhat reserved and suspicious in all the relations of her life. If a cat has been allowed to run half-wild this suspicion can never be overcome. There was a numerous population of cats in this half-wild state for some years in the garrets of my house. Some of these were exceedingly fine, handsome animals, and I very much wished to get them into the rooms we inhabited, and so domesticate them; but all my blandishments were useless. The nearest approach to success was in the case of a superb white-and-black animal, who, at last, would come to me occasionally, and permit me to caress his head, because I scratched him behind the ears. Encouraged by this measure of confidence, I went so far on one occasion as to lift him a few inches from the ground: on which he behaved himself very much like a wild cat just trapped in the woods, and for some days after it was impossible even to get near him. He never came down stairs in a regular way, but communicated with the outer world by means of roofs and trees, like the other untameable creatures in the garrets. On returning home after an absence I sought him vainly, and have never encountered him since.

All who have written upon cats are unanimous in the opinion that their caressing ways bear reference simply to themselves. My cat loves the dog and horse exactly with the tender sentiment we have for foot-warmers and railway rugs during a journey in the depth of winter, nor have I ever been able to detect any worthier feeling towards his master. Ladies are often fond of cats, and pleasantly encourage the illusion that they are affectionate; it is said too that very intellectual men have often a liking for the same animal. In both these cases the attachment seems to be due more to certain other qualities of the cat than to any strength of sentiment on his part. Of all animals that we can have in a room with us, the cat is the least disturbing. Dogs bring so much dirt into houses that many ladies have a positive horror of them; squirrels leap about in a manner highly dangerous to the ornaments of a drawing-room; whilst monkeys are so incorrigibly mischievous that it is impossible to tolerate them, notwithstanding the nearness of the relationship. But you may have a cat in the room with you without anxiety about anything except eatables. He will rob a dish if he can get at it, but he will not, except by the rarest accident, displace a sheet of paper or upset an inkstand. The presence of a cat is positively soothing to a student, as the pre-

sence of a quiet nurse is soothing to the irritability of an invalid. It is agreeable to feel that you are not absolutely alone, and it seems to you, as you work, as if the cat took care that all her movements should be noiseless purely out of consideration for your comfort. Then, if you have time to caress her, you know that there will be purring responses and why inquire too closely into the sincerity of her gratitude?

All other animals are stiff in comparison with the felines, all other animals have distinctly bodies supported by legs, reminding one of the primitive toy-maker's conception of a quadruped, a cylinder on four sticks, with a neck and head at one end and a tail at the other. But the cat no more recalls this rude anatomy than does a serpent. From the tip of his whiskers to the extremities of tail and claws he is so much living india-rubber. One never thinks of muscles and bones whilst looking at him, but only of the reserved electric life that lies waiting under the softness of the fur. What bursts of energy the creature is capable of! I once shut up a half-wild cat in a room and he flew about like a frightened bird, or like leaves caught in a whirlwind. He dashed against the window-panes like sudden hail, ran up the walls like arrested water, and flung himself everywhere with such rapidity that he filled as much space and filled it almost as dangerously, as twenty flashing swords. And yet this incredibly wild energy is in the creature's quiet habit subdued with an exquisite moderation. The cat always uses precisely the necessary force other animals roughly employ what strength they happen to possess without reference to the small occasion. One day I watched a young cat playing with a daffodil. She sat on her hind-legs and patted the flower with her paws, first with one paw and then with the other, making the light yellow bell sway from side to side, yet not injuring a petal or a stamen. She took a delight, evidently, in the very delicacy of the exercise, whereas a dog or a horse has no enjoyment of delicacy in his own movements, but acts strongly when he is strong, without calculating whether the force used may not be in great part superfluous.

Cats have the advantage of being very highly connected, since the king of beasts is their blood-relation, and it is certain that a good deal of the interest we take in them is due to this august relationship. What the merlin or the sparrow-hawk is to the golden eagle, the cat is to the great felines of the tropics. The difference between a domestic cat and a tiger is scarcely wider than that which separates a miniature pet dog from bloodhound. It is becoming to the dignity of an African prince, like Theodore of Abyssinia, to have lions for his household pets. The true grandeur and majesty of a brave man are rarely seen in such visible supremacy as when he sits surrounded by these terrible creatures, he in his fearlessness, they in their awe; he in his defenceless weakness, they with that mighty strength which they dare not use against him. One of my friends, distinguished alike in literature and science, but not at all the sort of person, apparently, to command respect from brutes who cannot estimate intellectual greatness, had one day an interesting conversation with a lion-tamer which ended in a still more interesting experiment. The lion-tamer affirmed that ther-

as no secret in his profession, that *real* courage alone was necessary, and that any one who had the genuine gift of courage could safely enter the cage along with him. "For example, you yourself, sir," added the lion-tamer, "if you have the sort of courage I mean, may go into the cage with me whenever you like." On this my friend, who has fine intellectual coolness and unbounded scientific curiosity, willingly accepted the offer, and paid a visit to their majesties the lions in the privacy of their own apartment. They received him with the politeness due to a brave man, and after an agreeable interview of several minutes he backed out of the royal presence with the gratified feelings of a gentleman who has just been presented at court.

For "The Friend."

### Memoirs and Letters of Sarah Hillman.

(Continued from page 229.)

To her Mother and Sisters.

"Baltimore, 10th mo. 1835.

Dear mother and Sisters,—We arrived here without accident about half past three P. M. though at French Town just as the cars stopped, having reached their destination, the wheel of the one next to ours came off. Had it been going on rapidly as usual, it is likely would have been attended with much danger. Thus we were cared for.

Attended this morning the first sitting of the Yearly Meeting of Ministers and Elders. The little company of Friends met, came together, I believe, under an humbling sense of their stripped and peeled condition; and like the multitude that was fed by the blessed Redeemer with very small provision, they were ministered unto by His command, I trust, whose comforting presence seemed, on taking our seats, to be with us, mercifully sustaining his poor, little, humble, trembling disciples, and fulfilling to them His ever gracious promise: 'Lo! I am with you always, even to the end of the world.' My heart felt much, but without relief.

Truly there are few of the trees of the Lord's forest left here, so that a little child may write them. Yet if there be but a 'few berries on the top of some of the outmost boughs,' that same blessed, heavenly Shepherd spoke, through the mouth of His prophet said, 'A vineyard of red wine; I the Lord do keep it, I will water it every moment: lest any hurt it, I will keep it night and day,' is very near to bless it, yea, to strengthen the little that remains that it die not. May He bless and prosper His own work, saith my soul.

With dear love to you all, and to all encircling friends, your affectionate

SARAH HILLMAN."

To her Mother.

"Salem, 5th mo. 31st, 1837.

Dear Mother,—We\* arrived here, Clayton and Wistar's, last eve about half past seven; having attended Woodbury Monthly Meeting on our way down. It was very small, but I was glad to be at it. Not that there was an sounding, but a feeling of Divine mercy far to gather and strengthen still to trust in our ever-present Helper. Friends seemed passed and thankful for even such a poor visit. Anne Tatum at whose house we lodged, desired her love to you. She was truly sympathizing. We dined to-day at J. Whitall's.

\* S. H. had for companion in this visit, Mary W. Davis.

6th mo. 1st. This morning I feel sweetly refreshed under a belief that as I have not entered into this warfare on my own charges. He who knows the sacrifice, because Himself prepared it, will condescend to be with and keep me; be mouth and wisdom, tongue and utterance; and bring me back in peace.

Dear Clayton and Martha Wistar seem disposed to do all they can to further the work. We purpose dining after meeting at E. W. Miller's, and then proceed to Greenwich this evening. We may perhaps visit five families between here and there on our return.

It is truly no light matter to stand as an ambassadress for Christ: to be entrusted with any measure of a gift of the ministry or word of reconciliation; and while I desire mercy to be found faithful, I crave to be preserved from saying one word more than is required, in any shape or in any place. I cannot do less than believe that every step taken in simple faith, tends to strengthen in the christian race, and adds a little to the preparation and meteness to associate with the spirits of the redeemed in our Heavenly Father's kingdom.

Mayest thou, my dear mother, be sustained in my absence by the Great Shepherd and Bishop of souls; and that my very dear sisters may be increased in heavenly treasure, and preserved in quiet peace and in health, is the sincere desire of yours in the bonds of the gospel,

S. HILLMAN."

To her Mother.

"Salem, 6th mo. 4th, 1837.

Dear Mother, \* \* \* I think I can say to the praise of His grace, who never faileth those who trust in Him, that thus far my divine Lord and Master has been with me and strengthened me. There is here a precious little company, who are, I believe, 'preferring Jerusalem to their chief joy.' And under discouragements from the many weaknesses of flesh and spirit, are endeavoring to follow on to know Him, who hath loved them and so marvellously delivered them in days that are passed, when the blast of the terrible one beat as a storm against their wall, and when they found in Him a sanctuary. To these my heart is united in the bonds of the gospel.

We attended the meetings as anticipated in the last letter. Lodged at John Sheppard's; and had a very precious season in his family before parting. Then rode to Allowaystown, where we visited J. and W. F. Reese's families, and one or two others. We proceeded yesterday in the engagement allotted us here, in fearfulness and trembling; and after meeting to-day expect to visit two or three families; desiring to get through as soon as may be, without improperly making haste; but above all desire so to attend to the directions of our Almighty Helper as to return in peace, feeling the answer in our hearts of having done the little we could.

In C. and M. Wistar I find not only truly kind, but truly sympathizing friends and helpers. Martha mentioned in the Monthly Meeting her willingness to join in the work, such was her unity with it; and her dear husband, not less devoted, has given up himself to go and take us. Thus banded we travel on harmoniously together. Not, it is true, without descending into the deeps again and again, causing me to feel what I am, and what I am not. Through mercy strength for the day has been apportioned to the service; and I

think we might adopt the language of the poor woman who, when enquired of if she lacked any thing, at once responded, 'Nothing, Lord.' May our hearts praise Him; for truly, 'I was brought low and he helped me.'

At evening, after the service of the day is over, I have enjoyed a little the beauties of the country around me; a picture which my dear sisters would relish very much. The flowers are abundant; and my ears are engaged very early in the morning with the notes of the many birds, chanting as it were their songs of praise to their great Creator.

\* \* \* The day of sifting, and trial of the foundation upon which we have been building has come, and *is coming*; and none but those who are builded upon the Rock, the chief corner-stone elect and precious, can stand. Every man's work will be tried *as by fire*. May we each then be engaged to repair to this foundation. Let us be willing to come under the operation of the sword of the Spirit, which is all-powerful in dividing between the precious and the vile, and is a discernor of the thoughts and intents of the heart; that thus we may be prepared to 'discern between the righteous and the wicked; between him that serveth God, and him that serveth him not.' May the Lord in his mercy enable us to stand in this evil day, and having done all to stand. That when the awful, undeniable messenger comes, we may be found ready, having oil in our lamps, and they trimmed and burning.

With love, your affectionate, tribulated child and sister,

S. HILLMAN."

(To be continued.)

### Prepare for Spring.

It is a good rule, and applicable to all men, whatever may be their occupation or pursuit in life, to take a retrospective glance, at each closing year, in order to avoid in the future, if it be possible, errors of judgment and defects in practice. Let us carefully review the past year and detect, if we can, the origin of failures—for failures will occur—and also trace the causes of success. The farmer who is content to give the past the go-by, and makes no effort to profit by the experience it affords, will make slow progress in his art. He will always be behind-hand at seed-time and harvest; the season of active labor will find him impoverished; while his more thoughtful neighbor will get along without vexation or delay.

With the latter every necessary want has been anticipated; the opening spring finds his implements and machinery in order, the working stock well cared for and properly prepared for the toil which awaits them. There is usually a great deal of weather during February and March when out door work cannot be done, and all bad days can be spent to good advantage in the shop in finishing up some of the innumerable little jobs which in summer were deferred until winter. Repair and oil harness, and get any new that is wanted; see that the lines, traces, &c., are in good order. Form some idea of the number of teams to be worked, and have harness ready for all. Examine plows carefully, and replace any broken or weak parts, tighten the nuts well, and then give the plow a good painting. Nothing pays so well as to keep plows, harrows, reapers, wagons, and all implements which are exposed to the weather at times, well painted. One day's work at painting during each winter

will save many a dollar in the course of a few years.

If you need a new reaper, order it now and set it up, and see that it is all right and ready for work.

If any new tools are needed it will pay to buy early, as you generally get a better article, and then there will be no difficulty in getting a handsome discount. None but the very best tools should be used; they may cost more at first, but the saving of muscle, to say nothing about their durability and the difference in the work done, will soon pay for them. Oil the handles of all the small tools, such as hoes, forks, rakes, &c., with linseed oil; it will prevent the wood from shrinking, and the more they are used the smoother they will get. Just here let me say that if the mold-board of plows, and the parts of all other tools that need to be kept bright, are coated with linseed oil as soon as the season's work is over, they will be in good order when wanted for work again. Get the seeds to be used on the farm ready. Don't wait until planting and sowing time to make your selection; or, if the seeds are to be obtained from a distance order them at once.

Now is the time to get a supply of wood for the balance of the winter, and be sure to get enough to last all next summer and fall. Have it cut ready for use, and corded up so it will keep dry. You will find such a woodpile a great convenience in hot weather when you are busy with work. Make gates for every place on the farm where they are needed, and don't have any tumbledown affairs, but make good gates and hang them all, so they may be opened easily. Repair all the old fences, and make new ones if needed. There is a great deal of straw and other things wasted which would make good manure, and our land can never be made too rich. Have you an orchard containing good varieties of fruit, from the earliest to the latest? If not, don't let another season pass without planting a good selection of apricots, cherries, peaches, plums, quinces, pears, and, best of all, have a number of different varieties of apples, so you will never be without them. Of course, every body plants grapes, raspberries and strawberries. They require so little attention, if rightly managed, and reward us so well for the labor bestowed on them, that no one should be without them.

The different things that should be attended to are not too numerous to mention. It is a good plan to have a pencil and paper in your pocket, and whenever you think of anything you want write it down at once. This will assist you very much in getting the little things about the place attended to in good time. Your memoranda will be good to refer to in bad weather, and will remind you of work in the shop. There is nothing helps a farmer along with his work so well as to have everything ready, so that when planting time comes he has nothing to do but plant and take care of his crops. Everything seems to work so nicely; there is no vexation or hurry about the work; all is done at the right time; the crops grow better and there is a wonderful difference in the amount realized for the labor of the season. We all know that the farmer works hard for the money he gets; but if there were more management, and things were done at the right time and in the right way, our farmers would make a great deal more money and make it easier.—*Rural World.*

## IS THIS THE WAY?

Selected.

Ho! Christian pilgrim, ho! and tell,  
Is this the way to Zion's hill?  
I long to find the shining road,  
That leads to glory and to God,  
But fear my 'wildered feet do stray  
In sin's deceitful, devious way;  
O, if I'm lost, what shall I do?  
Then tell me, pilgrim, tell me true.

I love in Kedar's tents to dwell,  
I love the courts of pleasure well;  
But God's own fury drove me thence,  
I started but I knew not whence.  
'Twas on a dark and dreadful track,  
The burden still upon my back;  
No stop—no stay, for death was there,  
But onward, on, in black despair.

No certain way was in my range,  
But many, wild, divergent, strange;  
The thorns would pierce my bleeding feet,  
My strength be overcome with heat,  
Till weary, fainting, I did cry:  
"Save me, O Lord, or else I die!"  
'Twas then I heard one sweetly say,  
"Come unto me, I am the way."

Methought it was my Saviour's voice  
Bidding my weary wandering cease;  
A sweet repose—a holy calm  
Came o'er me like delicious balm.  
That is God's promised rest, I cried,  
I'll pitch my tent and here abide,  
On Pisgah's raptured mount will stand  
And gaze into the promised land.

I fondly dreamed my conflicts done,  
But ah! the race was to be won;  
And as toward the goal I hied,  
"Eternal good for me," I cried.  
I thought I never more should stray  
From out the peaceful, narrow way;  
But ah! I blush with shame to tell  
How oft I wandered—oft I fell.

'Tis true I sometimes catch a view  
Of Calvary's hill, and glory too;  
But dubious clouds will intervene—  
A veil still darkly hangs between,  
A dread unwraps me like a pall  
Lest I knew not the way at all—  
Lest I but idly, vainly dream,  
The victim of a fevered brain.

O Pilgrim, I am lone and chill,  
Is this the way to Zion's hill?  
Wilt thou not hold thy lamp on high,  
Till I the heavenly road descry?  
I fear lest I mistake the track,  
But cannot, dare not turn me back;  
Is this the way thou dost pursue?  
Say, Pilgrim, is it thus with you?

## THE TREE.

Selected.

I love thee when thy swelling buds appear,  
And one by one their tender leaves unfold,  
As if they knew that warmer suns were near,  
Nor longer sought to hide from winter's cold;  
And when with darker growth thy leaves are seen  
To veil from view the early robin's nest,  
I love to lie beneath thy waving screen,  
With limbs by summer's heat and toil oppressed;  
And when the autumn winds have stript thee bare,  
And round thee lies the smooth untrodden snow,  
When naught is thine that made thee once so fair,  
I love to watch thy shadowy form below,  
And through thy leafless arms to look above  
On stars that brighter beam when most we need their  
love.

For "The Friend."

## Farmers' Granges.

These associations have spread with wonderful rapidity over the land, and the number of their members is now very great. In the Western States, where they originated, their attention was at first especially turned to the question of cheap railroad freights, a question of great importance to those farmers who have to send their produce a long distance to mar-

ket. In the Eastern States, the principal advantage claimed for them, is that of supplying their members with machinery and other merchandize at a cheaper rate than it can be procured through the ordinary channels. I regard to a few articles, this is possible; but when we reflect that the margin of profit of most things that are bought and sold is not the average more than a moderate interest on the capital invested, and a fair compensation for the labor bestowed by the merchant; it is evident that the inflated hopes of the members of the Grange cannot be realized, in an large measure. Inevitable disappointments awaits them.

It is with regret that the writer has been informed that several of the members of the Society of Friends have joined these associations. However innocent their motives, yet it is inconsistent with their religious profession to become members of a secret organization, and they are in danger of finding themselves gradually led into things which they did not at first anticipate, and which will mar their usefulness in the church, and expose them to temptations, which it would be wise for them to avoid.

In a recent number of the *Herald of Truth*, a paper published by the Mennonites in Indiana, is an article on this subject, warning their members against joining themselves to these societies. The following extracts from it will show the reasons adduced therefor, and may well cause some of our own members to reflect seriously before taking such a step.

"The reason why our brethren should take no part with the Granges is simply 1. Because it is a secret organization, and that which good need not be hid, nor kept secret. 2. The promises or oaths required of them are inconsistent with the doctrines of Christ. See Mat. v. 33, 38. 3. In uniting with the organization we enter into a league with a promiscuous class of men, believers and unbelievers, men who swear, and drink, and whose lives are in no way governed by the principles of religion (We do not say that all men who join the Granges are bad men; but that there are enough men of this character among them, and one can doubt for a moment) and such a union with all kinds of irreligious men, is strictly forbidden, for the Christian must have no communion with the unfruitful works of darkness. 4. Now these organizations by exciting public opinion, holding excitable public meetings, lead step by step to actions, and means which are unbecoming to a non-resistant follower of Christ; they are led by men who use moral suasion as long as moral suasion will accomplish their purpose; but when this fails other means will be resorted to, and in this, a conscientious follower of Jesus will be led to bring reproach upon the name of Jesus and cause to be evil spoken of.

"These organizations as a matter of course are laboring to raise public sentiment against railroad companies and speculators, and who fully organized and established, the principal means will be political influence. Candidates for office must be members of Granges, and members of the society must vote for the chosen candidates, and in the legislative assemblies these must make their influence felt by adopting measures favorable to the objects of the associations. Thus the present Granges are only laying the foundation of a scheming political party, similar to several parties of like character which have existed in years

one by, in the country; and where is the umble follower of Jesus that can keep his conscience void of offence under the influence and in confidential union with such parties? "For these reasons we hold that our brethren should not unite with these organizations, and also because our Conferences have passed resolutions against them. Let us indeed be a light in the world, and not a stumbling-block in the church."

The following letter of Samuel Neale to wealthy and prominent Friend in Philadelphia, was written shortly after his return from religious visit to this country. The counsel which it conveys appears worthy of being revived at this day.

"Glanmire, the 7th of the 10th mo., 1773.

Beloved Friend:—My mind is often looking towards your land, with a grateful remembrance of its inhabitants, and hope that a couple will be raised up from amongst the multitudes resorting thither, that will repair to the ensign of the Lamb set up in Zion.

Our people have been much favored with the opening of Light; the Fountain of everlasting kindness has sent forth its streams immediately and instrumentally to enrich and build up; but it has been too little attended to: much pains and care have been dispensed by the Shepherd of Israel, to preserve and protect his visited; and if they will not have Him to rule over them, He will send his call and love another way, to gather out of the highway and hedges, to bring a people to the knowledge of Him and His beloved Son, that will stand in the gap, repair the breaches, and proclaim the day of the Lord. And though Israel will not be gathered, yet will He be glorious by the manifestation of his own strength and power in a people who are now no people. What a pity it is that those who have been made partakers of the Divine Light, and powers of the world to come, should lose the enjoyment, by adhering to visible glory, and things that will not profit in the Lord, but scatter from the Lord's inheritance in time and in eternity? I fear the inundation of temporal prosperity amongst the professors of the blessed Truth, will turn them from the pursuit of discipleship, vitiate their relish for Divine worship, and urge many to rest in the shell of barren profession: and though such may cut a figure among men, yet they are destitute of a foundation; when trial comes their works will be burnt up, and mourning, lamentation and woe will be their portion: but how beautiful will be the footsteps of those, who with good Joshua can say, 'let others do as they will, as for me and my house we will serve the Lord.' I believe, dear friend, thy desires often run in that channel, and though Heaven has blessed thee various ways in the enjoyment of temporal felicity, thou hast often felt the disappointment and trial attending the mortal state and the pilgrimage through time, [which are] perhaps permitted in the wisdom of Him that is unsearchable, to balance through the surges and tossings that are to be met with; to be as ballast in the midst of the great ocean, that the vessel may get safe to port. I have and do sympathize with thee, and thy beloved honorable partner, in what you have met with towards the evening of your day: which I conclude is best, because it is a dispensation permitted by Him who knows what is past,

present, and to come, and has often seen meet to try and prove those He loves, to keep them unto the end in faith, in greenness, in fidelity, in hospitality and good works, that they may lay hold on eternal life; and if thou would permit me to drop a hint, which I think I have seen in the opening of the door of light and intelligence, and which my love for thee and thine emboldens me to drop—which is, that abounding worldly riches has made many bankrupts, if I may use the term in religion; it has buoyed them up in an elevated state above the lowly seed, and they have floated in the spirit of the world like a ship without an anchor; and have been tossed as from one novelty to another which I compare to rocks, until they have been cast away as in the dead sea of formal worship and ease,—very little regardful of the inquiry approaching, what hast thou done with the talent? And if this does not always happen, in the immediate possessor, it frequently does in the successor, who steps into fulness and worldly glory, as at one step, by which they are raised as with a torrent from the little footing they had, and are swept into the great and devouring channel that leads to mystery Babylon, and there sup of the golden cup that stupefies and keeps in bondage. This, beloved friend, I have seen many instances of in many, very many, in our Society; and what has been, may be, and a word to the wise may suffice. I love thy children; I believe they will be tried with one of the greatest trials, worldly riches, and I ardently desire they may be blessed with wisdom and stability to stem the current that has carried so many by its rapid course into ease and forgetfulness of the Lord's doings for their progenitors. There is nothing more ornamental than the Truth, it is the strength, riches and wisdom of men, and as we live in it, we are led to feel the woes of others, to sympathize with the afflicted, alleviate their sorrows, strengthen the hands of those whom the Lord has anointed for His work and service, and be as a prop unto them in emergencies, when adversity hangs over them as a cloud;—then the virtuous rich man may arise as a strong man, as a bridegroom coming out of his chamber, shelter such, be as bread and clo hing to such, and build them up when almost broken down, or ready to fall. Some such may be said to be imprisoned, incapable of service, and the seed imprisoned in them. Visiting such and administering to them, is like visiting the sick, clothing the naked, feeding the hungry, giving drink to the thirsty, and feet to the lame; and may multiply the blessing in such a manner upon his house, that an increase a hundred fold may be added.

I would not throw out any hint that friendship does not authorize, and a Christian nearness dictate, but will just add, where much is given much is required; and earnestly desire, that peace and prosperity in every sense may attend thee and thine, and that you may be honorable as your predecessors in the church militant, and relinquish the world in the parting moment, with the rising prospect in the vision of faith that immortality and glory await you forever. \* \* \* \* \*

Thy affectionate and obliged friend,

SAMUEL NEALE."

To mourn without measure is folly, not to mourn at all insensibility.

#### Science in the Cottage.

Under the title of "Where there's a Will there's a Way; or Science in the Cottage," James Cash has furnished us with a most interesting account of the labors of several naturalists in humble life, not exactly unknown to fame, but known only in the inner ranks of science. Naturally of a retiring disposition, and precluded by their social position from taking their rightful status in the world of science, the lives of these men, and even their very names, are unknown to thousands who have profited by their labors. Nearly all of them workingmen in the true sense of the term, laboring hard for the support of their families, they are examples of what can be done by indomitable energy and perseverance. These naturalists had none of the leisure which easy circumstances affords, and which renders the pursuit of knowledge, comparatively so easy; they studied science while fighting in many cases a hard battle for life.

George Caley, one of the most zealous of the Lancashire botanists of the early part of the century, was the son of a Yorkshire horse-dealer who had settled near Manchester. He seems to have had a longer term of schooling than most of his contemporaries, but still at an early age was doing the drudgery of the farm. The quackery and ignorance of the local farriers did not escape his notice, being the business of his father, and an odd volume of farriery which he studied seems to have led to his botanical researches, which first commenced in his looking for the useful plants mentioned in the book. Having acquired a knowledge of the plants of his district—though not a systematic knowledge—he came into possession of Dr. Withering's "Botanical Arrangement," and set to work in the winter to master it. In this he succeeded, and becoming acquainted with some botanical companions, he explored every hill and plain within a day's walk of Manchester, till in process of time the district was exhausted. About this period of his life, having become acquainted with Linnaeus's "Genera Plantarum," and "Systema Vegetabilium," he conceived the idea of travelling to foreign countries, and took the bold step of writing to Sir Joseph Banks, the president of the Royal Society. After some time he received a reply offering him employment as a working gardener at Kew, which was not exactly what he desired, and although he accepted the post, his duties debarred him from cultivating his mind in his own way, and it was not long before the engagement came to an abrupt termination, after some rather intemperate remonstrances had been addressed by him to Sir Joseph Banks. Caley thought, in fact, that he did not require the training which Sir Joseph desired him to have, and he withdrew in disgust to his Lancashire hills. He, however, soon recovered his equanimity and wrote to his patron, who, in reply, suggested that the "gentlemen of Manchester" should make a subscription to maintain him whilst searching in the South Seas, offering himself to subscribe and use his best efforts to induce the Government to send him out. This proposition fell through, but a few months afterwards Caley was summoned to London by Sir Joseph, who had obtained permission to send him to New South Wales to collect specimens for his patron and seeds for the garden at Kew. How well Caley did his work

in that then unknown land is matter of history: he did far more than he was sent out to do, and his extensive collection of animals was purchased by the Linnean Society, and for a long time constituted the most splendid portion of their museum. After a few years residence in England, he was made superintendent of the Botanic Garden at St. Vincent, and retired on the breaking up of that establishment, having been altogether twenty-two years abroad.

Edward Hobson, the correspondent of Sir W. J. Hooker, W. Wilson, and Dr. Greville, was looked up to by the Lancashire botanists as their recognized head—an infallible authority to whom they referred their disputes. The intimate friend of Caley, he survived him but a few months, dying at the early age of forty-eight. Hobson's early life is shrouded in obscurity, save that he left school when about eleven years of age, and he was not known amongst the Lancashire botanists till he had acquired substantial knowledge of the subject, which was speedily recognized, for it was not long before John Dewhurst, growing feeble, resigned the presidency which he had held for a quarter of a century into his hands. Hobson turned his attention chiefly to cryptogamic botany, and became the trusted correspondent of Hooker and Taylor, the authors of the "Muscologia Britannica," by whom he is often named as an authority, and from whom he received material aid, in the shape of rare mosses not to be obtained in his neighborhood, when compiling his "Musci Britannici." A letter from Sir C. Lyell conveys to Hobson Dr. Hooker's admiration of his enthusiasm and acuteness, accompanied by a present of his own copy of the "Muscologia" which Sir Charles had borrowed, and a collection of Jungermannia and other cryptogamia from the New Forest. Hobson was a journeyman to a Mr. Eveleigh, himself a mineralogist and naturalist of local celebrity, and the nobleness of his nature is seen from the following anecdote of him told by an intimate friend. In 1829 Hobson had distinguished himself in arranging portions of the museum of the Manchester Society for the Promotion of Natural History, and it was unanimously resolved to offer him a permanent engagement in that institution with a salary of £100 a year. Well, although such a post was all that he could have wished for, he preferred to earn a somewhat precarious living with Mr. Eveleigh, because that gentleman had been very kind to him when prosperous, and now, when circumstances were altered, his services might be of importance to Mr. Eveleigh, and he could not think of leaving him.

John Horsefield, of Prestwich, though not so distinguished as his contemporaries Caley and Hobson, was, nevertheless, an accomplished botanist. Following the occupation of a weaver from morning till night, without books and without instructors, Horsefield's first idea of the uses of wild plants seems to have been derived from "Culpeper's Herbal;" and until his father joined a workingman's botanical society and brought home Lee's "Introduction to Botany," he had no idea of the science, and even that book was like so much Greek to him. He commenced by writing out the names of the twenty-four Linnean classes and pasting them on his loom-post. In this way he acquired by diligent study much solid information, and laid the foundation for the great knowledge he afterwards

possessed. For many years Horsefield was president of the Prestwich Society, and afterwards of the United Societies of the district. To his botanical attainments he added a considerable knowledge of astronomy, algebra, and mensuration. He died at an old age in 1854.

James Crowther, of Manchester, was born in a cellar, and, like Horsefield, became a weaver, beginning his working life at the age of nine. He joined the society of which Dewhurst was president, and assiduously devoted all his spare time to botanizing not without unpleasant adventures with gamekeepers, who naturally looked upon him with suspicion till on one occasion he was fortunately arrested. It seems when in search of aquatic plants he carried a jointed rod resembling a fishing-rod, save that it had a pair of hooks at the end, one of which had a sharp edge for cutting the stems of the plants beneath water. Once, when engaged in this quest at Tatton, two gamekeepers seized him and took him before Mr. Egerton, who, seeing the tackle was not adapted for fish poaching, and listening to Crother's tale, ordered him to be set at liberty with free permission to roam wherever he chose on the Tatton estate. Crowther found the means for following his pursuit by the sale of specimens, and by earning a shilling or two after working hours as a porter at the landing-stages, for he never allowed his family to suffer by a deduction from his wages. On one of these evenings, while looking out for a passenger who wanted a parcel carried, he met Sir J. E. Smith, who was in search of information for one of his botanical works. Sir James engaged Crowther to carry his luggage, and asked if he knew one of the neighboring gentry. "Yes," replied Crowther, "he's a bit in my way." "What way is that?"—a question the answer to which led to further inquiry, and Sir James found in Crowther the very man who could supply him with the information he required. Crowther, like most of the Lancashire botanists, died at an advanced age, but, unfortunately, during his latter years he had suffered great privations.

John Mellor, of Royton, who was regarded as the father of Lancashire botany, died in 1848, at the age of eighty-two. Like most of his contemporaries he was a hand-loom weaver, but made excursions far beyond his native district, having traversed the Highlands no fewer than six times, ascending all the principal mountains in search of plants, which he sold to Mr. Don, Dr. Hooker, and others, thus earning sufficient to supply his modest wants.

Richard Buxton, the author of the "Botanical Guide," was another of these worthies, who, at the age of sixteen, found himself "unable to read." To thoroughly feel this defect was speedily to remove it, and at the age of eighteen he entered the service of a man who appears to have been an herbalist, and whilst with him his attention was first turned to botany. He went on for years plodding along in his study of the science, till one day, whilst botanizing, he saw another person engaged in the same pursuit, who turned out to be no other than John Horsefield. An acquaintance thus commenced ended in his introduction to the botanical societies.

John Martin, of Tyldesley, was also a hand-loom weaver, and a constant correspondent of Sir W. Hooker, who calls him an "accurate botanist."

We have left ourselves but little room to speak of George Crozier, botanist, entomologist, and ornithologist; of Thomas Townley, a botanist, and the inseparable friend of Crozier, and of the lesser-known Lancashire botanists, but these are not less worthy of mention than their contemporaries.

Of Just and Wilson, Mr. Cash has much of interest to say, but they were not in humble life, and we pass on to Samuel Gibson, of Hebdon Bridge, botanist and ornithologist, a man intimate also with geology and mineralogy notwithstanding that he had to support a family of nine children by his labor as a whitesmith. His splendid collection of fossil shells from the lower coal measures, now the property of Owens College, is his best memorial. Gibson was a contributor to the *Phytologist* and other magazines; he never attended a day school for a single hour, and did not commence his studies till he had reached the age of twenty-five, and yet he could claim the respect and attention of such men as Professors Sedgwick and Phillips.

Mr. Cash's book closes with a brief notice of "Mathematicians in humble life," a race, we think, more numerous than even botanists and other lovers of nature, but whose abilities are hidden in greater obscurity. Butterworth, the prince of Lancashire geometers, was a fastidious weaver, earning in his best days miserable wages, and eking out an existence in old age by teaching a few children, whose pence added slightly to the relief allowed him by a society established in Manchester for the purpose of assisting poor scientific men.—*English Mechanic*.

#### Women's Indian Aid Association.

Hiram W. Jones, agent, writes acknowledging receipt of goods, as follows:

Quapaw Ind. Agency, Seneca, Mo.,  
3d mo. 10, 1874.

Early on the bright spring morning after the receipt of the goods, we repaired to the camp (about two hundred yards from the agency) accompanied by some of the Modoc "boys," carrying the goods for the women and children.

We had the chiefs to call up and seat upon the grass (for it is quite green), around us all the women and children, except three of the former who were sick. We told them by whose kindness we were enabled to make them the presents, and impressed upon them the desires of their friends that they should be good, and keep "good hearts." In reply to the question, if they would try to keep good hearts, they replied by a hearty "Aye," their customary assent.

We then presented to each woman and child their share. After this we distributed the shirts as far as they would go, to the men, but the seventeen sent did not go half round.

They (the Modocs) are giving as little trouble as could be expected; seem very anxious to adapt themselves to their new life. On First-day afternoon, we arranged a meeting between them and the Seneca chiefs. It was interesting, to see the attention with which the Modocs listened to the talk of their more civilized brethren. One point made by the Seneca chief "White-Tree," seemed particularly to impress them, and to meet their full approval. It was this: "That all men are brethren, and the Great Spirit loves all alike, and wishes them to live together in peace."

They seem fully to comprehend, that their method of living by the chase is now an impossibility, and that hereafter they must depend upon the fruits of their labor.

The two boxes of garden seeds sent from B. for the MODOES, act as a great stimulus to many Indians, and they are planting early as, radishes, onions, lettuce, &c. Many varieties of the smaller seeds are entirely exhausted. There is an increasing disposition on the part of most of our Indians to enlarge their farms. They are making considerable improvement, in the way of making and laying rails in the fence, and breaking fresh land. The health of this people is very good, considering their exposed condition.

HIRAM W. JONES.

If we are not to take thought what we shall say when we come before worldly needs, because it shall then be given us; and it is not we who speak, but the spirit of our heavenly Father, that speaketh in us; much can our ability be needed, or ought we to study to ourselves forms of speech in our approaches to the great Prince of princes, King of kings and Lord of lords. For if we consider his greatness, we ought not by Christ's command: or our relation to him as children, we need not: he will help us, he is our Father; but it is if he be so indeed. Thus, not only the mouth of the body, but of the soul is shut, till God opens it. The body ought never to go before the soul in prayer: his ear is open to all requests, and his Spirit strongly intercedes for those that offer them.—*No Cross no Crown.*

## THE FRIEND.

THIRD MONTH 21, 1874.

The improvement of education has certainly made much progress in this country within the last twenty years, and the occupation of a teacher has deservedly risen greatly in the estimation of the public. The elements now necessary to entitle to the character of a good instructor, are so much more numerous and sharply defined than formerly, that those who deservedly obtain that character, rank equally in reputation and social standing with any other professional adepts: but it is to be regretted on many accounts that such teachers are not more numerous among those who have adopted the profession.

In the advance which general school learning has achieved, and amid the high encomiums so commonly passed upon the advantages to be derived from popular education, there has been great remissness shown, in devising and adopting proper means for so applying the science of education, as to rightly and thoroughly train those who are, or who aim to be the educators of the present generation of children. Such means as would be adapted to discover by practical competition, who do not possess, the peculiar talents necessary for excelling in the highest of all arts; that of making use most efficiently of the proper methods and instruments for drawing out the latent powers of the mind, while cultivating the affections of the heart, and implanting the principles and practices of christian virtue.

How much depends upon the principles, the

talents and the acquirements of teachers, in forming the characters of those placed under their care and tuition! Their responsibility is great; for they are educating their keen-sighted disciples, not only when imparting literary or scientific knowledge, but by the very tones of the voice, and the impressive instruction of every day example. In applying the art of teaching, unless they possess discriminating minds, and are sufficiently on the watch to detect and comprehend the characteristic traits of their individual pupils, and to adapt their modes of instruction, so as to counteract hurtful propensities or habits, and to incite intellectual effort in those who may seem too dull and obtuse to acquire learning in the ordinary routine method of imparting it, they may finally dismiss some who have been long under their tuition, as ignorant blockheads; who had their mental peculiarities been properly analyzed, and a different mode of interesting them in the pursuit of knowledge adopted, might have made creditable scholars.

Mental power is not developed in the same way, and at the same age in all children; and the instances are numerous of persons distinguished in after life for their acuteness and learning, who were extremely dull and unpromising in childhood. It is stated of Isaac Barrow, who when he was appointed Master of Trinity College in England, was said to be one of the best scholars of that time and country, that in his early school days, he was obstinately opposed to make any effort to learn, persistently devoting himself to rude sports, and withal so quarrelsome and ill natured, that his father, despairing of his son's future worthiness, or usefulness, often said if any child was to be taken from him, he hoped it would be his son Isaac. But under the training and instruction of one who detected good abilities under his repulsive and discouraging exterior, and knew how to adapt the method of education so as to counteract the evil, and bring out the good, Isaac Barrow finally excelled in the acquisition of knowledge, and became the pride of his family and a benefactor of mankind.

Of the celebrated Adam Clark it is recorded, that it was with the greatest difficulty he learned the letters of the alphabet, and though kept at school and often harshly treated and upbraided for his stupidity, he was eight years old before he could spell words of three letters. But, providentially, when between eight and nine years of age, he was placed under a teacher, who had the ability and took pains to make himself acquainted with the mental capacity and disposition of his pupil; and by a judicious course of kindness and encouragement, he aroused his dormant energies, and initiated him fairly into a course of study and improvement which did not cease through life.

One of our own acquaintances, who for years before his death, was widely known for his profound mathematical knowledge, and power of abstruse calculation, was so dull a boy, that after being long at school, his teacher—the late Enoch Lewis—thought it not worth while for him to attempt to go beyond arithmetic, as it would prove only loss of time.

We have no idea that all dull boys or girls have the capacity to become proficient in learning, nor that it is always the fault or deficiency of the teacher when they leave school with little knowledge and stunted intellect.

It however can hardly escape the observation of those familiar with schools, that the criterion for judging of competency in a teacher requires to be more elevated; and that the art of teaching and the capacity to comprehend different phases of youthful character, and meet the requirements of manifest idiosyncrasies, is much wanting among the many who aspire to be the educators of children. Parents are often in fault respecting the time and opportunity allowed their children for obtaining school education; and sometimes for interfering with the course of study prescribed by the teacher, who knows the ability of the child, and what is the proper order for him or her to pursue, in the effort to master the usual branches of a scholastic course. The brains of some children do not develop equally with other parts of their physical system, so that the size of an adult may be obtained while the organ for perception and thought is still that of a child. A skilful teacher soon obtains a knowledge of any such peculiarity, and understands how much mental labor the pupil can properly undertake, and what result may be rightly expected from it. Others who have not had the opportunity, or have not made use of the opportunity to acquire this knowledge, may do great injustice to the teacher and pupil, by attributing the slow progress of the latter to want of capability, interest or care on the part of the former, and undertaking to regulate the studies in their own way.

In our ordinary intercourse and dealing with children, we are all too apt to forget, that to them life and the world are new; that every thing is almost equally unknown and unexamined, and that until the freshness of what is presented to the senses has become somewhat exhausted, there is nothing that naturally seems more necessary for happiness than freedom from restraint. Curiosity is a prominent feature in their intellectual unfolding, urging to give attention to every new object that presents; to seek enjoyment from it for a short time, but impeding long detention with the same subject of thought. Hence their ideas, however vivid, are disconnected, and it requires a considerable effort to enable them to adopt a system, however simple, or master a complication of even a few elements. It is only as renewed observation rectifies former conclusions, and experience gradually teaches the reality of order, and the necessity for rules, that consecutive reasoning, and the capacity to arrive at definite results thereby, are to be expected. First impressions, whether of natural objects or the themes of education, are generally the deepest; and therefore continuing longest, may prove, as they are correct or erroneous, the means of betraying into future error, or assisting to guide into truth. It is therefore of great importance, that in responding to the natural eagerness in children for discursive inquiry, care should be taken not to give a false or ambiguous reply, however small the matter may appear. It is far better they should remain in ignorance about it, than receive false impressions, or entertain the erroneous conceptions of others. In the one case they will know they are yet to learn the truth, in the other they may suppose they have already been sufficiently instructed in relation to it.

This is preeminently important as respects the truths of religion, and the principles and practices connected with it, inasmuch as the

happiness and value of life depend upon their right reception and application.

"For reason still, unless divinely taught,  
 What'er she learns, learns nothing as she ought,  
 The light of revelation only, shows  
 What human wisdom cannot but oppose;  
 That man, in nature's richest mantle clad,  
 And graced with all philosophy can add  
 Though fair without, and luminous within,  
 Is still the progeny and heir of sin.  
 And without this, whatever he discuss,  
 Whether the space between the stars and us;  
 Whether he measure earth, compute the sea,  
 Weigh sunbeams, carve a fly, or spit a flea,  
 The solemn trifler, with his boasted skill  
 Toils much, and is a trifler still."

#### SUMMARY OF EVENTS.

**FOREIGN.**—Gladstone has issued the customary note requesting the presence of his supporters on the reopening of Parliament. At the same time he has written to Earl Granville, saying: I desire my political friends to clearly understand that at my age I must reserve my entire freedom to divest myself of the responsibility of leadership at no distant time. The need of rest will prevent more than my occasional presence in the House during the present session.

The Times, in a leading article, says so long as Gladstone remains in the House of Commons, he is the only possible leader of the opposition. Every true Liberal will accept his leadership on his own terms.

The Daily News says Gladstone's name is a tower of strength. The whole body of Liberals regard him as their natural head. Any other person would only be the leader of a section.

The Times publishes a long statement signed Charles Orton, in which the writer confesses that he recognized the Tichborne claimant as his brother the last time he saw him, and his silence was bought with £5 paid monthly for a year and a promise of a thousand or two in addition at the conclusion of the trial.

The Daily News and Telegraph give the following as a correct account of the treaty of peace with Ashantee: The king agrees to pay to Great Britain a war indemnity of 50,000 ounces of gold; renounces all claim to Adansi, Assia, Denkera, Akam and Wassa; withdraws his forces from parts of the coast belonging to or under the protectorate of England; undertakes to maintain a good road from Coomassie to the Prah river, and to protect commerce; will prohibit human sacrifices, and promises perpetual peace with England. General Wolesley does not expect the entire indemnity will ever be paid, but regards the other stipulations of vastly greater importance, and more likely to be adhered to. A garrison will be kept at Prahsn.

The Duke of Edinburg and his bride, entered London on the 12th inst., in the midst of a blinding snow storm. The reception by the people was warm and enthusiastic, many thousands lined the streets and gave a hearty welcome in the midst of the storm. A stand at Charing Cross broke down, throwing some fifty persons to the ground. During the day four persons were killed and twenty-four injured in consequence of the pressure of the crowd.

A meeting in favor of Fenian amnesty was held in Hyde Park on the 15th inst., at which 20,000 persons were present. A petition for the pardon of the Fenian convicts will be presented to the Queen in person.

A letter of the Pope to the Roman Catholic bishops of Austria, exhorting them to combat the pending ecclesiastical bills in the legislature, has been published. The Pope says the measures proposed are calculated to place the church in ruinous servitude. The Pope has also written to the Emperor of Austria adjuring him to protect the church within his dominions.

A Madrid dispatch of the 15th says, Serrano with an army of 30,000 men and 90 guns, is now face to face with a Carlist force of 35,500; while another army of 5000 men is moving on the Carlist rear. Gen. Moriones has resigned in consequence of illness, and Marshal Serrano has assumed supreme command of the Spanish forces in the north. The Governor of Bilbao has informed Marshal Serrano that he has provisions sufficient to last until April, and he will continue vigorously the defence of that city.

In the Committee of the Assembly on the electoral law, a proposition has been made by the Right for the disfranchisement of the colonies of France. Laboulaye made an earnest remonstrance, warning the members that the British colonies in America had been alienated by the denial of the right of representation. The colonial deputies have unanimously demanded the right.

A Vienna dispatch says: The Emperor Francis Joseph has authorized his government to assume a strong attitude against the ultramontane opposition to the ecclesiastical laws.

A Constantinople dispatch says: There is great distress among the poor here, in consequence of a heavy snow storm. Private charitable organizations, in addition to the government, are actively at work to relieve those who are suffering.

Advices from Rio Janeiro report that the Bishop of Pernambuco has been sentenced to five years in jail for continued resistance to the laws.

A dispatch from Cape Coast Castle, of the 22d ult., says that all the British troops except the Highlanders, have re-embarked for home. General Wolseley was to embark on the 7th inst.

The total number of British troops killed and wounded in the invasion was 384.

The steamship Laconia while on the voyage from Alexandria, Egypt, for Algiers, having as passengers 278 pilgrims returning from Mecca, encountered violent gales. One large wave which struck the vessel washed from her deck 117 of the pilgrims, and all were drowned.

A great assemblage of French people took place at Chiselhurst, England, on the 16th, to celebrate the eighteenth anniversary of the birth of the son of the late Emperor Louis Napoleon. Over six thousand cards of admission were issued, and those to French persons only. The Duke of Padua addressed the Prince in the name of the Frenchmen present, congratulating him upon having attained his majority. The Prince made a speech in reply thanking his countrymen for the faithful remembrance of the late emperor. He thinks there is an irresistible current of public opinion in France in favor of a plebiscite, and declares himself ready to accept its verdict. Among the eminent persons present were the Duke de Grammont and Rouher and Ollivier, once members of the French Cabinet.

The steamer Queen Elizabeth has been wrecked off Tariffu. Estimated loss £535,000.

London, 3rd mo. 16th.—Consols 92½. Bank rate of discount 3½ per cent.

Liverpool.—Uplands cotton, 7 15-16d.

City of Mexico advices to the 10th inst. have been received. A fearful outrage had occurred at Jalisco. A fanatical priest having advocated the extermination of Protestants, a mob of his hearers gathered in the evening and proceeded to the residence of John Stevens, a minister sent out by the Boston Board of Foreign Missions. He was seized by the mob, killed, and his body chopped into pieces. They afterwards sacked the house and carried off every thing of value.

The government has sent a detachment of troops to the place, and orders have been issued for the arrest of all the priests in Ahualulco and the neighboring town of Teshitan. A mob in Sagua, acting under similar religious frenzy, attacked the small garrison of the town, burned the archives and pillaged the houses of the authorities.

The Governor of the district of Mexico has issued an order prohibiting cock-fighting as a practice unworthy of a civilized people.

**UNITED STATES.**—On the 11th inst. Charles Sumner, Senator from Massachusetts, died in Washington after a short and violent attack of angina-pectoris. He had reached the age of 63 years, having been born 1st mo. 6th, 1811. For many years he occupied a distinguished position as the earnest and able advocate of the equal rights of man.

There were 523 deaths in New York city last week. The revenues of the Pennsylvania Railroad, in 1873, from the main line between Philadelphia and Pittsburgh, were \$24,886,009, of which \$19,608,555 were charges on goods transported, \$5,008,201 passengers, mails and expresses, and the balance miscellaneous. The expenses were \$15,440,305, leaving net earnings of the year \$9,445,704. The gross earning show an increase of \$2,297,683 over the preceding year.

The interments in Philadelphia last week numbered 287, including 98 under two years. Of consumption 54, inflammation of the lungs 22, apoplexy 10.

The expenditures of the Paid Fire Department of Philadelphia during the year 1873, amounted to \$473,237. The estimated losses on property destroyed by fire aggregated \$993,480. The smallest loss was in the 3d month \$25,046, the largest in the 9th mo. \$182,512.

The snow blockade of the Central Pacific Railroad was for a few days removed and the trains ran regularly, when another heavy fall of snow occurred, burying the road to a great depth in portions of the route.

The gross earnings of the Union Pacific Railroad in 1873, were \$10,266,103, and operating expenses \$4,974,861, leaving net \$5,291,242.

*The Markets, &c.*—The following were the quotations

on the 16th inst. **New York.**—American gold, 119 U. S. sixes, 1881, 119½ a 119¾; ditto, 1862, 117; ditto 1868, 118½ a 119; 5 per cents, 113½ a 114½. Superfine flour, \$5.75 a \$6.15; State extra, 5.675; finer brand \$7 a \$10.75. No. 1 Chicago spring wheat, \$1.55; No. 2 do., \$1.51 a \$1.53; No. 3 do., \$1.46 a \$1.48; western, \$1.62; amber do., \$1.68; white Michiga \$1.81. No. 3 western barley, \$1.80. Oats, 61 a 65 cts. Western mixed corn, 86 a 90 cts.; yellow, 90 cts. southern yellow, 90 cts.; white, 91 a 95 cts. **Philad.**—Uplands and New Orleans cotton, 16 a 17 c Superfine flour, \$5.50 a \$5.75; extras, \$6 a \$6.50; fin brands, \$7 a \$10.25. Western red wheat, \$1.60 a \$1.64; amber, \$1.70 a \$1.75. Rye, 95 cts. Yellow corn, a 83 cts. Oats, 60 a 64 cts. Carolina rice, 8½ c Smoked hams, 12 a 14 cts. Lard, 9½ a 9¾ cts. Clov seed, 8 a 10 cts. About 2000 beef cattle were sold the Avenue Drove-yard, common at 4½ a 5½ cts. per lb gross; fair and extra, 6 a 7¾ cts.; a few choice brought 8 cts. Sheep sold at 5½ a 6½ cts. per lb. gross, for common, and 7 a 8 cts. for fair to choice. Hogs \$8.50 a 2½ per 100 lb. net. **Chicago.**—No. 1 spring wheat, \$1.25 No. 2 do., \$1.18½; No. 3 do., \$1.15½. No. 2 mix corn, 61½ cts. Oats, 43½ cts. A young woman Friend, with experience as a teacher, desires a situation as assistant in a Friends' School. Address box 12, Kennett Square, Chester Co., Pa.

#### TRACT ASSOCIATION OF FRIENDS.

The Annual Meeting of the Tract Association Friends, will be held in the Committee-room of Art Street Meeting-house, on Fourth-day, the 25th inst. at 8 o'clock, P. M. Friends are cordially invited to present. EDWARD MARIS, Clerk.

Third month, 1874.

#### WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of this Institution are expected to be vacated at the close of Winter Session, in the 4th month next, Friends who may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee.

Nathaniel N. Stokes, Cinnaminson Post-office Burlington Co., N. J.

Charles Evans, No. 702 Race St., Philadelphia  
 Deborah Rhoads, Haddonfield, N. J.  
 Rebecca S. Allen, No. 335 S. Fifth St., Phila

#### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia  
 Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, on the 8th of 12th mo., 1873, at his residence Adrian, Michigan, JOSEPH GIBBONS, a beloved honored elder, son of the late Joseph Gibbons, a val minister of the Southern District Monthly Meet Our dear friend having improved his faculties means of use, dedicated his scientific and other attainments to the good of others. His more advanced was one of varied usefulness, both in the church and the community; manifesting a growth in grace, and deepening interest in the spiritual welfare of those around him. His sorrowing relatives and friends the consoling assurance that his end was peace.

—, 2nd mo. 17th, 1874, at her residence, Upper Chichester, Delaware Co., Pa., MARY PENNELL, relict of Joseph Pennell, in the 79th year of her age, a member of Concord Monthly Meeting. Her sufferings were very severe, which she bore with quiet, patient resignation, and her friends have the comforting assurance that their loss is her everlasting gain. "Gathered in shock of corn fully ripe."

—, at the residence of his parents, near Muscat Iowa, on the morning of the second of Third mo. 1874, BENJAMIN ELDRIDGE, son of Abner and Amy Eldridge, in the 26th year of his age.

WILLIAM H. PILE, PRINTER.

Memoirs and Letters of Sarah Hillman.

(Continued from page 243.)

To Martha Wistar.

"Philadelphia, 6th mo. 20th, 1837.

My Dear Friend:—If affectionate remembrance be sufficient to prompt us in this way to hold converse with those we love, then sure may dip pen in ink and venture on; otherwise there seems so many, many cares of one kind or other pressing upon me, I scarcely know where to begin, or what to say. Surrounded as we are in a city like this, with sources of sorrow, the heart that is willing in some little degree to lend its sympathies, to weep with those who weep, finds many to mourn with, as well as many to mourn over; and it is at times permitted too, through unutterable mercy, to rejoice with those who rejoice in believing that the Lord sitteth upon the floods, and that He reigneth, and with the Lamb will reign as King forever.

In looking back upon the solemn engagement in which thou and thy dear companion\* have been so sweetly banded with me, in exercise and in suffering, however feebly and unworthily I feel my very best efforts, to promote the cause and kingdom of my dear Lord and Redeemer, I am favored to feel a quiet peaceful rest, which is truly grateful, and worthy of heartfelt acknowledgment to our Almighty Helper.

May you, dear friends, be encouraged and strengthened in the work of your day, for truly the fields are white unto harvest; and ye read that 'He that reapeth receiveth wages, and gathereth fruit unto like eternal.' The burden of the church does rest on a very few there, and I cannot but believe it will be felt to fall with increased and increasing weight upon you, my dear friends, as the dear fathers and mothers left, are gathered to their heavenly home, and their vacant places must be stepped into by the next in the rear, as no break may be left for the enemy's over foot. Ah! then it is we are made to feel increasingly an awful responsibility; and earn for ourselves what the apostle meant by his expression, 'They watch for our souls as

they that must give account.' This is, and will be the place in which you, dear friends, must endeavor to be found faithful. I doubt not it is your chief concern to be furnished from Him, in whom are hid all the treasures of wisdom and knowledge, with counsel and strength, and wisdom, that thus you may be enabled to withstand in the evil day, and having done all—all the little you can—stand.

Oh! may there be raised up a succession of fishers, fowlers, and hunters, to seek the precious prey of the souls of men; that in the day when inquisition will be made, we may be found acquitted, and through the mercy of our adorable Advocate and Redeemer, be permitted on Mount Zion to stand, and forever celebrate the praises of our God and Saviour.

Dear — looks poorly, and seems bowed down; but I believe there will be a lifting up in the right time. He who knows us altogether, knows what to do with us; how to break us to pieces, and how to make us anew; and to prepare for the wedding garment—the righteousness of our dear Saviour.

Many dear friends are very tenderly in daily remembrance, of which thou may please inform with my love very affectionately. Love also to your dear children; for whom I feel particularly solicitous, that they may be prevailed upon to listen, morning by morning, to the secret, gentle whisperings of the still small voice—the pleadings of the Divine Spirit. That as they grow in years, they may grow in grace, and become as a field blessed of the Lord.

And now, dear friends, indebted for many kindnesses conferred while with you, on poor unworthy me, demanding my grateful acknowledgment—I, with unfeigned love, subscribe myself your attached friend,

SARAH HILLMAN."

To Martha Wistar.

"Philadelphia, 2d mo. 25th, 1838.

Dear Friend,—Inclination and leisure, perhaps thou knowest, seldom combine with such as like myself, have little talent for writing; and yet love prompts the effort to say to thee at this late period, thy letter was not only duly received, but was truly cordial. Many, many times has my spirit saluted thee, even amid new and unthought of trials, which have in these days come upon us. We have heard it said, 'The signs of the times are fearful!' And, 'who shall stand in the day that is approaching?' Some among us have been going as with our hands upon our loins and our mouths in the dust, secretly bemoaning the 'hurt of the daughter of Zion.' We have heard a sound, but not of peace; and have been ready to say, 'alas for the day!' but now it comes. May the Lord on high shield his own sheep and lambs everywhere. May He make himself known amongst them as of old he did for Israel; and deliver all that trust in Him. He is stronger than all. He that delivered

his servant from the paw of the lion and the bear, who led His chosen Israel through the sea; and who his ownself bore our sins, and carried our sorrows; who trod the wine-press alone, and of the people there was none with him; He knoweth them that trust in him.

Dear friend, may it be our chief concern to avail ourselves of the privilege granted the Lord's dear children—not only to 'believe in Him, but also to suffer for his sake.' It seems to me that as many as abide with their dear Master, as many as dare not make any compromise, neither to say with some, 'I am of Paul; and I of Apolles, and I of Cephas;' but do desire in humility and abasedness of soul to be bowed in spirit to Christ Jesus, being willing to suffer reproach for his blessed name sake, have a great fight of afflictions in store for them. And oh! may they be animated to 'hold fast the profession of their faith without wavering,' knowing that He is faithful that called them. May we, my dear sister, be found of this number—patient and faithful, bearing about in the body the dying of the Lord Jesus,—that His life may be manifested in us, and that through the power of His resurrection, we may know an overcoming of this present world which lieth in wickedness; and be prepared, through the boundless mercy of our adorable Advocate and Intercessor, to stand on Mount Zion with that blessed multitude, who in robes of white and with palms in their hands, forever praise his holy Name.

\* \* \* It is truly a very critical time with us as a people. Nevertheless I believe there will be a remnant left or preserved upon the ancient foundation of true Quakerism. There are many ways out, and but one way or door in to the sheepfold; and this way is Christ: whom to know, with the Father that sent Him, He has expressly said, is life eternal.

Another object of interest was that of dear —'s accepted offering. Ah! I do believe he has entered into covenant with his dear Master by sacrifice. May he be strengthened to keep hold of his part of the covenant, and be made useful and honorable among his brethren; yea, a blessing to his father's house. If thou please, remember me affectionately to him: and tell him to persevere, that *the prize* is at the end of the race.

Ah! methinks, though myself the very least in my Father's house, I can very sincerely crave for you dear friends, thou and thy husband, with whom, in some little measure, my spirit has travailed, that, notwithstanding your feeling of unworthiness and unfitness for the work of the Lord, the arms of your hands may be strengthened; that you may be clothed upon with the armor of righteousness on the right hand and on the left, and know a being kept, with my own soul also, as in the hollow of His hand. That thus we may move only in and by the appointment of the great and blessed Head of the church, who hath said, 'My sheep hear my voice, and

\* Clayton Wistar, afterwards an elder of Salem Monthly Meeting, N. J.

I know them, and they follow me: and I give unto them eternal life; and they shall never perish, neither shall any man pluck them out of my hand.' To His holy care and keeping I desire to commend us for time and for eternity; and in the love of the gospel, remain your attached, sympathizing friend,

S. HILLMAN."

(To be continued.)

### Animal Character.

(Continued from page 243.)

HORSE—OX—ASS.

It happened to me one night during the late war in France to ride into the court-yard of an inn which was full of French artillerymen. In the bustle and hurry of the time it was useless to call for the services of an ostler, so I set about seeking for stable-room myself. In the French country inns there are no stalls, and the only division between the horses, when there is any separation at all, is a board suspended at one end by an iron hook to the manger, and at the other hanging from the roof by a knotted cord. In this inn, however, even the hanging-board was wanting, and about fifty artillery horses were huddled together so closely as almost to touch each other, so that it was difficult to find an open space for my mare. At last I found an opening near a magnificent black animal, which I supposed to be an officer's saddle-horse.

A fine horse is always an attraction for me, so as soon as I had finished such arrangements as were possible for the comfort of my own beast, I began to examine her neighbor rather minutely. He seemed in perfect health, but at last I discovered a fresh wound on the near foreleg, evidently caused by the fragment of a shell. (There had been a battle at the place the day before.) Turning to an artilleryman who was standing by, I asked if the veterinary surgeon thought he could save the horse. "No, sir, he is to be shot to-morrow morning." This decision seemed hard, for the horse stood well, and was eating his hay tranquilly. I felt strongly tempted to beg him, and see what rest and care could accomplish.

At midnight I came back for my own mare. There was a great and terrible change in her neighbor's condition. He lay in the straw, half under her, the place was so crowded. I shall never forget his piteous cries and moans. He could not rise, and the shattered limb was causing him cruel pain. His noble head lay at my feet, and I stooped to caress it.

"So this is the reward," I thought, "that man gives to the best and bravest servant he has! A long night of intolerable anguish, unrelieved by any attempt whatever to soothe or ease his pain; in the morning, the delayed charity of a rifle-bullet!" This single instance, which moved me because I had seen it, perhaps a little also because the animal was beautiful and gentle, what was it, after all, in comparison with the incalculable quantity of animal suffering which the war was causing in half the provinces of France? These reflections filled me with pain and sadness as I rode over the battle-ground in the frosty moonlight. The *dead* horses lay there still, just as they fell, and for them I felt no pity. Swift death, sudden oblivion, rest absolute, unconscious, eternal, these are not evils; but the pain of the torn flesh and the shattered bone, the long agony in hunger and cold, the anguish of the poor maimed brutes, who struggle through the last dark passages of existence,

without either the pride of the soldier, the reason of the philosopher, or the hope of the Christian—that is evil, pure and unmixed!

Like all who love animals much, I know and remember them as I know and remember men.

The powers of affection in the horse are for the most part latent. We see faint signs of them, and there is a general belief that the horse has such powers, which is founded partly on some exceptional examples, and partly on a subtle satisfaction in believing that we are beloved by our slaves. But the plain truth is, that horses, as they live usually in our service, have little to love us for, and most commonly regard us either with indifference or dislike. When we come to the active vices, the hatred and rebellion of the horse against his master express themselves very plainly, much more plainly than equine affection expresses itself ever. Many of these vices are hereditary in the equine blood, and are a tradition of ill-usage. The way in which they burst forth in horses, apparently of the most tranquil character, is one of the mysteries of nature. Three instances have occurred in my own stable, of animals becoming suddenly and irremediably vicious, passing in the course of three or four days from a state like that of Paris under the Empire to the rage and rebellion of Paris under the Commune, and neither in these cases, nor in any other that has come under my observation, has a *real vice* ever been permanently eradicated. Horses become vicious from many causes; the most frequent, I think, is idleness, in combination with confinement and good keep. Out at grass a horse becomes wild rather than vicious, and mere wildness is easily curable by gentleness and patience. Tied up in a stable, with plenty of hay and corn, his system accumulates the electricity of irritability which ought to have been regularly expended in work, and it explodes in dangerous violence. Four days' idleness in an inn-stable, during wet weather, cost me the most valuable horse I ever possessed. On the fifth day no man could ride him, and no man was ever able to ride him afterwards.

Most horses are fairly good, and in some races almost all of them are docile. In other races vices of different kinds are very common. Take the Corsican ponies, for instance, a hardy little race of much speed and endurance, very useful to drive in pairs in small phaetons; they are nearly always vicious, though seldom vicious enough to interfere materially with their usefulness. A tiny pair were offered me with a pretty carriage, the whole equipage suspiciously cheap, but I discovered that one of the charming little creatures would kick and the other bit like a wolf. Afterwards, I found that these accomplishments were common to the Corsican breed; in fact, that they were generally as energetic, but as wilful and difficult to deal with, as their little human compatriot, Napoleon. On the other hand, there are breeds where gentle tempers and amiable manners are hereditary.

The conspicuous merit of the horse, which has given him the dearly-paid honor of sharing in our wars, is his capacity for being disciplined,—and a very great capacity it is, a very noble gift indeed; nobler than much cleverness. Several animals are cleverer than the horse in the way of intelligence; not one is so amenable to discipline.

The patient oxen! This is their main vir-

tue, patience. And their chief gift or endowment is strength. No animal known to us in Western Europe has patience comparable to that of the ox, and for vast strength, steadily exerted, he is above rivalry. The dray-horse is as strong, but he does not possess the persistent steadiness of trained oxen. The bovines have not the horse's irritability; the temper is very calm, slow to anger, and of infinite endurance. They work always upon nature's grand old principle of unhurried but untiring application, pushing on always with pressure equal to their task, as if life in the world were infinite for them, and the hour instead of flying, walked on at their own slow pace. Better servants man never had, and notwithstanding their slowness they achieve enormous results.

The animals which work for us show the character, as men do, in their work; and therefore, in speaking of the working animals, let me inquire, first, how they acquit themselves in service. The time when these animals are grandest is not, I think, their idle time; not the hours they pass in luxurious indolence: summer noontide, under the shade of widely-spreading trees, but their moments of supreme effort in harness, dragging great wains home in the late evening, when the sky is charged with thunder and the harvest is hastily garnered.

The difference of custom in the employment of oxen cannot be seen in a more striking manner than by visiting two old French cities, Sens and Autun, each on a market-day. (The fifteen hundred vehicles that go to the market at Sens, not one is drawn by oxen, or if there should be one, it is a chance which may happen twice in a twelvemonth.) At Autun, on the contrary, you will find perhaps a thousand pairs, all the heavy work being given to oxen in that neighborhood, while the light work, requiring speed, is reserved for horses.

In writing about the bovines it seems as if it would be an omission not to speak of the most magnificent example of their strength, the rage and fury of the bull, but in the papers I intend to confine myself pretty strictly to what I have seen, passing on with the most rapid allusion what I have read of or heard about, else there would be no end to the subject. Now, I never saw a bull really in a rage except once, and then most of the time, as the reader will see presently, I necessarily had my back to him, and could observe very little. It fell out in this wise. The present writer was descending a certain most lovely trout-stream, in his canoe, on a beautiful morning in June. In one place the stream passed through a great park-like pasture, and in the pasture were a herd of oxen with a very fine tawny-colored bull. This bull took offense at the canoe and became furious. He began by galloping alongside and bellowing, but afterwards dashed into the stream. Had I been a better strategist, he would have done this below me and cut off my retreat, but the road was open before me and I paddled for life. The bull got on astonishingly fast, though, in spite of the rough, stony river-bed. The water may have been seven inches deep, the current luckily, rapid, but great were my apprehensions of grounding, for had I once stuck fast my enemy would have been upon me. At length we came to a deep pool, with a quantity of snags. I slipped through these, but they stopped the bull, who floundered about

or awhile, and by the time he got to shore gain I was safe in an impenetrable cover.

A donkey's temper is closely connected with the barometer; he is comparatively miable and vivacious when the air is dry, at he subsides into sullen sluggishness under the influences of humidity. As to the state of the roads, he is delicate as a prettily-booted dy. Mud is his abomination; he cannot endure to splash himself, and will not trot on muddy macadam till compelled by the cruelty of his driver.

I have never yet seen the donkey which could be guided easily and safely through an intricate crowd of carriages or on a really dangerous road. The deficiency of the ass may be expressed in a single word; it is deficiency of delicacy. You can guide a good horse as delicately as a sailing-boat; when the skilful driver has an inch to spare he is perfectly at his ease, and he can twist in and out amongst the throng of vehicles when a momentary display of self-will in the animal could be the cause of an immediate accident. The ass appears to be incapable of any delicate discipline of this kind. He may be strong, swift, courageous, entirely free from any serious vice, but he is always in a greater or less degree unmanageable. When he is really vicious, that is another matter. There is no aid to his inventions, for he is quite as intelligent as the horse, and a thousand times more different to man's opinion or man's punishment. I have seen a donkey feign death so perfectly as to take in everybody but his master, who had been too often a spectator of that little comedy. Many asses are dangerous biters. It is probable that the idea of using the ass for service would scarcely have occurred to any modern nation if it had not come to us from the East. In hot sunshine the ass is at his best, and in the dry atmosphere of Palestine or Egypt he may display permanent activity. Besides, in those countries he has the immense advantage of possessing a foil to set off such merits as are really his. People who are accustomed to the camel, the most stupid of domesticated brutes, may admire the ass by contrast, as Sir Samuel Baker did. And there are races of Oriental asses far superior in elegance to ours, and superior perhaps in delicacy and docility.

(To be continued.)

For "The Friend."

### Church Discipline.

A recent number of *The Independent* contains some remarks on this subject, by W. C. Wilkinson, which are much in accordance with the spirit of our own Discipline, which seeks the restoration of those who have fallen into evil, and the preservation of the Church as an organized body of disciples, exemplifying in their daily lives, the doctrines they profess. The following passages are extracted from the article alluded to.

"The law of church discipline is laid down by the Supreme Lawgiver himself of the Church, in the eighteenth chapter of Matthew. The whole statute is a statute suffused with a tender spirit of love. There is nothing hard or harsh in any of its provisions. It enjoins forbearance and admonition, and only in the last degree of its application commands severance of a member from the body. It is of church discipline as conducted according to the letter and in the spirit of this law of the Lord that I speak. Church discipline thus conducted does no harm to any interest what-

ever. On the contrary, it serves many important uses, some of which I desire here to enumerate.

"In the first place, church discipline, lawfully and lovingly conducted, tends to reclaim the offending member.

"This is manifestly a leading object had in view by Christ himself in the ordinance of church discipline. It is noteworthy that the ordinance proper is immediately preceded in the text by what it is proper to regard in the light of a touching and significant parable. The Lord supposes the case of one sheep lost out of the flock of a hundred. 'Doth not the owner,' Christ asks, 'leave the ninety and nine, and goeth into the mountains and seeketh that which is gone astray? And if so be that he find it, verily I say unto you he rejoiceth more of that sheep than of the ninety and nine that went not astray. Even so it is not the will of your Father which is in Heaven that one of these little ones should perish.' The provisions of the statute regulating church discipline immediately follow. That tender, healing, balsamic expression, 'thou hast gained thy brother,' is another unmistakable note of the reclaiming object that was prominent in the thought of the Divine Lawgiver when he promulgated the law of his kingdom. Church discipline is primarily, then, only brotherly watch-care. It begins when the transgression is recent, and seeks to close before the transgressor that hard path on which he has entered at his very first step in it. It leads the transgressor to make confession of his fault—an act of Christian obedience, with one exception, the most difficult and at the same time most fruitful that any Christian can perform.

"In the second place, church discipline, rightly conducted, tends to promote the moral and spiritual benefit of those who conduct it.

"I know that precisely the opposite opinion as to the tendency of church discipline is very current. But this is because the nature itself of church discipline is radically misconceived. It is not a judicial procedure. It is a process of spontaneous peace-making. It is not official. It is brotherly. And *brotherly admonition* I reckon, beyond even the grace of confession, the highest and hardest and rarest office of Christian obedience toward a fellow-disciple. No doubt it is fatally easy for a brother aggrieved to go in a spirit of anger to the author of the grievance and rate him roundly for his fault. But this is crimination, not admonition. It begets recrimination, not confession. To admonish a brother, as a brother, for his sake, rather than for your own, ah! that is about the last achievement of grace in a human heart. But this is what the law of church discipline requires on the part of those who conduct it. What courage, coupled with what humility; what firmness, coupled with what gentleness; what pureness, coupled with what sense of fellow-weakness; what wisdom, what patience, what unselfishness, what love does the proper exercise of church discipline suppose on the part of those who administer it! To what a pitch of holy endeavor does it require them to rise!

"In the third place, church discipline properly administered, has a wholesome admonitory and restraining effect upon those members who do not directly participate in administering it.

"If discipline undertaken proceeds to its last degree—the expulsion of the offending

member—the law of Christ seems to suppose that the entire Church, as a body, engage in it. All the members, then, are active participants and none are mere spectators of the procedure. But the initiatory and intermediate steps, although these should, in fulfillment of the manifest intention of Christ, be as private and confidential as possible, will, in the nature of things, often inevitably be observed by some members that are not themselves implicated in the practical responsibility of the measures. There will somehow be diffused more or less widely through the body a sense of an unusual activity in the *vis medicatrix* which is lodged in the Church, working toward a particular member where there is felt to be a wound. The Church is one body, and it is not possible for any single member of it to suffer alone. There will be a certain indefinable consciousness spread throughout a considerable part, at least, of the Church that a rally and muster of the reserved recuperative forces of the organism is in progress. As far as this is the case so far there will be experienced a reflected sense of circumspection and fear on the part of each member for himself, lest he, too, in his turn, prove the occasion of a similar disturbance and a similar effort at self-recovery to the body. We are all of us so constituted that we do not like to have the rebuking and correcting offices of others directed toward us. There is a strange instinct in us all to shrink from becoming the object of moral reprehension, however kind and however healing, with our fellows. The just dread of this is one of the most effective deterrents from wrongdoing that the relations of man to man can furnish. It was the wise purpose of Christ in legislating for his Church to provide a system of means by which the scattered rays of moral public opinion could be promptly gathered and brought to a focus upon any member in the body that needed a concentration of external influence to reduce him to propriety in behavior. It is a sad loss to the good of all when this beneficent Divine provision is suffered to fall into neglect and disuse."

"In the exercise of church discipline the effort is to restore a mutual harmony in some degree impaired. The remedy is expressly adapted to the disease. The members themselves, between whom the breach of relation has occurred, are set to repairing the breach. If they fail, then other members are summoned to re-enforce their ineffectual efforts. Finally, if need arise, the whole body concentrates its vital reparative force at the point of rupture. If the utmost energy of the organism prove insufficient to restore the offending member to his place and office, then, with one supreme agony of self-recovery, the offending member is cut off."

Fifth month, 1803.—About these days my situation was that of secret mourning and lamentation, not for the dead, but for them that were gone into captivity, and for the slain of the daughter of my people. O Lord, by whom shall Jacob's seed arise, seeing it is so small and oppressed!—*Richard Jordan*.

How descriptive is the above of the mournful feelings and plaintive appeals of some in the present day! The sorrowful language of whose hearts at times is, "The ways of Zion do mourn," &c.; "her enemies prosper," &c.; "how doth the city sit solitary, that was full of people," &c.

What a comment is the following on the vanity of riches!

*Nathan Rothschild, of London.*—The high priest of the exchange was not happy, even in the midst of his overflowing coffers. Naturally enough, he had few friends and numberless enemies. In later years he suffered from constant dread of assassination. He was always receiving threatening letters, declaring that his life depended on his sending certain sums of money to certain addresses. He scented murder in every breeze, suspected poison in every cup. In sleep, he had nightmare visions of crouching things: in waking hours, he started at every unexpected noise.

One morning two strangers were announced as having important business with the banker, and they were shown into his private office. He bowed to them, and inquired the nature of their negotiation. They bowed and said nothing, but advanced toward him, thrusting their fingers nervously into their pockets. Rothschild's alarm was excited at once. They must be searching for concealed weapons: their bearded faces made it clear to his frightened fancy that they were homicidal ruffians. He retreated in terror behind a large desk, seized a ponderous ledger, hurled it at their heads, and screamed "murder," at the top of his voice. A small army of clerks poured into the room, and laid violent hands on the strangers, who proved to be wealthy Polish bankers, bringing letters of introduction to the (physically timid) lion of loans. Embarrassed by his auriferously august presence—what is there in a breathing money-bag capable of inspiring awe?—they forgot their speech and their common coolness of conduct. They were nearly as much terrified as the renowned Israelite; and, as it was their initial visit to England, they imagined at first that all foreigners were deemed robbers and desperadoes until the contrary was established.

The wretchedly rich Nathan never went out alone after dark, never entered an unlighted room, had servants within call of his bed chamber, slept with loaded pistols under his pillow.

A fellow-Frankforter, dining with him one evening, and, observing the luxury of his household, remarked: "You must be happy, baron, with the power to gratify every wish."

"Happy, indeed!" was the response. "Do you think it happiness to be haunted always with the dread of murder, to have your appetite for breakfast sharpened by a threat to stab you to the heart unless you enclose a thousand guineas to some unknown villain?"

On one occasion, when the great financier had been to an evening party, and had gotten into his carriage to go home, a friend, wishing to make an appointment, stepped out to speak to him. The timorous banker mistook his familiar for a highwayman, and thrust a pistol out of the carriage window, with his favorite cry of "Murder!" before he could be acquainted with the situation.

As Rothschild grew richer and older his fears increased. He became almost a monomaniac on the subject of assassination, and many of his relatives thought him in serious danger of insanity through his constant apprehensions. Most of the menacing messages were unquestionably sent by his enemies, with whom he was plentifully supplied. Conscious of his weakness, they revenged themselves upon him by inspiring him with baseless terrors. He was repeatedly told so, but he could

not be induced to believe that he did not dwell in an atmosphere of poisons, poinards and pistols.—*Harper's Magazine.*

#### MY DARLINGS.

Selected.

When steps are hurrying homeward,  
And night the world o'erspreads,  
And I see at the open windows  
The shining of little heads,  
I think of you, my darlings,  
In your low and lonesome beds.

And when the latch is lifted,  
And I hear the voices glad,  
I feel my arms more empty,  
My heart more widely sad;  
For we measure dearth of blessings  
By the blessings we have had.

But sometimes in sweet visions  
My faith to sight expands, —  
And with my babes in his bosom,  
My Lord before me stands,  
And I feel on my head, bowed lowly  
The touches of little hands.

Then pain is lost in patience,  
And tears no longer flow;  
They are only dead to the sorrow  
And sin of life, I know.

*Alice Cary.*

Selected.

#### PRAYER FOR STRENGTH.

Father! before thy footstool kneeling,  
Once more my heart goes up to Thee;  
For aid, for strength, to Thee appealing,  
Thou who alone canst succor me.

Hear me! for heart and flesh are failing—  
My spirit yielding in the strife;  
And anguish, wild as unavailing,  
Sweeps in a flood across my life.

Help me to stem the tide of sorrow;  
Help me to bear Thy chastening rod;  
Give me endurance; let me borrow  
Strength from thy promise, O my God!

Not mine the grief which words may lighten;  
Not mine the tears of common woe:  
The pang with which my heart-strings tighten,  
Only the All-seeing One may know.

And I am weak; my feeble spirit  
Shrinks from life's task in wild dismay:  
Yet not that Thou that task wouldst spare it,  
My Father, do I dare to pray.

Into my soul Thy might infusing,  
Strengthen my spirit by Thine own,  
Help me—all other aid refusing—  
To cling to Thee, and Thee alone.

And oh! in my exceeding weakness  
Make Thy strength perfect: Thou art strong!  
Aid me to do thy will with meekness,  
Thou, to whom all my powers belong.

Saviour! our human form once wearing,  
Help, by the memory of that day,  
When painfully Thy dark cross bearing,  
E'en for a time Thy strength gave way.

Beneath a lighter burden sinking,  
Jesus, I cast myself on Thee;  
Forgive, forgive this useless shrinking  
From trials that I know must be.

Oh! let me feel that Thou art near me,  
Close to Thy side I shall not fear.  
Hear me, O strength of Israel! hear me;  
Sustain and aid! in mercy, hear!

Selected.

Since trifles make the sum of human things,  
And half our misery from our foibles springs;  
Since life's best joys consist in peace and ease,  
And few can save or serve, but all may please;  
Oh! let th' ungentle spirit learn from hence  
A small unkindness is a great offence.  
Large bounties to restore we wish in vain,  
But all may shun the guilt of giving pain.

*Hannah More.*

For "The Friend."

Believing the following extract from Friends Library, entitled "Institution of the Discipline," vol. 1st page 123, may be interesting to the readers of "The Friend," it is sent for insertion therein.

"In John Burnyeat's Journal, he observes that at the Half-Year's Meeting at Oyster Bay on Long Island, in the Eighth month, 1671 Friends were much troubled with 'several who rose up in a wrong spirit,' against the blessed order which Friends were gathered into and sweetly settling in; and their envy and bitterness was chiefly against George Fox and his papers of wholesome advice, which in the love of God, he had sent among Friends. These papers were doubtless the Epistle issued by that eminent man on the subject of discipline, which were received in this country and noticed on the minutes as authoritative in the Society. That the Discipline instituted by him, was substantially the same as that now existing, at least in its principal features, the following extracts will illustrate. They also evince the comprehensiveness of his mind, which with no other external guide than the New Testament, marked out a system of church government embracing so many important points, and so completely adapted to the various circumstances of the Society that, through all the changes which have occurred in a period of more than one hundred and seventy years, it has been found adequate to meet the wants of the church. These extracts are rendered more interesting also, by the view which they give of the amiable and excellent traits of his character. Love to the brotherhood and to all mankind—a desire to promote peace and happiness among his brethren; sympathy for the afflicted; care for the destitute; liberality to the needy; tenderness and forbearance toward the erring, and kindness and courtesy to all, are strongly marked throughout the whole.

No man of unprejudiced mind and competent judgment, can peruse the disciplinary regulations made by George Fox, without being struck with the wisdom, moderation, and christian dignity and propriety which distinguished them. 'There is no character in Christian history since the days of its divine Founder,' says the Annual Review and History of Literature, 'more free from spot or stain, than that of George Fox. It is not less absurd to pronounce him insane from his writings, than it would be to pronounce Cromwell a fool from his speeches. By their actions they are to be judged. No form of civility so unexceptionable in its means and end, so beautiful in all its parts, so perfect as a whole, has ever been imagined in philosophical romance, or proposed in theory, as this man conceived, established and reduced to practice.'

Such is the opinion respecting George Fox and the Discipline, expressed by persons not members of the Society of Friends, and consequently not likely to be influenced by sectarian partialities. It is not surprising if those who enjoy the privileges of membership, and realize the beneficial and happy effects resulting from the institution which he was the instrument of establishing, should love the character of the man, and cling with religious veneration to the principles and practices of their forefathers, from which they have derived superior advantages for so many generations."

### Changing Climate of the Atlantic Coast—Laws of the Weather.

We have in this city a very skilful and careful observer of the weather—Daniel Draper, director of the Meteorological Observatory at Central Park. Persons who lounge through the lower room of the Museum building at the Park, and notice with curiosity the records of the thermometer and barometer and anemometer, get but a poor idea of the real labors of the director. The solid fruits of his toil appear in his annual reports, where he classifies and makes instructive use of the myriad data thus obtained, and deduces results of great value. His last report just issued, is rich in philosophical truths. It contains not merely what he can pick up at the Park, but laborious comparisons of observations for several points on the Atlantic coast for terms of years, and the conclusions justly based thereon. D. Draper is the persistent foe of one popular fallacy—and in this number he seems to demolish it altogether. The fallacy is this (it is very prevalent among old people)—that the temperature of the Atlantic States is becoming warmer. This notion, often expressed in current literature, ought to disappear from print after the severe handling it receives from this meteorological expert. This year he confines his investigations to the months of June, July and August in groups of five years, at various points on the coast, and we give the general results. For New York the mean of four groups of five years each for the months given is 71.83 degrees, and the mean of the same months for thirty-three successive years is 72.09. The Philadelphia records for four groups of five years each show a mean of 73.57 degrees, and the mean of the same months for fifty-six years is 73.79. The Boston observations date back eighty-four years, and the mean for the three months is 69.43, and that for the four groups, &c., is 69.39. At Charleston, the mean of four groups, selected from observations between 1750 and 1854 is 80.12, and there is no variation worth mentioning from one end of the scale to the other. The registrations for New Haven cover a period of eighty-six years, and the mean is 69.76 degrees, and that for the group selections 69.77. Incidentally, we would notice the difference in the mean temperature of all these places as follows, for the longest terms of the observations:—Boston, 69.43; New Haven, 69.76; New York, 72.09; Philadelphia, 73.79, and Charleston, 80.12. From these tables D. Draper deduces the truth that there has been no change in the temperature of the three hot months of the year in the Atlantic States, thus strengthening the opinion maintained by him last year in his investigations of the winter months, as far back as we have any records. In the report of 1872 he also showed that, taking the rainfalls in successive periods of ten years each, and comparing them, there is no apparent increase or diminution in the mean quantity of rain; also that the number of days that the Hudson River had remained closed, taken in periods of ten years, from 1817 to 1867, was about 91 annually, and that the mean did not vary during the entire period of the record. Statistics at New Orleans, Cincinnati, St. Paul and other places, as far as they go, indicate alike stability of climate. Turning from this subject the author inquires—What is the direction in which atmospheric fluctuations cross the United States? In March, 1872, as thou-

sands of persons have unpleasant cause to remember, a biting cold wind from the north-west swept over a vast tract of country, killing deciduous and evergreen trees by the million. The Central Park alone lost eight thousand trees by this unseasonable blast. Our own investigations made at the time showed a wide-spread destruction all over Long Island, New Jersey, the New England States, and West as far as the Rocky Mountains. D. Draper, studying the history of this phenomenon, finds that the cold wind made itself first felt on March 13, in the region between the Rocky Mountains and the Mississippi. It had a front of at least 1,000 miles, and a velocity of 500 miles a day, and lowered the temperature of places over which it passed by more than 20 degrees. On the 14th it traversed the space between the Mississippi and the Alleghany range; on the 15th it swept on to the Atlantic coast, and thence out to sea. This terrible wind followed a course perfectly well-defined by barometrical and thermometrical records; and it is the same course taken by all the great atmospheric waves, cold or warm, which pass over the Atlantic slope of the United States. Their uniform direction is towards the East. Tables also indicate that while some of the atmospheric movements are cyclonic, or arranged round a central point, many are analogous to those exhibited by the ocean waves, long and straight, with maxima and minima lines. The great rainstorms over the same region generally move in an easterly direction. D. Draper presents tables of the movements of storms originating in this country and traversing the Atlantic Ocean. Within certain limits the time of their passage may be predicted. From a comparison of the registers at the Central Park Observatory and those of Valentia and Falmouth he obtains this law—In the case of an easterly wind which is travelling about 200 miles in 24 hours, find the exact time of the lowest reading of the barometer, and ascertain the speed of the storm for 24 hours before and 24 hours after that time, and the mean of these two numbers will give the rate of progress in 24 hours; then divide 4,200 by this last number, and the quotient will express the number of days required for the storm to cross from New York to Falmouth or Valentia. D. Draper gives one example out of many to demonstrate this. October 4, 1869, there occurred a low barometer at the Park Observatory. In the 24 hours previous, the wind had made 313 miles, and in the next 24 hours it made 286 miles—the mean being 299. Dividing 4,200 by this, the theoretical time of passage across the Atlantic was 14 days, and the date of its arrival at Falmouth October 18. The English weather reports proved that the actual time of its arrival was on the calculated day. D. Draper notices the curious occasional fact that storms leaving this side of the Atlantic several days apart arrive in the British Island on the same day; also, that there are instances in which the last storm overpasses the first by several days. Out of eighty-six atmospheric disturbances expected to cross the Atlantic, only three seemed to have failed.—*Journal of Commerce.*

How hard it is for wise people to become fools; indeed it seems as though they would rather remain fools than become wise through this medium.—*Richard Jordan.*

For "The Friend."

Some of the editorial remarks in the 18th number of the "Friend," do not dovetail with some in the 29th number. After a quotation from Robert Barclay on the subject of Divine worship, it is said: "The pre-arranged reading of the Scriptures, is as much will-worship and stated service or ritual, as is reading the liturgy in the 'Established Church.' Much has been said, both in this country and in England, to reconcile Friends to having the Scriptures read in their meetings, but we cannot see how any one, understanding and holding the doctrine of Friends in relation to the spirituality of Divine worship, and the necessity for the direct influence of the Holy Spirit for every act of worship, can give countenance to such an open violation of that fundamental doctrine, as to assemble with those who practise it." In the 29th number, it is said: "While we believe that those who are in the practice of those things," (reading the Scriptures or singing psalms or hymns), "have no valid claim to the character or name of Friends, yet we apprehend the *time has not come*, when those who adhere to the doctrines and testimonies which Friends have ever held, and who alone are the true Society of Friends, are prepared to determine what further the Head of the church requires at their hands."

Now, it appears clear to me, that the writer in the 18th number thought the "*time had come*," when Friends thus situated (as described) should "*determine* what further the Head of the church requires at their hands." A course to be pursued is even pointed out for them. "We would suppose they would greatly prefer to sit down with their families at their own homes, and there wait reverently upon the Father of Spirits, than submit to such a ceremony, such an impediment to the most solemn act in which their souls can be engaged." The views held out in the paragraph quoted (18th number), are in accordance with those of Robert Barclay, published nearly two hundred years ago, and to which the Society of Friends has set its hand and seal, believing that he wrote under Divine direction and guidance, and therefore, the Head of the church has "*determined*" for Friends what they may and ought to do under such circumstances. So that we conclude with Robert Barclay, "That where a people are gathered together into the belief of the principles and doctrines of the gospel of Christ, if any of that people shall go from their principles, and assert things false and contrary to what they have already received; such as stand and abide firm in the faith, have power by the Spirit of God, after they have used Christian endeavors to convince and reclaim them, upon their obstinacy, to *separate from such*, and to exclude them from their spiritual fellowship and communion, for otherways if this be denied, farewell to all Christianity, or to the maintaining of any sound doctrine in the church of Christ." A.

[The difference, between those members of a meeting, where the reading of the Scriptures has been introduced as part of its "service," worshipping at their own homes, and Friends as a Society deciding "what further the Head of the church requires at their hands," is so clear and decided, that we apprehend few, if any other of our readers do not see and comprehend it, and therefore that it is not necessary to enter into any explanation respecting it.—Eds.]

For "The Friend."

John Heald.

(Continued from page 242.)

"2d mo. 12th, 1819. At Madison I took up some time in treating on silent worship, showing that it was nowhere commanded by the Divine Master, that [his disciples] should preach at all meetings they came to. The fashion or custom of preaching as now used may cause people to think this must be right, and without examining impartially we are liable to be imposed on. The Master entered into a synagogue and stood up to read, and received the book of the Prophet Isaiah, and, when he had read a few lines, returned the book and sat down, and the eyes of all the people were fixed on Him. Was there not a sitting in silence then? I suppose more can be said in favor of silent waiting than many are aware of. When there was silence in Heaven for the space of half an hour, nothing is said of its being wrong or unacceptable. We are instructed to pray, Thy kingdom come, thy will be done in earth as it is in heaven; and we ought to wait to know what the will of Heaven is, and then endeavor to do it. Where two or three are gathered together in my name, there am I in the midst. Here not a word is said of preaching to them.

Ruth Spencer had notice given of a meeting at a place called Log City, to which we went. The meeting was in a school-house which was filled to overflowing. Ruth spoke a short time, and I followed, and in closing desired them not to put off the necessary preparation for death, until the things concerning their peace be hid from their eyes; as did the people formerly whom our Saviour wept over, saying, O Jerusalem, Jerusalem, thou that killest the prophets and stonest them that are sent unto thee, how often would I have gathered thy children, even as a hen gathereth her chickens under her wings, but ye would not; now the things belonging to your peace are hid from your eyes. This is a deplorable state for a poor creature to fall into. A man made some objection to this, and wished me to explain the last sentence. Some others called on him not to disturb the meeting now. Ruth made some pertinent remarks, and said that God's spirit would not always strive with those who would not be gathered; that the destruction of such was of themselves. The man again retorted, when she said she wished none might put off till no way remained for them to be gathered, but they must be cast off. It was a solemn time on the minds of the people generally.

18th. We attended the Quarterly Meeting at Duaneburg. My mind labored under an exercise in regard to the youth. In many places, two or three families live detached from Society, and sometimes a family alone, and schools nearly all made up of other people. In attending to the answers to the Queries, there appeared to be divers instances of deviation in dress and address, and in the unnecessary use of strong drink; and so far as I had passed, there were very few children favored with a guarded education, but were generally put under the care of other people to be taught. Under a sense of the probability that they would imbibe some improper views from their teachers, my mind became deeply exercised. When I thought of expressing my concern to the men, I wanted the women to hear, and I could find no way more likely [to yield relief] than to request that the parti-

tions be opened. This was readily acceded to, and I opened my concern. I moreover mentioned that I rejoiced in finding so much tenderness among the dear young people, that were preserved as well as they were. When I had cleared myself, Anna M. Thorn of Nine Partners, followed, and there was much tenderness among both old and young.

23d. At Middlefield, my mind soon felt a concern of a trying kind. I mentioned the young man who came to our Saviour, saying, What good thing shall I do that I may inherit eternal life. It seemed he had a serious, inquiring turn of mind, wanted to enjoy felicity, but when he heard what was to be parted with, he went away sorrowful. Thus many are in degree inquiring, O what shall I do that I may be happy! Here with many ends the concern, and it is often forgotten for a length of time, though it is so clearly seen that something should be done. It seemed to me that I never felt so much indifference in any meeting, and I labored long to gain a little sober attention, and in a degree of love concluded.

24th. Yesterday afternoon and this morning I felt grieved for the people. Sadness of heart was my lot, because there seemed to be no entrance to engage their attention to their truest interest. Though this was a general sense, I believe their were some sincere, tender-hearted ones among them.

25th. At Charleston. O how poor I feel this morning. I do not know but that I have somehow missed the way that I should go, and I do not know where it is I have missed, if I have taken an improper step. It was dreadful to me to go on toward the meeting, but we got there in time and sat down. Some small opening presented to my mind, and at length it felt as though I must offer the little, and I said, He that knew his Lord's will, and did it not, should be beaten with many stripes. To our own Master, we must either stand or fall, and He whom we profess to serve, knows all our weakness or frailty. He knows the ability we are furnished with, and we can hide nothing from Him. Going on in fear and under a sense of much weakness and some trembling, proceeding carefully as way and matter opened, I treated of the attention due from parents to children, and from children to parents; and how desirable to parents, after they have by night and by day attended to the wants of their dear children, that when they require them to do something, they obey with readiness, doing as well as they know how. But if perverse disobedience be the way they practise, how far this is from being acceptable to the parents, how far from making a grateful return for so great care. And should not we yield obedience to the Great Parent? Is it not ingratitude to neglect to obey Him? Shall we receive many blessings and be desirous of more, and return feigned, pretended obedience? As I proceeded I felt strength to increase, and tenderness and solemnity spread over the assembly, and it became a season of favor, and my heart breathed thankfulness and praise to the bountiful Giver. Before parting I bid them an affectionate farewell, and commended them to God and the Word of His Grace. They appeared after meeting solemn, not going into light or vain conversation, as in some places I have painfully witnessed.

27th. We attended Monthly Meeting at

Duaneburg. Before the business came on had a short testimony which was close, saying, that things will not always be in the way they are in, that such as are lifted up will be brought down, and such as are of low degree will be exalted, those who are wise in their own eyes, and prudent in their own conceit, will be brought down, while the humble who are little in their own esteem and of low estate are exalted. It was trying exercise, but when I had got through I sat down relaxed. This communication had considerable reach on divers that were present.

Last evening we received letters from our connections and friends at home, giving an account of their welfare, which has been renewed cause of thankfulness to the Father of mercies, that as he had been pleased to engage me to leave these dear objects of my love, He had preserved them and me too, I being now near six months since receiving any account from them.

28th. Attended a meeting at Duaneburg I sat tryingly exercised for some time, then arose and said, The winter is gone, the rain is over and past, the time of the singing of birds is come, and the voice of the turtle is heard in the land. I then intimated that the description fitly applied to the poor, tried soul that has been tempted and buffeted, and has passed through these difficulties with conflict and adversity, and begins to feel the genial warmth of the Sun of righteousness to arise. Ah how pleasing to realize the winter to be gone, the rain over and past, the time of the singing of birds to be come and the voice of the turtle to be heard in the land! How consoling how rejoicing, to experience what is no doubt intended to be conveyed by this passage! The preciousness of it is sufficient to cause the heart of the widow to sing for joy. But, my friends, after all this [how sorrowful it would be if] there should be a sitting down at ease a forgetfulness of past favors, and resting satisfied in the time of prosperity, the time of adversity and of favor too, forgotten. This state of ease is too natural to us, and without watchfulness we are very liable to fall into it; and in the times set apart for our solemn approaches to our Maker to permit the mind to wander, and to stray away after the delights of this world, the amusing gratifications of the things of time. I was favored to bring several ideas feelingly to view, and believe the minds of many were humbly impressed. I wanted that the humble, careful travellers should be encouraged, and I believe they were; and the negligent warned.

(To be continued.)

*The Foot of a Horse.*—The human hand has often been taken to illustrate Divine wisdom—and very well. But have you ever examined your horse's hoof. It is hardly less curious in its way. Its parts are somewhat more complicated, yet their design is simple and obvious. The hoof is not, as it appears to the careless eye, a mere lump of insensible bone fastened to the leg by a joint. It is made up of a series of thin layers, or leaves, of horn about five hundred in number, and nicely fitted to each other, and forming a lining to the foot itself. Then there are as many more layers, belonging to what is called the "coffin bone," and fitted into this. These are elastic. Take a quire of paper and insert the leaves one by one into those of another quire, and you will get some idea of the arrangement of

he several layers. Now, the weight of the horse rests on as many elastic springs as there are layers in his four feet—about four thousand; and all this is contrived, not only for the conveyance of his own body, but for whatever burdens may be laid on him.—*Rural Tome.*

For "The Friend."

"Would you judge of the lawfulness or unlawfulness of pleasure? of the innocency or malignity of actions? take this rule: Whatever weakens your reason, impairs the tenderness of your conscience, obscures your sense of God, or takes off the relish of spiritual things; in short, whatever increases the authority of your body over your mind, that thing is sinful to you, however innocent it may be in itself." Thy monstache is quite a pretty one—it suits nicely the general contour of thy face; imparts to thee a half-military, and sort of European style, which, with thy broad, square shoulders and good carriage, makes thee one that may well be admired. Thy clothes, and the selection and arrangement of thy jewelry, are certain to attract the attention of whoever may be in thy presence. Thy manners are sufficiently polished and are quite attractive. Thy acquirements are considerable—thou art well posted in Shakespeare, Dickens, and many of the poets. Thy associates accord thee much attention and preference; the fact is, thou art really very popular, and there is a lustre about thee that impresses thy friends caution thee about thy tastes, don't attach too much importance to it, for they forget the claims as well as the charms of youth—they have had their good time, and have outlived their love for externals; and if thou should listen to all their admonitions, counsels and warnings, thou might pass thy morning in gloom, and be shut out from sunshine the best part of thy day; No, no, don't regard them—they will get over it.—And more than all this, if thou allows thyself to become too conscientious, thou'lt never get long in business in the world. Sharp, shrewd men would pluck thee on every side, and leave thee away in the rear to be pointed at as one that couldn't make a living.

Thus has the devil been instructing thee; all this and more too of a similar nature, has been the enemy of thy peace, already persuaded thee to believe, is true—thou hast imbibed it all, and the poison is now working—that tenderness of conscience which preserved thee in an earlier life is waning—the light that was in thee is growing less and less, darker and darker. Gross sins thou wast never guilty of, but, "the little foxes are spoiling the tender vine." The vanity of thy mind, thy love of approbation, thy forgetfulness of thy Creator, thy ambitious dreams of the future, thy name of the Master and His words, thy fear of the cross of a crucified Lord, thy dread of any straight and narrow way, thy refusal to deny thyself objects and idols which thou knowest to be wrong, are all fast sapping thy spiritual life, and to-day thou art further from God and His salvation than thou wast a few years ago.

There is a way to return which thou art ignorant of:—forgiveness afresh, and reconciliation awaits thee. "Repent, for the Kingdom of Heaven is at hand." And "boast not thyself of to-morrow, for thou knowest not what a day may bring forth." Accept now the proffered blessing of divine help; re-

turn again to Bethel where God met with thee in the beginning; repent, and thy soul shall yet live. Apply thyself with earnestness to the means appointed in God's mercy for thy restoration, until enabled to exchange thy pleasure building of to-day, which hath only sand for a foundation, for the substantial and ever enduring felicity of the redeemed. I know thee not by name or place—only as a brother for whom Christ died, and whose cause he is even now pleading at the Father's throne: He loves thee, and wants to save thee so much, and yet I fear thou "will not."

*Sex in Education.*—Dr. Clarke, in his little volume upon this subject, has pointed out in a very impressive way the bearings of science upon a question which has been hitherto handled with very little reference to scientific principles. He says that the endurance of women is not equal to that of men, which everybody claimed to know before; but he says that this inequality of endurance must shape school policy, which has not hitherto been admitted, and he furthermore discloses the mischievous and fatal consequences that follow in our schools from practically disregarding the physical differences of sex. The effects of exposing girls to the same school method and discipline as boys are injurious and often fatal to health, but from their nature they are studiously concealed, and in the present temper of public feeling are often persistently denied. The doctor, however, has studied the question as a physician, and the book abounds with painful evidences that he has studied it to some purpose. He shows what must be the inevitable consequences of the co-education of the sexes carried out as a system, and maintains that what science predicts experience verifies. He says: "A philanthropist and an intelligent observer, who has for a long time taken an active part in promoting the best education of the sexes, and who still holds some sort of official connection with a college occupied with identical co-education, told the writer a few months ago that he had endeavored to trace the post-college history of the female graduates of the institution he was interested in. His object was to ascertain how their physique behaved under the stress—the wear and tear of woman's work in life. The conclusion that resulted from his inquiry he formulated in the statement that "the co-education of the sexes intellectually a success, physically a failure."—*Galaxy.*

#### A Voice from the Past.

*Extract from an Epistle issued by Philadelphia Yearly Meeting in 1833.*

The present period is remarkable for the great number of undertakings that have for their object the promotion of moral, religious or benevolent purposes, and in which the co-operation of Friends is often solicited. We believe that a frequent or familiar association with the world and with those who do not conform to our principles or practices, whether by writing or carrying on such plans, or in our common intercourse among men, is calculated to have a weakening effect on the mind, to leaven us into the spirit of the world, and expose us to temptation, to depart from our religious testimonies. It behoves us all, and especially the young convinced, to beware of the great and increasing activity which prevails at the present day, lest by

running into things which are not convenient for them, their spiritual strength may be dissipated, and their advancement in the work of true religion obstructed.

Be on your guard, dear young Friends, against too readily joining yourselves with any of these associations. You will find your safety to consist in stillness and a deep indwelling with the Seed of life in your own hearts, keeping within the bosom of our own Society, and in your daily walk in the world, showing forth a good conversation with meekness of wisdom in all lowliness of mind. Avoid entering too freely into conversation on religious topics, or meddling with subjects which are too high for you; and rather seek to learn in the School of Christ, those things which belong to your own everlasting peace, than be forward to engage in religious discussion.

Let nothing induce you to slight the precious testimonies of truth, either in your dress, language or deportment, but yield yourselves to the restraining power of the cross, which will circumscribe your desires and give you solid peace and contentment in a plain and moderate way of living. This will preserve you also from seeking after wealth, or engaging in great trade or business, both of which are snares that have entangled many visited minds, been productive of sorrowful consequences to them, and brought reproach on our religious profession. Finally, dear Friends of every class, may we all press after an increase of that heavenly fellowship which stands in Christ Jesus, our holy head, that, being baptised by one spirit into one body, we may experience a united and harmonious travail for the preservation of our religious Society on its original foundation; for the support of its testimonies, and the faithful administration of its discipline; that thus coming unto Christ as unto a "living stone, disallowed indeed of men, but chosen of God, and precious, we also as lively stones, may be built up a spiritual house, an holy priesthood, to offer up spiritual sacrifices, acceptable to God by Jesus Christ."

(Signed,)

WILLIAM EVANS, Clerk of Men's and  
RUTH ELY, Clerk of Women's Yearly  
Meeting.

*Remarkable Memories.*—Mary Somerville, in her recollections, gives the following instances which came under her observation:

"There was an idiot in Edinburg, the son of a respectable family, who had a remarkable memory. He never failed to go to the kirk on Sunday, and on returning home could repeat the sermon word for word, saying, Here the minister coughed, Here he stopped to blow his nose. During the tour we made in the Highlands, we met with another idiot who knew the Bible so perfectly that if you asked him where such a verse was to be found, he could tell without hesitation, and repeat the chapter. The common people of Scotland at that time had a kind of serious compassion for these harmless idiots, because 'the hand of God was upon them.'

The wise as well as the foolish are sometimes endowed with a powerful memory. Dr. Gregory, an eminent Edinburg physician, one of the cleverest and most agreeable men I ever met with, was a remarkable instance of this. He wrote and spoke Latin fluently, and Dr. Somerville, who was a good Latinist, met with a Latin quotation in some book he

was reading, but not knowing from whence it was taken, asked his friend Dr. Gregory, 'It is forty years since I read that author,' said Dr. Gregory, 'but I think you will find the passage in the middle of such a page.' Dr. Somerville went for the book, and at the place mentioned there it was."

This belief, of the necessity of imperfection, is not only dangerous but hurtful; for instead of inciting to endeavors after holiness, it discourages all attempts thereto. For what need a man set forth towards a city, while he believes he shall never come there?—*John Crook.*

## THE FRIEND.

THIRD MONTH 28, 1874.

### SUMMARY OF EVENTS.

**FOREIGN.**—An analysis of the returns of the recent parliamentary elections in Great Britain exhibits the remarkable fact that, although the Conservative party elected the majority of the House of Commons, the Liberal party had a majority of the popular votes. The Liberals polled 756,386 votes throughout the kingdom, and the Conservatives 690,782, a Liberal majority of 65,654, and yet the Conservatives have a majority of 50 in the House.

Parliament reassembled on the 19th, and the members of the House of Commons were summoned to the Chamber of the Peers to hear the Queen's speech read. Among the subjects referred to in the speech, are the marriage of the Queen's son with a Russian princess, which is regarded as a pledge of friendship between two great empires; the successful result of the Ashantee war, and the drought which has affected the most populous provinces of the Indian Empire. In reference to the latter the Queen says: "I have directed the Governor-General of India to spare no cost in striving to mitigate this terrible calamity." Attention is called to the delay and expense attending the transfer of land in England, which form a serious obstacle to dealings in real property, and it is intended to submit measures for consideration which will, if adopted, remove much of the evil complained of. A bill will also be introduced dealing with such parts of the acts regulating the sale of intoxicating liquors as have given rise to complaints. Several local matters are referred to, including the working of the act affecting the relationship between master and servant; the act dealing with offences connected with trade, and the law of conspiracy. The Government desires that Parliament before attempting fresh legislation on these subjects, should be in possession of all the material facts and know the precise questions in controversy, to obtain which knowledge a royal commission of inquiry has been issued in regard to the state and working of the laws referred to.

Disraeli gave notice that the government would ask for the adjournment of the House from the 31st inst. to 4th mo. 13th. He promised that the budget would be ready on the 16th prox.

On the 20th a remarkably high tide occurred on the eastern coast of England. Ipswich, Yarmouth and Hull, were partially flooded, and the Thames rose so as in some places to overflow its banks to the damage of adjacent stores and warehouses. Several persons were drowned.

General Wolseley and part of the troops of the African expedition, have returned to England.

A loan of \$50,000,000 is needed for India, of which \$15,000,000 are wanted immediately.

Disraeli has refused to receive a deputation that came to ask for the release of the imprisoned Fenians.

A decree has been promulgated in Madrid establishing a national bank, granting it a monopoly of the issuing of bank notes, and compulsorily incorporating with it all other banks in Spain. In return the new bank is to make large advances to the government.

No important change in the north of Spain is reported. The first movement for the relief of Bilbao, by way of the river, was a failure. It was found impossible to effect a landing, and the expedition returned to Santander. An ammunition wagon lately exploded in Serrano's camp, and killed and wounded fifty men.

The Roman Catholic Bishops in the Austrian Legis-

lature threaten to withdraw if the passage of the ecclesiastical bill is pressed.

The Prussian Reichstag is reluctant to fix the ordinary strength of the army at the high number demanded by the government, 400,000 men.

On the 22d, the Generals of the army waited in a body on the Emperor, and congratulated him on the reaching of his 77th birthday. The Emperor, in the course of his reply, referred to the army and declared that he was determined to maintain its strength, and thereby ensure the peace of Europe.

After a long debate in the French Assembly, the resolution censuring the government for its action in reference to the nomination of mayors of cities was defeated by a majority of 62.

The Duke of Padua and other distinguished persons who took part in the recent demonstration at Chiselhurst, have been removed from the mayoralties and other offices held by them under the government.

The Russian Official Messenger publishes a statistical table which shows that the fires in that country in 1873 were 22,476 in number, the damage done being estimated at forty-four two-fifths millions of roubles. Out of that total, five thousand nine hundred and eleven were caused by acts of imprudence, three thousand one hundred and forty-one are attributed to malevolence, eight hundred and sixty-four to lightning.

The diamond fields at the Cape of Good Hope are now nearly deserted, the majority of the seekers after wealth having concluded to abandon a quest which entailed severe labor and rarely paid more than expenses.

The revenues of the Suez Canal show a steady increase. The receipts of the 2nd mo. 1872 were 1,333,040 francs, those of the same month 1873, 1,852,132 francs, and those of the last 2nd month 2,011,000 francs.

The Bishop of Iceland has issued a pastoral ordering a religious celebration throughout the island on the 2d day of Eighth mo. next, in commemoration of the thousandth anniversary of the first settlement of the island. A new constitution granted by Denmark will go into effect at the date mentioned.

A City of Mexico dispatch says: A Catholic mob, on the night of March 7th, attacked a Protestant chapel in Puebla, broke the windows and furniture, destroyed bibles and stoned the pastor.

Prince Kalakua has been elected King of the Sandwich Islands, to succeed King Lunalilo. The new ruler is said to be a man of good character and better abilities than his immediate predecessors.

A recent census of Japan shows the entire population to be 33,100,000. The Emperor has ordered that his own income shall pay tax equally with that of his subjects. The malcontents in Fizen demand that an expedition shall be sent against Corea. The government is endeavoring to put down the rebellion, but many of the military refuse to act against their countrymen.

Seventy English journalists have made an excursion over the Midland Railroad in the Pullman cars, and the papers speak in high terms of this improvement of railway travel. The Times says, now that Pullman's enterprise has crossed the Atlantic, the improvement will not be limited to England.

On the 23d, the King of Italy received 3000 persons from all parts of the kingdom, who came to congratulate him on the twenty-fifth anniversary of his accession to the throne.

A protest has been presented in the French Assembly, from Gambetta and others, demanding the dissolution of the Chamber.

London, 3rd mo. 23d.—Consols 92.  
Liverpool.—Uplands cotton, 8½d.; Orleans, 8 7-16d.  
White wheat, 12s. 4d. a 12s. 6d. per 100 lbs.; red western spring, 11s. a 11s. 8d.

**UNITED STATES.**—The receipts from internal revenue has recently diminished in consequence of the temperance agitation in the West, which has lessened the demands on the distillers. While the sale of intoxicating drinks in large towns has not been much affected, it has been nearly broken up in many villages and small towns of Ohio and Indiana.

There were 557 deaths in New York last week.

In Philadelphia the interments numbered 293. The total consumption of anthracite coal in this city for 1873, is given as 1,751,871 tons, and of gas and bituminous coal about 375,000 tons, making a total of 2,126,871 tons, against 1,988,439 tons in 1872.

Dald Mountain, in the western part of North Carolina, near Tennessee, has for several weeks past given indications of a volcanic eruption, the ground upon its slopes trembling, and loud rumbling noises coming from the mountain.

The New England Freedmen's Aid Society, which was organized in 1864, has decided to close its operations. The society has received and disbursed about

\$350,000, and supported seventy teachers among a freed people of the South.

The whole number of hogs packed in the West, from 11th mo. 1st last to 3d mo. 1st, was 5,383,810, average weight 268 pounds; which is a decrease in number and weight compared with last year.

On the 22d a fire broke out in Indianapolis, which consumed a number of valuable buildings. Total loss about \$300,000.

On the 23d inst., a large manufactory at New Britain, Conn., was burned, and 500 hands were turned out of employment. Estimated loss \$800,000.

The United States House of Representatives, by vote of 168 to 77, has passed a bill to fix the amount of legal-tender notes for general circulation at \$400,000,000, said amount never to be exceeded.

**The Markets, &c.**—The following were the quotations on the 23d inst. *New York.*—American gold, 11 U. S. sixes, 1881, 119½ a 120; ditto, 1868, 119; ditto, 5 per cents, 114½. Superfine flour, \$5.75 a \$6; St. extra, \$6.25 a \$6.50; finer brands, \$7 a \$10.75. No. 1 Chicago spring wheat, \$1.55; No. 2 do., \$1.50; No. 3 do., \$1.45; white Michigan, \$1.82. Oats, 61 a 65 cts. Western mixed corn, 87 a 91 cts.; white, 91 a 95 cts. Rye, 98 cts. *Philadelphia.*—Cotton, 16½ a 17½ cts. uplands and New Orleans. Superfine flour, \$5 a \$5.25; extras, \$5.75 a \$6.50; finer brands, \$7 a \$10.25. Id wheat, \$1.60 a \$1.65; amber, \$1.70 a \$1.73; white, \$1.78 a \$1.83. Rye, 94 a 96 cts. Yellow corn, 80 cts. Oats, 57 a 63 cts. Sales of 2300 beef cattle. Choice 6½ a 7½ cts. per lb. gross, and common 4½ a 6 cts. Sheep 6 a 8½ cts. per lb. gross, and hogs \$8.50 a \$9 per 100 lb. net. *Baltimore.*—Choice white wheat, \$1.80 a \$1.85; fair to prime, \$1.60 a \$1.75; good to prime red, \$1.40 a \$1.80. Yellow corn, 78 a 80 cts. Oats, 60 a 64 cts. *Chicago.*—Spring extra flour, \$5.50 a \$6.25. No. 1 spring wheat, \$1.24; No. 2 do., \$1.17½; No. 3 do., \$1.14½. No. 2 mixed corn, 62 cts. No. 2 spring barley, \$1.41.

### WESTTOWN BOARDING SCHOOL.

A Stated Meeting of the Committee having charge of the Boarding School at Westtown, will be held in Philadelphia on Sixth-day, the 3d of next month, 1 P. M.

The Committees on Instruction and Admission will meet at 10 A. M. of the same day.

SAMUEL MORRIS,

Clerk

Philada. 3d mo. 24th, 1874.

The Visiting Committee meet at the School on Second-day evening, the 30th instant. Conveyances will be at the Street Road Station on that day, to meet the trains that leave Philadelphia at 2.30 and 4.40 P. M.

A young woman Friend, with experience as a teacher, desires a situation as assistant in a Friends' School.

Address box 12, Kennett Square, Chester Co., Pa.

### WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of this Institution are expected to be vacated at the close of the Winter Session, in the 4th month next, Friends who may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee.

Nathaniel N. Stokes, Cinnaminson Post-office,

Burlington Co., N. J.

Charles Evans, No. 702 Race St., Philadelphia.

Deborah Rhoads, Haddonfield, N. J.

Rebecca S. Allen, No. 335 S. Fifth St., Philadelphia.

**FRIENDS' ASYLUM FOR THE INSANE.**  
Near Frankford, (Twenty-third Ward,) Philadelphia.  
Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

**DIED,** at his city residence, in Philadelphia, on 1st mo. 20th, 1874, OLIVER PARRY, in the 80th year of his age, a member of Philadelphia Monthly Meeting of Friends for the Western District; and was buried 2d mo. 23d, in "Friends' Solebury Burying-ground," Bucks Co., Pa.

—, at West Chester, Pa., on the 2d inst., JOHN TOWNSEND, aged near 85 years, a member of Birmingham Monthly Meeting of Friends.

WILLIAM H. PILE, PRINTER.

No. 422 Walnut Street.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

## Animal Character.

(Concluded from page 251.)

### THE PIG—THE WOLF—KIDS.

Other charms than gastronomical ones have been discovered in young pigs by those who have occasionally made pets of them. The animal, though obstinate and self-willed, is really not stupid, and is capable of the warmest attachment, and of great fidelity to those he loves. All young animals are interesting, but young pigs are more comical in one respect than kids, or lambs, or kittens, or puppies; I mean, in the ludicrous combination of heavy structure with immense activity and precipitation. They are prudent in an advance, but they always lose their wits in a retreat, and on any decided alarm they hurry away in a general *saute qui peut*. In maturer years an obstinate courage frequently develops itself, and they charge with such force that a man cannot resist them without using deadly weapons. I remember trying to get a pig over a bridge; we were three men against him, all armed with sticks, but he charged us so fiercely, that after an hour's hard work, and a hundred ineffectual attempts, we were compelled to give in at last, and his owner had to seek a wide bridge higher up the river which took him nine miles out of his way. On this occasion the animal displayed splendid courage and indomitable resolution, so that it would have been impossible to thwart his purpose without inflicting some serious injury.

I remember driving one night in France, in the skirts of a forest, a very lively horse indeed, when suddenly he became livelier still,—so lively, in fact, that it was scarcely possible to hold him, and would not have been possible at all had not the road been deeply covered with snow, that was still silently and rearly falling. It was between midnight and one in the morning, and nothing was in sight but the black edge of impenetrable forest, with here and there a bit of sedgy morass, and, on the other hand, miles of treeless land, all white and untrodden, stretching away till it joined the dark grey sky. Whilst endeavoring to restrain the horse's impatience, I began to have a sort of feeling as if our shadows accompanied us on that swift course, and yet our lanterns were not lighted and

there was no moon, nothing but the steady weird light from the infinite white fields. I had a lady with me, a Frenchwoman, not wanting in courage, and she quickly laid her hand on my arm, and said "*Les Loups!*" Yes, the two moving shades were a couple of large wolves cantering silently in the same direction, and in a line strictly parallel with our own course, not pursuing us, but keeping steadily in the fields to our left. So we kept on for about a league, the horse half mad with fright, and galloping as fast as the snow would let him, and still the two black creatures to the left of us, keeping up with us as it seemed so easily, with that steady silent canter of theirs over the thickening snow! Whether they would attack us or not depended simply upon the intensity of hunger they might be enduring, and we watched them for some minutes with anxiety, but at length we began to imagine that the lines of our course were no longer quite parallel, that the space between us and the wolves was gradually widening. Soon afterwards this became a certainty: the wolves were going on a mission of their own, probably to some sheepfold in the neighborhood, and did not intend to honor us with their attention. The parallelism of our lines of route had been merely an accident, and our companions grew less and less, till at length we could only perceive two tiny black specks that seemed almost motionless in the distance, and that nobody who had not seen them nearer would have suspected to be wolves at all.

Sometimes, however, the wolves are more to be feared, even in France. It seldom happens that a man is in much danger from their direct attacks, but there is great peril of a bad carriage-accident when your carriage is pursued by wolves. Horses have a perfect horror of these animals, and lose their heads entirely on such occasions; so that one has good reason to dread wolves when driving, especially if the road is an awkward one.

The character and habits of the wolf have been carefully studied by many observers, who agree in admitting his craft and intelligence, though some of them doubt his courage. Toussenel tells us that he himself saw six full-grown wolves crossing the frozen Loire, in single file, in the winter of 1829, that he examined their track afterwards, and would have supposed, if he had not seen six wolves, that only one animal had crossed the river in that place, so accurately had the five others placed their paws in the foot-prints of the first. The wolf is so suspicious that it is almost impossible to poison him. If you place a poisoned carcase near his own residence he will not touch it, the only way to get him to eat of it is to drag it a long distance so as to make a trail, and then seem as if you had been anxious to hide it. He will follow the trail at night and find the carcase. A common way is to lie in wait for him with rifles round about the spot where the carcase is, and then

pour a converging fire upon him the moment of his arrival. Notwithstanding the most intense hunger he will not eat of anything that seems to him suspicious, he will devour earth itself first. The same prudence marks his conduct in all respects; he will not uselessly expose himself, yet he is not a coward. Like all robbers he enjoys foggy weather. It is well known that a farm which is close to the wolf's private residence is safer than one situated at a distance of a few miles, as he thinks it best to avoid scandal in his own neighborhood. The wolf knows too, very well, who are his active enemies, and who are the people whom, though not friendly, he can afford to regard with indifference. An instance is on record of a wolf which, quietly seated on a little eminence, watched the long line of peasants' carts going to market along the highroad close to where he was. Hundreds of anecdotes might be collected in proof of the wolf's exceeding intelligence in all that concerns the preservation of his life, and every hunt supplies fresh examples. A family of young wolves, instructed by their mother, will mislead the hunters artfully, taking the dangerous duty by turns for the protection of the rest. But when a strong, full-grown animal gets fairly away, out of the ring of beaters, his policy is simple in the extreme. He chooses a straight line, and sticks to it across all obstacles with uncompromising rectitude, and the worse the ground the safer he is, for then the distance rapidly widens between him and his pursuers. When the hunters are far behind the wolf relaxes his pace to a quiet trot, and finally takes a rest, not troubling himself much if one or two of the foremost dogs reach him, for he will give them a sharp bite or two that will deprive them of any wish to vex him again.

Like all young things, kids are extremely inquisitive, and whenever one of them thinks it has made a discovery, the others always immediately determine to find out all about the new subject of interest.

Sometimes the experiments made by a set of inquisitive kids must of necessity be successive. For example, if there is a basket in the place which will hold one of them, and no more, the others watch him with great interest; and as soon as he jumps out (which he is never very long in doing), the others inevitably jump in and out again by turns. A game of this kind will last till one of the kids has a new suggestion to make, which his brethren are sure to adopt; for they are always very ready in adopting any suggestion which promises a variety in their amusements. It became the fashion one day amongst my kids to carry a little sprig of green between the lips; and a very pretty fashion it was, from a painter's point of view, as it supplied a most refreshing touch of color amongst the blacks and greys. There is a certain impudence and fearlessness about kids which is often both laughable and charming. One day, whilst I

was at work sketching, the kids took it into their heads to try to upset my seat by getting under it, and lifting me up with their not very Samson-like shoulders. This they tried in turn; but, not being powerful enough to succeed, turned their attention to my great dog, who lay by me contemplating their gambols with a sort of half tolerance mingled with disdain. First one kid came up to Tom, and brought his tiny visage in contact with Tom's astonished physiognomy; then another tried the same experiment; and finally, of course, the third tried it. At last the dog's dignity could stand it no longer, and he rushed out of the place, not trusting himself to refrain from using his mighty jaws, which would have crushed a kid's head like a nut-shell.

Most young things (young crocodiles and some other reptiles excepted) appear to be reservoirs of pent-up natural energy that finds vent in irrepressible gambols. Of all active young creatures intimately known to me, kids are the most active. When they seem to be perfectly still and reasonable, a spring is touched, and they bound straight up as if the earth had suddenly become elastic and thrown them towards the sky like projectiles. They pass from moods of venturesome and reckless frolic to moods of extreme caution. When in the latter, they studiously examine some object in the place where they are confined, and the boldest of them approaches it first, ready, however, to withdraw upon any appearance of danger. The others follow behind, at regular intervals. In all this they are doing in play what they will have to do in earnest in after life. The gambols prepare them for the bold leaping amongst rocks and precipices, whilst the *eclaircur* work prepares them for the duty of a prudent sentinel when the wolves are near in the mysterious and deceptive moonlight.

For "The Friend."

### Memoirs and Letters of Sarah Hillman.

(Continued from page 250.)

To Martha Wistar.

"Philadelphia, 6th mo. 22d, 1838.

My Dear Friend,—Pleasant as it would be to greet thee and thy dear husband in your hospitable mansion, the feeling that I am not my own, forecloses every prospect at present of social visiting. When at liberty so to do can assure thee it would be grateful to me to enjoy with you the freedom of converse.

I trust there are, as thou sayest, preserved, even in every place where He has condescended to place his Name, such as shall cleave to Him, such as shall speak of the glorious majesty of his house, such as shall praise him in the midst of a crooked and perverse generation, yea tell their children of him, and talk of his greatness. Who will not love their lives unto the death, but rather strive to be kept among the number of the faithful, the chosen, as well as the called; who shall walk with their dear Lord, it is written, in white. Ah, that we may be of this number, let us press after the attainment, let us strive to be found worthy. Then shall we realize indeed to our comfort, that in every place, and in and under all our afflictions and trials, incense may be offered to his glorious, holy Name, and from the bottom of the heart a 'pure offering' prepared by Himself. Truly, my dear friend, we need to be girded with the whole armor of righteousness to stand in this day. We go to our meetings poor and empty, and sit them

through sometimes scarcely sensible of any rising of the spring, whose waters make glad all the heritage. And can we expect to rejoice when the Master reigns not? Yet I believe all the sincere hearted, are sustained and fed; and in His blessed time, will have to acknowledge that though they walk through the valley and shadow of death, they are sustained by his rod as well as his staff, and will rejoice in a coming day, that they have been brought into suffering—planted with their dear Master into the likeness of his death; that thus they may be prepared to arise, and walk in newness of life. To walk, even here, with him in white is, I believe, the privilege of the King's children; and I long for the blessed attainment. May we, with thy dear C. also, who seems so interwoven with thyself, that when writing I can scarcely do other than include him, steadily persevere, as I doubt not is our united, earnest desire, in the way cast up for us; accounting reproaches and afflictions for Christ's sake greater riches than the treasures in Egypt; and then, let come what will, we need not fear, but that our adorable unconquered Captain will keep us; yea keep that, which through mercy we have been enabled to commit unto Him.

Much depends upon the faithfulness of those who are engaged in the affairs of the discipline of the church. Oh! that strength may be furnished to my dear friends in their varied allotments, to go forth, not in the armor which is not proved, but being girt about with Truth; having on the breast-plate of righteousness. And may we realize our feet to be shod with the 'preparation of the gospel of peace;' attired also with the shield of faith, with which we shall be able to quench all the fiery darts of the wicked. Taking also 'the helmet of salvation, and the sword of the spirit, which is the Word of God,' which liveth and abideth forever. Thus equipped may we not humbly hope to be enabled to withstand in the evil day, and having done the little we can, (for truly it is very little) for the precious cause' sake, to stand to the end of the race; and finally through the mercy of Him who loved us and hath given himself for us, to be admitted into the company of saints and angels, and the spirits of the just made perfect, who with palms in their hands cease not to praise, and honor, and adore Him, that sitteth on the throne, and the Lamb forever and ever.

My love awaits your acceptance, and am thy sincerely attached friend,

S. HILLMAN."

To her Mother.

"Westchester, 10th mo. 7th, 1838.

Dear Mother:—Having attended Fallowfield Meeting by appointment, and ridden 15 miles after dinner, we\* reached here (Benjamin Cope's) about half past five. The day before we were at West Grove. Friends seem glad to have us at all the places; though the prospect of a succession, especially among the young is truly hopeless. Yet in almost every place there is a little suffering few, a remnant still preserved, bound to the law and the testimony, who feel near to our spirits, and with whom we have drank in the one cup of spiritual exercise and baptism. There are too, some among the princes of the people, of the fathers, who do not unite with any innovation,

\* Grace Evans was companion for S. H. in this visit to the meetings composing Concord and Western Quarterly Meetings.

and whose eyes are clear sighted to discern truth from error. We have visited some dear Friends in affliction; one with a cancer in his face, a very precious Friend, whose daughter is in very delicate health also; while her husband seems sweetly preparing for that better country where there is no more pain, neither sorrow nor crying. My time has been so entirely occupied, that when at liberty, all I could or can do seems to be to seek rest; so that my letters have been short and poor. Yours have all been truly acceptable. J. Lippincott came here, a few steps from his brother's, and brought them last eve.

\* \* \* To the praise of His grace, who I believe led me out on this mission, I may thankfully say, He has been with me to my comfort; has been mouth and wisdom, tongue and utterance, or I had fainted. For truly it is no easy matter to visit the seed which lies under oppression, being imprisoned; and also when the number of those who are digging in meetings for the arising of the well-spring of life is very few. Yet there has been, from season to season, strength furnished to pursue though faint; and now in looking towards the conclusion of this little service, quiet, peaceful poverty seems the clothing of my spirit.

The finishing of a work is not less important than the commencement; and I desire to be kept simply attentive to the unfoldings of Divine Wisdom every day, and at all times that I may leave nothing undone, neither do more than is required.

Love to dear M. and E. Bacon, of whom and their loss I often think. Also R. C. F. and hers, with other friends enquiring after me; and accept the warm feelings, my dear mother and sisters, of your absent

SARAH, in bonds.

Dear sister R. I had hoped would have written again. Love to her and to brother with their little ones."

To William Scattergood.\*

"Philadelphia, 11th mo. 18th, 1838.

—, Thy last letter was truly grateful as it contained intelligence new to me and desirable; that for which I trust I may say, have travailed according to my measure, even that the living child might be brought forth. And now, my dear friend, all that the Lord spake to thee of in early days, will he accomplish, as thou keepest hold on thy part of the covenant. Oh! that thou mayst follow up reservedly and faithfully, the leadings of his Holy Spirit, counting nothing too near or dear to part with for His blessed name's sake and when he leadeth again into Jordan, yea the very depths of Jordan, he willing to abide there until He speaketh the word, 'Come up hither.' Ah then, thou wilt bring up thy stones, living stones of memorial, to the honor and praise of Him who hath called thee out of darkness, and whose love hath been toward thee, I believe, invariably in the very darkest times thou hast known since I knew thee. Things here are truly discouraging as relate to the church, looking with man's unassisted sight; nevertheless the eye of faith, from Pisgah's mount, beholds at seasons the good land and better times ahead. Then let us struggle on, my dear friend, and cast our care for time and for eternity on Christ Jesus; He who has in mercy, never to be forgotten visited us in infant years, and kept us in a

\* Soon after his first appearance in the ministry, at Greenwich, N. J., in 9th mo. 1838.

humbling sense of our inability to save ourselves; and whose gracious promise, even in our darkest moments, has been realized, 'Lo, I am with you alway,' else we had long ere this fallen a prey to the enemy. Ah, and He will be with His own to the very 'end of the world.' 'The mountains may depart and the hills be removed, but my kindness shall not depart from thee, neither shall the covenant of my peace be removed, saith the Lord, that hath mercy on thee.' Pray for us in this great city, this tumultuous city, that our faith fail not; great are our conflicts, wrestling not against flesh and blood only, but against spiritual wickedness in high places. Our meetings are very largo (a great assemblage of gay people) and often interrupted (I speak in fear), by offerings whereupon the impress of the hand of the High Priest, the great Apostle of our profession, is not seen; or any of the living virtue, the smell of the ointment made after his art, discoverable. May we learn to be content; where the seed suffers we must suffer; my heart is full, \* \* \* but I must affectionately commend us to the keeping of Israel's Shepherd, and say farewell. Thine in sincerity,

S. HILLMAN.

P. S. My dear friend, why wilt thou flee; is not spiritual death painfully to be felt in many places, where the enemy has not spread the net which causes to fall into unbelief? Ah methinks, 'Woe is me,' may be very properly the language of our spirits, because 'I sojourn in Mesech and that I dwell in the tents of Kedar.' May our attention be directed unto Him who died for us; who has in some measure brought us unto Himself; and made us willing to enter into covenant with Him. Oh! let us steadily follow His leadings, even though we may be brought into paths we have not seen. He leadeth the blind, and He will make darkness light before His own, and crooked things straight. I am sometimes ready to fear for myself, while I thus speak, lest I shall never be able to overcome the enemies of my own house, so as to come up in the line which has been marked in my view as the only way for me, into the kingdom of rest and peace. Pray for thy feeble friend, that nothing may operate to hinder her from being given up, in body, soul and spirit, to the guidance and leadings of the blessed Head of the church. I think my situation is mournful, something like poor Jeremiah's when he said, 'Cause me not to return to Jonathan's house,' &c.

Farewell, in near affection, thy attached  
S. HILLMAN."

(To be continued.)

### A Texas Cattle Farm.

The *Baltimore American* contains an account of cattle raising in Texas, furnished by a correspondent, a portion of which we think may interest some of our readers. After speaking of the wild cattle which range unrestrained in great numbers over the prairies, the writer proceeds:

"When ten miles from Rockport we reached the gate of the cattle-farm in charge of our friend Coleman, as the head of the firm of Coleman, Mathias & Fulton. Within this enclosure, the gate of which we entered, is by far the largest enclosed field in Texas, the number of acres being 125,000. On the south side it is bounded by Neuces and Corpus Christi bays, on the coast by Puerto and Copano bays, and on the north by Chultepin river. The amount of fencing required to

complete the enclosure was twenty-five miles, fifty miles being bounded by the watercourses. In other words, the boundary of this pasture is seventy five miles—fifty miles of water and twenty-five miles of board-fence. Some idea of the extent of this field may be formed from the fact that from the entrance gate to Mr. Coleman's house or ranche, the distance is twenty miles.

The improved appearance of the cattle as compared with those 'on the range' was too marked to escape the attention of the most inexperienced observer. They looked sleek and comfortable, and those that were not lying down were standing in the water of the pond to escape the hoof fly, which is said to be very annoying at this time of the year. The number of cattle in this enclosure at the present time is 25,000 head, which is regarded as very near its full complement. Five acres to the animal is the estimated limit to keep them in good condition throughout the year, and anything beyond that is regarded as overstocking.

During our drive across the pasture animals were encountered in great numbers, and could be seen browsing in the distance, but in such a vast enclosure, the horizon being to the eye its boundary in every direction, no estimate could be made of the number. They were all, however, large and well-conditioned. They had but little of the wild characteristics with which Texas cattle have been credited, many of them scarcely deigning to look at us as our carriages passed within ten feet of them. Indeed, these Texas cattle seemed to be very amiable and well behaved animals, their immense expanded horns only making the difference, and giving them a wild appearance.

The proprietors of this immense pasture do not make the breeding of cattle any special part of their business, though from seven to ten thousand calves are annually added to their stock. They prefer to buy cattle rather than raise them, as an abundance of herds can be purchased at the average of five dollars per head, including beeves, cows and calves. These they place in their pastures to fatten and improve their condition, and to await the steamers for shipping to New Orleans. Instead of raising the calves that thus come into their possession they ship their yearlings to New Orleans, where they command from \$8 to \$17 per head, according to condition; and as three calves cost no more to ship than one beeve, the profits to the shipper are fully equal. Beside the number of cattle now held in the pasture, 25,000, they still have on the range many more of brands which they have purchased. Parties of 'cow-boys' are out gathering these at so much per head, which is a very difficult work. A drove of some five hundred head of these roving cattle were brought in this morning. This firm have also another pasture of 3000 acres within two miles of Rockport. This is a kind of storage pasture, where they drive their picked cattle preparatory to shipping.

In seasons of drought it is very common for thousands of these animals 'on the range' to die for want of water. Among the owners of the herds thus turned loose, there has never been any combined movement for their comfort; but they have been allowed to live or die, as the case might be. What is everybody's business is nobody's business, and the water that falls during the rainy season is allowed to find its way to the Gulf, whilst a

trifling expense would effect its storage in reservoirs scattered over the prairies. The pasturage system is already producing its fruits, in harmonizing the business; and this firm have paid great attention to the water supply of their stock, and have been so successful in the formation of lakes, that they have no fear of drought; whilst the cattle do not have to go any great distance for water.

One lake that we passed, at the head of which is a strong dam lined with stone, is over two miles in length, the depth of the water ranging from five to eight feet. They have constructed two other dams in distant parts of the pasturage, though not so large as this one. The water question is regarded as one of great importance. It is a singular fact that the accumulations of water even in ponds on the prairies of Texas, always remain sweet and pure. Hence the storage of winter rains for summer use is entirely feasible, and is being done in all the pasturages, while the animals 'on the range' have to look out for themselves and stick to the few water courses, which soon become so crowded in time of drought that they are almost starved.

At 4 o'clock we came in sight of Colonel Coleman's ranche, the first sign of life visible being a large windmill which he has erected on the banks of the Chultepin river to pump up water for the purpose of irrigating his fields. He has several hundred acres here under cultivation. The land on which the ranche is located is, however, by no means level prairie, but rather rolling land, the river being about forty feet lower than the embankment upon which his windmill is located. The dew which falls in this country during the nights supplies in some measure the absence of rain in summer, the ground this morning being quite mucky from the effects of the dew during the past clear moonlight night."

### From a Testimony of Samuel Scott's, concerning the Necessity of Timely Preparation for Death.

It is not a bare professing, or talking of religion only that will avail; but, how are we walking and acting, as in the sight of the Omniscient Lord God? Thus good King Hezekiah, had attained to the blessed assurance of the favor of God when an solemn and humbling message was brought unto him, yet we read he turned his face to the wall; he turned from all visible objects. They who have the greatest share of worldly possessions, what comforts will they administer at such a time? Nothing will avail but the mercy of God through Christ, and the evidence of the Holy Spirit bearing witness with our spirits, that we have been walking in the fear of God, as Hezekiah did, who made his address unto the Lord, and said: "Thou knowest, O Lord! how I have walked before Thee in Truth and with a perfect heart, and have done that which is good in thy sight."

And we find the Lord owned him therein, and spared him, he receiving the message with weeping, and humbling himself before the Almighty.

O! this is the way to find favor with God, for the lofty ones to come down, and the proud to be abased; so that all flesh may be humbled in the presence of the God of heaven; for all flesh is compared to grass, and man, in his greatest strength and beauty, to the flower of the field, which soon withereth and fadeth away, as we poor mortals do; but the word

of the Lord endureth forever—this word of the Lord that is revealed in men's hearts, and is to be known and witnessed as a fire, a hammer, and sword, to burn up the briars and thorns—that which hath choked the precious Seed; to break the hard heart that hath been hardened through repeated transgressions, through pride, arrogance, and walking in the evil way; to cut and hew down all superfluity of naughtiness, and to separate between the precious and the vile; that thereby men's hearts may come to be prepared, and they may recover health of soul, through the operations of the Divine Word and Spirit of God, which in mercy is come thus nigh unto men, that they might be prepared thereby to live to his glory while on earth, and spend their few uncertain moments in his fear; that when the solemn message comes, that we are called hence, to be no longer stewards, but must give an account of our stewardship before the tribunal of the Majesty on high, it may be with joy.

If we have known the work and operations of this Divine Word, and have waited on and submitted thereto, then have we had our fruit unto holiness, and have been bowing before the Lord in our meetings. When there has been no verbal testimony amongst us, we have had recourse to the *inward law written in our hearts*, we have humbled ourselves, and been saying, as one did of old: "How shall I come before the Lord, the great and mighty One? or how shall I bear myself before the most high God? So that I may be accepted of Him."

O that people had but such considerations! they would be brought down; the lofty looks of men, and pride of all flesh would be abased and stained, their laughter would be turned into mourning, and their joys into heaviness, if they were but really concerned to be accepted of the Lord. What think ye? Will the Lord accept of men and women in their pride and vain glory, and gay attire and superfluity? Such as mine eyes have beheld with sorrow, upon some in this meeting. I tell ye, nay; for such are *spotted and stained with the spots of this world*; they are too much taken up with, and following the vain fashions and customs of it, which must be repented of and turned from, if they would find mercy with the Lord, if they are not totally hardened and resolved to have their own ways till the last moment of their time.

O! therefore come down all you lofty sons and daughters in Zion, and put away your pride and arrogance, that you may be prepared for this solemn time and message, and may come before the Lord with true humility, and not be adorned in such manner as was spoken against by the apostle, which doth not become a people *professing the self-denying religion* of our Lord Jesus Christ. That none may be found after such a manner, I must tell you it is *not acceptable* to the Lord; but it is a *contradiction* to our Christian profession, if we hold the Truth in righteousness, and such a conversation as *doth not become* the gospel of Christ; but may our adorning be *that of a meek and quiet spirit*, which in the sight of God, is said to be precious, or of great price.

Extol not riches, then; the toil of fools,  
The wise man's cumbrance, if not spare, more apt  
To slacken virtue, and aback her edge,  
Than prompt her to do aught may merit praise.  
Milton.

### THE TWO ARMIES.

As life's unending column pours,  
Two marshal'd hosts are seen,—  
Two armies on the trampled shores,  
That Death flows black between.

One marches to the drum-beat's roll,  
The wide-mouth'd clarion bray,  
And bears upon a crimson scroll,  
"Our glory is to slay."

One moves in silence by the stream,  
With sad yet watchful eyes,  
Calm as the patient planets gleam  
That walks the clouded skies.

Along its front no sabres shine,  
No blood-red pennons wave;  
Its banner bears the single line,  
"Our duty is to save."

O. W. Holmes.

### DREAM OF SUMMER.

Bland as the morning breath of June  
The southwest breezes play;  
And through its haze, the winter noon  
Seems warm as summer's day.  
The snow-plumed Angel of the North  
Has dropped his icy spear;  
Again the mossy earth looks forth,  
Again the streams gush clear.

The fox his hill-side cell forsakes,  
The muskrat leaves his nook,  
The bluebird in the meadow-brakes  
Is singing with the brook.  
"Bear up, O mother Nature! cry  
Bird, breeze and streamlet free;  
Our winter voices prophesy  
Of summer days to thee!"

So in these winters of the soul,  
By bitter blasts and drear  
O'erswept from Memory's frozen pole,  
Will sunny days appear.  
Reviving Hope and Faith, they show  
The soul its living powers,  
And how beneath the winter's snow,  
Lie germs of summer flowers.

The Night is mother of the Day,  
The Winter of the Spring,  
And ever upon old Decay  
The greenest mosses cling.  
Behind the cloud the starlight lurks,  
Through showers the sun-beams fall;  
For God, who loveth all his works,  
Has left his Hope with all.

J. G. Whittier.

### The Palm Groves of Elche.

The English traveller, Augustus J. C. Hare, who visited Spain in 1872, remarks: Spain is *not* a beautiful country. If a traveller expects to find the soft charm and luxuriant loveliness of Italy, life in Spain will be a constant disappointment: no hope can possibly be more misplaced. Spain is not the least like Italy: it has not even the beauty of the greater part of France. Beyond the Asturias and the valleys near the Pyrenees, there are few trees in the Peninsula. There is scarcely any grass, and those who wish to find beauty must only look for it of an especial kind—without verdure, or refinement or color. But the artist will be satisfied without these, and will exult in the long lines, in the unbroken expanses of the stony, treeless, desolate sierras, while every crevice of the distant hills is distinctly visible in the transparent atmosphere, and the shadows of the clouds fall blue upon the pale yellow of the tawny desert. \* \* \* Except in the Asturias and some parts of Galicia, I am only aware of two places where there is anything that may be called beautiful country in Spain, and these are

Selected.

Montserrat, the noblest, the most gloriously beautiful of rocks, and the palm groves of Elche."

Elche is a town of 18,000 inhabitants, in the south-east of Spain, about thirteen miles from Alicante. Of the groves which surround it Hare says: "After two hour's drive, a serrated line of palms rose upon the horizon, and soon we entered their forests. Far in the air sometimes sixty feet high, rose the beautiful fans, with their enormous pendant bunches of dates, the golden fruit hanging from stems of so gorgeous an orange, that no mere description of color can give the faintest idea of their effect when they are lighted up by the sun, and backed by a deep blue sky, as we first saw them. Their variety also is most beautiful; some of the older trees growing perfectly straight, others bending in the most picturesque attitudes, some buttressed up with little stone walls, and beside them younger palm rising in full youthful vigor, tens upon tens of thousands, for miles around.

The male palms are often tied up and blanched to be cut for the Palm-Sunday festivals, and they are also sold to be stuck up in balconies as a protection against lightning, being considered quite as efficacious, and being certainly much cheaper than an iron conductor. Ten thousand dollars worth are sold annually in Elche for this purpose, and seventy thousand dollars worth of dates. The latter were gathered during our visit (January) by the clever little *hortelanos*, who climb the branchless trunk like cats, a rope being passed round it and their waists, upon which they rest their whole weight in a horizontal position, lowering their baskets when filled, and raising them again by a pulley. The defective palm leaves are sent to the manufactories and used as cigarettes. By the road-side, before every cottage door, are quantities of dates in baskets, no one watching them; any passer-by can eat as many as he likes, fill his pockets and leave his halfpenny in payment. It is generally left, for where Spaniards are trusted they scarcely ever abuse a trust. When we walked in the groves the hospitable peasants were only too anxious to load us with branches of the best fruit, and would accept no payment at all.

We spent three days in Elche, which, though the Roman Illica, is completely Moorish in character. There is a humble but decent *posada* (inn). Ever-increasing was our delight in the enchanting walks; sometimes through the thick groves of magnificent date-palms, where all is richness and splendor of color; sometimes in the deep brown ravines of the dried up Vinalapo, which reminded us of the Valley of Jehoshaphat. Elche, entirely Moorish, rising above like Jerusalem, with its flat roofed houses, old walls and crowning mosque; sometimes by the banks of little streams, bordered with prickly pear and pomegranates; and sometimes out upon the desolate gravelly plain beyond all these, which assumes a wonderful color towards sunset, and where the extreme clearness of the air makes the most distant objects, even to the violet mountains on the horizon appear supernaturally distinct."

And let this wearing of gold lace, and costly attire be ended, and clothe the naked, and feed the hungry with the superfluity. And turn not your ear from the cry of the poor.—George Fox.

For "The Friend."

John Heald.

(Continued from page 254.)

"3d mo. 4th, 1819. We had a meeting in a school-house, near Roxbury. The people were young in collecting, and they appeared to be so insensible of the importance of a right religious concern. I felt an impressive concern for myself and them, and mentioned the in-  
 ucement on my mind to come to this part of the country. That if all was done for us that could be done, and we might now safely set down at ease, without any more care, then his concern was of no use; but if we are in danger to come short, then it may be well to consider timely and seriously of the loss that may be sustained by neglect. The Divine Master had stated, except a man be regenerated and born again, he cannot see the Kingdom of Heaven; and the Apostle Paul has stated that circumcision is nothing, and uncircumcision is nothing. Then it is evident an entire change must be made, without which we are now unsafe as we are, and how dangerous to settle down at ease, and care no further. The minds of the people were solemn.

"3d mo. 6th. Attended the meeting at Oak Hill, which was large, of Friends and others. I used encouraging language to the sincere, honest-hearted, whose discouragements were great; but I reprehended the neglect of religious meetings, and the use of ardent spirits; warning the young to avoid tasting them, as tasting and tasting had, I believed, introduced many to the habitual intemperate use of them, who were virtuously disposed, and who would not have believed they would ever have fallen under this baneful influence. In the afternoon we went on towards New Baltimore, and came to Edward Hallock's, where we lodged comfortably.

"7th was First day. We had a precious meeting at this place, in which I was enabled to bring forth counsel for most cases present, and I pressed it close home; and particularly to the dear, precious youth, the persuasive invitation flowed sweetly, and they were warned to beware of following that which inclined to put off to a more convenient season.

In the afternoon we had a meeting as large as in the morning. After my companion had stood up, his first words were, Too late, too late. The sense that impressed my mind was alarming to me. After twice repeating, Too late, I said these words had rested very solemnly on my mind in this meeting, and I believed if such a situation was present, it would not be necessary such should be told of it, if there was no opportunity to amend and escape. I wished them to consider whether such a time might not come, that some of them might feel the sensation of too late. I thought the exercise laborious and impressive, and yet wished it to be more so, for it seemed to me to be too little regarded.

We went to Thomas Lawrence's to lodge. 8th. Attended Dickinson Meeting. I said, Speak, Lord, for thy servant heareth. This had impressed my mind weightily. It seemed as if some were ready to conclude, that if they were informed as intelligibly as Samuel was, they would attend to the requisition. I asked whether they had not known that some things, they were in the practice of, were wrong, as clearly as they could know if a vocal sound were heard to inform them. Notwithstanding this is so intelligibly known, yet such is the disposition and inclination to

do wrong, that doing that which is offensive to the Author of our existence is continued in, and very little attention given to please a kind and gracious God, as if it was no matter whether he was pleased or not, and we plead a want of knowledge too!

Though I thought it to be hard work yesterday, this seemed to exceed all. I spoke slowly as it presented, but so great was the resistance, that it felt to me, though the language seemed to be moving, it had but little effect. Though I felt love and compassion for the people, I would willingly have sat down and left them to take their own way, but could not find myself dismissed from labor; so I laboriously waded on through and found a resting place. Samuel Fausdick, of New Baltimore, took up the subject where I left it, and I thought had heavy labor; but still the life felt to me to be low, yet a tenderness appeared to take hold of many.

We dined at Moses Quinby's, and set out for Rensselaerville, and got to Nathan Spencer's late. In the morning we went to Richard Titus' and had notice given of a meeting at 3½ o'clock. It became a very precious time. I first mentioned, in Rama was a voice heard, lamentation, mourning and a bitter crying, Rachel weeping for her children and would not be comforted. Why should any bring distress on their own minds, so that when they are alone the solemn impression is sadness, however the outward appearance may be? Why should any try to conceal the anguish of mind and heaviness of heart, by indulging in the delights of sense; and feel lamentation, mourning and bitterness because of the inclination to indulge in amusements and delights, when to refrain would be followed with satisfaction of mind and true peace? O how strong the inclination after vain delights, when it [leads] to the desire to have remorse taken away, so that nothing be left to interrupt the enjoyment! If such were left without control, to go on in the way they list without remorse, then such as are concerned for them would feel lamentation and mourning for the innocent life thus lost and fled. While I was thus employed, pleading for the precious innocent life, and pointing to the sad effects of following delusive gratifications, and that, for a fancied satisfaction, not a real one; many appeared to be much tendered.

"3d mo. 10th. With great difficulty we got through snow-drifts to Middleburgh. I felt deep discouragement in my mind, but was easiest to make some remarks on the ministry, showing that humility was necessarily connected with a right attention to that service.

"3d mo. 11th. Attended meeting at Bern. The exercise previous to engaging in ministry not so trying as I commonly have. I began with: He that keepeth the word of my patience, him will I keep in the hour of temptation. It requires a close and faithful attention in order to obtain the promise of being kept in the hour of temptation that shall come on all the world to try them that dwell on the earth. What a favor it is, and how great the condescension, so graciously to condescend to the low, weak state and condition of His creature, man! I then adverted to the duty of worship, insisting on sincerity and uprightness of intention in performing it. Will it be acceptable to the Object of worship for us to say, I never knew anything more about it, than the outside appearance and sanctified

show; I never pretended to anything more? Will this amount to anything more, than for the profligate to say at the time of final decision, Lord, I never intended to serve thee, I intended to indulge and gratify myself in those delights within my reach; but now having done with these, be pleased to receive me into those ever-blessed mansions of unfading delights?

I believe the meeting, as well as myself, witnessed the overshadowing love of Israel's Shepherd to comfort and refresh the souls of the weary, renewing or strengthening a holy confidence in redeeming love. And I believe that many tender hearts rendered undissembled praise to the great King and Lord of all, who is now and everlastingly worthy thereof."

Those readers of "The Friend," who have perused the simple records which John Heald has left of his travels and exercises, must have noticed how often he was concerned to call his hearers to faithfulness and earnestness in waiting upon and worshipping our Creator. Happy will it be for those of us who learn this great lesson; who, in our every day walk through life, habitually turn the heart to God, seeking to feel His presence and sanction in all that we do, even in our usual business pursuits! This is in accordance with the apostle's exhortation: Whether ye eat, or whether ye drink, or whatsoever ye do, do all to the glory of God. Those who are thus living will often feel drawn to wait on Him, with the mind withdrawn from all outward things—endeavoring to feel themselves as poor, dependent creatures in His holy presence—so that they may witness their spirits solemnized, and tendered, if it be His will, by the overshadowing of His heavenly wing. When such come to the public assemblies for Divine worship, their thoughts will not be directed to the ministers who are present, looking to them to draw water from the well of spiritual consolation, and idly waiting to be refreshed by their labors; but they will feel it to be their duty on taking their seats, to follow the exhortation of the Psalmist: My soul, wait thou only upon God; for my expectation is from Him. They will feel the need of keeping a vigilant watch against that restlessness of mind which would lead their thoughts away from the Object of our devotion, and if through human infirmity they permit them to wander, they will feel humbled by a sense of their weakness. When it pleases Him, whom they are endeavoring to serve, to spread over their minds a feeling of religious exercise, or a sense of quiet and solemnity, they will rejoice in the favor. As they are thus gathered in spirit, they will be prepared rightly to profit by such labors in the public ministry as may be called forth from commissioned and qualified instruments; and will be in less danger of being deceived and injured by that preaching which is in the enticing words of man's wisdom, and not in the demonstration and power of the Spirit.

It may seem to some a trifling matter, but is there not ground to believe, when we see the members of a meeting sitting in lounging positions, with the arms extended on the backs of the benches, and in other undignified and careless ways, that such are not in that frame of mind which exists in a worshipping assembly? One may behave with the utmost propriety and dignity in a religious meeting, and yet the heart be in a worldly state; but

where the heart is rightly exercised our whole deportment will show it.

(To be continued.)

### Scientific Notes.

*Antiquity of Beer.*—The use of such fermented liquor is so remote, that we have no dates by which to fix its origin. When, however, other arts had become more developed, and the art of writing discovered, we begin to obtain some evidence as to its use among the people of ancient times. Thus we learn that Osiris (1960 B. C.) is said to have taught the use of fermented extract of barley. Though there must be much of vague tradition in this account of the Egyptian discovery, yet we know that Pelusium at the mouth of the Nile, was distinguished long before the Christian era, for the excellence of its barley-wine. The Greeks, who derived the greater part of their civilization from the Egyptians, obtained from them the art of brewing at a very early period. We find mention, for example, in the writings of Archilochus, about 630 B. C., that the Greeks of his day were acquainted with this art. The Romans, in very early periods of their history, made use of beer, their "cervisia," prepared from barley, wheat and other cereals. Tacitus, in his work on the manners and customs of the Germans, mentions their great love for beer. The ancient Gauls, Britons and Scandinavians were noted for the use of beer in their festive meetings. At the present time, it is estimated that from 25 to 30 millions of barrels of this article are made in Great Britain alone.

R. A. Proctor, in attempting to give a conception of the Sun's distance from us, makes the following statements. An Armstrong gun sends a projectile with an initial velocity of 400 yards per second. If that velocity could be maintained, in thirteen years such a bullet might reach the sun. The sound of the cannon's report would be some half a year later. Sound travels quite slowly. So, if those heathen who pray to the sun could be heard by it, some thirteen and a half years would pass before their petitions could reach it. If a steel rod connected the earth and sun, and received the pull of the sun, that strain would reach the earth only in three hundred days. Feeling travels through the nerves one-tenth as rapidly as sound through the air. So if we could imagine a child with an arm 91,000,000 miles long, and that arm stretched out to touch the sun, he would grow into youth and manhood, pass the allotted three-score years and ten, and die without knowing he had burned his fingers. For it would take 135 years for the nerves to give him that information.

A Swiss society has recently offered a prize of 1000 francs, for the best essay on the importance of observing one day in the week as a day of rest, from the hygienic point of view.

*Koumiss*, or milk-beer.—Milk contains a peculiar kind of sugar, less sweet than cane sugar, to which the name of milk-sugar is given. This sugar, when dissolved in the milk along with the curd and butter, readily ferments, is transformed into alcohol and carbonic acid, and gives to the liquid an intoxicating quality. This fermentation will take place spontaneously; but it is hastened by the addition of yeast, or of a little already fermented milk. The fermented liquid is the Koumiss of the Tartars. Mare's milk is richer in sugar than that of the cow, and is usually

employed for the manufacture of milk-beer. It is prepared as follows: To the new milk, diluted with one-sixth of its bulk of water, a quantity of rennet, or what is better, some koumiss is added, and the whole is covered up in a warm place for 24 hours. It is then stirred or churned together till the curd and whey are intimately mixed, and is again left at rest for 24 hours. At the end of this time it is put into a tall vessel, and agitated till it becomes perfectly homogeneous. It has now an agreeable, sourish taste, and, in a cool place, may be preserved several months in close vessels. It is always shaken up before it is drunk. This liquid from the cheese and butter it contains, is a nourishing as well as exhilarating drink. It has been used as a wholesome article of diet in cases of dyspepsia and general debility, and in some other forms of disease, and it is said with beneficial results. The London manufacturers, who use cows' milk, add a portion of sugar to it, before setting it to ferment.

It is reported that a gardener at Tattenham, England, has succeeded in cultivating the Cockatoo flower of Madagascar, *Angraecum Ellisii*, and that it has recently bloomed. The flowers are pure white, sweetly scented, and with tubes or tails six inches in length.

The coral banks of the coast of Algeria are very rich, and said to produce the most beautiful coral in the world. In the 16th century France had the privilege of this fishery, and the coral business flourished greatly at Marseilles. During the wars of the Empire, however, England deprived France of the right of the fisheries, which were then abandoned to the Greeks and Sicilians. At present the industry has taken root in Italy, where the low cost of manual labor makes it very prosperous. The coral fishery off Algeria was in 1871 done by 220 vessels, each of them manned by 8 or 10 men, and the product was valued at 2,380,050 francs. In 1872 only 131 boats were employed; the discovery of new banks on the Sardinian coast being the cause of this diminution, but, notwithstanding, the fishery was more productive than the previous year. Divers' jackets and diving-bells have been forbidden, as tending to injure the bottom. Each bank is divided into 10 parts, only one of which is gone over in each year.

For "The Friend."

A concise account of that eminent and faithful servant of the Lord, John Burnyeat, (copied from the Rise and Progress of Friends in Ireland) being his own words.

"In the year 1653, it pleased the Lord to send his faithful servant George Fox, and others, into the north of England, and by the means of their ministry to discover the *right path of life* unto thousands that were in error, seeking the Lord, but not knowing where to find him, although he was *not far from us*, viz., by directing us unto the *true light and appearance of Christ Jesus our Saviour, in our own hearts*, that we might come to *know him*, and the glory of the Father through him, in his appearance, and so come to believe in him with the heart, and with the mouth confess him unto salvation; and God by this the Light of his blessed Son, which he had lighted me withal, let me see the body of death and power of sin which reigned in me, and brought me to feel the guilt of it upon my conscience, so that he made as it were to possess the sins of my youth, and now all that I

had built for several years; and particularly my high profession and conceit of an *imputed righteousness*, and that though *I lived in the act of sin, the guilt of it should not be upon me, but imputed to Christ, and his righteousness imputed to me*; was now, by the *shinings of the discovering light*, seen to be but a Babe tower which God brought confusion upon a presumption and invention (of man), or but like Adam's fig-leaved apron, in which he could not abide God's coming. I then came to see the guilt of sin remained, while the body of death remained, and *led into the act of sin*. Then began the warfare of true striving to enter the kingdom; then Paul's state was seen, wherein to will was present, but to do, many times power was wanting; the confusion, amazement, horror and distress beset me. O the poverty and want that my soul saw itself in, through the springing of the discovering light, which also manifested the exceeding sinfulness of sin, and the load and burden of it became exceedingly grievous, and all the pleasure of it was taken away from me and many more in that day, and then we began to mourn for a Saviour, and cry for a helper and healer, for the day of the Lord that made desolate had overtaken us, and the fire and sword that Christ brings upon the earth, by which he takes away peace, had reached unto us. We often assembled together as the Lord's messengers had exhorted us, and minding the Light of Christ in our hearts, and what that discovered, and through its assistance warred and watched against the evil seen therein, and according to that understanding received waited therein upon the Lord, to see what he would further manifest, with a holy resolution to obey his will so far as we were able, whatever it cost us. *We valued not the world, nor any glory or pleasure therein*, in comparison of our souls' redemption from that horror and terror we were in, under the indignation of the Lord, because of the guilt of sin that was upon us; and so being given up to bear the indignation of the Lord, because we had sinned, we endeavored to wait until it would be over, and the Lord in mercy would blot out the guilt which occasioned wrath, and sprinkle our hearts from an evil conscience, and wash us with pure water, that we might draw near with a pure heart, in the full assurance of faith as the Christians did of old, and waiting in the way of the Lord's judgment, we began to learn righteousness, and strongly desire to walk therein, and could no longer be satisfied with a talk thereof, and when we were in our deep fears, and our minds not well acquainted with either right striving out of self, in the Light and seed of Life that doth prevail and give the entrance, or true waiting or standing still, out of our thoughts, willings and runnings, which do not obtain, the Lord sent his servants who had learned of him, to direct us in what to wait, and how to stand still, out of our own thoughts and self-strivings, in the Light that did discover and dwell in the judgment we received therein, and by them our understandings were informed, and we got to some degree of staidness in our minds, which before had been as the troubled sea; and a hope began to appear in us, and we met often together and waited to see the salvation of God which we had often heard of, that he would work by his own power, and after we had met together for some time as we had opportunities, and

also sought the Lord with travailing spirits both night and day, when we were at our callings and upon our beds, being in our assemblies exercised in the *living judgment* that sprung in the light of our souls, and looking for the salvation of God, the wonderful power from on high was revealed amongst us, and many hearts reached therewith, and melted and broken; and great dread and trembling fell upon many, and the very *chains of death* were broken thereby and the promises of the word spoken by Isaiah the prophet, xlix. 9, and xlii. 7, and lxi. 1, 2, 3, were fulfilled unto many, and a heavenly gladness entered the hearts of many, who in the joy of their hearts broke forth in praises unto the Lord. The same Comforter our blessed Lord had promised, John xiv. being now come and received, did teach us to know the Father and the Son; when were our hearts inclined to hearken to the Lord, and our ears which he had opened to hear, were bent to hear what the Spirit's teaching was, and what he said unto the church, who was the chief Shepherd and Bishop of the soul, and thus were we gathered into right gospel exercise and gospel worship; and worshipped God who is a Spirit, in the Spirit received from him, according to Christ's appointment, John iv. 24; and then we came to see over all the worshipings in the world, which were set up either by imitation, or man's invention, and saw it to be in vain to worship God, and teach for doctrine the commandments of men, and therefore we were constrained to withdraw from them, and so many of us to go and bear witness against them in their invented and traditional worshipings, where they were ignorant of the life and power of God; and growing in experience of the goodness of the Lord, and of the sweetness, glory and excellency of his power, in our assemblies, we grew in strength and zeal for our meetings, more and more, and valued the benefit thereof more than any worldly gain: and thus continuing we grew more and more into an understanding of divine things, and heavenly mysteries, through the openings of the power that was daily amongst us, and wrought sweetly in our hearts, which still united us more and more to God, and knit us together in the perfect bond of love, of fellowship and membership, that we became a body compact, made up of many members, whereof Christ was the head." S. C.

Millville, 3d mo. 13th, 1874.

For "The Friend."

In the annexed portion of a letter of John Barclay to Samuel Alexander, there is a close pressing home of the indispensable need and duty for all that would attain eternal life, to submit themselves to Christ Jesus, taking his yoke or cross upon them, in order to know their calling, or what His will concerning them is, and then to abide in the same. If we be poor and blind and lost creatures, and can get nothing without the Saviour's grace—though *all-sufficient*, and *made perfect in weakness*; if there be neither help, nor hope, nor happiness out of Him, but in Him all things, our wisdom, righteousness, sanctification and redemption; if his servants we are whom he obey, and that obedience is to be "as the eyes of servants look unto the hand of their masters, and as the eyes of a maiden unto the hand of her mistress," then surely the Lord's life and glory should be diligently waited

upon, with close, patient watchfulness unto prayer in all our steppings and goings forth, that His will may be known, and in our feeble measure done, which is our sanctification.

"Dear Friend:—It is pleasant to me to accept of thy kind invitation to come to Needham and in any way that I can, be of use to thee while there. I make no doubt there will be little cause for hesitation on my part. I could not say as much to many: for many now-a-days press and force themselves and one another (as thou well knowest) into services and plausible things, that have a show of good, (and are, it may be good when called for at their hands) which nevertheless the Truth in the bottom of their own hearts never called for, and so will hardly stand them out in, though the wrong thing in them may approve of it, and the world of professors, both such as bear the name of Friend and such as do not, may mightily applaud.

Our dear friend, Benjamin White, has been among us as one of the ancient Christians, or as one of our early Friends, rousing the earthly minded and lukewarm in such a powerful and authoritative manner, as we have not been used to of late years I suppose. Friends seem to look at one another, half frightened, to hear such close doctrine, and to be turned inside out, as he has in some instances to my knowledge been favored to do. And Friends cannot entice him to speak smooth things, nor win him over to prophesy deceits: and those that run after him or his company are disappointed in him, for they find nothing attractive or pleasant to that mind in them which should be crossed and crucified; but his habitual watchfulness reproves that which diverts from the Truth; and his silence and reserve (except when at times otherwise disposed) have been instructive to me, and seasoning: tending to lead to self-examination and reflection.

Thou wilt not take me to be setting up any man, nor yet as pleading for a formal superstitious gravity of face and figure. I may tell thee freely, that ever since I have known this way which used to be 'everywhere spoken against,' but which now 'all men speak well of,' I have sought diligently to meet with all those that lived in the *life and power* of those good things and right principles which they professed in their writings, and which were once witnessed by a little cloud of witnesses, and which Truth persuades me still leads into and preserves in, where it is heeded. And I have found *but a remnant* up and down that hold the Truth in the life of it; whose garments were free from the spots of the world and its religion, (for the world has taken to be religious, yet still 'lies in wickedness,') nor have I ever found of this remnant *but what* has sackcloth underneath, and are in mourning because of the oppression of the enemy: the joy of these and the ground of their rejoicing stand in the *real*, not in the *apparent* prosperity of the cause of Truth; their harps were hung upon the willows, their heads hung down, and their eyes were heavy. Among these I was ready to reckon a Woolman, a Scott, a Grubb of later years, and I felt as though I dare not make void their sufferings for the seed's sake. Having said this much I am inclined to add, that many things relative to the state of our Society, past and present, seem often to clear up in my view, when sometimes I have looked least for it; and I have more than once remembered the description of Ezekiel's vision, when he was brought

first to the door of the inner gate of Jerusalem, then toward the gate of the altar: afterwards he had to dig for a door bid; whereupon the command was, 'Go in,' &c., and he was shown yet greater and greater abominations, more and more hidden ones."

## THE FRIEND.

FOURTH MONTH 4, 1874.

"Day unto day uttereth speech, and night unto night showeth knowledge." This scripture declaration though when uttered, applied to the revelation of Divine power in the creation, may be quoted as descriptive of the progressive demonstrations of the fruits of the new religion struggling for complete control in the religious Society of Friends. Forty years ago Sarah Lynes Grubb, in one of her letters said, "In the Quarterly Meeting of Ministers and Elders [London and Middlesex] I was enabled to declare plainly *what the fashionable doctrine now preached among us, would lead to*; and to warn of the danger attached to leaning to our own understanding in spiritual things." Again in another letter of the same year, "I cannot close my eyes to the wide deviations from our ancient testimonies, which are, I believe, *fast levelling us with the world at large*." From that time to this, day unto day has been uttering the fulfillment of what she, and many other dedicated servants of the Most High, predicted would follow the general acceptance of the principles promulgated by the Beaconites, by J. J. Gurney and Dr. Ash; until now the change that has been effected is so great, especially in the character and mode of worship and prayer,—both essential to cohesion in one religious Society—that it is incomprehensible how those devoted to the recently introduced practices, can at the same time claim to be sincere and to be Friends.

We have just received information of doctrines preached and circumstances attending a series of meetings recently held under profession of Friend's meetings, altogether incompatible with the doctrines and practices which the Society of Friends has ever professed and endeavored to carry out. At present we think it not needful to spread the account on our pages, as our readers have at different times found similar statements in our columns.

The grievances and trials of Friends in the present day, may give rise to a want of right appreciation of the opinions and feelings of those who, though in membership, differ widely from those who adhere to the faith promulgated by Fox, Penn, and Barclay; but it is an indisputable cause of just complaint against them that they show a continuous determination to enforce, directly or indirectly, their new principles and practices upon the Society, which has from its rise, borne an unvarying testimony to the scriptural faith it holds, as set forth by the authors we have mentioned, and the testimonies springing from that faith. This, too, while knowing that those members who still hold to that faith and those testimonies, and endeavor to reduce them to practice in their daily lives, would rather suffer any wrong and deprivation than compromise or give them up.

While all rightly concerned Friends mourn over the grievous defections and departures they know have taken and are still taking

place within the pale of the Society, they have no desire to interfere with the right of liberty of conscience, of each one adopting the opinions he or she may believe right. But when a continued course of action shows conclusively that the original doctrines of Friends have been abandoned and others adopted, it cannot be otherwise than that the same inconsistency that attended a similar abandonment—though in different points—on the part of the Hicksites, should call forth similar animadversion.

Where those who are convinced of the soundness of the principles of Friends, as they have been set forth by their approved writers, and sanctioned by the Society ever since their first publication; that they are the product of the Holy Spirit, and that the testimonies and practices of Friends are an application of those principles consistent with the will of the Head of the church, where such find that the path of duty is continually obstructed by others, who profess to have found and adopted something better, they cannot but feel they are subjected to imposition and intolerance, and that to comply or compromise with what is called "modernized Quakerism," is to lay waste the cause and testimony of Truth. Such have need, in their efforts to maintain the right, of patience, long-suffering and christian forbearance; but it must be borne in mind that while it is very grateful to have the sympathy and support of the many, yet the good opinion of our fellow men is no test of the value of the cause espoused, or their applause a criterion of the merit of its supporters.

When the duty of the hour presents, whether in accordance with our inclination or not, we are required to perform it, and our eternal interest is connected with obedience to our convictions. It is no part of practical wisdom to waste our energies in unavailing regret that the circumstances under which we are placed are not more propitious, or that others have not conducted themselves so as not to make it needful for us to differ from or oppose them. The cause of truth and righteousness is of more value than any thing else we can be engaged in, and must not be bartered for any consideration. It will finally prevail and triumph over all that may oppose it.

#### SUMMARY OF EVENTS.

**FOREIGN.**—The remains of Dr. Livingstone arrived at Suez on the 28th ult., en route to England. It appears that Livingstone died 5th mo. 4th, 1873, in the region beyond Lake Bemba, in the Bisa country. He made the last entry in his diary on 4th mo. 27th. After Stanley's departure the indefatigable explorer left Unyamembi, rounded the south end of Lake Tanganyika, travelled south of Lake Bemba, crossed it from south to north, and then proceeded along the east side returning north through the marshes to Muelesla. All his papers, sealed and addressed to the Secretary of State, are in charge of a British merchant of Zanzibar.

Siemens Brothers announce that their new steamship, the *Faraday*, built specially for the purpose of laying cables, will commence on the 15th of this month to take on board the cable which is to be laid direct to the United States. The Great Eastern will start in the Eighth month to lay the Portuguese telegraph cable from St. Vincent, in the Cape de Verde Islands, to Pernambuco, Brazil.

Disraeli has consented to receive a deputation of seventy Irish members of Parliament, who come to urge the release of the Fenian convicts. Dr. Butt and others will address the premier. The members of the deputation are very hopeful of receiving a favorable reply. There are only sixteen Fenians remaining in confinement.

The trustees of the London Peabody fund state that the number of families residing in the trustees' buildings is 882, occupying 1875 rooms. The average rent

per room is 1s. 10d. per week, and the net income derived from the buildings is about 2½ per cent. per annum upon the outlay. Two more blocks for the accommodation of 44 families have been built on the Blackfriars road estate, which will shortly be opened; while 16 blocks, for 352 families, are in course of erection on the site near Stamford street.

The coal miners of Staffordshire, to the number of 12,000, have struck work. The London papers attribute the prevailing depression in business to the extensive strikes of the coal and iron miners in various parts of England.

London, 3rd mo. 30th.—Consols 92. U. S. sixes, 1865, 109½; 5 per cents, 104.

Liverpool.—Uplands cotton, 8½d.; Orleans, 8¼ a 8½d. Breadstuffs quiet

The French Assembly has resolved to adjourn from 3d mo. 28th to 5th mo. 12th. A deputation of Royalists will soon visit the Count de Chambord, and make a last effort to effect a restoration of the monarchy. A Paris dispatch of the 27th says: In the Assembly today M. Dahirel, Monarchist, moved the Assembly take a vote on the first of July to decide the future form of government. He urged that it was impossible to adopt a constitution without first settling the question whether France was to be a monarchy or a republic.

The motion caused great excitement in the chamber and a heated debate ensued. M. Kerdre and the Duke de Broglie spoke against the motion and it was rejected.

Rochefort and Pascal Grousset have escaped from the penal colony of New Caledonia to Australia. They left in a small open boat, and had been three days at sea when they were picked up by a British vessel and taken to Australia.

A Madrid dispatch of the 26th says: A desperate engagement was fought yesterday before Bilbao. The Republican army, under the command of Marshal Serrano, attacked the Carlists at 6 o'clock in the morning, and met with a stubborn resistance. The battle was kept up all day, and was only stopped by the approach of night, when the Republicans encamped on the positions they had captured from the Royalists. The loss of the national troops was 470 men. The contest was renewed the following day and closed at night with decided advantages for the national forces, who had driven back the Carlist lines and taken a number of positions occupied by them.

Dispatches from Carlist sources, on the contrary, claim success for the insurgents in the two days fighting with Marshal Serrano.

A correspondent of the London Times, at Serrano's headquarters, telegraphs that the losses in the battle before Bilbao were very heavy.

A Vienna dispatch of the 25th says: Several deputies have prepared a resolution in the lower house of the Reichsrath, requesting the government to expel from the country the Jesuits and all orders affiliated therewith.

The Emperor, Francis Joseph, will visit Naples where he will meet the King of Italy and accompany him to Turin.

It is reported that King Victor Emanuel burned the address sent to him from a number of the citizens of Trieste, because it contained treasonable sentiments toward Austria, and that he will send in the Austrian government a disavowal of sympathy with the address.

The Carlist Junta at Bayonne, has received dispatches from Durango, near Bilbao, claiming that the Royalists maintain all their positions, and that they have cut the telegraph wires behind Marshal Serrano's army. These dispatches state the loss of the Republicans in the recent contest at 4,000 killed and wounded, while that of the Carlists did not exceed 1,000.

A London dispatch of 3d mo. 31st says: There have been heavy losses on both sides in the battle before Bilbao. Santander is crowded with wounded from the Republican ranks. The Carlist besieging force has partially suspended the bombardment of Bilbao, in order to turn their guns against Serrano's army.

**UNITED STATES.**—There were 525 interments in New York last week. The annual report of the New York Chamber of Commerce shows that the imports of New York, for the year ending 6th mo. 30th, 1873, amounted to \$426,321,427; those into all other ports of the United States \$237,295,720. The exports were from New York \$313,129,963; other ports \$336,002,600.

In Philadelphia last week the interments numbered 300. On the 24th ult. a destructive fire at Cramp and Sons' ship-yard consumed property valued at \$175,000.

The recent proceedings in Congress have been mostly unimportant. The Senate has agreed with the House in fixing the legal tender circulation at \$400,000,000. The House of Representatives, by a vote of 121 to 116, has passed a bill to regulate commerce by railroad

among the several States. By this bill railroads carrying freight and passengers between different States, are forbidden to charge more than a fair and reasonable rate for transportation, such rate to be ascertained and fixed by a Board of nine Railroad Commissioners to be appointed by the President, with the advice and consent of the Senate, and to be residents of each of the nine judicial districts of the United States. They are to be disinterested persons, and not to have any interest in the stock, bonds, or property of any railroad or other transportation company.

The total production of coal in the United States in 1873, according to the *Pottsville Miners' Journal*, was 45,413,330 tons, viz: Anthracite 22,828,108 tons, and Bituminous 22,585,222 tons. The total increase in 1873 over 1872 is 1,962,179 tons.

The towboat Crescent City, with six barges in tow blew up on the 23d ult. at Montezuma Island, on the Mississippi river, and sunk immediately. The barge were all consumed. Sixteen persons were killed and others badly injured. Loss of property about \$300,000.

A fire at Elmira, N. Y., last week, destroyed much valuable property. Estimated loss \$260,000.

The Assistant Treasurer at New York, has been directed to sell \$5,000,000 gold during the Fourth month.

The Massachusetts Legislature has balloted many times for U. S. States Senator to succeed Charles Sumner without effecting a choice. The votes are chiefly divided between Dawes, Hoar and Curtis, the latter being the Democratic candidate. The ballot taken on the 30th ult. resulted as follows: Whole number of votes, 256, necessary to a choice 129. Dawes received 8 votes, Hoar 73, Curtis 72, scattering 26.

The production of wool in the United States during the last four years is thus set down by the Commercial Bulletin. In 1870, 125,000,000 pounds, 1871, 112,500,000 pounds, 1872, 135,000,000 pounds, in 1873, 148,500,000 pounds.

**The Markets, &c.**—The following were the quotations on the 30th ult. *New York.*—American gold, 113 U. S. sixes, 1881, Reg. 119½; Coupons 120½; dilt 1868, 119½; 5 per cents, 115. Superfine flour, \$5.90 \$6.20; State extra, \$6.35 a \$6.60; finer brands, \$7 \$10.75. No. 1 Chicago spring wheat, \$1.57; No. 2 do. \$1.53; red western, \$1.62. Oats, 58 a 64 cts. Starrye, \$1.03. Yellow corn, 88 cts.; white, 88 a 92 c. *Philadelphia.*—Cotton, 17 a 17½ cts. for uplands at New Orleans. Superfine flour, \$5 a \$5.50; extra \$5.75 a \$6.50; finer brands, \$7 a \$10.25. Red wheat \$1.60 a \$1.65; amber, \$1.70 a \$1.75; white, \$1.80 \$1.90. Rye, 95 cts. Yellow corn, 82 cts. Oats, 58 a 65 cts. Rice, 8 a 8½ cts. Lard, 9½ a 9¾ cts. About 2200 beef cattle sold at 7¼ a 7½ cts. per lb. gross, extra, a few choice 8 cts.; 6¼ a 7 cts. for fair to good and 4½ a 6 cts. for common. Sheep sold at 6 a 8¼ cts. per lb. gross, and corn fed hogs at \$8.50 a \$9 per 100 lbs. net. *St. Louis.*—No. 2 winter red wheat, \$1.50 No. 2 spring, \$1.23. No. 2 corn, 63½ cts. No. 2 oats 50 cts. Spring barley, \$1.28 a \$1.45. *Chicago.*—Spring extra flour, \$5 a \$6.75. No. 1 spring wheat \$1.25; No. 2 do., \$1.19½; No. 3 do., \$1.17. No. 1 mixed corn, 63 cts. No. 2 oats, 44½ cts. No. 2 spring barley, \$1.52 a \$1.54. Lard, 9½ cts. *Cincinnati.*—Wheat, \$1.40 a \$1.43. Corn, 65 a 68 cts. Oats, 50 a 57 cts. Rye, \$1.05. Lard, 9¼ a 9½ cts.

#### WESTTOWN BOARDING SCHOOL.

As the stations of Superintendent and Matron of this Institution are expected to be vacated at the close of the Winter Session, in the 4th month next, Friends who may feel drawn to undertake the duties attached to them, are requested to communicate thereon with either of the following named members of the Committee.

Nathaniel N. Stokes, Cinnaminson Post-office Burlington Co., N. J.  
Charles Evans, No. 702 Race St., Philadelphia  
Deborah Rhoads, Haddonfield, N. J.  
Rebecca S. Allen, No. 335 S. Fifth St., Philad.

A young woman Friend, with experience as a teacher, desires a situation as assistant in a Friends' School.  
Address box 12, Kennett Square, Chester Co., Pa.

DIED, at the residence of her son-in-law, Dall Reeves, Harford Co., Md., Third month 3d, 1874, ABIGAIL N. PARKER, in the 73d year of her age, member of Birmingham Monthly Meeting of Friends.

WILLIAM H. PILE, PRINTER.

No. 422 Walnut Street.

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Stage, when paid quarterly in advance, five cents.

For "The Friend."

Memoirs and Letters of Sarah Hillman.

(Continued from page 259.)

To Martha Wistar.

"Philadelphia, 3d mo. 2nd, 1839.

Dear Friend:—Amid many and varied disarrangements and conflicts both of flesh and spirit, my mind this morning seems to salute thee; and, in a little renewed feeling of sister-sympathy and tender affection, desires thy union with that of thy dear companion's encouragement and increase in that which is fading and which lives through death.

You have had dear E. Robson from house to house among you, scattering precious seed; and I trust in some places, if not many, it will not only take root but spring up, and bring forth fruit to the praise of the great Husbandman. Ah! hath He not visited and watered, and sent his servants again and again amongst us? But *what* are the fruits, and *where* are they? In this place, things are very discouraging. Elders there are who have left their first love; and ministers who are teaching the people some easier or other way to the kingdom of Heaven, than the way of the cross—the way which our Divine Lord and Redeemer consecrated for us—and who are robbing Him of His honor by saying, He has not yet come in His Spirit. There is notwithstanding, as thouarest in thy last very precious communication, some consolation in the belief, that among our dear young Friends, there are many attracted by the powerful influences of Divine Grace secretly revealed, and are made willing to wait for Him who is the Resurrection and the Life, where alone He is to be singularly known—in the heart; and in this school are being taught to yield to His all-conquering power. Some of these there are, who have been of later days constrained to appear in the simple garb of the Friend, though I doubt not much in the cross to the natural will; but to the realizing of the peace which passeth understanding, and does follow the audience in the day of small things—the audience of faith. — is of this number. Thou knowest him I suppose? His views are very sound and clear. May he be preserved. We have lost a father and a prince in the removal of dear Jonathan Evans. He who stood as a wall of defence on the right hand

and on the left; and was indeed an elder worthy of double honor. He was one whom the archers sorely grieved, and shot at, and hated; but whose bow abode in strength, and the arms of his hands were made strong by the hand of the mighty God of Jacob. And when called to put off mortality, his work appeared finished, so that there seemed to be nothing more to do. The language of conduct with him was, 'I have fought a good fight, I have finished my course, I have kept the faith: henceforth there is laid up for me a crown of righteousness,' &c. Ah! he is gone. And to some of us to be stripped at such a season as this of such a prop, such an unbending pillar, when so many that 'seemed to be pillars' bend, is at times almost overwhelming. Yet, dear friend, we have cause to believe that He whose is the work, and the power, and the cause too, will not fail those who put their trust in Him; but that as He has in mercy visited and called and chosen many who have gone before us, and kept them to a happy conclusion in His favor, and has also mercifully visited, and brought our souls, with many, many more, in some measure acquainted with the teachings of His Blessed Spirit, so He will continue, in His adorable mercy, to work in and for us, as well as in all who receive Him and obey His teachings. For truly His grace hath appeared to all men; and he hath wrought all that for us which in early days He spoke to us of, when our souls were first enamored with His love, and He became to us the chiefest among ten thousand, and altogether lovely.

I have found it necessary since thy last, to leave my home again a little while to attend the Quarterly Meetings of Concord and Western. Dear Grace Evans accompanied. Was at Springfield Meeting two First-days, and was favored to return with the covering of quiet, peaceful poverty; for which, unworthy as I am, I was thankful. My spirit does not ascend to the heights as some I have read of and heard of, yet there is a reward for every act of faith, and labor of love I assuredly believe, if it be no more than a little increasing ability to trust in our Heavenly Father's care, and commit our all into His holy keeping, as into the hands of a faithful Creator. The world can afford us no staff to lean upon. Its friendships are oftentimes very fluctuating, even when based, we had hoped, upon religion. But the foundation which is laid in Zion is immovable; and if we are only builded on this sure foundation, we need fear no evil, for we shall be, as we continue faithful, kept from the power of the enemy. May we, saith my soul, dear friends, be kept each in our lot, patient and faithful, whatever the permitted trials of our day may be, and they will be many I doubt not; that thus we may be prepared to be joined with that blessed company, who stand on mount Zion, and with palms in their hands, are ascribing all honor and glory and praise, to Him who hath loved them and

washed them from their sins in His own precious blood.

Thy cousin, H. Osley, has applied to Friends of Philadelphia to be received into membership. I called to see her; she desired her love to thee. In which desire my dear mother and sisters unite, with thy affectionately attached friend,  
S. HILLMAN."

To William Scattergood.

"Philadelphia, 5th mo. 27th, 1839.

\* \* \* \* My mind is deeply oppressed under weights and burdens known only to my (our I should say) Almighty Helper, who 'weigheth the mountains in scales,' and in His own way and time bringeth from under the mountains, removeth the weeds from about the head, and is afresh felt to be our Wisdom, Righteousness and Sanctification. Ah! there are none, I believe, fully made sensible of what the poor messengers, who are sometimes called upon to blow the trumpet in Zion, and sound an alarm in the Lord's holy mountain, have to pass through while eating the roll of prophecy, but they who are baptized into the same death. Nevertheless they have this sure consolation, they know He that is in them is greater than he that is in the world, and that He will keep that which we have through mercy been enabled to commit unto Him to the great day. Then in seasons of great conflict let us retire into the strong tower, and spread our cause before Him whose we are, who knoweth us altogether, and whom we desire to serve in the Gospel of His dear Son. Surely there is nothing in this world worthy to be compared with the joys of His salvation; not any thing worthy the energies of the immortal mind, but the pursuit of those durable riches and righteousness which are at His right hand. I can truly tell thee, my dear friend, that since I saw thee very little relief has been afforded my poor mind; but from meeting to meeting I have been wading in deep waters without any ability to cast off the burden, or any part of it. Retiring last eve under much oppression, I was awakened after a little sleep with this gracious promise, 'I will strengthen thee, yea I will help thee, yea I will uphold thee with the right hand of my righteousness.' Thinking it might prove a little encouragement to thee also, I freely pen it. Thou art aware that thy correspondent has long known of baptisms and conflicts, and deaths many; and still made slow progress towards the promised land. Yet to the praise of His grace who has thus far sustained I can say, that when my heart has been thoroughly reduced into submission, He has, blessed be His holy Name, always showed himself strong. He has burst the bars of iron in sunder. He has said to the prisoner, 'go forth.' Yea, and even out of darkness has brought into light. Peter's situation, when sleeping between two soldiers, bound with two chains, has been much before me. When the angel of the Divine presence

appeared, a light shined in the prison, and the command was given, 'go, stand and speak in the temple to the people all the words of this life.' Chains could not bind him then. The prison doors opened of their own accord; and we find, that after the angel had conveyed him through the gate and one street, he departed. Peter was to feel what he was; he was to go in the strength of Him who had called him; as must we also. And now if thy Heavenly Master is preparing to say to thee, return to thy country and to thy kindred; if He bid thee come to labor in this thy native and poor, yet beloved city, come: there are hearts here open to receive you in the right time. The harvest is truly great, the faithful laborers are very few. Though to the outward eye, many laborers there are, and some labor much. — came yesterday to our meeting and spoke long; then prayed. To me there was the savor of death. The spirit that is gone forth, cries, words! words! help, help! chiefly to the servants not to the Master. 'It is splendidly delusive,' as S. Fothergill said; and cannot distinguish between that which serveth God, and that which serveth him not. \* \* \* I am thy attached sympathizing friend,  
S. HILLMAN."

(To be continued.)

### The Escorial and Philip II.

A. J. C. Hare, in his "Wanderings in Spain," thus notices the gloomy and magnificent building which occupied so much of the attention of the bigoted Spanish monarch.

The Escorial may be taken upon the road northwards, or may form a separate excursion from Madrid. The station of the name lands you at the foot of the hill on which this colossus of granite is placed. It is generally described as standing in a mountain wilderness, but this is not quite true. You ascend through woods which are pleasant enough, and where Charles VI. wisely declining to inhabit the "architectural nightmare," built a pretty little toy palace of his own. But behind the Escorial all is a bleak solitude, blue bleak peaks, capped with snow, and furrowed by dry torrent beds, or sandy deserts sprinkled over with boulders of granite. There is no softening feature. The dismal streets of granite houses, which surround the huge granite palace and church, have the same lines of narrow prison-like windows, the same harsh angular forms everywhere. The main edifice was thirty-one years in building, and is three quarters of a mile round, but each wall is just like the other, they have no distinguishing features whatever. It has thirty-six courts, and eleven thousand windows, but they are all of the same size, and all exactly alike. The architect, Herrera, was tied down to the most hideous of plans, that of a gridiron, because it was the emblem of St. Lawrence, upon whose day, the 10th of August, the building was begun after the successful siege of St. Quentin. The whole is justly looked upon as a stone image of the mind of its founder, Philip II. And the interest which encircles this cruel yet religious, this superstitious yet brave, character lends a charm even to the Escorial. Except the extirpation of heretics, it was the chief object of his earthly ambition. The seat is shown high among the grey boulders of the hill-side, whence he used to watch the progress of the huge fantastic plan, as court after court was added, each fresh wing forming another bar of the gridiron.

When it was finished, he deserted his capital, and made it his principal residence, devoting himself to an eternal penance of fasting and flagellation, but at the same time boasting that he governed two worlds from the heights of his mountain solitude. Hither, when he felt the approach of death, during an absence at Madrid, he insisted upon being brought, borne for six days on a litter upon men's shoulders, and here, during his last hours, he was carried round all the halls to take a final survey of the work of his life.

The main entrance is so featureless as almost to pass unnoticed. It leads into a vast gloomy court-yard, at the end of which are huge statues of the kings of Judah. These decorate the facade of the church. Its interior is bare and dismal, but the proportions are magnificent, and though the effect is cold and oppressive, it is not without a certain solemnity of its own. In high open chapels on either side of the altar, kneel two groups of figures in gilt robes. On the left are Charles V., his queen, his daughter, and his two sisters; on the right are Philip II., three of his wives (the unlamented Mary of England being omitted), and Don Carlos. Down a long flight of steps you are led by torchlight to the *Panteon*, an octagonal chamber surrounded by twenty-six sepulchres of kings or mothers of kings, arranged one above another like berths in a ship. Charles V. occupies a place in the upper story. Brantome declares that the Inquisition proposed that his body should be burnt for having given ear to heretical opinions. It remains, though curiosity, not heresy, has twice caused the coffin to be opened; the last time in 1871, during the visit of the Emperor of Brazil, when hundreds of people flocked from Madrid to look upon the awful face of the mighty dead, which was entire even to the hair and eyebrows, though perfectly black. Philip II. fills the niche below, lying in the coffin of gilt bronze which he ordered to be brought to him, that he might inspect it in his last moments, and for which he ordered a white satin lining and a larger supply of gilt nails, with his last breath. Each of the Austrian kings seems to have loved to pass hours here in meditation over his future resting-place. \* \* \*

The convent stall is still shown which Philip II. occupied, and where he was kneeling when the messenger arrived breathless with eager haste from Don John, of Austria, to announce the victory of Lepanto, but could obtain no audience till the monarch had finished his devotions. From hence it is but a few steps to the low bare rooms which the bigot king occupied as a dwelling. They are full of interest. The furniture is the same, the pictures, the table, the chairs, the high stool to support his gouty leg. At the bureau, which still exists, he was sitting writing when Don Christoval de Moura came in to announce the total destruction of the Spanish Armada, the scheme on which he had wasted a hundred million ducats and eighteen years of his life. Not a muscle of his face moved. He only said, "I thank God for having given me the means of bearing such a loss without embarrassment, and power to fit out another fleet of equal size. A stream can afford to waste some water, when its source is not dried up."

The inner room opens into the church by a shutter. At this opening the ghastly figure of the king was seen present at the public mass during his illness, following the prayers

with an agonized fervor of devotion. Here also, he sate on the morning of the 13th September, 1598, and having summoned 1 children, Philip and Clara Eugenia Isabel to embrace him, received extreme unction and even after the power of speech had departed, remained with his hands grasping the crucifix which his father Charles V. held when he was dying, and with his eyes fixed upon the altar of the church, till those eyes were closed in death.

Selected for "The Friend."

And, dear Friends and brethren, I entreat you, that the consideration of these great weighty things which God hath wrought for you, and among you, may have that deep and weighty influence upon your souls, that may find yourselves engaged to answer the love and mercy of God in your lives and conversation, and in all you have to do in this world, that ye may show forth the honor of God in all things; that the light which has shined in you, may shine forth through you unto others, who yet sit in darkness, that men may know by your innocent and harmless conversation, and by your close keeping to the Lord, that ye are a people who are assisted and helped by a supernatural power which governs your wills, and subjects them to his blessed will, and that guides and orders your affections, and sets them upon heaven and divine objects, and that gives you power to deny your own private interests, when they happen to stand in competition with the interest of Truth. For these, and these only will be found the true disciples of our Lord Jesus Christ, who can deny themselves, take up a cross daily, and follow him in the guidance of his regenerating power, which brings death upon self, and crucifies the old nature, with its affections and lusts; and raiseth up a new birth in you, that hath a holy will and desire to serve the Lord, and do his will on this earth; and such as these are instruments in the hand of God for him to work by, and do works of righteousness, of justice, of charity, and all other the virtues belonging to a Christian life, to the honor of God, and for the benefit and comfort of his church and people. — *Extract from an Epistle by Stephen Crisp to Friends.*

### Confidence in Animals.

"There are probably few persons familiar with farm life," says a writer in the *New England Farmer*, "who have not observed the marked contrast between the general character and appearance of the domestic animals kept on different farms within the circle of their acquaintance.

"On approaching some farm houses, the first salutation comes from a noisy, growling dog, who seems to take you for a trespasser. The next, from his master, who divides his energies between welcoming you, and scolding the dog for not behaving better. You visit the barn, and as you open the door, a frightened cat scuds across the floor, and with one look back at you from her great green eyes disappears through some hole in the floor, or out at a broken window.

"The horses lay back their ears, squeal, and kick the sides of their stalls, as much as to say, 'we feel cross, and can't help acting out.' The oxen and cows start back as you pass before them, as if afraid they should be hit with a fork, and the young calves a

gs scamper to the farthest corners of their pens, to be out of your way, and even the chickens seem to be bound you shall have all a room to yourself.

"Among such animals, you will find the horses balky and easily frightened, if a harness or carriage breaks; the oxen run at the end of every furrow, either too much gee or too much haw; the cows kick and spill the milk; and the hens steal their nests; and nearly all this trouble is caused by a fractious master, who controls not his own temper. If a gate is carelessly left open, and the cows get to the garden, the dog and the boys, with plenty of clubs and stones, are sent to drive them back. If the oxen are wanted from the pasture, they must be driven into some small corner of the yard, before they can be yoked. If a strap breaks in the harness, a runaway, and a broken carriage is the result; all for the want of confidence between the master and his animals.

"On another farm, the dog welcomes you with a dignified but cheerful wag of his tail, and leads you to the door, or to the presence of his master. The cat keeps her place in the sunny corner, where she has gone for a nap. The horses whinny as you enter the barn, and seem glad to see you, while the cattle dash over to see who has come, or quietly chew their cud. The calves and the young cattle gather around to see what new discoveries can be made—and all this because of the confidence between the master and his animals. If his horse finds the harness coming off, or the wagon running too close to his heels, he quietly stops to have it fixed. All this difference and more can be seen any day, in a few miles drive in almost any part of our country. We can find farms where all the animals seem to be in constant fear of something; while at other places the animals seem to have a perfect understanding with, and the fullest confidence in their kind ruler.

"Of course there is a difference in the natural dispositions of our animals. We should choose those, for breeding especially, that are naturally quiet and peaceable, and then by kind and reasonable treatment keep them so.

"We cannot begin too early to handle and train the young animals we are raising. It is wonderful how soon they will acquire a feeling of confidence, and learn to come to us for protection and care. And if we would retain that confidence, we must never, on any account, betray it. It is almost impossible to regain perfect confidence in any animal that you have once cheated or deceived.

"A horse that has run away once, is generally more ready to run again. And the heifer that has been once frightened or abused, is ever after on the lookout for danger. If you would have your heifers make good cows, treat them firmly but kindly. Let them not learn to associate milking with pains and kicks, and loud talking. Milking is, to them, an unnatural performance, and you must have patience while teaching them to submit to the operation.

"Horses and oxen should have such confidence in their drivers, that they will willingly and repeatedly make all reasonable effort to do as they are bidden. A team should never be told the second time to start an unreasonable load. We don't believe a horse would ever become balky, if it were never misused by over loading and whipping. It is our best horses, those that are full of spirit, that get

balky, and not the 'lunkheads' that don't know enough to know when they are misused.

"What is it but a feeling of confidence that makes the patient horse stand for hours in harness, unhitched, waiting the return of his master to give him the word to go, before he will leave his tracks? And what is it, but this same confidence in his master, that makes a well trained horse willing to be driven over uncertain places, across shaking dilapidated bridges, and up to noisy locomotives, with their puffing smoke-stacks and screaming whistles? If it were not so common, we should think it wonderful to see the thousands of jobbing horses that are left standing in our streets every day, without hitching, awaiting the delivery of bread or meat or groceries, on their daily routes. Yet accidents and run-aways are the exception instead of the rule.

"We know our domestic animals may be made to fear us, and probably they may sometimes be partially controlled through fear; and we presume they may sometimes have feelings almost akin to love for their masters, yet we believe the one great and strong feeling that should be cultivated above all others, between the animal and his owner, should be this perfect feeling of confidence. In this lies the master's power. With it and patience, the animal can be taught almost anything, and will do whatever it is trained to do. With this confidence between the animals and ourselves, we can mingle with them, use and control them—without it we are at their mercy.

"How important then, in training our steers, our heifers or our colts, that we strive to make this feeling of confidence perfect between them and us, and how careful should we be never to betray that confidence by an unreasonable word or blow or act. As man looks up to a Superior Power on which he can rely in times of trial and doubt, so our animals seem to look to us as their superior power, in whose care they are both willing and glad to trust. If you would govern an animal well, gain its confidence."

Selected.

Extract from the Memorial of Thos. Evans.

It is a time when many are forsaking some of those precious testimonies which it pleased the Lord to lead our early Friends into, and for the faithful maintenance of which, some of them suffered deeply. The Scripture language of *thou* and *thee* to one; the avoidance of all fashionable compliments and insincere language; the disuse of the vain fashions and customs of the world; and carefully observing a plain, simple and inexpensive mode of living, all of which the ancient Friends were divinely led into, are now represented by many as of little account, as no part of christian duty, and by some are even derided and condemned as sectarian and notional. It is deeply painful to see these things, and the fruits to which they lead; many running out into the ways and fashions of the times, changing with every change; while the tenderly visited minds of the young are puzzled and perplexed, and they are ready to say, mourning: "Who shall show us any good." While sorrow covers my heart in view of these things, which seem like standard-bearers turning back in the day of battle, and deserting their banners, I have had to believe that the Lord will take care of his own cause and truth; and though many of these unfaithful ones

may wholly run out and make shipwreck, and the Society become much reduced in number, yet the Lord will preserve a remnant true to himself and to his truth, through all the reproach and trials they may have to endure, and cause them to stand in greater purity and integrity; and they will be as an ensign lifted up for others to rally to, so that in days to come there will be a gathering to the standard of ancient Quakerism. For I am firm in the persuasion, that the precious principles of Truth will not be permitted to fall, nor standard bearers be wanting to uphold them before the nations. Happy will it be for such members, who, in an honest and good heart, maintain them in all their integrity, not in word only, but in their whole lives and conduct.

James Veitch and David Brewster.—Mary Somerville, in her recollections, thus notices these talented men:

"When at Jedburgh, I never failed to visit James Veitch, at Inchbonny, a small property beautifully situated in the valley of the Jed, at a short distance from the manse. He was a ploughwright, a hard-working man, but of rare genius, who taught himself mathematics and astronomy in the evenings with wonderful success, for he knew the motions of the planets, calculated eclipses and occultations, was versed in various scientific subjects, and made excellent telescopes, of which I bought a very small one; it was the only one I ever possessed. Veitch was handsome, with a singularly fine bald forehead and piercing eyes, that quite looked through one. He was perfectly aware of his talents, shrewd, and sarcastic. His fame had spread, and he had many visits, of which he was impatient, as it wasted his time. He complained especially of those from ladies not much skilled in science, who as he thought, asked many silly questions. Veitch was strictly religious and conscientious, observing the Sabbath day with great solemnity; and I had the impression that he was stern to his wife, who seemed to be a person of intelligence, for I remember seeing her come from the washing tub to point out the planet Venus while it was still daylight.

The return of Halley's comet, in 1835, exactly at the computed time, was a great astronomical event, as it was the first comet of long period clearly proved to belong to our system. I was asked by John Murray to write an article on the subject for the *Quarterly Review*. After it was published I received a letter from James Veitch, reproaching me for having mentioned that a peasant in Hungary was the first to see Halley's comet, and for having omitted to say that 'a peasant at Inchbonny was the first to see the comet of 1811, the greatest that had appeared for a century. I regretted, on receiving this letter, that I either had not known, or had forgotten the circumstance. Veitch has been long dead, but I avail myself of this opportunity of making the *amende honorable* to a man of great mental power and acquirements who had struggled through difficulties, unaided, as I have done myself.

Sir David Brewster was many years younger than James Veitch; in his early years he assisted his father in teaching the parish school at Jedburgh, and in the evenings he went to Inchbonny to study astronomy with James Veitch; who always called him Davie. They were as much puzzled about the meaning of the word parallax as I had been with regard

to the word algebra, and only learnt what it meant when Brewster went to study in Edinburgh. They were both very devout men. Brewster soon turned his attention to science, and he devoted himself especially to optics, in which he made so many discoveries. Sir David was of ordinary height, with fair or sandy colored hair and blue eyes. He was by no means good looking, yet with a very pleasant, amiable expression; in conversation he was cheerful and agreeable when quite at ease, but of a timid, nervous and irritable temperament, and often at war with his fellow-philosophers upon disputed subjects. I was much indebted to Sir David, for he reviewed my book on the 'Connexion of the Physical Sciences,' in the April number of the *Edinburgh Review* for 1834, and the 'Physical Geography,' in the *North British Review*, both favorably."

Original.

## WHAT THE FLOWERS SAID.

I went to the woods one morning,  
'Twas a sunny April day;  
And laid my ear close to mother earth,  
To hear what her pets would say.

I seemed to hear the Arbutus;  
"I fear neither cold, nor snow;  
I am waiting beneath my green leaflets,  
The coming of footsteps I know."

The Blood-Root said, I am ready,  
And waiting, dear mother, thy word,  
My snow-white petals are folded,  
And the blood in my veins has stirred.

And the Violet seemed to whisper,  
I long for the sun and the dew;  
My cup I have painted with sky-tints—  
My cup of cerulean blue.

The Wind-Flower said, I tremble,  
I flutter with joy and hope;  
For the wind—my lover, he comes, he comes,  
And he kisses my lids till they ope.

The Columbine said, I hasten,  
I climb to my rocky height;  
And fling out my bells of coral and gold,  
That swing to the breezes light.

Said the May-Apple blossom, I linger  
'Till sheltering leaflets I see;  
To thee, mother earth, my homage I give;  
I bow my head ever to thee.

The Dandelion said, I tarry,  
'Till thy carpet of green be spread;  
I'll stud it all over with stars of gold,  
That shall rival the stars o'er head.

Dear mother, the Daisy and Buttercup said,  
We'll come when the summer is bright;  
Not all of thy children in regal robes,  
Can so gladden the youthful sight.

With summer, we come, the Field-Lily said,  
Though we toil not by night, nor by day;  
Yet the dear Heavenly Father he careth for us,  
And clothes us in beauty—alway.

Germantown, 4th mo. 1873.

## TRUST IN GOD.

My Father, the guide of my youth,  
To Thee for direction I fly;  
O grant me Thy light and Thy truth,  
Nor ever Thy presence deny.  
My pillar of cloud and of fire,—  
While destined to journey below,—  
What more can a pilgrim desire  
Or Thou in thy goodness bestow?

Raffles.

*Oranges and Lemons.*—A full-grown orange-tree yields from 500 to 2,000 fruit annually, and arrives at the bearing state in three or five years, as does the lemon-tree; both grow luxuriantly in most soils. The plantations

(in the Mediterranean countries) are called gardens, and vary in size, the smallest containing only a small number of trees, and the largest many thousands. The fruit is gathered in baskets, similar to peach baskets, lined with canvas, the basket being held by a strap attached and passed around the neck or shoulders. From the garden the fruit goes to the repacking magazine, where it is removed from the boxes, in which it was packed in the gardens, and repacked for shipment by experienced female packers, after having been carefully assorted by women, and wrapped in separate papers by young girls. As many as 500 persons (mostly women and children) are employed by some of the fruit-growers in their gardens and magazines, in gathering, sorting, and repacking for shipment, the wages paid them varying from nine to sixteen cents a day. In sorting, every fruit that wants a stem is rejected. The boxes are then securely covered, strapped, and marked with the brand of the grower, when they are ready for shipment. Twenty years ago this trade was nothing in its commercial characteristics, or the inducements it offered to capitalists. Now it is progressing with giant strides into prominence, and is a considerable source of revenue to the government.—*Late Paper.*

For "The Friend."

## Search the Camp.

It was in coveting an evil covetousness by Achan and taking a "goodly Babylonish garment, and two hundred shekles of silver, and a wedge of gold," and thereby transgressing the covenant the Lord commanded, that caused not only his and his family's destruction, as recorded in the history of the children of Israel, but thereby also the whole of that people to be driven back, and to fall before their enemies; so that their leader, Joshua, rent his clothes and fell on his face imploringly "before the ark of the Lord until eventide, he and the elders of Israel, and put dust upon their heads."

While the offence or cause may seem small in proportion to the dire result or punishment, yet it is good to remember that unconditional obedience to the voice and will of the Lord is of paramount obligation; whether that will consist in bringing unto Him the tithes of mint, anise, and cummin, or in the weightier matters of the law; whether our sin consist in committing a trespass in the accursed thing, as did the son of Zerah, so that wrath fell on all the congregation of Israel, and that man perished not alone in his iniquity; in a word, whether faithfulness in *the day of small things*, or in that of larger things be the Heavenly requisition or tithe of duty, no progress can be made in spiritual stature, nor any honor brought to the treasury of the Holy One, but through the low portal of obedience to Him who became the author of eternal salvation to all them that obey him. The seal of the covenant of life being cancelled by disobedience to the law of God inwardly revealed.

The following record, from the life of Thomas Story, 1698, is corroborative of the same practical truth. While, is it not to be feared, that there are too many in this day in the situation of the dean of Derry! "Great was the resort of people of all ranks, qualities and professions, to our meetings, chiefly on account of William Penn; who was ever furnished by the Truth with matter fully to answer their expectations. Many of

the clergy were there, and the people with one voice, spoke well of what they heard. Of the clergy, the dean of Derry was one who being there several times, was asked by his bishop, whether he had heard anything but blasphemy and nonsense; and whether he took off his hat in time of prayer, to join with us? He answered, that he heard no blasphemy or nonsense, but the everlasting truth; and did not only take off his hat at prayer, but his heart said amen to what he heard. Yet he proved like the stony ground and brought forth no fruit. He said, though he could die for the principles of religion the Quakers professed; yet to lose his living and character for *some incidents they are tenacious of*, as plain language, plain habits, and other distinguishing peculiarities, he did not think those of sufficient weight, or reasonable. And so came no further in the way of Truth, but proved unfaithful in the day of small things.

Whether anything after the sin of Achan already alluded to, is now prevailing in our midst; whether the "accursed thing"—whatever the Lord's controversy is unmistakably against—is working weakness and folly in our Israel, so that as a Society we cannot as we once the case, stand before our enemies which too is causing sorrow and mourning, and putting on of sackcloth with some who are jealous for the honour of the Great Name and His cause, is a question which should come close home to the heart of each one of us. It is declared, the Lord "will search Jerusalem with candles" for punishment; "whose fire is in Zion, and his furnace in Jerusalem. And we have no doubt that He will sooner or later institute a search, it may be family by family, and man by man, all in His own good way, after that which now so lets and hinders progress, as well as dims our brightness as a religious Society. A Society that in the beginning was so eminently favored in the raising up of sons for prophets, and young men for Nazarites, comparable to fine gold. It is surely no light thing, to turn from the principles and testimonies solemnly committed to us to uphold before the world ourselves, to be the means of inducing others to turn, either in doctrine or in practice, from that, which was so eminently of the Lord, and so influential for good in His hands in the early days of this people! And may all remember that it was *turning back* from the statutes and ordinances commanded to their fathers, that caused Israel to become a reproach and a byword, and an astonishment; so that in answer to the query, "Why hath the Lord done thus unto this land, and unto this house? it shall be answered, *Because* they forsook the Lord God of their fathers, which brought them forth out of the land of Egypt, and laid hold on other gods, and worshipped them, and served them; *therefore* hath he brought a this evil upon them."

But notwithstanding this Society may be shaken and tried to the very foundation by Him who "hath promised saying, yet once more I shake not the earth only, but also heaven (that which may seem, in the but partially anointed vision of some, to be stable and true) \* \* \* that those things which cannot be shaken may (alone) remain;" yet it is believed that the Lord God of recompence, though of compassion and tender mercies will return unto a remnant who "are afflicted and "in bitterness;" as well as set a mark upon the foreheads of those "that sigh an

hat cry" saying, "How doth the city sit solitary that was full of people;" how has she become as a mournful widow, who can see but little else in some places than desolation and a return by by-ways to Babylon in the land and bustle, and boast of these imposing, easy-going times. May these keep inward and humble, watchful and prayerful before the secret-seeing Holy One; and though they cannot sing one of the Lord's songs in a strange land—a land of captivity—yet in his own time, as faith and patience and hope are kept, shall nevertheless "have a song as in the night, when a holy solemnity is kept: and gladness of heart" because of "quiet resting places," and because of their being brought up also out of an horrible pit, out of the miry clay, and the new song put into their mouths, ven praises to His name.

### Our American Oaks.

#### Characteristics of the Different Groups and their Comparative Value.

BY JOSIAH HOOPES, WEST CHESTER.

In these progressive arboricultural times, when almost every agricultural and horticultural periodical in the country is advocating the popular timber question, it seems incumbent upon us to inquire, What shall we plant with a view to profit in the future? Keeping his specific object prominently before us, we may answer truthfully, the one great genus above all others in usefulness is that of the oaks. No other in the flora of the world, perhaps, contains so many valuable species in point of durability, hardiness, rapidity of growth (for the oaks are rapid growers when once fully established), freedom from insects and diseases, as well as pecuniary value in the market. Another item to be taken into account is their ready propagation from seeds, thus enabling us to reproduce them in unlimited numbers at a comparatively trifling cost.

*The Growing.*—The grouping of these trees is generally well defined; so well, indeed, that an acquaintance with a single member of most of the sub-genera, is apt to convey a very accurate impression of the character of all the others belonging to it. The first of these is known as the White Oak group, and is composed of the well-known and valuable White Oak (*Quercus alba*); Post Oak *Q. obtusiloba*; its dwarf southern form (*var. parvifolia*); Burr or Mossy-cup Oak (*Q. macrocarpa*); its western form (*var. olivæformis*); and the true Over-cup Oak (*Q. lyrata*). The second is called the Chestnut Oak group, and is composed of the Swamp White Oak (*Q. bicolor*); Swamp Chestnut Oak (*Q. prinus*); its variety, the Rock Chestnut Oak (*var. monticola*); another, and well-marked variety, the Yellow Chestnut Oak (*var. acuminata*); a southern form *var. Michauxii*; and the Dwarf Chestnut or Chinquapin Oak (*Q. prinoides*). We next have what might be termed the Live Oak group, although consisting of but one true Southern species and two other well-defined dwarf forms. The Live Oak (*Q. virens*) is considered to be the most valuable of the whole genus, owing to the indestructibility of its timber. The forms alluded to are the Sea-side Oak (*var. maritima*) and the Tooth-leaved Oak (*var. dentata*). All the foregoing are what is termed annual fruiting species, that is, they perfect their acorns during the Autumn of the first year on the wood of the same season. The group which might be termed

the Willow Oaks form the first of the biennial-fruited section, or those in which the acorns arrive at perfection during the Autumn of the second year. This group embraces the Upland Willow Oak (*Q. cineria*); its dwarf form (*var. pumila*); the true Willow Oak (*Q. Phellos*); its two Southern forms (*var. laurifolia* and *var. arenaria*), the Laurel or Shingle Oak (*Q. imbricaria*), a probable hybrid, Lea's Oak (*Q. Leana*), and another of the same character, most likely a sport from the true Willow Oak, called Bartram's Oak (*Q. heterophylla*). We next arrive at a small group, having thick, leathery shining leaves, with from three to five lobes. The first is a true Southern species, termed the Water Oak (*Q. aquatica*); it has also a form with longer leaves and smaller fruit (*var. hybrida*), the Black Jack Oak (*Q. nigra*); also two Western forms called by Dr. Englemann (*var. tridentata* and *var. quinqueloba*). Lastly, we have the largest group of all—the Black and Red Oaks. Two species belonging to this are classed by themselves, owing to the soft downy character of the under side of the leaves; these are the Bear or Scrub Oak (*Q. ilicifolia*), and the Spanish Oak (*Q. falcata*). With smooth leaves we have the Southern Turkey Oak (*Q. Catesbæi*), the Scarlet Oak (*Q. coccinea*); its variety, the well known Black Oak (*var. tinctoria*); another form, the Gray Oak (*var. ambigua*); the Red Oak (*Q. rubra*); its western form with small fruit (*var. runcinata*); the Pin Oak (*Q. palustris*), and a little shrubby Southern species, the Georgia Oak (*Q. Georgiana*), completes the list east of the Mississippi. West of this great division the whole character of our flora appears to undergo a complete change, and the species of oak bear a resemblance to those belonging to foreign countries.

*Useful Species.*—First let us consider those of an undoubted hardiness, such, for example, as will endure the climate of our Northern and Western States. Commencing with the well-known White Oak, it seems almost superfluous to attempt a description, so well is it known to every one in the country, even to the school-boy who eagerly gathers its nuts in lieu of a more palatable fruit. The timber is of the most durable character, firm and fine-grained, hence it is largely in demand for innumerable uses in the mechanic arts, &c. To the farmer it is invaluable, and enters into all the routine of his daily duties; his fencing material, his implements, his farm buildings, and indeed almost every article used in his vocation. In the market, its timber commands a high price, and is always of ready sale. The bark is also excellent as an astringent. The Post Oak grows so slowly, and at best forms only a second class tree, that I am in doubt about recommending it for cultivation, and yet its fine, closely-grained, durable wood is certainly no mean incentive to the timber-grower, who is looking to the future for fencing material. It is mostly found on high dry soils, but like many other species, will succeed on the opposite extremes, as has been fully tested. As a general rule, the dryer the soil the finer grained and more durable we find the wood. The Chestnut Oaks cannot be recommended as furnishing the best quality of timber, although the Rock Chestnut Oak exceeds them all in this respect, possibly on account of its higher and dryer habitat. It is also the best species for fuel. The form known as the Swamp Chestnut Oak

grows to a large size, and is well worthy of cultivation. The timber of the Black Oak, Scarlet Oak, and true Spanish Oak are neither of very excellent quality, but the bark of each is of more or less value for dyes and tanning; the latter is said to be the best of all oaks for tanning hides. The Pin Oak ranks next to the White Oak in excellence. It is a rapid grower, makes a firm wood, which is eagerly sought after by mechanics, and thrives satisfactorily either on dry or moist lands. The Gray Oak is a true Northern species, being frequently found in high latitudes, which may add an additional value to it for cultivation. The wood is reasonably durable, although not equal to most of the foregoing. The Shingle Oak, as its name implies is used throughout the West, where it is well known, for sawing into shingles, although its timber is not of the best quality. We now reach a species that is undoubtedly the most valuable of the genus, but unfortunately it is too tender for the North and West. We allude to the Live Oak of the South. The greatest drawback to its culture is its slowness of growth, hence the exceeding compactness of its wood. It is also emphatically a seaside tree, being rarely found many miles from the coast. Our cultivators in the South, where it will succeed, would be doing a good work by setting out young plantations of the Live Oak.

*Ornamental Species.*—For lawn planting where sufficient space for perfect development, and where the surroundings are extensive enough to warrant the use of our largest size trees, the oaks are unsurpassed for this purpose. Nothing can surpass the White Oak, view it in any light we will, and although the entire genus are almost unexceptionable for ornamental planting, still this well-known species must take preference over all others. The Pin Oak will perhaps come next, having rapidity of growth, grace of outline, and beauty of foliage, as leading characteristics. The foreign writers on horticulture have pronounced this species to be the finest of the genus, but we prefer the White Oak. The Scarlet Oak has so many excellencies to recommend it that I cannot conceive why it is not more frequently used. The tree is perfection itself, added to which the foliage is always handsome, whether in the green garb of Summer or tinted with its scarlet Autumnal hue. Its growth is moderately rapid, and it is well suited for dry locations. The Willow Oak, with its narrow leaves, is at once curious and attractive. It always forms a prominent feature in a collection, and may be classed as one of the most desirable native trees for ornament. The Burr Oak is perhaps more curious than handsome, owing to the corky bark. It forms a medium-sized tree, and should be more extensively used. I have always felt a great partiality to the Black Jack Oak, rough and rugged-looking as it is frequently seen its large, wedged-shaped, shining, dark green leaves contrast well in a collection. It is a small-sized tree, found mostly on dry sandy situations. Among the Chestnut Oaks, I prefer the Yellow Oak, or as some prefer to call it, the True Chestnut Oak. Its resemblance to the chestnut tree is strikingly apparent, in fact to an ordinary observer the two are scarcely distinguishable. It also forms a medium sized tree, and looks well in a group on the lawn. The Red Oak, in good soil, grows to a large size, and is one of our most conspicuous trees during the Au-

tumn months. The deep, almost purplish, crimson hue, makes an effect that cannot well be surpassed. It is at all times, however, a fine tree for ornament, and should receive due regard from planters. Several other species might be mentioned, whose claims entitle them to notice, but the foregoing comprise the best.

*Propagation.*—All the species are easily grown from seeds, provided we give them sufficient care. Acorns should be gathered as soon as ripe, which is determined by their hold on the tree. If readily shaken off, they must be collected at once, and placed in comparatively dry sand; that is, with a very slight amount of moisture. They germinate easier than almost any of our native trees, and especially in some instances where I have noticed them sprouting while attached to the limb of the parent tree. When the latter is the case they must be cautiously dried somewhat before placing in sand. It does not matter about the end of the young root being shriveled or decayed, as the fibers will start out fresh from the base of the seed leaves all right. In the Spring prepare level beds, say about four feet wide, and after sowing the seed thinly over the surface, cover slightly with sand, when a few warm days will bring the young plants through. They should be left in these beds for two years, keeping them meanwhile scrupulously clean. The first year they make but little top, but plenty of roots, and afterward the top grows rapidly. The rare forms not propagated from seed may be grown by means of grafting, as the oak is not difficult to work. Side-grafting is preferred close to the ground and then the soil drawn up and pressed tightly around the whole, allowing only the top bud of the graft to be uncovered. In some of the European collections every specimen has been so grown, and they have proved eminently satisfactory.

### Perseverance.

For "The Friend."

The following, from Thomas à Kempis, is not only excellent advice in itself, but also shows that he was a believer in the inward teachings of the Divine Light, which William Penn considered to be the distinguishing doctrine of Friends. He died, A. D. 1471, about 200 years before the rise of our Society.

"A certain person deeply perplexed about the state of his soul, and continually fluctuating between hope and fear, came one day to a church, overwhelmed with grief; and prostrating himself before the altar, repeatedly uttered this wish in his heart: 'O that I certainly knew I should be able to persevere!' Immediately the Divine voice speaking within him, answered thus: 'And what wouldst thou do, if this certain knowledge was bestowed upon thee? Do now that which thou wouldst then do, and rest secure of thy perseverance.' Comforted and established by this answer, he resigned himself to the Divine disposal, and his perplexity and distress were soon removed. Instead of indulging anxious inquiries into the future condition of his soul, he applied himself wholly to know what was *the good and acceptable will of God*, as the only principle and perfection of every good work. 'Trust in the Lord, and do good,' saith the royal prophet; 'So shalt thou dwell in the land, and be fed with the riches of His Grace.'"—*John Payne's Translation of Thomas à Kempis, Book 1st, Chap. 25.*

### John Heald.

(Continued from page 262.)

"3d mo. 14th, 1819. First of the week. The snow drifted terribly. The meeting [near Albany] less on this account. I sat under some exercise for a considerable time. So, after humbly abiding under it, I believed the time [to speak] came. I said: A passage or two among the sayings of the Apostle have revived with renewed instruction, that the Apostle had written to them before, in both of which said he, I stir up the pure mind by way of remembrance; not saying, I do the work for you, but, stir up to the remembrance. The Apostle Paul saith, Examine yourselves, try yourselves, prove yourselves, know ye not your own selves, &c. Here was the stirring up the mind to attention, and here is the great purpose of gospel ministry. What does it avail, if it do not stir up the mind, if it does not induce to an examination? If such an examination is entered into, what situation can we place ourselves in more suitable than silence? When we consider that we place ourselves before Him, who sees us as we are, how solemn! How suitable is silently approaching Him, and examining how near we have come to parting with those things that we know to be wrong, how near we have come to giving up our own wills! When we see our own insufficiency and inability, and are humbled down into a supplicating condition, true prayer is breathed forth, either secretly or vocally."

19th. John Heald mentions that a man was to be executed that day at Schoharie for murder, and expresses his sense of the awfulness of thus sending a fellow-creature to his final reckoning, whether prepared or unprepared.

"About two o'clock, the meeting at Pittstown gathered. A large number not of our Society came. I was in much poverty, and endeavored to reconcile my mind to pass the meeting in silence, believing I ought to be silent, where no way opened to communicate, and not force myself to make an offering. Many grew restless, and some went out. This was very trying to endure, the people being very earnest to hear testimony, but I could do nothing of myself. I felt very poor, but a sentiment revived with clearness, which was, He that reapeth receiveth wages, and gathereth fruit to everlasting life. I stated it, and said it must be labor that was acceptable for which we would receive wages and gather fruit unto eternal life. To me it appeared, that as well might we say the branch could bear fruit of itself without abiding in the vine, as that we could labor in our own wills and get wages so as to gather fruit to eternal life. I was enlarged much, and I believe that notwithstanding the unsettledness and great stupidity or deadness, it became a profitable meeting, and I thankful for it.

21st. We attended the meeting at Troy. I felt poor and in need of what I think was represented by the children of Israel gathering manna. That was to nourish the outward body, I wanted an inward supply of sustenance, and thought for sometime that such a labor would be enough for me. But afterwards this was first to be expressed, and I then told them this would be good employ for some of them—to labor for the bread which perisheth not.

25th. Chatham Monthly Meeting was open.

For "The Friend."

ed, and several of the Quarterly Meeting committee attended. I had some close remarks to make, and a testimony to bear, encouraging those who were in limited circumstances not to neglect attending to their [religious] duty for the sake of increasing the property; and those who were wealthy, not to neglect their duty [in order] to save more to add to their possessions; but recommending both to be faithful in the little. I endeavored to arouse to faithfulness those who live loose from the ties of religion, who do not justify themselves in their conduct, yet by selecting certain parts of the conduct of professors of religion, which they think exceptionable, try to satisfy themselves that their own conduct will do, and so keep at a distance and let others manage that concern, while they amuse themselves with trifling delights.

30th. At Charles Hoag's. To-day is a year since I left home, or saw any of my family. The meeting small and dull. Blessed are the poor in spirit, I mentioned first, but there is a poorness does not come under this description, and that is indifference and lukewarmness. This state is not the one the blessing descends to; it is offensive to our Heavenly Father, and unprofitable to those who settle down in ease and indifference. It was trying labor, but it ended to my peace.

4th mo. 2nd. The meeting [near the residence of Stephen R. Smith] was large. As I sat under exercise, faithfulness in little things presented to my view. I entered humbly into the concern to encourage to faithfulness in the little. I showed that by attending in humility to the little and not exceeding, the reward is peace; and here the prediction of the prophet is verified, The work of righteousness shall be peace, and the effect, quietness and assurance; and the testimony of the Apostle Peter, I perceive of a truth that God is no respecter of persons, but they that work righteousness are accepted of Him. The testimony began with little, and enlarged greatly, and O how the precious feelings were extended and the sweet enjoyments of peace were felt to flow with joyful sensations, and the power extolled that would effect the work, if obedience was faithfully attended to in little things."

4th mo. 4th. At Nine Partners, John Heald stated that the Society of Friends had dispensed with the use of water baptism, both dipping and sprinkling, believing, that it is not the putting away the filth of the flesh, but the answer of a good conscience toward God, that is necessary to be known and experienced; and have laid aside the eating bread and drinking wine as religious observances these being outward and reaching only to the body, and not essential to salvation. Yet he believed that to sit *idly* in silence in time of religious worship, was no better than any other form; if we allow the mind to be engaged in the amusements and gratifications of the world, it is time misapplied, it is pretending to do a thing and not doing it.

After visiting a few other meetings in the State of New York, as the time for holding the Yearly Meeting in Philadelphia approached, he felt drawn to be present on that occasion. Of the incidents that occurred there, he has given no particulars, but mentions that Divine favor was experienced, order and condescension observed, and that it ended well.

Soon after this, he felt at liberty to turn his face homeward, and after attending a few

meetings on his way, reached his own habitation on the 22d of 5th mo., after an absence of about fourteen months, and a journey of 5,560 miles.

He remained but a short time at home, before he was again drawn forth to visit the families of New Garden Monthly Meeting, Ohio, about 160 in number, and afterwards those of Salena, in the same vicinity. Here he paid about 130 visits. He also, with the concurrence of his Monthly Meeting, held several public meetings in Western Pennsylvania, among those who were not members of his own Society. Of these different engagements, he remarks, "The account given is short, but much exercise was passed through to accomplish the labor."

For "The Friend."

### Sermon.—By Stephen Grellet.

We know not through what channel the following manuscript has been handed down. But there is no doubt of its authenticity and general correctness. It has been in the hands of the compiler at least a score and a half of years. It is of stirring import. The following introduction and date accompany it:

"At Burlington Meeting, 8th mo. 5th, 1829, he subjoined testimony, in effect, was borne by Stephen Grellet:—

He arose with saying, he was afraid to speak, and dare not, for his peace, keep silence; that his feelings had been so peculiar and so awful, he scarcely knew how to convey them. He had remembered that it was while men slept that the enemy sowed tares: and while we have been sleeping tares have been sown. He then proceeded to say, that he thought he had seen the approach of a day of darkness and gloominess, of treading down and dismay; a day wherein the Lord's depending children will be closely ruined and sited: adding, we have had some heavy trials,\* but let not any suppose that the bitterness of death is past. I believe a day of greater trial will come than any we have experienced; but whether it will be suddenly, or whether a few days' space may intervene, is not for me to say;—the offence cometh—and though I do not wish exclusively to implicate the present company, I believe some will witness it.

I am afraid to speak, and afraid to hold my peace! The weight of suffering will be heavy on the heads of some! My feelingsaffle description! O, the distress, the anguish, the bitterness that must attend those through whom the offence cometh!—through whom the storm will descend! But there is still an ark to which the faithful may repair; though these will be deeply proved, and that few may stand in the day of storm and tempest. Yet if there is a very close watchfulness unto prayer, and a single eye kept to the Holy Head, those who are endeavoring to follow the Lord Jesus in the path where truth will lead them, will realize the blessings and promises contained in the 91st psalm, which has been brought to my remembrance. He recommended the exercised and tribulated seed to read that Psalm; saying, he believed if they continued faithful, they would be enabled, like blessed Noah, to be to the safe refuge, to enter the ark of preservation, and safely to ride the tempest and

the whirlwind, when the blast of the terrible one shall beat against the wall."

As an instance of the increasing value of walnut lumber, the Indianapolis *Journal* notes that the standing walnut trees on a half section of land on Eel River, in Miami county, Ind., were recently sold to a lumber dealer for \$17,000. There is a large amount of other timber on the tract which is not included, only the walnut timber being sold. Walnut lumber is coming more and more into use throughout this country and Europe, and at present a very large business is done in preparing and shipping it from Indiana. The trees are disappearing rapidly, and no effort is made to renew the growth, which might be done with little trouble.—*Late Paper.*

## THE FRIEND.

FOURTH MONTH 11, 1874.

In the "Private Memoirs of B. and E. Seebohm," edited by their Sons, we find the following, on page 196, London Edition. It is by B. Seebohm:

"20th of 3d month, 1847. The tendency of the elaborate document, produced and adopted by the Philadelphia Meeting for Sufferings, seems to be, to claim a kind of infallibility on behalf of our early Friends, and especially Barclay, not only as it regards the objective doctrines taught, but also as it relates to their subjective mode of viewing, enforcing and defending them; descending to minute details as to the interpretation of particular texts of Scripture; which falls little short of absolute Popery. Whenever such views prevail, the very essence of genuine Quakerism is gone, Christ is virtually dethroned; and whether it be Fox, Barclay, Penn, or the whole host of those truly honorable men, worthy of double honor, that are set up as standards, He does not reign in the unlimited power of His own Spirit, and the sum and substance of George Fox's preaching, "Let nothing come between your souls and God but Christ," is sacrificed in the unwise attempt to set up instead, the words and definitions of fallible man.

Any one acquainted with "An Appeal for the Ancient Doctrines of the Religious Society of Friends," the "elaborate document" alluded to in the above extract, must, we think, see that it is either altogether misunderstood or greatly misrepresented by B. Seebohm. There is no claim in it, nor any tendency to claim "a kind of infallibility on behalf of our early Friends." Having been the instruments, in the Divine hand, to gather the Society of Friends, embracing and promulgating certain doctrines, their writings are referred to as the proper exponents of what those doctrines are. The object in view, was not to prove those Friends and their recorded faith true: that was not a mooted point on the part of the Meeting for Sufferings. That body, in common with Philadelphia Yearly Meeting, was fully satisfied that the doctrines promulgated, not only by the early Friends, but by the Society from their day, is the truth as it is in Jesus. Though convinced that those spiritually taught and deeply experienced servants of Christ, had his mind in the doctrines they set forth, they set them not up as popes to bind the consciences of any who choose to differ

from them, but they declared that their doctrinal expositions, which the Society had endorsed and published again and again, were and still remain to be the *Standards* of "genuine Quakerism," and those who deny them, and adopt other doctrines, have deserted the faith of Friends. This is neither dethroning Christ, nor putting something beside Him between the soul and God.

Knowing that the Society had a fixed, clearly defined and well-understood doctrinal belief, consistent with the truth as revealed in the Holy Scriptures, and that sentiments contrary to and subversive of that belief, "circulated in writings put forth by members," were producing disunity and division among the members, an appeal was made for the ancient doctrines, and to show the difference between the two, it was necessary to take extracts from the published expositions of both.

The motives and objects of the "Philadelphia Meeting for Sufferings," is thus set forth by that body, "Under a religious concern for the restoration of that precious unity which once characterized us [the Society], and in discharge of what we apprehend to be a duty devolving upon us, we have believed it right to point out some passages in the writings alluded to, which do not convey the views of Friends; in order that our members may be on their guard against adopting forms of expression, and modes of defining and explaining doctrines, which differ from the simple and scriptural methods used by the Society. By the frequent repetition of such opinions and modes of expression, the mind may be gradually led to look upon the differences we have referred to, as matters of little moment; and thus by degrees, imperceptible perhaps to its clouded vision, the way may be prepared for a departure from a full belief and acknowledgment of the truth, as it is in Jesus, and as it has always been held by our religious Society."

The present state of the Society, is an unanswerable testimony to the correctness of the apprehension expressed in the last paragraph.

Let us now see how far B. Seebohm is himself clear of the charges he prefers against the "Philadelphia Meeting for Sufferings," when he is speaking of the works of one who had said, that his Quakerism was not that of Barclay, Penn and Penington. On page 192, same volume, we find, "16th of 2d mo., 1847, the account of the death of a true Christian, and, I believe, a sound Quaker, in our dear and valued friend, J. J. Gurney, is now confirmed. Though here it is dangerous even to mention his name, lest thereby we increase prejudice, his record is on high; he is amongst the blessed, that have died in the Lord, who rest from their labors, and whose works do follow them. His, I fully believe, will be appreciated and valued in the future, far beyond what they have been in his lifetime; the insignificant blemishes or defects will not be suffered to tarnish the beauty and strength of the substantial whole; honest Quakers of succeeding generations will appeal, and will be thankful that they can appeal, to his works as evidence of the Christianity of Quakerism, as well as the Quakerism of Christianity. It would be folly to look for perfection in any man, or to expect to find a faultless writer anywhere. Would that all who live and write were equally unblemished in their

\* Alluding, no doubt, to the close searchings of heart, the conflicts and separations of 1827—then just past.

lives; equally free from inconsistencies and dereliction of the truth, in their writings."

The italicising is our own. If, as B. Seebohm here asserts, "honest Quakers of succeeding generations will be thankful that they can appeal to the works of J. J. Gurney for "evidence of the Christianity of Quakerism and the Quakerism of Christianity," why should he charge Philadelphia Meeting for Sufferings, and indeed Philadelphia Yearly Meeting, with "virtually dethroning Christ," and sacrificing the doctrine of George Fox, 'Let nothing come between your souls and God, but Christ,' because they appealed to the works of the founders of the Society, to show what "genuine Quakerism" is, and to the works of J. J. Gurney and Dr. Ash to show, that in many places they contain sentiments adverse to it? If it were true, that it "falls little short of popery" to quote from the works of Fox, Barclay, Penn and their coadjutors, in order to exhibit the doctrines they promulgated; which the Society they gathered, fully and openly acknowledged; would it be any less near to popery to appeal to the works of that one man, as "evidence of the Christianity of Quakerism, and the Quakerism of Christianity?" should "succeeding generations of honest Quakers," become so perverted as, in good faith, to have adopted his errors as Quakerism? But thus it has ever been, when the Society has had to contend for its doctrines and testimonies: those who have deserted them, have striven to affix the charge of wrong-doing on those who maintain and defend them; sometimes, we doubt not, unconscious of the injustice of their course.

#### SUMMARY OF EVENTS.

**FOREIGN.**—A Calcutta dispatch of the 4th inst. says: Reports from the famine-stricken districts show continued improvement in the general situation. The authorities are now in a condition to hope that the difficulties are over, except in the northwestern portion of Tirhoot, where over five hundred thousand persons are yet dependent upon the government for food.

The spring crop has yielded well except in Tirhoot. The reports from the north of Spain, received from Carlist sources, represent that the attempt of the government forces to raise the siege of Bilbao has failed. The London Times says, it has authentic advices from the scene of war to 4th mo. 1st, which show that the Republican troops had taken no position since 3d mo. 25th. A three days armistice, in which Bilbao was not included, had been agreed upon for the burial of the dead, and meantime the bombardment of the city continued.

A Bayonne dispatch of the 4th says: Active operations before Bilbao were resumed by the Republican forces on the previous day. Serrano is reorganizing his forces, and the Carlists are doing all they can to strengthen their positions. The Carlists have surprised and captured six hundred Republicans, near Calaf, forty-five miles from Barcelona.

A Madrid dispatch of the 3d states, that 410 Carlist officers and men had deserted General Sante's command, and come into the Republican lines.

A dispatch from Melbourne says: Henri Rochefort and his companions refuse to disclose how they succeeded in getting aboard the vessel which brought them from New Caledonia, for fear of implicating friends. The party have, it is stated, left Melbourne for California.

Advices from Cape Coast Castle, to 3d mo. 12th, have reached London. The embassy from the King of Ashantee, numbering with its escort 250 men, had arrived. It is reported that they refused to discontinue human sacrifices, but paid the amount of indemnity.

The London Times acknowledges the existence of a financial panic in London, and attributes it to the effect of those with which New York and Vienna have been visited, combined with the depressing influence of the famine in India. It says the check to trade is probably as severe as in any former instance.

Later dispatches from Hong Kong in relation to the loss of the steamship Nil, while on a voyage from that

port to Yokohama, say that eighty persons were drowned.

It is stated that the population of India since it came under British rule, has increased from 138,000,000 to 206,000,000. The English language is making rapid progress, and it is anticipated that eventually it will be spoken throughout that vast empire.

San Domingo advices to the 30th ult. state, that the British Consul-General at Port au Prince, had been on a tour of observation to Samana Bay, and had afterwards visited Santa Domingo with propositions from the Haytien government for a treaty between the two republics. Among the conditions of the proposed treaty, it is said, were the cession to Hayti of the disputed territory on the frontiers, and the annulment of the Samana Bay Convention made with citizens of the U. States. President Gonzales subsequently issued a decree annulling the contract with the Samana Bay Company, giving as a reason that the annuity due by the company on the first of the year had not been paid, and he directs that a commission proceed to Samana at once to take possession of the district and restore therein the government and laws of the republic before the contract was made. The Samana Bay Company protest against this summary act as arbitrary and illegal, and demand an arbitration upon the matters in dispute, according to the terms of the convention.

The Cuban insurgents hold their ground obstinately, and appear to be as strong now as they were a year since. General Concha, who has been appointed Governor General of Cuba and the other Spanish W. India islands, landed at Havana on the 6th inst. and assumed the duties of his command.

**UNITED STATES.**—On the first inst. the Public Debt, less cash in the Treasury, amounted to \$2,152,690,733, having been reduced \$2,189,338 during the Third month. The portion of debt on which no interest is paid reaches \$519,944,498. The amount of 6 per cent. bonds is \$1,214,633,150, and of 5 per cents \$509,243,450.

The interments in Philadelphia last week numbered 342, including 70 deaths of consumption, 32 inflammation of the lungs, and 8 congestion of the lungs.

The mean temperature of the Third month, by the Pennsylvania Hospital record, was 41.27 deg., the highest during the month 66 deg., and the lowest 20 deg. The amount of rain 1.59 inches. In the first three months of 1874 the rainfall has been 8.62 inches, against 13.88 inches in the corresponding months of 1873. The average of the mean temperature of the Third month for the past 85 years is stated to be 39.16 deg., the highest mean during that entire period, 48.70 deg., occurred in 1871, the lowest, 30 deg., was in 1843.

There were 510 interments in New York last week.

In the State of Michigan there were 3,300 miles of completed railroad at the commencement of the year. The roads are valued at \$115,000,000. Their gross earnings in 1873 were about \$32,000,000.

According to the revenue returns, the production of distilled spirituous liquors in 1873 amounted to 68,236,567 gallons, in the production of which 19,216,045 bushels of corn, rye and wheat were consumed.

The debt of New York city at the beginning of this year is stated to have been \$106,431,924.

It is probable that New Mexico will soon be admitted as a State, the House Committee on Territories having agreed to recommend the passage of a bill for that object.

The United States Senate, by a vote of 29 to 24, has passed a currency bill which fixes the amount of U. S. notes at \$400,000,000, and provides for an additional national bank circulation to the extent of \$46,000,000.

At the election in Connecticut on the 6th inst., the Democrats elected their candidate for Governor of the State, together with large majorities in both branches of the Legislature. This result insures the choice of a Democratic U. States Senator.

The Massachusetts legislature had not, up to the 6th inst., been able to elect a Senator. The votes continued divided nearly as when the balloting commenced.

**The Markets, &c.**—The following were the quotations in the 6th inst. *New York.*—American gold, 113½. U. S. sixes, 1881, Reg. 119½; Coupons 121; ditto, 1867, 119½ a 120; 5 per cents, 114½ a 115. Superfine flour, \$5.90 a \$6.35; State extra, 6.40 a \$6.70; finer brands, \$7 a \$10.75. No. 2 Chicago spring wheat, \$1.53 a \$1.55; No. 1 Milwaukee spring, \$1.63; white State, \$1.75. Oats, 60 a 65 cts. Penna. rye, \$1.03. Western mixed corn, \$6 a 89 cts.; southern yellow, 89 a 90 cts.; white, 90 a 93 cts. *Philadelphia.*—Uplands and New Orleans cotton, 17 a 17½ cts. Superfine flour, \$5.50 a \$5.75; extras, \$6 a \$6.50; finer brands, \$7 a \$10.50. Western red wheat, \$1.50 a \$1.65; Penna.

red, \$1.68 a \$1.72; amber, \$1.72 a \$1.76; white, \$1.8 Rye, 97 a 98 cts. Yellow corn, 82 a 83 cts. Oats, 60 65 cts. Lard, 9½ a 10 cts. Clover seed, 8½ a 10 c Sales of 2300 beef cattle at 7½ a 7¾ cts. per lb. gro for extra; 6½ a 7 cts. for fair to good, and 4½ a 6 c for common. Woolled sheep sold at 6½ a 8½ cts. per l gross, and clipped at 5½ a 6 cts. Corn fed hogs, 8½ 8¾ cts. per lb. net. *Chicago.*—No. 1 spring whea \$1.27½; No. 2 do., \$1.26½; No. 3 do., \$1.18½. Cor 61½ cts. No. 2 oats, 43 cts. No. 2 spring barley, \$1. a \$1.55. Lard, \$9.45 per 100 lbs. *St. Louis.*—No. spring wheat, \$1.23½; No. 2 winter red, \$1.47. No. mixed corn, 63 cts. Oats, 49 cts. *Cincinnati.*—Famili flour, \$6.60 a \$6.85. Wheat, \$1.35 a \$1.38. Corn, 6 a 67 cts. Oats, 50 a 57 cts. Rye, \$1.05. *Baltimore.*—Superfine flour, \$4.75 a \$5; extra, \$6 a \$6.50; fine brands, \$7 a \$10.50. White corn, \$4 a 85 cts.; yellow 80 a 82 cts. Oats, 61 a 66 cts.

The Committee of the Yearly Meeting to visit th Subordinate Meetiogs, will meet on the 17th inst. i the Committee-room, Arch St., at 4 o'clock P. M.

Five dollars received from a "Friend," to be appriated as most needed for the Freedmen.

RICHARD CADBURY, *Treasurer.*

#### FREEDMEN'S MEETING.

The Eleventh Annual Meeting of "Friends' Associ tion of Philadelphia and its vicinity for the relief Colored Freedmen," will be held in Arch Street Meeting-house, on Second-day evening, 20th inst., at 7 o'clock.

All Friends interested are invited to attend.

JOHN B. GARRETT,

Philada., 4th mo., 1874.

*Secretary.*

#### INDIAN AID ASSOCIATION.

The Annual Meeting of the Indian Aid Associati of Friends of Philadelphia Yearly Meeting, will l held in Arch Street Meeting-house, on Fifth-day, 4t mo. 23d, 1874, at 7½ o'clock P. M.

Friends generally are invited to attend.

RICHARD CADBURY, *Clerk.*

#### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia Physician and Superintendent—JOSHUA H. WORTINGTON, M. D.

Applications for the Admission of Patients may l made to the Superintendent, or to any of the Board Managers.

DIED, on the 4th of Third month, 1874, after a she illness, RACHEL S. CRAFT, wife of Isaac Craft, in th 66th year of her age, a member of Frankford Month Meeting, Philadelphia. She was the daughter of Natha and Anna Vail, formerly of Plainfield, N. J. The r ligious and judicious care of her rightly exercise parents, was blessed to her, and from early life she w strictly conscientious and truthful—loving what w good, and repudiating insincerity and vice in ever form. She was marked for a sweet and happy disposit ion, and possessed of a vigorous and well cultivate mind. Being a full believer in the doctrines and test monies of the Christian religion as held by the Societ of Friends, her daily walk was consistent therewith. For more than nine years she had charge of Friend Asylum for the Insane, near Frankford, as Matron, i which service she felt closely bound; and being w fitted for the position, she faithfully applied the talent intrusted to her. She was prompt in her judgment a to her proper course in sudden emergencies, and he sympathy with the inmates prompted her to a cheerf and untiring discharge of her duties amongst them. Here, in the midst of her responsibility and usefulness she was cut down. During her illness of less than for days, her physical suffering was great, but the care of the immortal part having been previously attended to her condition was not aggravated by mental or spiritu conflict. Towards the close it was difficult for her t converse; but she was understood to say that she "be lieved there was a place of rest prepared for her o high," and we reverently trust that she has entered int the enjoyment of it.

—, on the 22d of Third month, 1874, at her lat residence, near Montrose, Susquehanna Co., Pa., SARAJ M. WALKER, in the 75th year of her age, an esteeme member of the Monthly Meeting of Friends of Phila delphia for the Western District.

WILLIAM H. PILE, PRINTER.

## Vesuvius.

Selected.

When this celebrated volcano was in eruption in 1868, Mary Somerville, then 88 years of age, was residing in Naples. She observes: We were much interested in Vesuvius, which, for several months was in a state of great activity. At first, there were only volumes of smoke and some small streams of lava, but these were followed by the most magnificent projections of red hot stones and rocks rising 1000 feet above the top of the mountain. Lava fell back again into the crater, but a large portion were thrown in fiery showers down the sides of the cone. At length these beautiful eruptions of *lapilli* ceased, and the lava flowed more abundantly, though, being intermittent and always from the summit, it was quite harmless; volumes of smoke and vapor rose from the crater, and were carried by the wind to a great distance. In sunshine the contrast was beautiful, between the jet-black smoke and the silvery-white clouds of vapor. At length the mountain returned to apparent tranquillity, though the violent detonations occasionally gave warning that the calm might not last long. At last, one evening, in November, 1868, when one of my daughters and I were observing the mountain through a very good telescope, lent us by a friend, we distinctly saw a new crater burst out at the foot of the cone in the Atrio del Cavallo, and bursts of red-hot *lapilli* and red smoke poured forth in volumes. Early next morning we saw a great stream of lava pouring down to the north of the Observatory, and a column of black smoke issuing from the new craters, because there were two, and assuming the well known appearance of a pine-tree. The trees on the northern edge of the lava were already on fire. The stream of lava very soon reached the plain, where it overwhelmed fields, vineyards and houses. It was more than a mile in width, and thirty feet deep. My daughters went up the mountain the evening after the new craters were formed; as for me I could not risk the fatigue of such an excursion, but I saw it admirably from our own windows.

During this year the volcanic forces in the interior of the earth were in unusual activity, for a series of earthquakes shook the west coast of South America for more than 2,500

miles, by which many thousands of the inhabitants perished, and many more were rendered homeless. Slight shocks were felt in many parts of Europe, and even in England. Vesuvius was our safety-valve. The pressure must have been very great which opened two new craters in the Atrio del Cavallo and forced out such a mass of matter. There is no evidence that water had been concerned in the late eruption of Vesuvius; but during the whole of the preceding autumn the fall of rain had been unusually great and continuous. There were frequent thunderstorms; and on one occasion, the quantity of rain that fell was so great, as to cause a landslide in Pizzifalco, by which several houses were overwhelmed; and on another occasion, the torrent of rain was so violent that the Riviera di Chiaja was covered to the depth of half a metre with mud and stones brought down by the water from the heights above. This enormous quantity of water pouring on the slopes of Vesuvius, and percolating through the crust of the earth into the fiery caverns, where volcanic forces are generated, being resolved into steam, and possibly aided by the expansion of volcanic gases, may have been a partial agent in propelling the formidable stream of lava which has caused such destruction. We observed that when lava abounded, the projection of rocks and *lapilli* either ceased altogether or became of small amount. The whole eruption ended in a shower of impalpable ashes, which hid the mountain for many days, and which were carried to a great distance by the wind. Sometimes the ashes were pure white, giving the mountain the appearance of being covered with snow. Vapor continued to rise from Vesuvius in beautiful silvery clouds, which, when it ceased, left the edge of the crater white with sublimations."

In 1871, when Mary Somerville was 91 years old, she witnessed another eruption which she thus describes: "Early in the morning I was disturbed by what I thought loud thunder, and when my maid came at 7 A. M., I remarked that there was a thunder storm, but she said 'No, no; it is the mountain roaring.' It must have been very loud for me to hear, considering my deafness, and the distance Vesuvius is from Naples, yet it was nothing compared to the noise later in the day, and for many days after. My daughter, who had gone to Santa Lucia to see the eruption better, soon came to fetch me, and we passed the whole day at windows in our hotel at Santa Lucia, immediately opposite the mountain. Vesuvius was now in the fiercest eruption, such as has not occurred in the memory of this generation, lava overflowing the principal crater and running in all directions. The fiery glow of lava is not very visible by daylight; smoke and steam is sent off which rises white as snow, or rather as frosted silver, and the mouth of the great crater was white with the lava pouring over it. New craters had burst out the preceding

night, at the very time I was admiring the beauty of the eruption, little dreaming that, of many people who had gone up that night to the Atrio del Cavallo to see the lava (as my daughters had done repeatedly, and especially during the great eruption of 1868,) some forty or fifty had been on the very spot where the new crater burst out, and perished, scorched to death by the fiery vapors which eddied from the fearful chasm. Some were rescued who had been less near to the chasm, but of these none eventually recovered.

Behind the cone rose an immense column of dense black smoke to more than four times the height of the mountain, and spread out at the summit horizontally, like a pine tree, above the silvery stream which poured forth in volumes. There were constant bursts of fiery projectiles, shooting to an immense height into the black column of smoke and tinging it with a lurid red color. The fearful roaring and thundering never ceased for one moment, and the house shook with the concussion of the air. One stream of lava flowed towards Torre del Greco, but happily stopped before it reached the cultivated fields; others, and the most dangerous ones, since some of them came from the new craters, poured down the Atrio del Cavallo, and dividing before reaching the Observatory, flowed to the right and to the left—the stream which flowed to the north very soon reached the plain, and before night came had partially destroyed the small town of Massa di Somma. One of the peculiarities of this eruption was the great fluidity of the lava; another was the never ceasing thundering of the mountain. \* \* \* On April 28th I was surprised at the extreme darkness, and on looking out of the window saw men walking with umbrellas; Vesuvius was emitting such an enormous quantity of ashes, or rather fine black sand, that neither land, sea, nor sky was visible; the fall was a little less dense during the day, but at night it was worse than ever. Strangers seemed to be more alarmed at this than at the eruption, and certainly the constant loud roaring of the volcano was appalling enough amid the darkness and glow of the falling ashes. The railroad was crowded with both natives and foreigners, escaping; on the other hand crowds came from Rome to see the eruption. We were not at all afraid, for we considered that the danger was past when so great an eruption had acted as a kind of safety-valve to the pent up vapors. But a report got about that an earthquake was to take place, and many persons passed the night in driving or walking about the town, avoiding narrow streets. The mountain was quite veiled for some days by vapor and ashes, but I could see the black smoke and silvery mass above it. While looking at this a magnificent column, black as jet, darted with inconceivable violence and velocity to an immense height; it gave a grand idea of the power that was still in action in the fiery caverns below.

Immense injury has been done by this eruption, and much more would have been done had not the lava flowed to a great extent over that of 1868. Still the streams ran through Massa di Somma, San Sebastiano, and other villages scattered about the country, overwhelming fields, woods, vineyards and houses. The ashes, too, have not only destroyed this year's crops, but killed both vines and fruit trees, so that altogether it has been most disastrous. Vesuvius was involved in vapor and ashes till far on in May, and one afternoon at sunset, when all below was in shade, and only a few silvery threads of steam were visible, a column of the most beautiful crimson color rose from the crater, and floated in the air."

For "The Friend."

### Memoirs and Letters of Sarah Hillman.

(Continued from page 266.)

#### To Martha Wistar.

"Philadelphia, 2d mo. 11th, 1840.

My Dear Friend,—Thou hast been so much the companion of my mind for days past, accompanied with solicitude on account of the indisposition of thy dear C. W., to whom my spirit is united in the fellowship of suffering, that I am induced, poor as I am, to attempt some little communication. When I saw thee last thou may remember there was some trouble in the camp, which with others of more recent date, known to the full only to Him, who seeth things invisible, have preyed upon my mind, until the body partaking thereof, both seemed ready to fail; but, through the renewed extension of everlasting mercy, my heart is afresh animated a little to believe, that He who called me in very early life, and enamored my soul as with one chain of his neck, will never leave his little ones that trust in Him; but will yet prove himself to be their Rock and everlasting foundation; their Prophet, Priest, and King, who sitteth upon the flood of trouble, and reigneth King forever; while of the increase of whose government and peace, there shall never be an end. Yea, He will give them to understand that he has now come in Spirit, and they will be able from living experience, with the apostles of old, to testify at seasons, when his living virtue is felt renewing our poor spirits, that He hath given us an understanding that we may know him that is true; and that we are in him that is true, even his dear Son. Ah! this is the true God; and in this knowledge is eternal life. My precious friends, such have been the trials I have been wading under, and so few are they to whom I dare unbosom any, that I have longed that it might be put into thy heart, dear M., to move thy pen for my benefit; while at the same time I was sensible thou must have a flowing cup. Well it is an infinite mercy to be instructed to look to the Fountain of all sure help and consolation; and enabled to believe He doeth all things well; that the descendings are as necessary for our advancement in righteousness, as those more desirable dispensations, in which the turnings of the Divine Hand are more easily discovered. I have been ready to crave for myself, that my heavenly Father might please to cut short the work in righteousness, and take me to himself: lest through me might come some shade or blemish upon the precious cause of Truth. Nevertheless, it seems to be my business to leave all, as to myself, in his hands whose we are, and whom I think I can say I

desire to serve in the Gospel of his dear Son, in all things. That my dear C. W. is favored with the best of strength, and enabled to take hold at seasons of the gracious invitation, 'Call upon me in the day of trouble,' &c., I doubt not; while the secret aspiration of my soul is, 'The Lord hear thee in the day of trouble, send thee help from his sanctuary, and strengthen thee out of Zion,' &c., &c. Ah! then, whatever may be the permitted or allotted trials of our day, let us keep our eye fixed upon the Captain of our salvation, and commit our cause unto Him. He can make his little ones as David; He can, as in a moment, cause light to break forth out of obscurity; can clothe with the garments of salvation; and pour out upon us of the spirit of prayer and praise, to his everlastingly worthy Name.

I wrote this at the time of your Quarterly Meeting; and queried in my mind, Art thou able to leave dear C.? Do let me know soon how you are, body and spirit? how Friends in that part of the vineyard fare? Dear J. G.\* will, I suppose, be at meeting. He ministers with acceptance to the true Israel of God I believe, and I know not that any are offended at him. But it seems to me there is no door open for some of us. They will not hear; and yet there are seasons when, whether they will hear or forbear, we are constrained to speak the words of truth and soberness. Oh! do pray for me that my faith may not fail in this perilous time. I remember at seasons with some consolation, how marvellously Infinite kindness and mercy wrought for the Jews, his peculiar people, when Haman designed their overthrow; and am persuaded to believe, that in His own time and way, He will effect his own blessed work and purpose upon His people. Yes, I believe he has not yet given us over to death; but the yearnings of his bowels are still towards us; and when He has sifted as from sieve to sieve, then will He bring his suppliants from the east and from the west, from the north, and from the south, and his glorious, holy Name, will be exalted in and amongst this poor people; so that 'from the rising of the sun to the going down of the same, his Name shall be praised!'

In that love which I trust flows from the Father of Mercies, and unites us together in the unchangeable truth, I salute thee, with thy beloved C. W., as companions in tribulation, and remain as ever thine,

S. HILLMAN.

Dear mother's love awaits your acceptance, with that of my dear sisters."

#### To William Scattergood.

"Philadelphia, 3d mo. 19th, 1840.

Dear Friend and Brother:—Thy tender remembrance was received duly and caused a feeling of thankfulness to arise in my heart, in which the living children of our Heavenly Father do participate with each other, in suffering or in rejoicing, and are enabled to bear, according to their different degrees of experience, one another's burdens, and so fulfil the law of Christ. Ah! the burdens of this day are neither few nor light; and were it not that in unutterable mercy, the Divine arm is made bare from season to season for the help of the poor, feeble, trembling disciples, as in former times, some there are, such as thy little sister, had fainted ere this day. Yea, we had fainted,

\* Jacob Green, from Ireland.

unless we had believed to see the goodness of the Lord in the land of the living. But the truth of the testimony is sealed in the experience of the true Israel of God, that no 'weapon that is formed against them shall prosper, and every tongue that shall rise against them in judgment shall be condemned.' This is the heritage of the servants of the Lord, because their righteousness is of Him. What then should we fear; why should we base cast away the shield of faith as though it had not been anointed with oil? Let us sink deep in the spirit of our minds to the Divine gift, not looking so much at the difficulties that cross our path, as at the glorious end of our faith, the prize to be won, the crown in store; then shall we know indeed, the power of the endless life; yea feel that the name of the Lord is a strong tower, and with the righteous, run into it and find safety, when all around us speaks trouble. Notwithstanding it is a day of treading down and of perplexity, a day in which many of the standard bearers have fainted, and the trees of the Lord's forest seem few, so that a little child may write them; and a day it is very evident where His command concerning Amalek has not been fulfilled, but instead thereof Agag, the very king seems to rule at seasons as on his throne, I nevertheless cannot but believe we shall live to see a brighter day, wherein He who sitteth in the Heavens will arise in the might of His own power, and set His poor safety from him that puffeth at him; ye turn again our captivity as the streams in the south. For the Lord hath founded Zion, and the poor of His people shall trust in it; then shall this song be sung again, 'We have a strong city, salvation hath God appointed for walls and bulwarks; open ye the gates that the righteous nation which keepeth the Truth may enter in.' Ah! then under all thy discouragements, and secluded as thou art, mercy in the back side of the desert, keep fast hold of thy covenant, and of the precious shield of faith, and thou wilt be kept in perfect peace. Thy poor correspondent seemeth set as a mark for the arrows; nevertheless murmur not. I know whom I have believed, and to His praise be it spoken, thus far He has helped me: covered my head in the day of battle, and strengthened me with might in His spirit, so that the adversary has not gained the ascendancy. To His holy care and keeping, I desire to commend thee with my own soul, and remain thy affectionate sympathizing friend in gospel bonds,

SARAH HILLMAN."

(To be continued.)

#### Yokohama and the Japanese.

The streets of Yokohama are wide and straight. Each house is built of wood, with out an atom of paint, and is a real toy-house a Lilliputian Swiss chalet, built with a taste and nicety, and a neatness which are admirable. The Japanese are wonderful workers in wood, and it is a pleasure to see the roofs, so high and yet so strong, supported by walls which are made like the side-scenes in a theatre, of thin strips of wood, over which are pasted sheets of a cottony, transparent paper. In the evenings, when the lanterns dispense their soft light round the inside of these white buildings, the spectator seems to be looking at a magic-lantern. During the daytime the side of the house are slipped out, as side-scene are, and the house becomes only a roof rest

ng on the four light corner-posts; the whole interior being thus opened to the air. Every part of the house is exposed to view, and everything done in it can be seen, while behind it appear the charming verdure, the cascades, and the diminutive plantations of the little gardens situated in the rear.

The great luxury of the Japanese consists in their mats made of plaited straw. They are perfectly rectangular in shape, about three inches thick, and soft to the touch. They are never stepped on with shoes, since the Japanese go about their houses always bare-footed. Of furniture they have next to nothing; a small furnace in one corner, a closet made of side-scenes like the sides of the house, and intended to contain the mattresses, a small set of shelves, on which are arranged the lacquered plates for rice and fish—this is all the furnishing for these houses, in which they live, as it were, in the open air. In the middle of each house are two articles of general use among all classes—the “chitat” and the “tobacco-bon,” that is, a brazier and the box for tobacco. Being great tea-drinkers, great smokers and great talkers, the Japanese pass their days around the brazier; there they can be seen, in groups of seven or eight, seated on their heels around the tea-kettle.

In every shop our travellers visited they were received with a distinction and politeness which surpassed even the proverbial manners of their native country. In walking through the city they passed through the street of baths. In Japan, where every one lives as it were in public, the costume of our first parents in no way shocks the sentiments of the people, who in this matter may be considered as still in the golden age. This street is filled with bathhouses, to which the population resort, many of them twice or thrice a day. Here all sexes, ages and conditions mingle, fifty or sixty at a time, in each bathhouse. The passer-by sees them crouched down or dancing on an inclined plane, surrounded by pyramids of small tubs made of copper and filled with hot water. Here they sprinkle and soap each other. Attracted by the sight of the travellers, they come to ask “the noble strangers” politely for a cigarette.

A woman seller of dry goods invited the party to enter her shop and seat themselves upon the mats. This was for her a great honor, and as the party entered she saluted them by bowing until her forehead touched the floor, then offering them tea in small cups, she brought out tobacco for their pipes, and presented lighted coals held between two chopsticks. “I cannot hope,” writes the count, “to express to you all the elegance of this woman of the people in her slightest movements; her features expressed the most simple womanly affability as her habitual condition. Well, in whatever house you may enter, you will be treated with the same distinction, we were almost stupefied to find it, and confessed that this people can rightly call us barbarians. I have not seen a single fight or dispute in the streets; all the men, in saluting each other with profound bows, wear a smile upon their lips; and when we desire to appear amiable, we are awkward and ill-bred, in comparison with these Japanese, who are gracious without thinking of being so. Among them a man who gives way to his anger, or shows it in his tone or words, is avoided by his kind as unfit for society. Thus, when at first our plenipotentiaries in the diplomatic conferences

became animated, the Japanese said, ‘Let us put off this matter for another day; we cannot treat with those who are not masters of themselves.’—*Lippincott's Magazine*.

For “The Friend.”

The following lines were placed in my hands a short time since by a valued member of Society, and in offering them for publication in “The Friend,” it is not my wish to hold out discouraging views, by presenting a contrast of the life and spiritual vigor of days gone by, with the present low state of the church as applied to our beloved Society; but rather to bring into view how liberally the gifts of the Spirit are poured forth into the hearts of all, who nothing doubting, cheerfully submit themselves to be led thereby, and into whatever work may be assigned them; whether in the field of active labor, or in the more retired path of an inward, silent walk, speaking the Truth by a life of humility and faithfulness. Some of the passages are copied from the writings of one whose labors were eminently owned by the Lord. As a goodly tree bringeth forth her fruit in due season, so did the life of this remarkable man and steward in the household of faith, yield a double portion of the fruits of willing obedience; that Wm. Penn thought it but just to speak of him as the “great and blessed apostle of his day.”

“At an early day after the rise of the religious Society of Friends, we are informed that a large number felt themselves constrained to declare the truth, as George Fox expresses it; or, in other words, they were called by their Divine Master to proclaim his gospel to the people; and under the constraining influence of His love, to travel extensively; visiting many parts of Great Britain and places beyond, spreading, by their ministry, a knowledge of the ever blessed Truth. The number so called, as early as the year 1654, was about sixty Friends. John Richardson, who may be said to belong to the next generation after George Fox and his fellow-laborers, informs us in his Journal, that the number of public Friends in Bridlington Monthly Meeting, to which he belonged, was so considerable, that Bridlington was called a school of prophets.

John Griffith, in his Journal, tells us, that about the year 1734, there were one hundred came forth in public testimony in Philada. Yearly Meeting; and it is stated, that about seventy years ago there were sixteen ministers belonging to the Northern District Monthly Meeting of this city. It is certainly deserving of serious consideration in this our day, what can be the cause of the waste and dryness, and disinclination to serve the Lord. We cannot believe that his gifts have been repented of, or if they have been withdrawn, it must be on account of our unfaithfulness, and because we are preferring our own business and the cares of this life to His work and service. Our blessed Saviour declared, ‘That the cares of this world, and the deceitfulness of riches, and the lust of other things, choke the good seed of the heavenly kingdom, and it becomes unfruitful.’ Hence is it not clear that it is man’s own fault, and not through any want in Almighty power and goodness, that fruit is not brought forth to His praise, and to the comfort and edification of his church and people. Surely we may well consider and lay these things seriously to heart, if we do really

love the Lord and his pure and blessed Truth, and desire the good and prosperity of Zion. Mark the prophetic language, ‘Strangers shall stand and feed your flocks, and the sons of the alien shall be your plowmen and your vine dressers; but ye shall be named the priests of the Lord; men shall call you the ministers of our God;’ and in another place, ‘I have set watchmen upon thy walls, O Jerusalem, which shall never hold their peace day nor night; ye that make mention of the Lord, keep not silence, and give Him no rest, till He establish and make Jerusalem a praise in the earth.’

About the year 1650, George Fox wrote the following: ‘The Lord is king over all the earth; therefore, all people, praise and glorify your king in true obedience, in uprightness, and in the beauty of holiness. O! consider, in true obedience, the Lord is known, and an understanding from Him is received. Mark, and consider in silence, in lowliness of mind, and thou wilt hear the Lord speak unto thee, in thy mind. His voice is sweet and pleasant; his sheep hear his voice, and they will not hearken to another. When they hear his voice, they rejoice and are obedient; they also sing for joy. O! their hearts are filled with everlasting triumph! They sing, and praise the eternal God in Zion; their joy, man shall never take from them. Glory to the Lord God for evermore.’

Again, in the year 1657, in one of his epistles, we find the following: ‘And Friends, quench not the Spirit, nor despise prophesyings, where it moves; neither hinder the babes from crying Hosanna! for out of their mouths will God ordain strength. There were some in Christ’s day that were against such, whom he reprov’d; and there were some in Moses’ day who would have stopped the prophets in the camp, whom Moses reprov’d, and said, by way of encouragement to them, ‘would God, that all the Lord’s people were prophets!’ So I say now to you. ‘Therefore ye that stop it in yourselves, do not quench it in others, neither in babe nor suckling; for the Lord hears the cries of the needy, and the sighs and groans of the poor. Judge not that, nor the sighs and groans of the Spirit, which cannot be uttered, least ye judge prayer; for prayer as well lies in sighs and groans as otherwise. Let not the sons and daughters, nor the hand-maidens be stopped in their prophesyings, nor the young men in their visions, nor the old men in their dreams; but let the Lord be glorified in and through all, who is over all, God blessed forever. So every one may improve his talents, every one exercise his gifts, and every one speak as the Spirit gives him utterance. Thus every one may minister as he has received grace, as a good steward to Him that hath given it him; so that all plants may bud, and bring forth fruit to the glory of God; ‘for the manifestation of the Spirit is given to every one to profit withal.’ See that every one hath profited in heavenly things; male and female, look into your own vineyards, and see the fruits ye bear to God; look into your own hearts, and see how they are decked and trimmed; see what odors, myrrh, and frankincense ye have therein, and what a smell and savor ye have to ascend to God that he may be glorified.”

P. B.

Watch ye, stand fast in the faith, quit you like men, be strong.

## An Expected Exodus.

A statement has been going the rounds of the newspapers to the effect that a community of religionists, numbering between 40,000 and 50,000 persons, intend to emigrate to this continent in a body, from Southern Russia. It is said that they have applied to our Government and to that of Great Britain for information as to the terms on which they can obtain land, and whether either Government will advance them money to pay their travelling expenses; also, whether they can have exemption, for themselves and their descendants, from military service of every kind. It is because the Russian Government has recently decreed that the entire male population of the Empire, between certain ages, shall be liable to bear arms in case of war, that these people propose to leave their homes for a distant land. Their case, like their history, is a hard one, and this recent edict of the Czar is, as regards them, a violation of the solemn promise of the Empress Catharine II., who invited them into her dominions to escape the military conscription with which they were threatened in Prussia, she guaranteed them protection, freedom of worship, and 190 acres of land to each family, exemption from all taxes and imposts for ten years, money for their journey, and money and wood wherewith to establish themselves, freedom of trade and manufactures, the administration of oaths in their own way, and exemption forever from military service. They gratefully accepted this wise and beneficent offer, rejected every inducement held out by the Prussian Government to retain them in Prussia, and settled on the northern shore of the sea of Azof, in the neighborhood of the locality where has since arisen the modern seaport town of Berdiansk, which owes its existence and its prosperity mainly to them.

As they are distinguished for their moral worth, thrift, industry and intelligence, they would be cordially welcomed as settlers in any part of the United States; but as regards exemption from military service, the spirit of our laws since the conscriptions during the rebellion has not granted this to any one on account of religious scruples. There are millions of acres in the West waiting for occupants, who could be accommodated with all they need, and under the homestead laws, without cost. The only serious consideration is their request for money to accomplish their transit from Russia to their new homes. It would cost, at the lowest calculation for travelling expenses and food \$150 to convey each individual from Berdiansk to Chicago, a distance of nearly 7000 miles; and this sum multiplied by say 40,000, would be \$6,000,000. It has not been the custom heretofore to pay anything out of the United States Treasury to induce immigration, and such a course could not in this case be regarded as judicious. Individual States, however, or even associations of people, anxious to increase the population of any section, might offer any inducement they chose to get so thrifty a class, and this would generally be regarded as commendable. It is by no means certain, however, that these people will be allowed to leave Russia. The present Emperor is too humane and enlightened a man to drive peaceable and profitable subjects out of his realm for such a trifling consideration as the loss, or possible loss, of the military services of two or three thousand men, when he already has a million under arms

and two millions more in reserve. Besides, they could not quit Russia without permission of the Government, and it is this difficulty which accounts for the fact of so few Russians being found among our population.

The religionists above mentioned are usually called "Mennonites," after their famous preacher, Menno Simon, who collected their scattered and divided communities in the Netherlands and on the coasts of Germany, after their dispersion at Munster and Leyden, and for twenty five years acted as their pastor until his death, in 1561. Their proper title, however, is "Anabaptists," which was the name they adopted, in order to denote their hostility to infant baptism. It is doubtful whether the sect arose in Switzerland or in Germany. Mosheim gives the following summary of their tenets: "That the Church of Christ ought to be exempt from all sin; that all things ought to be in common among the faithful; that all usury, tithes and tribute ought to be entirely abolished; that the baptism of infants was an invention of the devil; that every Christian was invested with a power of preaching the gospel, and, consequently, that the Church stood in no need of ministers or pastors; that in the kingdom of Christ civil magistrates were absolutely useless, and that God still continued to reveal His will to chosen persons by dreams and visions." They also treated the plan of reformation proposed by Luther as beneath the sublimity of their views, and it is needless to add that they offended both Lutherans and Catholics by their doctrines, and drew down upon themselves the vengeance of the civil magistrates, whom they declared to be unnecessary. They fell into lamentable excesses, and created the greatest confusion by their licentiousness and profanity, under the leadership of Munzer and Bockholz (better remembered as John of Leyden.) They were crushed by military force with merciless severity, and scattered over Germany and the Netherlands in small bands, after the capture of their stronghold, Munster, in 1536. But this terrible punishment purified them of their licentiousness, and modified their tenets; and when Menno, a man of probity and meekness, resigned his rank and office in the Catholic Church, and publicly embraced their communion, they willingly accepted him as their leader. He reunited their congregations, reformed some of their tenets, and rejected those which justified polygamy and divorce. In short, he converted them into an orderly, virtuous and industrious community, who were thenceforth permitted to live in peace in Holland and Prussia for two hundred and fifty years, and would, perhaps, have remained there to this day, but for the tyranny of the Prussian Government, which, in 1789, compelled them to serve in the army, and forbade their purchasing landed property, whereupon they migrated to Russia.

Selected.

It does not always happen that the industrious accumulate much of this world's riches; sometimes their Heavenly Father sees the need of crosses even in temporals, and administers to them losses of various kinds. But the Lord's dedicated children can often perceive his hand in these dispensations, and being therewith content, still find godliness great gain. Our aged friend, Abel Thomas, was a man active and prudent in his worldly business. A Friend who admired his indus-

try and management, said to him, "I suppose thou art growing rich, Abel." "No!" said the old Friend seriously, "I have been mercifully blessed with many losses."

*Maria Edgeworth and Mary Somerville*—*M. S.* in her "Recollections" says: "Maria Edgeworth came frequently to see us when she was in England. She was one of my most intimate friends, warm-hearted and kind, a charming companion, with all the liveliness and originality of an Irish-woman. For seventeen years I was in constant correspondence with her. The cleverness and animation, as well as affection of her letters I cannot express certainly women are superior to men in letter writing."

Mary Somerville's daughter gives the following extract from a letter from Maria Edgeworth to a friend, concerning her mother:

"Beechwood Park, January 17th, 1822.

We have spent two days pleasantly here with Dr. Wollaston, our ever dear friend Mr. Marcot, and the Somervilles. Mrs. Somerville is the lady who, Laplace says, is the only woman who understands his works. She draws beautifully, and while her head is among the stars her feet are firm upon the earth.

Mrs. Somerville is little, slightly made, fairish hair, pink color, small, grey, round, intelligent smiling eyes, very pleasing countenance, remarkably soft voice, strong, but well-bred Scotch accent; timid, not disqualifyingly timid but naturally modest, yet with a degree of self-possession through it which prevents her being the least awkward, and gives her all the advantage of her understanding, at the same time that it adds a prepossessing charm to her manner, and takes off all dread of her superior scientific learning."

Selected for "The Friend."

## On Leaving our Religious Society.

I believe with some confidence, that *but few* of those who leave our religious Society, truly thrive in a spiritual sense: not that I confine true religion to our own profession by any means; but that I believe there is that grace and truth to be met with, in a diligent and patient waiting for the teachings of the heavenly Guide, which they who leave us are *in great measure unacquainted with*, or do not much regard or value. This I have found to be the case, even with some of the few who profess to leave us on conscientious grounds. But *Oh!* if all left us only for something, which *after solemn inquiry*, they believed to be nearer the Truth, how few should we have to lament the loss of. I am very earnestly desirous for our dear young Friends, that they may come up, *in the strength and power of the living principle of grace and truth*, to the help of the great cause; that they might in some measure make up for the flagrant deficiency of standard-bearers apparent among us; even by such a steady, firm, consistent life and conversation,—*by such an abiding in the blessed life and power and strength of the gospel*, as is now too rarely to be discovered amongst us.—*From a Letter of John Barclay's.*

Not many lives, but only one, have we—

Frail, fleeting man!

How sacred should that one life ever be—

That narrow span!

Day after day fill'd up with blessed toil,

Hour after hour still bringing in new spoil!

H. Bonar.

For "The Friend."

John Heald.

(Continued from page 271.)

In a letter written to his friend Benjamin Kite, in the Third month of 1820, John Heald alludes to his previous labors in travelling as a minister, and refers to the danger there is, when quietly resting at home, of sliding away from that state of watchfulness in which preservation is experienced. The letter, somewhat condensed, is as follows:

"Fairfield, Columbiana Co., Ohio,  
6th mo. 10th, 1820.

(I wrote this in the 3rd month last, but failed of opportunity to send it.)

My esteemed friend, Benjamin Kite:—I have lately been reflecting on some of the various changes of my life, and among these the difference in my employ through the cold season of this winter, and last. Then I was almost every day performing something; and when one thing or service was accomplished, would pass on to engage in another, whether in tempest or calm, in rain or snow, seldom delaying on account of the varied changes of the weather: but so far of the present, I enjoy a tolerably tranquil mind at home. Seldom away exposed to the inclemencies of the season. But not less danger awaits me while in this retired retreat, though not so much exposed to the cold of winter; the various trials that daily transpire, and which occur frequently, are attended with more or less risk of admitting into practice some improper action, which might leave compunction on the mind, and uneasiness not readily to be relieved. When I have passed the intermediate days between meetings, and have taken a seat in one, feeling very poor and destitute of good, I have been induced to examine all the occurrences that I have been occupied in, and the time has frequently seemed long since I had been a partaker of that which renewed my strength and confidence. Thus conflicts and besetments are attendant on me: but how animating to be permitted again to feel the enlivening spring of undissembling love,—how cordial!—what other choice delight is equal to it? The thought has past my mind, that if any were to be removed out of time, whilst feeling the Divine love shed abroad in the heart, before an act had past for which remorse was felt, there is no ground on which to found a doubt of such entering into the happy abodes; how needful is it, that we be very circumspect, lest having been favored at one time to partake of the good Word of Life, we should come short and not feel our strength frequently renewed. To deal with a slack hand in a matter so interesting and important to ourselves, how dangerous. But if after being favored the mind becomes easy, unconcerned, like him who dealth with a slack hand and becomes poor, how probable is it, that when affliction of body comes, a time of distress of mind will follow; and though the bodily pain may be great, the uneasiness of the mind may give more suffering; a release from such a situation may require great reduction to humble the mind into contrition.

Thy letter of 2d of Tenth month last I received; and for anything I now remember, it came in due course. That beloved Friend, Hannah Fisher [then recently deceased], I remember, though my acquaintance with her was small, or at least made chiefly in a short time; I accord with thee in giving her a place

among the first rank in your city, and I think in any part of the world also that I know. Hannah Walton, I do not recollect, though thou hast characterized her as a minister at Fallowfield, but it occasions me to think there may be many more where I have been a stranger, that I am ignorant of also. Thou hast added: 'So the standard bearers in our Israel, are dropping off one after another;' and I may also add, and so it is like to be. Thou and I must go: and sometimes I have thought, thus it is likely soon to be with me, when some of those who knew me may say to others, Have you heard that he has finished his course in this world? It may be replied, no! when did it happen? and these may have very little sense of what I have suffered, or what I at that time may be a partaking of. Thou added, in the language of intercession, may the great Qualifier of his people raise up those who may be able to go in and out before the Host acceptably. I do believe this to be a correct desire, and I do as fully believe, that the great Qualifier of his people, will raise up and qualify, and is raising up and qualifying many more to stand in dignified places—is calling upon young men and young women to obey his requirements, and if the visited among these prove but faithful to him, the excellence and dignity of these will not only equal those of our time, but I believe exceed."

In the latter part of this letter, John Heald refers to the discipline adopted by Ohio Yearly Meeting, making it a disownable offence, to become a member of a secret organization, like that of the Freemasons; and gives reasons, which, in his judgment, justify this provision of the discipline. Among other things, he appeals to the test of experience, which has shown that as persons become truly religious, they feel it their duty to withdraw from these associations.

We resume the extracts from the journal of our friend:

"I left home the 20th of the 6th mo., 1820, to attend to a concern that I had felt, to make a visit to most of the meetings within our Yearly Meeting, and as way opened, to have meetings in other places. I parted with my family with feeling desires for their preservation and welfare, but no vocal expression of that desire.

22d. Had an appointed meeting of Friends and others near Thos. Rotch's, in which I had some close labor, endeavoring to remove some false dependences, as on imputed righteousness without a change of heart, without being regenerated and born again.

7th mo. 20th. We attended Sugar-Grove Meeting, under the shade of the trees. I thought a considerable solemnity attended the silent part of the meeting. At length I felt the way open to communication, and began in the little ability, and conveyed some sentiments to the tender-hearted visited ones; but soon I was turned to a very hardened state, and hard to be operated on. Though I labored until I was weary and spent, it seemed to me that but little was gained. A good degree of solemnity prevailed, yet I believe but little entrance was obtained, and feeling my service in testimony through, I sat down, but soon felt my mind bowed in supplication, to which I submitted, though much spent, and kneeling down, interceded not only for the humble, seeking souls, but for the careless, disobedient, hardened ones, that they might

become tender and softened into a compliance with duty.

21st. Attended Spring Meeting, which was large. I felt for such as sometimes come to our meetings. We are many times so destitute of the enjoyment of good, and so poor. Can we expect that [these visitors] will fare better than we do. When our unfaithfulness is the cause of our poverty, and they come and partake with us, I feel for and pity them. I laid the matter very close, and it was a very humbling, tendering, favored time, in the course of which the youth were warned of the consequences of unfaithfulness,—of the danger and loss to themselves, and of the disadvantage also that it might be to others.

8th mo. 1st. We set out to Westfield. To this place notice had been sent, but no care seemed to have been taken, only a few had heard that we were coming. My feelings were much tried from a sense of the neglect. To me it was a poor, low time, as to the life of religion. I felt unable to describe my feelings either in the meeting, or now while I make this note. I am now advanced in life. It is difficult for me to travel in this new country. I had a desire to see as many of the neighbors as could well collect together, and now I expect never to have the opportunity. I have no way to relieve my mind. Notice has gone on to Elk for to-morrow. We must go, but I cannot clear. I have endeavored to do according to ability, but as I write, my heart is sorrowful.

13th. The day after Miami Quarterly Meeting, I had to mention that it was comely to be quiet and still in meetings; that the contrary was a mark of bad manners, and that good breeding and politeness would teach better manners, and so would genuine religion. I have been exceedingly tried in this journey. One person has got up and set off, and another followed, and another, till four or five have gone out, and sometimes more, and after a time return; and others going and returning almost continually. It appears to me, the greatest want of good manners that I have witnessed in all my travels, is in the parts I have lately been in.

(To be continued.)

Selected for "The Friend."

#### Extracts from Letters of James Emlen.

"12th mo. 22d., 1864.

The decease of —, will be a solemn event in the family, and we all desire it may be turned to their profit, and have the effect designed. We mostly find trouble makes us either better or worse, according as we are exercised by it—according as our minds are turned to the Lord, desiring that our afflictions may be sanctified to us, and the end and design realized. \* \* \* \* \*

That we should often feel poor and stripped and sometimes oppressed, are events common to all, even the best; and it is, no doubt, by a faithful and patient endurance of such dispensations, that we can adopt the language of George Fox: 'We are nothing, Christ is all.' Oh! that we may all become more and more familiar with this experience, 'We are nothing, Christ is all,'—this will teach us to be patient in tribulation, hoping to the end for the grace that shall be revealed at His coming."

"I can say from my heart, I have a very friendly feeling, for a brief and lively ministry; and in this view of the subject, no one

has any occasion to plead their lack of eloquence and their stammering tongue, for it is not so much the words, how good or how many, but, how lively,—feeding the hungry, with the true bread, and not with pictures and descriptions and dry doctrines; nay, is it not true, that even 'a word fitly spoken is like apples of gold, in pictures of silver.' I have not any doubt, but the time will come, when a few words, with a right authority and weight, will be more valued, than much eloquence without this. The rehearsal of a text, with right authority, may have the effect to gather an assembly unto Christ, the invisible Teacher, and to settle them upon Him and upon His teachings, which is all any minister should desire. So that the calling, if rightly understood, is a very simple one, if we are only careful to suppress every desire, either to exceed or fall short, of what is given us in the life."

For "The Friend."

The following was found, among the papers of Mary Passmore, an elder and member of Goshen Monthly Meeting, who deceased in the Fifth month, 1873.

"Some expressions of Sarah Emlen's in the last Yearly Meeting before her death, 4th mo. 17th, 1849.

"In a very solemn manner, she said: 'I believe I must deliver what appears a little message given me for the prisoners of hope: some of the little humble ones now present. It seems to me the door has been opened, and I have been permitted to sit with them a little in their prison houses. Have long patience my sisters. The Lord of Hosts is purifying his people. Earnestly do I crave, that I may be one with you, in patiently waiting all the Lord's appointed time, that the church may be thoroughly purified; for the King's daughter is all glorions within, her clothing is of wrought gold, and pure gold, my friends, we know cannot sustain any loss by the fire. And some of the obscure ones, I believe, as they abide in the patience, will be brought to show themselves to the people—will become as the golden pipes, which were to convey the golden oil in the sanctuary, that the harmony and unity of the spirit in the bond of peace would once more prevail. It is my firm conviction, that nothing would be permitted to hurt or destroy in all the Lord's holy mountain.

"Accept this exhortation of love, from one who feels herself standing upon the very brink of an awful eternity. I leave it as a little legacy of love, to you."

"Sixth-day afternoon, near the close, she said: 'And now that we are about to separate, each one to our own, I have earnestly coveted for us all, that the good seed that has been sown in every heart, may be quickened, and this prayer raised in each of our hearts—Have mercy upon us, Oh, Lord! have mercy upon us, lest we should have sorrow upon sorrow.'"

*Ancient Mines.*—Recent discoveries upon Isle Royal, Michigan, an island in Lake Superior, show that an ancient race of men, at some distant period in the past, have done very extensive mining work. Traces of this ancient mining are found all through the Lake Superior copper region; but at this special point, and on a single location of less than 2,000 acres of land, a greater amount of labor is said to have been performed by these un-

known workmen than has been expended by a large force of men during twenty years at one of the largest modern copper mines in that district. Who were these men, and for what purpose did they procure the copper? It is a pity that no systematic efforts are made to procure tools and other remains of these mysterious workmen, with such facts as might help to elucidate their history. Antiquarian research is a vast uncultivated field in America; and we are fast destroying or obliterating the relics of our prehistoric races, whose doings and remains should be of great interest to us.—*Late Paper.*

Selected for "The Friend."

Margaret Fothergill, late wife of John Fothergill, in Wensleydale, Yorkshire, was carefully educated, when a child, by her parents, amongst the people called Quakers; and while she was but very young, not only delighted to go to Friends' meetings, but came under a concern of heart, that she might become acquainted with the Lord for herself, and be made a partaker of his quickening power and virtue in her own soul. This concern the Lord was pleased to regard, and graciously came in upon her heart, by his power and love, and thereby helped her to draw near Him, and worship Him knowingly, while she was but very young.

As she grew up, she continued to delight in waiting upon God, and feeling after his goodness secretly, through the pure influence whereof she came to be clothed with a meek and quiet spirit, and also helped to show it forth in a grave, modest and exemplary behaviour; because whereof, she was much beloved by most that knew her. Some time before she was married, being likely to leave her own country, she came under some exercise to exhort Friends, in several of their meetings, to a close walking with, and a true depending upon God; and to beware of an unconcerned mind when they appeared before him in meetings; which exercise she made mention of, being fresh in her mind, on her dying bed.

After she was married, she continued a true lover of meetings, and an humble waiter for the resurrection of the life of truth, right well knowing that therein is all ability for the performance of worship acceptable to the Lord. As she was often attended with fear and care, lest anything should divert her mind from the fervent search after the truth itself, which is absolutely necessary, so she would often express her sorrow of heart, concerning a dulness and indifferency which she apprehended to be growing upon some people's minds, who had long professed the truth.

Notwithstanding her being often unfit for attending meetings, as she had a good will to do, especially Monthly and Quarterly meetings, by reason of having young children, and sometimes being very tender and weakly as to her constitution of body, yet would she often express her care, that the affairs of truth in those meetings, might be managed with suitable zeal and care for the glory of God; sometimes saying she could be glad, and was not without hopes of living to be a little more at liberty to attend those services, and to discharge herself more fully amongst Friends, for righteousness' sake, whereof she was a pattern in her conversation, being humbly careful that the Lord's holy name might be glorified.

At the birth of her last child, she expressed much thankfulness to the Lord, saying, in reverent mind, "How shall we be thankful enough for all his help and wonderful goodness!" And although she as hopefully got far as at any other time, that being her eighth child, yet she grew suspicious of herself, and the third day after discovered her apprehensions of being taken away, in these words: "I wonder that I cannot be troubled that I am likely to leave my little ones, and my dear husband."

These expressions nearly affecting her husband, she added, "They (meaning her children) will be cared for, and thou will be helped, and there is a place prepared for me. She continued in a steady expectation of being taken away, and spoke of things relating thereto, with such cheerfulness and resignation, as was much admired. She spoke to divers persons in particular, advising them to prize their time, and make a right use of the visitation of God to them.

She also expressed herself in a living concern that young people, amongst Friends, might not content themselves with bare going to meetings, and said, in a weighty manner, "It will not do; it will not do;" and so spoke of her own concern, and desired to meet with the Lord in her young year when she went to meetings; and that she could not be content without his presence, and his love; and humbly acknowledged his mere and goodness to her, from her youth upward. She also said, that she had often thought herself poor and bare, but she followed on after him, and could not let him alone; and humbly acknowledged, he had often appeared to her as a morning without clouds. Her heart being then filled with the love of God, with unspeakable joy in the Holy Spirit, she sung praises and hallelujahs to the Lord God, and the Lamb, her Saviour, for his loving kindness and goodness to her, in many respects, till the very time.

Another time, one coming in to see her, whom she quickly took notice, called her by name, and charged her to be careful about going to meetings among the Lord's people, and that she did not go in a careless, or unconcerned mind, but to sit down at his foot stool, and wait to hear his gracious words. She charged her to tell her daughter thereof, and spoke further of the sorrow which had seized upon her spirit, because of an unconcerned mind, and indifferency, with respect to waiting for the knowledge of the truth itself, that she had seen coming in among Friends, which that day (or thereabouts), she said she well remembered, she had to advise Friends against, the last time she had anything to say in meetings, before she left her own country. And with great weight further said, "It is great or absolute mockery, to go to sit down before the Lord in meetings in a careless mind." After some little stillness, in the strength of the word of life, she said there was a terrible day of judgment coming, or hastening upon the backsliders in Zion. After that she seemed to be easier in her spirit, and lying sometime more still, her husband softly asked her how she was; she replied, "Well, or pretty well, my love; I find nothing but ease and peace."

Though her weakness had then prevailed much upon her, and she lay pretty still for some time, yet her strength was renewed in the power of truth, wherein she broke forth

supplication, in a very humble and fervent manner, for the church in general; and also mentioned her little ones.

She further said, "Let me be bowed down before the Lord, that the fruit of my body may be enriched with the same favor, love and goodness;" and so went on in praising and glorifying God, in the aboundings of his love and merciful goodness, to the tendering of the hearts of most about her.

After some time, she being entreated to endeavor after rest or sleep, she answered, "I had a fine or easy day yesterday, but this will be a hard day; for I think I shall rest little more, till I rest for altogether;" that being about or before the middle of the day, she continued in humble acknowledgments to the Lord for his goodness and mercy, and in raises to him whom she often said was worthy, worthy of it for evermore, so long as her words were intelligible.

Though she had a hard struggle with death, yet the sting of it being taken away, she seemed not to regard it, or complain, her spirit being borne over it by the sense of that joy and lasting pleasure, she was near to launch into the full fruition of; and that evening she departed, being the 16th day of the Second month, 1719, in the forty-second year of her age; and was buried the 18th day, in Friends' burying ground, accompanied by a great concourse of people, amongst whom the testimony of truth was borne, in the power and goodness of the Lord Almighty, to the comfort and strengthening of many.

*The Bridle.*—"Don't go without a bridle, boys," was my grandfather's favorite bit of advice.

Do you suppose we were all teamsters or horse jockeys? No such thing.

If he heard one cursing and swearing, or given to much vain and foolish talk, "That man has lost his bridle," he would say. Without a bridle, the tongue, though a little member, "boasteth great things." It is "an unruly evil, full of deadly poison." Put a bridle on, and it is one of the best servants the body and soul have. "I will keep my mouth with a bridle," said king David, and who can do better than follow his example?

When my grandfather saw a man drinking and carousing, or a boy spending all his money on cakes and candy, "Poor fellow," he would say, "he's left off his bridle." The appetite needs reining; let it loose, and it will run you on gluttony, drunkenness, and all sorts of disorders. Be sure and keep a bridle on your appetite; don't let it be master. And don't neglect to have one for your passions. They go mad if they get unmanageable, driving you down a blind and headlong course to ruin. Keep the check-rein tight; don't let it slip; hold it steady. Never go without your bridle, boys.

That was the bridle my grandfather meant, the *bridle of self-government*. Parents try to restrain and check their children, and you can generally tell by their behavior what children have such wise and faithful parents. But parents cannot do everything. And some children have no parents to care for them. Every boy must have his own bridle, and every girl must have hers; they must learn to check and govern themselves. Self-government is the most difficult and the most important government in the world. It becomes easier every day, if you practice it with steady

and resolute will. It is a fountain of excellence. It is the cutting and pruning which make the noble and vigorous tree of character.

—*Child's Paper.*

For "The Friend."

"The preaching of the cross is to them that perish foolishness, but unto us which are saved, it is the power of God." 1 Cor. i. 18.

How often in the experience of the young, and to those who have attained to some degree of religious stability, has been felt the "preaching of the cross"—the cross to the natural inclination; it may be in dress, in language, or in some of those matters which are accounted by the world as of little moment! But it is to those *that perish* that the preaching of the cross is foolishness: such, despising obedience in the day of small things, fall by little and little, but to those who are saved it is "the power of God." How remarkably full is this declaration. Oh! that all who have felt the controversy of the Lord to be against certain things, however trivial they may appear to some, Oh! that all who have felt this "preaching of the cross," may be willing to yield unreserved obedience thereto, and thus be prepared to take one step after another in the way of entire dedication and holiness to the Lord! Reason not away the requisitions of the Lord!

## THE FRIEND.

FOURTH MONTH 18, 1874.

"Let thy thummim and thy urim be with thy Holy One, whom thou didst prove at Massah, and with whom thou didst strive at the waters of Meribah." The allusion thus made by Moses, when addressing the tribe of Levi, to which pertained the priesthood, to these mysterious ornaments in the breastplate of judgment, to be worn over the heart of the High Priest, was doubtless to remind them of the necessity of dependence on the guidance and power of Him who had again and again proved His all-sufficiency, even in their extremity. As the high priest was to arrive at his oracular judgment from the manifestation of the Divine will through the sacred breastplate, it was essential therefore that he should keep it and resort to its revelations, as he had been commanded, in entire dependence upon the Holy One, whose direction was sought.

In this gospel day, when every truly anointed believer is a member of "an holy priesthood to offer up spiritual sacrifices, acceptable to God by Jesus Christ," it is none the less essential that his thummim and his urim shall be with his Holy One, as He manifests his glorious presence in the heart, to give him a knowledge of his will and the ability to conform to it in all things. In conducting the affairs of the church, this cannot be dispensed with unless the will and wisdom of man are to be substituted for the government of Christ, who is Head over all things in his own church.

This we doubt not is a subject of serious consideration with many to whom the cause of Truth, as connected with our religious Society is precious, as our Yearly Meeting draws nigh. Should it be gathered in the name of Jesus, and those who are prepared by the heart-changing baptisms of the Holy Spirit to know his voice and do his will, be pre-

served in humble waiting upon Him, He doubtless will condescend to preside over the assembly, and clothe the watchmen and watchwomen with the spirit of discernment, and with righteous zeal to lead the flock rightly forward in the promotion of his cause; or enable them to stand with the ark resting on their shoulders, as in the bottom of Jordan, until the people have passed over.

It need not be concealed that there is much cause for mourning, and many, from day to day, are wearing sackcloth underneath, on account of the unfriendly spirits around, the famine and the straitness of the siege. But the very greatness of the departures from original principles and practices, and the increasingly ominous signs of the times, may well confirm the faith and confidence of those who feel bound to maintain the testimony of Truth against the defections and consequent innovations of the day, and stimulate them to the performance of their whole duty in unflinching support of the doctrines and testimonies of the gospel, as held by Friends from the beginning.

The apostle says, "Let all your things be done with charity," and it should never be lost sight of. But he precedes this exhortation by another of equal force, "Watch ye, stand fast in the faith, quit you like men, be strong."

Love is the fulfilling of the law, but it is that love which is shown by obeying the commands of Christ. There is a spurious love, or charity, which fain would cover up and leave uncondemned the sin with the sinner. The truth should be spoken with love, but it must be true love, without partiality and without hypocrisy.

The responsibility resting on Philadelphia Yearly Meeting is great, and in view of the many valiant standard-bearers that have been, within a few years, removed from its ranks, the query may well arise with those who are left, Who is sufficient for these things? The best and most gifted are not, unless the breastplate of righteousness is kept over the heart, and their thummim and urim are with the Holy One. "The Lord sitteth upon the flood, yea the Lord sitteth king forever."

The report of the recent semi-annual examination at Westtown is a favorable one, to the effect, that evidence was given of the general ability and care of the teachers to impart instruction, and of a similar willingness and effort on the part of the pupils, both boys and girls, to acquire a thorough knowledge of the different branches of a liberal English education, and a competent acquaintance with the Classics.

Great improvements have been made in the Institution within a few years, and a disposition prevails in the Committee having charge of it, to continue adding whatever may be proved to be effective facilities for imparting a good education.

Where the training of children has not been very defective at home, there are very few of those brought to the school, who do not cheerfully comply with the rules adopted for its government; all of which are designed, as they soon discover, to maintain good order, and promote their advancement not only in the necessary study of literature and science, but likewise in good habits and happiness.

In providing for the proper culture of Friends' children at this seminary, the committee and officers are desirous to carry out

the intention of the Yearly Meeting in founding it; that while literary and scientific teaching is to be liberally afforded, a religious concern shall always be cherished and exercised, to imbue the minds of the scholars with the sound Christian principles of Friends, and to train them in the practice of their distinguishing testimonies.

It is of great importance that parents and others sending children to Westtown, should be careful, in no wise to counteract the rules adopted by the Yearly Meeting for attaining the objects proposed, and the labors of those conducting the school to carry those rules into effect. Where there is a conscientious care on the part of all entrusted with the oversight of children, to co-operate in bringing them into a love for their Saviour and obedience to his government, enforced by consistent example, it is often blessed with success, and besides a sure foundation being thus laid for present and future worth and happiness, it greatly facilitates intellectual improvement, and its influence for good is felt throughout life, redounding to the benefit of Society.

It is no small blessing conferred on our members to have ready access to such a healthy and attractive seat of learning, where, at small cost, a liberal education of their offspring may be obtained; while great pains are taken to guard them from any immoral taint, and to create in them a love for vital religion. It is, therefore, certainly their interest rightly to estimate and foster Westtown School, and to give their aid to strengthen the hands of its watchful caretakers in their arduous endeavors to keep it up, or to raise it to the requirement of the times.

"The Bible Association of Friends in America," has just issued a medium sized bible, neatly got up, and well adapted in size and clear, distinct type, and good paper, for general use. It is printed from new stereotype plates, without notes or references, the plates having cost \$3,150.

We think Friends or others would find themselves well suited by a copy or copies of this edition, either for their own use or to give to others. It is to be had at the office No. 116 North Fourth St., Philadelphia.

#### SUMMARY OF EVENTS.

**FOREIGN.**—Two of the witnesses for the claimant in the late Tichborne trial have been convicted of perjury and sentenced to penal servitude, Captain Brown, for five years, and Jean Lnis for seven years.

The funeral of Dr. Livingstone will take place on the 18th inst. The remains will be interred in Westminster Abbey, at the expense of the government. It is proposed to make a subscription for the children and two aged sisters of the deceased, who are in straitened circumstances.

Advices from India state that the famine is everywhere under control. The government has accumulated provisions more than sufficient to meet the deficiency, and further subscriptions in England are not required. There is still great suffering in some districts.

A boiler in a factory near Glasgow, exploded on the 9th inst. A large part of the boiler went several hundred feet through the air, and fell into a school-house full of children. Three of the children were killed instantly, and thirty-one were more or less injured.

The sovereignty of the Fiji Islands has been formally tendered to Great Britain.

In 1868 the number of deaths in the British coal mines was 1011; in 1869 it was 1116; in 1870 it was 991; in 1871 it was 1045; and in 1872 it was 1060. It thus appears that every 110,000 or 115,000 tons of coal raised costs the life of one man.

The French Transatlantic Company's steamer Europe has been lost in her voyage from Havre to New

York. She sailed on the 27th ult., and six days after her passengers and crew were taken off by the English steamer Greece, the Europe being in a sinking condition. The value of the steamer Europe was about \$1,250,000, and the cargo was estimated at \$1,000,000.

It is stated that the six largest steamers in the world are the Great Eastern, 678 feet long and 77 broad; the Liguria, 460 feet long and 45 broad; the Britannia, 455 feet long and 45 broad; the City of Richmond, 453 feet long and 43 broad; the Bothnia, 425 feet long and 42½ broad; and the City of Peking, 6000 tons, 423 feet long and 48 broad.

Intelligence has been received from the Gold Coast that the king of Ashantee has signed the treaty sent to him by Sir Garnet Wolseley, but has given no guarantee that he will execute its provisions.

Liverpool.—Uplands cotton, 8½d. Sales of the day 9100 bales American.

Advices from the north of Spain report no material change in the situation. On the 7th Serrano renewed the attack on the Carlist lines before Bilbao, but made little impression upon them. It was reported on the 9th that he had made proposals for a settlement which the Carlist leaders definitely rejected.

A Madrid dispatch states that Marshal Serrano is to return to that city, and that General Concha will succeed him in command of the troops operating against the Carlists.

The French government has received dispatches from the Governor of New Caledonia confirming the report of the escape of Rochefort and his companions, which was effected with the connivance of several colonists.

*Le Temps*, of Paris, publishes the dispatch from the Austrian Premier, Von Beust, to Prince Metternich, Austrian Minister at Paris, dated July 1870, saying: "We consider the cause of France our own, but the alliance of Russia and Prussia prevents armed intervention of Austria." Von Beust advises Metternich to suggest that the good will of Italy may be obtained and the mediation of that government in the settlement of the Franco-German difficulty secured if France will permit the occupation of Rome by the Italians."

A Berlin dispatch says that a compromise has been effected on the military bill, by which the most serious obstacles to its passage are removed. The government has accepted an amendment proposed by the Liberal members of the Reichstag, limiting the strength of the army to 401,000 men, and the period of service to seven years. Bismarck had threatened to resign unless the military question was settled.

The mineral products of Nova Scotia the past year were 1,051,467 tons of coal, 120,000 tons of plaster, 3,500 tons of iron, 2,820 tons of free stone, and 11,852 ounces of gold. There is a prospect of an increased product the present year.

A letter from Lima says that the Jesuits who came to Peru owing to the troubles in Germany, Italy and Spain, will not be allowed refuge in Peru.

A Vienna dispatch of the 13th says: The Upper House of the Reichstrath to-day passed the ecclesiastical bills, whereupon the bishops withdrew in a body. The Emperor has sent a conciliatory reply to the Pope's recent protest against the ecclesiastical bills.

**UNITED STATES.**—The interments in Philadelphia last week numbered 331. The liquor licences applied for in this city thus far in 1874, are 1,205 less than those applied for in the same period of 1873.

Mortality in New York last week 560. The production of salt last year in Michigan amounted to 4,117,730 bushels.

It is stated that the population of New Orleans is declining, and that there are about six thousand houses and stores now unoccupied. The wealth and commercial importance of this city were at their height just before the outbreak of the rebellion.

According to the report of the Department of Agriculture, the tobacco crop of 1873 amounted to 248,950,526 pounds, valued at \$17,698,628; Pennsylvania returning 14,575,200 pounds, worth \$1,778,868.

A dispatch from St. Johns, N. E., says that the steamer Tigress of the Polaris expedition, while on the return from a seal fishing voyage on the coast of Labrador, exploded her boiler, by which twenty-two persons were killed.

On the 13th the steamer Greece from Liverpool, which port she left on the 25th ult., arrived at New York with 28 cabin and 524 steerage passengers, and also 37 cabin and 182 steerage passengers, with 160 of the crew of the wrecked steamer Europe. When abandoned the Europe was in a sinking condition. The disaster is attributed to disarrangement of the plates. When coming out of Havre the bottom of the steamer scraped against rocks, but it was not then believed the damage, if any, was of a serious character. Three days

after this it was found the vessel was leaking badly. No lives were lost.

**The Markets, &c.**—The following were the quotations in the 13th inst. *New York*.—American gold, 113; 113½. U. S. sixes, 1881, Reg. 119; Coupons 121½; ditto 1868, 119½; ditto, 10-40 5 per cents, 114½ a 115. Superfine flour, \$5.90 a \$6.35; State extra, \$6.40 a \$6.60 finer brands, \$7 a \$10.50. No. 1 Chicago spring wheat \$1.62; No. 2 do., \$1.58; No. 3 do., \$1.51 a \$1.53; western, \$1.69. State barley, \$1.95. Oats, 62 a 68 c Western mixed corn, 86 a 91 cts.; yellow, 90 a 91 cts southern white, 91 a 92 cts. *Philadelphia*.—Upland and New Orleans cotton, 17 a 17½ cts. Superfine flour \$5.25 a \$5.75; extras, \$6 a \$6.50; finer brands, 7 \$10.50. Western red wheat, \$1.60 a \$1.70; Penn red, \$1.73 a \$1.75; amber, \$1.75 a \$1.82; white, \$1.4 a \$1.90. No. 1 spring, \$1.48 a \$1.50; No. 2 spring, \$1.4 Rye, 98 cts. Yellow corn, 85 cts. Oats, 60 a 65 cts. Sale of 2300 beef cattle at 6¼ a 7¼ cts. per lb. gross fat extra, and common 5 a 6 cts. Fair to choice sheep, 6 a 8½ cts. per lb. gross, and common 6 cts. Hogs, \$3.5 a \$8.75 per lb. net for corn fed. *Chicago*.—No. 1 spring wheat, \$1.26½; No. 2 do., \$1.23½; No. 2 mixed corn 62½ cts. No. 2 oats, 43½ cts. Rye, 90 a 92 cts. No. 1 spring barley, \$1.65 a \$1.70. Lard, \$9.65 per 100 lb *St. Louis*.—No. 2 winter red wheat, \$1.50; No. 3 do 1.36; No. 2 spring, \$1.24 a \$1.25. No. 2 corn, 64½ 65 cts. Oats, 48 a 48½ cts. Lard, 9¼ a 9½ cts. *Baltimore*.—Superfine flour, \$4.75 a \$5.50; extras, \$6 a \$6.50 finer brands, \$7 a \$10.50. White corn, 88 cts.; yellow 83 a 85 cts. Oats, 64 a 70 cts.

#### WESTTOWN BOARDING SCHOOL.

A Stated Meeting of the Committee having charge of the Boarding School at Westtown, will be held in Philadelphia on the 18th inst., at 2.30 P. M.

SAMUEL MORRIS,

Philada. 4th mo. 15th, 1874.

Clerk.

#### FREEDMEN'S MEETING.

The Eleventh Annual Meeting of "Friends' Association of Philadelphia and its vicinity for the relief of Colored Freedmen," will be held in Arch Street Meeting-house, on Second-day evening, 20th inst., at 7 o'clock.

All Friends interested are invited to attend.

JOHN B. GARRETT,

Philada., 4th mo., 1874.

Secretary.

#### INDIAN AID ASSOCIATION.

The Annual Meeting of the Indian Aid Association of Friends of Philadelphia Yearly Meeting, will be held in Arch Street Meeting-house, on Fifth-day, 4th mo. 23d, 1874, at 7½ o'clock P. M.

Friends generally are invited to attend.

RICHARD CADBURY, Clerk.

#### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

**DIED**, on the 24th of 1st mo. 1874, at the residence of his son-in-law, Clayton Lamborn, near Winona, Columbiana Co., Ohio, ISAAC B. TEST, in the 87th year of his age, a valued member of New Garden Monthly and Particular Meeting. Notwithstanding the many hardships and privations incident to raising a large family in a newly settled country, he was always careful that worldly affairs should not hinder him from the regular attendance of all our religious meetings. He was much engaged in the perusal of the Holy Scriptures and the approved writings of Friends, from which he derived great satisfaction; and thought much newspaper reading unprofitable. During his last illness his mind was much engaged to know a preparation for eternity, often dwelling in review upon his past life, saying at one time, "I have nothing to boast of, but if I had lived in forgetfulness of God as some appear to do, what would be my feelings now?" He bore a painful illness with much patience and resignation, often supplicating for strength to hold out to the end, saying, "What a happy release it would be," adding "not my will, but thine, O Lord, be done." He was favored with remarkable clearness of intellect during his last moments, and quietly departed, leaving with his friends the comfortable assurance that his end was peace.

WILLIAM H. PILE, PRINTER.

John Heald.

(Continued from page 277.)

"8th mo. 17th, 1820. At Moremon Meeting, I began by showing that we do not follow the practice of such, who carry the Scriptures with them to meetings, to take a text out of; that I did not observe that Christ or His apostles practiced such a usage, but He began His excellent sermon with, 'Blessed are the poor in spirit;' and Peter with, 'I perceive that God is no respecter of persons;' and Paul at one time quoted some of the heathen poets. They did not sing, or use many of the practices used now-a-days by the professors of Christianity. So I think our neighbors, who are disposed to follow the common usages, may hold us excused, as our practice comes nearer being like that of Christ and His apostles.

24th. Attended Clear Creek. My testimony was on the internal evidence of the Christian religion. I delivered my belief that, if this instructor were duly attended to, Atheism, Universalism, and unconditional Election and Reprobation, and such like doctrine, would be lone away to the end of the world.

The Yearly Meeting at Mt. Pleasant was favored in its several sittings with a good degree of Divine regard, and among the weighty concerns attending was the division of the Yearly Meeting. It was then mutually agreed to institute a Yearly Meeting at Whitewater, Indiana, for that State and the western parts of Ohio.

28th. At Cross Creek I was concerned to show that there are two kinds of builders; and two kinds of buildings in a religious sense—whosoever heareth these sayings of mine and doeth them, and whosoever heareth these sayings of mine and doeth them not. The one built on the rock, and the other on the sand. I thought a solemnity prevailed. We went after meeting to Joseph Hobson's, and staid there after noon. Near sundown I felt a concern revive, that had at times been turning on my mind for several days, but not with sufficient clearness; but now I perceived it was likely to be followed with condemnation, if delayed any longer. So I let my feelings be known, which was to have a meeting in a village near, called Richmond. It was soon agreed to and

notice given, and nearly as many as could be accommodated attended. After a time of silence I felt it to rest on my mind to state, that if a man begin to be religious and sometimes to exhort or advise people to do right, all seemed to be agreed, that he himself should conduct uprightly, and not advise one thing and do the contrary; but one who does not make such pretensions will do well enough though he be not so particular and exact. Has he who gives counsel need to be more pure, to be fit for Heaven, than other people? May such as are making little or no profession be counted suitable for the happy abodes, yet not so correct in their doings, as he is expected to be who cautions others? Do not too many neglect the proper attention to duty, and it is thought to be all well enough, because they are making little pretension to religion? Some have room to fear that they are too much at ease, and in danger of what befell the slothful servant who neglected to improve the talent which he was called on to occupy until his Lord come; but being (may I not say) careless, easy and slothful or negligent, was not disposed to observe the command. Thus some can neglect the attendance of religious meetings because they are not making much pretension to religion. Is it not time to consider seriously? Shall we not each one receive our own reward for our own works? I had to deal plainly with them, and there was, I thought, a solemn owning evidence attending.

29th. Early in the morning we set out, having about forty miles home. I rode home in the twilight. Our families we found well, and glad to see us and we them. In this journey I travelled 1141 miles by computation."

A few days after his return home, John Heald wrote to his friend Benjamin Kite, giving him some particulars of his travels. In this letter he says:

"Our Yearly Meeting was large, and the Quarterly Meetings of Blue River, Whitewater, West Branch, Miami and Fairfield, renewed the proposal of dividing the Yearly Meeting. This they did jointly, and when it came before the meeting, it resulted in an agreement that those Quarters should compose a Yearly Meeting to be known by the name of Indiana Yearly Meeting, to be opened at Whitewater, on Second-day, after the first First-day in the 10th mo. 1821, leaving the three Quarterly Meetings of Redstone, Short Creek and Salem, to compose Ohio Yearly Meeting.

"I have renewed cause to believe that there is still in our Society a number of livingly concerned Friends; but too generally the minds of this people appear to be too loose from the concerns of religion, too lightly esteeming the high privileges they might avail themselves of, to enjoy a comfortable assurance of acceptance with the dear Redeemer. How trifling are the enjoyments of these to what they might partake of! Yet so great is

the insensibility, that such appear only to know in part; so that it might be said to them, 'O fools and slow of heart to believe.'"

Several of the subsequent letters of John Heald refer to the concerns of "The Fairfield Company Store," a co-operative association which had been organized sometime before in that neighborhood, and which proved a source of much trouble and pecuniary loss to many who were interested in it. Many Friends were share-holders in it, but many others also took stock; and when the time came to pay the indebtedness that had accumulated, some removed to other States, or proved irresponsible, so that the burthen fell heavily on the small number of persons who possessed property and were too honest to evade their responsibilities. John Heald was not involved in the difficulty, but his sympathy with his neighbors led him to intercede with the creditors residing in Philadelphia, through his friend Benjamin Kite, for such leniency, as might enable them to discharge their indebtedness without excessive loss, and additional legal expenses. The whole amount to be paid was only about \$4,000, but the low price of produce, and the comparative poverty of the people then residing in Ohio, made the difficulty of raising this sum greater than we can easily imagine. In a letter written 4th mo. 17th, 1824, J. H. says: "The Company Store business continues to be accompanied with much calamity, perplexity and distress. I suppose thou hast understood that sixteen of them were bound in a judgment to pay near \$4,000. Nine of them have paid \$265 each, and their property lies as liable to be seized and sold, as the property of those who have not paid any. James Boulton [his former travelling companion] has sold horses and cows to make up his \$265, but has no horse creature left, and still his little piece of land is liable to go too. While some appear to act honestly, others practice evasive shifts, and in addition to this our produce bears a small price, wheat 50 cents, rye and corn 25, oats 12½ per bushel, butter 6¼, [maple] sugar 6¼ per lb. If a map was made to exhibit all the shades of trouble and comfort, how wide the spaces of the one, and narrow the limits to the others, the world affords. To have much perplexity here, and no comfort hereafter, how melancholy, what doleful shades!

"Seven members of our meeting are of the 16, and many more are stockholders. It may be said you should help one another; perhaps many are willing who have but small means. I, for one, am paying interest on money I had the use of to bear my expenses when travelling [as a minister of the gospel] and have not found means as yet to discharge the debt. The amount however is small—a few dollars."

This case has been referred to here, on account of the proof it furnishes of the need of care as to how we enter into business arrangements with those whose standard of integrity, or whose views in other respects may not be

in unison with our own. For want of this care, many have been led into serious difficulties, and have been exposed to influences and temptations from which they have not always escaped without moral injury.

(To be continued.)

For "The Friend."

### The Heart of Africa, by Dr. Schweinfurth.

The explorations recently made in the interior of Africa, by George Schweinfurth, have furnished an important contribution to our knowledge of that country. This explorer has been from his youth an earnest student of botany, and led by his zeal for his favorite science, some ten years ago he spent two years and a half in collecting plants in the delta of the Nile, the Highlands of Abyssinia, and the Nubian hills and valleys. He returned to Europe with a splendid herbarium, but with an exhausted purse. The two years that intervened before he again entered on the scenes of his former labors, were spent in the study and classification of the specimens he had gathered. Of the effect of these employments he thus speaks:

"Whoever knows the blameless avarice of a plant-hunter will understand how these studies could only arouse in me a craving after fresh booty. I could not forget that the greater part of the Nile territory, with the mysterious flora of its most southern affluents, still remained a fresh field for botanical investigations; and no wonder that it presented itself as an object irresistibly attractive to my desires. But one who has himself, on the virgin soil of knowledge in unopened lands, been captivated by the charm of gathering fresh varieties, and has surrendered himself to the unreserved enjoyment of Nature's freedom, will be prompted to yet keener eagerness; such an one cannot be daunted by any privation he has undergone, nor deterred by any alarm for his health: he exaggerates the insalubrity of a northern climate; he bewails the wretched formality of our civilised life, and so, back to the distant solitudes flies his recollection, like a dove to the wilderness."

Having received pecuniary aid from the "Humboldt Institution of Natural Philosophy and Travels," he returned to Africa in 1868, on an expedition which lasted three years. Khartoom is situated near the junction of the Blue Nile, which drains the Abyssinian Mountains; and the White Nile, which flows from the more southern and western regions. It is almost the outpost in that direction of Egyptian civilization, though the authority of the Turkish government extends considerably beyond it, and the headquarters of a few wealthy ivory traders, who send out in their boats armed parties into the remote interior, in many portions of which they exercise a controlling authority. On a smaller scale, they remind one of the operations of the English East India Company in the valley of the Ganges, or of the great Fur Companies in Canadian regions. With one of these merchant princes, a Coptic Christian, named Ghattas, Dr. Schweinfurth entered into a contract, by which he was to be furnished with the means of subsistence, and with men to act as bearers and guards. The voyage commenced in the 1st mo. 1869. Their course was up the White Nile. Our author notices the enormous herds of cattle which were pastured on the shores, the snorting of the Hippopotamuses which were so numerous as greatly to disturb their

night's rest, and the almost unending flocks of geese which furnished an abundant source of food. On an island in the river he found the water-melon in a wild state, showing that its original home, as well as that of the domestic cat and of the ass, is Africa. He remarks:

"A rich variety of animal life is developed in this wilderness; not only did the shore swarm with hippopotamuses, whose vestiges were like deep pit-holes, but the ground was scooped out in places vacated by rows of crocodiles, which now basked only thirty paces in our front. Great iguanas and snakes rustled in the dry grass. Everywhere under the trees were snake skins and egg shells; above in the branches was heard the commotion of the mischievous monkeys, whilst birds of many a species, eagles from giant nests, and hosts of fluttering water fowl, gave incessant animation to the scenery of the shore.

"What, however, most interested me, was the unlimited variety in the kinds of water plants which abounded on the floods, the sport of the winds and waves. Among them the Herminiera, known under the native name of ambatch, has already been the subject of general remark; it plays so prominent a part in the upper waters of the Nile, that it might fairly be designated the most remarkable of the native plants.

"The ambatch is distinguished for the unexampled lightness of its wood, if the fungus-like substance of the stem deserves such a name at all. It shoots up to 15 or 20 feet in height, and at its base generally attains a thickness of about 6 inches. The weight of this fungus wood is so insignificant that it really suggests comparison to a feather. Only by taking it into his hands could any one believe that it were possible for one man to lift on to his shoulders a raft made large enough to carry eight people on the water. The plant shoots up with great rapidity by the quiet places of the shore, and since it roots merely in the water, whole bushes are easily broken off by the force of the wind or stream, and settle themselves afresh in other places. This is the true origin of the grass-barriers so frequently mentioned as blocking up the waters of the Upper Nile, and in many seasons making navigation utterly impracticable. Other plants have a share in the formation of these floating islands, which daily emerge like the Delos of tradition; among them, in particular, the vossia grass, and the famous papyrus of antiquity, which at present is nowhere to be found either in Nubia or in Egypt.

"The 14th of January was the first day of ill-luck, which I was myself the means of bringing about. Early in the morning another boat had joined us; and the people wished me to allow them to stay awhile that they might enjoy themselves together. Being, however, at a spot which seemed to me extremely dull, I urged them to go further, in order to land on a little island that appeared more full of interest. The excursion which I took was attended by a misfortune which befell one of the two men whom I took to accompany me. Mohammed Amin, such was his name, running at my side, had chanced to come upon a wild buffalo, that I had not the least intention of injuring, but which the man, unhappily, approached too near in the high grass. The buffalo, it would seem, was taking his midday nap, and disturbed from his siesta, rose in the utmost fury. To spring up and

whirl the destroyer of his peace in the air was but the work of an instant. There lay my faithful companion, bleeding all over, and in front of him, tail erect, stood the buffalo roaring, and in a threatening attitude ready to trample down his victim. However the attention of the infuriated brute was attracted by the other two men, who stood by looking on speechless with astonishment. I had no gun; Mohammed had been carrying my breech-loader in his hand, and there it was swinging on the left horn of the buffalo. The other man with me, who carried my rifle, had immediately taken aim, but the trigger snapped in vain, and time after time the gun missed fire. No time now for any consultation; it was a question of a moment. The man grasped at a small iron hatchet and hurled it straight at the buffalo's head from a distance of about twenty paces; the aim was good, and thus was the prey rescued from the enemy. With a wild bound the buffalo threw itself sidelong into the reeds, tore along through the rustling stalks with its ponderous weight, bellowing and shaking all the ground. Roaring and growling, bounding violently from side to side, he could be seen in wild career, and as we presumed that the whole herd might be in his train, we seized the guns and made our quickest way to a neighboring tree. All, however, soon was quiet, and our next thought was directed to the unfortunate sufferer. Mohammed's head lay as though nailed to the ground, his ears pierced by sharp reed-stalks, but a moment's inspection convinced us that the injuries were not fatal. The buffalo's horn had struck his mouth, and besides the loss of four teeth in the upper jaw and some minor fractures, he had sustained no further harm. I left my other companion on the spot to wash Mohammed, and hastened alone to the distant boat to have him fetched. In three weeks he had recovered, and as an equivalent for each of his four teeth he had a backsheesh of ten dollars. This liberality of my part wonderfully animated the desire for enterprise amongst my companions, and put them in great good humor towards me for the future."

Shortly after this, they had another proof of the excitable nature of the buffalo. "As we were sailing in deep water close to the reedy shore, the roar and rustle of our great sail started up a herd of wild buffaloes, which disappeared from sight, before we had time to seize our rifles. When presently we were passing the last camp of the Baggara Arabs, our attention was attracted to a scene of excitement, at once vivid and picturesque. The entire population, alarmed by an attack of wild buffaloes on some cattle-drivers, was up and in hot pursuit. Hundreds of men armed with lance or sword, some of them mounted, were furiously hurrying to the scene, urged on by the frantic shrieks of the excited women. We could not resist the conclusion that the buffaloes, which we had disturbed, had proceeded to attack the neighboring drivers. An impression seemed to prevail that we had fired at the Baggara, but in the tumult nobody exactly understood the circumstances. The gale was in our favor, and we glided rapidly out of reach without learning the precise issue of the disorder."

## Substitutes for Drinking Saloons.

There are many in all our large cities who are homeless, and others have nothing that deserves that endearing name. Boarding-houses, usually, are not homes. These homeless ones will have their resorts, where they may meet their kindhearted fellows. If we take from them the drinking saloons, what substitutes shall we offer them? Being social and kindhearted, many of them must have some place where they may meet their companions. If safe places, suited to their position in life, are not furnished, they will take such as they can find. It is not because they are more depraved and vicious than many others, that they spend their evenings where they do, but this want of their social natures draws them together, and often they can find no better. Their genial natures and love of society, have proved snares to them and may prove their ruin. They who fall are those who are worth saving.

Where shall they meet? Where shall they have their friendly greetings, and yet free from danger? A few, a very few can meet in the public libraries and reading-rooms which have been opened; but the great mass, and those who need them most, cannot. They were not provided for the great masses, and the poor laboring men would not feel free in them.

At present the poor have few gathering places which are safe. No light, warm, pleasant, social room invites them. Houses in which there are snares are always open—always pleasant and inviting. There they are always welcome, and can be free and easy. For the sake of their dimes they are kindly treated. Publicans are not all heartless, if they are in a heartless avocation. In drinking saloons, young men find much that is agreeable to human nature, and much that is enticing. Though they know that many have fallen, they imagine they are strong enough to stand in those slippery places. Did they suspect their own strength, they might not be ensnared. Their strength is their weakness.

Had such persons pleasant and safe resorts, which have not the odium attached to them that is to a drinking saloon, many would gladly go there. They deeply feel the reproach which is rightly attached to those places; but when once entered, that stigma helps to bind them there, until their manhood is gone.

A mere pleasant reading-room in their vicinity, kept open during the evening, would attract many. These might be very numerous, and yet cost very little—almost nothing in comparison with rum's doings. There are few "churches" in our cities and large towns, but are able to sustain one or more reading-rooms. One of our weak churches having received a donation of fifty dollars to aid in fitting up one of them, promises to sustain two reading-rooms. What then may not strong "churches" do? Have they no responsibilities? Might not a little work of this kind benefit some of them spiritually.

But there are many who want to develop their social feelings by the enjoyment of more than mental food. For such, as well as for many who are poor, or strangers, there ought to be, in all our cities, pleasant houses, kept by pleasant people, in which they can get, as cheaply as possible, something good to eat and

to drink, and nothing to intoxicate—nothing to harm. We need many houses prepared to give cheap, good and safe lodging and boarding. We have Sailor's Homes. Many of our cities, in all parts of them, need Homes for the homeless and the stranger. "Can we not have them! Does not the God of the stranger and the homeless require something of that kind of His wealthy stewards? In connection with these eating houses or homes, there ought to be facilities for reading. With very little cost, our papers might, well-nigh, meet this great want. We have many men in our cities who are abundantly able to purchase houses for that purpose, in proper places, and then place suitable persons in them. They can retain possession of the house, and, in some locations, the rise of property will make them profitable investments. But how many, independent of profit and loss, ought to do that much for Jesus' sake?"

Many manufacturing firms might, in this way, greatly promote the temporal and spiritual interests of their employes, and thus greatly advance their own interests. In benefiting others, they would be benefited—in blessing their dependents, they would be blessed. Such houses, when rightly established, have proved to be self-sustaining. There is no risk about them. They are not an untried experiment. But even if there were risk, and possible loss, they ought to esteem it a privilege, and gladly do it, for the sake of doing good. Perhaps the greatest difficulty will be to find the right men and women to keep those houses. They ought to be those who love to do good, who have great kindness and decision, who can say yes, and it means yes; and no, and it means no. But certainly our cities have such, and if any city has not, the trial will develop them. Trial makes the men and the women for the occasion. They are made for it, and not it for them. God's cause never wants the right men and women when they are needed.

This is evidently a time of need. The shadows of coming events are seen. God's providence seems, manifestly, to indicate the speedy destruction of drinking saloons. That fearful vice is soon to be only a part of history. Then, my fellow Christians, where are your substitutes? Where can the homeless meet and receive kind, homelike greetings? Will we have done our whole duty, when the last drinking house shall have been closed?

J. B.

A correspondent writes us from Germantown, Pa.: "We have here a small public library, established by the Friends for the use of their own members, and thrown open to the public without charge. It is open twice in the week for delivering and receiving books, and it is used three evenings in the week as a reading-room, where the best scientific and literary periodicals and newspapers of the day lie upon the tables. This reading-room is becoming much frequented by the artisans and working-hands of both sexes in this manufacturing district of Philadelphia. The library now contains more than four thousand volumes of the best publications—travels, biographies, histories, works on morals and religion, and on natural history and the physical sciences. It has few works of imagination, and novels of all kinds are strictly excluded. It is to the latter circumstance that I would call attention. The au-

nual report of the librarian, William Kite, has just been made, and contains the following suggestive passage:

"In watching the use of our library as it is more and more resorted to by the younger readers of our community, I have been much interested in its influence in weaning them from a desire for works of fiction. On first joining the library, the new-comers often ask for such books; but failing to procure them, and having their attention turned to works of interest and instruction, in almost every instance they settle down to good reading, and cease asking for novels. I am persuaded that much of this vitiated taste is cultivated by the purveyors to the reading classes, and that they are responsible for an appetite they often profess to deplore, but continue to cater to under the plausible excuse that the public will have such works. This furnishing of unwholesome mental food or poison is gradually pervading our literature to an alarming extent, from the fictitious Sabbath-school little story-book, through our serials, to the more pretentious novel, vitiating the taste and giving false ideas of life wherever found. Could the directors of public libraries but see the evil and aid in checking its spread, they would be conferring a great benefit on the young people. Our library is doing a good work in that direction."—*The Nation*.

For "The Friend."

## Hints Relative to the Training of Children; from a Memoir of Deborah Backhouse.

Meeting lately with a Memoir of Deborah Backhouse of York, England, who died the 10th of 12th mo., 1827, aged thirty-four years, it was thought that some extracts from it would not, perhaps, be unacceptable to the readers of "The Friend." May it tend to stir up the pure mind with those in the similarly responsible relation!

As appears in the sequel, her father was early taken from her: but her mother being a woman of religious experience, and in whose heart Truth was precious, she prayerfully sought to promote the growth of the good seed of the kingdom in the susceptible mind of her daughter. Thus it is stated that she endeavored to train the children with whom she was left "in the nurture and admonition of the Lord, not only by example, but also by carefully directing the attention of their tender minds to the manifestation of the Spirit of Christ in their own hearts," &c. This, through mercy from on high, did not prove like seed sown by the way-side which the fowls of the air devoured; neither like that which was "choked with cares and riches and pleasures of this life," and brought no fruit to perfection; but, on the contrary, being watered by the tears, and nurtured by the parental solicitude and watchful prayers of a piously concerned mother, was blessed with the manifold increase that God alone giveth. Thus endeavoring by consistent example, as well as loving precept, to train up her child in the way of life and salvation after the exhortation, "I have taught thee in the way of wisdom; I have led thee in right paths;" she was rewarded and blessed by that child's taking "fast hold of instruction," and so walking in the ways of pleasantness and peace, that her path became like that of the just which "shineth more and more unto the perfect day."

May all parents, to whom this memoir may

come, be encouraged to faithfulness in watching over their respective precious flocks, as becomes delegated responsible shepherds of a jealous Father in heaven; knowing that "the ways of man are before the eyes of the Lord, and He pondereth all his goings." That thus, duly heeding the testimony of George Fox to Christian Barclay, respecting the olive-plants round about her table,—*"Thou must answer the Truth in them all,"* and first giving their own selves to the Lord, parents might, through the washing of regeneration and the renewing of the Holy Ghost, be made instrumental in directing, as of primary importance, their beloved offspring, as was the case with D. B., to a close inward "attention to the Light, or manifestation of the Spirit of Christ, in their own minds; which would very clearly direct them in all things; and, if obeyed, produce that peace which passeth all human understanding."

## MEMOIR, &amp;c.

"Deborah Backhouse, was the daughter of Richard and Elizabeth Lowe, of Worcester; and was born the 29th of the 8th month, 1793. She lost her father when between two and three years of age; but the pious care of her mother, to train up the children with whom she was left, in the nurture and admonition of the Lord, not only by example, but also by carefully directing the attention of their tender minds, to the manifestation of the Spirit of Christ in their own hearts; greatly made up to them the loss they sustained, by the removal of a parent sincerely concerned for their spiritual and temporal welfare.

"In her early years, Deborah exhibited a disposition requiring *much of the exercise of parental restraint*; and when further advanced in life, she often expressed the deep sense she had of the blessing, which the care of her mother over her, had been to her.

"Whilst diligent in instructing her offspring in the principles of Christianity, Elizabeth Lowe was also careful to train them in the practice of those things, into which true Christian principles lead; and, amongst these, a vigilance to guard against all such superfluity or ornament in dress, as should be likely to foster pride or vanity, and thereby hinder the growth of religion in the soul, had a prominent place. This watchfulness against everything that might be in danger of leading the minds of her family, from under the influence of the Spirit of Christ, which leads in the path of self-denial, had a great influence over them; and Deborah has been heard feelingly to mention the condemnation she experienced, when but young, in making some small alterations in her dress, in order to gratify a disposition to be less plain than was the wish of her beloved mother.

"In the early part of the year 1818, Deborah Lowe had an attack of illness, which confined her to the chamber for several months; and from which her recovery seemed for some time doubtful. In the course of it, she evinced that she had chosen the Lord for her portion, and the God of Jacob for the lot of her inheritance; being frequently engaged in religious meditation. On one occasion, a hope being expressed that she was recovering, she sweetly replied, that she had been thinking, that to depart and be with Christ would be far better. Many times after her recovery, she recurred, with expressions of thankfulness to God, to the seasons of Divine favor, which she was

permitted to enjoy in the time of her great weakness.

In the course of the following summer, she regained her usual health; and *keeping her attention to the teachings of the Spirit of Christ in her own mind*, her religious experience increased; and *submitting patiently to the baptisms of the Holy Ghost and of fire in her own heart*, she became prepared to labor for the religious edification of others. She first opened her mouth in the ministry, in a meeting at Tewksbury, when on a visit there in the autumn of the year 1819. Her communications in this line of labor, were neither frequent nor long, but were clear and edifying."

## LITTLE STREAMS.

Down in valleys green and lowly,  
Murmuring not and gliding slowly;  
Up in mountain-hollows wild,  
Fretting like a peevish child;  
Through the hamlet, where all day  
In their waves the children play;  
Running west or running east,  
Doing good to man and beast,—  
Always giving, weary never,  
Little streams, I love you ever.

Mary Howitt.

## "THY KINGDOM COME."

Now, in the heat and burden of the day,  
Father 'twere faithless of thy child to pray,  
That thou should'st call me to thyself away;  
Nay, rather I will kneel, and kneeling say,  
"Father,—'Thy will be done.'"

Yet the work presses, and the hands hang down,  
And in much weeping is the good seed sown;  
Oh! for the harvest, and the bringing home,  
Oh! for the Master's presence with his own,  
Father,—"Thy kingdom come."

*The Magnetic Metals.*—It is well known that, besides iron, there are a few other metals possessing magnetic properties, viz: Nickel and cobalt in a strong degree; manganese and chromium in a feebler one. In the Philosophical Magazine we find a remarkable article on this subject by W. F. Barrett, F. C. S., in which he endeavors to point out the similarity of these metals to each other in their physical and chemical properties. Thus, as to specific gravity, that of the thirty-eight known metals range from lithium 0.50 to platinum 21.5, a difference of nearly 21; whereas those of the three strongly magnetic ones are, iron, 7.8; nickel, 8.3; cobalt, 8.5, where the extreme difference is only 0.7. Their specific heat is nearly identical, their atomic one is the same, so also, their conductivity for sound, heat and electricity. Their dilation by caloric and the amount they lengthen by mechanical strain are also identical. The enormous cohesive power of iron, nickel and cobalt in the solid state signalizes these substances as the most tenacious of metals, and their melting-point is only exceeded by the platinum group of metals. They are not volatile at the temperature of the hottest furnace, but only by the electric spark, when they yield very similar spectra. As to their chemical properties, the combining weight of iron is 56.0; nickel 58.5, and cobalt the same. Chemists class these three metals in the same group from the similarity of their chemical behavior, and also the identity of their combining energy or atomidity. What has been said concerning the likeness of iron, nickel and cobalt in many respects holds true of manganese and chromium. The former has latterly been used to

replace nickel in the alloy of German silver. The compounds of all these five metals are conspicuous for the brilliancy of their colors. This uniform coincidence suggests the practical inference that nickel and cobalt might be obtained in a malleable and ductile condition when submitted to a process similar to that by which wrought iron is produced.—*Late Paper.*

Watch to the light, and its discoveries of good and evil, that you may not be ignorant of Satan's devices; so the net will be spread in vain in the sight of the bird, for watchfulness will make you in love with a retired estate; and the more truly and perfectly any man knows and understands himself, the better discerning will such have of other men; as in the beginning when deep silence of all flesh was more in use, the spirit of discerning was more common and quicker, than since it hath been neglected; therefore be sure you spend some time (at convenient seasons) in waiting upon God in silence, though it be displeasing to flesh; for I have had more comfort and confirmation in the truth, on my inward retiring in silence, than from all words I have heard from others, though I have often been refreshed by them also.—*John Crook's Advice to his Children.*

*Curious Will.*—In 1796 two English gentlemen were called upon to act as executors for a common friend just deceased. They found the will duly executed, but were extremely puzzled, on comparing the schedule of property with the testamentary dispositions, to perceive there would be a deficit of a considerable sum. The executors were so much the more surprised as they had always known their friend to be peculiarly accurate, as well as strictly honorable, and they believed him quite incapable of bequeathing a larger amount than he possessed. They searched carefully, therefore, in every conceivable place, but without finding any clue to the missing amount, beyond a scrap of paper on which the memorandum, "£700 to be taken out of Till." As this sum corresponded with the amount by which they were out of their reckoning, they naturally concluded that the testator must possess some strong box which he designated by the word "till," as he was not in business, and could, therefore, only intend it figuratively; still, after the most diligent inquiry, no such reserve appeared. Under these circumstances, the effects of the testator, furniture, plate, library, &c., were sold and the proceeds distributed. It was not until some time after, that, still pondering on the provoking mystery, it occurred to one of the parties that the writer of the paper might have meant some book, the author's name of which was "Till," the more probably as it was written with a capital T, and referring to the catalogue he found there inventoried among the folios a volume of Bishop Tillotson's sermons, a fact which at once threw a new light on the difficulty. Having communicated his discovery to his co-executor, they repaired together to the book-seller who had purchased the library, and inquired whether he had as yet disposed of the volume in question, "I had parted with it," replied he, "but, as it happens, it has been returned on my hands, for the purchaser to whom I sent it in the country objected to pay the price, and I shall,

Therefore, be glad to dispose of it to you." He value was agreed on and the book carried home, where, after carefully turning it over, page by page, bank notes to the amount of exactly £700 were found, as the scrap of paper had stated, "in Till," and the intentions of the testator were carried out.

—*London News.*

For "The Friend."

My heart has been drawn to address the young people of our religious Society, particularly those who have given way to attend places of diversion, believing as I do, that the attendance thereat, has a tendency to lead the young into a disesteem for our principles, and tends to create a relish for the vain amusements of the age; our familiarity with them, does not render them the less opposed to a growth in grace. The fashionable gatherings, such as teaparties, pic-nics, and many other assemblages so common in our day, are fitted to lead those who give way to attend them, out of the strait and narrow way, into the ways and manners of the world that lieth in wickedness.

Before indulging in those pastimes, be exhorted to consider, if they are not moulding you more and more into the ways of the vain world. What good can these things do you? Will they be a stay or a comfort, when summoned before the Judge of heaven and earth? Will it yield any consolation? nay, verily, it must bring remorse. What can all the enjoyments of time and sense, yield to a soul that is about to be ushered into the presence of our all-seeing Judge unprepared, when a few more days would be of more value than all the treasures of this world,—when a few of those wasted moments, could they be recalled to be spent imploring forgiveness for the past, would be more to you than ten thousand worlds. Oh! be wise; ponder these things, and begin betimes to endeavor to lay a good foundation against the time to come, that you may lay hold on eternal life: "This is life eternal to know Thee the only true God, and Jesus Christ whom thou hast sent." If you were but truly concerned to acquaint yourselves with him and be at peace, you would be constrained to forsake the follies and vanities of this present evil world, and to walk in the strait and narrow way that alone leads to peace. By submitting yourselves to be governed and guided by the unerring Spirit, you will find more true joy than in any of the ways of sin, and you will also be found in your allotment in the end. Therefore, my beloved young Friends to whom this may apply, turn inward, and in the silence of all flesh, implore strength to stand and to withstand the temptations of the enemy of your soul's peace; who is ever ready with his plausible insinuations, to mislead and bewilder. There is no place of safety but at the footstool of Divine mercy; here we shall witness preservation. As we submit to his government, we will know Him to be Wonderful, Counsellor. May you, with your own soul, be thus found seeking at wisdom's gate, to know the Divine will. If this is the engagement, there will, I believe, be raised up amongst you those who will stand for the law and the testimony, esteeming the reproach of Christ greater riches than the treasures of this world. Then you will know, that your precious moments should be spent to the honor of your Creator; and you will

count it all joy to be reproached for the name of Christ. Then why should any continue to hug the chains that bind them, but rather give up yourselves to his service, who hath called you with a high and holy calling, and is waiting to assist you on your heavenward journey. But be assured, that it is *only* as we submit to the terms, that we can take one step towards the promised land. To the willing and obedient soul, the yoke is easy and the burden light. Nothing that is good for us to retain (though much may be called for that flesh delights in, and is loth to part with) will be lost. The joy of his presence will far more than compensate for all, if we prefer Him to our chief joy. Then why hesitate to make a full surrender of all things into his forming hand, seeing that by it we obtain a blessed assurance, that the arms of his mercy will be underneath, amidst all of the trials of life, and a well-grounded hope will be ours in the hour of death. The experience of the Psalmist, is witnessed by the truly dedicated soul: "Though I walk through the valley of the shadow of death, I will fear no evil."

But, should you choose to seek for pleasure in the follies and vanities of this life, turning a deaf ear to the reproofs of instruction, which are the way of life, my soul will mourn for you. The lamentation will be applicable: "Oh that thou hadst hearkened to my commandments, then had thy peace been as a river." I had fed thee also with the finest of the wheat, with honey out of the rock would I have satisfied thee. But instead of this food, which is the heritage of those that fear the Lord, your portion will be that of the prodigal, even the husks that the swine do eat. But beloved young Friends, I am persuaded better things of many of you. And those of you who feel that you have wandered from your heavenly Father's house, and are beginning to be in want, and are failing to satisfy the longings of your immortal souls, with the husks of an empty profession, remember, I beseech you, your Father's house, where there is bread enough, and to spare. Humble yourselves to him, and He will open to you the arms of his mercy, and clothe you with the robes of his own righteousness, rejoicing over you in his love. Who can withstand such unutterable love and boundless condescension to poor fallen man, or turn away from his reproofs. While you have light believe in the light, that you may be the children of light, and not walk in darkness, but may know the works of darkness made manifest, and your feet safely planted on the immutable rock, Christ Jesus; that when the tempest beats upon your dwelling, your building may stand; for a day of trial is at hand, and our foundations will be tried; the chaff will be blown to the wind, and those who are not safely built on the immutable Rock, will not stand before the tempest. Youth is the time for an acceptable sacrifice. Trust not to a death-bed repentance. Close in with the offers of redeeming mercy. The visitations of Divine mercy *are not at our command*. Then if the summons comes in youth, you will be found ready, and your example may incite others to seek for the same blessed hope, which will ever prove as an anchor to the soul, both sure and steadfast. And if you are spared to old age, you may be enabled to glorify Him on earth, and be gathered home in due season, as a shock of corn fully ripe.

Ohio, the 30th of 3d mo., 1874.

*Modern Improvements in the Lands of the Pharaohs.*—Dr. Beke, when on his way to Sinai recently, passed through Egypt. He wrote from Cairo to a friend at Geneva an account of his experience in the land of the Pharaohs, which is published in the *Swiss Times*. The Doctor says:

"When I came to Cairo from Alexandria, nothing was more striking to me, who have visited Egypt several times, than the many great changes for the better that have taken place throughout Egypt. When once Lake Marcotis and the dreary waste on the western side of the Rosetta branch of the Nile are passed, the country, far and wide, exhibits unequivocal signs of improved and extended cultivation. I am told that whereas in 1850 there were only two million and a half acres under culture, there are now at least five millions. The peasants are busily employed in clearing and ploughing the land. In one instance I saw what I do not remember to have remarked before—a camel drawing the plough. Green crops of various kinds are growing luxuriantly, and it is pleasing to see the animals—black cattle, asses, sheep and goats—grazing in the rich pasture without stint. Trees not only line the road on both sides, but have been planted so extensively that many parts of the country have the appearance of being well wooded. Altogether the run across the Delta on a lovely, cool but sunny day, was most delightful; and I am not in the least exaggerating when I say that I was often inclined to doubt whether I could really be in Egypt. The sight here and there of tall factory chimneys rising out of the midst of the villages, or from among the trees, tended to increase the illusion. The fact is, that Egypt, though geographically forming a part of Africa, is rapidly assimilating herself to Europe, of which she desires to be regarded as a member.

If the changes in the agricultural districts and in the climate of Egypt have been great, those in and about the capital of the country are not less so. The Khedive seems determined to make Cairo the Paris of the Levant. The western portion of the city is being almost entirely rebuilt, and extensively enlarged in the direction of the Nile, whilst new streets are being opened through the other quarters. But on this subject I need not dilate. It is only to be hoped that in his zeal to modernize and Europeanize Cairo, the Viceroy will not deprive it of its Oriental character, which constitutes its great charm and attraction."

When quite young, I learned the rules, and was very fond of what is called Sacred Music, sparing no pains to attend school for that purpose, and the prayer of my heart to be directed aright, regarding worship, seemed to receive the first intelligible answer by the way of reproof. In this exercise, and when at the head of a choir of singers, words have occurred that through the enlightening influence of heavenly goodness (which had long been operating on my mind) appeared evidently inconsistent with my own state. I have often, to be unobserved by the company, kept the tune along, while I feared that taking the words into my mouth and uttering them as worship, to Him who requires worship of his creature man, in spirit and in truth, could be nothing short of solemn mockery from the mind which had been so far enlightened as to believe that noth-

ing could be acceptable worship to Almighty God but what came from Him and through the medium of his own Spirit, breathed out to Him again as the spirit should dictate, whether in prayer or in praises to his Great Name.—*Extract from a Testimony of Edward Cobb.*

#### Artesian Wells.

The province of Artois, France, known in ancient times as Artesium, gave to artesian wells their name. But Artois has not this honor because such wells were first sunk within its borders. They were known in very remote times, and some which are now in active operation, date from far back into antiquity. The Chinese claim that they were the first to procure water by this means, and it is true that such wells are to be found in extraordinarily large numbers throughout the Chinese Empire. It is said that in the province of Ou Tong Kiao, which is about thirty miles long and twelve wide, thousands of artesian wells exist, some of them reaching to the depth of two thousand feet. They are found now in all parts of the civilized world; and since science has been brought into use for the purpose of determining where they can be sunk with successful results, a vast amount of good has been accomplished through their instrumentality.

The most striking instance of this is supplied by the operation of French engineers in Algeria. Some time after the French government had obtained supremacy in that country, an effort was made to sink wells in the deserts, with the hope that barren lands might be made fruitful and the waste places habitable. In 1856 operations were begun in a spot in the Sahara in the province of Constantine. After a considerable amount of exertion the engineer in charge succeeded in striking water, which came to the surface and overflowed at the rate of one thousand gallons a minute. The natives considered the feat miraculous, and they came in troops of thousands to see the wonderful stream, and to lave in it and drink of it. The Arab priests performed religious ceremonies over it and blessed it, and it was known among the people as the Fountain of Peace.

Other wells were subsequently sunk at different places with equally satisfactory result. One of these, in the oasis of Sidi Rachid, was put down to the depth of 54 metres, and gave a continual flow of nearly twelve hundred gallons a minute. The inhabitants of the place had suffered much from want of water, and they were frantic with joy as they beheld the abundant stream. They rolled in the pellucid water, shouting and screaming; mothers dipping their children in it, and the aged sheikh of the tribe fell upon his knees and returned thanks to Allah and to the men who had achieved the work. Around these wells, which were placed in scores of spots in the desert, villages sprang up; and the ground having acquired fertility from the abundant moisture, wandering Arabs, who never before tilled the earth, settled down, and became better and more useful men than they had ever been. The artesian well in these cases became a civilizing agent of incalculable importance, and the wise foresight of the French government was richly rewarded.

These wells abound in England, particularly in London and the vicinity. In Trafalgar Square they supply ornamental fountains

from boring 393 feet in depth. In 1871 the total quantity of water obtained from these sources in the city, amounted to more than fifteen million gallons daily. In the neighborhood of Vienna also wells of this kind are found in large numbers, and some of them have been used for centuries. The most famous one in all Europe, is that of Grenelle, in the suburbs of Paris.—The water rises in tubing from a depth of 1798 feet at the rate of 518 gallons every minute, and is expelled from the mouth with such violence that it makes a column thirty-two feet in height. The water, like that in Trafalgar Square fountain has a warm temperature. At Grenelle it reaches 82 degrees Fahrenheit. There are other celebrated wells in France, among them one at Lillers, which has been in operation since the year 1126.

Artesian wells are quite common in this country, and there are many in the city of Philadelphia, where the water is used almost exclusively for manufacturing purposes. There is one at the Continental Hotel in that city, which furnishes a constant supply for the boilers, and in various factories and mills; others give to the proprietors as much water as is needed in their establishments. The deepest well in the world is in St. Louis. It was sunk by the owners of a large sugar refinery at an enormous cost, and after several years of labor. The work was begun in 1849 and completed in 1854, when water was reached at the depth of 2,199 feet. The supply is about seventy-five gallons a minute, and the temperature is 73 degrees. The water, however, is hardly fit for use, as it is so strongly impregnated with sulphuretted hydrogen as to be extremely offensive.

In years past an impression prevailed very generally that water could be procured by sinking a shaft in the earth at almost any point. A vast amount of fruitless labor and useless expense was the result of this belief. But now science has advanced so far that men are able to tell with almost unerring certainty whether water can be obtained in any given place by such agencies. A peculiar geological formation, and a certain relative position for the well, are the pre-requisites for success. Water finds its way from the surface of the earth to the interior, through crevices and chasms in the rocks, and through the rocks themselves when they are porous. In nearly all geological formations there are certain strata, often far down, which are water tight, and these form the beds of subterranean streams. As the water passes down from above, it forces the streams along, and they either burst forth in springs or remain locked in huge reservoirs. When a well is sunk until it strikes one of these or hits a rapid current, the pressure drives the water to the surface, exactly as in our cities the fluid in the storage reservoirs is forced into our bath-rooms and bed-chambers. The geysers of Iceland and of the Yellowstone Valley are attributable in part to the same agencies. They come from natural artesian wells, probably of vast depth, for the water in many cases is ejected at boiling heat. Steam, as well as hydrostatic pressure, is often the power that operates these extraordinary fountains. The oil wells in the north-western portion of this State are artesian wells sunk into the subterranean chambers in which the petroleum has collected.

An artesian well, to be successful must be

placed in a spot lower than the surrounding country. The elevation may be distant many miles; but if the strata of rocks trend from the higher point to the lower, water almost certainly will be obtained. The supply comes from the upland, and finds its channel between the strata, pouring down until it reaches the aperture, through which it again rises to the surface.

There are considerable differences in the dimensions of the bores of artesian wells. The diameter of the hole varies in different cases from four inches to twenty. The mode of boring is peculiar and interesting. The process is conducted with augers or drill attached to the end of an iron rod, and this connects with screws to another rod, and so on to any length required. To the upper end of the rod a transverse handle is attached, by which the instrument is partly turned round by two men each time it is raised and dropped. The cutting edge of the auger or drill thus chips a fresh line across the bottom of the hole at each blow. The blow is given by the rod falling by its own weight after it is lifted a few inches. The lifting is done by the men at the transverse bar, helped by another man at a higher point, who moves a long horizontal pole, one end of which is secured in a heap of stones, while the rod is coupled to the center of the pole by a stout rope or chain. The elastic up-spring of the pole lifts the boring rod, the latter is turned half round by the men at the handle, the pole is pulled down, and the rod strikes again into the hole.

The borer, of course, increases in weight as additions are made to its length, and so eventually, other machinery is used to lift it. Sometimes there is a windlass with a rope coiled around it. When the rod is lifted in this manner, the rope is suddenly loosened and the borer descends. But even this will not do when great depths are reached, and machinery is worked by horse-power for the purpose. At the well of Grenelle eight horses were hardly able to pull out the rod when the well was sunk far down into the earth. As the boring proceeds it is generally necessary to protect the sides of the well from caving in, with iron tubes, which are sent down one on another in lengths of half a dozen feet, one screwing to another, or attached together by a kind of collar. If it is required to use a second set of those tubes at a lower depth, they must be of smaller diameter, so that they may go through the first set. There is a vast variety of instruments for enlarging the hole, lifting out the material accumulated by the cuttings, and removing broken drills, tubes, &c., and for breaking up the instruments themselves when they become loose and dropped.

The very slow progress of the work is attributable to the time required for drawing out the whole length of the rods to discharge the ground-up fragments which collect in the bottom of the well. This must be done every few inches sunk; and as the work was formerly conducted, it was necessary, after drawing out all the rods, to send them down again with a cylindrical spoon to gather up the fine fragments. The Chinese have improved upon this, and their more simple and easy process has been adopted to some extent in other countries. Instead of using rods to sink the wells, the Chinese suspend the cutting drill, which is attached to a heavy metallic rod, by a chain that passes over a wheel. Around

e drill is a cylindrical chamber, which by means of simple valves, takes up and holds the broken fragments. As the chain is raised and dropped, it gives by its tension a turn to the drill, causing it to vary its position at every stroke. When the cylinder requires to be discharged, it is readily wound up on a mandrel.—*Late Paper.*

*Reputed Site of Babel.*—G. M. Gordon, writing in the Church Missionary Intelligencer, thus describes the reputed site of the Tower of Babel: A high mound is surmounted by a ruined and unfinished tower of brick, the summit of which is 235 feet above the plain. An examination of the mound shows that it is composed of the same elements as the mounds of Babylon—masses of brick and rubbish, interspersed with broken pottery. These bricks are all of them inscribed on one side with cuneiform characters. The cuneiform is the ancient Assyrian, and is supposed to be the oldest in the written language in the world. One side, where excavations have been made, you may see walls of brick ascending tier above tier with masterly ambition. On another, all is convulsion and disturbance—huge masses of brickwork, rent and overturned, yet so solid in their ruin that it is easier to pulverize the brick than to separate it from the mortar. One of these blocks has rolled bodily to the foot of the mound. Others are vitrified or fused by a process which can be none other than electricity or fire. Curiously enough the Arabs have a tradition that it had been destroyed by fire from heaven. The sides of the mound are pierced with holes and strewn with bones, which plainly indicate the lairs of wild beasts. The view from the summit at sunrise is distant and varied. The broad sheet of the Euphrates winds for many a mile, till lost in the distance in a "sea-like plain." It is difficult to resist the conviction that Birs Nimrod is the Tower of Babel, the noblest ruin in the world. There are those who (like Mr. Rich) believe it to be the Tower of Belus, and regard it as a part of the ruins of Babylon, but I prefer to hold the older tradition. And surely it is when standing on ground like this that the language of Scripture acquires a vividness and reality which rewards the toil of patient investigation, and makes the privations of travel forgotten; and a voice seems to breathe from the resting place of the prophets beside these mighty rivers which is daily more heard and felt rebuking the sneer of the scoffer and the skeptic.

#### An Adventure with a Lion.

The recent confirmation of the death of Dr. Livingston, the distinguished African explorer, calls to mind his perilous adventure with a lion in South Africa. The circumstance is thus related in his travels:

"Returning toward Kuruman I selected the beautiful valley of Mabotsa (lat. 25° 14' Suth, long. 26° 30') as the site of a mission-station, and thither I removed in 1843. Here an occurrence took place concerning which I have frequently been questioned in England, and which but for the importunities of my friends, I meant to have kept in store to tell my children when in my dotage. The Bakatla of the village were much troubled by lions, which leaped into the cattle-pens by night, and destroyed their cows. They even attacked the herds in open-day. This was so usual an occurrence that the people believed

they were bewitched,—'given,' as they said, 'into the power of the lions by a neighboring tribe.' They went once to attack the animals; but, being a rather cowardly people, compared to Bechuanas in general on such occasions, they returned without killing any.

It is well known that if one of a troop of lions is killed, the others take the hint and leave that part of the country. So, the next time the herds were attacked, I went with the people, in order to encourage them to rid themselves of the annoyance by destroying one of the marauders. We found the lions on a small hill about a quarter of a mile in length, and covered with trees. A circle of men was formed round it, and they gradually closed up, ascending pretty near to each other. Being down below in the plain with a native school master, named Mebalwe, a most excellent man, I saw one of the lions sitting on a piece of rock within the now closed circle of men. Mebalwe fired at him before I could, and the ball struck the rock on which the animal was sitting. He bit at the spot struck, as a dog does at a stick or stone thrown at him; then bounding away, broke through the opening circle and escaped unhurt. The men were afraid to attack him, perhaps on account of their belief in witchcraft. When the circle was reformed, we saw two other lions in it; but we were afraid to fire lest we should strike the men, and they allowed the beasts to burst through also. If the Bakatla had acted according to the custom of the country, they would have speared the lions in their attempt to get out. Seeing we could not get them to kill one of the lions, we bent our footsteps toward the village; in going round the end of the hill, however, I saw one of the lions sitting on a piece of rock as before, but this time he had a little bush in front. Being about thirty yards off, I took a good aim at his body through the bush, and fired both barrels into it. The men then called out, 'He is shot! he is shot!' Others cried, 'He has been shot by another man too; let us go to him!' I did not see any one else shoot at him, but I saw the lion's tail erected in anger behind the bush, and turning to the people said, 'Stop a little and load again.' When in the act of ramming down the bullets, I heard a shout. Starting, and looking half round, I saw the lion just in the act of springing upon me. I was upon a little height; he caught my shoulder as he sprang, and we both came to the ground below together. Growling horribly close to my ear, he shook me as a terrier dog does a rat. The shock produced a stupor similar to that which seems to be felt by a mouse after the first shake of the cat. It caused a sort of dreaminess, in which there was no sense of pain nor feeling of terror, though quite conscious of all that was happening. It was like what patients partially under the influence of chloroform describe, who see all the operation, but do not feel the knife. This singular condition was not the result of any mental process. The shake annihilated fear, and allowed no sense of horror in looking round at the beast. This peculiar state is probably produced in all animals killed by the carnivora; and if so, is a merciful provision by our benevolent Creator for lessening the pain of death. Turning round to relieve myself of the weight, as he had one paw on the back of my head, I saw his eyes directed to Mebalwe, who was trying to shoot him at a distance of ten or fifteen yards. His gun, a flint one,

missed fire in both barrels; the lion immediately left me, and, attacking Mebalwe, bit his thigh. Another man, whose life I had saved after he had been tossed by a buffalo, attempted to spear the lion while he was biting Mebalwe. He left Mebalwe and caught this man by the shoulder, but at that moment the bullets he had received took effect, and he fell down dead. The whole was the work of a few moments, and must have been his paroxysms of dying rage. In order to take out the charm from him, the people on the following day made a huge bonfire over the carcass, which was declared to be that of the largest lion they had ever seen. Besides crunching the bone into splinters, he left eleven teeth wounds on the upper part of my arm.

A wound from this animal's tooth resembles a gun-shot wound; it is generally followed by a great deal of sloughing and discharge, and pains are felt in the part periodically ever afterward. I had on a tartan jacket on the occasion, and I believe that it wiped off all the virus from the teeth that pierced my flesh, for my two companions in the affray have both suffered from the peculiar pains, while I have escaped with only the inconvenience of a false joint in my limb."

Selected.

A Friend of Lancashire spoke a few words in the ministry with which I had unity. He was formerly sailing master of a frigate, in the time of the American War, but was now an acknowledged minister; keeps a school for a livelihood; and he and his wife walked up to the Yearly Meeting, London, nearly three hundred miles, as did also another minister of Cumberland, who is in the station of a servant. Several others walked from fifty to one hundred and fifty miles.—*Journal of William Savery.* 1798.

*Loons Under Water.*—Passing up a small bay that opened beyond a narrow inlet, we saw a female loon with a little one hiding behind her, and our curiosity to see more of the little family induced us to reel in our lines and paddle toward them. As we slowly approached them, the anxiety of the mother was really touching. She swam alertly about, seeking in vain to hasten the little one toward the concealment of some friendly sedges, and coaxed and pushed it by turn, becoming each moment more alarmed. As the distance between us lessened, she became the victim of fear herself, and as equally solicitous for her fondling, expressing it by diving hurriedly and coming up, rising half upon wing and dropping again, and with every air of intense maternal anxiety. We continued nearing them, until it was evident that the little convoy would not reach the reeds before us, when, with a desperate plunge, the old bird went under, and in a moment went by our boat, seeking the open pond by the narrow and shallow outlet we were in. The depth was not sufficient to conceal her, and for a few rods her rapid course was plainly discernible. Her form was as straight as possible, making her as sharp as a cigar steamer, and her feet did not seem to be used unless for steering. Her motion, as rapid almost as the eye could follow, was derived from her wings, and probably from the upward and downward stroke, like sculling. They were powerful, indeed, inspired by fear, and in a moment the

dark form was gone like a shadow, seen only long enough to impress us with wonder and surprise at this use of the wings under the water, and at the result.

The little loony remained like a ball of grey down, reposing lightly on the water, and was not at all impressed with instinctive or imitative fear of us. It swam rather to the boat, and was not unwilling to be closely admired; in fact, it so freely accepted our complimentary criticism that when after carefully studying it, we rowed away, it swam in the eddy under the stern until it was dislodged and left behind.

We were not long gone when the fond mother rejoined it, when her demonstrations of delight were as unmistakable as her former distress.—*Forest and Stream.*

## THE FRIEND.

FOURTH MONTH 25, 1874.

### SUMMARY OF EVENTS.

**FOREIGN.**—Sir Stafford Northcote, Chancellor of the Exchequer, has submitted the annual budget to Parliament. The total gross revenue of the United Kingdom for the year ending 31 mo. 31st, 1874, has been £77,375,000, and the expenditures for the same period £76,456,000. The expenses include the Geneva award but not the expenses of the Ashantee war. The Chancellor proposes to reduce the income tax one penny on the pound, and to abolish the duties on sugar after 5th mo. 1st.

A resolution for the abolition of the sugar duties was immediately moved and passed in the House of Commons.

The Queen has sent a message to the House of Commons recommending a grant of £25,000 to General Wolseley.

A terrific explosion occurred on the 15th, in a coal mine at Dunkinfield, Lancashire, by which 53 persons were killed. One hundred men who were left in the mine alive after the explosion, were all rescued, but some of them were badly injured. The disaster is said to have been caused by the use of naked lights.

The English navy in commission on the first ult., comprised 240 ships, carrying 1737 guns, and manned by 25,170 officers and men, 5981 marines and 2801 boys.

The Atlantic cable of 1866, ceased working during a hurricane off the coast of Ireland, the 14th inst. There are still two cables in good working order. The fault in the cable is believed to be in shallow water only about twenty-five miles from Valencia.

The French Transatlantic Steamship Company has met with another heavy loss. The Ville du Havre went down last winter, the Europe a few weeks since, and now the Amerique is lost. The last named steamer is said to have foundered during a storm on the 14th inst., off the coast of Brittany, 26 miles from Brest. The passengers and crew were rescued by English, Norwegian, and Italian vessels which were in the vicinity, and only one person, the second officer, was drowned. The Amerique was 410 feet in length, and registered 4500 tons. She was insured in France for \$600,000.

Placards are posted up in the agricultural districts of England, cautioning intended emigrants to the United States, and stating on the authority of the British consul at New York, that 40,000 hands are ready to return to England.

A London dispatch of the 17th says, a terrific gale has raged in the English channel during the whole of the last three days. Many ships have been wrecked, and all on board lost.

A Berlin dispatch of the 14th says: The Reichstag, by a majority of 78, has voted in favor of the compromise amendments to the army bill. In the course of the debate General Moltke said, in consequence of the threats of revenge it was necessary to keep one hand on the sword. Disarmament would mean war.

The trial of Archbishop Ledochowski, of Posen, for a violation of the ecclesiastical laws, resulted in a conviction, and he has been sentenced in contumacious dismissal from his see. No appeal from this judgment will be allowed.

A Vienna dispatch of the 14th says: John Jay, American Minister, and his son-in-law, General Schwelnitz, the German Ambassador, will leave here on the 20th inst. for the United States.

The Austrian bishops have published a manifesto signed by thirty-two of their number, in which they deny that the State has the right of interfering in religious affairs, and describe the new ecclesiastical bills as tyrannical measures.

The Smyrna Bulletin states that priests belonging to the order of St. Lazarus and Jesuits, are taking refuge in Turkey, whither they are emigrating in large numbers.

The decision of the International Commission in relation to the tolls on the Suez Canal, was very unsatisfactory to De Lesseps, and he threatened in consequence to close the canal. The French government, however, advises submission, and the Porte has authorized the Khedive of Egypt to keep the Suez Canal in working order, should De Lesseps persist in his unwillingness to abide by the decision of the Commission.

Dispatches from Plymouth, Eng., of the 19th and 20th inst., report that the French steamship Amerique, which was considered lost, has been rescued. On the 15th inst. she was discovered by the steamers Spray and F. T. Barry, drifting in the trough of the sea with six or eight feet of water in her engine room, stoke hole and bunkers, the other compartments of the ship were dry. The pumps on the Amerique were set at work, and the two steamers towed her into Plymouth harbor. On the 20th she was free from water, and it was expected that nearly all the cargo would be saved.

Captain Rousseau, of the Amerique, in his official report of the disaster, says that his ship sprung a leak in a gale on the 13th, and despite all efforts the water continued to gain and extinguished the furnace fires, one after the other. The following day, when the danger of her sinking became evident, a consultation of her officers was held, and it was decided to abandon her immediately.

The funeral of Dr. Livingstone took place on the 18th inst., in Westminster Abbey, and was largely attended. Dr. Livingstone's grave is near that of Stephenson, the celebrated engineer.

Dr. Kenealey has applied to the Court of Queen's Bench for a new trial for Orton, the Tichborne claimant, on the grounds of Lord Chief Justice Cockburn's instruction to the jury and interference with testimony, and that the verdict was contrary to the evidence. The application was refused as to Lord Chief Justice Cockburn's conduct, and a decision on the other points is held in reserve.

A Madrid dispatch of the 19th says. The army in the north has been heavily re-inforced, and now numbers 40,000 men with 70 pieces of artillery. General Concha has assumed command of one corps of Serrano's army. Active operations had been suspended on account of stormy weather, but were resumed on the 18th inst.

**UNITED STATES.**—*Miscellaneous.*—During the quarter ending 3d mo. 31st, 1874, there arrived at the port of New York 15,726 passengers, of whom 11,813 were immigrants, consisting of 7,005 males and 3,908 females.

The U. S. House of Representatives has passed a bill authorizing the free circulation through the mails of all newspapers in the county wherein published.

The House has also passed the Senate bill increasing the issue of U. S. legal tender notes to \$400,000,000, and a currency bill authorizing \$46,000,000 extra circulation of National Bank notes. The total action allows \$400,000,000 greenbacks and \$400,000,000 bank notes, exclusive of \$47,000,000 fractional currency.

A \$30,000,000 mortgage has just been recorded in New York, made by the Farmers' Loan and Trust Company as trustees of the real estate, franchises, &c., of the Erie Railway, to secure the second mortgage consolidated bonds.

The Bangor Whig says that the amount of shipping under contract to be built in Maine the present year, is estimated at 130,000 tons, or about 50 per cent. more than last year, the only drawback being the scarcity of laborers and increased wages, which may prevent the fulfillment of some contracts.

Nine thousand five hundred and fifty-seven persons died in Chicago during the last year—a decrease in the percentage over the year before.

On the 17th inst. Wm. B. Washburne was elected by the Legislature of Massachusetts, United States Senator to fill the vacancy occasioned by the death of Charles Sumner. On the thirty-third ballot he received 151 votes of 267 cast.

The deaths in New York city last week numbered 610.

*The Markets, &c.*—The following were the quotations

in the 18th inst. *New York.*—American gold, 1 U. S. sixes, 1881, Reg. 119½; Coupons 121½; ditto 1867, coupons, 120½; ditto, 5 per cents, 114½ a 1 Superfine flour, \$5.90 a \$6.25; State extra, \$6.60 \$6.58; finer brands, \$7 a \$10.40. No. 1 Chicago spring wheat, \$1.65; No. 2 do., \$1.57 a \$1.59; red western \$1.70; white Michigan, \$1.80. Oats, 61 a 66. Western mixed corn, old, 88 a 90 cts.; new, 86 a 88. white, 90 a 91 cts. *Philadelphia.*—Uplands and Orleans cotton, 17½ a 18 cts. Superfine flour, \$5.20 \$5.75; extras, \$6 a \$6.50; finer brands, \$7 a \$10. Western red wheat, \$1.65 a \$1.72; Penna. red, \$1.80 a \$1.80; white wheat, \$1.90 a \$1.95; No. 2 spring wheat, \$1.50. Rye, \$1.03. Yellow corn, 89 a 90. Oats, 60 a 65 cts. *Cincinnati.*—Wheat, \$1.40 a \$1.70. Corn, 68 a 70 cts. Oats, 47 a 56 cts. Rye, \$1.70. Spring barley, \$1.55. Lard, 9½ a 10 cts. *Chicago.*—No. 1 spring wheat, \$1.32; No. 2 do., \$1.26; No. 3 do., \$1.21. Corn, 64½ cts. No. 2 oats, 45½ cts. *St. Louis.*—No. 3 red fall wheat, \$1.43; No. 2 spring, \$1.09. No. 2 corn, 67 cts. Oats, 49 a 50 cts.

### WESTTOWN BOARDING SCHOOL.

The SUMMER SESSION of the School will commence on Second-day the 4th of Fifth month.

Pupils who have been regularly entered and who, by the cars from Philadelphia, can obtain tickets at the depot of the West Chester and Philadelphia Road, corner of Thirty-first and Chestnut streets, giving their names to the Ticket-agent there, who is furnished with a list of the pupils for that purpose. In such case the passage, including the stage fare from the Railroad Station, will be charged at the School, to be paid for with the other incidental charges at the close of the term. Tickets can also be procured of the Treasurer, 304 Arch St. Conveyances will be at the STREET ROAD STATION on Second and Third-days, the 4th and 5th of the month, to meet the trains that leave Philadelphia at 7.50 and 10 A. M., and 12.10 and 2.30 P. M.

Baggage may be left either at Thirty-first and Chestnut streets or at Eighteenth and Market. If at the latter place, it must be put under the care of H. Alexander & Sons, who will convey it thence to Thirty-first and Chestnut at a charge of 10 cents per trunk, to be paid to them. Those who prefer can have their baggage sent for to any place in the built-up part of the City, by sending word on the day previous (through the post-office or otherwise) to H. Alexander & Sons, N. E. corner of 18th and Market Sts. The charge in such case for taking baggage to Thirty-first and Chestnut streets, will be 25 cents per trunk. In the same charge they will also collect baggage from other railroad depots, if the checks are left at their office corner of 18th and Market Sts. Baggage put under their care, if properly marked, will not require any attention from the owners, either at the West Philadelphia depot, or at the Street Road Station, but will be forwarded direct to the School. It may not always go on the same train as the owner, but it will go on the same day, provided the notice to H. Alexander & Sons reaches them in time.

DURING THE SESSION, passengers for the School will be met at the Street Road Station, on the arrival of the first train from the City, every day except First-day and small packages for the pupils, if left at Friend's Book Store, No. 304 Arch street, will be forwarded every Sixth-day at 12 o'clock, and the expense charged in their bills.

Fourth month 20th, 1874.

**FRIENDS' ASYLUM FOR THE INSANE.**  
Near Frankford, (Twenty-third Ward,) Philadelphia.  
Physician and Superintendent—JOSHUA H. WORTINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, on the 12th of Second month last, at his residence, West Grove, Chester Co., Pa., THOMAS CONAR in the 67th year of his age. The deceased was a loved and useful member and overseer of New Garden Monthly Meeting, being one of those who desire that all the principles and testimonies of our religious Society should be faithfully maintained. He felt a living interest in the right education of the youth, and endeavored in various ways to promote the welfare of his fellow-creatures. Trusting in the mercy of our Redeemer, his end was calm and peaceful.

## Earnest Zeal—John Banks.

Truly there is great need in the present day, of more earnest zeal in spreading the kingdom of our Redeemer in the earth. What multitudes there are (and the number appears to be rapidly increasing) who deny, or explain away as the natural workings of the mind, all revealed religion. And among the professors of Christianity, how great a want of so living becomes the self-denying disciples of Christ; and how deficient are many in that earnest concern for themselves, and that loving anxiety for the salvation of others, which would lead them to labor and to pray for those who are in danger of walking in the broad way that leads to destruction!

Who are there among us, of whom such a testimony could truly be borne, as was given of that worthy minister, John Banks, who was one of the early members of our Society in the north of England? His friends have recorded of him that "he labored night and day for the gathering of people to God, and for the settling of those who were gathered." He was "an incessant laborer in the Lord's work, both in body and mind; rising up early and lying down late, and freely given up to spend and be spent." "Such was his concern for the Gospel, that he did not spare himself to promote the truth: he was *zealous against lukewarm spirit*, warning Friends, both by doctrine and example, to beware thereof; often reminding the young people of that fervent love which was among the brethren in the beginning." It is not given to us of this day, as it was to him, not only to believe, but to suffer for the testimony of God; in which, as is stated, "he was preserved firm and true, in the stripping of his goods by the Continental act, public sale being made of what he had; yet the Lord bore him up over all, so that he was as one of the stakes of Zion, that could not be moved. He was afterwards in prison at Carlisle for his testimony; yet retained his integrity and stood faithful, and the Lord was with him, and gave him courage still to stand firm in his testimony against thees and hireling priests, not only in word, but in deed and in truth."

It may prove instructive and profitable to trace the process by which this worthy man

was prepared thus to stand forth as a noble advocate of the Lord's cause, and to be made the instrument in his day of turning many to righteousness. In his journal, he thus describes his own religious experience: "I was put to school when I was seven years of age and kept there until I was fourteen; in which time I learned both English and Latin, and could write well. When I was fourteen years of age, my father put me to teach school one year at Dissington; and after that at Mosser Chapel near Pardshaw, where I read the Scriptures to people who came there on the first day of the week, and the homily, as it is called, and also sung psalms and prayed. I had no liking to the practice; but my father, with other people, persuaded me to it.

"For this service my wages from the people was to be twelve pence a year from every house, of those who came there to hear me, and a fleece of wool, and my table free, besides twelve pence a quarter for every scholar I had, being twenty-four. This chapel is called a chapel of ease, the parish steeplehouse being some miles off. Amongst the rest of the people who were indifferent where they went for worship, came one John Fletcher, a great scholar, but a drunken man; and he called me aside one day, and said, 'I read very well for a youth; but I did not pray in form, as others used to do,' and that he would teach me how to pray; and send it me in a letter, which he did.

"When it came, I went out of the chapel and read it; and when I had done, I was convinced of the evil thereof, by the light of the Lord Jesus, which immediately opened to me the words of the apostle Paul concerning the Gospel he had to preach, that he had it not from man, neither was he taught it, but by the revelation of Jesus Christ. In answer to which it rose in me: 'But thou hast this prayer from man, and art taught it by man and he one of the worst of many.' So the dread of the Lord fell upon me, with which I was struck to my very heart, and I said in myself, I shall never pray on this wise. It opened in me, Go to the meeting of the people in scorn called Quakers, for they are the people of God: and so I did the next First-day after, which was at Pardshaw.

"This being before the end of the year, when I was to receive wages of the people for such service as I did, I could take none of them, being convinced of the evil thereof; nor did I ever read any more at the chapel.

"When about sixteen years of age, in the Tenth month, 1654, it pleased the Lord to reach to my heart and conscience, by his pure living Spirit, in the blessed appearance thereof in and through Jesus Christ; whereby I received the knowledge of God, and the way of his blessed truth, by myself alone in the field, before I ever heard any one called a Quaker preach; and before I was at any of their meetings. But the first day that I went to one, which was at Pardshaw, as aforesaid,

the Lord's power so seized upon me in the meeting, that I was made to cry out in the bitterness of my soul, in a true sight and sense of my sins, which appeared exceeding sinful: and the same day, as I was going to an evening meeting of God's people, scornfully called Quakers, by the way, I was smitten to the ground with the weight of God's judgment for sin and iniquity which fell heavy upon me, and I was taken up by two Friends. Oh! the godly sorrow that took hold of me that night in the meeting; so that I thought in myself every one's condition was better than mine."

"I may say, as a true witness for God, and the sufficiency of his power and quickening spirit, I did not only come to be convinced by the living appearance of the Lord Jesus, of the vanity, sin, and wickedness which the world lies in, and that I was partaker thereof; but by taking heed thereto, through watchfulness and fear, I came to be sensible of the work thereof in my heart, in order to subdue and bring down the wild nature in me, and to wash and cleanse me from sin and corruption, that I might be changed and converted. But before I came to witness this work effected, oh the days and nights of godly sorrow and spiritual pain I travelled through for some years!"

"Waiting diligently in the light, and keeping close to the power of God, which is therein received, I came to experience the work thereof in my heart, in order to effect my freedom from bondage, which by degrees went on and prospered in me, and so I gained ground more and more against the enemy of my soul, through faith in the power of God; without which no victory is obtained.

"My prosperity in the truth I always found was by being faithful to the Lord, in what he manifested, though but in small things; unfaithfulness in which, is the cause of loss and hurt to many in their growth in the truth." "I came clearly to see that it was not safe for me to sit down satisfied with what I had passed through, or the victory I had already obtained; but to travel on in faith and patience, and watch diligently in the light of Jesus Christ, where the true power is still received. For notwithstanding the many deliverances, and strength, and victory, I had experienced, the Lord, according to the greatness of his wisdom, was pleased to make me sensible of my own weakness, and that there was no strength to stand, nor place of safety for me to abide in, but in his power, and under a sense thereof, I was humbled, bowed, and laid low.

"Wherefore I took up a godly resolution in his fear, 'I will rely upon the sufficiency of thy power, O Lord, for ever.' About six years after I had received the truth, through great exercise and godly sorrow, I came to be settled in the power of God, and made weighty in my spirit thereby; and had some openings from the Spirit of Truth, in silent waiting upon the Lord; which tended to min-

ister comfort and satisfaction to my soul, in a renewed experience of the dealings of the Lord with me; and the Lord opened my mouth with a testimony in the fresh spring of life, that I was to give forth to his children and people.

"Oh! then a great combat I had through reasoning, that I was but a child, and others were more fit and able to speak, than I. But the Lord, by his power, brought me into willingness, and with fear and trembling I spoke in our blessed meetings."

For "The Friend."

### The Heart of Africa, by Dr. Schweinfurth.

(Continued from page 282.)

*An Adventure with Bees.*—"The dreary steppe in the neighborhood of Kaka contained nothing that was worth the trouble of collecting. The dried up remains of vegetation had been completely annihilated by fire. Accordingly I was anxious to proceed farther the same day, that I might botanise in some undisturbed spot of the primeval forest; my desire was, however, frustrated by an incident which I do not even now remember without a shudder. At the village the shore, as far as the eye could reach, forms a treeless steppe; but at some little distance the river is again bordered by a dense forest. A place was soon reached, where the stream takes a remarkable bend, and proceeds for eight miles in a north-easterly direction. This place has the singular name of Dyoorab-el-Esh, or the sack of corn. Now, as the north-east wind of course was adverse to any north-east progress, it was necessary that the boat should be towed by the crew. As the rope was being drawn along through the grass on the banks it happened that it disturbed a swarm of bees. In a moment, like a great cloud, they burst upon the men who were dragging; every one of them threw himself headlong into the water and hurried to regain the boat. The swarm followed at their heels, and in a few seconds filled every nook and cranny of the deck. What a scene of confusion ensued may readily be imagined.

Without any foreboding of ill, I was arranging my plants in my cabin, when I heard all around me a scampering which I took at first to be merely the frolics of my people, as that was the order of the day. I called out to inquire the meaning of the noise, but only got excited gestures and reproachful looks in answer. The cry of 'Bees! bees!' soon broke upon my ear, and I proceeded to light a pipe. My attempt was entirely in vain; in an instant bees in thousands are about me, and I am mercilessly stung all over my face and hands. To no purpose do I try to protect my face with a handkerchief, and the more violently I fling my hands about so much the more violent becomes the impetuosity of the irritated insects. 'The maddening pain is now on my cheek, now in my eye, now in my hair. The dogs from under my bed burst out frantically, overturning everything in their way. Losing well nigh all control over myself, I fling myself in despair into the river; I dive down, but all in vain, for the stings rain down still upon my head. Not heeding the warning of my people, I creep through the reedy grass to the swampy bank. The grass lacerates my hands, and I try to gain the mainland, hoping to find shelter in the woods. All at once four powerful arms seize me and drag me back with such force that I think I must

be choked in the mud. I am compelled to go back on board, and flight is not to be thought of.

In the cooling moisture I had so far recovered my self-possession, that it occurred to me to drag a sheet from my chest, and this at last I found some protection, but I had first gradually to crush the bees which I had enclosed with me within this covering. Meantime by great self-denial and courage on the part of my excellent people, my large dog was brought on board to me and covered with cloths; the other, an animal from Khartoom, was unfortunately lost. Cowering down convulsively, I lingered out thus three full hours, whilst the buzzing continued uninterruptedly, and solitary stings penetrated periodically through the linen. Everyone by degrees became equally passive as myself; at length a perfect silence reigned on board; the bees subsided into quietness. Meanwhile, some courageous men had crept stealthily to the bank, and had succeeded in setting fire to the reeds. The smoke rose to their assistance, and thus they contrived to scare away the bees from the boat, and, setting it afloat, they drove it to the other bank. Had the thought of the fire occurred at first, our misfortune would have assumed a much milder character; but in the suddenness of the attack everyone lost all presence of mind. Free from further apprehension, we could now examine our injuries. With the help of a looking-glass and pair of pincers I extracted all the stings from my face and hands, and inconvenience in those places soon passed away. But it was impossible to discover the stings in my hair; many of them had been broken off short in the midst of the fray, and, remaining behind, produced little ulcers which for two days were acutely painful. Poor Arslan [his dog] was terribly punished, especially about the head; but the stings had clung harmlessly in the long hair on his back. I was really sorry for the loss of my nice little dog, which was never recovered, and in all likelihood had been stung to death. These murderous bees belong to the striped variety of our own honey-bee. A mishap like ours has been seldom experienced in the waters of the White Nile. Consul Petherick, as his servants informed me, had once to undergo a similar misfortune. Our own grievance was not confined to ourselves; every boat of the sixteen which that day were sailing in our track, was pestered by the same infliction. No imagination can adequately depict the confusion which must have spread in boats where were crowded together from 60 to 80 men. I felt ready, in the evening, for an encounter with half a score of buffaloes or a brace of lions rather than have anything more to do with bees; and this was a sentiment in which all the ship's company heartily concurred. I took my quinine and awoke refreshed and cheerful; but several of the ill-used members of our party were suffering from violent fever. My own freedom from fever might perchance in a measure be attributed to my involuntary vapor-bath. I had been sitting muffled up for some hours in my wet clothes through the heat of the day, and no vapor bath more effectual could be contrived. Among the crews of the boats which followed us there were two deaths, which ensued as the result of the injuries which had been sustained."

"Our second day of misadventure came to an end; on the following morning we were again

passing along banks void of trees. Towards midday we made a pause on the right bank by a charming grove, where trailing creepers (*Leptadenia*) dropped their pendants perpendicularly down, and bound the spreading boughs of the Shubahi acacias (*A. verugera*) to the ground, an apparatus adapted to the gymnastic frolics of the little apes.

Warned by our experience we were ever on the alert against bees, keeping in readiness a bundle of straw and some faggots, in order to be able to kindle the dry grass immediately we had accomplished our excursion on the land. Towards midday we perceived with horror more bees in the shore-grass, and lost no time in getting across to the left bank. Here we came across numbers of Shillooks fishing in their light canoes of ambatch, darting through the water almost as swiftly as the fish themselves. This speed does not however, prevent them from having a waddling movement, something like a duck, in their light craft. So light are these canoes that one man can carry three of them on his shoulder, although each canoe is capable of holding three men. From a few dozen shoots of ambatch of about three years' growth, a canoe of this kind can be easily produced; a about six feet high the stem goes rapidly of to a point, so that a bundle of them need only be tied together at the extremities, and there is at once attained a curve that would grace a gondola. To use these canoes adroitly requires considerable practice, as the least shifting of the centre of gravity is made at the risk of a capsize. Nevertheless, they afforded me good service by taking me to the bank with dry feet, and by enabling me to make botanical collections from the floating bushes. When the Shillook has come to the end of his voyage, he seizes his gondola like an ancient warrior might his shield. He carries it, partly to ensure its safety and partly to allow it to dry, because the ambatch wood easily imbibes moisture and becomes saturated."

(To be continued.)

Selected.

There is no enjoyment and no experience that the human mind is capable of, which in any way to be compared to an abiding and living dependence, every day and every hour upon a merciful and overruling Providence. To feel that He is watching over us continually, that He will not willingly afflict us, and that all things which He permits to overtake us, will work for our good, if we trust in and seek Him. Here we are preserved from need less, and unsettling fears, from tumultuous doubts, from comfortless forebodings. We trust in His protection, and all is well. We feel his love and it comforts us. "Oh, thou men would praise the Lord for His goodness and His wonderful works to the children of men."

*Family Visits.*—Dear Friends, be faithful in the service of God, and mind the Lord's business and be diligent, so will the power of the Lord be brought over all those that have gain sayed it. And all ye that are faithful go visit them that have been convinced—from house to house—that if it be possible, ye may no leave a hoof in Egypt. And so every one go and seek the lost sheep and bring him to the fold, and there will be more joy over that one sheep than the ninety and nine in the fold 1668.

For "The Friend."

Hints in Relation to Marriage, and on a Preparation for the Ministry; from the Memoirs of Deborah Backhouse.

Deborah Lowe was married to James Backhouse, of York, in the 11th month, 1822. The following extracts from letters show, instructively, her desire to act in accordance with the Divine will, in taking this important step.

"Tottenham, 18th of 1st mo. 1822.

I can truly say, I have felt the importance of this subject in a manner that is too powerful for description; so much so, that it seemed unsafe for me to put a negative upon it, without first yielding to the influence of that Power, which *can alone effectually subjugate the natural will*; and having experienced, in some degree, what I have believed to be the operation hereof, though I am fearful of stamping my feelings too highly, fervent have been the petitions of my soul, unto Him who 'seeth not as man seeth,' that He would graciously condescend to work in me, through the agency of his Holy Spirit, both to will and to do what is right in his Divine sight."

"Tottenham, 8th of 2d mo. 1822.

I am at times thankful in feeling, that to act in accordance with what is right, has been and continues to be, the primary desire of our hearts; and I desire to cherish the recollection, that I am not my own; because this consideration produces that resigned disposition of mind, wherein a peaceful acquiescence with the disposal of the Divine will is sought for; and I may with humble gratitude acknowledge, that I am enabled at seasons, to believe that He who remains to be as a Father to the fatherless, has condescended, in abundant mercy, to direct our steps aright.

Though I have said thus much, I cannot but earnestly covet, that we may not relax in our endeavor to seek after the further unfoldings of that Light, *which can alone make manifest both what to do and leave undone*; believing, as we obey its dictates, we shall happily experience that blessing to attend us, which maketh truly rich; and *without which*, no real enjoyment can be possessed."

Other of her letters, as subjoined, no less instructively represent the humiliating exercises and preparatory baptisms she passed through to fit her for engaging in the very responsible work of the ministry. A vocation so important that perhaps there is no other in the church so influential for good or for evil to its members. How careful then should such be, that the ground and spring of action be the Holy Spirit of Christ Jesus, without which we cannot be His, neither can we do any thing effectually for the cause of Truth and righteousness in the earth. But when He who ascended up on high and received gifts for men, calls and puts forth into the dignified station, these being taught and led and anointed by Him, the Alpha and Omega and Ruler over all, such are permitted to know Him to go before and prepare the way, and being enabled to possess their souls in patience, are at times made to rejoice in Him after the experience of the Psalmist:—"All my springs are in Thee."

It was wisely observed by an ancient servant of the Lord, that "there never was an apostasy from the life and purity of religion, until the ministers and elders gave way." And, it is a remark of John Griffith concern-

ing ministers as well as others, that "the only way to preserve the strength, glory, and dignity of a religious Society, is for all who undertake to be active in it certainly to feel the Lord leading and directing them in all their services; and, on the other hand, the sure way to desolation is, when the active members in religious things move therein by the strength of human abilities only."

How inward, watchful and prayerful should those be who are called to said active duties, especially such as are delegated shepherds or mouths for the people! How careful should they be to wait for the quickening power from Him, who is the resurrection and the life; that thus His cause and kingdom may be promoted, be it through suffering and baptism and even "deaths oft" to the poor, unworthy servant, if thereby any may be turned savingly to the light of Christ in the heart, which, as William Penn writes, "is God's gift for man's salvation;" and which, he adds, "grows upon the obedient."

The letters alluded to are as follows:

"Peckham, 19th of 3d month, 1822.

I believe it may be interesting to thee to hear, I am at times enabled to appear as a fool before men, through the constraining influence of the love of Christ; but it is very seldom I have thus to avow my love to the cause; and I often think it matters not, whether we do, or suffer silently, if but permitted to be with the dear Master. Ah! I believe those who constantly follow Him, have to experience what it is to be led as to Calvary's mount, more often than to accompany Him when the triumphant language of Hosannah! is proclaimed. Let us then endeavor to encourage each other, to be willing to suffer all that is needful, both for ourselves and the Truth's sake; that we may happily be prepared to inherit that rest which is prepared for the people of God."

"Tottenham, 11th of 4th month, 1822.

I am confident it is highly needful that those, in a peculiar manner, who are called upon at seasons to proclaim the word of the Lord; yea, enabled to tell of his wonders in the deep; should be reduced to a state of want, and total inability to minister, otherwise than by and through the ability which God giveth. May it, then, be our endeavor to encourage each other in the hope, that strength will be from time to time afforded, to endure with patience every allotted portion; remembering, as I consolingly do at the present moment, the gracious assurance, that those who keep the word of his patience, shall be kept in the hour of trial and temptation."

"Tottenham, 5th of 6th month, 1822.

\* \* \* Though encompassed with manifold weaknesses and infirmities, I can and do rejoice, at times, in the consoling belief, that our descendings, shall I say as to the very bottom of Jordan, may enable us to gather from thence those stones of memorial which, in days to come, may be erected as a monument of the wonderful and merciful dealings of the Most High. But in these seasons of proving and desertion, how difficult it is, after having in measure been equipped with that armor, whereby we have experienced some ability even to 'fight the good fight' of faith, to retain this excellent gift! And assuredly, it is only by keeping the faith, that we can expect to obtain the victory.

Whilst writing, I am favored to see and feel the abundant necessity there is, for one so liable to err as I am, to stand continually upon the watch-tower, lest I should fall by the hand of the enemy; who remains unwearied in his endeavors to defeat the feeble ones. But, though I am thus sensible of my peculiar weakness, I desire to be preserved from looking too much at it; for truly the least in the Lamb's army have nothing to fear; no, verily! If but standing in our right ranks, ready to fulfil every command of our Holy Leader, we may humbly trust that our all-conquering Captain, who was never foiled in battle, will enable us to go on, until the warfare is accomplished; when, O animating prospect! we may hope to receive a crown of life."

"Dover, 10th of 7th month, 1822.

I believe a state of suffering is often mercifully dispensed, in order to deepen us in the life of religion; yea, in order to effect that baptism unto death, that entire crucifixion of the natural will, which must ever precede a resurrection unto life. And experience loudly proclaims the necessity there is, for poor, frail, erring man, to witness repeated plunges, both as regards himself, and to enable him availingly to enter into suffering with others."

"Dover, 1st of 8th month, 1822.

I humbly yet earnestly desire, ever to be preserved from placing an undue trust in any fleshly arm; knowing assuredly, that nothing short of the everlasting Arm, will enable to render that assistance and protecting care, which are needful to effect a safe and steady progress, through the wilderness of this world; wherein the briars and thorns are so thickly strewn, that the poor traveller sees, that it is indeed totally impossible to proceed without injury, when devoid of the guidance and support of Heavenly Love; and the wisdom of Him, who remains to be undiminished both in power and goodness, making a way for his little dependent children, where they can see no way; yea, at times, causing the rough places to become smooth, and the crooked paths straight; thus manifesting, to their unspeakable consolation, that He hath not forsaken them. May it then be our constant endeavor, to look unto Him alone! and O! may the submissive language of our souls ever be: 'All that Thou commandest us we will do; and whithersoever Thou sendest us we will go.'

(To be continued.)

*Thunder and Lightning.*—The length of a flash of lightning is generally under-estimated. The longest known was measured by M. F. Petit, of Toulouse. This flash was ten and a half miles long. Arago once measured a series of flashes which averaged from seven to eight miles in length. The longest interval ever remarked between a flash and the report was seventy-two seconds, which would correspond with a distance of fourteen miles. Direct researches have shown that a thunder storm is seldom heard at a greater distance than from seven to ten miles, while the average are barely heard over four to five miles off. This fact is the more curious as cannon may be distinctly heard double or treble that distance, and in special cases much farther. During the bombardment of Paris, in the winter of 1870, the Krupp guns were heard at Dieppe, a distance of eighty-four miles. Arago states that the firing at Waterloo was audible at Creil, one hundred and twenty miles distant

## WHO GIVETH SONGS IN THE NIGHT.

Selected.

When courting slumber,  
The hours I number,  
The sad cares cumber  
My wearied mind;  
This thought shall cheer me,  
That thou art near me,  
Whose ear to hear me  
Is still inclined.

My soul Thou keepest,  
Who never sleepest,  
'Mid gloom the deepest,  
There's light above.  
Thine eyes behold me;  
Thine arms enfold me;  
Thy word has told me  
That God is love.

## BEARING LIFE'S BURDENS.

Selected.

Oh, there are moments for us here, when seeing  
Life's inequalities, and woe, and care,  
The burdens laid upon our mortal being  
Seem heavier than the human heart can bear.

For there are ills that come without foreboding,  
Lightnings that fall before the thunder's roll,  
And there are festering cares, that, by corroding,  
Eat silently their way into the soul.

And for the evils that our race inherit,  
What strength is given us that we may endure!  
Surely the God and father of our spirit  
Sends not afflictions which he cannot cure?

No: there is a Physician, there is healing,  
And light that beams upon life's darkest day,  
To him whose heart is right with God, revealing  
The wisdom and the justice of his way.

Phebe Cary.

*The Growth of a Feather.*—In the skin of a bird, where a new feather is to grow, there is a little pit, and at the bottom of this an elevation or pyramid; extending up on one side of this pyramid is a groove, or furrow, deepest at the base, and gradually growing shallower until it disappears near the top; from each side of this furrow a great many smaller grooves extend around to the other side of the pyramid, and these also decrease in depth, and at last disappear just as they are about to meet on the side opposite the large furrow. The whole pyramid is covered with skin, and the surface is made of the same scales, or flattened cells, that are found over the rest of the surface of the body; but, instead of falling off when they are pushed out by the new ones below them, they become united or welded to each other, so as to form a horn coat over the surface of the pyramid, with ridges on its lower or inner surface corresponding to the grooves on the pyramid; and, as new cells grow at the base, this coat or cast of the surface is pushed upward till it breaks at its thinnest part, which is, of course, the smooth part without ridges opposite the large furrow; and then, as it is pushed onward and flattened, it assumes the form of a feather, the ridge formed in the main furrow being the shaft, while the casts of the side grooves form the separate barbs of the vane. When all of the vane has been formed and pushed forward, the pyramid loses its grooves and becomes smooth, and the wall now formed on its surface, being of the same thickness in all parts, does not break, but remains tubular, and forms the quill, which is attached to what is left of the pyramid. A finger-nail or a hair is formed from the same kind of scales in the same way, the process differing only in those features which give to each organ its special character. Feathers, scales, hair, claws and nails are all

made alike from the dead, flattened cells crowded to the surface by the process of growth.—*Popular Science Monthly.*

## Christian Liberty.

It happened also at other times, that because of his long hair he [George Fox] was spoken to, as I have seen myself; but of this I am fully persuaded, that he had not the least pride in it; but it seems to me not improbable, that he, seeing how some would make it a kind of holiness to wear short hair, did the contrary to show that, in some things, there was a christian liberty, for which we ought not to judge one another.—*History of the People Called Quakers by Wm. Sewel*, vol. i. p. 170. Philada. Ed.

[The above has been sent us, we suppose, as justifying our members in departing from the use of a plain dress, but the cases are not analogous, and G. Fox would have countenanced nothing that indicated in a member an unwillingness to be recognized as a Friend.—Eds.]

*Great Lava Flood.*—At a late meeting of the California Academy of Sciences, Professor Joseph LeConte, of the State University, gave an extended and deeply interesting lecture on the great lava flood of the northwest, which he had studied carefully on several exploring tours through the lava region. The great overflow of lava was one of the most remarkable convulsions of nature met with on the face of the earth. The principal point of eruption from the great central caudron was at the Cascade mountains, in Oregon, which were of themselves one solid mass of lava. From this centre the lava overflowed a great portion of Oregon, Washington Territory, all of northern California, and vast sections of Nevada, Montana and Idaho. The lava flood covered an area of at least 200,000 square miles, as far as explored, and it would probably be found to extend over a surface of 300,000 square miles, as its limit northward had never been determined. The depth of the lava crust varied from upward of 3000 feet in the Cascade and Blue Mountain region to one and two hundred feet, and less at remote points on the outer edge of the overflow. Where the tremendous gorge of the Columbia river cut through the lava bed, it has a depth of 3500 feet. The explorations of Professor LeConte had determined that the great lava flood pertained to a comparatively recent geographical period, and he assigns the eruption to the latter part of the miocene, possibly extending to the post tertiary.

In the great canyon of the Columbia river, beneath this immense layer of lava, he had discovered the petrified stumps of trees, beds of leaves, and all the evidences of a great forest once existing on a level corresponding with the present surface of the river. Above this forest came a drift period, and it was buried in a heavy layer of conglomerate before the overflow of 3000 feet of lava. In tracing the collateral streams that had cut deep gorges through the lava, extending a mile or two back from the main river, these conclusions regarding the formation had been fully verified. Professor LeConte dwelt with much enthusiasm on the details of his wonderful observations in the Cascade regions, and he considered it one of the most interesting fields for geological study to be found on the earth.

For "The Friend."

John Heald.

(Continued from page 282.)

"Fairfield, Columbiana County, Ohio,  
9th mo. 14th, 1821.

Endeared friend, Benjamin Kite:—Our Yearly Meeting was not quite so large as in some former years, but was favored with something refreshing as well as strengthening. It was agreed that Short Creek Quarterly Meeting be divided, and another Quarterly Meeting be instituted by the name of "Stillwater Quarterly Meeting."

William Foster attended the Yearly Meeting. I expect some benefits to result from his labors, both in the Yearly Meeting and in the lesser meetings. Profitable instructive labor was, I think, bestowed with skill. He does not appear to enjoy such uninterrupted health as some do, but seems devoted in faithful service.

Elizabeth Coggsball and Ann Shipley attended nearly all the Particular Meetings within Ohio Yearly Meeting, and afterwards the Yearly Meeting also—a visit of favor. They have gone, I suppose, to Indiana. John Paul was with William Foster here, as companion; your city loses no credit by him.

Our Yearly Meeting had a minute of advice drawn up, and ordered 1,000 copies printed and distributed among its members. One part of advice is, that Monthly Meetings each procure a collection of books, containing an account of the principles, rise, and sufferings of our Society, to be kept for its members and others to read, together with a variety of the journals of Friends, &c. It was apprehended that many were too much unacquainted in these respects; or, in other words, very ignorant."

"Fairfield, Columbiana County, Ohio,  
8th mo. 13th, 1822.

Esteemed friend, Benjamin Kite:—I might have replied to thy acceptable letter of 7th of 4th month last; but I took a journey to Redstone of about six weeks, from which I returned less than two ago; in the time I made a visit to the families of Westland Monthly Meeting, it is the same I was a member of twenty years ago. The dysentery began, I think, near Redstone, about the 25th of the 6th month, and in the course of the month many had died of that complaint. I never knew it to be as common before, and so spread over all this western country as far as I can hear, though I think not so much north of us, as south. At Ekrun meeting house, less than three miles from here, more than twenty persons have been buried within a few weeks, perhaps a month, mostly children, though several adults, and more are likely to follow soon; it seems to me, that five years before has not produced as many deaths, as one month past has done.

The summer has been remarkably warm and dry, and our waters low; and while these continue, it seems likely sickness will continue. We might learn to profit if we were not too dull, or careless.

A collector of muster fines came into the neighborhood a few weeks since and exhibited a list of fines amounting to more than \$400, which, if collected, must it seems come off of members of our Monthly Meeting, without much exception, as I have been told. He took property from three or four and sold it—James Boulton is one of them; but some altercation or misunderstanding taking place between the

ollector and some on whom he had demands. An attorney was applied to, who said he could not collect the fines before the next Court of inquiry, or Appeal, but afterwards he might. Some of those fines are of several years standing, and some large demands against small estates—one, I hear, is more than \$300. I hear of nothing going on lately relative to those fines. If those fines are collected now when wheat does not bring forty cents the bushel, in cash, I expect a great waste of property to be made at it.

Asenath Hunt, and her companions Lydia Coffin and John Stewart, from North Carolina, came here on a religious visit a few months since, and are gone on into Indiana. They have done virtuously here. Dugan Clark and Robert McCracken, have since visited our Meetings, also acceptably. They are from North Carolina too.

The squirrels are now very numerous, and it appears that they are travelling, as they are swimming the Ohio river in abundance, I am told. It is about twelve years since they did so before. The scarcity of nuts and mast, appears to be the cause of their moving, but they stop at our Indian corn fields and do much damage to the corn.

Daniel Pucket, was at our Yearly Meeting from Indiana, on a religious visit of large extent, after getting into Baltimore Yearly Meeting, the meetings north and east are all within his prospect as expressed in his certificate. I expect him daily to come into these parts, and from here to Redstone. I conclude with subscribing myself thy friend,

JOHN HEALD.

My love to thy wife and family."

In a letter written 9th mo. 25th of the same year, J. Heald mentions, that on account of the muster fines above referred to, Bennett Armstrong's horse, bridle and saddle had been taken from him, for a claim of some twelve or fourteen dollars.

"Fairfield, Columbiana County, Ohio.  
17th of the 12th mo., 1822.

Esteemed friend, Benjamin Kite:—Thine of 10th mo. 9th came safe to hand. It was acceptable, as was the intelligence of thy wife and daughter's love,—“Sweet is the love that comes with willingness.” Hannah Yarnall, thou says has deceased. Then she has left a world in which there is much trouble and perplexity. Rebecca Archer, also. I do not remember her. Notwithstanding I write as thou seest, it is often with difficulty that I need myself, my hands and head shake so much; but with the exception of a few infirmities, I am favored to enjoy a comfortable share of health: my wife and family also are favored with health.

I have been but little from home since I was at Westland; and at times I think it likely that I shall be excused from travelling in future, unless some short excursions. I have never thought it might be as well, perhaps, if I could remain in obscurity the little space of time here to come. It fatigues me now to ride on horse-back ten or twelve miles, as much as twice the distance did a few years ago. Sometimes I think of my distant friends with feelings of affection, as though I might see them again, but I wish to be preserved from attempting anything in a childish manner, of this kind however: though I hope I shall not prove disobedient, no more than in younger life, but be watchful, and endeavor to pa-

tiently resign to attend to required duty; this, I think, I am as fully disposed to do as at any past time. There is One who knows best, what is best for me, and to Him let it be left; a little of the world, or a little ease to the flesh, I trust, will not be a means of keeping me from enjoying of that which is infinitely better; if either should, it will be sad indeed.

It is a time of health generally with us now, and since the sickness subsided that prevailed last season, when many were sick and some died; but it seems “That folly prevails and wisdom pleads in vain.” Though there is a great stir in several neighborhoods about religion, a notion lately started here; they at first assumed the name of “Bible Christians,” but that title did them only a short time, when they would be called “Christians,” and leave the Bible out of the name of distinction. They preach, pray and sing in their meetings, and dip their members in the water, such as choose; are averse to discipline, only the New Testament; have an abundance of preachers among them, male and female, and meetings, sometimes every night in the week round the neighborhood, sometimes at one house and then another, two a night sometimes; they have frequently disturbed the meetings of Friends in several places in this quarter, four or five of them have been taken out of one meeting, one rising after another to preach, and conducted out one by one; they then went round the meeting-house preaching or singing for some time with loud words. I did not witness this, I only heard it of such as did. Some of our members have joined them, and have been disowned. It appears they have liberty of conscience, and no order to restrain or restrict; and if a person had not been at a meeting before, and asked to be a member, they set him or her down on the list of members. I think them to be Ranters. To perceive people running wild in their imaginations, about so solemn and important a concern, as that of their own future happiness, leaves sorrowful sensations on my mind. I remain affectionately thy friend,

JOHN HEALD.

Let brotherly love continue."

(To be continued.)

*Habits of the Fur Seal.*—The fur seal never sprawls out and flounders when moving on land, as might be supposed from observing the progression of the common hair seal; on the contrary, this animal carries its body clear and free from the ground, with head and neck erect, stepping forward with its fore-feet, and bringing the hinder ones up to a fresh position after every second step forward. When exerting itself, it can spring into a lumbering, shambling gallop, and for a few rods run as fast as a man, but will sink quickly to the earth, gasping, panting and palpitating. In the water all movements when swimming are quick and swift, the fore flippers propelling, and the long attenuated hinder ones serving to guide the course. The animal always in travelling swims under water, ever and anon rising, with head and neck clear from the sea, to snort and survey the field. The seals will frequently, when in play or suddenly startled, leap from the water like so many dolphins.

The young seals are exceedingly frolicsome at sea (as also a great part of the time on land); running acrobatic races in the surf, chasing one another, and whirling in swift

circles, they seem to be brimful of warm, joyous life. They also delight, especially the old ones, in lazily turning over and over in the swell, scratching and rubbing themselves with their flippers, exposing as they float in the water but a small portion of their bodies: and they also sleep upon the surface in the same short, uneasy slumber so characteristic of them when on the land. There is nothing dull or lethargic about the fur seal when asleep or awake. A healthy seal is never seen sleeping without an involuntary nervous muscular twitching and flinching of various portions of its body, usually an uneasy folding out and back of its flippers, with quick crawling movements of its skin, the eyes being, however, always tightly closed.

Arising from these great bands of herding seals is a peculiar dull, vibrating roar, the joint efforts of hundreds of thousands of vigilant and angry males, together with the calls of their harems, a din which never ceases for an instant, day or night, during the six or eight weeks of the breeding season; it can be heard at sea miles away, and frequently has warned vessels of the dangerous proximity of land when searching for the islands in thick, foggy weather. There also comes with this sound a most disagreeable smell. The seals themselves do not emit this odor, although they have a sweetish, oily breath, but they are constantly stirring up the decaying bodies of the dead, on and over which they sleep or incessantly flounder.—*Harper's Magazine.*

Selected.

We are variously modified in our mental complexions, habits and dispositions; and our common Creator and Preserver uses various means in correcting, reforming, and preparing us. Sometimes the body is touched, sometimes the mind, and sometimes the outward substance. Our best way, at all events, appears to me to make haste to get under the shelter of the wing of Omnipotence, there contemplating and meditating that all things, good and evil, are allotted or permitted to us by Infinite Wisdom, and resigning all to the disposal and ordering hand of our great Benefactor and best Friend, we settle in a comfortable repose and acquiescence in the Divine Will.—*R. Shackleton.*

*An Automatic Wonder.*—A citizen of Lansingburg, N. Y., has completed a remarkable toy, of which the following description has appeared: It is intended to represent, in a measure, the business portion of a small village. There are a series of houses or compartments, each devoted to some special branch of industry, and the whole surmounted by a tower, on which there is a town clock and chime of bells. Commencing at the left hand side of the machine is a lager beer garden, with figures sitting around a table drinking. At intervals they raise the mugs to their lips, and a man stands beside a beer keg drawing the lager. To the right is a shepherd tending his flock. Beside him is a maiden, at whom he occasionally “makes eyes;” and he also performs on a flageolet held in his hand. The saw mill is a fac simile of such an institution. The log is in its place, and slides along to meet the teeth of the saw, which is working up and down, cutting it in two. The attendants are all busy in their several duties. The grist mill is also going. One man is tending and feeding the hopper. Every now

and then he goes back and forth with a tray upon his shoulders, the contents of which he pours into the mouth of the hopper. The great water-wheel is moving steadily under the pressure of the water from above, and the elevator keeps up its show of relieving a canal-boat of its load of grain. The oil mill is at work, and the figures are all busy about it performing their several missions. A carpenter walks up and down a ladder while at his work. The scissors grinder is engaged at his vocation. An artist looks out of the window of his house and offers a pinch of snuff to the miller's boy, while the old miller sits on a balcony reading books and papers which an attendant from time to time brings out to him. A woman in one house hands a man a fiddle, on which he is expected to play. Another woman watches for her lover, but is watched in turn by a jealous villager. The blacksmithshop is in full operation, the man at the forge blows the bellows, and the sparks fly from the fire as natural as life. One man is engaged in shoeing a horse, and another welds on the anvil. One man is cutting wood; a girl is watering plants, which gradually grow, bud and bloom. Other figures are actively engaged, but they are too numerous to mention, there being over fifty in all. There are two fountains, a music box, bells, &c., all of which operate naturally. The whole forms a most wonderful combination of machinery, and is operated by means of weights. When wound up it will run three hours.—*Late Paper.*

## THE FRIEND.

FIFTH MONTH 2, 1874.

Philadelphia Yearly Meeting concluded its session on Sixth-day, the 24th ult. It was large on both the men's and women's side of the house; the large number of young men and young women being a striking feature in the assembly. Many of these, by their plain appearance, showed their appreciation of the self-denying principles of the Society to which they belong, and by their serious and consistent deportment, their sense of the importance of the business for which the meeting was convened. It is encouraging to have reason to believe, that many among our young people are seeing more clearly, it is a delusion to suppose that those who are ashamed to confess by their appearance they are Friends, will be faithful in the support of other testimonies which the Society is called to uphold, or become qualified to take part in the important affairs of the church.

Having been furnished with the following account of the proceedings of the meeting, drawn up by a Friend every way qualified to give it correctly, we lay it before our readers as being accurate and interesting.

*Fourth mo. 20th.—Second-day.*—As the time for holding the Yearly Meeting approached, there had been many evidences that the hearts of the more deeply experienced members were laden with a sense of the responsibility that attends the right performance of the duties of such a gathering. Under such a feeling, the meeting convened this day. There were in attendance a number of Friends from different Yearly Meetings. Several of these were members of The Indian Aid Committee, whose meet-

ings had been held in this city on Fourth and Fifth-days of the previous week, and who had remained to be present on this occasion; some others had been drawn by a special feeling of interest to visit their brethren; and in addition there were committees of both men and women Friends who were the bearers of epistles from the Western Yearly Meeting.

After the opening minute, the calling of the representatives, and reading the reports from the Quarterly Meetings. Robert Hodson, one of the committee from the Western Yearly Meeting, in a suitable manner informed us that they were the bearers of an epistle of love to our meeting; and laid it, and the accompanying minute, on the Clerk's table. The feeling which prevailed towards the meeting from which the epistle was sent, and towards the Friends who represented it, was a kind one, and was freely expressed by many; but it was soon evident that the judgment of the meeting was very clear and decided, that there were obstructions to the opening of a correspondence with that body, which could not immediately be removed. These were clearly expressed by one Friend, who stated, that we had no official knowledge of the existence of the body from which the epistle came, as it had been established by Indiana Yearly Meeting since its correspondence with us had been suspended. He thought that previous to receiving or sending epistles, we ought to have from Indiana Yearly Meeting official notice on which to proceed. He went on to say, there was no use in disguising the fact that there were other obstructions that must first be removed. According to the accounts published, there was evidently a difference of views entertained by members there and here, upon the important subject of worship. What were called general meetings had been held under the sanction of committees of that Yearly Meeting, in which, however sincere the actors might be, the proceedings were entirely at variance with the principles of Friends. In those meetings singing was practised, scores of persons were stated to be on their knees at the same time, and large numbers were induced to come forward and place themselves on what were called the anxious benches. He believed the time would come in which the sound members in the different Yearly Meetings would take charge of them, and put a stop to such proceedings; but until that did take place, he thought it was best for our Yearly Meeting to remain in its present condition as regarded correspondence with them. These views were fully united with, by a large number of our members; very little of a contrary sentiment being expressed, the time of the meeting was not wasted by tedious remarks, nor its harmony disturbed by a contentious spirit, and it was soon prepared to pass on to the business next in order; which was the reading of the minutes of the Meeting for Sufferings.

A concern had arisen in that body in regard to the corrupting effect of Theatrical Amusements and Horse-Racing. It had obtained serious consideration at different times, and had finally issued in the preparation of an Address on those subjects. This Address was especially designed to call the attention of thoughtful persons of other religious persuasions to these evils, so that in their respective circles of influence they might be encouraged to labor against these corrupt amusements—the fruitful sources of vice and immorality.

Fifty-five thousand copies of it had been published in the English and ten thousand in the German language, and nearly all had been distributed. The Yearly Meeting fully approved of what had been done, and remarks were made by several Friends from country neighborhoods, cautioning their fellow-members against countenancing those Agricultural exhibitions, in which the trotting of horse formed a part of the show.

The distribution of the approved writings of members of our religious Society, had continued to receive care. The report of the Committee of the Meeting for Sufferings on that subject called the attention of Friends to the importance of a lively zeal in availing ourselves of this means of spreading our principles, and of promoting practical piety among men. The belief was also expressed, that if our members would themselves more frequently read them in a serious spirit, they would be edified and refreshed by the clear doctrinal views, and the lively Christian experience recorded therein. In addition to the book sold, the Committee had made donations to libraries and individuals in various parts of the United States, and in South America.

Memorials for Hannah Warner, a Minister and Joseph Snowdon, an Elder; had been revised and forwarded to the Yearly Meeting.

The proceedings of the Meetings for Sufferings were approved, and after the appointment of a committee to examine the Treasurer's Account, the Memorial for Joseph Snowdon, above referred to, was read. This was brief though full testimony to his character and worth, without entering into the history of his life. It pointed out his honest zeal to preserve the church from any departure from the doctrines and testimonies which it had believed in and maintained from primitive times, his tender, nursing care over the young, which had greatly endeared him to many; and that christian humility, which prevented any dependence on his own works, and led him at the close of life to make the acknowledgments that not by any works of righteousness which he had done, but in great poverty of spirit, he believed through the mercy of God in Christ Jesus, he would be saved. After the paper had been read, affectionate tributes in a few words were given to the character of the deceased, and especial reference was made to his practice of sending to those in whose welfare he had become interested, written salutations of love and wise counsel.

Thus closed the first session of the meeting and many felt that it was cause for gratitude that we had been enabled to transact the business before us with the degree of harmony, united exercise and solemnity, that was felt to exist.

*Third-day.*—The representatives reported that they had united in proposing the names of Joseph Scattergood for Clerk, and Clarkson Sheppard as Assistant Clerk. These are the same Friends who have satisfactorily filled those positions for a few years past, and the meeting united in their re-appointment. The consideration of the state of Society as shown by the Queries and the answers thereto, as far as the sixth, inclusive, occupied the remainder of this sitting. During this time, there was a solid exercise felt and much good counsel was given; but there were some communications unprofitable in their character and burthensome to the meeting. As a caution, a Friend who had attended these annual

atherings for more than half a century, received the counsel which he had heard delivered therein many years ago, by the late Amiel Bettle (who as a wise counsellor had a superior) to the effect, that the proper object of the Yearly Meeting was the transaction of the business that came before it. That it was not a meeting designed for preaching, and that those present should therefore be careful to have their minds gathered into waiting upon God, so that they might receive ability rightly to attend to its varied concerns. He added, that at the time it was delivered, he thought it to be salutary advice, and he believed it was no less so now.

The subjects that engaged the attention of the meeting most largely, were the deficiencies reported in regard to the attendance of meetings, especially on week-days, the occasional attendance of some of our members at places of worship where hiring ministers officiated, and a departure from our testimony of plainness of dress and manners.

When the Query on plainness was being considered, a Friend, whose appearance corresponded with his remarks, said that he fully admitted the importance of Christian simplicity in dress, but not the need of any uniform or distinctive style, which he believed was not the practice of Friends in the earlier days of the Society. In reply several passages in the journals of Thomas Ellwood and Thomas Tully were referred to, which clearly proved that in their time Friends were known from others by their appearance. Though there have been gradual changes from one generation to another, yet a consistent Friend has always been known from a very early period of his dress. The judgment of the meeting in support of our long-established testimonies was unmistakably evident. While careful to bear in mind, that nothing outward is in any degree a substitute for the heart-changing work of Divine Grace, yet the preservation of this hedge which had been placed around us was felt to be important.

As on the previous day, this sitting was one in which the church was enabled to maintain its ground, and steadily to move forward in its business, though there were trials of patience, and sadness of heart, at the evidences of weakness exhibited.

*Fourth-day.*—At this sitting, the remaining queries were read. Their consideration did not occupy much time. A report was read from the committee set apart two years ago to visit subordinate meetings, detailing their labors, and reviewing the state of society as it appeared to them after their laborious services. They also suggested that Quarterly Meetings, where needful, should extend help to their subordinate meetings by committees to be incorporated with them, or otherwise, when such meetings failed rightly to carry out the provisions of the discipline. The labors of this committee have been much appreciated by Friends generally, and the report was fully united with, and directed to be sent down in the extracts, and by minute commended to the observance of inferior meetings and members.

The meeting at different times had been unsettled by communications from one of the members of that body which separated from the Ohio Yearly Meeting, twenty years ago, and which our Yearly Meeting had declined to recognize. Private labor was stated to have been extended to him by several of the elders,

but without effect. His earnestness seemed to prevent his seeing the impropriety of obtruding his services on a meeting which could not acknowledge him as a fellow-member. The meeting was informed that he had been repeatedly advised to refrain from doing so.

Notwithstanding this unpleasant occurrence, the meeting was favored with strength to conduct its business in a solid manner, and some lively exercise was felt and expressed; especially on the duty that rests upon parents to *restrain* as well as counsel their children, while subject to their control; and reference was made to the solemn language of the Almighty towards Eli of old, "The iniquity of the house of Eli shall not be purged with sacrifice or offering forever, because his sons made themselves vile, and he restrained them not."

*Fifth-day.*—Meetings for worship were held as usual in three meeting-houses, at 10 o'clock in the morning. The first business that came before us in the afternoon, was the report of the Committee having charge of the Boarding School at Westtown. This showed the school to be in a prosperous condition. The average number of scholars during the past year was 188, three more than the year before. In regard to the health of the children, their advancement in their studies, and the religious care exercised over them, the report was satisfactory and encouraging. The balance sheet of receipts and expenditures showed a small gain on the year's operations. The old Infirmary building had been altered into two convenient and comfortable dwelling houses, at a cost of rather less than \$6500. These had been occupied during the winter by two of the married teachers. The subscription authorized last year to a fund to increase the salaries of the teachers, had been responded to with much liberality by many Friends, and the amount already subscribed was stated at over \$43,000. In addition to this, two donations of \$20,000 each had been received, the interest of which was to be applied to strictly educational purposes, such as the payment of teachers' salaries, and the purchase of books, apparatus, &c. The Yearly Meeting fully approved of the labors of the Committee.

In reference to the individual (not present at this sitting) whose communications had given uneasiness the day before, a Friend explained that he had not taken any part in the separation which took place in Ohio in 1854, but that he became connected with what is called the Binns' Meeting there, as a member of Alum Creek Quarterly Meeting, which had been set over to that body by Indiana Yearly Meeting. This led to some remarks by others, in which was brought to view the importance of transacting all our business in the peaceable spirit recommended by the discipline. The renewal of our correspondence with the Yearly Meeting of Ohio was also referred to, and the belief expressed that the time for that step would soon come; but the meeting was evidently in unison with the sentiment of a Friend who said, that when that subject was acted on, it must come before the meeting in a different manner from that in which it now claimed attention.

The reports on Education showed the whole number of children of school age to be 970—21 less than the previous year. About two-thirds of these were receiving instruction under the care of members of our Society. A concern sprang up in the meeting, for those

children who were so located that it was difficult for their parents to give them a guarded education; and it was thought that the church had a duty to perform towards this portion of the flock. It resulted in the appointment of a committee to procure information as to what help might be needed, in different parts of the Yearly Meeting, to provide suitable schools, and to report next year.

The reports on spirituous liquors, showed that 54 of our members had at times used them as a drink during the past year, but of these, only four appeared to use them habitually. Considerable remark was made as to the propriety of extending the discipline of the Yearly Meeting so as to include, not merely distilled spirits, but all beverages which can intoxicate, and a proposition was read from Burlington Quarter to alter the 4th Query by substituting the words, "intoxicating drinks" for "spirituous liquors." Way did not open to make the change, but a few lines were added to the usual minute on this subject, advising the members to refrain from the unnecessary use of any drink that would intoxicate. Many felt there was not at that time in the meeting that degree of settlement and solemnity, which qualified it for such an important step as altering or revising the discipline.

A short season of quiet before we separated was comforting and refreshing.

*Sixth-day.*—The report of the Indian Committee evidenced the extension of much labor. The boarding school had been maintained, and a larger number of scholars instructed than in the previous year. The measures affecting the rights of the Indians, which had been proposed to Congress, had been closely watched. Additional efforts had been used to persuade the Indians to divide their lands, so that each one should hold his own portion by a separate title, but these efforts had failed of success. The labors of the Committee were fully approved, and much encouragement extended to them. The financial operations of the past year showed an excess of expenditures over receipts of about \$850. The Treasurer of the Yearly Meeting was directed to pay this out of the general stock.

The Committee to examine the Treasurer's account proposed that \$4500 be raised by the Quarterly Meetings for the needs of the coming year. This was approved with the addition of \$850 (making \$5350 in all) to meet the deficiency in the Indian Committee's accounts.

A valuable and interesting memorial for Hannah Warner, a deceased minister, was read; showing her fidelity to duty from very early years. The care which she exhibited faithfully to occupy her gift in the ministry, and to guard against any exercise of it that was not in the line of Divine appointment, was brought to view. It was instructive to observe how she had been safely led through many vicissitudes and trials, by a close attention to the leadings and teachings of that Divine Light, the Spirit of our Redeemer, which has been given to guide us in the way of salvation. He whom she had thus endeavored to serve through life, was with her in the weakness of declining health, and in the hour of death. Though clothed with that humility which is inseparable from the true Christian, yet she was cheered with the belief that her day's work had been accomplished, and that her Saviour had prepared for her a

mansion in Heaven. Much solemnity spread over the meeting, and under this precious covering, several short but weighty testimonies were borne. The remarkable language of George Fox was impressively revived: "When the Lord God and his son Jesus Christ sent me forth into the world to preach His everlasting gospel and kingdom, I was glad that I was commanded to turn people to that inward light, spirit and grace, by which all might know their salvation and their way to God; even that Divine Spirit which would lead them into all truth, and which I infallibly knew would never deceive any." Thanks were vocally rendered unto our Father in Heaven for His favors, and petitions offered for the extension of His saving help.

No business remained, except reading over the minutes, and the minute for adjournment. A deep silence prevailed during the intervals, and under this solemn covering the meeting concluded its session. It might truly be said that the best wine was reserved to the last.

#### SUMMARY OF EVENTS.

**FOREIGN.**—The steamship Faraday has begun to load the new Atlantic cable.

The Suez Canal difficulty has been settled by De Lessep's acceptance of the tonnage rates prescribed by the International Commission.

The Marquis of Salisbury, Secretary for India, has stated in the House of Lords that the next harvest in India promised to be abundant, and the present provision against famine was undoubtedly ample.

In the House of Commons a member moved that the suddenness of the late dissolution of Parliament is deserving the censure of the House. He declared that Gladstone had resorted to a stratagem which was ungenerous to his friends, insolent to his opponents, and barely honest to the nation. Gladstone replied with warmth and indignation, defending the act of dissolution which he declared would have been more inconvenient had it been postponed. The motion was negatived without a division.

Gladstone in a speech on the budget, said he regarded the reduction in the income tax as an important step towards its entire abolition. He approved of the removal of the duties on sugar, but opposed the abolition of house licences and also the method proposed for the relief of local taxation. The bill abolishing the sugar duties finally passed the House of Commons.

The House of Commons has voted the grant of £25,000 to General Wolseley, recommended in a special message of the Queen.

The application of Dr. Kenealy for a new trial for Arthur Orton, on the ground of want of jurisdiction by the Court, and that the verdict was not in accordance with the evidence, has been refused, thus finally disposing of the application.

The gross receipts of the British railroads have more than doubled within fourteen years.

The French steamship *Amerique*, which was towed into Plymouth, Eng., after being freed from water was examined. Her hull was found to be tight, but the valves were opened. Claims for salvage have been filed on behalf of the vessels which brought the abandoned steamer into port. The Admiralty Court have fixed her bail at £125,000, and on this being given she will be allowed to proceed to Havre.

The total number of paupers in London 4th mo. 4th, was 104,983, of whom 36,073 were in work houses, and 68,910 received out door relief. For several years the number of paupers has steadily diminished, and is now 30,130 less than it was three years ago.

In the House of Commons the Home Secretary has introduced a bill amending the licensing act. It fixes the closing hour of public houses half an hour later at night.

A Bayonne dispatch says: The Carlists in the north of Spain have organized a government with a regular Cabinet, in which General Elio is Minister of War; Admiral Vinalet, Foreign Affairs, and Senor Pinal, Finance and Interior.

According to Madrid dispatches the Carlists before Bilbao have been compelled by the heavy fire of the Republican batteries, to abandon their positions at Portugalete and San Turco. A rumor was current in Madrid on the 26th ult., that the Carlists have asked Serrano for amnesty; it was also reported that they had

released all their prisoners of war. Three million reals intended for the Carlists, have been seized in Santander.

Castelar has written a letter in which he declares himself in favor of a federal republic.

On the 20th ult. the Neva was clear of ice at St. Petersburg, and navigation had been re-opened.

Later advices from Acheen say that the Dutch troops attacked the Acheenese entrenchments near Traton, but were repulsed, losing eight men killed and sixty wounded.

The authorities of San Domingo have removed the flag of the Samana Bay Company and resumed possession of the bay and surrounding territory.

Advices from Hayti are to the effect that a revolution is imminent, and the foreigners were transporting their valuables to the various consulates for safety. The north has its candidate for the Presidency, but it is alleged that there is a determination that General Dominique, the southern candidate, shall be made President whether duly elected or not.

The emancipated peasants of Russia are gradually availing themselves of the privilege of purchasing their homes, with ground attached, secured by the emancipation acts. On 2d mo. 1st last, among twelve millions liberated in the western provinces, 7,058,010 had undertaken the redemption in question. In the government of the east the proportion was still larger.

London 4th mo. 27th. The rate of discount in open market for three months bills is 3½ per cent., which is the same as the Bank of England. Consols 92½ a 92¾. Liverpool. Breadstuffs quiet. Middlings cotton, 8½d. a 87-16d.

**UNITED STATES.**—The bill which passed both Houses of Congress for increasing the issue of U. S. legal tender notes and national bank currency, has been vetoed by President Grant. In his message to the Senate accompanying the return of the bill, he objects strongly to any increase of the paper circulation, and declares that the theory of inflating the currency is a departure from the true principles of finance, national interest and national obligation to creditors. The President thinks measures should be taken to enable the government to redeem its notes in coin at the earliest practicable moment, and with that view advises that the revenues of the country should be increased so as to pay the current expenses, provide for the sinking fund required by law, and also a surplus to be retained in the Treasury in gold.

The veto of this measure has disappointed the expectations of many, but appears to meet with pretty general approval in all the great centres of trade and business.

The interments in Philadelphia for the week ending 4th mo. 18th, numbered 363, and in that ending 4th mo. 25th, 349.

The deaths in New York last week were 439.

An overflow of the lower Mississippi and its tributaries, has devastated extensive districts and caused much suffering to the inhabitants, thousands of whom have been deprived of the means of subsistence. Subscriptions for their relief have been opened in several of the northern cities. The inundated district has about 178,000 inhabitants, and an area of perhaps 5,000,000 acres.

The *National Crop Reporter* estimates the number of sheep to be sheared in Illinois, Indiana, Iowa, Kansas, Minnesota, Missouri, Ohio and Wisconsin, at 11,143,000, against 10,016,000 last year.

The principal buildings of the Columbian Flour Mills, Richmond, Va., have been destroyed by fire, with the machinery and a large quantity of flour and grain. Estimated loss \$500,000.

The Louisville, Nashville and Great Southern Railroad Company, and the Pullman Palace Car Company, have leased the celebrated Mammoth Cave Hotel, and the grounds attached to it, for a period of twenty years, for \$10,000 per annum. They propose to enlarge the buildings and to construct a railroad from Glasgow Junction to the cave.

The Secretary of War asks Congress for an appropriation of \$90,000 to enable him to afford relief to the sufferers by the overflow of the Mississippi. No supplies can be spared from the military stations, and the rations will have to be purchased. The estimate is made on the prospect of feeding 20,000 persons for twenty-five days.

The total exports of wheat and flour from all United States ports, and Montreal, Canada, from 9th mo. 1st, 1873, to 3d mo. 14th, 1874, were equal to 52,927,935 bushels of wheat, an increase over the corresponding period 1872—73, of 23,396,799 bushels.

*The Markets, &c.*—The following were the quotations on the 27th ult. *New York.*—American gold, 113½. U. S. sixes, 1881, Reg. 119¾; Coupons 121½; ditto,

1868, 119½; ditto, 5 per cents, 114½ a 115. Superfine flour, \$5.60 a \$6; State extra, \$6.25 a \$6.65; fine brands, \$7 a \$10.30. No. 1 Chicago spring wheat, \$1.10; No. 2 do., \$1.52; red western, \$1.60 a \$1.62; white Michigan, \$1.80. Oats, 63 a 67 cts. Western mixed corn, 83 a 87 cts.; Jersey yellow, 86 cts.; southern white, 90 a 92 cts. *Philadelphia.*—Middlings cotton, 17½ a 18½ cts. for uplands and New Orleans. Superfine flour, \$5.25 a \$5.75; extras, \$6 a \$6.50; finer brands, \$7 a \$10.50. No. 1 spring wheat, \$1.60 a \$1.63; No. 2 do., \$1.55; western red, \$1.65 a \$1.70; Penna. d., \$1.78 a \$1.80; western white, \$1.85. Rye, \$1.40. Yellow corn, 85 cts.; white, 85 cts. Oats, 60 a 64 cts. Lard, 10½ a 10½ cts. Clover-seed, 9½ a 10½ cts. About 2200 beef cattle sold at 7½ a 7¾ cts. per lb. gross; extra; 6½ a 7 for fair to good, and 6 cts. for common. Sheep sold at 6 a 9 cts. per lb. gross, and hogs at \$8. per 100 lb. net. *Baltimore.*—Choice white wheat, \$1. a \$1.88; fair to prime do., \$1.65 a \$1.80; good to prime red, \$1.75 a \$1.80; common to fair do., \$1.60 a \$1.70. Penna. red, \$1.80 a \$1.82; Ohio and Indiana, \$1.55 a \$1.65. Yellow corn, 82 a 83 cts.; white, 83 a 85 cts. Oats, 60 a 64 cts. *Chicago.*—No. 2 spring wheat, \$1.50. No. 3 do., \$1.19. No. 2 mixed corn, 64 cts. No. 1 oats, 46 cts. No. 2 rye, 92 cts. No. 2 spring barley, \$1.58 a \$1.60. *St. Louis.*—No. 2 winter red wheat, \$1.40; No. 2 spring, \$1.26. No. 2 mixed corn, 67 cts. No. 2 oats, 49 a 50 cts. *Cincinnati.*—Wheat, \$1.40. Corn, 65 a 68 cts. Oats, 48 a 56 cts. Rye, \$1.40. Lard, 10 cts.

#### WESTTOWN BOARDING SCHOOL.

The SUMMER SESSION of the School will commence on Second-day the 4th of Fifth month.

Pupils who have been regularly entered and who come by the cars from Philadelphia, can obtain tickets at the depot of the West Chester and Philadelphia Railroad, corner of Thirty-first and Chestnut streets, giving their names to the Ticket-agent there, who will furnish with a list of the pupils for that purpose. In such case the passage, including the stage fare from the Railroad Station, will be charged at the School, to be paid for with the other incidental charges at the close of the term. Tickets can also be procured of the Treasurer, 304 Arch St. Conveyances will be at the STREET ROAD STATION on Second and Third-days, the 4th a 5th of the month, to meet the trains that leave Philadelphia at 7.50 and 10 A. M., and 12.10 and 2.30 P. M.

Baggage may be left either at Thirty-first and Chestnut streets or at Eighteenth and Market. If left at the latter place, it must be put under the care of H. Alexander & Sons, who will convey it thence to Thirty-first and Chestnut at a charge of 10 cents per trunk, to be paid to them. Those who prefer can pay their baggage sent for to any place in the built-up part of the City, by sending word on the day previous (through the post-office or otherwise) to H. Alexander & Sons, N. E. corner of 18th and Market Sts. The charge in such case for taking baggage to Thirty-first and Chestnut streets, will be 25 cents per trunk. For the same charge they will also collect baggage from other railroad depots, if the checks are left at their office, corner of 18th and Market Sts. Baggage put under their care, if properly marked, will not require any attention from the owners, either at the West Philadelphia depot, or at the Street Road Station, but will be forwarded direct to the School. It may not always be on the same train as the owner, but it will go on the same day, provided the notice to H. Alexander & Sons reaches them in time.

DURING THE SESSION, passengers for the School will be met at the Street Road Station, on the arrival of the first train from the City, every day except First-day and small packages for the pupils, if left at Friend's Book Store, No. 304 Arch street, will be forwarded every Sixth-day at 12 o'clock, and the expense charged in their bills.

Fourth month 20th, 1874.

**FRIENDS' ASYLUM FOR THE INSANE.**  
Near Frankford, (Twenty-third Ward,) Philadelphia.  
Physician and Superintendent—JOSHUA H. WORTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

DIED, near Darlington, Harford Co., Maryland, the 24th of 12th mo. 1873, SARAH W., wife of Samuel W. Maris, in the 50th year of her age.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, FIFTH MONTH 9, 1874.

NO. 38.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

For "The Friend,"

The Heart of Africa, by Dr. Schweinfurth.

(Continued from page 290.)

Towards midday on the 24th they reached Fashoda, and thus after a prosperous progress arrived at the limit of the Egyptian empire. Here they were detained nine days, waiting for the arrival of other boats, and our author took occasion to visit some of the villages of the Shillooks, a tribe of Central Africa, who occupied a territory, extending about 200 miles along the west bank of the Nile. They number about 1,200,000 people, and were then only partially subject to the Egyptian rule—the southern tribes being quite hostile.

Their villages are clusters of huts so closely crowded together as to suggest the resemblance to a thick mass of mushrooms or fungi. The men are entirely naked, excepting a coating of ashes with which they are smeared to protect them from insects. The women wear an apron of calf-skin which is bound round their loins. These people raise oxen, sheep, goats, and poultry, and keep dogs which assist in the chase of wild animals. Their government is very well developed. Every village has its overseer, whilst the overseers of fifty, or seventy, or sometimes of one hundred villages, are subject to a superintendent, who has the control of a district.

Of the natural productions of the country our author remarks: "The acacia groves produce gum in such unlimited quantities that, in the interests of commerce, they are specially worthy of regard. In the winter time, with the greatest ease in the course of a day a hundredweight of this valuable article could be collected by one man. They extend over an area a hundred miles square, and stretch along the right bank of the stream. The kind which is most conspicuous is the *A. fistula*, and which is as rich as any other variety in gummy secretions. I choose this definition of it from its Arabian appellation 'soffar,' which signifies a flute or pipe. From the larvæ of insects which have worked a way to the inside, their ivory-white shoots are often distorted in form and swollen out at their base with globular bladders measuring about an inch in diameter. After the mysterious insect has unaccountably managed to glide out of its circular hole, this thorn-like shoot becomes

a sort of musical instrument, upon which the wind as it plays produces the regular sound of a flute; on this account, the natives of the Soudan have named it the whistling-tree. It yields a portion of the gum known on the exchange as gum of Gedaref. It is often found in lumps as large as the fist; it is rarely colorless, and more frequently than otherwise tinged with the hue of amber.

"Very striking is the sight afforded by the wood of acacias in the months of winter; the boughs, bare of leaves and white as chalk, stretch out like ghosts; they are covered with the empty pods, which cluster everywhere like flakes of snow; whilst the voices of a thousand flutes give out their hollow dirge. Such is the forest of the soffar.

"On the 5th of February we finally left the Egyptian encampment, and directed our course up the stream towards the region of the papyrus. After sailing all night we stopped just short of the mouth of the Sobat, on the right bank close to a forest. The progress of the coming days would lead us through an insecure territory; we wanted to make up our supply of wood, and knew that the hostility of the Shillooks would, in many places, render any attempt at landing on our part unadvisable. Of the boats which were bound for the Gazelle, only one had arrived. In order to render us assistance, the Mudir had charged the owner not to leave my party in the lurch. This circumstance had a very important effect upon my whole journey, as it was the means of introducing me to Mohammed Aboo Sammat, who was proprietor of the boat. This magnanimous Nubian was destined to exercise a very considerable influence on my undertaking, and, indeed, he contributed more to my success than all the satraps of the Soudan. During my land journey I had first made his acquaintance, and now, he invited me to be his guest until he should have accompanied me to the remotest tribes, a proposal on his part which made my blood tingle in my veins. A native of Dar-Kenoos, in his way he was a little hero. Sword in hand he had vanquished various districts large enough to have formed small states in Europe. A merchant full of enterprise, he avoided no danger, and was sparing neither of trouble nor of sacrifice; in the words of the Horaz, 'he explored the distant Indies, and compassed sea and land to escape poverty.' Yet all the while he had the keenest sympathy with learning, and could travel through the remotest countries at the bidding of science to see the wonders of the world.

"We kept quite close to the right bank of the uninhabited quarter, but on the same day we found ourselves in full flight before thousands of the native Shillooks, who, with their light canoes of ambatch, hastened to the bank, and in thick troops prepared to displace us. As fate would have it, just as we were within sight of the dreaded Shillooks, our sailyard broke, and we were compelled to seek the

land. Soon rose the cry, 'They are coming! they are coming!' for in fact we could see them dashing over the stream with incredible celerity, and crowding their canoes as thick as ants. Hardly had we regained our craft, and made some speedy preparations for defence against an attack, when the foremost of the Shillook men, equipped for war, carrying their tufted lances in their hands, showed themselves by the banks which only now we had quitted. Apparently they came to offer some negotiation with us in the way of traffic; but ours was the ancient policy, 'Danaos timentes,' and we pushed on.

"Although, including Aboo Sammat's party, we numbered fully eighty armed men, we could not help suspecting that as soon as the north-east breeze should drop, by whose aid we were going along the stream without a sail, the savages would take advantage of our bad situation and inadequate fighting force to make an attack upon us.

"This fear was not without reason; there were here, at a guess, at least 10,000 Shillooks on their legs and 3000 ambatch canoes in motion on the river. Accordingly we pushed up the stream, and had an opportunity, from a more secure neighborhood, to observe the Shillooks more accurately. My telescope aided me in my investigation. I saw crowds of men violently gesticulating and contending; I saw women burdened with baskets loaded with poultry clapping their wings. After a while the Shillooks, disappointed, began to vacate the bank which we had left, and on the river could be seen a redoubled movement of the canoes, whilst opposite fresh multitudes poured in, and gave to the whole scene the appearance of a general emigration of the people.

"Within the last three years the boats had been permitted with reluctance, and only when several were together, to approach the shore at this part of the stream, for here it had happened in one single season that five vessels, the property of Khartoom merchants, as they were coming down the river laden with ivory, were treacherously attacked one after the other. The stratagem was employed of diverting the attention of the crews by an exhibition of attractive merchandise; while the Nubians were off their guard, at a given signal the Shillooks fell upon them and butchered them without exception. Gunpowder, rifles, and valuable ivory, all fell into their hands; the vessels they burnt. Ghattas himself, the merchant who owned the vessel by which I was travelling, suffered the loss of a costly cargo, while eighty men on that occasion met with a violent death. Only the Reis and one female slave escaped to Fashoda. Betimes they threw themselves into the water, and concealing their heads with some water weeds, floated on till the stream carried them out of the reach of harm.

"On the following morning, after we had passed the mouth of the Giraffe river, we were joined by a flotilla of six boats. As we reckon-

ed now nearly 350 armed men, we felt that we could venture without risk to enter upon commercial transactions with the Shillooks. The disturbed condition of the country had interfered to prevent them carrying about their merchandise as usual, and they now were collected in unusual numbers at the mart.

"A mile away from the river-bank there were rows of dome-palms bounding a broad level, on which was exhibited all the liveliness of ordinary market-clatter. Busy and bustling, there were thousands congregated together; but the fear this time was not on our side. From far and near streamed in the natives; many brought baskets full of corn, eggs, butter, beans, and ostrich feathers; others offered poultry, tied together in bunches, for sale: there was altogether the bustle of such a market as only the largest towns could display. The area was hemmed in by a guard of armed men, whose lances, like standing corn, glittered in the sun. The sense of security raised the spirits of the light-hearted sailors, and their merry Nubian songs rose cheerfully in the air. Two hours slipped quickly away, while the necessary purchases were being made, the medium of exchange being white or red glass beads. Soon afterwards a favorable breeze sprang up. Everything was still active in the market; fresh loads came teeming from the villages; the outcry and gesticulations of the market people were as excited as ever, when suddenly there boomed the signal to embark. The confusion, the noise, the hurry which ensued baffle all description; the Shillooks were in a pause, and, imagining that it must be all up with them, scampered off and jostled each other in every direction."

(To be continued.)

For "The Friend."

### Memoirs and Letters of Sarah Hillman.

(Continued from page 274.)

The manuscripts yet remaining of Sarah Hillman are confined exclusively to letters to her friends. It is proposed to make a few selections from these before concluding the "Memoirs."

"*Philada. 3d mo. 26th, 1840.*—Truly the enemy of all righteousness is seeking to lay waste the whole heritage; but I believe He who is mighty to save will arise and put a hook in his jaws, and say to his oppressed little ones, 'Fear not, I am thy salvation.' Sure I am that our Redeemer is mighty, the Lord of hosts is his name; He will yet be jealous for his land and pity his people, and when the full time is come, such as have been seeking to overturn, and to lay waste, and to pull down, and to set up a worship of their own making, will be made to feel as the Babel-builders of old, when they were confounded in their purpose, and could not understand each other's language, yea the day cometh when they shall be driven, I believe, unless they repent and return, as a rolling thing before the whirlwind.

The prospect of a Yearly Meeting under such circumstances is not without many fears for the precious cause; and well knowing my own unworthiness I can hardly tell thee how very low my spirit sinks; but am sometimes strengthened to desire that I was more worthy to share in the sufferings of this day of exercise, and more worthy too, at the moving of the Divine finger, in the might He gives

when He says, 'Go in this thy might,' to follow Him wheresoever He leads.

Well then, seeing that we have known that from Him cometh our salvation, let us not grow weary of suffering, nor faint in our minds, for though the mountains may depart and the hills be removed, we have the unshaken assurance, 'my loving-kindness shall not depart from thee, neither shall the covenant of my peace be removed, saith the Lord that hath mercy on thee.'

Ah then, dear friends, let us gird up the loins of our minds, be sober, and hope to the end, for the grace that is to be brought unto us at the revelation of Jesus Christ. When he veils his face and seems to be clean gone for ever we cannot but mourn; nevertheless at every renewed revelation of himself in the secret of our souls, as we thus abide patient in waiting, we shall be prepared to acknowledge, 'This is He, this is He, whom my soul loves, the chiefest of ten thousands, the altogether lovely. This is the Lord, we have waited for him, and He will save us; we have waited for him, we will be glad and rejoice in his salvation.'

"*Philada. 3d mo. 19th, 1841.*—Thou hast certainly judged truly that I find it not easy to bear hardness, and yet if I know my own heart, I do crave mercy to be found faithful, let the sufferings be never so many, the reproach never so great. The day is coming when it will be seen who they are that have been on the side of Jesse's favored Son, and who have turned aside after vanity. Well will it be for all those who have kept their first love, who have retained their greenness, who receiving their sap from the Living Head, and abiding in the Vine, are found fruit bearing branches to his praise.

I apprehend there never was a day when there was more need to repair to the stronghold, the strong Tower, the Fortress, the everlasting Foundation, than in this day; nor of watching unto prayer, that so we may keep unspotted our garments, yea keep our habitation in the truth; yet surely 'He who was, and is, and is to come,' will keep Israel, as the apple of his eye. His promises are yea and amen forever, and of the increase of his government and peace there shall never be an end. 'Fear not,' says He, to 'worm Jacob, I will strengthen thee, yea, I will help thee, yea, I will uphold thee with the right hand of my righteousness.'

Poor as is thy friend who now addresses thee, the very prayer of my spirit is to be enabled more and more to cast all my care upon this ever living, ever present Helper of his people, who knoweth our frame, and remembers that we are dust, and therefore in his unutterable mercy breaks through the clouds at seasons, in his own time and way, and so shines upon our otherwise dark and dreary lonely way, as to cheer and animate our poor souls, still to pursue though faint, the mark for the prize, the path He marked by his sufferings unto death, and is now by his blessed Spirit leading his faithful sons and daughters into his everlastingly glorious kingdom.

Are we so happy as to be heirs with those who have gone before us? The time to some of us may be very near; and what a speck at the longest, life is, compared with the countless ages of eternity! How glorious then will be the recompense for years of sorrow here; even joy unspeakable and full of glory, world without end.

\* \* \* Truly I feel the need of the sympathy of such as can feel for the trials of the day of treading down. It seems to me the poor servants who have to blow the trumpet on the holy hill, may now if ever, adopt the language formerly uttered, 'We are accounted as the offscouring and refuse in the midst of the people;' nevertheless there is something within that does keep from sinking, and at times the blessed assurance is, 'Jerusalem shall be inhabited again as towns without walls,' &c., and 'my people shall dwell in sundered dwellings, and quiet resting places, when I shall hail, coming down on the forest, and the city shall be low in a low place.'

We had a good Quarterly Meeting; a fresh evidence was then granted that the glory not wholly departed, and my faith has been and is, that it never will; but that *there will be brighter days to this people.* I may not live to see them, but it seems to me children unborn will; when there shall come many people and strong nations, who under a conviction of the blessedness of the Truth itself, and of the doctrines and testimonies thereof held and promulgated by George Fox and his contemporaries of that day, and by all their faithful successors since up to this day, will shall have to say as a poor Indian woman whom C. Healy had visited said, 'What we have heard this day is the eternal truth of God.' And as some formerly said, 'We will go with you, for we have seen that God is with you.'

May we each be found faithful at our post, saith my soul, that we may be favored in the conclusion of all things here below, to hear the welcome salutation, 'Come ye blessed of my Father, inherit the kingdom prepared for you from the foundation of the world.'

"*Philada. 5th mo. 31st, 1841.*—I ventured to inform my friends on Third-day last, whither my spirit was pressed to go, which is no less than to the Yearly Meeting of New England; this thou wilt feel to be no light or easy matter to me; some may perhaps say it is only a made up concern, as dear E. Pitfield is similarly circumstanced, and was by wome Friends united with before I opened my prospect, which was without any reference to her concern at all, not having known that she had any such view, until I had suffered so much for my rebellion, as to be made willing, to resign all up if so be hope might again spring up.

We went together into the men's meeting and were set at liberty. Whilst we staid dear J. Snowden who knew not, I believe, of our prospect, expressed a willingness to accompany us. Very cordial to us was this offer and which was united with by the meeting. So we three poor pilgrims are banded together and emphatically going forth 'lowing as we go;' yet under a sensible concern that the arrival of the testimony may not fall into the hand of the uncircumcised; and assured in the belief that they with whom it resteth, wherever they are or however proved, will be blessed.

I doubt not our lot will be by the bitter waters of Marah; but so that we are only in our lot, it matters not whether it be a lodge in a garden of cucumbers, or as a besieged city, if we faint not; whether sitting in deep humiliation as Mordecai at the gate bewailing our own desolate condition, and the jeopardy of our people; or enjoying more sensible evidences of the Divine mercy and lovingkindness, all is acceptable to Him who is Lord of

ords and King of kings, He truly needeth not as nor any of our poor works to add to his glory or perfections, yet nevertheless it hath pleased him, from very early days to make use of means to work his own ends. Shall the thing formed say to Him, What makest thou? Ah no! rather, here am I Lord, do with me as seemeth good unto thee.

Truly there is no cause to mourn, but rather to rejoice in the blessed foretaste of that joy unspeakable and full of glory, which in fruition they who have been faithful in their generation now enjoy. For,

'Soon shall close our earthly mission,  
Soon shall pass our pilgrim days,  
Hope shall change to glad fruition,  
Faith to sight, and prayer to praise.'

(To be continued.)

### Commercial Mania.

In 1711, six years before Law's Mississippi Company was formed, Robert Harley, Earl of Oxford and Lord Treasurer, procured an Act of Parliament, appointing that, "to the intent that the trade to the South Sea be carried on for the honor, and increase of the wealth and riches of this realm," a company should be formed with the exclusive privilege of trading, colonising, and fighting in the southern seas, and along the whole western side of South America. The members of this South Sea Company were to be the holders of the Government bonds for the National Debt, then amounting to nearly £10,000,000, the interest of which, if not the principal, it was thought could easily be paid out of the profits of commerce with the gold and silver districts of Peru and Chili. After the company was formed, it transpired that the King of Spain claimed more than a fourth of their profits for permitting English merchants to deal with his colonists, and then only sanctioned their sending one shipload of negroes every year; but even with this limitation great benefits were anticipated, especially as the English reckoned that, if they were only allowed to trade at all, they could make the trade as extensive as they liked. The preparations were tardy, and the first vessel did not leave England till 1717; then the war with Spain, which broke out in the following year, made orderly commerce with Chili and Peru impossible.

But before this the South Sea stock-holders discovered that South Sea traffic was an unimportant part of their enterprise. From the first, the new company was in favor with the public, and a busy trade was carried on in its shares. The Mississippi Company, started in Paris in 1717, showed how this trade might be augmented. The South Sea Company offered to increase its capital, and so be able to lend £2,000,000 to the State, and the Bank of England, stirred up to rivalry, made a similar offer. A fierce war was carried on between the Bank and the Company during more than two years, and, in their efforts to outbid one another with the government and the country, a turmoil of stock jobbing was engendered, which received no check from the wretched failure of the Mississippi scheme in 1719. By the commencement of 1720 the South Sea stock had risen nearly two hundred per cent. in value, and all that its holders desired was, by promises that could not possibly be realized, to raise the value yet more, and so to sell their shares at great profit. In this they succeeded for a time. The Company triumphed over the Bank. In February, 1720,

a bill was brought into Parliament, authorizing it to take upon itself the whole national debt, growing rapidly, and then exceeding £30,000,000, and the bill became a law in April.

In vain Sir Robert Walpole warned the country that "the great principle of the project was an evil of first-rate magnitude. It was to raise artificially the value of stock, by exciting and keeping up a general infatuation; and, by promising dividends out of funds which could never be adequate to the purpose, it would hold out a dangerous line to decoy the unwary to their ruin, by making them part with the earnings of their labor for a prospect of imaginary wealth." The warning was unheeded. The madness of speculation that had just ruined France had seized England, with nearly equal violence.

The South Sea mania, rampant in February, 1720, increased till August, when each £100 share was worth £1,000. 'Change Alley, swarming with professional and amateur stock jobbers of every rank and of both sexes, was aptly compared by Swift to a gulf in the South Sea.

"Subscribers here by thousands float,  
And jostle one another down,  
Each paddling in his leaky boat,  
And here they fish for gold, and drown."

Humbler poets described the mania in street ballads and coffee-house epigrams without number. One said—

"Then stars and garters did appear  
Among the meaner rabble,  
To buy and sell, to see and hear  
The Jews and Gentiles squabble.

"The greatest ladies thither came,  
And plied in chariots daily,  
Or pawned their jewels for a sum  
To venture in the Alley."

The South Sea bubble was only the greatest among a crowd of great bubbles. The older companies shared in the brief show of imaginary prosperity. East India Stock, worth £100, rose to be worth £45; and African Stock, advanced in value from £23 to £200. There is extant a list of nearly two hundred principal bubble companies started in this year of bubbles, their nominal capital varying from £1,000,000 to £10,000,000 apiece, and the total of the whole exceeding £300,000,000. "Any impudent impostor," says the contemporary historian, "whilst the delusion was at its height, needed only to hire a room at some coffee-house or other house near Exchange Alley for a few hours, and open a subscription-book for somewhat relative to commerce, plantation, or some supposed invention, either hatched out of his own brain or else stolen from some of the many abortive projects of former times, having first advertised it in the newspapers of the preceding day, and he might in a few hours find subscribers for one or two millions, in some cases more, of imaginary stock. Many of these very subscribers were far from believing those projects feasible. It was enough for their purpose that there would soon be a premium on the receipts for those subscriptions, when they generally got rid of them in the crowded alleys to others more credulous than themselves." One company, with a capital of £3,000,000, was "for insuring to all masters and mistresses the losses they may sustain by servants;" another was "for furnishing merchants and others with watches;" a third, with a capital of £1,

000,000, was "for a wheel for perpetual motion;" a fourth was for making salt water fresh; a fifth was "for planting mulberry-trees and breeding silkworms in Chelsea Park;" and a sixth was designed "to import a number of large jackasses from Spain, in order to propagate a larger kind of mule in England"—as if there were not already jackasses enough in London. So preposterous were many of the genuine projects, that it is hard to say whether it was in jest or in earnest that an advertisement was issued announcing that "at a certain place, on Tuesday next, books will be opened for a subscription of £2,000,000 for the invention of melting sawdust and chips, and casting them into clean deal boards, without cracks or knots." Another advertisement invited speculators to pay £2 as a deposit on each of five thousand £100 shares in "a company for carrying on an undertaking of great advantage, but nobody to know what it is," the remaining £98 for each share being due in a month's time, when the details of the scheme were to be published. The name of the promoter of this secret company was never known, but his advertisement drew so many adventurers on the appointed day that in less than six hours he had received a thousand deposits of £2 each. With that success he was satisfied. Instead of waiting for another day, in which his transparent fraud might be exposed, he pocketed the £2,000, and decamped the same night.

The South Sea mania lasted a shorter time and had fewer victims in England than the Mississippi mania in France; but it was great enough to prove a source of ruin to hundreds of thousands, and of serious national discredit. During eight months every coffee-house was a stock exchange, subject to no laws of honesty, and swayed by rampant folly; and the milliner's shops were put to like uses by those ladies who could not stand the crush of the men's meeting-places.

Quarrels among the South Sea directors opened the eyes of the public, and the great bubble and all the lesser bubbles suddenly collapsed. Early in August, 1720, the South Sea shares were bought eagerly for £1,600 apiece; late in September they could not be sold for £150. George I., then in Hanover, hurried back to England. Parliament made a searching inquiry into the state of affairs. Many ringleaders of the fraud were severely punished; and efforts were made to lessen the misfortunes of those whom they had beguiled. In February, 1721, the chief culprit, Aislaby, the Chancellor of the Exchequer, who had used his official position to inflate the bubble, was committed to the Tower of London, and a huge bonfire on Tower Hill showed him, on the first night of his captivity, what sort of vengeance the London mob would have been glad to execute on him and his accomplices. Great injury was done to multitudes, and the commerce of the country was crippled during many years.—*Bourne*.

How much we are called to suffer as well as do—the will of God. When I have bid one of my children sit down quietly and remain silent during my pleasure, I enjoin him a much more difficult task than the most active service; and yet I expected it to be done because I ordered it. How is it, that I have not yet learned to sit still when I am bid.—*Cecil*.

For "The Friend."

Although the following was written for those whose modes of worship differ materially from that of Friends, yet the latter may take some useful hints from it, and profit from them.

## "LONG PRAYERS NOT MOST BENEFICIAL."

The Saviour said, When ye pray, use not vain repetitions; which is often neglected, particularly in prayer after sermons at funerals, when the bereft family are remembered. Certain passages are sometimes gone over four or five times which might be summed up so that one or two repetitions would be preferable, and answer every purpose, save time, and not weary the congregation. It is also often the case in regular church service while in the act of prayer to step from prayer to an admonition, and thus speaking to the congregation instead of prayer, thereby taking up much time, weary the people, and cause them to speak unfavorable of us.

It is true all conditions of men should be remembered in our prayers; but we should try and sum them up in as few words as possible, and remember that the Saviour said, Your Father knoweth what things ye have need of before ye ask him. The reason of writing the above is because we now and then hear it said, and not without truth, O, he takes up too much time in prayer, forgets himself, and falls into preaching. This should be avoided as much as possible. I am not speaking of any certain individual, but mean all.

May God pardon all our shortcomings, grant us mercy, and receive us in grace for Jesus' sake."—*From the Herald of Truth.*

*Use of Tobacco.*—Tobacco belongs to the class of narcotic and exciting substances, and has no food value. Stimulation means abstracted, not added force. It involves the narcotic paralysis of a portion of the functions, the activity of which is essential to healthy life. It will be said that tobacco soothes and cheers the weary toiler, and solaces the overworked brain. Such may be its momentary effects, but the sequel cannot be ignored. All such expedients are fallacious. When a certain amount of brain-work or handwork has been performed, nature must have space to recuperate, and all devices for escaping from this necessity will fail. It is a bad policy to set the house on fire to warm our hands by the blaze. Let it, then, be clearly understood that the temporary excitement produced by tobacco is gained by the destruction of vital force, that it contains absolutely nothing which can be of use to the tissues of the body. Tobacco adds no potential strength to the human frame. It may spur a wearied brain or feeble arm to undue exertion for a short time, but its work is destructive, not constructive. It cannot add one molecule to the plasm out of which our bodies are daily built up. On the contrary it exerts on it a most deleterious influence. It does not supply, but diminishes, vital force. It has been denied that tobacco leads to organic diseases, but the evidence is very strong the other way, and it would be very remarkable if continued functional derangement did not ultimately lead to chronic derangement of the organs; that it causes functional disturbance, no one dreams of denying; indeed, it has been remarked that no habitual smoker can be said to have a day's perfect health.—*Popular Sci. Monthly.*

## SHINING STARS.

Shine, ye stars of heaven,  
On a world of pain!  
See old Time destroying  
All our hoarded grain;  
All our sweetest flowers,  
Every stately shrine,  
All our hard-earned glory,  
Every dream divine!

Shine, ye stars of heaven,  
On the rolling years!  
See how Time, consoling,  
Dries the saddest tears;  
Bids the darkest storm-clouds  
Pass in gentle rain,  
While uprise in glory  
Flowers and dreams again!

Adelaide A. Proctor.

## SPEAK NO ILL.

Nay, speak no ill; a kindly word  
Can never leave a sting behind;  
And, oh, to breathe each tale we've heard  
Is far beneath a noble mind;  
For oft a better seed is sown  
By choosing thus a kinder plan;  
For if but little good we've known,  
Let's speak of all the good we can.

Give me the heart that fain would hide,  
Would fain another's fault efface:  
How can it please our human pride  
To prove humanity but base?  
No! let it reach a higher mode,  
A nobler estimate of man:  
Be earnest in the search of good,  
And speak of all the best we can.

Then speak no ill, but lenient be  
To others' feelings as your own;  
If you're the first a fault to see,  
Be not the first to make it known.  
For life is but a passing flood;  
No lip can tell how brief the stay:  
Be earnest in the search of good,  
And speak of all the best we may.

Living Words.

Selected.

Probably the oldest timber in the world which has been subjected to the use of man, is that which is found in the ancient temples of Egypt. It is found in connection with stone work which is known to be at least four thousand years old. This wood, and the only wood used in the construction of the temple, is in the form of ties, holding the end of one stone to another in its upper surface. When two blocks were laid in place, then it appears that an excavation about an inch deep was made in each block, into which an hour-glass shaped tie was driven. It is therefore very difficult to force any stone from its position. The ties appear to have been the tamarisk, or shittim wood, of which the ark was constructed, a sacred tree in ancient Egypt, and now very rarely found in the valley of the Nile. These dovetailed ties are just as sound now as on the day of their insertion. Although fuel is extremely scarce in that country, these bits of wood are not large enough to make it an object with Arabs to heave off layer after layer of heavy stone for so small a prize. Had they been of bronze, half the old temples would have been destroyed ages ago, so precious would they have been for various purposes.—*E. Post.*

Do not err, my beloved brethren, "for the wrath of man worketh not the righteousness of God." It is easy to lash vice with an unsparing hand, and to speak severe and cutting things against delinquents; but I question much, if a single soul was ever yet thus driven into the fold of the good Shepherd.

*Fog-Signals.*—Prof. Joseph Henry, chairman of a committee on fog-signals, has communicated a number of interesting observations made by him on the phenomena of sound as relating to the subject in hand. In studying the subject of fog-signals it becomes a question of importance to ascertain whether waves of sound, like those of light, are absorbed or stifled by fog. On this point observers disagree; and to settle this point definitely, the assistance of the pilots of the boats running between Boston, and St. John, New Brunswick, has been secured, and they have promised to note the actual distance of a body from a given fog-signal when the sound is first heard on approaching, and again when it is lost on receding from it. Professor Henry considers it highly probable that fog does somewhat diminish the penetrating power of sound, but only to an exceedingly minute degree. Among the principal causes of the diminution in this penetrating power are enumerated, the varying density of the atmosphere, the direction of the wind, and the reflection of the sound wave from the neighboring objects, such as hill-sides, forests, houses, &c. According to General Duane, it appears that although a reflector, in the focus of which a steam-whistle or ordinary bell is placed, reflects the sound a short distance, it produces little or no effect at the distance of two or three miles. In the case of signals that were sounded at the side of a bank with a large house directly in the rear, the roof of which would tend to deflect the sound forward, it was shown that this sound shadow vanishes at the distance of a mile and a half or two miles, and that at the distance of three miles the sound was quite loud. The fog-signals have frequently been heard at the distance of twenty miles, and as frequently cannot be heard at the distance of two miles, and this with no perceptible difference in the state of the atmosphere. This case, although quite abnormal, seems to be sufficiently well authenticated to justify its publication under the authority of the Lighthouse Board. The instruments employed as fog-signals by this Board are mainly three, all constructed on a principle of resounding cavities, in which the air is the sounding body. These instruments are, first, the reed trumpet, the air being condensed by a caloric engine; second, the siren trumpet, the revolving disk, being driven by steam from a high-pressure boiler; third, the ordinary locomotive whistle, blown by steam from a high-pressure body.—*Harper's Magazine.*

For "The Friend."

Hints upon the Influence of the Spirit of Truth in the near prospect of Judgment and Eternity, with a letter from her Mother; from a Memoir of Deborah Backhouse.

Solemn are the admonitions of the apostle: "If judgment first begin at us, what must the end be of them that obey not the gospel of God? And if the righteous scarcely be saved, where shall the ungodly and the sinner appear?" As a deduction from which, W. Penn in his "No Cross No Crown," says, "The very righteous must have a trial for it." When we consider the majesty of that Almighty Power which created us for the purpose of His own glory; the blind, sin-prone, and lost condition which we alike inherited by the fall; the richness and greatness, and unspeakable value of the price paid for us, whereby "a new

and living way" is consecrated for us through the Redeemer's flesh; the sanctifying authority and power of the Holy Spirit, or the Light of Christ manifested in the heart, to teach us all things, bring all things needful to our remembrance, and to guide into all truth; and when the truth that at the awful assize, God will be no respecter of persons, but that each and every must reap what they sow, and all sects and names be embraced in two classes, the wise and the foolish, "him that serveth God, and him that serveth him not;" it becomes a matter the most serious and momentous that can claim our attention, whether we have yielded obedience to the light of the Lord Jesus, which, says George Fox, is the first step to peace; whether we have known judgment to pass upon the transgressing nature, through submission to the Saviour's one saving baptism—the washing of regeneration and the renewing of the Holy Ghost; whether we have experienced repentance from dead works to serve the living God; and whether, with Peter, we have been experimental witnesses of Christ's words, "If I wash thee not, thou hast no part with me:" whose coming also is represented to be "like a refiner's fire, and like fuller's soap."

This way, or these requisitions may seem hard and repulsive to flesh and blood; as well as to those captivated by fleshly lusts and affections; and may no less be striven against, if not turned from by those who would have an easy way to peace and heaven; saying in effect, "to the seers, See not; and to the prophets, Prophecy not unto us right things; speak unto us smooth things, prophesy deceits," &c. But ever true, nevertheless, must remain that which is written: "There is a path which no fowl knoweth, and which the vulture's eye hath not seen," &c. Which ever straight and narrow path, none can see, or know, or understand, neither walk in, except those who have submitted themselves to the Saviour, and having felt that they are "wretched and miserable, and poor, and blind, and naked," in their natural, unrenewed state, are engaged to buy of Him "gold tried in the fire," and white raiment," and the eye-salve of the kingdom that they may be rich, and clothed upon, and enabled to see of the things that belong to their peace. Christ Jesus became the author of eternal salvation to all *them that obey Him*; and these are they who take His yoke upon them and learn of Him who was meek and low of heart, unto His unchangable kingdom of rest and unfailing joy.

This was no doubt the experience of the precious subject of the Memoir now being extracted from. She was brought to feel that she was nothing, and could do nothing for the cause of her Lord and Master,—such was her sense of her own sinful and lost estate,—without that submission to His convicting, teaching, all-sufficient grace, which He declared to His apostle is *made perfect* in our weakness. Hereby and through His continued help and blessing, who is the resurrection and the life, she became strong in the Lord and in the power of His might; and qualified not only to uncover her anointed head in the assemblies of His people, but to comprehend and faithfully to stand for the doctrines and testimonies of Truth as committed to us to uphold. And we have no doubt, that when the messenger of death came, she had her loins so girt and light burning as to be ready; and received

the end of her faith, even the salvation of her soul.

The Memoir states that she extended suitable advice to the young woman who had the care of her children; reminding her of the necessity of a daily attention to the dictates of the Spirit of Truth in her own heart, as *the only means of preparation* for rightly doing her part, in watching over and instructing them. She then had these dear little lambs brought in, kissed them, and took an affectionate leave of them; calmly enquiring of the elder, if she knew that dear mother was going to leave her; and expressing a hope that she would be a good girl, and mind what her dear father said; and then she would be very comfortable and happy. She then, in an affecting manner, commended them to Divine protection and regard; and to the care of those with whom they were left.

She again adverted to the important station of parents; saying, she had never felt it so weightily before; that much, very much, depended upon their endeavors to bring up their children in the fear of the Lord, *setting them a good example*; and not only closely watching over their minds, but checking and restraining them, *in every thing* that would have a tendency to injure their minds, or to lead them from the simplicity of the Truth.

She mentioned, with humble gratitude, the care of her own dear mother; and how remarkably it had been blessed to all her family, and had been a means of great preservation to herself; she having had strong inclinations toward many things of a wrong tendency, which would have led her from the Truth: adding, that she considered the care, counsel and restraint of her dear parent, had been an unspeakable favor to her, and a great help in turning her to the right way. She appealed to her sisters, who stood by, saying: "My precious sisters can, I know, add their testimony to her excellent example, watchful concern, and prayers on our behalf; and that she desired for us heavenly riches, far before any thing of a worldly nature."

In an addendum to this little Memoir, we have an extract from a letter of her mother, Elizabeth Lowe, to D. B. when about fifteen years of age, while on a visit to some of her relations. Its precepts savor of old fashioned religious experience, and old fashioned Quakerism. It is as follows:—

"My dear Deborah,—As thou art now separated from me, I have several times thought I would take up my pen, and express to thee the anxious solicitude I feel, that thou mayest now, in early life, seek to *know the inward revelation* of Christ; who assuredly is nigh to teach thee, if thou art but attentive to his voice; and who is a swift witness against all kinds of evil, well knowing the most secret recesses of our hearts; therefore, my beloved child, be attentive to *all his reproofs*, and remember for thy encouragement, that 'the reproofs of instruction are the way to life;' which means endless life.

I now remember, when young, feeling remorse for offences committed; and it came with consolation into my mind: 'There is joy in heaven over one sinner that repenteth, more than over ninety and nine just persons that need no repentance;' and as we have 'all sinned and fallen short of the glory of God,' so all must know a repenting and forsaking of evil, be it of what kind it may, before there can be a full acceptance into his favor.

The words of the woman of Samaria are illustrative of the inward workings of Christ in the heart, when she expresses herself on this wise: 'He told me all that ever I did; is not this the Christ?' so does the revelations of his Spirit in our hearts, bring before us all our wrong thoughts and actions; and as there is a giving way to this Reprover, it also gives power to forsake and overcome every thing that is wrong. Now my dearly beloved child, this is worth attending to, therefore do not put it off; for an early sacrifice is acceptable to the Almighty. I do long that thou mayest seek the Lord for thy portion; for though He may appear first as a Reprover, yet as thou submittest to his chastening power, He will afterwards afford thee a degree of that peace, which self-gratification can never give.

My pen is not equal to set forth the desire I feel, that thou mayest seek to know and be acquainted with, this inward principle of Light and Life, now in early youth; that thou mayest be taught thereby, and enabled to take up thy cross and follow Christ; which is *the only way*, remember, to be his disciple, and thereby, at last, to be made an inheritor of that kingdom, whereinto nothing that is impure or unholy can ever enter. It is not a day to look out at the example of others; therefore, I entreat thee, turn thy attention *inward*, and wait in our religious meetings, to feel the actuating of this inward principle which will teach thee what to do or leave undone; and as thou becomest obedient thereto, *thou wilt be taught* by little and little, and have to acknowledge, in the secret of thy heart, that the ways of the Lord are ways of pleasantness, and all his paths peace; *for by this means*, his yoke will become easy and his burden light. Thy very affectionate mother,

E. LOWE."

(To be concluded.)

#### The Voracity of Insect Life.

Some interesting information relating to the ravages of insects was given, says the London Times, by C. O. Groom Napier to the House of Common's Committee, of last session, on the protection of wild birds. In 1782 the caterpillars of the brown tail moth were so numerous as to defoliate the trees of a very large part of the south of England. The alarm was so great that public prayers were offered in the churches that the calamity might be stayed. The poor were paid one shilling per bushel for collecting caterpillars' webs, to be burned under the inspection of the overseers of the parish; and four score bushels were collected daily in some parishes. The brown tail moth is a beautiful little white insect, about an inch in expanse of wings. C. Napier noticed that in 1853 it defoliated about twenty feet of a hedge near Parkstone, Poole, and in 1855 the caterpillars riddled and deprived of their leaves two plum trees in his garden at Lewes, one of which died. The caterpillar of the gamma moth is one of the most injurious to garden plants. It principally feeds at night, and concealing itself by day, is unperceived. The gamma moth overran France about a century ago, and devoured a very large proportion of the crops, but, fortunately, the corn was not attacked. The antler moth is sometimes extremely destructive to grass crops. C. Napier once saw millions of these on the Wrekin, and in the following summer the grass of that mountain was in a miserable state. The lackey moth

is very destructive to filbert plantations, cherry orchards and other tree plantations. The buff tip, the cabbage moth and the small ermines are very destructive to the leaves of fruit trees and garden shrubs.

But, on the other hand, the benefits derived from the labor of some insects should not be overlooked; some species feed only on noxious weeds, and others prey on still more noxious insects. One of the greatest friends of the agriculturist is the family of the ichneumon flies, which lay their eggs in bodies of living caterpillars, in which they are hatched, thus destroying them; although the caterpillar, after being "ichneumon," has still a voracious appetite. The caterpillars which feed on the cabbage eat twice their weight in a day; the larvæ of some of the fleck flies eat a much larger proportion than this. The productive powers of insects vary very much. Some lay only two eggs; others, such as the white ant, 40,000,000, laying them at the rate of sixty a minute. The queen of the hive bee is capable of laying 50,000 in a season; the female wasp 30,000. The majority of insects, however lay but about one hundred; in general, the larger the insect the fewer eggs it lays. Most insects have two generations in the year; some have twenty; others take seven years from the time the egg is laid until their death in a perfect state. But probably not above five per cent. of the eggs laid become perfect insects.

Of its kind the daddy-long-legs is one of the most destructive, especially in France. It feeds on the roots of grass, and C. Napier, in 1859, noticed meadows in La Manche devastated by it. The starling is a bird most useful in destroying these larvæ, and those of the horse and cattle flies. The orthopteron insects, of which the locust, grasshopper and cockchafer are examples, are very destructive. The numerous species of grasshoppers lessen the amount of our grass crops. Locusts are seldom found in England now in sufficient numbers to do any damage, but they have done considerable damage here in former generations. Their greatest enemies are the starling and the rose-colored pastor, which follow them in flocks and decapitate them by hundreds. The beetles are immensely numerous, as regards species. In 1574 the cockchafers gathered in such numbers on the banks of the Severn as to prevent the working of the watermills.

On another occasion, in Galway, they formed a black cloud that darkened the sky for the distance of a league, and destroyed the vegetation so completely that summer seemed turned into winter. They made a noise resembling the sawing of wood. The people threatened with famine, were obliged to devour them. In 1804 they were alarmingly numerous in Switzerland. The female lays about thirty eggs; in six weeks they are hatched. They live from three to four years in the larvæ state. The first year they do not do a great amount of damage; but in the second they attack the roots of all plants within their reach. They often ruin the crops of corn, lucerno, strawberries, and various plants on which man depends for food. Our insectivorous birds are diligent in destroying the larvæ of insects, but they will not do all that is required; hand labor is also needed.

C. Napier is of opinion that the extensive diffusion of information on the habits and means of destroying our more noxious insects

would be the means of saving millions of pounds' worth of valuable food every year. He says that in the United States the importance of this subject is felt, and almost every State has a government entomologist, whose business it is to make inspections and reports of the ravages of insects, and show the remedy. In France, government returns were published, from which it appeared that the damage done in Normandy by the cockchafer alone, amounted to 25,000,000 francs. A law was passed in France a few years since for the protection of birds. Not, however, that all birds are to be welcomed; the sparrow does more harm than good, by feeding so much on green crops, and the wood pigeon does much mischief. But, on the whole, C. Napier is certain birds do a great deal more good than harm.—*Late Paper.*

For "The Friend."

John Heald.

(Continued from page 293.)

The next letter of J. Heald's to his Philadelphia friend, was written 4th mo., 1824, at a time when the exercised members of our Society in these parts, were brought into much trouble by the unsettlement and disunity which preceded the separation of 1827. The humility and inwardness of mind which he advises, are needed now as well as then. The following passages are extracted from it. After alluding to the unsettled state of Society, he says:

"How good would it be, if due heed had been given to the principle of our profession; how certainly it would lead into a quiet reliance on the all-sufficiency thereof. There would be enough found to do in an humble, attentive, watchful state of mind, to shun the snare of a crafty adversary, and fulfil required services in such a manner as not to do too much, nor yet too little. Those who have honestly endeavored to fulfil their duty, if it has fared with them as it has with me, I think must know, that though they have intended to be watchful and obedient, yet for want of a more devoted, humble care [they] have felt secret compunctions for doing more than should have been done at one time, and the like for doing less than should have been done at another time. I greatly fear that some, if not many, by trusting too much to the powers of human reason, have left the safe guide, and attempted to fathom that which to them was unfathomable, and whatever they might have been enabled to comprehend, had they been faithful in their own proper places, laboring carefully in that they knew. It undoubtedly requires great care in such as go into great depths, even where they are rightly led; and how very humbling will it be to them, and how fearful will they be of being exalted. Witness Paul's petitions for preservation when through the abundance of revelations, he feared being exalted above measure, and thrice interceded that it might depart from him. But how readily some can enter into abstruse difficulties, and attempt to comprehend much, so that they may pass for wise, while they overlook or neglect that they do (or might) know, and would profit by doing. To keep a single eye to the safe guide, I think to be the great principle of our profession, or, it is keeping to our great and high profession to singly follow our safe inward guide: this leads into quietness and stillness, not into bustles and confusion. Those who keep to this guide find

enough to attend to, and are humbled under a sense of the surrounding dangers, and are thereby induced to greater care and watchfulness. As this tends to their safety, so it tends to deepen them in true religion, while those who leave the guide, become vain in their imaginations, losing the sense which they perhaps once had, their hearts become hardened and their understandings darkened. I each one had been carefully (and with a much care as was their duty to take) attending to the light of Christ in the heart, would not his grace have been sufficient to have preserved them, even all those that gave diligence thereunto, so that none would or could have been able to pluck them out of his hand. What tremendous calamities come on us because of our carelessness, which so evidently amount to contempt of his great mercies and offered benefits. 'What could have been done more to my vineyard that I have not done in it.' But as I am not induced to think that He hath cast away his people, but suffer them to be proved, I expect bright and amiable characters to rise up amidst this general gloom, that has so far extended and spread abroad, who under such full proof of honest hearted sincerity, will stand to, and hold fast sound integrity in faith and practice; and thus prepared will stand as on Mount Zion with the harps of God in their hands, and sing the song of Moses and the Lamb, saying great and marvellous are thy works, Lord God Almighty; just and true are all thy ways thou King of saints, &c."

"Fairfield, Columbiana County, Ohio.

10th mo. 15th, 1824.

Beloved friend, Benjamin Kite:—Thy acceptable letter of 5th mo. 7th, I received; but it seemed strange to me when I read in it that a number of our members have laid down this position, to wit: 'That they are not bound to believe what they cannot comprehend. And as they cannot comprehend how the Divine and human nature could be united in our blessed Redeemer, they endeavor to explain it away.' To me the idea abounds with folly, and, I suppose, the supporters of it believe many (I was about to say a thousand) things, which they do not nor cannot comprehend, and I think they will soon believe very little, if only what they completely comprehend is believed by them. I suppose again that each one of these have been humbled brought into tenderness, and they have felt love, Divine love, with its soft influence spread over their minds, and for a time they were filled with it; and it was first to the individual, it afterward was felt to extend to near and dear connections and acquaintances, but stopped not there, it reached to every land, to all the human family; it was incomprehensible, in goodness, as well as greatness; and while these feelings prevailed, the desire to comprehend everything was absent, but the continuance of the favored enjoyment, or the renewal of it again would be more interesting than the ability to comprehend. I think the apostle said, 'Contend earnestly for the faith once delivered to the saints.' This, I think, may be done without a continual prying into every thing, and seeking and studying to find out and comprehend every thing; secret things belong to God; but those that are revealed belong to us and to our children. To know what is our duty to do, and to seek for ability to do it, seems to be sufficient, if we are faithful to do when we do know and have ability to per-

orm; and if in the openings and unfolding of Divine counsel more than we have known, is presented to our view, we then can comprehend more; but at last it is very little we do know.

It was an account that was grateful to me to hear, that your Yearly Meeting was a season of favor. I may say of Ohio Yearly Meeting, that a solemn feeling attended each sitting. I hope that blessing and glory and honor was and is ascribed to the Head of the Church for the unmerited favor.

It may afford thee or thine some satisfaction to hear, that I went on a visit to the meetings and families of Friends in Marlborough Monthly Meeting, a few months ago. It was attended with more difficulty for me to get about than in time past; but in such a number of opportunities, so many lively tendering seasons, and so few dull and dry ones, have not before been favored to witness; but believe that the extension of favor was for the people's sake, not mine. In the course of his exercise, I saw Charity Rotch at her late welling, less than three weeks before her death; we had as solid an opportunity here as, perhaps, we had at any place; she was sitting by the side of a place she had to lay and rest in; during the time we were there, a feeling of solemnity attended, that evinced to me that he was divinely cared for. She labored under (as she expressed it) a complication of complaints. I parted with her as not expecting to see her face again. I hope she is gone to rest.

I observe thy account concerning thy wife and daughter Mary, that they are more weakly since they recovered of the fever or sickness of last year: I sympathize with them and thee. Health is a precious gift—a blessing—and He that gave taketh away, and, I have thought, He sometimes gives a better in its place—better than He took away. His mercies are manifold.

It seems that Mary Hughes is now left fatherless and motherless, except Him who is a Father to the fatherless and a Judge of the widow. Thy account that she is doing pretty well was pleasing to me. I have often felt a lively interested feeling for her, because I believed she submitted to bear the cross in her youth; may she be worthy to be among them that no good thing will be withheld from. If love could be conveyed from me to thee, thy wife and children, with as much sweetness as I have sometimes felt it come to me, it would suit my desire. Farewell.

I remain thy friend,

JOHN HEALD.

Joel Woolman was at James Boulton's, and was gone on his way near an hour when I got there; I now expect to send this in care of Abraham Warrington, who intends going to Philadelphia and Jersey soon after this day, 20th of 11th mo., 1824. J. H."

In a letter written in the 12th mo. of 1826, John Heald speaks of the infirmities of advancing years, and also of the excitement about canals and turnpike roads, which then prevailed in his section of country. He appears to have been somewhat disturbed by the demands which these public improvements made on him for money, which he could but poorly afford to spare. His letter then continues:

"It seems to be of but little avail to let our heart be troubled. One thing is needful through all the varied changes. Through

all the inward conflicts and outward trials that may attend my steps, may I look to and rely upon Divine assistance and support; and for daily favors and preservation, may I be enabled to return daily praise and thanksgivings. But still how humbling the consideration, that the return is so small, and the blessing great; and yet with what marks of attention is He graciously pleased to accept the poor suppliant's little tribute.

Before I conclude, I wish to be remembered in love to Elizabeth Robson and Jane Bettle, if it can be easily done. So long separated, and so far distant from domestic ties, detained, not to gain an earthly crown, but to yield obedience unto her Lord and Master's call. While some can scarce spare two or three hours in a week to devote to their great Creator's service, Elizabeth devotes whole years. My love to thee, thy wife and family. T. W. has forsaken his friends and gone from our Society, but not to another—he is disowned—what a pity.

I remain thy friend,

JOHN HEALD."

The account of his closing days, appended to his journal, speaks of a decline in John Heald's health about this time, and also of a nervous affection in his right hand, which discouraged him from keeping further memoranda, though his life was prolonged for several years. He passed through a severe illness in 1829, and when attacked by it in the Third month of that year, he spoke of the large number of Friends in different parts, whom he was acquainted with and loved, and the desire he felt that they might know on what foundation he was endeavoring to stand; he left for their benefit this testimony:

"I believe in the Lord Jesus Christ in all His offices, who was conceived by the Holy Ghost, born of the blessed Virgin Mary, and suffered death under Pontius Pilate, without the gates of Jerusalem, for the sins of all mankind, and rose again for our justification. I have gone through many close trials and exercises that I might have avoided, but to gain His favor, and I believe at this solemn moment, that nothing but His mercy will save me. I believe that those who have gone from Friends with the separatists, have gone wrong, and I hope some of them will be favored to return. I believe my sins have gone beforehand to judgment, and [I] hope to be received into the regions of bliss with Abraham, Isaac and Jacob in Heaven, and I believe my Saviour will never forsake me for one moment, but will permit me to join the heavenly host in singing praises to God and the Lamb for ever and ever."

(To be concluded.)

God often touches our best comforts and calls for that which we most love, and are least willing to part with, not that He always takes it utterly away, but to prove the soul's integrity, to caution us from excesses, and that we may remember Him the Author of those blessings we possess, and live loose to them. I speak my experience: the way to keep our enjoyments is to resign them, and though that be hard, it is sweet to see them returned, as Isaac was to his father, with more love and blessing than before. O stupid world! O worldly Christians! not only strangers but enemies to this excellent faith! and whilst so you can never know the reward of it.—*No Cross No Crown.*

### The Temple and the Pyramids.

Few persons have adequate ideas of the massive grandeur of the Temple at Jerusalem. The great pyramid of Egypt has been famed for its magnitude in all the world; but the temple has been supposed to be specially noteworthy for its sanctity and its ancient splendor, rather than for the magnitude of its fabric.

One reason for this is found in the fact that the pyramids, standing amid the barren sands of Gheezeh, have been open and accessible to all, while the superstructure of the temple was long ago demolished, so that, as Christ predicted, of all those "goodly stones," not one was "left upon another that was not thrown down;" and the vast substructure, buried beneath the ruins of ages, has been crowned by a Mohammedan mosque, and jealously guarded by fanatical Moslems, who have excluded sight-seers and investigators from its sacred precincts.

Within a few past years, they have relaxed somewhat the rigor of their exclusiveness, and opportunity has been afforded for explorations, excavations and researches, which have shed great light upon the original confines of the sacred edifice. Says the *Edinburgh Review*:—

The skill, the art, the mighty toil that has been devoted to the adornment and to the decoration of this most ancient place of worship, has been of extraordinary magnitude. The grandest legacy of Egyptian antiquity, the great pyramid, demanded, indeed, a greater amount of naked human labor; but in Moriah there is a compulsion of the features of Nature herself to the service of the builder. In actual bulk the great pyramid is to the temple rock as five to nine, if we descend but as far as the sills of the five double gates of the mountain of the house. If we carry the comparison down to a level at which the lowest foundation of the walls is inlaid in the rock at the angles of the inclosure, the bulk is three times that of the great pyramid. The cubic contents of the mason's work may not amount to a tenth part of that piled up by Souphis. But the hills have been honeycombed with chambers and galleries, and the declining part to the south covered with vaults and arches to which Gheezeh can show no parallel. No merely artificial structure could have so successfully resisted the resolute efforts of the two greatest military nations of the ancient world to destroy its existence and obliterate its memory. No other monument, long surviving the era of Asiatic and Italian power, can ever, like the noble sanctuary, mark by its very ruins the successive periods of its glory and fall.

If we regard not so much the evidence of the labor devoted to the work of the temple as the effect produced on the mind by its apparent magnitude, we may then suggest the following comparisons: The length of the eastern wall of the sanctuary is rather more than double that of one side of the pyramid. Its height, from the foundation rock at the south, and near the northern angles, was nearly one-third of that of the Egyptian structure. If to this great height of one hundred and fifty-two feet of solid wall, be added the descent of one hundred and forty-four feet to the bed of the Kedron, and the further elevation of one hundred and sixty feet attained by the pinnacle of the temple porch, we have a total height of four hundred and twenty-six feet, which is only fifty-nine feet less than

that of the great pyramid. The area of the face of the eastern wall is more than double that of one side of the pyramid. Thus the magnitude of the noble sanctuary of Jerusalem far exceeded that of any other temple in the world. Two amphitheatres of the size of the coliseum would have stood within its colossal girdle, and left room to spare. The coliseum is said to have seated eighty-seven thousand spectators, and accommodated twenty-three thousand more in its arena and passages. For such a number to have been crammed within its circle, the space of each person must have been limited to seventeen by twenty inches. Allowing two cubits or forty-two inches each way, or four square cubits for each worshipper in the temple, the sanctuary would have contained thirty thousand persons, and in the priest's court and the great court and cloisters, there would have been room enough to make the total reach more than two hundred and ten thousand persons, who might have found entrance into the courts of the Lord.—*The Christian.*

## THE FRIEND.

FIFTH MONTH 9, 1874.

We know not at whom the essay by "A Young Member" in northern New York is aimed, but we apprehend it does not apply to any within the range of our readers, and as it does not savor as much of a christian spirit as the subject demands, we think it better to omit its publication.

The obituary notice of Addison Carter appears to be unfinished.

### SUMMARY OF EVENTS.

**FOREIGN.**—The steamship Faraday, with the new direct Atlantic cable, will sail in about ten days for New Hampshire. The cable will be landed in Ireland at a point fifteen miles south of Valentia.

The Bank of England rate of interest has been advanced from 3½ to 4 per cent. The bullion in the bank had decreased £584,000 in the week preceding the advance.

In many parts of England the agricultural laborers are becoming dissatisfied with their condition, and are about emigrating to Canada and the United States. They allege that their wages are in general so small as to afford only the most meagre subsistence for themselves and families.

A Berlin dispatch of the 3d says: The Emperor of Russia and the Grand Dukes Alexis and Constantine, have arrived here en route for England.

The House of Commons will take a recess from 5th mo. 12th to 6th mo. 15th.

Steerage passengers are now carried from Liverpool to New York for fifteen dollars.

A great strike of miners in Durham Collieries is in progress. It is estimated that 50,000 men are out of employment thereby.

London, 4th mo. 4th.—Consols 93. U. S. sixes, 1867, 109½; do. 5 per cents, 104½.

Liverpool.—Uplands cotton, 8½ a 8¾d.; Orleans, 8¾d. a 8½d. Breadstuffs quiet.

Intelligence has reached Constantinople that a famine prevails in Asia Minor, and that many persons are starving. It is stated that in the town of Angora alone one hundred deaths occur daily from starvation. The River Tigris is again swollen by heavy rains, and further floods are apprehended.

A dispatch from Atcheen dated 4th mo. 25th, says: In the battle of April 11th, eight thousand natives made a general attack on the Dutch positions, but were unsuccessful at all points. On the 16th they attempted to carry the works at Kraton by assault, but were repulsed with heavy loss. All the Dutch forces, with the exception of a garrison of 2500 men in the Kraton, will return to Java immediately.

Madrid dispatches state that fighting was resumed

before Bilboa on the 29th ult., and that some advanced positions of the Carlists had been taken by the Republicans. Later advices report further successes of the government forces, compelling the Carlists to retreat from before Bilboa. A decree has been issued in Madrid calling for a levy of all persons liable to military service, and over nineteen years of age.

A Madrid dispatch of the 4th announces that Marshal Serrano entered Bilboa on the 2d inst. Small detached parties of Carlists were surrendering in hope of receiving amnesty, but the main body of their forces had retreated toward the Pyrenees. The inhabitants of Bilboa were without bread during the last week of the siege.

The Republican troops had defeated bands of Carlist insurgents in Andalusia, Valencia and New Castile.

A Lisbon dispatch says that much joy was manifested by the people of that city when news was received of the entry into Bilboa of the Spanish Republican troops.

Of the fund collected in England for the sick and wounded during the war between France and Germany, an unexpended balance remains of £80,000. This has been invested and is to be used in the event of another war.

The French indemnity received by Germany has been distributed among the various States as follows: The North German Confederation, 530,118,050 thalers; Bavaria, 90,200,411 thalers; Baden, 20,133,132 thalers; Hesse, 9,333,674 thalers. Beside this 114,715,810 thalers were taken for the repayment of outlays incurred during the war. The German thaler is equal to 75 cents in American coin.

All the French Ministries are once more installed in Paris, and Versailles can no longer claim to be the seat of government, although the National Assembly may convene there.

A serious riot has occurred in the French settlement at Shanghai, China. A mob of Chinese made an attack upon the residents of that quarter, and sacked and burned some of their buildings. The police, in order to quell the disturbance fired on the rioters, killing several of them. The Chinese assign as the reason for their attack, that the French were making a road which interfered with their cemetery.

It is officially stated that the commission of grave crimes is every where diminishing in Belgium. The infliction of capital punishment has been almost entirely relinquished during the past twenty-five years, and it is a noteworthy circumstance that for nearly eleven years no execution has taken place in a country having a population of about five millions.

Intelligence has been received from Fiji that the king and the people are unanimously in favor of the cession of the islands to Great Britain.

**UNITED STATES.**—The public debt statement for the Fourth month shows a decrease of \$2,865,451. The total debt, less cash in the Treasury, amounted on the first inst. to \$2,149,725,977, of which \$1,224,234,500 bears 6 per cent. interest, \$509,802,250 bears 5 per cent., \$678,000 4 per cent., \$14,000,000 3 per cent., and \$515,000,000 of legal tender notes, fractional currency, &c., bears no interest.

The exports from the United States, according to the official returns for the six months ending 12th mo. 31st, 1873, exceeded the imports by over \$15,000,000, while for the corresponding period of 1872 the imports exceeded the exports by more than \$42,000,000.

The number of interments in Philadelphia for the week ending 5th mo. 2d, was 267.

The Philadelphia Police and Fire-Alarm Telegraph transmitted 112,138 messages during the year 1873, and was the means of restoring 2,363 lost children to their friends. The number of messages relating to fires was 8,142; beside these many thousand messages were sent relating to criminals, stolen property, strayed or stolen animals, &c.

There were 550 interments in New York last week.

The accounts from the southwest indicate that the present inundation affects a wider extent of country than any which has ever occurred in the United States. A great part of the States of Louisiana and Mississippi is reported to be under water, while large districts in Arkansas, Tennessee and Alabama, and the river counties of Kentucky and Missouri are suffering by the overflow. In some places the water in the Mississippi river is so high that from the hills on one side no land can be seen on the other side as far as the eye can reach. Opposite Memphis the expanse of water is about forty miles wide, and the highest lands in that area appear only as low islands.

When the currency bill came again before the Senate, 34 members voted to pass the bill over the veto and 30 against so doing. The bill falls for want of a two-thirds vote.

The United States have seventy-five thousand miles of magnetic telegraph in use. Russia has thirty thousand, Germany twenty-six thousand, Great Britain and Ireland twenty-four thousand, and France twenty-three thousand miles.

Several sailing vessels arrived at Chicago on the 1st, and the Straits of Mackinaw are supposed to open for the season. The Erie canal is open through its entire length.

The U. S. Secretary of the Treasury has directed a sale of \$5,000,000 in gold during the Fifth month.

The steamer Vasco de Gama, which arrived at San Francisco the first inst., made the fastest trip on record between Asia and the United States, having left Chili on the 4th ult., and Japan on the 14th ult., only 17 days and 8 hours from Yokohama to San Francisco.

The average temperature of the Fourth month Philadelphia, by the record kept at the Pennsylvania Hospital, was 44.89 deg. The highest during the month was 66 deg., and the lowest 24.50 deg. The amount of rain was 7.50 inches. The average of the mean temperature the Fourth month for the past 85 years, is stated to be 50.26 deg., the highest mean during that entire period was 58.18 deg., in 1871, the lowest 44 deg., was in 1776. The rainfall of the first four months of this year has been 14.12 inches, against 13.07 inches in 1873.

**The Markets, &c.**—The following were the quotations on the 4th inst. *New York.*—American gold, 11 U. S. sixes, 1881, Reg. 119¾; Coupons 121¾; ditto 1868, reg., 119¾; coupons, 120; ditto, 10-40 5 per cent. 115. Superfine flour, \$5.60 a \$5.95; State extra, \$6 a \$6.80; finer brands, \$7 a \$10.30. No. 1 Chicago spring wheat, \$1.59; No. 2 do., \$1.54 a \$1.56; western, \$1.66; white Michigan, \$1.85. Oats, 66 a 68 cts. Rye, \$1.10 a \$1.12. Western mixed corn, 84 a 85 cts.; yellow, 87 a 88 cts.; white, 89 a 90 cts. *Philadelphia.*—Uplands and New Orleans middlings cotton, 1 a 1½ cts. Superfine flour, \$5.25 a \$5.75; extras, \$6.50; finer brands, \$7 a \$10.50. Western white wheat, \$1.85; amber, \$1.80; western red, \$1.50 a \$1.65; No. 1 spring, \$1.55 a \$1.60; No. 2 spring, \$1.50. Rye, Corn, yellow and white, 85 a 86 cts. Sales of 2200 head of cattle at 7½ a 7¾ cts. per lb. gross for extra—a choice at 8 cts.; 6 a 7 cts. for fair to good, and 4½ a 5½ cts. for common. About 6000 sheep sold at 6¾ a 9 cts. per lb. gross, and 5000 hogs at \$8.50 a \$8.75 per 100 lb. *Baltimore.*—Choice white wheat, \$1.85 a \$1.88; fair prime do., \$1.65 a \$1.80; choice amber, \$1.85 a \$1.88; good to prime red, \$1.75 a \$1.80; western spring, \$1 a \$1.53. Western mixed corn, 86 a 87 cts.; southern white, 87 a 89 cts. *Chicago.*—No. 1 spring wheat, \$1. No. 2 do., \$1.27; No. 3 do., \$1.21. No. 2 mixed do. 65½ cts. No. 2 oats, 46¾ cts. No. 2 rye, 92 cts. Lard, \$10.35 per 100 lbs.

**FRIENDS' ASYLUM FOR THE INSANE.**  
Near Frankford, (Twenty-third Ward,) Philadelphia.  
Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

**DIED,** at his father's residence, in Cherokee county, Kansas, on the 10th of 5th mo. 1873, ADDISON CARTER, son of Milton and Louisa Ann Carter, aged 21 years, lacking ten days, a member of Spring River Monthly Meeting of Friends, Kan. This young man had greatly endeared himself to a large circle of friends and relatives, by his many virtues and upright conversational being mild, gentle and unobtrusive in his manners. He was endowed with good natural abilities, and was anxious to improve his time and talents to the honor of the great Giver, as evinced by his usefully improving his spare moments, and saying, "I had rather have a good education than a large estate of this world, so I can enjoy it and be useful to others." His bodily suffering for about six days, was at times very great.

—, on the 13th of the Second month, 1874, at her residence in Exeter township, Berks Co., Pa., in the 30th year of her age, REBECCA LEE CHRISMAN, wife of Isaac F. Chrisman, and daughter of James and Lydia Lee, a member of Exeter Monthly Meeting. She was of a meek and inoffensive disposition, and bore her illness with patience and resignation, and passed quietly away like one going to sleep; leaving her friends the consoling belief that she was prepared for an entrance into the mansions of everlasting rest at peace.

—, Fourth mo. 12th, 1874, ELIZA E. STOKES, wife of Stoddell Stokes, a beloved member of Stroudsburg Particular and Frankford Monthly Meeting of Friends, Pa., in the 77th year of her age.

VOL. XLVII.

SEVENTH-DAY, FIFTH MONTH 16, 1874.

NO. 39.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,  
PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

For "The Friend."

John Heald.

(Concluded from page 303.)

The 15th of 11th mo. 1829, John Heald said early as follows: I have been looking over the places where I have travelled, and the labor I have been engaged in on Truth's account, and now my mind seems to be clothed with love to my family, relations and friends. The favor is inexpressible, and yet I seem willing to leave them all and become united to the ever-blessed Redeemer in whom I have long trusted, and whom I have endeavored to serve faithfully in my generation. And now my hope for salvation is in Him, who died for me, that through His merits and mediation with the Father, I shall be accepted. I feel no condemnation, nothing standing in the way between me and eternal felicity. I abhor the doctrine of E. H., that would not be willing to accept of salvation on the terms of Christ dying for his sins. This seems to proceed from the pride of the human heart. I would not be in such a state for all this world as give me, and I believe if all our meeting had imbibed this doctrine, yet the Lord would not have left himself without a witness; others would have been raised up who would not have denied Him, but would have stood for His righteous cause, and would have owned Him as our sacrifice for sin, our atonement, Advocate and Intercessor. Some of you have had to pass through sore trials in dealing with and testifying against that spirit of unbelief. I charge you before God and His holy angels that you shrink not from your duty, but be faithful to the Lord and his Christ in all things. I had a prospect sometime past, that I should soon leave the body, but that prospect soon closed, though I had a choice that it should have been so, and I believe that if I had then been taken, I might have had an easy passage, but in this I submit to Him who knows what is best for me, and fully resign all, both soul and body, into His holy hands, to do with me as He shall see best, for I believe He will never leave me nor forsake me.

At one time he uttered the following prayer: O adorable Majesty, I am unworthy of the east of thy favors and mercies, but I implore thee with tears, prayers and strong cries, that I may know thee the only true God and Jesus

Christ whom thou hast sent. With regard to outward circumstances, thy will be done. If thou should see meet to diminish those things I stand in need of in this state of being, or to increase them, to give many or few days, are all in thy hand, who knowest best what is best for me; and let thy holy will be done; but O, for thy mercy's sake enable me to know and do thy holy will, all the days thou shalt see meet to allow me here.

The following memoranda have been preserved of expressions he made use of at different times.

If it is consistent with the holy will, I should be willing to be released soon. I do not find that I am charged with sin or transgression. There is to me no condemnation, and death has no terror. I do not say it in a boasting way, but for the sake of others. O Lord, be merciful to me. Thou hast been merciful, but my mind desires a continuation of thy tender mercy. Heaven and earth shall pass away, but my word shall not pass away, said the dear Redeemer. His word is more stayed than Heaven and earth.

I have seen since I have been on this bed of sickness, with indubitable clearness, that there is a great deal of deceit amongst many who would pass for christians, which will do them no good, but will one day add to their condemnation.

I believe that a frequent reading of the Holy Scriptures in families would be profitable.

I have confessed the Lord Jesus before men, and I believe He will not deny me before His Father and the holy angels. O, if this was not impressed on my mind, how painful would the sensation be. The next day, he said: O be pleased to release thy poor suffering creature, nevertheless not my will but thine be done. May praises be ascribed to thee and to the Lamb, through the long ages of eternity!

If I have betrayed any symptoms of impatience, I hope it will be passed by; and if I have been preserved, there is nothing due to me for it, it is all to be ascribed to the great Preserver of His people. Every other consideration is of little consequence, if we can individually attain to those happy abodes, where the wicked cease from troubling, and the weary soul is forever at rest.

To an elder, he said: O that thou may never leave nor forsake that cause which thou hast endured so much sorrow and conflict for. May the Lord often be pleased to fill thy heart with His love and favor. If we should not meet again, remember this was my prayer for thee, dear friend.

Being asked how he was, he answered, my poor body suffers, but my mind is mercifully preserved in quiet, which is a great favor. I have no language to express it to the full. I have no objection, but rather a choice, in taking notice of every neighbor who comes to see me. There are some who are too re-

miss in attending to their duty, and if any thing I can do would have a tendency to make them more diligent, I would willingly do it.

How grateful to my feelings is the language, "Come ye blessed of my Father, inherit the kingdom prepared for you from the foundation of the world." I never could adopt the language of the apostle with so much clearness, as I now sensibly feel it: "I have fought a good fight, I have kept the faith. Henceforth there is laid up for me a crown of righteousness, which the Lord, the righteous Judge, shall give me at that day."

Here end the memoranda appended to the journal of this worthy man, and laborious minister of the Gospel. The only further record of his feelings which has reached the compiler, is a letter addressed to his beloved friend, Benjamin Kite, bearing date 1st mo. 29th, 1833. Its tremulous and uneven characters bear evidence of physical decay, and it was written with evident effort at intervals during a period of about two weeks from the time of its commencement; yet it breathes that spirit of Christian humility and submission to the divine will, which are the fruits of true religion. The following passages are extracted from it.

"You are dear friends, among those that I look to with affectionate remembrance. The precious feelings that I am permitted to enjoy, when remembering some dear friends that I am no more likely to behold in mutability, is comfortable to me. It is true I am less capable of action than I was in time past, but favors are present, as many or more than I am sufficiently thankful for. If I have divers afflictions, there seem to be no more than to keep me humble.

"When John the Divine, saw a Lamb stand on Mount Zion, there were many with Him, of the thousands of the redeemed, who could sing the song of Moses and of the Lamb. I think they had known a preparation to stand with the harps of God in their hands; and we ought to know a preparation as well as they, that we may stand in the place allotted us, when many tribulations are passed, that we may know a being redeemed and be prepared to sing that song, 'The redeemed of the Lord shall come to Zion with songs and everlasting joy upon their heads.'

"My course draws towards a close, a final close of time is nigh. Infirmities attend, bodily ability fails—all indications of a close. I am not in haste to be away, nor craving to stay long. I desire to leave the whole unto Him who always does right, and never wrong. I do not know when the time may come for me to do the last little; for in my own estimation my employ has been in little things. Some have been capable of doing much, and have done more than others could do; but when my work is done, I shall be permitted a release, I expect; and when that time comes, may I be ready, having done, suffered or endured my allotted share or portion of tribula-

tion or enjoyments. It is done, or finished. This when applied to life, how solemn!

"In our Society, how many are as much defiled as they would have been if they had had the leprosy. Our blessed Lord once said, There were many lepers in Israel at a time he alluded to, but, said he, none of them were healed but Naaman the Syrian. There seems great need of healing in our Society to cause it to be healthy, comely and clean; not polluted and unclean. When will our defilements cease? We have need to do our first works. We have need to repent and then do our first works.

"I would willingly send real, sincere love and good-will to you, my dear, absent friends. And, as I think this is very likely to be the last token of love I shall send to you, may that love that is pure be yours to enjoy. Fare ye well—and if it should be a long, a last farewell—the time is far spent—the long home is at hand. I thought years ago, that I would have been in another state of being before now, but still I am here—an uncertain stay—but sure to go. May the Divine will be done.

I am, affectionately, thy friend

JOHN HEALD."

Those of the readers of "The Friend," who have traced in its pages the course of this Friend, and observed his labor of love for the good of others, and his watchful care to perform the duties required of him; how willing he was to undergo the needful baptisms to prepare him for religious service, and yet preferring to disappoint the earnest expectation of those who longed to hear him preach, rather than to venture on such an engagement without the sense of Divine requiring; these will feel that the humble confidence in Divine mercy with which he was favored in his declining years was a fitting close to such a life. He is one more added to that cloud of witnesses who testify that the service of the Lord is indeed a good service, and that the wages received therein are precious, unspeakably precious.

*How the Eye is Swept and Washed.*—For us to be able to see objects clearly and distinctly, it is necessary that the eye should be kept clean. For this purpose it is furnished with a little gland from which flows a watery fluid (tears), which is spread over the eye by the lid, and it is afterward swept off by it, and runs through a hole in the bone to the under surface of the nose, while the warm air passing over it while breathing, evaporates it. It is remarkable that no such gland can be found in the eyes of fish, as the element in which they live answers the same purpose.

If the eye had not been furnished with a liquid to wash it, and a lid to sweep it off, things would appear as they do when you look through a dusty glass. Along the edges of the eyelids there is a great number of little tubes or glands, from which flows an oily substance which spreads over the surface of the skin, and thus prevents the edges from being sore or irritated, and it also helps to keep tears within the lid. There are also six little muscles attached to the eye which enable us to move it in every direction; and when we consider the different motions they are capable of giving to the eye, we cannot but admire the goodness of Him who formed them, and thus saved us the trouble of turning our heads every time we wished to view an object.

For "The Friend."

### The Heart of Africa, by Dr. Schweinfurth.

(Continued from page 295.)

"We were not long in leaving the Shillook villages far behind. The inhabited region seemed to recede as our boat made its way along the water-course. The stream divided itself into a multitude of channels, which threaded their way amidst a maze of islands. The distant rows of acacias on either side were the only tokens to indicate the mainland. This was the day on which we first saw the papyrus. To me, botanist as I was, the event elevated the day to a festival. Here at a latitude of 9° 30' N. are we now first able to salute this sire of immortal thought, which centuries ago was just as abundant in Egypt as at present it is on the threshold of the central deserts of Africa. I was quite lost in admiration at the variety of production of the surface of the water, to which the antique papyrus gave a noble finish. It strikes the gaze like the creation of another world, and seems to inspire a kind of reverence: although for days and weeks I was enraptured by the marvellous beauties which enrich the flora of the Nile, my eye was never weary of the vision of its graceful form.

"The hindrances to our progress caused by the excessive vegetation began now to give us some anxiety. All day long we were bewildered not only by the multiplicity of channels, but by masses of grass, papyrus, and ambatch, which covered the whole stream like a carpet, and even when they opened gave merely the semblance of being passages.

"Thick masses of little weeds float about the surface of the water, and by forming a soft pulp, contribute an effectual aid to bind together the masses of vegetation. Like a cement this conglomerate of weeds fills up all the clefts and chasms between the grass and ambatch islands, which are formed in the backwater where the position is sheltered from the winds and free from the influence of the current.

"On the 8th of February began our actual conflict with this world of weeds. That entire day was spent in trying to force our boats along the temporary openings. The pilots were soon absolutely at a loss to determine by which channel they ought to proceed. On this account two vessels were detached from the flotilla to investigate the possibility of making a passage in a more northerly direction. Two hundred of our people, sailors and soldiers, were obliged to lug with ropes for hours together to pull through one boat after the other, while they walked along the edge of the floating mass, which would bear whole herds of oxen, as I subsequently had an opportunity of seeing.

"Very singular was the spectacle of the vessels, as though they had grown in the place where they were, in the midst of this jungle of papyrus, fifteen feet high; whilst the bronzed, swarthy skins of the naked Nubians contrasted admirably with the bright green which was everywhere around. The shrieks and shouts with which they sought to cheer on their work could be heard miles away. The very hippopotamuses did not seem to like it; in their alarm they lifted their heads from the shallows in which they had stationed themselves for respiration, and snorted till the gurgling around was horrible. The sailors, concerned lest by their bulk these unwieldy creatures should injure the boats—not an un-

known occurrence—gave vent to the full force of their lungs. This unearthly clamor was indeed the solitary means of defence at the command; in such a turmoil—men and boats in every direction—firing a shot was not to be thought of."

After several days of laborious effort, they succeeded in passing this grass barrier. No other difficulty of much magnitude was encountered, and on the 22d of the month they reached the Meshera, where the boats are put up for the season, and the merchants commence their journeys by land into different parts of the interior. The elephants have been gradually exterminated or driven away into remoter regions, by the active pursuit which the demand for their ivory has created, and year by year, the enterprising merchants push their explorations further into the interior. They purchase of the native hunters the ivory which the year's hunting has enabled them to accumulate. Though the price they pay for it is very small, yet the cost of maintaining a large body of soldiers for their protection, and the expense incurred in other ways are so heavy, that the ultimate profit is not unreasonably large. By force of arms they compel the native tribes, who come under their influence, to furnish provisions and persons to carry their goods from place to place, for in this part of Africa, man is the only beast of burden. They unscrupulously plunder the cattle from those tribes who raise them, and regularly organize cattle-stealing expeditions. The number annually seized in this way amounts to several thousand. The magnitude of the operations may be imagined from the statement of Dr. Schweinfurth, that the expedition which he followed into the interior, numbered about 1000 men.

The first part of their journey was through the territory of the Dinka. This is a numerous tribe occupying a country of some sixty or seventy thousand square miles in extent. They are eminently a grazing people, and regard their cattle almost with veneration. To them, they are the symbol of wealth. Some of their cattle-pens will contain 10,000 animals, judging from the number of pegs to which they are tethered. They are never killed for food, but those that die naturally or by accident are eaten. The owner himself is too much afflicted at the loss to partake of the feast. They cultivate several varieties of grain and roots, and are superior to many of the African tribes in their skill and cleanliness in cooking. According to Dinka notions of propriety, it is becoming for none but women to wear any covering; any attire, even of the most moderate description, is considered unworthy of the men. Our author acquires among them the ironical title of "The Turkish lady," from always appearing in a complete suit of clothes.

Even among these simple people, the influence of fashion is apparent. The wives of the wealthy are often laden with nearly half a hundred weight of iron rings as ornaments. These on their wrists and ankles clank like the fetters of slaves. The favorite ornament of the men are massive ivory rings, which they wear round the upper part of the arms. The next important tribe beyond the Dinka is the Bongo nation. They are an agricultural people, and have been reduced into complete subjection by the ivory merchants, the whole country being partitioned out among them. This is indeed their head quarters

here they keep throughout the year resident agents, and their stores of provisions and merchandize; and from their fortified places called Seribas, their trading parties make long excursions among the wilder tribes of the interior. Some of these seribas have grown to the magnitude of small towns, and contain perhaps 1000 inhabitants.

The Bongo people are not so pure a black as the Dinka and more northern tribes, but a reddish brown shade of color. Their soil abounds in iron, of which they are skilful manufacturers. With a rude bellows, and a hammer, which often is merely a round ball of pebble stone (though sometimes a little pyramid of iron without a handle) upon an anvil of stone, with an ordinary chisel and a pair of tongs consisting of a split piece of green wood, they produce arms, tools and ornaments of admirable quality and elegant workmanship. The most important of their iron manufactures are for articles of trade—pear-heads, regular spades, and a rough spade in the shape of a flat circle about a foot in diameter with a short handle. These are the circulating currency of Central Africa, being stored up in the treasures of the rich, and available for purchases and for the marriage portions which every suitor is obliged to give.

They practice basket making and pottery manufacture, and from the vegetable fibres of some of the cultivated plants they twist a cord which they use in making fish-nets and snares for birds. The children weave baskets in the form of long tubes, which they lay flat upon the ground in the immediate neighborhood of the mouse-holes; they then commence a regular *chasse*, when the scared mice, scampering back to regain their homes, run through the stubble, and often rush into the open traps, where, like fish in a weir-basket, they are easily secured. In this way the Bongo boys catch considerable quantities of meriones, *Mus genivittis*, and *M. barbarus*, which they tie together by their tails in clusters of about a dozen, and barter them to each other as dainty morsels.

These are our cows, they would shout to me with great glee whenever I met them returning after their sport had been successful. Another use which is made of the mice which are captured by this simple artifice is to employ them for a bait for securing what they esteem the especial delicacy of roast cat. On the narrow paths which traverse the steppes like rifts in the long grass, they construct diminutive huts out of some twisted reeds; by placing the mice inside these they are very often able to entice the cats into a snare.

"To agriculture men and women alike apply themselves, devoting their greatest attention to the culture of their sorghum. The amount of labor they bestow upon this cereal is very large. The seed is lavishly broadcast into trenches which have been carefully prepared for its reception, and when it has germinated and made its appearance above the ground, two or three weeks are spent in thinning the shoots and in transplanting them away from the spots where they are too thick; a system which experience has shown can very advantageously be applied to maize. Very few vegetables are cultivated, but for these the people find a variety of substitutes in the wild plants and tubers which abound.

"During the rainy season the country is very prolific in many varieties of funguses. The Bongo have a great fancy for them; they keep them till they are on the verge of decay,

and then dry and pound them. They use them for the purpose of flavoring their sauces, which in consequence are enriched by a *haut gout*, which without depreciation may perhaps be compared to rotten fish. Throughout the country I never saw any funguses but what were perfectly edible, and some of them I must confess were very palatable." The larger species frequently grow to a height of nine inches, are a foot in diameter, and weigh nearly fifty pounds.

Our author says: "Whenever a halt is made upon the marches across the wilderness, the bearers, as soon as they are liberated from their burdens, set very vigorously to work and grub up all sorts of roots from the nearest thickets. I can myself vouch for a fact, which might fairly be deemed incredible, that thirty Bongo who accompanied me on my return to Sabby, at a time when I had scarcely enough to keep me from starvation, subsisted for six consecutive days entirely on these roots, and although we were hurrying on by forced marches, they lost neither their strength nor their spirits. Their constitution was radically sound, and they seemed formed to defy the treatment of their inhospitable home.

"Already it has been mentioned that there is an entire deficiency of common salt throughout the district of the Gazelle. The alkali that is everywhere its substitute is obtained by soaking the ashes of the burnt wood of the *Grewia mollis*, a shrub common throughout Bongoland."

(To be continued.)

For "The Friend."

#### Reflections upon Philadelphia Yearly Meeting.

As the mind dwells upon the occurrences and feelings that attended the recent meeting of this body, some things present, which may be of interest to those who were not present on that occasion, and which do not properly belong to a narrative of its proceedings, such as has already been published in the columns of "The Friend."

Prominent among these, was the effect produced by the presence of several friends from other Yearly Meetings. It has often been the case that the time of the meeting has been much wasted, and the patience of those present severely tried, by long and unseasonable discourses, which, however earnest they might be, were felt to be out of place, and did not carry with them that evidence of Divine authority which is the accompaniment of true Gospel ministry. Though we were not free from some such interruptions in our recent gatherings on the part of those who were strangers, yet the dignity, propriety and weight which marked the demeanor of others was peculiarly pleasant; and had a decided effect in strengthening the feeling of brotherly love, and in awakening a renewed interest in the welfare of different parts of the flock. These Friends, in their private conversations, fully confirmed many of the reports which had reached us of the extent to which a large number under our name had departed from the doctrines and practices of the Society of Friends. They were evidently bowed under the weight of these things, and were suffering with the suffering seed, but they were comforted by mingling with those of like views with themselves, their faith re-animated, and they strengthened still to maintain the defence of those principles which they had long trusted in, and whose goodness they had

proved. Their company and the unity which they expressed, produced a similar effect on many here—reminding of the ancient proverb, "Iron sharpeneth iron; so a man sharpeneth the countenance of his friend." Some amongst us were led to realize more clearly, and to enter more fully into sympathy with, the trying position in which they were placed in their own meetings and neighborhoods; and to desire with more fervency that the hands of all such throughout the Society of Friends might be strengthened, and that the people everywhere, who were wandering from the true fold, might be brought back, and enabled to see the delusive nature of that sympathetic excitement which has to so large an extent been mistaken for the true work of grace. The fact cannot be disguised that there has been in very many cases such a departure from our doctrinal views as leads to a radical change in religious practice.

Our early Friends, while they fully recognized the atoning efficacy of the offering of himself on Calvary, made by the blessed Redeemer, steadily directed the attention of their hearers to the operations in their own hearts of that Light, Spirit or Grace, which He purchased for them, and which is the appointed Guide to lead all to that knowledge of the only true God, and of Jesus Christ whom He has sent, which is saving. They taught the world, that it was by submitting to and uniting with this Holy Spirit in its leadings and workings, that they would come to have true and saving faith, and experience the real benefit of the sufferings and death of the Son of God. This teaching was eminently practical. It did not merely tell the listeners to "Come to Jesus," as we have so often heard of latter times, but it pointed out the way to become His true disciples, even as He himself had long before shown in those memorable words: "If any man will be my disciple, let him deny himself, take up his daily cross and follow me." This made them a humble, watchful, self-denying people, depending from day to day on the fresh extension of Divine help for their own preservation, and for all ability to labor in the cause of righteousness. Thus their growth in salvation was the effect of the working within them of that spirit which was promised as the Leader into all truth; and they were willing patiently to wait and quietly to hope for its perfect accomplishment.

But now we hear much said of immediate salvation. It is spoken of as a very easy matter. A large congregation will be told by one who presumes to preach, that it is in the power of every one present to be saved before they leave the room at the close of the meeting. As the saving visitations of Divine grace are utterly beyond our control, those who listen to such teaching and believe it to be true, are in danger of substituting therefor some intellectual or emotional operation of the mind, and of relying upon this. Hence they may become puffed up with an imaginary conceit of their own attainments—and such is often lamentably the case. How often have we known of such persons confidently proclaiming that their names were written in the Lamb's book of life, when it was painfully evident to others that they did not exhibit those Christian graces of humility, meekness and submission to those in authority, which would have been present, if their professed attainments had been real! Such are greatly

to be pitied. If they undertake to teach others, it is only the blind leading the blind, to the danger of falling into a ditch together.

The practical effect of this system too often is to encourage self-righteousness—the reliance really being on something the individual does of his own, whatever else he may suppose. Even where there are real and precious visitations of Divine love to the soul, instead of patiently abiding under them, and permitting them to have their perfect work, such persons are many times led to enter at once into some public sphere of labor for which they are not prepared, and thus their own growth in grace is hindered, and the work being marred, they never attain to that brightness and usefulness in the church which belongs to a polished shaft.

The contrast between the sitting of the Yearly Meeting on Fifth-day afternoon, and that on Sixth-day, when it closed its deliberations for this year, furnishes an illustration of the wisdom of that advice of George Fox: "Friends, hold all your meetings in the power of God."

On Fifth-day, the meeting became more unsettled than was the case at any other time during the week; especially while considering the proposition from Burlington Quarterly Meeting, to change the language of the Query respecting the use of spirituous liquors. No doubt there was much exercise of mind on the part of many Friends, and an effort to keep themselves under the influence of that Power, which alone can enable such a meeting to perform its duties to the honor of its Holy Head. But spiritually, it was a low time; the restraining influence of Divine Grace was not felt to be in dominion over the meeting, and several remarks were made on the subject under consideration which were ill-timed, undigested, injudicious, or defective in other ways. This tended to encourage others to similar exhibitions; and thus, though the meeting was conducted with decorum, we seemed for a time in danger of degenerating into the condition of an ordinary debating assembly. Such is ever the tendency of that talkative spirit, which impels Friends to partake in the discussions of our meetings for business, without waiting to have the mind seasoned with religious exercise, so that our words may be savory.

On Sixth-day, through Divine favor, almost from beginning to end, a degree of solemnity was to be felt. This increased as the meeting progressed. Those who spoke seemed generally under this influence, and their weighty and tender remarks were comforting and edifying. When the sitting was ended, there was a general feeling of rejoicing for the mercies vouchsafed. J.

Selected.

By experience I can speak it, that the ways of holiness afford more true comfort and peace to the upright soul, than the greatest pleasures this world can afford; the former reaches the heart and soul, while the delights of this world are but a show, and appearance only, vanishing like a dream; and whoever believes otherwise of them, will certainly find them to be but lying vanities; therefore the apostle might boldly put the question to the converted Romans, viz: "What fruit had you in those things whereof you are now ashamed? For the end of those things is death."—*John Crook.*

#### WHAT IS PRAYER?

Selected.

What is prayer? Converse with God,  
The breathing forth of strong desire,  
The burning of celestial fire;  
A message to the courts above,  
Borne on the wings of faith and love.

What is prayer? The hidden spring  
That rises in the soul from grace;  
It is the spirit's resting-place,  
A symptom of the life within—  
A wrestling of the soul with sin.

What is prayer? The suppliant's voice,  
Breathed in a sigh, a stifled groan,  
That rises to the heavenly throne  
As fragrant incense to his ear,  
Who first inspires, then answers prayer.

What is prayer? A refuge where  
The stricken mourner seeks repose;  
Looks up and finds amid his woes  
A Friend enthroned above the skies,  
A Friend who well can sympathize.

What is prayer? A potent power  
That brings down blessings from the skies;  
It is the channel that supplies  
The soul with health and peaceful days,  
Till prayer is merged in endless praise.

*Christian Advocate.*

#### LIVE FOR SOMETHING.

Selected.

Live for something, be not idle—  
Look about thee for employ!  
Sit not down to useless dream—  
Labor is the sweetest joy.  
Folded hands are ever weary,  
Selfish hearts are never gay,  
Life for thee hath many duties—  
Active be, then, while you may.

Scatter blessings in thy pathway!  
Gentle words and cheering smiles,  
Better are than gold or silver  
With their grief dispelling wiles.  
As the pleasant sunshine falleth,  
Ever on the grateful earth,  
So let sympathy and kindness  
Gladden well the darkened hearth.

Hearts that are oppressed and weary—  
Drop the tear of sympathy;  
Whisper words of hope and comfort,  
Give, and thy reward shall be  
Joy unto thy soul returning,  
From this perfect fountain head,  
Freely as thou freely givest,  
Shall the grateful light be shed.

*The Potato-rot.*—This disease first made its appearance, so far as we know, about thirty years ago. The most destructive season of that epidemic in this country was in 1844. Previously to that time, the annual crop of potatoes in the United States amounted to over one hundred million bushels; but, in consequence of the blight, it was reduced in some parts of the country to one-half, or even to one-quarter of the ordinary yield.

In 1845 it showed itself in England, Scotland, and Ireland, and spread with great rapidity. The disease broke out again in 1854 and 1855, and was destructive in the State of New York, in Rhode Island, Massachusetts, Ohio, Illinois, and at various other points, and about 1865, or ten years later, it made its appearance for a third time.

This destructive malady was at last found to be due to the ravages of a microscopic fungus, called, from its mode of fructification and its injurious effects, the *Peronospora infestans*.

When the peronospora is placed in contact with the leaves of a potato-vine, its filaments penetrate into and through the epidermic cells, and so reach the intercellular tissue of the

leaf and stem; and there they continue to grow producing a rapid withering and blight. When the parasite has attained a certain growth, it begins to fructify. Its upright filaments burst through the pores of the leaves and are crowned with the characteristic chain of spores. Each spore, when ripe, if supplied with moisture, produces six or seven secondary zoospores, armed with long vibrating cilia, and capable of a rapid spontaneous motion. After moving about for a short time the zoospore becomes quiescent, throws out an elongated filament, and germinates afresh.

It is no doubt in this way that the germ of the parasite reaches the tuber of the potato at the root of the vine. For if sound potatoes be placed in the ground, and the surface of the soil be sprinkled with the spores of peronospora, and then watered from time to time, the potatoes are found to be infested with the disease in about ten days.

This species affords a good example of the extreme fecundity of parasitic fungi. It has been estimated that, on the under surface of a potato-leaf, one square line is capable of producing over three thousand spores. Each spore supplies at least six zoospores; so that from one square line we may have nearly twenty thousand reproductive bodies, each capable of originating a new mycelium; and a square inch of surface may yield nearly three million such bodies.

The mycelium filaments can penetrate the cellular tissue of a leaf in twelve hours, and, when established there, may grow and bear fruit in eighteen hours longer, while the spores are perfected and ready to germinate in twenty-four hours after they have been detached and placed in water. This fully explains the rapidity with which the disease is known to spread.—*Address on the origin and propagation of disease, by Dr. J. C. Dalton.*

For "The Friend."

#### Memoirs and Letters of Sarah Hillman.

(Continued from page 299.)

"*Philada. 9th mo. 2d, 1842.*—Since thy last visit, again and again has my spirit bended towards thee in renewed sympathy and affection; yea, in that fellowship which lives through death. And earnestly do I desire, whatever be the trials and probations which may be permitted or appointed in our passage through this wilderness, and land of droughts, of deserts and of pits, and however many times we may be put as into the furnace heated 'one seven times hotter than it was wont to be heated,' we may hold on to the little grain of living faith, which has in mercy been granted, and is from time to time renewed; 'that so nothing may ever be able to separate us from the love of God which is in Christ Jesus our Lord.'

Ah! my dear friend, we have realized His Almighty Power to still the mighty raging waves, the fiery darts of the wicked one to quench, and to cause the heart that was shrouded almost in despair to sing to the springing up of the well of Life; then why should we so often be ready to give over the hope that we shall one day be made victorious, yea more than conquerors through Him who hath loved us and given Himself for us? His arm is not shortened that He cannot save, neither His ear grown heavy that He cannot hear; but with righteousness doth He judge the poor, and reprove with equity for the meek of the earth; and I believe He will arise

when His set time is come; and not only lead the cause of His oppressed people, but will set them in safety from him that puffeth them, and from all their enemies. So that the truth of the declaration will be seen, and the enquiry go forth, 'How should one chase a thousand and two put ten thousand to flight, except their rock had sold them and the Lord had shut them up?'

Ah! it is a fearful thing to be crushing the prophets and despising the word through them; as it is a fearful thing to be daring to say, the Lord saith it, albeit He hath not spoken, and when He riseth up to plead whose right it is; who can withstand Him? No fig-leaf covering will hide them, neither can any of us flee; He can no more be cheated than He will be mocked; naked and bare must we appear before Him, every covering which is not of His spirit, will be stripped off: what will it signify then to say, 'We have eaten and drunk in thy presence, and thou hast caught in our streets,' if the heart is not right with Him, if any idols have taken the place of which He, as the great Shepherd, Prophet, Priest and King, ought to have entire rule, ought to reign and govern.

Oh! it seems to me the day is at hand, when there will be a great shaking in the midst of the land, and if there be but a few berries left, a few gleanings grapes, two or three as on the outmost fruitful branches, there will, I am persuaded, be a gathering to these; and there will be a gathering to Shiloh, for unto Him, and not to any other, shall the gathering of the people be. I long for myself, and for us all who profess the name of Christ, more especially we who sometimes are engaged and constrained by the renewings of His grace, and the fresh bubblings up of the well-spring of salvation, to speak a word in His name. I long for our preservation on the immutable foundation, Jesus Christ the righteous, that neither divination nor enchantment may prevail against us; that in that awful day when inquisition will be made, we may be found clear of the blood of all men. Oh, how awful it will be to have deceived any, to have preached any other way or truth, than the truth as it is in Jesus our holy Head. To have been gathering the people to ourselves, or setting up forms for substance, or bringing men's person into admiration because of advantage. The Apostle Paul, who knew the terrors of the Lord (and through His unutterable mercy He has visited our souls and made us to feel His terrors for sin,) said, 'Woe is unto me if I preach not the Gospel,' and it is truly woe to us if we preach not the Gospel. Oh! then let us, my beloved friend, cleave close to the Light, and walk closely with our dear Master, not fearing the fears of the heathen, but keeping our eye single to Him, we shall find that He still keeps that 'man in perfect peace, whose mind is stayed on Him, because he trusteth in Him.'

"Virginia, 5th mo. 1843. \* \* \* Ah! how sorrowful to see the children of this people scattered as they are, as sheep having no shepherd. It seems as if there was none that could break a little bread even if the child asked it; too many of whom seem content with the flesh pots of Egypt, and having loved this present world have little relish for the things of Jesus, the things of the kingdom; those things which accompany life and salvation. Oh what will these careless ones do when God riseth up, and when he appeareth

what will they answer him. I fear it will be said to some, 'Ye have lived in pleasure on the earth, and been wanton, &c.; and even some who have made a high profession seem to have grown weary of the way; they have run with the footmen, and they have wearied them, how shall they contend with horses, with the strong and powerful? and if in the land of peace, in a state of carnal security they wearied them, oh! how will they do in the swelling of Jordan? in that day when refuge fails, when there is no way to look, nor any think to trust to or in but God that showeth mercy.

As to health, I am as well as when I left home, and desire to be thankful for this favor. May we all strive to dwell so near our Divine Lord and Master, as to be preserved from the snare of the fowler, and to know our life hid with Him in all our trials and conflicts, and when the days of our pilgrimage on earth are finished, be found of him in peace."

"Philada. 5th mo. 31st, 1843. \* \* \* The lines of Cowper came sweetly into remembrance, 'He is a freeman whom the truth makes free,' &c., and surely none else are free indeed. The language seems applicable, addressed by the prophet speaking in the name of the Highest to a people formerly, 'I am pressed under you as a cart is pressed that is full of sheaves.' Ah! when the great Dasher in pieces shall come up against them what will they do? they have lightly esteemed the sacrifice commanded to be offered in the holy place, and are yet making high profession of spiritual attainments, painted as Zion truly, but where is the life and zeal, and primitive simplicity for which our forefathers in the truth were so conspicuous? where is their devotion and devotedness to be seen amongst these people? Oh how sorrowful is the state of too many among us who yet are taking upon them to rule in the church, and lord it over the heritage; who have not been living witnesses of the sufferings of Christ, as was Peter, and also partakers of the glory that shall be revealed."

(To be continued.)

A great variety of articles, including grain bags, wagon covers, floor covers, ropes, sails, &c., are made in Russia from the inner bark of the bass-wood or linden tree, a million of trees being destroyed annually in the manufacture, and the value of the articles produced amounting to \$2,400,000. The bark is collected by the peasants, in May and June, when the ascent of the sap renders peeling easy. That of the lower part of the trunk, generally employed for roofing, is obtained in pieces about 5½ by 3¼ feet, and is warmed, and pressed to prevent its curling. That of the upper part of the trunk and of the branches is tied in bundles and rotted under water until September, when it is dried by aid of heat and separated into thin, delicate strips, suitable for weaving into matting, and varying in weight according to the use to be made of it. The heaviest is sold at the Nishni Novgorod fair at about \$24 per hundred weight.—North American.

"The object, in dealing with offenders, should ever be to convince and restore them, no less than to maintain the testimonies of Truth, and the discipline of the church. The heart should yearn after them in a spirit of restoring love and meekness."

The subjoined review of the weather for the past month, is taken from the Philadelphia North American, and is interesting as it proves it to have been the coldest Fourth month since 1798.

Review of the Weather, &c.  
FOR FOURTH MONTH (APRIL).

	1873.	1874.
Rain during some portion of the twenty-four hours, . . .	14 days.	10 days.
Rain all or nearly all day, . . .	2 "	4 "
Snow, including very slight falls, . . .	4 "	3 "
Cloudy, without storms, . . .	6 "	9 "
Clear, as ordinarily accepted, . . .	4 "	4 "
	30 "	30 "

TEMPERATURES, RAIN, DEATHS, &c.  
1873. 1874.

Mean Temperature of Fourth month, per Pennsylvania Hospital, . . .	51.83 degs.	44.89 degs.
Highest point during do. . .	70.05 "	66.00 "
Lowest do. during do., do. . .	36.05 "	24.50 "

--	---------	---------

That the month just closed has been an exceedingly unpleasant one cannot be denied. We read from our diary:

Fourth month 3d.—Passengers to the Pacific by rail breakfast in the Sierras, with twenty feet of snow around them; four hours later they find wheat four inches high, and the next day see pear and peach trees in blossom.

Fourth month 4th.—Very cold. Ice made last night, five-eighths of an inch thick by actual measurement. Yesterday it was reported that "snow from twenty to thirty feet deep, and solid as ice, is still lying in various parts of California."

Fourth month 5th.—Snow at Hudson, N. Y., six inches deep, and still falling. The same evening three inches fell at Ogdensburg, N. Y.

Fourth month 9th.—Louisville and Memphis were visited by a severe snow storm, to the astonishment of their oldest inhabitants, who could not remember that such a thing had ever before happened in that latitude in April. The storm lasted nearly all day at Louisville, but only two hours at Memphis.

Fourth month 10th.—Snow at Erie, Pa., six inches deep.

Fourth month 11th.—We thus note frost in West Philadelphia this morning. The entire week ending yesterday has been very cold. This morning everything stiffened up with it. Plenty of ice about. Froze all day in the shade.

Fourth month 13th.—Still very cold. We know of water having frozen solid in pipes measuring one inch in diameter in the inside, belonging to a steam engine in the lower part of the city, splitting said pipes so as to necessitate new ones.

Fourth month 16th.—Nashville, Tennessee, was visited by a tornado, which is estimated to have destroyed property to the amount of \$100,000.

Fourth month 17th.—Snow fell at Binghamton, N. Y., to the depth of four inches.

Chicago reports that "Easter Sunday was signalized here and throughout the west by a violent and long-continued snow storm, which threatened to interrupt travel."

Fourth month 25th.—Snow storms appear to have extended over a large surface of country.

Fourth month 29th and 30th.—New Hampshire was visited by a severe snow storm on Wednesday night and yesterday, during which the snow fell to the depth of over a foot on the level, and was still snowing heavily.

Fourth month 28th.—Snow in New York.

Fourth month 29th.—We hear from Washington: "For several hours this morning a severe snow storm prevailed, which is something unusual for this city at this season of the year. At 12 o'clock, however, the snow had almost entirely disappeared."

On the same day it was reported that snow fell to the depth of nineteen inches at the Water Gap and on the mountains south of Wilkesbarre it was eighteen inches deep, and that there was frost in Alabama, and that the ice is still firm between Montreal and Quebec; also that a severe storm of snow and rain visited Delaware, while by private correspondence from Osceola, Penna., we learn that snow has fallen within a day or two to the depth of ten and a half inches, and is still falling.

The year 1857 has been referred to by some from memory as furnishing corresponding weather with that of the present year for the month under review. Upon referring to our diary we find the supposition to be nearly correct. As we noted on the 6th, "mercury down to 20 degrees, having fallen *thirty degrees in one hour*, while *snow* is noted in various places between the 5th and 10th, but nothing so late in the month as those chronicled this year. The mean temperature of 1857 was 45.29.

It will be seen from the above that cold weather and *late snows* have been very extensive this season in almost every section of country. Terrible inundations and overflows have also occurred in the west.

J. M. ELLIS.

Philadelphia, Fifth mo. 2d, 1874.

Remarks on silent worship by a person not belonging to the Society of Friends.

"Whatever others may think of silent worship, I find it valuable, and bind it to my bosom as an unspeakable treasure many cannot appreciate. How can the soul open itself before the Searcher of hearts; how can it be as clay in His hands, as a Mary at His feet; how can it hear the voice which says: 'This is the way, walk ye in it,' if it be always listening to or uttering words? The thing is contrary to nature, and they who condemn silence as a *means*, are themselves obliged to have recourse to it, if they are seeking to be among the number of those who enter the strait gate, who follow their Lord whithersoever he leads."

Who is the honest man?

He that doth still and strongly good pursue,  
To God, his neighbor, and himself most true:

Whom neither force nor fawning can  
Unpin or wrench from giving all their due.

Herbert.

### The Ruins of Troy.

Our readers may remember M. Schliemann and his excavations in the soil of the ancient Troad. That gentleman is at the point of publishing a relation of his discoveries, together with two hundred photographic plates representing the principal objects of his collection. An eminent savant, M. Emile Burnouf, Director of the French School at Athens, addresses to the *Temps* an interesting notice of the antiquities brought to light. After some introductory remarks, he says:

"By his first discoveries M. Schliemann was led to seek for the site of Troy in the very spot where antiquity had placed it: that is to say, at a locality called Hissarlik, not far from the sea, and this is what he found: A modern stratum, containing some Roman relics and some very important inscriptions, extends over the hill to a depth of two yards. Besides the Greek antiquities prior to the Roman epoch, the first layer furnished some objects in iron, with arms and nails of bronze, but not a single article of pure copper. Among the specimens of purely Greek origin and historical date was found a slab of white marble belonging to the Temple of the Italian Minerva, the lower part of which building has been uncovered.

Below the Hellenic stratum, which was the remains of a colony which must have lasted more than a thousand years, and only disappeared under Constantine II., lies the Trojan and pre-historic bed, with a depth of as much as sixteen yards. In this accumulation of rubbish is found neither bronze or iron; all the metal objects are in pure copper, silver, gold or electron (a very fine mixture of the two latter). At a depth of nine yards a thin layer of lead ore and copper extends nearly over the whole mound, which was itself fortified. M. Schliemann has cleared away the principal entrance, which is paved and flanked by solid buildings; the wall at the side is not less than thirteen yards in thickness. Near the spot, in a commanding situation, are the remains of a large princely edifice, by the side of which was found the treasure of which I will presently speak. The ruins of the town allow at least three strata to be distinguished; the upper one about two yards thick, leading to a supposition that the houses were of wood, and that they had been burned. The second bed contains many walls formed of stones cemented with mud, similar to those which we ourselves found at Santorin under the pumice stone of the volcano. The third layer contains houses constructed with unbaked bricks, according to the ancient custom of Central Asia. All this part shows the traces of an immense conflagration. The vases and metals have been calcined or soldered by the fusion; the surface of the bricks has been glazed by the flames of a vast furnace.

This last bed is from seven to ten yards in thickness. Below the depth just mentioned there existed a still more ancient city where walls have been found composed of enormous stones weighing from one to two tons each. It was the first founded in that place, for it rests on the virgin soil, which is a calcareous rock. A whole volume would be required to describe the objects brought from the Troad by M. Schliemann, as the number is more than 15,000. Many of them are vases in terra cotta, some turned in a lathe and others modeled with the hand; none of them are painted, but most represent a woman with

prominent breasts and the face of an owl like Minerva of Homer, wearing a sort of helmet. The worship of the "Glæcopsis Athene" was manifestly the principal one in the place for a great number of Palladiums in terra cotta, stone or bone have been found, representing that divinity, sometimes in a very striking manner. The instruments of pure copper, with the molds and crucibles used for their manufacture, tools and weapons of flint the remains of lyres for seven or four strings several thousand double cones pierced with a hole, and known under the name of fusai-oles, for female ornaments, mortars, mill, &c. all form an ensemble such as no museum in Europe can boast of, and will furnish inexhaustible subjects of study. It is an entire feudal civilization now revealed to us.

What we can affirm is, that the race which has left these memorials was unacquainted with iron, and was anterior to bronze. It was therefore, also prior to the Illiad, in which bronze, tin and iron are frequently mentioned. The inhabitants of the place were shut up in a citadel; twenty wells dug outside by M. Schliemann have demonstrated that there were no dwellings beyond the walls. The population lived under the rule of a feudal lord, whose stronghold has now been brought to light. Therein have been discovered, beside a host of minor objects, several vases of pure gold, silver or electron, two magnificent necklaces composed of a multitude of ornaments and small chains of a primitive but still advanced manufacture; several thousand gold heads, well cut; eight bracelets and thirty-six earrings of the same metal. There is no doubt that these valuables belonged to the proprietors of the chateau, and that the master was at the same time the sovereign of the country. But what was the name of the king? Was it Priam? I must be excused from replying to that question; for we ought first to know whether the Illiad is not analogous to the Ramayana and the Shah-name, in which the sun, moon, winds and clouds are represented as ancient heroes, and their cosmogonic contests as human events. M. Schliemann has in any case rendered an important service to science, and done himself the greatest honor in employing so nobly a fortune acquired by the rude adventures which you have related."—*Galignani's Messenger*.

For "The Friend."

In glancing over the pages of Penn's "Rise and Progress," I was struck with a passage, where he says, in referring to a class of religious professors called "Seekers:" "They were diligent, plain and serious; strong in scripture and bold in profession; bearing much reproach and contradiction. But that which others fell by, proved their hurt. For worldly influence spoiled them also, and they rested too much upon their watery dispensation, instead of passing on more fully to the fire and Holy Ghost, which was His baptism, who came with a fan in his hand, that he might thoroughly (and not in part only) purge his floor, and take away the dross and the tin of his people, and make a man finer than gold." When these thoughts were passing through the sagacious mind of Wm. Penn, quickened as his perceptions were with heavenly knowledge, could he have seen the distant future, and followed our beloved Society in its unequal struggle with the influence of the world, he would have concluded, under a weight of

orrow, that the Society of Friends *also*, whose interests he labored so much to promote, would, in process of time, reproduce the same painful history in its relation to the effects produced upon it by an ensnaring world. Large indeed are the inroads which have been made upon the peace and good order, which otherwise would have prevailed more eminently among us; for it is obvious much of the lukewarmness and laxity that exists; the prevalent indisposition to support any testimony not regarded with popular favor; the tendency to run after other modes of worship where gather large and fashionable assemblies; where the eye and the ear may be entertained, and little may be heard or witnessed, calculated to humble pride, and break in pieces the flinty heart, proceed from an inordinate love of the pleasures, the honors, and the riches of a vain and fawning world. The love of money is declared to be the root of all evil, which refers, I doubt not, to the world as distinguished from things which belong to one to come; a more enduring life. Hence, if we would make any real progress spiritually, the world must be kept under our feet; for "My kingdom is not of this world." George Fox very often uses this language: "Mind the Light within;" and as this comes to rule in our hearts, other guests which had re-eminence, and have exercised lordship over us, will be denied; and our experience will be as his was, that the path of integrity lies in the path of separation from the world and its spirit. And the watery dispensation of the "Seekers," upon which they relied, is comparable to the condition sadly prevalent within our own borders, of substituting for the rumbling, baptising operations of the Spirit of Truth, a more superficial religion, consisting in a literal knowledge of the Scriptures, and an *historical belief* in the one atoning sacrifice upon the cross.

P. B.

Philadelphia, 5th mo. 2d, 1874.

*Language of the Clouds.*—The colors of the sky at particular times afford wonderfully good evidence. Not only does a rosy sunset presage fair weather and a ruddy sunshine, but there are other tints which speak with equal clearness or accuracy. A bright yellowish sky in the evening indicates wind, a pale yellow wet, a neutral gray color constitutes a favorable sign in the evening, and an unfavorable one in the morning. The clouds are full of meaning in themselves. If their forms are soft, undefined and feathery, the weather will be fine. If the edges are hard, sharp and definite, it will be foul. Generally speaking, any deep, unusual lines, betoken wind and rain, while the more quiet and delicate tints bespeak fair weather.—*Late Paper.*

Selected for "The Friend."

What a sweet feeling spreads over the mind, when through the ever watchful Shepherd, we are enabled to maintain a steadfast guard over our own spirits under provocation, and to stifle the rising disposition to anger and resentment; to suppress even an unkind remark, and to bear in the meek spirit which the Lord alone can give, whatever is calculated to irritate even in the small incidents of life. "He that ruleth his own spirit, is better than he that taketh a city."  
It is only through humble watchfulness,

and secret breathing for preservation, from day to day, that we gain the victory.

## THE FRIEND.

FIFTH MONTH 16, 1874.

From the character of the worship which our Lord declared his Father sought from his dependent creature man, it is evident that to engage in it, or even to endeavor to perform it, is an act of faith. There must be not only a belief that He is, and that He is a rewarder of them who diligently seek him, but that the Holy Spirit is willing and ready to help our infirmities, and, if waited on in the obedience of faith, will prepare and enable the soul to offer the worship that is in spirit and in truth.

To know this to be accomplished when gathered in our religious meetings, there must be silent waiting, in order that the soul may be in a condition to savor the things that be of God; for flesh and blood can no more reveal the invisible I Am, than it could recognize the deity of Christ when He was bodily present with his disciples. They, therefore, who go to meetings for divine worship, absorbed with the thoughts of those things that belong only to the earthly mind, or who are unbelieving in the necessity of preparation of heart, through the operation of a power superior to their own, if they disregard the duty to struggle for a state of solemn, reverential silence, and patient waiting in subjection of spirit before the Lord, are not likely to rise out of a condition unfit to receive heavenly treasure, either immediately from Him who is always in the midst of those who are gathered in his Name, or mediately through the ministry of his servants, whom He has prepared and put forth to speak on his behalf.

It is, therefore, an evidence of sorrowful declension, when, in a Society like that of Friends—favored as it has been with a true sense of the nature of Divine worship—humble, silent waiting before the Lord, loses its due place or repute, and the notion prevails, that meetings for worship must be occupied with preaching or praying, or any other external service. The currency of such an opinion, betrays into two great evils—the waiting of the congregation on those who are expected to preach or pray; and the prompting of persons to engage in those solemn services, whom the Head of the Church has neither commissioned nor prepared for their performance. The inevitable sequence of this departure from a practical belief in the Headship of Christ in his church, and in Him as the beginning and ending of the saint's faith, ever has been, and must continue to be a shallow, emotional religion, accompanied by dry, wordy, high sounding declamation by way of preaching, and long, lifeless discursive prayers. In this way the danger is incurred of promoting ignorance of, if not disbelief in silently and reverently feeding at the Lord's table, where those who truly hunger and thirst after righteousness are favored to partake of the bread and water which come down from heaven, and nourish the soul up unto eternal life.

The age in which Friends arose, was one of great dispute about forms of religion, and

large profession respecting its requirements and its effects. Among the various sects into which the visible church was divided and subdivided, doubtless there were many honest seekers after truth; who, as they failed to find what their souls longed for in one profession, went to another; until the round of all in which they thought a hope might be indulged of finding the lost piece of silver, was exhausted. But alas! how many of them had to confess, that though there was much talk about Christ, the atonement He had made for sin, and justification by belief in him and in it; though the Scriptures were designated the "word of God" and regarded as an indubitable rule of faith and practice, to be therefore studied and taught; and what are called the *sacraments* were deemed efficient means of grace, yet their hearts remained untransformed; the new birth unto righteousness was not brought forth, and bondage to the strong man armed was not done away; the natural result of seeking the living among the dead.

Most of those who became early promulgators of primitive christianity, as revived by Friends, came out from among those sincere, but disappointed seekers, and when they were favored to see the truth as it is in Jesus, by the inshining of the Light of Christ on their darkened hearts, they recognized this as the divine gift promised by Him, to convict the world of sin, of righteousness, of judgment, and to guide his obedient disciples into all truth. As they became changed men themselves, and were prepared for the service by the Head of the Church, they were commissioned by Him to call men to take heed to this manifestation of the Light of Christ in the soul, as the only means whereby they could experience the saving benefits of the miraculous coming, holy life and meritorious death of Him who died for them on Calvary.

Thus George Fox, when speaking of the work he was called to, and the commission he received, says emphatically:

"When the Lord God and his Son Jesus Christ, sent me forth into the world to preach his everlasting gospel and kingdom, I was glad that *I was commanded* to turn people to that inward light, spirit and grace, *by which all might know their salvation and their way to God*; even that Divine Spirit which would *lead them into all truth*, and which I infallibly knew would never deceive any."

This was the scriptural doctrine that principally distinguished Friends from all other orthodox professors, and from it sprang the testimonies they have been called to maintain before the world. It no more invalidates or lowers the doctrine of the atonement, mediation of, and salvation by Jesus Christ, than does the declaration of the Apostle, that "the grace of God bringeth salvation," and is, therefore, *sufficient* for bringing salvation; or that it is the law of the Spirit of life in Christ Jesus that sets free from the law of sin and death; and is, therefore, sufficient to liberate from the bondage of sin. They are all equally in accord with the belief and acknowledgment, that reconciliation with the Father, his forgiveness of sin, and justification by the faith He gives, are all in virtue of the meritorious sacrifice of His Son without the gates of Jerusalem. The benefits of that sacrifice, and of all the other outward offices of Christ, can be savingly known in no other way than through the ministration of this light, spirit, or grace.

Our Saviour told his disciples that it would be one of the offices of the Spirit of Truth, when He was come, to glorify Him, to receive of mine and show it unto you; and the things of Christ can be availingly experienced by no other means. It is only those who walk in this holy Light that know the blood of Jesus Christ to cleanse from all sin.

Alas! how many of those now exercising the office of preachers or teachers in our Society, appear to have seen no farther than most of the professors from among whom Friends were originally gathered; and like them, are leading their hearers to rest their hopes of salvation on a self-wrought faith in the accomplished work of Christ when personally on earth, while knowing little or nothing of the regenerating, transforming work of his Spirit on the soul. How often do we hear them calling their listeners to come to Christ at once—as though sinners could come in their own time and way—and to know their sins to be immediately washed away in the blood shed on Calvary, like those professors of whom George Fox tells, who would have the blood *only* without them, and not within them. But by obedience to the inward manifestations of the Light or Spirit of Christ, he and the other early Friends were enabled to see the blood of Christ to “sprinkle the heart and conscience from dead works to serve the living God.” They preached salvation through Christ to all to the very ends of the earth, who would comply with the terms; repentance towards God, and faith in our Lord Jesus Christ, as He reveals himself in the soul by his Light and grace, and as made known in his several offices through the holy Scriptures, to those who are blessed with a knowledge of those sacred records; and salvation through Him to those who are not favored with that knowledge, by obedience to the same Divine Light bestowed upon all, so far as it and its requirings are made known.

Friends have always borne testimony against the doctrine, of men being justified by a faith in Christ that is not manifested by good works, and allows them to remain in their sins; and have held that unless the regenerating work of the Holy Spirit is known in the soul, Christ has died for us in vain. To this transforming work, therefore, have they mainly called the attention of the people, inasmuch as the design of Christ's coming in the flesh, was to save them *from* their sins, and to destroy the works of the devil. Yet they fully and gratefully acknowledge the mercy of the Father in giving his dear Son to atone for and ransom his fallen creature man, that so, *through grace*, the repentant sinner may be justified freely, by the redemption that is in Christ Jesus.

Were these scriptural doctrines, as originally promulgated by Friends, and held by true Friends ever since, preached to the people by all, in the demonstration of the Spirit and power, we should not hear of the excited, methodistical\* scenes, so rife in many places within the pale of the Society. But the retrogression in doctrine and consequent disregard of testimonies springing from it, is hailed as a revival, and, unless the Lord had been pleased to preserve a remnant to uphold Quakerism in its purity, the whole Society would drift back into the profession of the different de-

nominations out of which it was first brought, and having lost the *substance*, in the feeling of unsatisfied want, finally be induced to resort to the shadow, displayed in the beggarly elements.

#### SUMMARY OF EVENTS.

**FOREIGN.**—The state of affairs in Spain does not appear to have changed materially. Although the Carlists were compelled to raise the siege of Bilbao, their forces did not move to any great distance and soon returned to the vicinity. Dispatches from Bilbao say that General Concha's troops are throwing up fortifications. Don Carlos and General Elio are reported to be at Durango, thirteen miles southeast from Bilbao. Don Carlos has issued a proclamation announcing that he will offer strong resistance to the Republican army in the Biscay provinces. Bilbao has been completely re-occupied. It is stated that a body of Carlists under command of Don Alfonso had been defeated by the Republican troops.

General Manuel Concha has been appointed General-in-chief of the Republican army of the north.

After the capture of Bilbao the Spanish government again applied to Germany for the recognition of the Republic.

In the House of Commons it was stated in reply to the inquiry of a member that the British government desires the resumption of diplomatic relations with Mexico, and is ready to receive overtures to that end.

The coal miners of Durham have yielded to the terms of their employers, and the strike is ended. The prices of iron and coal have advanced in consequence of the strikes. Seventy thousand laborers and miners were recently out of employment and great distress prevailed among them.

A meeting has been held in London to urge the disestablishment of the Church of England. Goldwin Smith presided. In his address he advocated the application of church endowments to the relief of the poor and the promotion of education.

The steamship Caspian which left Liverpool for Quebec on the 6th inst., took out 350 agricultural laborers for Canada.

The number of co-operative societies in England and Wales is 746, with 300,587 members.

London, 5th mo. 11th.—Consols 93. U. S. five per cents, 104½.

Liverpool.—Uplands cotton, 8½d.; Orleans, 8½d.

The American Oriental Topographical Corps, now in the Holy Land, have reached Jerusalem, after making successful explorations in the vicinity of Mount Sinai. They report as very remarkable the fact that they were detained two days by a heavy snow storm about Mount Sinai. The expedition will leave for Bashan and Moab.

The annual iron product of the world is 276,500,000 cwt. England produces more than one half of the whole amount, North America about one-fifth, France about one-twelfth, and Belgium about one-twenty-fourth, these four constituting the great iron-producing sections of the globe.

Severe frosts have done great damage to the vines throughout France. It is estimated that the grape crop this year will not be above half an average one.

Many cattle are starving in Nova Scotia. The winter supply of fodder is exhausted, and the backward spring has kept the grass from growing.

The length of the St. Gotthard Tunnel will be 9 miles and 715 yards. The altitude at the northern entrance at Goeschenen will be 3703 feet above the level of the sea, and that of the southern entrance 3850 feet. The highest point in the interior will be 3873 feet above the sea level.

A Madrid dispatch of the 11th says: The Carlists, under Don Alfonso lost 500 men in killed and wounded in their recent defeat.

A special dispatch to the London *Times* says General Concha began his advance from Bilbao on the 11th. The Carlists are entrenching themselves in the mountain passes. General Elio has issued a decree that all persons expressing dissent to the pretensions of Don Carlos will be shot.

Foreign papers brought by the latest mails, report unusually warm weather all over Europe. In Paris and London the temperature was higher at the end of Fourth month than it usually is in mid summer.

**UNITED STATES.**—*Miscellaneous.*—The deaths in New York last week were 488, and in Philadelphia 300.

Disastrous fires are raging in the woods on the line of the Lake Superior Railroad at North Branch and Pine City, Minn. Fires are likewise reported in the forests along the West Wisconsin Railroad, and trains are delayed in consequence.

A fruit company at Santa Barbara, Cal., have under cultivation eighty acres of olive, almond and walnut trees. The olive is cultivated with great success in California, some trees yielding twenty gallons of oil.

The Gloucester fishing fleet, off Newfoundland, experienced very rough weather during last month. Several vessels were damaged and four men were drowned.

The court martial to try the charges preferred against Major General O. O. Howard, has adjourned *sine die*. The decision of the tribunal, after review of the Judge Advocate General, will be sent to the President for executive action. It is understood that General Howard is entirely exonerated from all charges.

In Philadelphia there are now 401 public schools with 1633 teachers; number of names on the list of registered voters 167,094; number of officers in Police Department 1092. The area of the city, including the so called rural districts is 129 square miles.

According to a recent statement the number of news papers and periodicals in the United States has increased from 4051 in 1860, to 6875 in 1874. Some of these publications have quite a limited circulation others range between 50,000 and 100,000. Of these 64 are daily papers, 5185 weeklies, and 1053 other inter vals.

A disgraceful contest has been going on in Arkansas for several weeks past between two rival claimants to the office of Governor of the State. No reference has been made to it in the summary because of the impossibility of giving any clear statement in a few lines of the origin and circumstances of the difficulty. Each claimant has attempted to support his pretensions by violence, and several persons have been killed and wounded in hostile collisions. This state of affairs has induced President Grant to advise that the Legislature of the State shall promptly assemble to determine whether Baxter or Brooks shall be Governor. He also urgently requests that all forces on both sides be disbanded, so that the General Assembly may act free from any military pressure or influence.

*The Markets, &c.*—The following were the quotations on the 11th inst. *New York.*—American gold, 112½; U. S. sixes, 1881, Reg. 119¾; Coupons 121½; ditto 1868, Reg., 119¾; coupons, 120½; U. S. fives, 115½; Superfine flour, \$5.40 a \$5.95; State extra, \$6.10 \$6.45; western shipping, \$6 a \$6.55; finer brands, \$7 \$10.25. No. 1 Chicago spring wheat, \$1.55; No. 2 do \$1.48 a \$1.50; red western, \$1.63 a \$1.64; white Michigan, \$1.82. Oats, 64½ a 66 cts. Yellow corn 85 cts.; white, 87 a 89 cts. *Philadelphia.*—Upland and New Orleans cotton, 18½ a 19 cts. for middling; Superfine flour, \$5.25 a \$5.75; extras, \$6 a \$6.50 finer brands, \$7 a \$10.50. Western red wheat, \$1.50 \$1.65; Penna. \$1.72; western white, \$1.85; No. spring, \$1.50; No. 1, \$1.55 a \$1.60. Rye, 98 cts. Oat 60 a 65 cts. Yellow and white corn, 85 a 86 cts. Lard 11 a 11½ cts. Clover-seed, 9¾ a 10½ cts. Sales of 220 beef cattle at 5 a 6 cts. per lb. gross for common, and 6¾ a 7¾ cts. for fair to choice. Woolled sheep sold at 5 a 9½ cts. per lb. gross, and clipped, 5¾ a 7¾ cts. About 6000 hogs sold at \$3.75 a \$9 per 100 lb. net for corn fed. *Baltimore.*—Choice amber wheat, \$1.78; Ohio and Indiana red, \$1.55 a \$1.57. Yellow corn, 84 cts.; white 84 a 87 cts. Oats, 63 a 66 cts. *Chicago.*—No. 1 spring wheat, \$1.28; No. 2 do., \$1.22½; No. 3, \$1.17. No. 4 mixed corn, 62 cts. No. 2 oats, 47 cts. No. 2 rye, 90 cts. No. 2 spring barley, \$1.40. Lard, \$10.25 per 100 lbs. *St. Louis.*—Fall wheat, \$1.50 a \$1.52; No. 1 spring, \$1.27. No. 2 oats, 52½ cts. No. 2 corn, 67 cts. *Cincinnati.*—Wheat, \$1.45. Corn, 73 a 76 cts. Oats, 50 a 53 cts. Rye, \$1.08. Spring barley, \$1.25 a \$1.30. Lard, 10¾ a 11 cts.

#### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

DIED, at his residence in West Chester, Pa., on the 27th of Third mo. 1874, DAVIS REECE, aged 72 years. The deceased was for about thirty-four years usefully and acceptably engaged as teacher and governor in the boys' department at Westtown Boarding School. In this position he maintained a remarkable degree of equanimity of temper, blending firmness with kindness, and manifested such a consideration for the feelings of others, as to win the regard of both pupils and preceptors. He was favored with patience through a lingering decline, and his end was peace.

\* This word is not used disparagingly of the respectable Society whose tenets admit of these excited scenes.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, FIFTH MONTH 23, 1874.

NO. 40.

PUBLISHED WEEKLY.

Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,  
PHILADELPHIA.

Stage, when paid quarterly in advance, five cents.

Report to the Yearly Meeting made by the Committee appointed by it in 1872, and continued in 1873.

to the Yearly Meeting:—

The Committee continued at our last Yearly Meeting to visit the subordinate meetings, and submit the following report:—

During the past year, the different divisions of the Committee have been pretty steadily engaged in visiting the Quarterly, Monthly and Particular Meetings; and in several places the families of Friends, endeavoring with such ability as has been mercifully afforded, to perform the duty committed to them, as set forth the minute of their appointment, viz.: "To invite Friends to renewed diligence, to show forth in their lives and conversation, a constant maintenance of all our Christian Doctrines and Testimonies, that so they may become firmly established on our most holy faith, and be more fully united together in the fellowship of the gospel."

We have been made sensible, from time to time, of the merciful extension of Divine regard and help, and introduced into the feeling of affectionate interest and Christian sympathy with our members in the different meetings, and in the varied circumstances in which they are placed; and we trust, that the labor of love, has been productive of good to both the visitors and the visited.

We have been repeatedly brought under close exercise, on account of the many deficiencies apparent, and the lukewarmness, or spiritual deadness, prevailing among many of our members; so that in some places the language is applicable, "The ways of Zion do mourn, because so few come to the solemn festivals." "Her gates are desolate."

It has, however, been felt to be a cause of gratitude, that low as the life of religion is in some places, there are those preserved, even where weakness greatly prevails, who are deeply concerned for the salvation of their dear souls; are sensible of the weakness and departures around them, and are, at times, enabled to labor and to pray acceptably for the removal of those things that obstruct the return of the purity and power which once distinguished our religious Society.

We are tenderly concerned for the encouragement of these, and for their growth and establishment on the immutable Rock and

foundation, Christ Jesus. It is only on such shoulders, that a real concern for the welfare of the church can rest; and it is among such only, that we can look for rightly qualified members to fill the various important stations in the Society.

The spirit of the world, by its various delusive presentations, has drawn many away from submission to the self-denying requirements of the gospel of Christ, and prompted them to devote their time and their talents, to pursuits which, however lawful in themselves, by almost wholly absorbing the attention, prevent the mind from duly heeding the reproofs of instruction which are the way of life, and from being brought under the crucifying power of the cross, so as to lead them to seek first the kingdom of God and His righteousness, trusting to the fulfilment of the promise, that all things needful shall be added.

As this worldly spirit is allowed to prevail, it disinclines to that introversion of mind and retirement before the Lord, which are most favorable to a sight of our true condition, and to the experience of being engrafted into Christ the living Vine, and to our growth in Him.

When such, in whom the earthly mind predominates, assemble in our religious meetings, they feel little or no inclination or qualification to enter into that spiritual exercise necessary, to offer the worship that is in spirit and in truth. Thus it is that our meetings are often dull and unrefreshing; the spirits of those who are concerned to labor for the arising of the well-spring of Divine life, being oppressed by others who pass the time, it is to be feared, in listlessness and unconcern, and in some instances even in drowsiness.

In this state of mind, excuses are readily found for omitting this solemn obligation, and thus it is painfully observable, that in most places there are numerous deficiencies in regard to the attendance of our meetings for Divine worship, as well as those for discipline.

We earnestly desire the attention of Friends may be turned to this subject, and that those who are negligent and careless, may be aroused to consider the danger of continuing in the course they are pursuing, and its probable consequences to themselves and to their families, thereby sustaining a loss for which no amount of outward riches can compensate them.

We have had to mourn over the tendency evinced by many to under-estimate the value and importance of the testimonies of the gospel, which Friends are called to uphold before the world; and the manners, habits, fashions and customs of it, are so far adopted by them that scarcely anything is left to indicate that they are endeavoring to follow in the footsteps of the self-denying followers of Christ, and thus the design of the Lord Almighty in raising Friends up as witnesses to the purity and the power of the religion of Jesus, is frustrated by them.

We have been brought under exercise by the conviction, that many entrusted with the care and training of children, are not duly impressed with the solemn duty incumbent upon them, to bring them up in the nurture and admonition of the Lord; to use parental authority to restrain them from indulgence in their evil propensities, and by consistent example and instruction in the truths of the gospel, to prepare their hearts for the reception and growth of the incorruptible seed and word of God. There is too much disposition on the part of many, to allow the young to act according to their own inclination, to indulge their childish taste for finery and folly, and thus parents incur the serious responsibility of being instrumental in initiating their offspring into the associations, modes of dress, manners and ways of a vain world. We do affectionately desire, that heads of families and others having children under their control, may be earnestly concerned to seek after a qualification, rightly to estimate and faithfully to discharge the duties that rest upon them, in the firmness, the meekness and wisdom of Him whose heritage children are, and which He alone can supply.

We have been made sensible that it is a day of peculiar trial and discouragement, especially to the young and inexperienced. Many of our dear young people, are often perplexed by the many voices that are among us, and we have been brought into near and tender sympathy with them. There are not a few among them who give evidence that their hearts have been tendered and contrited by the love of Christ their Saviour, raising in them an attachment to His holy cause of truth and righteousness, accompanied with the desire that the true standard may continue to be upheld among us, and our right place in the visible church be faithfully maintained; we are, nevertheless, deeply impressed with the belief, that in regard to many of this class, there has been a stopping short, a holding back, a shrinking from that full and entire surrender of the heart to the Lord, and to the leading and government of His pure spirit, whereby they would have been led to show themselves more conspicuously to be the humble, dedicated followers of the Lamb. This halting course admits concessions to the manners, language, maxims and customs of the world, and is an effectual hindrance to their growth in the Truth, and to their attainment of that peace and joy in the Holy Ghost which we believe many of our beloved young friends long for, and which is the blessed experience of the true believer in, and faithful follower of our Lord Jesus Christ. It is to this cause, in great measure, must be attributed the state of our meetings in many places, and the withholding by the blessed Head of the Church, of those spiritual gifts which He would dispense for the edification and strengthening of its members.

It is of the utmost importance, that what-

ever turning and overturning the Lord may permit to come upon us, our young people, as well as all others, should be settled in the belief, that nothing is so essential for their present and eternal welfare, as close attention to the discoveries of the Light of Christ to their souls, and unreserved obedience thereto. By this they will be enabled to distinguish between the voice of the true Shepherd and the voice of the stranger. The gate is strait and the way is narrow, but it is the way of holiness and peace. It is only by offering unto the Lord the undivided sacrifice of the heart when He is pleased to call for it, that our sons can ever become as "Plants grown up in their youth, and our daughters as corner stones, polished after the similitude of a palace." When this becomes our happy and favored condition, we shall again see judges raised up as at the first, and counsellors as at the beginning—and the Lord will comfort Zion, and her waste places will be built up.

Unless the government of Christ as the everliving Head of His church, is not only acknowledged in word but practically witnessed by our members, the will and the wisdom of man take the lead; and thus the unity of the spirit, which is the only bond of peace in all the churches of Christ, cannot be maintained. In this state of things, persons may be induced to appear in our meetings in the way of ministry, without the accompanying evidence of right preparation, and the reception of a gift for that weighty service. Unauthorized ministry hurts meetings, and it is a grief and burden to those who are measurably qualified to try words as the mouth tasteth meat. We are concerned to express our desire, that a watchful care may be continued to guard against the increase of a spirit which, under this prompting, at length runs quite out—undervalues vital religious distinctions, and abandons the testimonies of truth in a creaturely zeal, not according to knowledge.

While attending the meetings of ministers and elders, we have been made sensible of the need of more fervent religious exercise and humble dwelling with that invisible Power, which alone can qualify for service in the church. If this were attained to, it would bring the members into more harmonious labor for the honor of Truth, and lead into more lively zeal and diligence in the religious oversight of the flock; the language of the apostle being brought to remembrance: "The elders which are among you I exhort, who am also an elder, and a witness of the sufferings of Christ, and also a partaker of the glory that shall be revealed." "Feed the flock of God which is among you, taking the oversight thereof."

The discipline having been established in Divine wisdom, as a hedge about the members, to preserve from the inroads of evil, as well as to promote Christian care one over another for good, it requires a measure of the same wisdom rightly to engage in its administration. Within the limits of all the Quarterly Meetings, there are those preserved consistent in life and conversation, who are concerned for the spiritual welfare of their fellow members, and to support the discipline and order of the Society. We feel constrained, however, to acknowledge, that there are meetings wherein, from several causes, the discipline does not seem to be carried out with that promptness and impartiality, which are need-

ful to maintain the precious cause of truth, and to promote the welfare of the body.

While the mere natural wisdom and will of man have no place in the church of Christ, we would tenderly encourage the rightly concerned in our Meetings for Discipline, who may be entrusted with a sentiment on the business before such meetings, to be simple, honest and faithful in giving expression to it in the fear of the Lord, and in the obedience of faith in Him, yielding themselves up to the service that may be required at their hands. This is the way that the talent committed is to be used and occupied with, and it is the way to peace and enlargement—being faithful in a little, we shall be made rulers over more.

Our Yearly Meeting in 1795, declared its judgment in the following minute of advice: "We are concerned that the management of our Christian discipline, be not committed to hands unclean, particularly of such who allow undue liberties in their own children and families. 'If a man,' said the apostle, 'know not how to rule his own house, how shall he take care of the church of God.'" It has been a cause of sorrow to observe, that in some meetings, those are occasionally appointed to stations or employed in services, who make no appearance of being Friends, and whose manner of life is not in accordance with our distinguishing doctrines and testimonies. Herein the precious cause we are called to uphold and promote must suffer.

We apprehend advantage might arise if Quarterly Meetings would, from time to time, take into solid consideration the condition of their subordinate branches, and where from reduced numbers in some cases, or other causes in others, meetings appear to need help or care, separate a few Friends for the service, who may be incorporated with such meetings, or otherwise as might appear best at the time, that thus the hands of faithful Friends may be strengthened and the cause of truth upheld. If upon solid consideration in such cases, Quarterly Meetings should deem it desirable to have the aid of the Yearly Meeting, they should be encouraged to make application for that purpose.

The practice of the frequent reading of the Holy Scriptures, we trust is general among our members. The gathering of our children together, and reverently waiting upon the Lord for the renewal of our spiritual strength, is attended with a blessing. The seasoning virtue and sense of the Divine presence, is often vouchsafed at such times to be the help and encouragement of the humble follower of Christ. We would tenderly commend this subject to the attention of our dear Friends, especially to those who may be negligent of this duty.

In thus reviewing the state of our beloved Society, and in alluding to some of the weaknesses and inconsistencies apparent within our borders, it is far from our design to produce discouragement, but rather to incite our members in every part of the Yearly Meeting to increased zeal and diligence in the faithful discharge of their religious duties, in the love and in the fear of God. We fervently desire the encouragement of the humble, watchful traveller towards Zion,—the city of the great King—however obscure their situation may be, and hidden from the sight of mortals, as they keep close to the Captain of their souls' salvation, "their place of defence shall be the munitions of Rocks, bread shall be given them;

their water shall be sure." We rejoice also in the belief that a renewed and gracious visitation hath been extended to many of our beloved youth. In these evidences of the continued extension of Divine regard to us as a people, may we be enabled to thank God and take fresh courage, and be animated still to contend earnestly for the faith, which was once delivered to the saints. The Lamb and His followers shall have the victory.

The Committee suggest that they be now released.

For "The Friend."

### The Heart of Africa, by Dr. Schweinfurth.

(Continued from page 307.)

"Very few are the people of Central Africa amongst whom the partiality for finery and ornaments is so strongly shown as with the Bongo. The women wear on their necks an accumulation of cords and beads, and not being fastidious like their neighbors, will put on without regard to shape or color, whatever the market of Cartoom can provide. The men do not care much for this particular decoration, but prefer necklaces, on which the string some of those remarkable little fragments of wood which are so constantly found in every region of Africa. With the bits of wood hang fragments of roots, which are in form something like the mandrake, which in Southern Europe, has been the subject of so strange a superstition. Alternating with the roots and wood are the talons of owls and eagles, the teeth of dogs, crocodiles, and jackals, little tortoise-shells, the claws of the earth pig (*Orycterpus*), and in short any of those objects which we are accustomed to store in the cabinets which adorn our salons. The appear to supply the place of the extract from the Koran which, wrapped in leather sheathes, the Nubians wear by dozens about their person; anything in the shape of an amulet being eagerly craved by every African.

"The Bongo women delight in distinguishing themselves by an adornment which to our notions is nothing less than a hideous mutilation. As soon as a woman is married the operation commences of extending her lower lip. This, at first only slightly bored is widened by inserting into the orifice a plug of wood gradually increasing in size, until at length the entire feature is enlarged to five or six times its original proportions. The plug is cylindrical in form, not less than an inch thick, and are exactly like the pegs of bone or wood worn by the women of Musgoo. By this means the lower lip is extended horizontally till it projects far beyond the upper which is also bored and fitted with a copper plate or nail, and now and then by a little ring, and sometimes by a bit of straw about as thick as a lucifer match. Nor do they leave the nose intact: similar bits of straw are inserted into the edges of the nostrils, and I have seen as many as three of these on either side. A very favorite ornament for the cartilage between the nostrils is a copper ring

st like those that are placed in the noses of affaloes and other beasts of burden for the purpose of rendering them more tractable. The greatest coquettes among the ladies wear a clasp or clamp at the corners of the mouth, though they wanted to contract the orifice, and literally to put a curb upon its capabilities. These subsidiary ornaments are not however found at all universally among the women, and it is rare to see them all at once upon a single individual: the plug in the lower lip of the married women is alone a *ne qua non*, serving as it does for an artificial distinction of race. According to the custom of the people, there need only be a slight projection of the skin so as to form a lip or a fold, to be at once the excuse for boring a hole. The ears are perforated more than any part, both the outer and the inner orifice being profusely pierced; the tip of the ear alone is frequently made to carry half dozen little iron rings. There are women in the country whose bodies are pierced in some way or other in little short of a hundred different places.

"Besides the ornaments that I have mentioned, the toilet of a Bongo lady is incomplete without the masses of iron and copper rings which she is accustomed to wear on her wrists and arms, and more especially on her ankles. These rings clank like fetters as she walks, and even from a distance the two sexes can be distinguished by the character of the sound that accompanies their movements. That human patience should ever for the sake of fashion submit to a still greater martyrdom seems almost incredible, though hereafter we shall have sufficient proof when we delineate the habits of the Mittoo, the neighbors of the Bongo, that such is really the case."

Among the Mittoo, to whom reference is here made, it is customary, among the devotees of fashion, to insert in the upper lip a round plate of quartz, ivory or horn, which extends it perhaps three-fourths of an inch beyond its natural size; and to bore the lower lip and pierce it with a cone of quartz about seven-eighths of an inch in diameter, and two and a half inches long. Strange as such devices may seem, they are by no means incredible. One who calmly reflects upon the lengths to which many of the women of civilized communities will follow the dictates of fashion, would expect to see them adorn themselves with nose and lip jewels, if such should ever become the custom in the circles in which they move.

"The Bongo games are simple in their character. One of these games, as forming excellent training for the chase, deserves some especial notice. A number of men are provided with pointed sticks made of hard wood, which they use as lances. They form a large ring, and another man who has a piece of soft wood attached to a long string, runs round and round within the circle. The others then endeavor with their pointed sticks to hit the mark whilst it is being carried rapidly round. As soon as it is struck it falls to the ground, and the successful marksman is greeted with a loud cheer. Another game requires no less altness and dexterity. A piece of wood cut into a crescent has a short string attached to the middle; this wood is then hurled by the one end of it with such violence to the earth that it goes spinning like a boomerang through the air. The players stand face to face at a distance of about twenty feet apart,

and the game consists in catching the wood by the string, a performance that requires no little skill, as there is considerable danger of receiving a sharp knock.

"Elsewhere, and among other nations with whom I became acquainted, the number of a man's wives was dependent on the extent of his possessions, but amongst the Bongo it seemed to be limited to the maximum of three. Here, as in Africa, a wife cannot be obtained for nothing, even the very poorest must pay a purchase price to the father of the bride in the form of a number of plates of iron; unless a man could provide the premium, he could only get an old woman for a wife. The usual price paid for a young girl would be about ten plates of iron weighing two pounds each, and twenty lance tips. Divorees, when necessary, are regulated in the usual way, and the father is always compelled to make a restitution of at least a portion of the wedding-payment.

"In the disposal of their dead, the custom of the Bongo is very remarkable. Immediately after life is extinct, the corpses are placed, like the Peruvian mummies, in what may be described as a crouching posture, with the knees forced up to the chin, and are then firmly bound round the head and legs. When the body has been thus compressed into the smallest possible compass, it is sewn into a sack made of skins, and placed in a deep grave. A shaft is sunk perpendicularly down for about four feet, and then a niche is hollowed to the side, so that the sack containing the corpse should not have to sustain any vertical pressure from the earth which is thrown in to fill up the grave.

"A genuine and downright belief in witches has long been and still continues as deeply seated here as in any spot upon the face of the earth, and nowhere are prosecutions more continually being instituted against them. As matter of fact, I can affirm that really aged folks among the Bongo are comparatively scarce, and that the number of grey-headed people is, by contrast, surprisingly large amongst the neighboring race of Dyoor, who put no faith at all with any witchcraft. The Nubians are not only open to superstitions of their own, but confirm the Bongo in theirs. In the Eastern Soudan, which is a Mohammedan country, the conversation will constantly turn upon the 'sahara' (*i. e.*, the witches), and no comparison is more frequent than that which likens the old women to hyænas: in fact, many of the people hold hard and fast to the conviction that the witches are capable of going out at night, and taking up their quarters inside the bodies of these detestable brutes, without any one being aware of what is happening. It chanced, during my stay in Gallabat, that I killed one out of a herd of hyænas, that was infesting the district; my fate, in consequence, was to be loaded with reproaches on the part of the Sheikh, who informed me that his mother was a 'hyæna woman,' and that I might, for all I could tell, have shot her. After this I was not so surprised as might be expected when Idrees, the governor of Ghattas's Seriba, boasted in my presence of his conflicts with witches, bragging that in one day he had had half a dozen of them executed. An occasion shortly afterwards arose, when Idrees was contemplating putting two old women to death at the desire of some Bongo, and the only scheme I could devise to make him de-

sist from his purpose, was by threatening him that, in the event of the woman being executed, I would poison his water-springs."

For some months our author remained at the Seribas, busily engaged in collecting and preserving the botanical curiosities of the surrounding country. These when made into packages of convenient size were sewn up in hides, coated on the outside with the milky juice of some plants which hardened into a varnish, and forwarded to Europe as opportunity offered. He then joined the party of Aboo Sammat on a long excursion to the South among the Nian-nian country, and through their territory to the Monbuttoo, who live south of the head waters of the Nile, the streams in their district flow westward into the central portion of Africa.

Dr. Schweinfurth makes frequent reference to the misery and decay caused by the oppression of the Egyptian traders; an effect which he says is found wherever the Mahomedan religion penetrates in Africa. The slave-trade accompanies all their movements, though, in the case of the ivory merchants, it is rather an incidental than a prominent object. The Egyptian government, he thinks, will never be able to eradicate it, unless they first take possession of Darfoor, the great nucleus of the Central Africa slave-trade. The following passage from his book shows his feelings for the natives.

"Every mouthful of food that I swallowed in this unhappy country was a reproach to the conscience, but the voice of hunger drowned every higher emotion; even the bread that we ate had been forced from the very poorest in the season of their harvest, when their joy, such as it was, was at its height; they probably had neither cow nor goat, and their little children were in peril of dying of starvation and only dragged out a miserable existence by scraping up roots. The meat, in the abundance of which we were revelling, had been stolen from poor savages, who pay almost a divine homage to their beasts, and who answer with their blood for the stubbornness with which they defend their cows, which they hold dearer than wife or child."

For "The Friend."

Hints Touching the Domestic, Social, and Religious Relations of a Wife and Mother, and the Duty of Resignation under Trials; from a Memoir of Deborah Backhouse.

"A cough which Deborah Backhouse had had from the latter part of 1825, continued so as to confine her to the house during part of the following winter; but she was in so improved a state of health, as to get to meetings in the spring of 1827; and her communications in the ministry were, at this time, more frequent than had generally been the case at any former period.

The great delicacy of her health necessarily secluded her much from the society of her friends; but seldom entirely prevented her attending to the state of her own family. She was a very affectionate wife and parent, and was exemplary in the management of her children; in whom she was careful to suppress, from the earliest period, the appearances of self-will. She was of the judgment, that as soon as children could understand, they should be taught to distinguish between right and wrong; by having their attention directed, in a familiar way, to the operation of the Spirit of their Heavenly Father in

themselves; as causing them to feel comfortable when they do right, and uncomfortable when they do wrong; and this she frequently endeavored to impress upon the mind of her daughter, who was but about four years of age."

We have been ready to query sometimes when dwelling upon the state of our Society, in view especially of some of our younger members, whether parents have been sufficiently watchful and faithful in the great duty alluded to by D. B. in the foregoing paragraph? Whether the merchandise, the farm, or the many other relative and social, and very lawful duties when kept in their proper place, had not too oft so abstracted or too exclusively engaged the mind, that this very imperative and fearfully accountable one had not been much overlooked!

The influence of parents, and particularly mothers, over the precious olive plants committed to them is very great. And in proportion to this influence, whether for good or for evil, will be their reward or solemn accountability in that day for which all other days were made. If engaged conscientiously to train them up in the Lord's fear and admonition, no less by consistent, exemplary walking in His fear themselves, than by godly precept coupled with holy restraint, and all being backed by the heart's earnest, breathing petition to the God of knowledge for their preservation, then may they confidently hope that He will bless their efforts; will hear and accept their prayers even as incense, and the lifting up of their hands as the evening sacrifice.

Parents herein may, in some cases, have to labor long; to toil on and on and on without the encouragement of much fruit; yea, even sometimes to sow in tears. But the Lord, whose eye is on the heart, seeth all. It is written, "Behold we count them happy *which endure*." And, "The husbandman waiteth for the precious fruit of the earth, and *hath long patience* for it, until he receive the early and the latter rain." As the faith of these religiously concerned parents fails not, and the sincere, earnest application of their souls is, through the help of the Holy Spirit, unto Him who hath all power in heaven and in earth, He will, in His own time, either give them the desire of their hearts in seeing their dear children preserved steadfast in His new covenant law, or else He will strengthen with strength in their souls, and proclaim a blessing, in that they have done what they could. But oh! that these, in view of the awful retribution, may be aroused to inwardness, watchfulness, and prayer; that feeling the unspeakable value of their own immortal souls in the sight of Him who died to save them, as well as that of those to so large an extent entrusted to their keeping, they may availingly ask counsel of Him who "giveth liberally and upbraideth not," that so, from generation to generation the hearts of the parents may be turned to the children, and the hearts of the children to the parents, to the praise and glory when yielded to, of the Redeemer's all-sufficient, all-saving, invincible grace.

"Deborah Backhouse was industrious and orderly in the management of her household affairs; kind in her manners to her servants; but preserved, with firmness, a proper authority over them, and endeavored to promote their spiritual as well as temporal welfare. She felt much for the poor; and encouraged

her servants to be careful to waste nothing that might be useful to them. She retired to rest as well as rose early: often saying, she had observed things thrown much out of proper order, and much time lost, by the heads of families sitting up to an unseasonable hour and rising late.

She was diligent in reading the Holy Scriptures; and careful to have them read daily, in the presence of her family and servants.

About this time she was brought into a very trying baptism of spirit, under a sense of the withdrawing of the supporting influence of Him, whom her soul loved; and without whose help, she felt it to be impossible to be resigned to a separation from the nearest ties of life; which she apprehended might be fast approaching. She sometimes remarked, that she felt as if she could give up to any thing rather than to die. In this state she patiently waited upon the Lord for strength to bow to His holy will; and He was pleased, after permitting this season of deep proving, to enable her cheerfully to adopt the language: 'Not as I will, but as Thou wilt.'

From about the middle of the Eleventh month, her strength declined more rapidly; and toward the latter part of it, she gave up being carried down stairs; having been for some time unable to walk down. For several succeeding days she was brought into the drawing room, and laid upon the sofa; but her weakness increasing, she became unequal to this exertion; and on the first of the Twelfth month remained in bed, expressing her apprehension that she should not have her clothes on again; which proved to be the case."

(To be continued.)

*The Strength of Materials.*—Gold may be hammered so that it is only 1,360,000 of an inch thick. A grain of iron may be divided into 4,000,000 parts. Still chemistry tells us that there are ultimate parts called atoms or molecules, which are absolutely invisible. These atoms are attracted to each other by the attraction of cohesion, and repelled by the force of repulsion. By the action of both these forces the atoms are kept in a state of pact. The solidity of a solid depends upon the fact that each pair of atoms are in this state of equilibrium. These atoms are supposed to be of an oblate spheroidal form. An iron bar would support its own weight if stretched out to a length of 3½ miles. A bar of steel was once made which would sustain its weight if extended to a length of 13½ miles.

Our ideas of great and small are no guide to be used in judging of what is truly great and small in nature. The Bunker Hill Monument might be built over a mile in height without crushing the stones at its base. When bars of iron are stretched until they break, those which are the strongest increase in length less than the weaker ones. A piece of wood, having a breadth and thickness of three inches, and a length of four feet, if supported at its ends, would be bent one millionth of an inch by a weight of three pounds placed at its centre, and a weight of one-tenth of an ounce would bend it one seven-millionth of an inch. Professor Norton described a machine for testing the variations of sticks of wood. The machine consists of levers and screws so contrived that the amount of weight brought to bear upon the stick can be accurately mea-

sured, and the variation of the stick from straight line can be measured, even though it does not exceed one seven-millionth of an inch.—*Late Paper.*

Selected.

"REJOICE IN THE LORD ALWAYS."

Their brows should wear a holy light,  
Who front the heavens serenely bright;  
And gladness should their steps attend  
Who walk with God as with a friend.

For every footfall of their way  
But brings them nearer to the day  
That knows no night, and to the joy  
Nor grief can mar, nor sin alloy.

Fixed in the path that He hath trod,  
Their lives are hid with Christ in God,  
And dwell secure from every harm,  
Encircled by the Father's arm.

Behind the cloud, above the storm,  
His sunlight lingers soft and warm;  
And even through midnight's gloomiest pall  
Some beams of mercy gently fall.

However dark the frown of fate,  
God will His promise vindicate,  
And in His own good time and way,  
Bring in the full and perfect day—

In whose glad light shall disappear  
All that perplexed and troubled here,  
And show the weary path they trod,  
As the one path whose end is—God!

Selected.

TROUBLE.

Trouble, dear friend, I know her not. God sent  
His angel Sorrow, on my heart to lay  
Her hand in benediction, and to say,  
Restore, O child, that which the Father lent  
(For He doth now recall it) long ago.  
His blessed angel Sorrow, she has walked  
For years beside me, and we two have talked  
As chosen friends together. Thus I know  
Trouble and sorrow are not near of kin.  
Trouble distrusteth God, and even wears  
Upon her brow the seal of many cares;  
But sorrow oft has deepest peace within,  
She sits with Patience in perpetual calm,  
Waiting till Heaven shall send her healing balm.

For "The Friend."

Reflections upon Philadelphia Yearly Meeting.

(Continued from page 308.)

During the exercises of the Yearly Meeting recently held, as well as on the similar occasion last year, there was exhibited on the part of one or two of our members, a desire to draw a distinction between simplicity of dress in the abstract, and any peculiar form of dress which would distinguish our members from other people. The propriety of the former was acknowledged, while objection was made to the enforcement of the latter; and it was asserted that in the early days of the Society no such outward mark existed.

There is no reasonable doubt, that at the rise of our Society, its members dressed as sober-minded people of that time did. But the tendency, which exists so strongly in many minds, to follow the changes which fashion introduces, without any consideration of increased comfort or utility, was very early condemned by them, as being evil in its origin and in its effects. Hence but a short time elapsed, before they became a peculiar people in dress, not because they had adopted any special form, but because they felt restrained from imitating the continual changes of those about them. A rigid uniformity never has existed, even among plain people, nor is it desirable—but from that time to the present, consistent members of our Society have been known by their clothing and language, and it is desirable they should.

The proof of these positions is abundantly scattered through the writings of the Society. As early as 1654, only seven years after he commenced his public labors as a minister of the gospel, George Fox cautioned Friends about their apparel, and in an epistle issued in 1657, he uses this language, "All Friends, keep out of the vain fashions of the world in your apparel, and run not after every new fashion which the world inventeth and setteth up. Keep in your *plain fashion*, that ye may judge the world's vanity and spirit, in its vain fashions, and show a constant spirit in the truth and plainness."

Samuel Bownas, who was born in 1676, mentions in his journal, that he was "brought up in *plainness* of both *habit* and speech." In his account of a journey into Ireland, he says: "In some places I was led to show that it was needful to be good examples in *plainness* of speech, as well as *apparel*, which many had deviated from; but nevertheless such there were, who, though plain and otherwise strict, were too much taken up by the world and the riches of it, making haste to increase their substance, which was a very great hindrance to their growth in the life of religion."

John Banks, one of the early ministers of the Society, of whom some notice appeared in "The Friend" a few weeks since; gave forth a paper against worldly customs, fashions, &c., in which this passage occurs: "The practice of those who truly fear the Lord, is to be *plain* and decent in their *apparel*, not given to change, as they of the world are, nor to wear anything but what becomes the truth, and may tend to adorn the Gospel of our Lord Jesus Christ." And in confirmation of his concern, he quotes from an epistle of Thomas Ellwood, who says: "It hath come to pass that there is scarce a new fashion comes up, or a fantastic cut invented, but some one or other who professes truth, is ready with the foremost to run into it. Ah! Friends, the world sees this and smiles, and points the finger at it; and this is both a hurt to the particular, and a reproach to the Society in general."

William Edmondson, on his death bed, expressed his concern on account of the pride that some of the young people were gone into, "far wide from the humility and plainness that truth led Friends into in the beginning."

James Gough mentions that when he went into Ireland, about the year 1737, there were still living, "some of the good old stock, both ministers and elders, who loved God and mankind." "Their pious care was like a fence about the flock, which kept them together in nearer unity and greater safety, so that the young people in most parts were generally trained up in innocence of manners, and in *plainness of habit* and speech." He then laments the degeneracy which followed, one of the marks of which was, that many "run back and draw others with them into the vanities of the times, into a conformity with the world both in dress and address."

The language of that worthy elder, Joseph Pike, is peculiarly explicit and strong, "I bear my testimony, that the adorning of the body with fine apparel and fashionable cuts, as well as superfluity in household furniture, is utterly inconsistent with that plainness which the holy Truth leads into. It led our ancients out of such things, and to testify against them." He says in another place, that the people "followed one another's example, until at

length they came to such fashionable colors and patterns, that, when I was in some parts of England, I could not know by their habit, some women who were called Friends from those who were not. And with sorrow I speak the same also of some men Friends."

The following passage from his journal, states the objections made to the godly concern of the living members of that day, in language, which strongly reminds of the expressions we have heard used among us of latter times. Would that all, who have in any degree been misled by such specious reasonings, should deeply ponder the remarks of this wise elder.

"Though there is a form of godliness without the power, yet the power of Truth leads into a godly form and order in outward things; and this is abundantly proved from the Holy Scriptures, and among the rest, even in outward clothing. Thus, did true religion in the heart lead our first elders and fathers in the church, out of the fashions, customs, finery, and superfluity of apparel, and furniture, and to testify against it, as not proceeding from the Spirit of Truth, but from the vain, unsettled spirit of this world, as it most certainly does. But some cavillers have thus argued, 'Where is the standard of plainness and simplicity in apparel, furniture, &c., by which we are to square ourselves, or who are the proper judges to whom we should submit ourselves? How many buttons are we to wear, more or less, on our coats; what exact fashion in length and breadth are the parts of our clothes to be of; how high are our hats to be, or how broad the brims? And do not you, who press upon us this great plainness, differ among yourselves in your practice? And are not some things you wear, when strictly examined, not needful? After all, we are each best judges for ourselves; we will see for ourselves, and do as we list, and not be imposed upon by your injunctions.' These were the arguments used, to my certain knowledge, by the old separatists, who in these and various other respects strongly pleaded for what they called their Christian liberty; but at last they dwindled away, and came to nothing. And some from the very same spirit use the same language now.

"As to the standard and judge they demand, I answer, the Spirit of Truth is sufficient to guide in these and all other things. Thus the apostles from the Spirit of Truth advised the believers not to be conformed to this world, not to fashion themselves according to their former lusts, not to adorn themselves with outward adorning, costly array, &c. And thus the same Spirit led our first elders and worthies to keep to plainness, and to testify against running into and following after the customs, fashions, and finery of this world. As to that frivolous objection, that plain Friends do not all go exactly alike in these respects, they never desired nor pressed a precise conformity in every trivial thing, provided there was a care and tenderness preserved to keep from edging towards, or copying vain and foolish fashions; and if the objectors differed only from plainness, so far as plain Friends differ from each other, and kept within the bounds of true moderation, no fault would be found with them. With regard to the question, Who shall judge or decide such things? Certainly not those who gratify a high, vain spirit, in using such things as grieve faithful Friends, and who have them-

selves known but little of the work of Truth upon their hearts. The most proper outward judges in these things are rather such as are spiritual men, whose eyes are single to the Lord, and whose bodies, as saith Christ, are full of light; these, as the apostle writes, judge all things, but themselves are judged of no man, that is, of no carnal man. Such are good examples to the flock of God, and having nothing in view but his honor and the good of souls, may be safely followed, and we are bound to submit ourselves to them. As to these objectors not seeing evil in these things, or being convinced of this or that, it may be said of them, 'They seeing, see not, neither do they understand;' and it will be long ere they, while they continue in this state and spirit, can rightly see the things that belong to their peace and safety and growth; and it is preposterous in them to pretend matter of conscience to wear and use gay clothing," &c.

For "The Friend."

#### Sufferings of a Lost Man.

In the "Wonders of the Yellow Stone," a book published in New York last year, the following description is given of the region which Congress has set apart as a National Park, with the intention that it shall be withheld from ordinary settlement and preserved permanently as public property.

In the northwest corner of the Territory of Wyoming, about half way between the Mississippi River and the Pacific Ocean, and in the latitude of Northern New York, the grand Rocky Mountain system culminates in a knot of peaks and ranges enclosing the most remarkable lake basin in the world. From this point radiate the chief mountain ranges, and three of the longest rivers of the continent—the Missonri, the Columbia, and the Colorado.

On the south are the Wind River Mountains, a snow-clad barrier which no white man has ever crossed. On the east is the Snowy Mountain Range, and the cluster of volcanic peaks between it and Yellowstone Lake. On the west is the main divide of the Rocky Mountains. On the north are the bold peaks of the Gallatin Range, and the parallel ridges which give a northward direction to all the great tributaries of the Missouri from this region.

Set like a gem in the centre of this snow-rimmed crown of the continent, is the loveliest body of fresh water on the globe, its dark-blue surface at an elevation greater than that of the highest clouds that fleck the azure sky of a summer's day, over the tops of the loftiest mountains of the East. Its waters teem with trout, and the primeval forests that cover the surrounding country are crowded with game. But these are the least of its attractions. It is the wildness and grandeur of the enclosing mountain scenery, and still more the curious, beautiful, wonderful and stupendous natural phenomena which characterize the region, that have raised it to sudden fame, and caused it to be set apart by our national government as a grand national museum, free to all men for all time.

Evidences of ancient volcanic action are so abundant and striking throughout the lake basin that it has been looked upon as the remains of a mammoth crater, forty miles across. It seems, however, to have been rather the focus of a multitude of craters. "It is probable," says the United States geologist, Dr. Hayden, with his usual caution, "that during

the Pliocene period the entire country drained by the sources of the Yellowstone and the Columbia, was the scene of volcanic activity as great as that of any portion of the globe. It might be called one vast crater, made up of a thousand smaller volcanic vents and fissures, out of which the fluid interior of the earth, fragments of rock and volcanic dust were poured in unlimited quantities. Hundreds of the nuclei or cones of these volcanic vents are now remaining, some of them rising to a height of 10,000 to 11,000 feet above the sea. Mounts Doane, Longford, Stevenson, and more than a hundred other peaks, may be seen from any high point on either side of the basin, each of which formed a centre of effusion."

All that is left of the terrific forces which threw up these lofty mountains and elevated the entire region to its present altitude, now finds issue in occasional earthquake shocks, and in the innumerable hot springs and geysers which form so remarkable a feature of the National Park.

The first knowledge of the marvels of this region was made generally known by an expedition organized in the summer of 1870, by some of the officials and leading citizens of Montana. This company, led by General Washburn, the Surveyor-General of the Territory, left Fort Ellis toward the latter part of the Eighth month, and entered the valley of Yellowstone River on the 23d. During the next thirty days they explored the cañons of the Yellowstone, and the shores of Yellowstone Lake; then crossing the mountain, to the head waters of the Madison, they visited the geyser region of Firehole River, and ascended that stream to its junction with the Madison, along whose valley they returned to Montana. Though their route lay through a terrible wilderness, and most of the party were but amateur explorers, only one, an inhabitant of Helena, Montana, named Everts, met with a serious mishap. He became separated from his company, was lost and bewildered in the mountain wilderness, and during thirty-seven days endured perils and sufferings such as very rarely fall to the lot of any one.

Everts says: "On the day that I found myself separated from the company, and for several days previous, our course had been impeded by the dense growth of pine forest, and occasional large tracts of fallen timber, frequently rendering our progress almost impossible. Whenever we came to one of these great windfalls, each man engaged in the pursuit of a passage through it, and it was while thus employed, and with the belief that I had found one, that I strayed out of sight and hearing of my comrades. We had had a toilsome day. It was quite late in the afternoon. As separations like these had frequently occurred, it gave me no alarm, and I rode on, fully confident of soon rejoining the company, or of finding their camp. I came up with the pack-horse, which Mr. Langford afterwards recovered, and tried to drive him along. But failing to do so, and my eye-sight being defective, I spurred forward, intending to return with assistance from the party. This incident tended to accelerate my speed. I rode on in the direction which I supposed had been taken until darkness overtook me in the dense forest. This was disagreeable enough, but caused me no alarm. I had no doubt of being with the party at breakfast the next morning. I se-

lected a spot for comfortable repose, picketed my horse, built a fire and went to sleep.

The next morning I rose at early dawn, saddled and mounted my horse, and took my course in the supposed direction of the camp. Our ride of the previous day had been up a peninsula jutting into the lake, for the shore of which I started with the expectation of finding my friends camped on the beach. The forest was quite dark, and the trees so close, that it was only by a slow process that I could get through them at all. In searching for the trail I became somewhat confused. The falling foliage of the pines had obliterated every trace of travel. I was obliged frequently to dismount, and examine the ground for the faintest indications. Coming to an opening from which I could see several vistas, I dismounted for the purpose of selecting one leading in the direction I had chosen, and leaving my horse unhitched, as had always been my custom, walked a few rods into the forest. While surveying the ground my horse took fright, and I turned around in time to see him disappearing at full speed among the trees. This was the last I ever saw of him. My blankets, gun, pistols, fishing tackle, matches—every thing except the clothing on my person, a couple of knives and a small opera-glass, were attached to the saddle.

(To be continued.)

For "The Friend."

#### A Word by the Way.

The gradual and increasing tendency which, for a number of years past, has been apparent, particularly amongst the young and middle-aged of our Society, to pattern after the fashions and customs of the world in various respects, has, no doubt, been productive of sadness and mourning to the rightly exercised, wheresoever scattered throughout the different parts of the heritage known by the name of "Friends." Have not these oft-times gone heavily on their way, feeling as pilgrims in a "strange land;" and while their "harps hanged upon the willows," have even "wept when they remembered Zion," a fold of simplicity, as in former days. May the prayers of such be, as "of the righteous which availeth much;" for surely there is yet "balm in Gilead," and is there not a "Physician there," who is ever able and willing to "heal the backslidings of Israel" as of old, if rightly applied to? And is there not the same necessity that the follies of the times should be testified against, and that ability should be diligently sought for to do so, as in the days of our forefathers when "the world," as it yet does, "like a briery, thorny wilderness, swelled, and made a noise like the great raging waves of the sea," where the "Lord's mighty power" was proclaimed in renunciation of its doings. In the numerous and valuable accounts which are handed down to us, of the convincement and religious experience of our worthy predecessors in the truth, I remember no exception to a full conviction, that the same Almighty power which condescended to cleanse their hearts from "all evil," also required them to abstain from the ever fluctuating superfluities of the world, and faithfully maintain their testimony to the plainness and simplicity of the truth in their outward appearance and intercourse amongst men. If our worthy forefathers thus felt it their duty to bear their testimony against the spirit of the world, what great change has since taken place that would render us excus-

able for a participation in those things which they, for conscience sake, dare not indulge in? Have we not unmistakable evidence that the Spirit of Truth *has led*, and still continues to lead its humble, dependent followers, away from the seed of pride, and its influences in the heart, into the meekness, lowliness, and simplicity of the "Lamb of God," whose garment was seamless, and who says of himself, "I am not of this world;" and to his disciples, "If ye were of the world, the world would love its own; but because ye are not of the world, but I have chosen you out of the world, therefore the world hateth you? How strikingly does the language of George Fox, while yet young in years, and dwelling under deep inward baptisms, breathe forth the same spiritual teaching: "And the Lord said unto me, thou seest how young people go together into vanity, and old people into the earth; thou must forsake all, young and old, keep out of all, and be a stranger to all." And again, a few years later, he writes: "When the Lord sent me into the world, he forbade me to put off my hat to any, high or low; and I was required to thee and thou all men and women, without any respect to rich or poor, great or small. And as I travelled up and down, I was not to bid people *Good-morrow*, or *Good-evening*, neither might I bow, or scrape with my leg to any one." \* \* \* For, though thou to a single person was according to their accidence and grammar rules, and according to the Bible, yet they could not bear to hear it; and because I could not put off my hat to them, it set them all into a rage. But the Lord showed me that it was an honor below, which He would lay in the dust, and stain; an honor which proud flesh looked for, but sought not the honor which comes from God only." And again, in a short epistle written under on earnest concern for the best welfare of his friends, but a few months prior to his death, the same testimony is thus forcibly revived: "When the Lord called me forth, he let me see that young people grew up together in vanity, and the fashions of the world, and old people went downwards into the earth, raking it together; and to both these I was to be a stranger. And now Friends, I do see too many young people that profess the truth grow up into the fashions of the world, and too many parents indulge them; and amongst the elder some are declining downwards, and raking after the earth. Therefore, take heed that you are not making your graves while you are alive outwardly, and loading yourselves with thick clay. For if you have not power over the earthly spirit, and that which leadeth into a vain mind, and the fashions of the world, and into the earth; though you have often had the rain fall upon your fields, you will but bring forth thistles, briers and thorns, which are for the fire. Such will become brittle, peevish, fretful spirits, that will not abide the heavenly doctrine—the admonitions, exhortations, and reproofs of the Holy Ghost, or heavenly Spirit of God; which would bring you to be conformable to the death of Christ, and to his image, that ye might have fellowship with him in his resurrection. Therefore it is good for all to bow to the name of Jesus, their Saviour, that all may confess him to the glory of God the Father. For I have had a concern upon me, in a sense of the danger of young people going into the fashions of the world, and old people going into the earth, and

many going into a loose and false liberty, till at last they go quite out into the spirit of the world as some have done. The house of such hath been built upon the sand on the sea shore, not upon Christ the Rock, that are so soon in the world again under a pretence of liberty of conscience. But it is not a pure conscience, nor in the Spirit of God, nor in Christ Jesus; for in the liberty in the Spirit there is the unity which is the bond of peace; and all are one in Christ Jesus, in whom is the true liberty, and *this is not of the world, for He is not of the world.*" On a serious consideration of such a testimony as this, which accords with the New Testament, and that of all faithful Friends who have written on the subject—how can any reconcile a belief that "there is nothing in dress?"—or, that "our early Friends did not change their garb from the fashion of the times in which they lived," as we sometimes hear alleged?—or, "if the heart is right, the outside appearance matters not?" Learning as we do, from the best authority, that we "cannot serve God and mammon," how can a righteous heart, which is not of this world, prefer the world's superfluities and customs? If a "tree is to be known by its fruits," can ample returns be relied on from the engrafted branch, while the budding and blooming continues from the natural root? If we are Christ's disciples, and "not of the world," even as "He is not of the world," but redeemed from the spirit thereof by His spirit, how is it possible, that "the mark of the beast, and the worshippers of his image, whose names are not written in the Lamb's Book of Life," can still be retained? Are not these important and practical considerations, and only a few of the many which stand in close connection with this subject—considerations which our early Friends dwelt weightily upon, and sought earnestly for a knowledge of their duty therein, and for ability to perform it faithfully in accordance with the Divine will? They, as a "cloud of witnesses," which have gone before us, were enabled by the purifying operations of the Holy Spirit on their hearts, to stand faithful in their day and generation to the principles and testimonies which we as a Society yet profess to bear to the world; and, notwithstanding here appears to be much at the present time to cause the faithful to mourn, yet there is a measure of consolation in the assurance, that through all the trials and besetments which have been permitted to overtake us as a people, the same pure, scriptural doctrines and principles which George Fox experienced, and promulgated in the beginning, have been known and maintained, by the faithful of every generation, from that day to the present; and that *ven now* the same power which made him and is faithful co-workers in the cause of Truth, that they were in their day, still condescends to dwell in the hearts of all those who truly and unreservedly seek for it, and receive it as the way of its coming. Therefore, dear Friends, wherever situated, or however circumstanced—those who are striving after faithfulness in the cause of truth and righteousness in its primitive purity—dwell not too much on the discouraging developments of the day, but turn inward to the Life and Power, that inspeaking Word, which alone is able to strengthen the things that remain," and repair the "waste places," to create the heart new, and make it a "fit temple for Christ the Lord," "the Saviour of men," to dwell in;

who remains to be the same "ever present helper," the "Alpha and Omega, the beginning and the end," the never failing "Arm." both now and forever. F.

Ohio, 5th mo. 12th, 1874.

## THE FRIEND.

FIFTH MONTH 23, 1874.

The relation between parents and children, requires of both the performance of duties which influence the whole tenor of life, and the effect of which, whether intended or not, will be manifest not only in the present, but extend far into the future.

The command given to the Israelites was, "Honor thy father and mother," with this implied promise, "that thy days may be long in the land which the Lord thy God giveth thee." It implied the obligation on the part of the parent, so to conduct in both precept and example, as to be deserving of the honor thus enjoined, and springing naturally in the breast of the child; and, we apprehend, was also designed to be so construed, that the honor should be given by the child not only in the days of youth, but to impress the course of life through riper years.

So much has been said and written, of the importance and the responsibility of the charge of training the mind, during the years when man is physically and mentally immature, that it seems hardly worth while to recur to the subject; but there is one phase of the process so lamentably overlooked or disregarded, that it can hardly be amiss to recall attention to it; which is, that whatever it is the duty of a child to perform, it is the duty of the parent to require to be done. This includes the parental duty of restraint as well as that of prompting.

While there is evil to be shunned, as well as good to be embraced, and the capacity to form correct judgment is yet deficient in the child, a responsibility which cannot be escaped, rests on those who exercise parental authority, to restrain from that which is wrong in itself, or which tends to lead into evil, and so to train the intellectual faculties, and the moral or religious feelings, as to fix the habit of self-denial. How great and sad are the consequences, resulting from parents not exercising the authority with which Providence has clothed them, to correct youthful propensities to indulge in things not right in themselves, or calculated to betray them into that which will be hurtful, forgetting that indifference to, or disregard of the proper exercise of the authority to restrain, carries with it partnership in the wrong committed, and in the punishment which is sure to follow sooner or later.

There are two worlds around us; the material, appealing continually to our physical senses, and the spiritual, addressing itself to our inward consciousness; both influencing the tides of feeling, and the currents of passion, ever ready to assail us as we are passing down the stream of time, from our first embarking on its troubled waters, until landed at the end of the voyage. Each hour we are under training for a future state of existence, and restraint from evil is equally necessary as doing good, to give a well grounded hope that the life to come shall be higher and happier than this.

Cobbett, in his directions to those who write for publication, uses this language: "As your pen moves, bear constantly in mind, that it is making strokes which are to remain forever." Well would it be for all who are delegated to watch over and guide the young, never to forget, that they are required not only to inscribe upon their hearts the precepts of Truth, and impress them by the force of example, but to prevent these heirs of eternity from learning lessons or acquiring habits which may blot or blur the whole page of existence. For want of due regard to this, there is most lamentable evidence of the lack of proper maintenance of true Christian parental dignity and authority, and declension among our members, from the simplicity and self-denial which were conspicuous in our predecessors.

Two instances are recorded in the Holy Scriptures which may be cited as exemplars; the one illustrating the results of omitting obedience to the duty of parents to restrain their offspring from that which is wrong, the other showing the blessing following its performance, and obedience to the *command* of a parent.

Eli was a prophet and the high priest of the Most High. He had light and knowledge of that which was right and that which was wrong, and in his general conduct appears to have been correct, and he evinced his desire for the reformation of his sons, by his paternal remonstrance with them, "Why do ye such things? for I hear of your evil dealings by all this people. Nay, my sons, for it is no good report that I hear: ye make the Lord's people to transgress. If one man sin against another the Judge shall judge him; but if a man sin against the Lord, who shall entreat for him." But, priest as he was, he appears to have satisfied himself with remonstrance, not heeding that what is the duty of a child to do, is the duty of a parent to see that it is done. He used not his authority to restrain, and his sons honored not his entreaties to desist, and thus they equally partook of the doom that followed. "The iniquity of Eli's house shall not be purged with sacrifice nor offering forever;" and why? "Because his sons made themselves vile and *he restrained them not.*"

The other instance is that of the Rechabites, whom the prophet by command of the Lord brought into one of the chambers of the temple and set wine before them to drink, saying, "Drink ye wine." But they answered, "We will drink no wine, for Jonadab the son of Rechab *commanded us*, saying, Ye shall drink no wine, neither ye nor your sons forever." "Thus have we obeyed the voice of Jonadab the son of Rechab our father, in all that he hath charged us, to drink no wine all our days, we, our wives, our sons nor our daughters." And the prophet was commissioned to say unto them, "Thus sayeth the Lord of Hosts, the God of Israel, 'Because ye have obeyed the *commandment* of Jonadab your father, and kept all his precepts, and done according to all he hath *commanded* you; therefore thus sayeth the Lord of Hosts, the God of Israel, Jonadab the son of Rechab, shall not want a man to stand before me forever.'"

We have had placed in our hands a pamphlet bearing on its title page the following: "The principles, methods and history of the Society of Friends: a discourse delivered in the church of The Disciples in Boston, on First-day, 2d mo. 8th, 1874, being the eighth

of the series upon 'The Universal Church.' By Augustine Jones, of Lynn, Mass."

We are entirely unacquainted with the author, and know nothing of his religious connection, but the whole tenor of his attempted description of the doctrines of Friends, betrays either a lack of acquaintance with the writings of Friends, and the repeated declarations of the faith held by the Society, or a deficiency of care in presenting them. We think the impression made on the minds of the hearers of the discourse, must have been, that Friends did not believe in the proper, underived Divinity of Jesus Christ, nor in the atonement made by him on Calvary for the sins of the whole world; which is a most serious misrepresentation. While they reject the doctrine of three persons in the one God, they fully subscribe to the declaration of Holy Scripture, "There are three that bear record in heaven, the Father, the Word, and the Holy Ghost, and these three are one;" a mystery which human reason cannot comprehend. That the Word was made flesh and dwelt among men, and though thus united to humanity, was yet God over all, blessed forever: not a mere manifestation as Socinius inculcates, and what we understand A. Jones to represent Friends as believing. That the Father so loved the world that He gave his only begotten Son that whosoever believeth on Him may have eternal life; and the Son—the Word made flesh—with the same infinite love laid down his life, a propitiatory sacrifice, to purchase forgiveness for sinful man, and reconcile him to his Father, and to obtain for him a greater outpouring of the Holy Spirit. That while the Light Within, or measure of the Holy Spirit, is given to all, for the salvation of all who obey its requirements, yet its work in the salvation of the soul is inseparably connected with what Christ has done for us without us, and that it is fearful unbelief in those who have the knowledge of what Christ thus did and suffered, and yet refuse to believe in it as essential to salvation.

The doctrine inculcated in the "Discourse" is that of the Hicksites and not of Friends.

#### SUMMARY OF EVENTS.

**FOREIGN.**—The hall of the French National Assembly was crowded on the 16th inst., as it was known that a vote was to be taken on the motion to give priority of discussion to the electoral law over the municipal bill, which motion had been made a Cabinet question.

The debate on the motion was continued until a late hour, and when finally the question was put to the Assembly it was found that the government had been defeated, the vote standing 317 to 381. The Assembly then adjourned, and the Ministers soon afterwards handed their resignations to President MacMahon. The electoral law proposed by the French Ministry, and which led to their defeat, was a bold and daring attempt to disfranchise a portion of the voters, and thus lessen the strength of the opposition.

The majority vote included all the Republican members 331, twenty Bonapartists and thirty Legitimists. Ex-President Thiers voted with the majority.

A Paris dispatch of the 17th says: President MacMahon has accepted the resignation of his Cabinet, and has entrusted to Goulard the formation of a new Ministry. Up to the 18th inst. he had not succeeded in forming a cabinet.

The Assembly has approved the postal convention between France and the United States, arranged by the late Ministry.

A Madrid dispatch of the 13th announces the formation of a new Spanish Ministry, with Zabalo as President of the Council and Minister of War, Sagasta Minister of the Interior, with Ulloa and others for the remaining departments.

The Governors of the several provinces, and many other high officials, resigned when the change of ministers was made known.

The political situation in Madrid continues critical.

The opposition press violently denounce the new ministry.

The large towns show discontent. New ambassadors have been appointed at Vienna, Lisbon and Berlin. The government have issued a manifesto, of which Ulloa, Minister of Foreign Affairs, is the author. They solicit the support of all sections of the liberal party; declare they will only use their powers to repel unjustifiable aggressions; pledge all their efforts to the extinction of Carlism, and promise to make known the true state of the treasury and to enforce strict integrity and rigid economy in the administration of the revenues.

General Concha on the 15th, was moving his forces to occupy the passes between Biscay and the Guipuzcon valley. Don Carlos was at Tolasa with the main body of his forces. A large Carlist force was said to be marching upon Estella, on the east side of General Concha's position.

The Emperor of Russia, and his son the Grand Duke Alexis, landed at Dover on the 13th inst. The Prince of Wales, and others, were waiting to receive the distinguished visitors, and conducted them at once to Windsor Castle.

The London Times of the 16th says: The Czar, at the reception given by him to the Diplomatic Corps, declared the policy of Russia is to preserve the peace of the Continent, and he hoped the principal governments of Europe would be united in this purpose. The Czar went to Chiselhurst this morning to see the Empress Engenie. Upon his return this afternoon he will visit the House of Commons.

A collision is reported at Merther Tydvil, Wales, between a coal and passenger train. Forty persons were seriously injured.

The steamship Faraday, with the new Atlantic cable, has sailed from Gravesend.

The British government proposes to unite Logos and the Gold Coast into one province, under a Governor, who will reside forty miles inland from Accra. The Governor's residence will be the nominal capital of the consolidated province, and will be protected by native troops. The government will retain a monopoly of the sale of arms and ammunition.

The strike among the coal miners and laborers of Durham has again broken out. The strikers are turbulent and disorderly, and much distress among them and their families is already to be seen.

In the treaty for the establishment of a British protectorate over the Fiji Islands it is stipulated that Great Britain shall assume all financial liabilities, pay the king \$15,000 per annum, with other pensions to various native chiefs, and recognize the ruling chief as owner of the lands, which are to be open to settlement by foreigners within a year.

According to a recent parliamentary report there are in Scotland 132,230 land-owners. Of these, seventy-five proprietors own 9,100,000 acres, nearly one-half the entire acreage of Scotland. The largest owner is the Duke of Sutherland, who has 1,176,574 acres, with over \$285,000 a year.

Liverpool, 5th mo. 18th.—Uplands cotton, 8½d.; Orleans, 8¾d. California white wheat, 12s. 4d. per 100 lbs.; red, 11s. 2d. 12s.

Constantinople advices say there is no abatement of the famine in Anatolia. Reports from all sections of that country are of the most doleful character, many persons having starved to death.

Some excitement was occasioned in St. Petersburg by the arrest of the eldest son of the Grand Duke Nicholas, brother of the Emperor. It was afterwards found that the circumstance had no political significance, but that the mother of the unworthy young man having missed her diamonds, communicated the fact to the police, who discovered that the perpetrator of the theft was her own son. Intelligence of the affair coming to the Emperor, he directed legal proceedings should take their course, notwithstanding personal considerations. It seems the diamonds were given by the Prince to a well-known French actress.

The Turkish authorities have prohibited the circulation of the Bible in the native language.

The Swiss Confederation has recently adopted a new Constitution by the following vote. In favor 321,870 voters and 15 cantons; against 177,800 voters and 8 cantons. The new organic law makes the Republic a homogeneous nation, ruled by the same laws all over the territory. It establishes compulsory secular education, and the supremacy of the State over the Church. It establishes civil marriage, and prohibits the creation of new bishoprics, the founding of new convents or revival of old ones, without the sanction of the government. Not only are the Jesuits excluded, but all other religious orders the conduct of which is dangerous to the State or disturbs the peace between creeds.

**UNITED STATES.**—In accordance with the advice of President Grant, the Legislature of Arkansas met at Little Rock. One of the rival Governors, Baxter, expressed his willingness to comply with the President's wishes, but Brooks declined doing so. This condition of affairs imposed upon the President the necessity of making a decision between the parties, and on the 15th he issued his proclamation to the effect that as Elisha Baxter had been declared duly elected by the General Assembly of the State, he ought to be considered as the lawful Executive thereof. All turbulent and disorderly persons were commanded to disperse and retire peaceably to their respective abodes, and submit themselves to the lawful authorities of said State. This step was taken by the President with great reluctance, as he wished the dispute to be settled by the people of Arkansas for themselves. It however had the desired effect of restoring quiet. Brooks's forces surrendered on the 16th inst., and Baxter's army will be disbanded as quickly as the public peace will permit. Both houses of the Legislature have passed a bill providing for the assembling of the Constitutional Convention on the 14th of Seventh month.

A terrible catastrophe occurred at Haydenville, Mass. on the 16th inst. The bursting of a great water reservoir swept away parts of four villages, and destroyed property amounting to a million of dollars, and about one hundred and seventy-five lives. The reservoir which was built to afford a reliable supply of water to various industrial works in the vicinity, covered one hundred and fifty acres of ground the average depth of thirty feet, and was formed by throwing a dam across one end of the valley through which Mill River flowed. This dam had been repaired, and was known to be leaky, but was thought strong enough to stand. But it suddenly gave way and the water burst forth in a resistless flood, sweeping away stores, houses, people, bridges and factories.

The 58th anniversary of the American Bible Society was held in Washington the 16th inst. The receipts of the year from all sources were \$664,436, and the expenditures \$611,728. Nearly a million volumes were issued during the year, and during the past 58 years 30,972,786 volumes have been issued.

New York city had 561 deaths last week, and Philadelphia 321, including 118 children under two years.

The number of children attending the public schools is 100,749. The Mayor reports the public debt of Philadelphia to amount to \$58,364,171. The taxes for the year 1874 aggregate \$585,843.

The U. S. Senate has passed a new Finance bill in place of that vetoed. It has been sent to the House of Representatives, where it may probably be modified.

The inundation of the lower Mississippi country is subsiding. On the 18th the Signal Office reported the river as having fallen from Cairo to New Orleans. At Cairo the fall for the preceding week had been sixteen feet, and at Memphis two feet.

**The Markets, &c.**—The following were the quotation on the 18th inst. *New York.*—American gold, 112½ U. S. sixes, 1881, Registered, 119½; do. Coupons, 121½ do. 1868, Reg., 119½; do. Coupons, 120½; do. 10-40 per cents, 114½. Superfine flour, \$5.25 a \$5.65; Stat extra, \$6 a \$6.30; finer brands, \$7 a \$10.25. No. 1 Chicago spring wheat, \$1.53; No. 2 do., \$1.46 a \$1.48 red western, \$1.54 a \$1.56; white Canadian, \$1.66. Oats 63½ a 68 cts. Western mixed corn, 86 a 87 cts.; yellow 87½ cts. *Philadelphia.*—Uplands and New Orleans cotton, 19 a 19½ cts. Superfine flour, \$4.75 a \$5.50 extras, \$5.75 a \$6.25; finer brands, \$6.75 a \$10.25 Penna. red wheat, \$1.60 a \$1.70; No. 1 spring wheat \$1.50. Rye, 98 cts. Yellow corn, 85 cts. Oats, 63 a 67 cts. The cattle market was dull. Sales of 3200 beef cattle at 7 a 7½ cts. per lb. gross for extra; 6½ a 6¾ cts. for fair to good, and 5 a 6 cts. for common About 8000 sheep sold at 5 a 5½ cts. per lb. gross, and 5000 hogs at \$8.50 a \$8.75 per 100 lb. net. *Baltimore.*—Choice white wheat, \$1.80; fair to prime do., \$1.50 a \$1.75; good to prime red, \$1.65 a \$1.72; common to fair, \$1.50 a \$1.60. Southern white corn, 88 a 89 cts. yellow, 85 cts. Oats, 62 a 70 cts. *Chicago.*—No. 1 spring wheat, \$1.25; No. 2 do., \$1.21. No. 2 mixed corn, 61½ cts. No. 2 oats, 47½ cts. Rye, 99 cts. Lard \$10.60 per 100 lbs. *Cincinnati.*—Wheat, \$1.37 a \$1.40 Corn, 73 a 75 cts. Oats, 52 a 60 cts. Rye, \$1.16. Lard 10½ a 11 cts.

**DIED,** at his residence in Lionville, Pa., on 4th mo 1st, 1874, WILLIAM HARRY, a member of Uwchlar Monthly Meeting, in the 81st year of his age.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, FIFTH MONTH 30, 1874.

NO. 41.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

For "The Friend."

Memoirs and Letters of Sarah Hillman.

(Continued from page 309.)

"Salem, Ohio, 9th mo. 18th, 1843. \* \* \* I am abundantly satisfied of the truth, that notwithstanding we are a poor people and have many things amongst us to mourn over that are not according to Truth, the church in Philadelphia is beloved of the Lord, that He has placed his Name there, and that He will bless her and raise up many living witnesses in her, who shall have cause to magnify and bless and praise his glorious, holy Name, for his merey and his Truth's sake. Oh then that our hearts may be more and more bound together in doing any little service which He may be pleased to call for at our hands individually, that in the end we may be permitted to hear the welcome salutation of 'Come ye blessed of my Father, inherit the kingdom prepared for you from the foundation of the world.'"

"Evesham, 1st mo. 16th, 1844. \* \* \* We are getting onward in our arduous service, and I trust thus far at least have not done any thing to hurt the good cause. The hearts of the people in many of the families seem like the thirsty land to rejoice at the sound of the gospel; others there are who have little concern, I fear, about their soul's salvation. Many of the precious children I believe have been afresh visited, and some I cannot but believe, through faith and faithfulness, will be prepared in this place, to stand in their ranks, to fill the vacant places of their honored fathers, now gathered to their everlasting abitations, and to uphold the standard of truth, magnifying the name and the power of Israel's unslumbering Shepherd. Oh how often has dear E. Collins been brought to my remembrance; surely it cannot be that she has labored in vain. Some fruits of her labor and travail will yet be found here, and the hearts of the few living stakes in Zion be gladdened thereby. It is probable we shall go to Dropwell on First-day."

"Philada., 2d mo. 9th, 1844.— \* \* \* Thou hast been so often the companion of my thoughts for a few days, I feel inclined to tell thee so much at least, though destitute of any qualification for writing, except a little love for the brethren, which I trust will never be-

come extinct in my poor mind while life remains; for this is the badge of discipleship still, and does not forbid the disciples from talking together of the things which have happened in our time, any more than in those days when it is said of the early believers when going to Emmaus, their Blessed Lord enquired of them 'what manner of communications are these which ye have one with another, as ye walk and are sad?' We were talking together of all things which had happened; and we find it recorded in earlier days, that they who feared the Lord spake often one to another, and He hearkened and heard it; were it not that He hears our sad communings and bemoanings, and sometimes condescends to appear in secret, speaking peace to our souls, methinks we should sink when the waters rise high, when the billows roll over our heads, when mortal aid is vain, when lover and friend seem afar off. Ah, had not the Lord then been our help, I had perished as Job said, in mine affliction. How many times has He made himself known in the days of our deep humiliation, and will he now forsake us? Ah no, I doubt not there will come again a day of consolation; a day wherein the singing of birds and the voice of the turtle, will be heard in our land; a day wherein we shall again have our vineyards given us from the wilderness, and know this valley of Achor to be a door of hope; yea and have to sing again of the Lord's mercies and of his judgments, and of his everlasting loving kindness, as in the day when we were first delivered from under the bondage of Egypt."

"Philada., 9th mo. 3d, 1846. \* \* \* Oh! if Thou help us not we must perish. There is however some little glimmerings of light discoverable as the bow of promise in the cloud, which keeps the conflicted mind from sinking in the gulf below; and in mercy, a secret belief afforded that when the end is accomplished, which the great and ever blessed Head of his own church, has designed in thus permitting the daughter of Zion to be covered as with a cloud, and sorely chastened, He will again clothe her with the beautiful garments of righteousness, and bring her up out of her wilderness condition, and say unto her 'Live.' Ah! surely 'He hath loved her with an everlasting love;' and it seems to me the secret language will be heard, 'Again I will build thee and thou shalt be built, O virgin of Israel! thou shalt again be adorned with thy tabrets, and shalt go forth rejoicing in him who hath done great things for thee.' But then there seems to be a long season of suffering to be endured by the faithful, a great fight of afflictions and of sorrow to pass through for them who stand firmly and unflinchingly, and are valiant for the Truth upon the earth; yet oh! let us not fear this, for whether we live to see the brighter day or not, we are assured we shall reap the end of our faith, if we faint not, even the salvation of our poor souls. I oftentimes remember the Prophet Elijah,

how he was fed even by the ravens, and when the brook Cherith dried up, he was not left forsaken, but was directed to arise and go to Zarepheth, to a widow woman, alike poor with himself: for when he came he found her gathering a few sticks at the gate of the city. His faith however failed not; and he told her notwithstanding her scanty store, to bake first a little cake for him, and after bake for herself and for her son; for thus saith the Lord, 'the barrel of meal shall not waste, neither shall the cruse of oil fail until the day that He sendeth rain upon the earth.' So they lived by faith: and a good time they had together."

"Philada., 10th mo. 4th, 1847. \* \* \* I can truly add that mourning is often, very often the clothing of my spirit, because of the desolations that abound.

While some are busily engaged with their farms and their merchandize, and others are marrying wives, and therefore they cannot come to the marriage supper of the King's son, many more are using their utmost endeavors to root up the outposts that have stood around us, and to upturn the very foundations, while they remodel and raise a superstructure more congenial to their modern and liberal views of Christianity.

Oh! for such as are standing in the forefront amongst us at such a time as this, of rebuke and of treading down, how my heart craves deep indwelling of spirit before the Lord, that neither the smiles nor the frowns, the applause or the censure of those who are seeking to entrap and to ensnare, may prove availing or in any wise move any of us from the steadfastness which is in Christ Jesus our Lord and Lawgiver, our Prophet, Priest and King, who trod the wine press before us alone, and of the people there was none with him.

Truly we have to wrestle, not against flesh and blood only, but against principalities, against powers, against the rulers of this world, and against spiritual wickedness in high places. How different would be the aspect of things, as well as the feeling of our hearts, and the state of our religious assemblies, if all those who profess to be united in the one great pursuit, did but see eye to eye; methinks then there would be people coming as the prophet testified, of all the languages of the nations, and laying hold of the skirt of him that is a Jew, would say, 'We will go with you, for we have seen that God is with you.'

But while there is such unsettlement amongst us, and such a flood of lifeless ministry poured forth, how can we hope for anything else than scattering? It is that that is of God, which alone gathereth unto him, and is owned by him, and by his living people. While that which is of the world, is owned of the world, and tends only to scatter. Many are running to and fro, but from the fruits it does not appear that the knowledge of the Truth is increased, or Agag slain; but the

bleating of the sheep and the lowing of the oxen still sounding in the ears of those who can hear proclaimed loudly that the command to destroy Amalek has not been obeyed. And until this command is fulfilled we shall not, I believe, make progress in our journey towards the Heavenly City, the new Jerusalem, which cometh down from God out of Heaven, prepared as a bride adorned for her husband. Ah! surely Agag shall be slain when our Prophet taketh unto him his great power and reigneth, and all that has been saved for sacrifice, shall be destroyed also.

May we, my dear friend, be found among the number of the poor and the afflicted people of whom it is said, 'they shall trust in the name of the Lord;' that when the overflowing scourge cometh we may be spared, and be prepared to give all the glory to his holy, glorious, all-powerful Name."

(To be continued.)

### Whirlwinds.

Directly overhead the noonday sun hung in the hot, hazy sky. As we moodily toiled over the plain, my attention was arrested by a dust whirlwind that suddenly sprang up about fifty yards to our left. The few dry leaves on the ground began to whirl round and round, and to ascend; and in a minute a spiral column was formed, reaching, perhaps, to the height of fifty feet, consisting of dust and dry dead leaves, all whirling round with the greatest rapidity. The column was only a few yards in diameter; and it moved slowly along, nearly parallel with our course, but only lasting a few minutes; so that before I could point it out to Velasquez, who had ridden on ahead, it had dissolved away. I had been very familiar with these air eddies in Australia, and had hoped to carry on some investigations concerning them, begun there, in Central America; but, though common on the plains of Mexico and South America, this was the only one I witnessed in Central America.

The interest with which I regarded these miniature storms was due to the assistance that their study was likely to give in the discussion of the cause of all circular movements of the atmosphere, including the dreaded typhoon and cyclone.

Humboldt had long ago ascribed whirlwinds to the meeting of opposing currents of air. There is this dynamical objection to the theory. The movements of the air in whirlwinds is much more rapid than in any known straight current, such as the trade winds; and it is impossible that two opposing currents should generate between them one of much greater force and rapidity. But even if this fundamental objection to the theory could be set aside, the small whirlwinds could not thus arise, as they are most frequent when the air is nearly or quite motionless.

Then, again, when we turn to Prof. Maury's theory that the cyclones, having been initiated by the conflict of contrary currents, are continued and intensified by the condensation of vapor in their vortex forming a vacuum, we find it negated by the fact that in the smaller whirlwinds the air is dry, and there is consequently no condensation of vapor; and yet, in comparison with their size, they are of as great violence as the fiercest typhoon. Tylor describes the numerous dust whirlwinds he saw on the plains of Mexico, Clarke those on the steppes of Russia, and Bruce those on the

deserts of Africa; and nowhere is there mention made of any condensation of vapor. I myself have seen scores of whirlwinds in Australia, some of them rising to a height of over one hundred feet; yet there was never any perceptible condensation of vapor, though some of them were of sufficient force to tear off limbs of trees, and carry up the tents of gold-diggers into the air. Franklin describes a whirlwind of greater violence than any of these. It commenced in Maryland by taking up the dust over a road in the form of an inverted sugar-loaf, and soon increased greatly in size and violence. Franklin followed it on horseback, and saw it enter a wood, where it twisted and turned round large trees: leaves and boughs were carried up so high that they appeared to the eye like flies. Again there was no condensation of vapor.

In Australia I had many opportunities of studying the dust whirlwinds; and as I looked upon them as the initial form of a cyclone, I paid much attention to them. On a small plain, near to Maryborough, in the province of Victoria, they were of frequent occurrence in the hot season. This plain was about two miles across, and was nearly surrounded by trees. In calm, sultry weather, during the heat of the day, there were often two at once in action in different parts of it. They were only a few yards in diameter, but reached to a height of over one hundred feet, and were often, in their higher part, bent out of their perpendicular by upper aerial currents. The dust and leaves they carried up rendered their upward spiral movement very conspicuous. No one who studied these whirlwinds could for a moment believe that they were caused by conflicting currents of air. They occurred most frequently when there was least wind; and this particular plain seemed to be peculiarly suitable for their formation, because it was nearly surrounded by trees, and currents of air were prevented. They lasted several minutes, slowly moving across the plain, like great pillars of smoke.

When attentively watched from a short distance, it was seen that as soon as one was formed, the air immediately next the heated soil, which was before motionless or quivering, like over a furnace, was moving in all directions towards the apex of the dust-column. As these currents approached the whirlwind, they quickened and carried with them loose dust and leaves into the spiral whirl. The movement was similar to that which occurs when a small opening is made at the bottom of a wide shallow vessel of water: all the liquid moves towards it, and assumes a spiral movement as it is drawn off.

The conclusion I arrived at, and which has since been confirmed by further study of the question, was, that the particles of air next the surface did not always rise immediately they were heated, but that they often remained and formed a stratum of rarefied air next the surface, which was in a state of unstable equilibrium. This continued until the heated stratum was able, at some point where the ground favored a comparatively greater accumulation of heat, to break through the overlying strata of air, and force its way upwards. An opening once made, the whole of the heated air moved towards it and was drained off, the heavier layers sinking down and pressing it out.

Just as over the little plain at Maryborough, protected by the surrounding forest from the

action of the wind, the heated air accumulates over the surface until carried off in dust eddies; so, though on a vastly larger scale, in that great bight formed by the coasts of north and south America, having for its apex the Gulf of Mexico, there is an immense area in the northern tropics, nearly surrounded by land, forming a vast oceanic plain, shut off from the regular action of the trade winds by the great islands of Cuba and Hayti, where the elements of the hurricane accumulate, and at last break forth. In this and such like areas, the lower atmosphere is gradually heated from week to week by the direct rays of the sun during the day, by radiation from the sea during the night; and, as in Australia, the quivering of the air over the hot ground foreshadows the whirlwind, and in Africa the mirage threatens the simoom, so in the West Indies a continuance of close, sultry weather, an oppressive calm, precedes the hurricane. When at last the huge vortex is formed, the heated atmosphere rushes towards it from all sides, and is drained upwards in a spiral column, just as in the dust eddy, on a gigantic scale. Unlike the air of the dust-eddy, that of the hurricane coming from the warm surface of the ocean is nearly saturated with vapor, and this, as it is carried up and brought into contact with the colder air on the outside of the ascending column, is condensed and falls in torrents of rain, accompanied by thunder and lightning.—*Bell's Naturalist in Nicaragua.*

For "The Friend."

"Part not with these old Works of true experience,  
in them our Fathers wrapt up wisdom for their  
sons."

Some twenty-five years ago, a neighbor visiting the city of Penn on business, was attracted to an auction sale of books. He purchased a parcel for a few cents apiece, and said there were a number of Friends' ancient volumes offered: some of which were among his package. Not caring for such books, he sent me one—a collection of one hundred and fifty nine Memorials of Friends, the earliest settlers of this country. The name of the former owner had been carefully blotted out. I was told it was not for the want of pennies or houserom, the children had thus cast away what their good father and mother had left—the books of olden time. I prized the one that had thus fallen into my hands.

In the midst of busy preparation for changing home, difficulties abounding, the old but nicely bound volume lays before me, claiming a place of safety among others worthy to be kept. Hastily opening the leaves, a paragraph in the testimony concerning Ann Roberts arrested my attention, profitably so, viz: "After her return from Great Britain, she met with great difficulties in respect to outward circumstances, which she sustained with Christian fortitude. A near friend asking her how she felt under it, she replied: "While I keep my eye steadily directed to the object of our chief regard, it seems as if a wall was on each side, all is calm, and nothing annoys; but if I suffer my eye to wander to the right hand or to the left, the enemy breaks in upon me like a torrent, which hurries me away, and it is with great difficulty I recover myself."

It was profitable to be reminded that such as were farther advanced in the way of holiness, had sometimes to struggle with the weakness of the flesh and the power of the

tempter, who is permitted to try us, so to recover themselves as to keep the eye steadily directed to the object of our chief regard; that brings the calm, that hushes the disturbing fears, and causes the wall of defence to seem to be on either side.

May the children among us not cast away too lightly, nor bide too carefully, the wholesome writings of experience our forefathers were acquainted with; let them have a place (if but for their parent's sake), open them sometime; therein is many a little gem for thought and reflection. Some time they may be a store of treasure to thee.

"Fling not away

The shell because unpolished and uncouth,

Lest in so doing thou shouldst fling away

The gem whose lustre lies unseen within."

Chester Co., 5th mo. 1874.

For "The Friend."

### Sufferings of a Lost Man.

(Continued from page 318.)

I did not yet realize the possibility of a permanent separation from the company. Instead of following up the pursuit of their camp, I engaged in an effort to recover my horse. Half a day's search convinced me of its impracticability. I wrote and posted in open space several notices, which, if my friends should chance to see, would inform them of my condition and the route I had taken, and then struck out into the forest in the supposed direction of their camp. As the day wore on without any discovery, alarm took the place of anxiety at the prospect of another night alone in the wilderness, and this time without food or fire. But even this dismal foreboding was cheered by the hope that I would soon rejoin my companions, who would laugh at my adventure, and incorporate it as a thrilling episode into the journal of our trip. The bright side of a misfortune, as I found by experience, even under the worst possible circumstances, always presents some features of encouragement. When I began to realize that my condition was one of actual peril, I banished from my mind all fear of an unfavorable result. Seating myself on a log, I recalled every foot of the way I had travelled since the separation from my friends, and the most probable opinion I could form of their whereabouts was, that they had, by a course but little different from mine, passed by the spot where I had posted the notices, learned of my disaster, and were waiting for me to rejoin them there, or searching for me in that vicinity. A night must be spent amid the prostrate trunks before my return could be accomplished. At no time during my period of exile did I experience so much mental suffering from the cravings of hunger as when, exhausted with this long day of fruitless search, I resigned myself to a couch of fine foliage in the pitchy darkness of a thicket of small trees. Naturally timid in the night, I fully realized the exposure of my condition. I peered upward through the darkness, but all was blackness and gloom. The wind sighed mournfully through the pines. The forest seemed alive with the screeching of night birds, the angry barking of coyotes, and the prolonged dismal howl of the gray wolf. These sounds, familiar by their constant occurrence throughout the journey, were now full of terror, and drove slumber from my eyelids, but above all this, however, was the hope that I should be restored to my comrades the next day.

Early the next morning I rose unrefreshed and pursued my weary way over the prostrate trunks. It was noon when I reached the spot where my notices were posted. No one had been there. My disappointment was almost overwhelming. For the first time, I realized that I was lost. Then came a crushing sense of destitution. No food, no fire; no means to procure either; alone in an unexplored wilderness, one hundred and fifty miles from the nearest human abode, surrounded by wild beasts, and famishing with hunger. It was no time for despondency. A moment afterwards I felt how calamity can elevate the mind, in the formation of the resolution "not to perish in that wilderness."

The hope of finding the party still controlled my plans. I thought, by traversing the peninsula centrally, I would be enabled to strike the shore of the lake in advance of their camp, and near the point of departure for the Madison. Acting upon this impression, I rose from a sleepless couch, and pursued my way through the timber-entangled forest. A feeling of weakness took the place of hunger. Conscious of the need of food, I felt no cravings. Occasionally, while scrambling over logs and through thickets, a sense of faintness and exhaustion would come over me, but I would suppress it with the audible expression, "This won't do; I *must* find my company." Despondency would sometimes strive with resolution for the mastery of my thoughts. I would think of home—of my daughter—and of the possible chance of starvation, or death in some more terrible form; but as often as these gloomy forebodings came, I would strive to banish them with reflections better adapted to my immediate necessities. I recollect at this time discussing the question, whether there was not implanted by Providence in every man a principle of self-preservation equal to any emergency which did not destroy his reason. I decided this question affirmatively many times afterwards in my wanderings, and I record this experience here, that any person who reads it, should he ever find himself in like circumstances, may not despair. There is life in the thought. It will revive hope, allay hunger, renew energy, encourage perseverance, and, as I have proved in my own case, bring a man out of difficulty, when nothing else can avail.

It was mid-day when I emerged from the forest into an open space at the foot of the peninsula. A broad lake of beautiful curvature, with magnificent surroundings, lay before me, glittering in the sun-beams. It was full twelve miles in circumference. A wide belt of sand formed the margin which I was approaching, directly opposite to which, rising seemingly from the very depths of the water, towered the loftiest peak of a range of mountains apparently interminable. The ascending vapor from innumerable hot springs, and the sparkling jet of a single geyser added the feature of novelty to one of the grandest landscapes I ever beheld. Nor was the life of the scene less noticeable than its other attractions. Large flocks of swans and other waterfowl were sporting on the quiet surface of the lake; otters in great numbers performed the most amusing aquatic evolutions; mink and beaver swam around unscared, in most grotesque confusion. Deer, elk, and mountain sheep stared at me, manifesting more surprise than fear at my presence among them. The adjacent forest was vocal with the songs of

birds, chief of which were the chattering notes of a species of mocking-bird. Seen under favorable circumstances, this assemblage of grandeur, beauty, and novelty, would have been transporting; but jaded with travel, famishing with hunger, and distressed with anxiety, I was in no humor for ecstasy. My tastes were subdued and chastened by the perils which environed me. I longed for food, friends, and protection. Associated with my thoughts, however, was the wish that some of my friends of peculiar tastes, could enjoy this display of secluded magnificence, now probably beheld for the first time by the eyes of civilized man.

The lake was at least one thousand feet lower than the highest point of the peninsula, and several hundred feet below the level of Yellowstone Lake. I recognized the mountain which overshadowed it as the landmark which, a few days before, had received from General Washburn the name of Mount Everts; and as it is associated with some of the most agreeable and terrible incidents of my exile, I feel that I have more than a mere discovery right to the perpetuity of that naming. The lake is fed by innumerable small streams from the mountain, and the countless hot springs surrounding it. A large river flows from it, through a cañon a thousand feet in height, in a south-easterly direction, to a distant range of mountains, which I conjectured to be Snake River; and with the belief that I had discovered the source of the great southern tributary of the Columbia River, I gave it the name of Bessie Lake, after the "Sole daughter of my house and heart." \* \* \* \* \* While looking for a spot where I might repose in safety, my attention was attracted to a small green plant of so lively a hue as to form a striking contrast with the deep pine foliage. For closer examination I pulled it up by the root, which was long and tapering, not unlike a radish. It was a thistle. I tasted it; it was palatable and nutritious. My appetite craved it, and the first meal in four days was made on thistle roots.

Overjoyed at this discovery, with hunger allayed, I stretched myself under a tree upon the foliage which had partially filled a space between contiguous trunks, and fell asleep. How long I slept I know not; but I was suddenly roused by a loud, shrill scream, like that of a human being in distress, poured, seemingly, into the very portals of my ear. There was no mistaking that fearful voice. I had been deceived by and answered it a dozen times while threading the forest, with the belief that it was a friendly signal. It was the screech of a mountain lion (the cougar of naturalists) so near as to cause every nerve to thrill with terror. To yell in return, seize with convulsive grasp the limbs of the friendly tree, and swing myself into it, was the work of a moment. Scrambling hurriedly from limb to limb, I was soon as near the top as safety would permit. The savage beast was snuffing and growling below, apparently on the very spot I had just abandoned. I answered every growl with a responsive scream. Terrified at the delay and pawing of the beast, I increased my voice to its utmost volume, broke branches from the limbs, and in the impotency of fright, madly hurled them at the spot whence the continued howlings proceeded.

(To be continued.)

## A SONG IN THE NIGHT.

Selected.

Be still! and know that I am God,  
You tread the paths your fathers trod;  
They found no flow'ry beds of ease—  
They sailed through dark and stormy seas.

The hill of Zion—sweet retreat!—  
Is climbed by none but weary feet:  
Whom I would raise I first cast down;  
The conflict first—and then, the crown.

Unchastened sin would shame my grace,  
And leave thy soul a barren waste;  
Wisdom must needs be justified  
Of the whole race of Israel's tribe.

Be still! and know that I am God!  
A Father's hand employs the rod:  
I reign in righteousness, and prove  
My blood-bought seed with chastening love.

Selected.

"Let us therefore come boldly unto the throne of grace,  
that we may obtain mercy, and find grace to help  
in time of need."—Hebrews iv. 16.

The "time of need." Ah! little know'st thou now,  
Thou of the laughing lip and sunny brow;  
In the first freshness of thy morning hours,  
In the first conscious glow of untried powers,

When such shall be,  
No want, no wish, but, soon as felt fulfilled,  
No bright hope crushed, no young aspiring chilled,  
No trace of tears upon that mantling cheek—  
Thou wonderest that the sacred page should speak  
Of need to thee!

Yet will it come, thou know'st not whence or when;  
O! seek betimes the Grace that can sustain thee then.

For unto all it cometh, soon or late,  
Slow creeping change, or sudden stroke of fate.  
The waking from sweet childhood's rainbow trance—  
The bounding spirits quelled as years advance,  
By toil and care;

The Sundering of affection's sacred ties;  
The tempest shock when passion's surges rise;  
The syren-voice of pleasure, or the maze  
Of folly, with its thousand winding ways;  
Each step a snare;

These will o'ertake, thou know'st not how or when;  
O! seek betimes the Grace that can sustain thee then.

In thine own spirit, in the world around,  
By day, by night, thy "time of need" is found;  
Perchance when all combine their aid to lend,  
Perchance when e'en thy bosom's dearest friend  
Suspects it not:

The heart hath joys and sorrows all its own,  
By human sympathy unfelt, unknown;  
And oft the sense of need is heavier there,  
Than when with outward ills thou seem'st to share  
The common lot.

Then lift thy young heart in its strength and glee,  
To seek that grace Divine which then can succor thee.

So shalt thou find, in sorrow's darkest hour,  
A guiding Light, a sheltering Arm of power.  
In pain and sickness on a Hand unseen  
Thine aching head in sweet repose shall lean;  
And in the vigil by the loved one's bed,  
A viewless presence from His wings shall shed  
The healing balm.

So through each changeful scene of life below,  
One place of sure retreat thine heart shall know;  
So shall thy faith be steadfast, on the day  
When the death-angel on thy brow shall lay  
His icy palm.

So in that last and sorest "time of need,"  
That Rock shall fail thee not—that Grace thy cause  
shall plead.

H. Bowden.

For "The Friend."

Look not so much on other men's faults  
as on *thine own*. Thou knowest thine own  
faults, but it is difficult to know the true na-  
ture and degree of the faults of others. A  
disposition to judge others turns the soul from  
its true centre in God, brings it outward, and  
takes away its repose. "Judge not, that ye  
be not judged." D.

Fifth mo. 10th, 1874.

For "The Friend."

Hints Respecting the Humbling, Transforming power  
of Divine Grace when nearing the Valley of the  
Shadow of Death; from a Memoir of Deborah  
Baekhouse.

It is of the greatest importance to a growth  
in the Truth, and to a solid religious life and  
character, that we remember what we are,  
poor, fallen, lost creatures, wholly dependent  
upon Divine kindness, and the grace and  
mercy of the Redeemer,—

"In whose favor life is found,  
All bliss beside a shadow and a sound."

well to remember, "Who made, who marred,  
and who has ransomed man." Remember also,  
as says the Prophet, "The rock whence ye  
are hewn, and the hole of the pit whence ye  
are digged;" that so we may not look upon  
ourselves with any degree of complacency, or  
assume that we have attained immediate sal-  
vation either through a self-wrought or intel-  
lectual belief in the outward sacrifice of the  
Saviour and His imputed righteousness, or  
through any other unfounded hope of our  
own; and thence that we are prepared for the  
eternal state, without first obedience to the  
light of the Lord Jesus manifested in the  
heart; without submission to the Saviour's  
thoroughly cleansing baptism of fire and the  
Holy Ghost; without experiencing repentance  
unto newness of life; or without knowing  
judgment to pass upon the transgressing na-  
ture, and the operation of that omnific Word,  
that "is quick and powerful, and sharper than  
any two-edged sword, piercing even to the  
dividing asunder of soul and spirit, and of the  
joints and marrow, and is a discerner of the  
thoughts and intents of the heart:" which,  
through the life and power of Christ the Door,  
effects an entrance by the cherubim and  
flaming sword, unto the eternal rest and in-  
heritance of the redeemed.

The dear subject of this memoir could not  
presume upon any thing more than the ebas-  
tened, humble feeling that she was a poor,  
weak creature, a mere worm; and that it was  
through obedience to Divine grace alone, as  
it had been measurably extended to her, that  
she could derive any solid satisfaction or true  
peace. This faith led, as it ever will, to watch-  
fulness and care and restraint, both for her-  
self and on account of her children, in what  
are termed *little things*, saying, "I have seen  
and found that nothing else will do." She also  
spoke of the sanctifying operation of the Holy  
Spirit of God, and of the importance of an at-  
tention to the Light of Christ; which would  
very clearly direct in all things; and, if obeyed,  
produce that peace which passeth all hu-  
man understanding.

These solemn testimonies of D. B., suggested  
in view of the awful, fast-hastening assize,  
are commended to the careful perusal of the  
friendly reader.

"In the evening of the 3rd, her mind seemed  
sweetly humbled under a sense of her Heav-  
enly Father's love. She said, that she felt her-  
self to be a poor, weak creature, nothing but  
a poor worm; and that it was through Divine  
Grace alone, as it had been measurably at-  
tended to, that she had been made any way  
tolerable; earnestly enjoining all around her,  
to be very careful not to say one word, that  
should possibly attribute any thing to her;  
and again emphatically saying: 'I am noth-  
ing at all but a poor worm. I have not one  
scrap of my own,—no! not one scrap to trust  
to. It is of Divine grace and mercy, that I

am permitted to feel such a portion of inex-  
pressible peace. For some time past, I have  
seemed free from condemnation; and have  
felt comfort in having endeavored to serve  
the Lord; and in doing the little I have been  
enabled to do, for the cause of Truth.'

After this, she spoke of the deep concern  
she was under, that her precious children  
might be trained up in the fear of the Lord,  
and instructed in Divine things; that their  
tender minds might be closely watched; and  
*every thing withheld from them*, which might  
encourage pride or any other wrong disposi-  
tion. She then remarked that she viewed  
children as a very important charge; and that  
a *great weight of responsibility* attached to  
parents to whom they were committed.

She spoke much of the necessity of keeping  
to the simplicity of Truth, in reference to  
dress, and what may be termed little things,  
saying: 'I have seen and found that nothing  
else will do. If the cause of Truth be sup-  
ported, it must be done in the simplicity.'  
She said she longed that if her dear children  
should live to grow up, they might be made  
as lights in the world; that she had never  
desired much of this world's goods for them;  
but only a sufficiency to live in a *plain way*;  
that she even dreaded the idea of riches,  
knowing they were often a great snare and  
temptation. She then committed her chil-  
dren and her dear partner, to the care and  
keeping of the Lord; expressing her belief  
that they would be cared for every way.

She afterwards passed a pretty comfortable  
night; but on the morning of the 4th appeared  
to be very faint, and thought she might be  
going. After a short time she revived; \* \*  
and in the course of the day, she imparted to  
those present excellent counsel, instruction,  
and warning, adapted to their different states;  
endeavoring, in a particular manner, to im-  
press upon them the importance of an atten-  
tion to the Light, or manifestation of the  
Spirit of Christ, in their own minds; which  
would very clearly direct them in all things;  
and, if obeyed, produce that peace which  
passeth all human understanding.

To her sister-in-law, Hannah Baekhouse,  
she said: 'I do not seem to have much on my  
mind to say to thee: knowledge has not been  
wanting; thou hast seen and felt what the  
Lord requires of thee.' She, however, extend-  
ed encouragement to her, to press forward in  
the path of dedication with increased dili-  
gence; urging, that an *implicit obedience in one  
little thing after another*, as manifested to be  
our duty by the Light in our hearts, is the  
*only way* to make spiritual progress; and add-  
ing: 'Delays are dangerous. There is no time  
to spare.'

This solemn address appeared to have its  
full effect upon the mind of her sister, who  
was taken ill only a few days after, viz., on  
the 10th of the same month, and died on the  
23rd; having, there is good ground to believe,  
submitted her will and affections to the sancti-  
fying operation of the Holy Spirit of God,  
whom she desired to serve; and who was  
pleased to cut short the work in righteousness,  
and, we trust, to grant her a place amongst  
all those, who have witnessed their robes to  
be washed and made white in the blood of the  
Lamb."

(To be continued.)

If some have to sit in dust and ashes, it is  
not to be marvelled at. Why should we want  
to be but where the Master is.

For "The Friend."

## Reflections upon Philadelphia Yearly Meeting.

(Concluded from page 317.)

There was, on one occasion, in the recent gathering, an illustration of the unedifying character of the scenes which we may expect, the practice of reading Scriptures in our meetings for Divine worship, as a part of the proceedings thereof, should be introduced and established amongst us. An effort to effect its change is now being made in England. It should succeed, it would doubtless stimulate some in this country to follow the example, thus in one sense, if one member of the Church suffer, all the members suffer with it.

Scattered through the journals of our early friends, are to be found several instances in which they felt it right to produce in public religious meetings, a copy of the Bible, and refer to its pages in proof of the assertions they made. They were much misrepresented, and many false charges made against them, that they rejected or undervalued these sacred writings, &c.; and they were occasionally led in this way to stop the mouths of unsayers. One of the most striking cases of the kind is that recorded in the Life of Samuel Bownas, who, at the funeral of a friend in Dorsetshire, England, felt impelled to address the people with a Bible in his hand, which he referred for proof of his doctrines. Samuel, after the company had dispersed, was informed that there had been present a Baptist preacher, who in his sermons had been accustomed to say that Friends denied the Scriptures, and did not use the Bible to prove anything. At another time, when travelling in America, he had a public meeting at Newbury, Massachusetts. The people were very idle in their behavior, and the assemblage very large. Samuel stood up, and took out his Bible. This attracted their attention, and after a time, a degree of quiet having been restored, he said that, "Religion without righteousness was useless, and could not profit those who possessed it. And going on, I came in the course of my service to recite the great improvement true religion made in the minds of those who lived in it, by giving them power over their lusts and passions; repeating that text in James i. 26, 'If any man among you seem to be religious, and bridleth not his tongue, but deceiveth his own heart, his man's religion is vain.' One out of the wrong said, 'Sir, you impose upon us, there is no such text.' I made a full stop, and turned to it; and many Bibles then appeared. I repeated chapter and verse, and they turned to it. Then I asked them, if they had it? they replied, they had. Then I read both the twenty-sixth and twenty-seventh verses, and asked if it was so in their Bibles; they answered it was. I then desired them to consider, whether I that repeated the text, or he that said there was no such text, was most in the right. I went on with my opening, carefully minding my guide; and in the course of the doctrine I had in my view, I came to treat of faith, and distinguished between true and false faith, showing, that notwithstanding we might give our assent to the truth of what was called the apostle's creed, or any other made and drawn up by men, and might be zealous to dispute and contend for the truth of these creeds, in the wording of them; yet for all that, if we did not lead Christian lives, we were still but unbelievers; 'for faith without works is dead,' as the text tells us. At

these last words one cried out, 'you impose upon us, there is no such text.' I immediately stopped and turned to it, and quoted it, and all who had Bibles made search. There being a profound silence, I read the text, asking, if it was so in their books? They all replied, it was. I made the same remark as before; and then I went on, distinguishing between true and false faith, plainly demonstrating from Scripture, that faith was very different from what many took it to be. Truth was eminently preached that day, and there was a considerable tenderness amongst the people, and the meeting ended well."

While I believe that Samuel Bownas was rightly directed in these cases, and that in our days there may be occasions when a similar course would be proper; yet I am equally certain, that, in common with the great body of the Society from its rise, he would have condemned the practice of regularly reading anything in our meetings for worship, as a part of their proceedings; as a step backward towards that formality in worship out of which our early Friends were gathered. Robert Barclay says, that when assembled for Divine worship, "The great work of one and all ought to be to wait upon God: and returning out of their own thoughts and imaginations, to feel the Lord's presence, and know a gathering into His name indeed, where He is in the midst, according to His promise." "And as every one is thus gathered, and so met together inwardly in their spirits, as well as outwardly in their persons, there the secret power and virtue of life is known to refresh the soul, and the pure motions and breathings of God's spirit are felt to arise; from which, as words of declaration, prayers or praises arise, the acceptable worship is known, which edifies the church, and is well pleasing to God." This is that true and spiritual worship, practised by those who found "no outward ceremony, no observations, no words, yea, not the best and purest words, *even the words of scripture*, able to satisfy their weary and afflicted souls; because where all these may be, the life, power and virtue, which make such things effectual, may be wanting. Such were necessitated to cease from *all externals*, and to be silent before the Lord."

## Curious Phenomena of Taste and Habit.

Everybody has probably noticed a resemblance in the strong, pungent taste and odor of the highly esteemed condiments to food, mustard and horseradish. It is worth notice that these substances, so dissimilar in their appearance, contain the same chemical compound, allyle, which imparts to both their penetrating odor, burning taste and blistering quality. The chemical compound, allyle, combined with sulphur, imparts the strong disagreeable odor to the onion, garlic, and even to assafœtida, though the latter is much stronger and more disagreeable to Europeans, owing to its peculiar fetid smell.

In horseradish the allyle is combined not only with sulphur, but also with another organic substance, cyanogen or prussic acid. Prussic acid is well known as one of the most virulent poisons in existence, a very small dose being sufficient to cause death; but every one knows that horseradish can be eaten with perfect impunity. We mention this particularly because we often called the attention of our readers to the fact that many substances which are poisonous in themselves, when in

combination with other substances become perfectly harmless.

The presence of prussic acid in the horseradish deprives the volatile oil which may be distilled from this plant of the fetid odor so characteristic of the onion, garlic and assafœtida, while at the same time it would appear to impart the pungent taste. The plants which may be designated as the onion family yield upon distillation the same essential oils which give off an odor similar to the original plant in a highly concentrated and consequently in a highly disagreeable form. The intensity of the odor of this oil may be inferred from the fact that from thirty to forty pounds of the most highly flavored garlic are necessary to produce a single ounce of the oil. A much larger amount of onion and a smaller amount of the as-afœtida would be required to give the same amount of this oil.

Natural instinct seems to have led the inhabitants of different countries to eat these plants more for their medicinal properties than because they were especially pleasant to the taste. There are thousands of people in this country who cannot endure the taste or smell of onions; but, on the other hand, a large number, more particularly of the working classes, are very fond of them. In England the onion is more highly esteemed, as a general thing, than in this country; but not one Englishman in a thousand is fond of garlic. In France a considerable portion of the population is fond of garlic, and it is very frequently used in small quantities to give a mild garlic flavor to various dishes.

In Spain and Portugal garlic is almost as common a dish as potatoes are with us; and in the countries lying on the borders of Asia the sap of the assafœtida plant is carefully collected and highly esteemed as a condiment or flavoring for food. The eastern Asiatics used assafœtida to the entire exclusion of both of the milder forms of onion and garlic. From the Bible we learn that the ancient Israelites were fond of onions and garlic; for in the wilderness they murmured, saying, "We remember the cucumbers and the melons, the leeks, the onions and the garlic;" while the Egyptians regarded the onion as a sacred plant and worshipped it.—*Exchange*.

For "The Friend."

## Ministers and Elders.

Since our last Yearly Meeting, the subjoined has been sent to the writer by a friend. Though especially addressed to the meeting of Ministers and Elders, it seems to be of more general application; containing suggestions that may well claim the solid consideration of our members everywhere. May none within our own borders, neither elsewhere, suffer themselves to become so wise in their own eyes, as not to be willing to heed the precepts and pleadings—so calculated to stir the pure mind by way of remembrance—of former and better days.

While it is most surely believed that no sincere endeavor to serve the Lord in humility, contrition and prayer will ever be unheeded by Him, we may nevertheless here express the conviction, that never was the truth more sealed upon the mind than during the sittings of our late annual assembly; that what is so much needed amongst us, and especially with some would-be modern reformers is, a return to the first principles of this religious Society; even faithful obedience to the

Light of Christ Jesus, manifested in the secret of the heart, as "God's gift for man's salvation;" then would all the testimonies proceeding therefrom, and most surely committed to this people, be kept to and upheld in their ancient purity; then too, would the power of the Lord, undiminished and the same that ever it was, be afresh felt to overshadow, as of old, our religious assemblies; then would "the righteousness thereof go forth as brightness, and the salvation thereof as a lamp that burneth;" and the shout of a king be again heard, to the rejoicing and joy of our souls.

The manuscript alluded to, with some abridgment, is:—"At a Yearly Meeting of Ministers and Elders, held in Philadelphia, for Pennsylvania, New Jersey, &c., in Ninth month, 1787.

It being the sense of this meeting, that the revival of these pertinent and weighty advices, issued by our brethren in London, in their Yearly Meeting, 1775, for the especial use and notice of Ministers and Elders, may tend to our improvement and solid instruction, it is therefore recommended to our several select Quarterly Meetings, to promote the reading and considering of them at such proper times and seasons, as may appear to them most likely to answer the valuable purpose for which they were intended. The Clerk of this meeting, is desired to furnish each Quarter with a copy of these advices. Extracted from the minutes of said meeting, by Henry Drinker, Clerk.

Against undue and restless behavior under the ministry of any Friend, whilst in the unity of the body.

That all be cautious of using unnecessary preambles, and laying too great a stress on their testimony, by too positively asserting a Divine motion, and frequently repeating the same, seeing no such pretensions will obtain credit, were it not manifestly so; and where it is so, the baptizing power of Truth accompanying the words, is the best evidence.

Against misquoting and misapplying the Holy Scriptures; and it is desired, that all those concerned (in the ministry), be frequent in reading them.

Against hurrying meetings toward the conclusion, by unnecessary additions when the meeting (subject) was left well before.

Against unbecoming tones, sounds, gestures, and all affectation, which are not agreeable to Christian gravity.

Against undertaking or remaining in employments they have not knowledge of, as some have done to their own hurt, the injury of others, and the reproach of their religious profession: but to employ themselves in business they are acquainted with, and to avoid an idle life.

Not to speak against persons, or report things upon hearsay; but to treat with the parties concerned, and thereby prevent sowing discord.

That their apparel, and the furniture of their houses, their tables and way of living be with decency, moderation and temperance, that they be therein good examples to others.

That ministering Friends be careful not to hinder one another's service in public meetings, but every one have a tender regard for others, that nothing be offered with a view to popularity, but in humility and the fear of God.

That ministers, when they travel in the service of Truth, be careful not to make their visits burdensome, or the gospel chargeable.

That all ministers and elders, be careful to keep their whole conversation unspotted, being examples of meekness, temperance, patience, and charity. And lastly, as supplication to God, is an especial part of worship, it must be performed in spirit and in truth, with a right understanding, seasoned with grace. Therefore, let ministers be careful how and what they offer in prayer; avoiding many words and repetitions, and not to run from supplication into declaration, as though the Lord wanted information. And let all be cautious of too often repeating the high and holy Name, or His attributes, in a long conclusion; nor let prayer be in a formal and customary way to conclude a meeting, without an awful sense of Divine assistance attending the mind.

For "The Friend."

### The Heart of Africa, by Dr. Schweinfurth.

(Continued from page 315.)

Though our author made frequent use of his gun as a means of supplying himself and his attendants with food, yet he does not appear to have been one of those sportsmen who wantonly destroy life. Hence hunting achievements are but seldom recorded in his pages. Yet he mentions some incidents that illustrate the habits of the wild animals, into whose abodes he penetrated. The formidable character of the lion, and the terror it inspires are shown in the following passage of his book:

"As we were preparing to continue our march, some people came to meet us with some dismal intelligence from the neighboring village of Geegyee. They said that on the previous night a Nubian soldier, who had laid himself down at the door of his hut, about five paces from the thorn hedge, had been seized by a lion, and before he could raise an alarm had been dragged off, no one knew whither. I now learnt, that this district had for some years been infested with lions, and that lately the casualties had been so frequent that the greater part of the inhabitants of Geegyee had migrated in consequence. The entire village would have been transplanted long ago, but the lions had been always found to follow every change of position. At seven o'clock in the morning we reached the ill-omened spot, the poorest of neglected villages, surrounded by woods. A thorn hedge formed its enclosure, but nowhere could we discover an entrance. Although the sun was now high, the inhabitants, terrified lest the lions should be near, were still sitting either on the tops of their roofs or on the piles that supported their granaries. Speechless, and depressed with fear, my people proceeded on their journey: every one kept his gun in hand, and the bearers, listening anxiously at every rustle that broke the stillness, peered carefully after any traces of the dreaded foe.

On one occasion, I had gone out to hunt, attended by one of my Nubians, who rode a donkey, of which the supposed office was to carry home whatever might be the produce of my sport. I left my servant and the donkey carefully out of sight in a spot where two rifts in the soil represented what, during the rains, was the course of two connected brooks. Proceeding to the tall grass, I was not long in sighting a small Bush-Antelope. I took a shot, and could entertain no doubt the animal was struck. I saw it scamper across the grass, and was every moment expecting to

see it fall, when I heard a sudden bleat of anguish, and it was gone. Forcing my way through the rank grass, I made the closest scrutiny all around the place, where but a few minutes since, I had seen the wounded antelope, but my search was all in vain. I was encumbered in my movements by having to carry a couple of guns: but knowing that the area of the ground was bounded by the twigs that enclosed it, I felt certain that my search would not be without success. A length I discovered the antelope almost at my feet, but it was fixed immovably; it was fastened to the ground by what seemed to me at first the filthy skirt of one of the negroes. Looking more closely, however, I soon saw that the creature had been seized by an immense serpent, that had wound itself three times round its body, leaving its head projecting and drawn down so as well nigh to touch the tail. I retreated far enough to take an effectual aim, and fired. The huge python immediately raised itself bolt upright, and made a dash in my direction, but it was able only to erect its head; the hinder parts lagging trailing on the ground, because the vertebral connection was destroyed. Seeing the state of things, I loaded and fired repeatedly, taking aim almost at random, for the evolution of a snake are as difficult to follow as the flight of the goat sucker. I completed my capture; the return to my quarters was made in triumph; the double booty formed a double burden, the snake on one side of the donkey and the antelope on the other, balancing each other admirably.

When in the Niam-niam country, making a halt at a hamlet, my two companions drew my attention to a valuable production of their land. Underneath one of the granaries, which was supported in the usual way upon posts was a great pile of firmly pressed clay. On this an old woman was hammering with the pestle belonging to her mortar, and having knocked a hole, she drew out some tubers of a kind that I did not recognize. I afterwards found that it was the Colocasia, which is cultivated very freely throughout the Niam-niam country, and which when boiled make a very excellent vegetable. The thick covering of clay is put over them not only to keep them moist in the dry season, but also to defend them from the ravages of rats, worms, and white ants. Whenever any of the tubers are required it is only needful to knock a hole through the clay, which can be plastered up again with a few handfuls of fresh mud. The same plan is also adopted in the rainy season to protect the crops from damp and rot.

The arrangements of the Niam-niam huts are much the same throughout the land. Two, or at most three, families reside close together. Generally from eight to twelve huts are clustered round one common open space, which is kept perfectly clean, and in the centre of which is reared a post upon which the trophies of the chase are hung. Skulls of the rarest kind, splendid horns of antelopes and buffaloes are attached to this standard, and, it must be added, skulls of men and withered hands and feet! Close in the rear of the huts, upon the level ground, were the magazines for corn; behind these would be seen a circle of Rokko fig-trees, which are only found in cultivated spots, and the bark of which is prized, far more than the hand-some of skins, as a material to make into

othing. Further in the background might be noticed a perfect enclosure of paradise figs; then in wider circumference the plantations of manioc and maize; and, lastly, the outlying fields of eleusine extending to the compound next beyond.

The social position of the Niam-niam women differs materially from what is found amongst other heathen negroes in Africa. The Bongo and other women are on the same familiar terms with the foreigner as the men, and the Monbnttoo ladies are as forward, acquisitive, and prying as can be imagined; but the women of the Niam-niam treat every stranger with marked reserve. It is one of the fine traits of the Niam-niam that they display an affection for their wives which is unparalleled among natives of so low a grade, and of whom it might be expected that they could have been brutalized by their hunting and warlike pursuits. A husband will spare no sacrifice to redeem an imprisoned wife.

Dr. Schweinfurth remarks that his personal appearance aroused the most vivid interest on the part of these people. Their curiosity seemed insatiable, and they never wearied in their inquiries as to his origin. To their minds, the mystery was as to where he could have come from; his hair was the greatest of enigmas to them; it gave him a supernatural look, and accordingly they asked whether he had been dropped from the clouds, or was a visitor from the moon, and could not believe that anything like him had been seen before. It hardly seemed to be the color of the skin that excited their astonishment, for even in the remotest regions of Central Africa, tribes that have no conception of an ocean are aware of the existence of white men; but it was invariably the long straight hair that used their chief surprise. He had purposely allowed his hair to grow to an unusual length, and he might be identified at once amid all the countless shades of complexion that were found among the Nubians.

His botanical zeal gave him the epithet of "Leaf-eater," which he retained during the remainder of his journey, and some marvelous accounts of his performances in that line, came current among the natives. It was said that he had a habit of getting into a dense thicket where he imagined he was unobserved, and that then he used in great haste to gather and devour enormous quantities of leaves; and that he invariably came forth from the woods with an exhilarated expression and quite a satisfied look.

The dominant idea which seemed to be impressed upon the natives by his botanical labor, concentrated itself upon their conviction as to the character of the country where the white man has his home. According to their belief, this could show neither grass nor trees, and consisted of nothing better than sandy plain and stony flat. Those amongst them who had been carried away as slaves in the ivory expeditions, and had returned again from Khartoon, had brought strange accounts of the desolation and drought of the desolate lands over which they had passed; and what, they asked, must be the condition of the still remoter countries of the Frank, of whom they only knew that he kept the Turk supplied with cotton-stuffs and guns?

Dissensions, like small streams, are first begun; Scarce seen they rise, but gather as they run; So lines that from their parallel decline, More they proceed the more they still disjoin.

Selected for "The Friend."

[With one or two verbal changes not affecting the sense.]

Dear friends and brethren:—I have something further in my heart to communicate unto you in dear and tender love, and in desire of your preservation out of the snare of your adversary; and that is, to exhort you all to dwell in the pure judgment of the Truth, which is a defence upon your glory; and let none bereave you of this under any pretence whatsoever. But as you come to a true feeling of the life in yourselves, to which alone the certain judgment appertaineth, so let this life have freedom, and stop it not from judging all that which is at enmity with the life, and tends to the hurting of the true plant of God. For I have seen a harm bath come to many who have parted with their judgment, and so have become unarmed, and the enemy hath prevailed upon them, under a pretended tenderness to permit or suffer such things as were hurtful to themselves and others; and though the Lord hath given them judgment and discerning in the matter, yet were bereaved of that gift, and so by little and little were beguiled.

Oh dear Friends! Consider these days are perilous times, and it is needful for every one to watch in that same eternal light to which you were first turned, that by its righteous judgment ye may be preserved from everything in yourselves that appears contrary to that precious Life of which you have tasted. All beware of that affected tenderness that cries out, be tender to all, and pray for all, and mind the good in all, and love all, and judge none, but leave judgment to God, &c. I say, heed not the plausible words of that spirit, which, to save its own head from a stroke, would bereave you of a judgment which God hath given you; and is truly His judgment, and is to be administered in His wisdom and power for the cleansing and keeping clean his sanctuary. Such as have no judgment in their goings, are they that know not the true way of peace, but make them crooked paths. He that goeth in them, shall not know peace: Isa. lix. 8. But some may say, was not Christ meek and lowly? and ought not all to be like unto Him?

It is true, my friends: but there is a difference between the seed's suffering and its reigning, and there are times for them both. When it doth please God to permit the hour and power of darkness in the open persecutors, to exalt itself against his seed and people by persecution, or such like; then they are led by His spirit to appear in meekness and quietness, as a sheep before the shearer. But what is this, to suffering those that appear under pretence of the Truth, and yet are out of the Truth and really enemies to its prosperity, striving to exalt and set up another thing instead of the Truth? Such as these the Lord doth require you to use not only patience and meekness towards; but if that will not reclaim them, they must know the judgment of the Truth, and you in it must stand over them; for in this case the exaltation of Christ is come, and God is crowning Truth with dominion over every false spirit, and corrupt practice thereof.

Dear friends, in that which keeps out the defiler and the betrayer, all wait upon the Lord, that you may have your armor on, and be fortified with the strength, with the might, and with the judgment of God. Keep that under in every place, which under pretence of tenderness and forbearance, would make void the testimony of

Truth—or make the offence of the Cross to cease in anything wherein you have been restricted from the beginning: that the Lord may behold and see judgment established and be pleased: Isa. lix. The Lord looked, and there was no judgment, and it displeased him; for thereby deceit got up, which with it, is to be kept down.

So the Lord God of power and wisdom preserve you faithful, fitted for every good word and work,—the strong to watch over the weak in singleness, and the weak to be subject to the strong in the Lord, that so the pure plant of righteousness and truth, may grow in and among you all, to his praise that hath called you,—to whom be glory and honor forever. Amen.—Stephen Crisp. 1666.

## THE FRIEND.

FIFTH MONTH 30, 1874.

Looking over some writings of Friends within a few days, we were struck with the following exhortation from the pen of William Penn, and we think it deserving of being revived at the present time, as applicable to many among us.

There are many in different meetings, who are morally correct in their lives and conversation, and who not unfrequently express themselves as being wellwishers to the truth, but who appear to think there is no responsibility resting upon them to do, or not to do anything for its promotion or defence. They are honest and diligent in business, and careful in the observance of outward religious duties, but they would hardly expect any one to suppose they are fervent in spirit, serving the Lord. These seem not to believe, or at least not to realize that every member of the church is called to let his or her light so shine before men, that others seeing their good works may glorify our Father who is in heaven, on their account.

It is not talking a great deal about religion, or engaging in stated performances as religious works, that is required, or most efficient in spreading the Redeemer's kingdom; but to show forth his transforming, preserving and sanctifying power, by a constant, consistent walk in the strait and narrow way to life eternal.

George Fox records, "The Lord said unto me, if one man or woman were raised by his power, to stand and live in the same Spirit that the prophets and apostles were in who gave forth the Scriptures, that man or woman should shake all the country in their profession for ten miles round." Such an effect was not to be confined to that day: if our members would stand and live in that Spirit, it might be manifested now, as well as formerly. So soon as any one has been brought under the regenerating power and government of Christ, through obedience to the requirements of his Spirit in the heart, he becomes deeply interested in the welfare of his church. He feels bound to give his countenance and aid in maintaining its order; to illustrate the purity of its doctrine by his example; to bear witness that Christ's kingdom is not of this world, and to the sufficiency of his yoke to restrain from its corrupt spirit, manners and worships. Thus, without indulging in irreverent, or flippant speaking of sacred things, such are loud preachers, and are living wit-

nesses that the Son of God is come, and hath given them an understanding, that they may know Him that is true, and that they are in Him that is true, even in his Son Jesus Christ.

The church is standing greatly in need of such witnesses for Jesus, and the spirituality and power of his gospel. The call of William Penn may well be addressed to many of our members, and may it incite each one to inquire honestly how far it is applicable to himself or herself.

"Wherefore I cannot but cry and call aloud to you, who have long been professors of the Truth, and know the Truth in the convincing power of it, and have a sober conversation among men; yet content yourselves only to know Truth for yourselves, to go to meetings, and exercise an ordinary charity in the church, and an honest behavior in the world; and limit yourselves within these bounds, feeling little or no concern upon your spirit, for the glory of the Lord, in the prosperity of his Truth in the earth, more than to be glad that others succeed in such service. Arise ye, in the name and power of the Lord Jesus; behold how white the fields are unto harvest in this and other nations, and how few able and faithful laborers there are to work therein. Your country folks, and neighbors, and kindred, want to know the Lord and his Truth, and to walk in it. Does nothing lie at your door upon this account? Search and see, and lose no time, I beseech you, for the Lord is at hand.

"I do not judge you; there is One that judgeth all men, and his judgment is true. You have mightily increased in your outward substance; may you equally increase in your inward riches, and do good with both, while you have a day to do good. Your enemies would once have taken what you had from you, for his name sake, in whom you believed; wherefore He has given you much of the world, in the face of your enemies. But, O, let it be your servant, and not your master! Your diversion, rather than your business! Let the Lord be chiefly in your eye, and ponder your ways, and see if God has nothing more for you to do. And if you find yourselves short in your account with him, then wait for his preparation, and be ready to receive the word of command; and be not weary of well doing, when you have put your hand to the plough; and if you faint not, you shall assuredly reap the fruit of your heavenly labor, in God's everlasting kingdom."

#### SUMMARY OF EVENTS.

**FOREIGN.**—Repeated attempts of Goulard to form a new French Ministry failed, and finally President MacMahon decided to choose one himself. It now consists of General Cissy, Minister of War and Vice-President of the Council; Decases, Minister of Foreign Affairs; Fourton, Interior; Magne, Finance; General Caillaux, Public Works; Louis Gurart, Commerce; Viscount DeLamont, Public Instruction; Adrian Tailhand, Justice. The Marquis of Montaignac is appointed Minister of Marine. A majority of Assembly appear disposed to support the new Ministry. The Paris papers generally think that the Ministry is more of a business one than representative of any distinct political programme.

On the 23d the new German Ambassador to France, Prince Hohenzollern, presented his credentials to President MacMahon. The usual assurances of friendly feelings on both sides were given.

A Paris dispatch of the 24th says: Ex-President Thiers to-day received a deputation from the Department of the Gironde, and in reply to their address said the monarchy which he was overthrown for not establishing was impossible. A Conservative Republic alone could reorganize and pacify France. He hoped that after its recent experience the Assembly would admit

the necessity of making the country the sovereign arbiter. If it persisted in sitting while powerless to attain any definite result it would exceed the bounds of reason.

At a recent election in the Department of Nièvre, to fill a vacancy in the Assembly, Bourgoing, a Bonapartist, was elected, receiving 5000 votes more than his Republican competitor.

In the north of Spain the struggle between the Carlists and the government forces is still undecided, numerous sanguinary conflicts on a small scale are of almost daily occurrence. In the contest for the possession of the heights commanding Bilbao, it is claimed that the Carlists have gained some successes. In other collisions they appear to have suffered most. A Madrid dispatch of the 20th says: There was a severe skirmish between the Republicans and Carlists yesterday in the neighborhood of Bilbao. The insurgents were repulsed with heavy loss. One hundred Republicans were killed and wounded. Thirty Carlists were taken prisoners. One of the 25th says that General Concha was concentrating his forces for an attack on the Carlists who were entrenched in the forest near Estella.

A City of Mexico dispatch of the 18th states that the Alcalde of Iseolo, in the State of Sinalva, has officially reported to the Prefect of his district that on the 4th of last month he arrested, tried and burned alive, Jose Maria Borulla and his wife, Dioga, for sorcery, it having been proved that they had bewitched one Aliestro Zacarias. The Alcalde says the people were exasperated against the sorcerers, and demanded that they should be burned. The sentence was executed with his approval, and he adds that he has his eye on other sorcerers against whom complaints have been made.

The *Official Diario* of Mexico confirms the Alcalde's statement, and says that he has since caused another old woman and her son to be burned for the same cause. The general government has taken measures to stop these atrocities.

A railroad is building from Naples to the crater of Vesuvius, or as near thereto as possible. The journey from Naples to the crater can then be made in about an hour and a quarter.

The Parliamentary election in Durham has been annulled on account of bribery, and the election in Galway on account of intimidation of electors.

Opperheim & Schrader, merchants, have failed. Liabilities estimated at \$3,000,000.

The Czar left England on the 21st, on his return to Russia.

The dispute between the agricultural laborers and their employers in the eastern counties, is reported to be in the way of adjustment. The protracted "lock out" of the farm laborers in Lancashire has been ended by a settlement, which will probably be adopted in the other agricultural districts of England.

The public debt of Great Britain is said to be in a satisfactory state. For the first time since the great French war it stands at less than £780,000,000; and more than £51,000,000 of this sum represents the value of a series of temporary annuities, which will expire chiefly in 1885. The permanent debt of the country, then, amounts to about £728,000,000.

A violent thunder storm passed over London and the midland counties of England the 25th inst. Some lives were lost, and considerable damage was done to the crops.

The President of Hayti has resigned, and transferred the government to Dominguez the Vice-President, who has the support of the army, and insists that the Assembly shall declare him Executive of the island.

Intelligence from Calcutta is generally reassuring. There has been beneficial rain in Tirhoot and part of Bangulpore; public health is good; local transport arrangements are working well; and no fresh deaths from famine are recorded.

From the census of Japan for the year 1872, just published, we learn that the total population of the islands is 33,110,825, of whom 16,796,158 are males and 16,314,687 are females.

**UNITED STATES.**—The House of Representatives by a vote of 160 to 54, has passed a bill for the admission of New Mexico as a State.

The U. S. Senate, after long discussion, has passed the Civil Rights bill which was so zealously urged by the late Senator Sumner. The bill enacts: That all citizens and other persons within the jurisdiction of the United States, shall be entitled to the full and equal enjoyment of the accommodations, advantages, facilities and privileges of inns, public conveyances on land or water, theatres and other places of public amusement, and also of common schools and public institutions of learning or benevolence, supported in whole or in part by general taxation, and of cemeteries so supported,

and also the institutions known as agricultural colleges, endowed by the United States, subject only to the conditions and limitations established by law, and applicable alike to citizens of every race and color, regardless of any previous condition of servitude.

It is supposed that a majority of the members of the House of Representatives are in favor of the bill as passed the Senate, but it is doubtful whether it can be passed the present session, Congress having agreed to adjourn on the 22d of Sixth month, and there being many measures which will take precedence in the regular order of business. A motion to suspend the rule and take up the bill was lost yeas 153, nays 84—two-thirds voting in the affirmative.

The Legislature of Connecticut has elected Wm. W. Eaton as U. S. Senator, to succeed Senator Buckingham.

Later advices respecting the Mill River disaster reduces the total number of victims to 138. Of these the bodies of all but 14 have been recovered. The work of clearing up the debris and preparing for building has been commenced, and the restoration of the desolate villages is already assured. About 150 families were left utterly destitute.

The principal importations of sugar and molasses come from Cuba and Porto Rico. Thus the value of these articles imported in 1873 from the islands was \$73,503,766, and from all the rest of the world \$19,072,920.

The interments in Philadelphia for the week ending 5th mo. 23d, numbered 299, including 100 children under two years. There were 43 deaths of consumption, 26 inflammation of the lungs, 15 disease of the heart, and 14 marasmus. On the afternoon of the 25th inst. a heavy rain and hail storm accompanied by thunder and lightning, visited the city. Many sections of the city were flooded where the drainage is insufficient, especially a portion in one of the northeastern ward. Considerable damage was done to the trees in the Park.

Henri Rochefort, who escaped from the penal colony of New Caledonia to Australia, has made his way from thence to San Francisco, Cal. He expected to reach New York on the 30th inst.

**The Markets, &c.**—The following were the quotations on the 25th inst. *New York.*—American gold, 112 U. S. sixes, 1881, registered, 120 $\frac{1}{2}$ ; coupons, 121 $\frac{1}{2}$ ; do 1868, registered, 119 $\frac{1}{2}$ ; coupons, 120 $\frac{1}{2}$ ; do. 10-40 per cents, 115. Superfine flour, \$5.25 a \$5.70; Sta extra, 7.15 a \$6.35; finer brands, \$7 a \$10.25. No. Chicago spring wheat, \$1.50; No. 2 do., \$1.45 a \$1.4 No. 3 do., \$1.43; red western, \$1.56; white Canada \$1.63. Canadian barley, \$2 a \$2.10. Oats, 62 a 65 c Western mixed corn, 83 a 86 cts.; yellow, 86 a 87 c white, 88 a 90 cts. *Philadelphia.*—Uplands and No Orleans cotton, 18 $\frac{1}{2}$  a 19 $\frac{1}{2}$  cts. for middlings. Superfine flour, \$4.75 a \$5.50; extras, \$5.50 a \$6.25; finer brands, 6.50 a \$10.25. No. 1 spring wheat, \$1.43 a \$1.4 Penna. red wheat, \$1.60 a \$1.65; western red, \$1.40 \$1.65. Rye, \$1. Yellow corn, 86 a 88 cts. Oats, 66 69 cts. Smoked hams, 13 a 14 $\frac{1}{2}$  cts. Lard, 11 $\frac{1}{2}$  a cts. Clover seed, 9 $\frac{1}{2}$  a 10 $\frac{1}{2}$  cts. About 2100 beef cattle were sold at 7 a 7 $\frac{1}{2}$  cts. per lb. gross for extra; 6 a cts. for fair to good, and 5 a 5 $\frac{1}{2}$  cts. for common. Sheep, 5 a 8 cts. per lb. gross, and hogs \$8.50 a \$9 p 100 lb. net. *Chicago.*—No. 1 spring wheat, \$1.22; No. 2 do., \$1.19; No. 3 do. \$1.13. No. 2 mixed corn, cts. No. 2 oats, 45 $\frac{1}{2}$  cts. No. 2 rye, \$1. No. 2 spring barley, \$1.60. Lard, \$1.075 per 100 lbs. *St. Louis.* No. 2 spring wheat, \$1.20; No. 3 fall, \$1.35. No. mixed corn, 56 cts. *Cincinnati.*—Wheat, \$1.33. Mix corn, 70 cts.; white, 75 cts. Oats, 54 a 60 cts. R. \$1.16. *Milwaukee.*—No. 2 spring wheat, \$1.22. No. 2 oats, 45 cts. Corn, 57 cts. Rye, 96 $\frac{1}{2}$  cts. No. 2 spring barley, \$1.60.

#### THEATRICAL AMUSEMENTS AND HORSE RACING.

A new edition of the above named Address has been struck off and is now at Friends' Book Store, No. 3 Arch street.

Friends in the country can obtain whatever number of copies may be needed for distribution in their respective neighborhoods.

**DIED,** at his residence in Westmoreland, Oneida Co. N. Y., on the 12th of 4th mo. 1874, PAUL C. MACOMBE in the 81st year of his age, an esteemed member and elder of Westmoreland Monthly Meeting. He was through a long life firmly attached to the principles and testimonies of the religious Society of Friends, and was much esteemed by a large circle of friends and acquaintances, for his unswerving integrity and the brightness of his life. He passed away like a "shock corn fully ripe, gathered in in its season."

PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

## Illustrations of Scripture by Means of Ancient Monuments.

The first great stride made in the path of Biblical Archæology was in Egyptian research. Egypt was the first ancient land rediscovered in modern times; its antiquities and monuments were the first examined by scholars and men of letters. No real advance could, however, be made till the ancient language of the hieroglyphs was able to be interpreted. It is here necessary to recollect that philology is the handmaid of history, and that the truth of history depends on the accuracy of philological inquiries. In the decipherment of an unknown language all depends upon the standpoint, and the care with which the induction is made. The language once interpreted, the historical results follow as a matter of course. In the success which attended the efforts of the first inquirers to interpret the hitherto occult monuments of Egypt lay the failure or success of determining the chronology and history; the struggle was over the hieroglyphy, the spoil was the solution of the historical problem. It was then discovered that the Egyptians were not only a most highly civilized and most ancient people, but that their history was of the highest importance for the study of biblical archæology. The discoveries of Champollion proved that the conquest of the Jews by Shishak had been recorded in the temples of Thebes, and that the names of the towns subjected to his arms in Judea had been inscribed on the walls of the great temple of Ammon. Those of the school of Champollion who have continued the research have thrown additional light on the relations between the Jews and the Egyptians, and M. Chabas has discovered, in the hieratic papyri of the Museum of Leyden the existence of the Hebrews in Egypt in the days of Rameses II, and a subsequent notice of them under a later monarch of the same line of Ramessids on the rocks of El Hamamat. It is under the 19th and 20th dynasties that the influence of the Aramæan nations is distinctly marked; and not only by blood and alliances had the Pharaohs been closely united with the princes of Palestine and Syria, but the language of the period abounds in Semitic words quite different from the Egyptian with which they were embodied and intermingled.

These points have an important bearing on the contested point of the period of the exode of the Hebrews. So important have been those studies of the synchronistic history of the two nations, that it will be impossible hereafter to adequately illustrate the history of the Old Testament without referring to the contemporaneous monuments of Egypt; and not alone the history, but the laws, institutions, and even turns of thought and expressions, have many points of resemblance in the two nations. It is wonderful, all things considered, that the Hebrews have not taken more from Egyptian sources than they did, not that they were so much imbued with Egyptian ideas.

Assyria has been still more prolific in monuments having historical and other information relative to the history of the Old Testament. Turning to it and the other rivals of Egypt in the most remote times, Babylonia, the cradle of Semitic civilization, stands prominent as highly civilized and densely populated at a period when Egypt was still in its youthful prime. From Babylon are to be drawn important illustrations of the history of the Old Testament, and the discoveries of students and inquirers into the cuneiform have won valuable information from the evidence of the inscriptions. The brilliant discoveries of Sir H. Rawlinson, followed up by those of MM. Oppert and Menant, Mr. Norris and G. Smith, have restored much of the early history of Babylonia. They have discovered the names of many ancient kings, amongst others the Chedorlaomer, or his successor, of the days of Abraham, and been able to identify many of the sites of ancient cities of Babylonia, the names of which are household words, such as Ur of the Chaldees, the birthplace of Abraham and cradle of the Hebrew race, and Erech, founded by Nimrod. Babel has, of course, been discovered, Borsippa, Nineveh, Calah and other sites identified, and many of the traditions point to the diluvian and antediluvian records of the two great Semitic races. If the monuments necessary for the elucidation of the early contemporaneous history of Babylonia are scanty, such is not the case with those of Assyria, of which many historical remains, from their being composed of *terra cotta*, have survived the destructive fury of fire and sword, and the cupidity or malice of conquerors. Descending the stream of history, the oldest Assyrian historical monument has been translated by four different scholars, which is the cylinder of Tiglath-Pileser, B. C. 1120, published in the Transactions of the Royal Society of Literature. Subsequent to that period, and in the reign of Shalmaneser, the Jewish kings Omri, Ahab, Jehu, and the Assyrian monarchs Benhadad and Hazael, are mentioned in the annals of the reign, about B. C. 850, as conquered or tributary to the empire of Assyria. Under the successor of Shalmaneser, Vulnirari, Assyria not only conquered the land of Omri, or Samaria and

Edom, but extended its conquests over Syria and Damaseus in the half-century subsequent to the time of Shalmaneser. Under the next monarch of Assyria, Tiglath-Pileser II, illustrations of the history of the Old Testament continue to increase, and mention is found in the inscriptions of Azariah, Menahem, Pekah, Hoshea, and Rezin, king of Damaseus, with whom the Assyrian monarch carried on war. All these, be it recollected, are mentioned on contemporaneous monuments, B. C., 750. We have thus important illustrations of events hitherto known from other sources, which the Assyrian monuments either confirm, or on which they shed a brighter light by the details which they give of the wars from the cuneiform history and archives. As the page of history is unrolled, the annals of Sargon, about B. C., 720, record the conquest of Samaria, and the capture of the city of Ashdod, mentioned by the prophet Isaiah. Some remarkable historical cylinders in the British Museum contain the annals of Sennacherib, his expedition against Jerusalem, and the events of the reign of Hezekiah, the tribute exacted by the conqueror from the king of Israel, with all the details of the troops employed for the invasion of Palestine. These events bring the contemporaneous monumental history down to the seventh century B. C.; and soon after, under the reign of his successor, Esarhaddon, about B. C., 680, the Assyrian inscriptions contain an important notice of Manasseh, king of Judah. The successor of Esarhaddon was Assurbanipal, the Sardanapalus of the classical writers, the greatest of the Assyrian monarchs, for his conquests extended beyond Palestine; he added Egypt to the dependencies of Assyria, and defeated the Ethiopian monarch Tirhakah. Besides historical results, some important discoveries have been made in philology; for not only have the grammar and dictionary been eliminated, but the existence of a second language contemporaneous with the Assyrian, and called, for want of a more definite nomenclature, the Akkad, has been discovered. This language has been referred to the Turanian rather than the Semitic family, but its affiliation is obscure. Surely these are astounding results, liberal contributions to biblical archæology, an ample tribute to historical truth, won in the last thirty years, by the genius and industry of Assyrian scholars, from the monuments of Assyria. Could anything cause the formation of such a Society as the present, these facts should do so, dug out of the plains of Mesopotamia, rising as witnesses to corroborate or enlarge the history of Central Asia. They ought to rally round the Society all who take an interest in the comparative study of biblical history.

To this portion of the subject belongs the end of the Assyrian empire under the last monarch. Assur-ebil-ili, when the scene of history shifts once more to the monuments of the revived or second empire of Babylonia. It is much to be regretted that, although full

information has been thus obtained of the general history of Assyria, which can be traced from 1120 to 630 B. C., yet up to the present moment there is a great deficiency in the contemporary history of Babylonia as derived from the monuments. As the excavations of MM. Layard, Rassam, Loftus, and Sir H. C. Rawlinson exhumed the remains of the great archival library of Assurbanipal at Kouyunjik, consisting of more than 20,000 fragments, many of which have been put together by archaeologists and scholars, and give a general idea of the literature and history of Assyria; so it may be hoped that, at a future period, the library of Nebuchadnezzar, or some other monarch of his dynasty, will be recovered. Then, and not till then, will be revealed, in its full extent, the more primitive civilization and the older annals of the Babylonians; for this early nation there are as yet no contemporaneous annals, although there is some material for the history of Nebuchadnezzar, who comes on the scene about B. C., 604, after the fall of Nineveh. Many cylinders of that renowned monarch, whose name has passed into a household word, and is familiar to all, have indeed been found, yet, notwithstanding the frequent recurrence of his name on numerous monuments, no contemporaneous annals of his reign have been discovered. Nebuchadnezzar was indeed a great religious restorer, more so even than a conqueror, and his inscriptions record the endowment of temples, their repairs, his pious offerings to the gods, but no historical facts. These are still to be searched for in the plains of Mesopotamia, and the day is probably not far distant when the interest excited by these studies in this country will renew excavations similar to those already mentioned, which were formerly made with such success on the sites of the cities of ancient Assyria. That they may be continued until they evolve the whole programme of the ancient civilization of mankind, and resolve the problem whether the civilization of the East started from the plains of Assyria or the valley of the Nile, will be the earnest desire of every student of early history.

It is true that these results have not been obtained without difficulties. There has been some conflict between Assyrian and Jewish history, and although Assyrian scholars, dealing with the special subject of Assyria, naturally lean with favor to the information the monuments of Nineveh afford, it is by no means sure that the Assyrians, especially in speaking of foreign nations, may not have recorded errors. As the research advances the difficulty of reconciling the chronology of the Assyrians and the Jews will melt away before the additional monuments that may be obtained, or the more correct knowledge that may be acquired. There is nothing to alarm the exegetical critic in the slight discrepancies that always present themselves in the world's history when the same fact is differently recorded by the actors in some national struggle. For truth the whole evidence is required, and the monuments of antiquity too often reach our hands as broken pieces of an imperfect puzzle. Is it, then, wonderful that the reconstruction should be embarrassing?—*Church of England Magazine.*

There is great strength in *true unity*, and a single desire for each other's religious welfare.

For "The Friend."

Hints concerning the Swift Witness for Truth in her closing hours, with an account of that close; from a Memoir of Deborah Backhouse.

Deborah Backhouse, it would seem, was now nearly ready to be offered, and the time of her departure at hand; but the Witness for Truth again, even at this late period, brought her under exercise of mind and condemnation with regard to "some little things in her own house and family which were not enough in the simplicity that (she then saw) the Truth required." She scrutinized these; regretted not having been more faithful to the Light of Christ in the heart, which would have made manifest the things reprobable. She, in allusion to them and in addressing her Father in heaven said, "I do most sincerely repent, and implore Thy forgiveness."

May none, then, make light of scruples that have been co-existent with this Society; or deem but cunningly devised fables restraints begotten in the secret of the hearts of those, who in the smaller or the larger tithe and sacrifice dare not limit the Holy One of Israel, in His humbling discipline of self-denial and the cross, for their refinement, and for the forthcoming of that "ornament of a meek and quiet spirit, which in the sight of God is of great price." May none likewise condemn, either in themselves or others, *the day of small things*, which is declared to be the sure way to fall by little and little. But rather letting childlike obedience keep pace with knowledge in the day thereof, be enabled to grow thereby in the Truth from stature to stature in its progressive manifestations—first as babes, then young men, then strong men, unto pillars in the Lord's house, which shall go no more out. The Truth will never fail of application, neither lack significance in the sight of the All-seeing: "He that is faithful in *that which is least*, is faithful also in much." And again, to be "faithful in a few things," (whatever called for) is the way to be made "ruler over many things." Moreover, we presume, if the beginning of our religious life is not laid here,—in self-renunciation as with the mouth in the dust and all laid low, and a willingness wrought to follow the dear Master in the way and by the stepping stones of His own directing and ordering,—we shall never make straight steps nor speed well toward that establishment in the Truth as it is in Jesus, that will bring support and rest in trouble, or prove an anchor to the soul when the storms and waves of trial beat.

The Memoir resumed:—"The dear invalid was led to make thankful acknowledgments to her gracious Lord, for his goodness, mercy, and love, so variously manifested; saying, it was all of his rich, unmerited mercy; and that she had nothing good of herself. 'No! nothing at all. All is thy goodness, O Lord! and what shall I render unto Thee for all thy benefits! Unto Thee is all the praise and the glory.'

At another time she made instructive remarks in reference to her continuance; concluding it might be for some purpose which would yet be manifested. She frequently expressed a desire, that we would unite with her, in craving that her patience might be continued to the end.

Again she said: 'I have a clear view of the outward sufferings of our blessed and holy Redeemer. I see the bleeding cross, and the mangled body; yes! the mangled limbs: O,

let me adore! All this for poor, fallen, lost man, that he may be saved.' Another friend coming in, silence again ensued; and afterwards she said, that the view of the outward sufferings had a little returned, but was withdrawn; and her mind turned to the inward work of Christ, which was a great and necessary work. She then spoke of the necessity of faithfulness; repeating: 'Nothing else will do—I hope the words will go to those for whom they are intended.'

Soon after this, she supplicated thus: 'Now Holy Father! if the work be fully finished be pleased to take me to Thyself;—if that be fully finished which Thou hast given me to do.'

Subsequently, she was brought under considerable exercise of mind; and expressed a belief that it was right for her to wait in the Light, to discover the cause. After a short time she said, there were some little things in her own house and family, which were not enough in the simplicity that Truth requires which, had she been sufficiently attentive to the Light of the Redeemer, would not have been given way to. She appeared closely to scrutinize every little thing; and again testified that if the Light of Life was attended to, it would show clearly what was or was not, in conformity to the Divine will. She acknowledged, in an humble, affecting manner, her regret at not having been more faithful in these things, saying: 'Yes, Lord! I see and if I had paid more attention to the Light of Christ Jesus, I should have seen long since and I do most sincerely repent, and implore thy forgiveness.'

Some time after, she remarked to her husband, that though a little shade had been permitted, it was all withdrawn; and that she again felt the showers of heavenly love descending as before; and said, that it was no wonder that she should seem unable to enter a state of blessedness, whilst that remained to be done.

In the course of the night, she fervently supplicated thus: 'O, gracious Father! be Thou pleased to help me in this trying hour; and be near to support, and preserve me from bringing any shade upon thy holy Truth;' adding soon after: 'I believe Thou wilt not leave me, nor forsake me, unto the end.'

On another occasion, she said: 'O, my dear sister! help me to praise the Lord: for He has given me the victory over death, hell and the grave!' And during the remaining time of her continuance in this state of existence, it appeared as if all was joy and peace; not interrupted even by bodily suffering.

Between five and six o'clock of the afternoon she died, and when so weak that articulation was difficult, she bore a last and consoling testimony to her love to the blessed cause of Truth; expressing her willingness to give up all things if it might in any way be promoted thereby. Then inquiring what time it was, and being told it was six o'clock, she emphatically said: 'Within two hours the end will come.' Soon afterwards, she seemed to fall into a slumber, from which she did not appear to arouse; but gradually became weaker, till about a quarter past seven o'clock, when she ceased to breathe; and her redeemed and liberated spirit ascended, no doubt, to the place prepared for it, in that glorious kingdom, of the joys of which she had been permitted such a precious foretaste.

Her remains were interred in Friends' burial-

round, in York, in the 16th of the 12th mo., 827, after a large and solemn meeting. She was in the 35th year of her age.

For "The Friend."

### Sufferings of a Lost Man.

(Continued from page 323.)

"Failing to alarm the animal, which now began to make the circuit of the tree, as if to elect a spot for springing into it, I shook, with a strength increased by terror, the slender trunk until every limb rustled with the motion. All in vain. The terrible creature pursued his walk around the tree, lashing the ground with his tail, and prolonging his howlings almost to a roar. It was too dark to see, but the movements of the lion kept me apprised of its position. Whenever I heard it on one side of the tree I speedily changed to the opposite—an exercise which in my weakened state, I could only have performed under the impulse of terror. All my attempts to lighten it seemed unavailing. Disheartened at its persistency, and expecting every moment it would take the deadly leap, I tried to collect my thoughts, and prepare for the fatal encounter which I knew must result. Just at this moment it occurred to me that I would try silence. Claspings the trunk of the tree with both arms, I sat perfectly still. The lion at this time ranging round, occasionally snuffing and pausing, and all the while filling the woods with the echo of his howlings, suddenly imitated my example. This silence was more terrible, if possible, than the clatter and crash of his movements through the brushwood, for now I did not know from what direction to expect his attack. Moments passed with me like hours. After a lapse of time which I cannot estimate, the beast gave a spring into the thicket and ran screaming into the forest. My deliverance was effected.

Had strength permitted, I should have kept my perch till daylight, but with the consciousness of escape from the jaws of the ferocious brute came a sense of overpowering weakness which almost palsied me, and made my descent from the tree both difficult and dangerous. Incredible as it may seem, I lay down in my old bed, and was soon lost in a slumber so profound that I did not awake until after day light. The experience of the night seemed like a terrible dream; but the broken limbs which in the agony of consternation I had thrown from the tree, and the rifts made in the fallen leaves by my visitant in his circumambulations, were too convincing evidences of its reality."

On the day succeeding this night of peril, one of those dreary storms of mingled snow and rain which are frequent in that region set in, and increased greatly the sufferings of poor Everts. He could find no better shelter than the spreading branches of a spruce tree, under which covered with earth and boughs, he lay for two days, during which the storm continued. While thus exposed, and suffering from cold and hunger, a little benumbed bird, not larger than a snow-bird hopped within his reach. He instantly seized and killed it, and after plucking its feathers ate it raw and found it a delicious morsel. The narrative continues: "Taking advantage of a lull in the elements on the morning of the third day, I rose early and started in the direction of a large group of hot springs which were steaming under the shadow of Mount Everts. The distance I travelled could not have been less

than ten miles. Long before I reached the wonderful cluster of natural caldrons, the storm had recommenced. Chilled through with my clothing thoroughly saturated, I lay down under a tree upon the heated incrustation until completely warmed. My heels and the sides of my feet were frozen. As soon as warmth had permeated my system and I had quieted my appetite with a few thistle-roots, I took a survey of my surroundings, and selected a spot between two springs, sufficiently asunder, to afford heat at my head and feet. On this spot I built a bower of pine branches, spread its incrustated surface with fallen foliage and small boughs, and stowed myself away to await the close of the storm. Thistles were abundant, and I had fed upon them long enough to realize that they would, for a while at least, sustain life. In convenient proximity to my abode was a small, round, boiling spring, which I called my dinner pot, and in which, from time to time, I cooked my roots.

This establishment, the best I could improvise with the means at hand, I occupied seven days—the first three of which were darkened by one of the most furious storms I ever saw. The vapor which supplied me warmth saturated my clothing with its condensations. I was enveloped in a perpetual steam-bath. At first this was barely preferable to the storm, but I soon became accustomed to it, and before I left actually enjoyed the steaming.

I had little else to do during my imprisonment but cook, think, and sleep. Of the variety and strangeness of my reflections it is impossible to give the faintest conception. Much of my time was given to devising means for escape. \* \* \* \*

Nothing gave me more concern than the want of fire. I recalled every thing I had ever read or heard of the means by which fire could be produced; but none of them were within my reach. An escape without it was simply impossible. It was indispensable as a protection against night attacks from wild beasts. Exposure to another storm like the one just over would destroy my life, as this would have done, but for the warmth derived from the springs. As I lay in my bower anxiously awaiting the disappearance of the snow which had fallen to the depth of a foot or more, and impressed with the belief that for want of fire I should be obliged to remain among the springs, it occurred to me that I would erect some sort of monument, which might at a future day, inform a casual visitor of the circumstances under which I had perished. A gleam of sunshine lit up the bosom of the lake, and with it the thought flashed upon my mind that I could with the lens from my opera-glasses, get fire from Heaven. Oh, happy, life-renewing thought! Instantly subjecting it to the test of experiment, when I saw the smoke curl from the bit of dry wood in my fingers, I felt, if the whole world were offered me for it, I would cast it aside before parting with that little spark. I was now the happy possessor of food and fire. These would carry me through. All thoughts of failure were instantly abandoned. Though the food was barely adequate to my necessities—a fact too painfully attested by my attenuated body—I had forgotten the cravings of hunger, and had the means of producing fire. I said to myself, "I will not despair."

My stay at the springs was prolonged several days by an accident that befel me on

the third night after my arrival there. An unlucky movement while asleep broke the crust on which I reposed, and the hot stream, pouring upon my hip, scalded it severely before I could escape. This new affliction, added to my frost bitten feet, already festering, was the cause of frequent delay and unceasing pain through all my wanderings. After obtaining fire, I set to work making preparations for an early departure as my condition would permit. I had lost both knives since parting from the company, but I now made a convenient substitute by sharpening the tongue of a buckle which I took from my vest. With this I cut the legs and counters from my boots, making of them a passable pair of slippers, which I fastened to my feet as firmly as I could with strips of bark. With the ravellings of a linen handkerchief, aided by the use of the buckle-tongue, I mended my clothing. Of the same material I made a fish-line, which, on finding a piece of red tape in one of my pockets better suited to the purpose, I abandoned as a "bad job." I made of a pin that I found in my coat a fish-hook, and, by sewing up the bottoms of my boot-legs, constructed a very good pair of pouches to carry my food in, fastening them to my belt by the straps.

Thus accoutred, on the morning of the eighth day after my arrival at the springs I bade them a final farewell, and started on my course directly across that portion of the neck of the peninsula between me and the southeast arm of Yellowstone Lake. It was a beautiful morning. The sun shown bright and warm, and there was a freshness in the atmosphere truly exhilarating.

As I wandered musingly along, the consciousness of being alone, and having surrendered all hope of finding my friends, returned upon me with crushing power. I felt too that those friends, by the necessities of their condition, had been compelled to abandon all efforts for my recovery. The thought was full of bitterness and sorrow. I tried to realize what their conjectures were concerning my disappearance; but could derive no consolation from the long and dismal train of circumstances they suggested. Weakened by a long fast, and the unsatisfying nature of the only food I could procure, I knew that from this time onward to the day of my rescue, my mind, though unimpaired in those perceptions needful to self-preservation, was in a condition to receive impressions akin to insanity. I was constantly travelling in dream-land, and indulging in strange reveries such as I had never before known. I seemed to possess a sort of duality of being, which, while constantly reminding me of the necessities of my condition, fed my imagination with vagaries of the most extravagant character. \* \* \*

A change in the wind and an overcast sky, accompanied by cold, brought with them a need of warmth, I drew out my lens and touchwood, but alas! there was no sun. I sat down on a log to await his friendly appearance. Hours passed; he did not come. Night, cold freezing night, set in and found me exposed to all its terrors. A bleak hill-side, sparsely covered with pines, afforded poor accommodations for a half-clad, famishing man. I could only keep from freezing by the most active exertion in walking, rubbing, and striking my benumbed feet and hands against the logs. It seemed the longest and most terrible night of my life, and glad I was when the ap-

proaching dawn enabled me to commence retracing my steps to Bessie Lake. I arrived there at noon, built my first fire on the beach, and remained by it recuperating for the succeeding two days."

(To be continued.)

### FAITH.

Selected.

We know not what shall be deemed best  
While passing through  
This life below, for that of rest  
We have in view.

The chosen path for man's weak mind,  
Too often tends  
The thorny way, with fears behind,  
Before it ends.

But wisdom shows the better way—  
One, only one—  
'Tis faith in God, by night and day,  
Through his dear Son.

Yes, faith supplies the inmost soul  
With every good,  
Direct from Him who makes it whole,  
And is its food!

He's sure to feed the hungry child  
Who looks above,  
And asks of him in accents mild,  
And trusts his love.

What though the sky be overcast!  
We will not fear;  
There often is a stormy blast,  
But God can hear.

He loves to hear his children pray,  
It has been said,  
That he may "give us day by day  
Our daily bread."

Should folly come and try to break  
Our hold on God,  
His love may see it best to take  
The chastening rod.

Then, when it comes, we'll bless his name,  
Without a fear  
That he is still unchanged—the same,  
And always near.

### BE YE ALSO READY.

Selected.

O! to be ready when death shall come,  
O! to be ready to hasten home!  
No earthward clinging, no lingering gaze,  
No strife at parting, no sore amazement;  
No chains to sever that earth hath twined,  
No spell to loosen that love would bind.

No flitting shadows to dim the light  
Of the angel pinions winged for flight,  
No cloud-like phantoms to fling a gloom  
'Twixt Heaven's bright portals, and earth's dark tomb.  
'Twill sweetly, gently, to pass away  
From the world's dim twilight into day.

To list to the music of angel lyres,  
To catch the rapture of seraph fires,  
To lean in trust on the risen One,  
Till borne away to a fadeless throne;  
O! to be ready when death shall come,  
O! to be ready to hasten home.

### Mimetic Forms.

On the leaves of the bushes there were many curious species of Buprestidæ, and I struck these and other beetles off with my net as I rode along. After one such capture I observed what appeared to be one of the black stinging ants on the net. It was a small spider that closely resembled an ant, and so perfect was the imitation that it was not until I killed it that I determined that it was a spider and that I need not be afraid of it stinging me. What added greatly to the resemblance was, that, unlike other spiders, it held up its two forelegs like antennæ, and moved

them about just like an ant. Other species of spiders closely resemble stinging ants; in all of them the body is drawn out long like an ant, and in some the maxillary palpi are lengthened and thickened so as to resemble the head of one.

Ant-like spiders have been noticed throughout tropical America and also in Africa. The use that the deceptive resemblance is to them has been explained to be the facility it affords them for approaching ants on which they prey. I am convinced that this explanation is incorrect so far as the Central America species are concerned. Ants, and especially the stinging species are, so far as my experience goes, not preyed upon by any other insects. No disguise need be adopted to approach them, as they are so bold that they are more likely to attack the spider than a spider them. Neither have they wings to escape by flying, and generally go in large bodies easily found and approached. The real use is, I doubt not, the protection the disguise affords against small insectivorous birds. I have found the crops of some humming birds full of small soft-bodied spiders, and many other birds feed on them. Stinging ants, like bees and wasps, are closely resembled by a host of other insects; indeed, whenever I found any insect provided with special means of defence I looked for imitative forms, and was never disappointed in finding them.

Stinging ants are not only closely copied in form and movements by spiders but by species of Hemiptera and Coleoptera, and the resemblance is often wonderfully close. All over the world wasps are imitated in form and movements by other insects, and in the tropics these mimetic forms are endless.

It is to be remarked that the forms imitated have always some kind of defence against insectivorous birds or mammals; they are provided with stings or unpleasant odors or flavors, or are exceedingly swift in flight; excepting where inanimate nature is imitated for concealment. Thus I had an opportunity of proving in Brazil that some birds, if not all, reject the Heliconii butterflies, which are closely resembled by butterflies of other families and by moths. I observed a pair of birds that were bringing butterflies and dragon flies to their young, and although the Heliconii swarmed in the neighborhood and are of weak flight so as to be easily caught, the birds never brought one to their nest. I had a still better means of testing both these and other insects that are mimicked in Nicaragua. The tame white-faced monkey I have already mentioned was extremely fond of insects, and would greedily munch up any beetle or butterfly given to him, and I used to bring to him any insects that I found imitated by others to see whether they were distasteful or not. I found he would never eat the Heliconii. He was too polite not to take them when they were offered to him, and would sometimes smell them, but invariably roll them up in his hand and drop them quietly again after a few moments. A large species of spider (*Nephila*) also used to drop them out of its web when I put them into it. Another spider that frequented flowers seemed to be fond of them, and I have already mentioned a wasp that caught them to store its nest with. There could be no doubt, however, from the monkey's actions, that they were distasteful to him.

Amongst the beetles there is a family that is just as much mimicked as the Heliconii are

amongst the butterflies. These are the Lampyridæ, to which the fireflies belong. Many of the genera are not phosphorescent, but all appear to be distasteful to insectivorous mammals and birds. I found they were invariably rejected by the monkey, and my fowls would not touch them.

The phosphorescent species of Lampyridæ, the fireflies, so numerous in tropical America, are equally distasteful, and are also much mimicked by other insects. I found different species of cockroaches so much like them in shape and color that they could not be distinguished without examination. These cockroaches, instead of hiding in crevices and under logs like their brethren, rest during the day exposed on the surface of leaves, in the same manner as the fireflies they mimic.

The movements, as well as the shape and color of the insect imitated, are mimicked. I one day observed what appeared to be a hornet, with brown semi-transparent wings and yellow antennæ. It ran along the ground vibrating its wings and antennæ exactly like a hornet, and I caught it in my net, believing it to be one. On examining it, however, I found it to belong to a widely different order. It was one of the Hemiptera (*Spiniger luteicornis*, Walk.), and had every part colored like the hornet (*Priocnemis*) that it resembled. In its vibrating, colored wing cases it departed greatly from the normal character of the Hemiptera, and assumed that of the hornets.

All the insects that have special means of protection, by which they are guarded from the attacks of insectivorous mammals and birds, have peculiar forms, or strongly contrasted, conspicuous colors, and often make odd movements that attract attention to them. There is no attempt at concealment, but, on the contrary, they appear to endeavor to make their presence known. The long narrow wings of the Heliconii butterflies, banded with black, yellow, and red, distinguish them from all others, excepting the mimetic species. The banded bodies of many wasps, or the rich metallic colors of others, and their constant jerky motions, make them very conspicuous. Bees announce their presence by a noisy humming. The beetles of the genus Calopteron have their wing cases curiously distended, and move them up and down, so as to attract attention; and other species of Lampyridæ are phosphorescent, holding out danger signals that they are not eatable. The reason in all these cases appears to be the same, as Mr. Wallace has shown to hold good with banded and brightly colored caterpillars. These are distasteful to birds, and, in consequence of their conspicuous colors, are easily known and avoided. If they were like other caterpillars, they might be seized and injured before it was known that they were not fit for food.

Amongst the mammals, I think the skunk is an example of the same kind. Its white tail, laid back on its black body, makes it very conspicuous in the dusk when it roams about, so that it is not likely to be pounced upon by any of the carnivora mistaking it for other night-roaming animals. In reptiles, the beautifully banded coral snake (*Elaps*), whose bite is deadly, is marked as conspicuously as any noxious caterpillar with bright bands of black, yellow, and red. I only met with one other example amongst the vertebrata, and it was also a reptile. In the woods around Saato Domingo there are many frogs. Some are

reen or brown, and imitate green or dead leaves, and live amongst foliage. Others are dirty earth colored, and hide in holes and under logs. All these come out only at night to feed, and they are all preyed upon by snakes and birds. In contrast with these obscurely colored species, another little frog hops about the daytime dressed in a bright livery of red and blue. He cannot be mistaken for any other, and his flaming vest and blue stockings show that he does not court concealment. He is very abundant in the damp woods, and I was convinced he was uneatable as soon as I made his acquaintance and saw the happy sense of security with which he hopped about. I took a few specimens homo with me, and tied my fowls and ducks with them; but none would touch them. At last, by throwing down pieces of meat, for which there was great competition amongst them, I managed to entice a young duck into snatching up one of the little frogs. Instead of swallowing it, however, it instantly threw it out of its mouth, and went about jerking its head as if trying to throw off some unpleasant taste.

Amongst the insects of Chontales none are more worthy of notice than the many curious species of Orthoptera that resemble green and faded leaves of trees. I have already described one species that looks like a green leaf, and so much so that it even deceived the acute senses of the foraging ants; other species, belonging to a closely-related genus (*Pterochloa*), imitate leaves in every stage of decay, some being faded-green blotched with yellow; others, resemble a brown withered leaf, the resemblance being increased by a transparent hole through both wings that looks like a piece taken out of the leaf. In many butterflies that resemble leaves on the under side of their wings, the wings being raised and closed together when at rest so as to hide the bright colors of the upper surface, there are similar transparent spots that imitate holes; and others again are jagged at the edge, as if pieces had been taken out of them. Many chrysalides also have mirror-like spots that resemble holes; and one that I found hanging from the under side of a leaf had a real hole through it, formed by a horn that projected from the thorax and doubled back to the body, leaving a space between. Another insect, of which I only found two specimens, had a wonderful resemblance to a piece of moss, amongst which it concealed itself in the daytime, and was not to be distinguished except when accidentally shaken out; it is the larva stage of a species of *Phasma*.—*Belt's Naturalist in Nicaragua*.

## Selected.

Lying on my couch at an interval of ease, I form a project for some work: I trace the good effects which it ought to produce, and say to myself: Why do we sit still till we die? I start up to find pen and paper, and at the moment my painful complaint arrests afresh. While I fainting recline again, I seem to hear, "Know, feeble worm, that even God's work must wait." How much activity belongs to some natures, and that this nature is often mistaken for grace—for God's call, time and strength.—*Cecil*.

It is not well for us to cherish the habit of dwelling too much on the faults and shortcomings of those with whom we live. It makes us more critical than generous.

For "The Friend."

## Something more about Animal Character.

The extracts from a work by P. G. Hamerton, which appeared in "The Friend" not long since, under the title of "Animal Character," were read with interest, though some of the views therein given, were at variance with my own, on the points treated; which in the following remarks and incidents, written some weeks since, I have ventured to express. Perhaps, if thought suitable, they may be acceptable to the younger readers of "The Friend," who feel an interest in Natural History. The short quotations given, with a few exceptions are, as will be seen, taken from the above named article. While uniting with the writer in the belief that we often form very mistaken impressions respecting the intelligence or non-intelligence of the mere animal creation—their apparent feelings, the motives which seem to influence them, &c., it is not easy for me to believe that many persons of reflection, have really supposed the tiger, the wolf, the falcon, or any large carnivorous animal,—merely because it has a natural desire for flesh for food, and is led to destroy life, consequently to inflict suffering to obtain it,—to be any more "cruel or blamable" than the smaller animals, "our pets," the birds, &c., that feed on worms and insects. We are, it is true, in the habit of speaking of such animals as fierce, cruel, savage, &c.,—they are very powerful, and were we to encounter them unprotected, they *might*, tear us in pieces. But do we really suppose them to be any more *seemingly* cruel even, in proportion to their size and power than our sweet little songsters. See one of these little charmers tearing a locust to pieces; which while dying, is suffering agonies in proportion to the perfection of its organization,—and which are inflicted as pitilessly by its voracious murderer,—equal to those endured by the gentle, graceful deer of the forest, when slaughtered by the "savage" wolf for a similar purpose. But do brutes appreciate, have they any conception whatever of the sufferings they inflict? Do we not all suppose, that even the man-eating tiger of India, makes choice of *him*, merely because his flesh is palatable to him? Not because he has any dislike to man, or desire to destroy him. And we are told, that when not hungry, and not attacked or provoked by man, the so-called savage animals will harmlessly pass him by. True they sometimes fiercely fight each other; and it would be curious to know by what motives or feelings they are influenced—self-defence? revenge?—for surely they can have no enjoyment in it. How wonderful is the endurance of intense suffering by domesticated animals, rather than yield in acknowledged defeat. How almost impossible is it to separate two desperately fighting dogs; or two self-conceited lords of the poultry yard, though they may have been fighting—as I have known them to do—until half dead with suffering and exhaustion, and the feathers and skin are torn from their bleeding heads.

It may be well, in mercy possibly to some poor brutes in future, to recall a case which was published some years ago, where a most effectual remedy was found to suddenly put a stop to such a battle between two dogs. Every effort of strength and water-drenching had been used to no purpose, when a dainty "Exquisite" entered the crowd that had gathered, exciting a laugh of derision at his seeming

impotency, when he said, "Let me separate those dogs!" Then opening his gem of a snuff-box with hands "gloved in yellow kids," he tossed the contents into their faces. All potent indeed! Instantly they separated, and ran off yelping more piteously at this administration to their eyes and noses, than they had during all the time they had been tearing each other's flesh. "Our pets," the birds, are in like condemnation. Already this Spring have I witnessed many a persistent battle between our little city sparrows, as fierce as the domestic cock.

But is not man more *truly* cruel? What cares he for sufferings of which *he* has a full conception, which are inflicted on the numerous varieties of animals that are slaughtered, not always for his need, but often merely to gratify his fastidious taste; and some, how frequently, simply for sport. And alas! it may be added, he too fights, for the destruction of his fellow creatures—and he is a rational being! Yea, he has an immortal soul! P. G. H., after speaking of "the impossibility of knowing the real sensations of animals," and saying, "None of us can imagine the feelings of a tiger when his jaws are bathed in blood, and he tears the quivering flesh," adds, "The passion of the great flesh-eater, is as completely unknown to civilized man, as the *passion of the poet is to the tiger in the jungle!*" It is far more than merely a good appetite, it is an intonso emotion. A quite faint and pale shadow of it still remains in men with an ardent enthusiasm for the chase, who feel a joy in slaughter; but this to the tiger's passion is as water to whiskey." How does he know all this? He has just said, "it is *impossible* to know the sensations of animals." Surely his comparisons just quoted are very extravagant; and I cannot but hope for the credit of human nature, that the sentiment conveyed in the last is not altogether just. While having always from my heart adopted the language of the purest and sweetest of poets, when he speaks of the chase as a

"Detested sport!

That owes its pleasure to another's pain."

Yet I had never supposed,—neither did I imagine Cowper had,—that the lovers of this contemptible sport, really felt any "joy in slaughter." (The slaughter of a poor little frightened fox!) But that the pleasure was wholly in the excitement, the dash and rivalry, the skilful management of horses and dogs, running at almost lightning speed, and the final success; all which pleasure, necessarily causes "another's pain." As to the "tiger's passion," I am inclined to believe it is much the same in kind as man's. Intensified of course; just as one man's merely sensual enjoyment exceeds that of another, according to their inclination for, and cultivation of sensual or intellectual pleasures—doubtless partly due to a natural difference. The tiger has never been induced to cultivate his taste for cooked meat, nor the use of a knife and fork; consequently he must eat raw, bleeding flesh, and tear it with his claws and teeth in a manner not very refined, to render it at all available for his food. He is very large and powerful, and needs a big meal; and of course when he is hungry, he seems to go to his necessary preparations with great energy and gusto. But were it not "impossible to know" the enjoyment of each, I think we should find that of the Esquimaux, gormandizing his raw fish blubber, and of the tiger

at his dinner, were very much alike. And what shall we say of the "civilized" gourmand, gloating o'er his rich varied repast from his "tables groaning with costly piles of food?" among which he often finds the favorite dish, choice *rare* beef—and which while feasting upon, "his jaws" (men have jaws) "are bathed" in the bright red so-called *juice* which is floating in the dish. Ofttimes too he indulges in a lunch of raw oysters, literally just "*quivering*" from the shell. How often have I seen refined gentlemen standing beside the oyster-cart, luxuriating in this "delicious treat."

But while thus disposed to stand a little on the defensive in behalf of flesh-eating animals, I think I have yet to learn that I "morally esteem" cats for catching mice. Though we have an uncommonly fine one in our family, who is unquestionably a pet; and he has some claim to be so if any one has. Gentle, playful, very large, very beautiful; symmetrical in proportion, with neat little head and ears—tail as bushy as a grey squirrel's, and such symmetry in the decorations of his rich dark silky fur, from the head to the feet and tip of the tail, as to be a fit type of the "royal family;" and withal rejoices in catching mice, whenever he has the opportunity; which, thanks to his watchfulness, does not often occur, as they generally keep at a safe distance from the premises. But in truth while willing to give him all possible credit for *knowing* what a nuisance mice are in our dwelling, and for *thinking* it is his *duty* to try to rid us of them, in gratitude for kindness received, and to pay a little for his board, I verily believe that puss in general, and he as well, has not often even the excuse of the tiger,—that of the calls of hunger,—for the slaughter she commits. But that she catches mice merely for sport, as she very seldom eats them. Such at least has been our experience; and it is thought, I believe, that the best fed cats are the best "mousers," having more energy and spirit probably. Our pet is as eager in the pursuit of his prey as if he were half famished. But he keeps the panic-stricken little mouse he may have caught, alive and uninjured for a long time; watching intently, and playing with it most gracefully—sitting by it, and patting it now and then with his big soft paw as gently as little puss did the daffodil, spoken of in the extracts,—hardly rumpling a hair. But when the poor wee thing, presuming upon this tender treatment, ventures to start for a run, quickly he gives chase, seizes it in his mouth, and holds it for awhile, but as tenderly as mamma puss does her baby kitten; gently he releases it again, and while the subdued little prisoner, quietly cuddles up close to the wall, down he throws himself at his full length—no trifle—upon the floor, with outstretched limbs, and an air the most thoroughly a *l'abandon*, as saucily tossing back his head, he turns his twinkling eyes—speaking an ecstasy of delight—alternately upon his captive and me. They sometimes escape from him; then soon succeeding his seeming nonchalance, comes tribulation; as while running to and fro, peeping behind doors, under furniture, &c., he has a mournful glance for all whom he meets, and the seeming appeal in his plaintive cry of, "what has gone with my mouse!" Yet while thus casting doubts upon the morale, or even the hunger-promptings in seeking for mice, I cannot unite with "all who have written upon cats," that the idea of their

being affectionate "is an illusion." Why should we suppose their apparent love for us "bears reference simply to themselves," any more than that of other brutes?

(To be continued.)

For "The Friend."

"The Harvest is ready, but who is to gather it."

Our late Yearly Meeting was, to many, a season of profitable instruction; the evidence having been granted from time to time, during its several sittings, that He who has been the Helper of His people in every age, condescended to unite and comfort the meeting in many of its weighty deliberations, beyond anything of which we are worthy. The attendance was large on 3rd, 4th and 5th days; and an increasing interest in the welfare of the body was evinced, by a larger number of young men, and youths from the country, being present than had been witnessed for several years. Amid the many causes for discouragement, which in part have their origin in the small number of faithful laborers, so few having submitted themselves to the yoke and discipline of the cross, which can alone fit them for usefulness in the church; yet, the order and earnestness that marked the deportment of this class, caused many to rejoice in the hope that the number of watchmen and watchwomen may be increased. The company of Friends, ministers and others, from most of the Yearly Meetings professing with us on this continent, a majority of whom were exemplary in their appearance, grave and dignified in manner, was very pleasant, and in favorable contrast with what has been observed on some former occasions. Though it is well understood, a number of the strangers then with us, some of them occupying the station of ministers, approved of the irregularities adopted in their respective meetings, tending, it is to be feared, to a mere conventional belief, yet, I cannot but think, a much larger number represented those who are endeavoring to be faithful in the various meetings to which they belong, and who are struggling according to their measure, to restore the beauty and propriety that once characterized Friends in those parts. Their presence among us had the effect to bring them and Friends here, I trust, into greater nearness, and to awaken heartfelt longing that the number of such may be increased, and all in every place who truly exemplify our testimonies and doctrines, enabled to stand fast in their integrity.

Thus would others be attracted to the ancient standard; the former paths would be sought, and many drawn out of the delusive snare of substituting for the work of Divine grace, the unsanctified promptings of the human heart, acted upon, though it may be by the impulses of a warm nature, and a desire to be doing something as a *reformatory worker*, and not being thoughtful to observe the injunction that was given to some in an early age of the church, to tarry at Jerusalem until they should be clothed with power from on high. The practical danger that lies in the path of these is self-righteousness. When our own wills are laid in the dust, and every emotion kept in abeyance, which is born of the creature; when every thought looking to our own promotion in the sight of other men is cast out; then indeed will that infallible Teacher become the guest of our souls, bringing us into harmony with truth, and directing us in the right use of the talents commit-

ted to our care. How very many there are even among those upon whom large gifts have been conferred, and who really desire their own spiritual advancement, and the true welfare of all, who overlook this most essential qualification for real usefulness.

The day is one of unusual temptation in this direction. It is a danger more alarming than any other which now threatens us, because it presents a bright and easy pathway of reconciliation, without coming to the cross and suffering His baptism of fire to renew our hearts. Herein only are we quickened and made truly alive; and to such as have chosen to dwell with Him in suffering, for the perfection of their faith, will He not give unto them beauty for ashes, and at the end of their race a crown of rejoicing? Many of our meetings in different parts of the Society have passed very much under the influence of those in membership there, who have been and continue to be, the cause of deep spiritual exercise and mourning on the part of the few left, a very small company indeed in some places, whose hearts are so united to that which is spiritual and vital in religion that they cannot let Quakerism go, but feel it their place to stand for its defence. These are to be deeply felt for, and they have the warm sympathy and support, as far as it can be extended, of upright Friends every where. In some of these meetings, if not in nearly all of them, there may have been no *public disavowal* of the doctrines of our early Friends; indeed it is not asserted they occupy the same *fundamental* ground; but where members are led to adopt radical changes in religious practice setting aside some of our most important testimonies, is it not clear they have forsaken the Spirit which wrought conviction upon the hearts of our predecessors, that it was a necessary part of their Christian duty to observe them. This is the offence, "they have forsaken Me, the Fountain of living waters, and hewn out to themselves cisterns, broken cisterns, that can hold no water."

Oh! that Friends, all who bear the name, could see eye to eye, and thus walk in the shining footsteps of those humble minded, but truly dignified men and women in the 17th century, who so nobly adorned that era of church intolerance; when to uphold the universality of the Light of Christ in the heart, and the gospel liberty inseparable therefrom, was by no means an easy thing; and nothing short of the Divine Arm, and a sense in their souls that they were sustained thereby, could have enabled any to withstand the suffering, the obloquy, and contradiction the early Friends underwent in behalf of these primary religious truths. They knew of a truth, "the work of righteousness to be peace, and the effect quietness and assurance forever." They could testify when brought under true and lasting conviction and sorrow for sin, that the Divine Lawgiver in the heart, was as a hammer there, to break in pieces its stony nature, and to renew and change it into a heart of flesh, bringing it as the clay in the hands of the potter, into conformity and obedience, out of its former state of alienation and rebellion. And as they dwelt under this Power, they were given to see step by step, there were many things which their Holy Leader would have them shun, and testify against. And thus it is in the Divine counsel, that some are chosen to plead His cause, into whose mouths are placed the gospel message of encourage-

ment or warning. May we not forget their wise teaching, and the testimony of such as have truly represented them throughout our eventful history; and in nowise embrace the notion that is in danger of being widely received, that we of the present generation, may enjoy the substance of their faith, without being conformed to them in life and practice. We cannot too often recur to their example; and not until we return as penitent children, to be formed and fashioned according to His will concerning us individually, shall we as a church be able to come up out of the wilderness, and revive in our midst, something of the purity and religious fervor that attended our early Friends, in their labor in behalf of primitive Christianity.

(To be concluded.)

For "The Friend."

### The Heart of Africa, by Dr. Schweinfurth.

(Continued from page 327.)

The Monbuttoo, the most southern of the African people, whom Dr. Schweinfurth visited, were the most civilized of all. Their country is thickly inhabited and well cultivated. The plantain, cassava, sweet-potato, yam, colocasia and earth-nut are the most important of the plants they use for food. They raise no domestic animals except poultry and dogs, but depend for their supply of animal food principally on hunting and fishing, and on plundering expeditions against more southern tribes, who are cattle breeders. In intellect and judgment, our author regards them as superior to most of the African races. Some years before the Ivory-traders had attempted to force an entrance into their country, but were repulsed with considerable loss. Soon after his accession to power, Munza, the reigning sovereign, had invited Aboo-Sammato extend his trading journeys into his dominions, and the ivory traffic was thus commenced under conditions of peace, which had remained undisturbed.

The country itself is described in glowing terms: "The Monbuttoo land greets us as an Eden upon earth. Unnumbered groves of plantains bedeck the gently-heaving soil; oil-palms, incomparable in beauty, and other monarchs of the stately woods, rise up and spread their glory over the favored scene; along the streams there is a bright expanse of charming verdure, whilst a grateful shadow ever overhangs the domes of the idyllic huts. The general altitude of the soil ranges from 500 to 2800 feet above the level of the sea: it consists of alternate depressions, along which the rivulets make their way, and gentle elevations, which gradually rise till they are some hundred feet above the beds of the streams below."

"This was Mohammed's third visit to the country, and not only interested motives prompted the king to receive him warmly, but real attachment; for the two had mutually pledged their friendship in their blood, and called each other by the name of brother."

"The 22d of March, 1870, was the memorable date on which my introduction to the king occurred. As we approached the huts, the drums and trumpets were sounded to their mightiest powers, and the crowds of people pressing forward on either hand left but a narrow passage for our procession. We bent our steps to one of the largest huts, which formed a kind of palatial hall open like a shed at both ends. Waiting my arrival here was one of

the officers of state, who, I presume, was the master of the ceremonies, as I afterwards observed him presiding over the general festivities. This official took me by the right hand, and without a word conducted me to the interior of the hall. Here, like the audience at a concert, were arranged according to their rank hundreds of nobles and courtiers, each occupying his own ornamental bench and decked out with all his war equipments. At the other end of the building a space was left for the royal throne, which differed in no respect from the other benches, except that it stood upon an outspread mat; behind this bench was placed a large support of singular construction, resting as it seemed upon three legs, and furnished with projections that served as props for the back and arms of the sitter: this support was thickly studded with copper rings and nails. I requested that my own chair might be placed at a few paces from the royal bench, and there I took up my position with my people standing or squatting behind me, and the Nubian soldiers forming a guard around.

The hall itself was the chief object that attracted my attention. It was at least a hundred feet in length, forty feet high, and fifty broad. It had been quite recently completed, and the fresh bright look of the materials gave it an enlivening aspect, the natural brown polish of the wood-work looking as though it were gleaming with the lustre of new varnish. Close by was a second and more spacious hall, which in height was only surpassed by the loftiest of the surrounding oil-palms; but this, although it had only been erected five years previously, had already begun to show symptoms of decay, and being enclosed on all sides was dark, and therefore less adapted for the gathering at a public spectacle. Considering the part of Africa in which these halls were found, one might truly be justified in calling them wonders of the world; I hardly know with all our building resources what material we could have employed, except it were whalebone, of sufficient lightness and durability to erect structures like these royal halls of Munza, capable of withstanding the tropical storms and hurricanes.

(To be continued.)

Selected.

Love and Truth, whose light and blessing every reverent heart may know,  
 Mercy, Justice, which are pillars that support this life below,—  
 These, in sorrow and in darkness, in the inmost soul we feel,  
 As the sure undying impress of the Almighty's burning seal.

## THE FRIEND.

SIXTH MONTH 6, 1874.

We have received a communication dated "Hughesville, May the 16th," referring to an article that appeared in the 31st number of the current volume of "The Friend," headed "Farmer's Granges," the greater part of which article is taken from "The Herald of Truth," published in Indiana by Mennonites; designed to discourage their members from joining those associations. The communication is accompanied by a written recommendation of its publication, signed by four persons who

we suppose are members of the religious Society of Friends.

As we entirely disapprove of secret societies, and of our members or others entering into fellowship with those who are banded and held together by undivulged promises, oaths or affirmations, we are unwilling to open our columns for their promotion or defence; nor yet to afford means for controversy respecting the merits of such societies. Nevertheless we do not object to let our readers know the points upon which the author of the essay received comments, and as they all refer to what is contained in the extract from "The Herald of Truth," that journal is the appropriate place for the reply.

The writer says, one object of the Granges is to do away with agents or middlemen, who come between the producer and the consumer; whom he declares are worse than useless, and stigmatizes them as drones, adding only to the expenses and burdens of society: excepting, however, merchants and manufacturers.

Another object is to add dignity to labor, and thus increase willingness to engage in it. Another to promote more free and general social intercourse among farmers and their families, and as there are high minded and religious women among the members, to stimulate and elevate the irreligious and the depressed by diffusing good sentiments and reputable association.

In reference to the oaths or affirmations said to be taken by those who become members of Granges, all this writer alleges is, that bringing forward the command of our Saviour not to swear, by the writer in "The Herald of Truth," as a barrier against joining these societies, "proves conclusively that the references to the obligation, were made without one single ray of light, as to its true character;" which appears to us rather to confirm than disprove what that writer objects to. It is also stated that the teachings of the Bible are strictly adhered to in all well regulated Granges.

From the whole tenor of the article we are confirmed in the opinion there is nothing good to be gained by joining these Granges, that is not better attained by those who rely simply upon leading a religious life; that being secret societies they are unworthy the patronage of a Christian people; that by subjecting the members to concealed obligations, whether or not enforced by oaths or affirmations, they destroy free agency and tempt to injustice and deceit, and that it is especially objectionable for members of our religious Society to be connected with them.

It is with sincere regret we find that the Legislature of Pennsylvania has added another to what are termed "legal holidays;" this last being the day appointed for decorating the graves of the soldiers who perished in the late war.

It is a saddening reflection that at this late period in the nineteenth century of the Christian dispensation—which is designed to put an end to all war and bloodshed,—and in a community professing to believe in the religion of Jesus Christ, the Prince of Peace, the representatives of the people should volunteer to take such a step; the practical effect of which must be to cherish and propagate the spirit of war, by perpetuating the ascription of such an honor, as it is called,—

childish though it really is—to the memory of those who died while engaged in actions springing from the lusts that war in our members, and which are always opposed to the benign spirit and precepts of the Saviour of men.

But independent of the object sought to be attained by this enactment, all experience in both Europe and this country, demonstrates that these legal holidays are an injury to the community. They encourage persons of all descriptions to break off from the various employments by which they obtain the means necessary for the subsistence of themselves and families, and they add greatly to the frequency and power of the temptation to waste their time, their health and their money in idleness or degrading conviviality. Thus wasteful and dissipating habits are prompted or nurtured, often betraying those who have been steady and industrious, into practices that mar the happiness of themselves and families.

When will the people, or the leaders of the people, learn that strict conformity to the requirements of the gospel of Christ is the alone way to promote the well-being of communities as well as of individuals!

#### SUMMARY OF EVENTS.

**FOREIGN.**—The struggle in Spain between the Carlists and Republicans remains undecided. The former appear to be numerically weaker, but they still prolong the contest with unyielding firmness. On the 23th ult. a Carlist army under the immediate command of Don Carlos, was before Hernani, eight miles south-east of San Sebastian. Another large Carlist force was near Estella, in the province of Navarre. The Republican general Concha, with 25,000 men and 64 guns, was in the vicinity. On the 24th ult. he attacked the Carlists with part of his troops, but met with a repulse. Disease prevails in Concha's army, and many of the men are incapacitated thereby from service.

Diplomatic relations have been formally resumed between Spain and Mexico by the presentation to Marshal Serrano of the credentials of Gen. Corona as Minister from the latter country.

The Spanish government forbids the press to attack its financial schemes.

The French Assembly has settled the following as the order in which the important business before it is to be taken up: First, the municipal election bill; second, the municipal organization bill, and third, the general electoral bill.

The members of the Left have resolved that the motion for the dissolution of the Assembly shall be pressed, and that overtures be made to other sections of the chamber to secure their co-operation in this movement.

The sale and circulation of the *Siecle* has been prohibited in several departments.

Increased activity is shown on the part of the Bonapartists. Prince Napoleon has been nominated for the Assembly in three Departments.

The Left Centre of the Assembly, at a meeting the first inst., took action toward an alliance with the Right Centre. A motion was drawn up declaring in favor of the establishment of a Republican government which all the members of the Left will sign, in hope that the Right Centre will support it when submitted to the Assembly.

The Bank of England rate of discount has been reduced to 3½ per cent.

The American Pullman Palace cars are being placed on several of the main lines of travel in England.

An editorial of the London Times states that last year the amount spent in public houses was no less than £146,000,000, and of this prodigious sum about £97,000,000 came from working people. This expenditure was principally for beer and alcoholic drinks.

On the 30th ult. Queen Victoria's birth-day was celebrated by the ringing of bells and military parades, &c. In the evening London was illuminated.

Dispatches received in London from Calcutta, state that there is still much distress in India. Nearly three millions of people were dependent upon the government for food. Many are employed on the relief works and others are supported by advances on sales of grain.

Rain has been general north of the Ganges, and portions of the country south of the river have been visited with rain.

The Emperor of Brazil opened the Chamber on the 5th ult. with a speech from the throne. He said he had hopes of the conclusion of a definite treaty of peace between Paraguay and the Argentine States, which would put an end to the present complications.

Alluding to the religious troubles, he declared that the punishment of the Bishops of Olinda and Para was necessary because they had transgressed the laws and constitution of the Empire. The government, by the exercise of moderation, and with the support of the Chambers, would, he believed, be able to terminate the conflict between Church and State.

A Madrid dispatch of the 1st inst. says: A Spanish frigate has arrived at Oram, Algiers, to take on board and bring to this country, the convicts who escaped from Cartagena at the time of the suppression of the insurrection in that city.

A Melbourne, Australia, dispatch of the 30th ult. says: The ship British Admiral, from Liverpool for this port, went ashore on King's Island, in Bass Strait, and became a total wreck. She had on board 44 passengers and a crew of 38 men, all of whom were lost except four passengers and five seamen. King's Island is uninhabited and very dangerous to shipping, several vessels having gone ashore there and become totally lost.

London, 6th mo. 1st.—The rate of discount in open market for three months bills is 3 per cent., which is ½ per cent below the Bank of England rate. Consols 92½.

Liverpool.—Uplands cotton, 8½d. a 8½d.; Orleans, 8½d.

**UNITED STATES.**—*Miscellaneous.*—The annual report of the Common Schools of the State of Ohio, shows the total number of pupils to be 704,017. During the year 512 school houses were built, at a cost of \$1,608,786. There are 11,094 Public School-houses in the State, of the estimated value of \$17,659,276. The number of teachers employed is 21,899. The expenditures of the year were \$7,431,967.

An act of the Legislature of Oregon makes it unlawful to kill or offer for sale any deer, moose or elk, during the five months preceding 7th mo. 1st, and prohibits the killing of these animals at any time for the sole purpose of obtaining their horns and skins.

The U. S. Senate has passed the bill from the House of Representatives requesting the President to extend an invitation to other nations to be represented and take part in the International Exposition to be held at Philadelphia under the auspices of the government of the United States, in the year 1876, with an amendment providing that the United States shall not be liable, either directly or indirectly, for any expenses attending the said Exposition.

The bill for the reduction of the army, which has passed the House of Representatives, directs the number of regiments of cavalry to be reduced to nine, artillery to four, and infantry to twenty. The total number of enlisted men is to be reduced to 25,000 before the close of the present year.

On the first inst. the President sent to the United States Senate for confirmation the nominations of Benjamin H. Bristow, of Kentucky, to be Secretary of the Treasury, in place of William A. Richardson at the same time nominated a Judge of the Court of Claims.

The Public Debt statement published the 1st inst., shows a decrease during the Fifth month of \$4,456,839. The total debt, less cash in the Treasury, being \$2,145,268,438. The balance in the Treasury consisted of \$81,958,979 coin, and \$11,177,704 currency.

There were 282 interments in Philadelphia from the 23d to the 30th of Fifth month, including 51 deaths of consumption, and 19 inflammation of the lungs.

The mean temperature of the Fifth month, according to the Pennsylvania Hospital record, was 62.08 deg., the highest during the month 86 deg., and the lowest 38 deg. Rain during the month 2.69 inches. The average of the mean temperature of the Fifth month for the past 85 years, is stated to be 62.76 deg. The highest mean during that entire period was 71 deg., and the lowest 51.75 deg. The mean temperature of the three spring months of 1874 has been 49.41, which is 1½ deg. below the average of the past 85 years.

A fire in Chicago the first inst., destroyed merchandise and buildings valued at \$400,000.

*The Markets, &c.*—The following were the quotations on the first inst. *New York.*—American gold, 112½. U. S. sixes, registered, 116½; do. coupons, 121½; do. 1868, registered, 116½; coupons, 120½; U. S. 5 per cents, 115½. Superfine flour, \$5.10 a \$5.45; State extra, \$6 a \$6.35; finer brands, \$6.50 a \$10.25. No. 1 Chicago spring wheat, \$1.50; No. 2 do., \$1.45; red western,

\$1.56; white Canadian, \$1.62. Oats, 60½ a 66 c. Western mixed corn, 78 a 80; white, 83 a 85 c. *Philadelphia.*—Middlings cotton, 18½ a 19 cts. for r. lands and New Orleans. Superfine flour, \$4.75 a \$5.50; extras, \$5.50 a \$6.25; finer brands, \$6.50 a \$10.00. Penna. amber wheat, \$1.57 a \$1.60; do. red, \$1.50 a \$1.55; No. 1 spring wheat, \$1.40. Rye, 98 cts. a 1.00. Western mixed corn, 80 a 82 cts.; yellow, 82 a 83 c. Oats, 63 a 66 cts. Sales of 2500 beef cattle at 7½ a 8 cts. per lb. gross for extra; 6½ a 7 cts. for fair to good, and 5 a 6 cts. for common. About 7000 sheep sold at 5 a 6½ cts. per lb. gross, and 5000 hogs at \$8.75 a \$9.00 per 100 lb. net. *Baltimore.*—Choice white wheat, \$1.10 fair to prime do., \$1.50 a \$1.60; choice amber, \$1.65; good to prime red, \$1.50 a \$1.60; western spring \$1.35 a \$1.40. Southern white corn, 90 a 93 cts.; yellow, 76 a 78 cts. Oats, 62 a 72 cts. Rye, \$1.08 a \$1.10. *Chicago.*—No. 1 spring wheat, \$1.21; No. 2 do., \$1.10. No. 3 do. \$1.13. No. 2 mixed corn, 56 cts. No. 1 oats, 42½ cts. Lard, \$10.60 per 100 lbs. *St. Louis.* No. 2 winter red wheat, \$1.35; No. 2 spring, \$1.10. No. 2 corn, 53 a 54 cts.

#### THEATRICAL AMUSEMENTS AND HORSE RACING.

A new edition of the above named Address has been struck off and is now at Friends' Book Store, No. 3 Arch street.

Friends in the country can obtain whatever number of copies may be needed for distribution in their respective neighborhoods.

**FRIENDS' ASYLUM FOR THE INSANE.**  
Near Frankford, (Twenty-third Ward,) Philadelphia.  
Physician and Superintendent—JOSHUA H. WORTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board Managers.

DIED, near St. Louis, Missouri, on the 27th of Third mo. 1874, in the 56th year of her age, CAROLINE, wife of the late George Fitzwater, and daughter of Richard and Susanna Chambers, a member of New Garden Monthly Meeting, Chester Co., Pa.

—, on the 25th of Fifth month, 1874, MARY J., wife of John W. Biddle, in the thirty-second year of her age, a member of the Monthly Meeting of Friends at Philadelphia for the Northern District. Being of cheerful and amiable disposition, she endeared herself not only to her immediate family, but also to a large circle of friends, both old and young. Her health had been declining for a number of years, and for more than twenty months past she was confined to her bed. During this period her Christian character was fully exemplified by patient, humble resignation to the will of her Heavenly Father. She was often brought under religious exercise on account of herself and family, desiring her work might keep pace with the day; remembering that "the night cometh, wherein no man can work." Especially solicitous for the welfare of the lambs committed to her care, she was concerned to bring them in the nurture and admonition of the Lord, and was frequently engaged to commit them to the keeping of the unslumbering Shepherd of Israel. She was desirous, above all other things, to realize in her own experience, "the washing of regeneration, and renewing of the Holy Ghost;" and although her faith was closetried, she was, from season to season, enabled to trust in the mercy and loving kindness of her holy Redeemer, often expressing her thankfulness for the many mercies and favors received from His all-bountiful hand. She was preserved in a quiet state of mind: never complaining, or considering her situation a hard one, as she often remarked, it was all right and she would not have it otherwise. For some weeks before her death she seemed much redeemed from the world and the things thereof; frequently expressing a desire to be released with the hope that her patience might continue to the end. On the day before her departure, being sensible that the final change was at hand, she said impressively, "Farewell, farewell," to all who came near her. Shortly before her close she uttered, in a clear manner, "Happy! Happy!" and soon passed peacefully away, leaving her family and friends the comfortable assurance that through redeeming love and mercy, she had been permitted to enter into that rest which is prepared for the people of God.

For "The Friend."

Sufferings of a Lost Man.

(Continued from page 332.)

After considering the difficulties by which he was surrounded and the several possible means of escape, our explorer determined that he would endeavor to reach the settlements in the Madison Valley by climbing the Madison mountain range. This route, if practicable at all, was much the shortest of any. He says:

"Filling my pouches with thistle roots, I took a parting survey of the little solitude that had afforded me food and fire the preceding ten days, and with something of that melancholy feeling experienced by one who leaves his home to grapple with untried adventures, started for the nearest point on Yellowstone Lake. All that day I travelled over timber heaps, amid tree tops, and through thickets. At noon I took the precaution to obtain fire. With a brand which I kept alive by frequent blowing, and constant waving to and fro, at a late hour in the afternoon, faint and exhausted, I kindled a fire for the night on the only vacant spot I could find amid a dense wilderness of pines. The deep gloom of the forest, in the spectral light which revealed on all sides of me a compact and unending growth of trunks and an impervious canopy of sombre foliage; the shrieking of night birds; the unnaturally human scream of the mountain lion, the prolonged howl of the wolf, made me insensible to all other forms of suffering."

The burn on his hip was so inflamed that he could only sleep in a sitting posture, with his back leaning against a tree. Once during the night, in a fitful slumber, he fell forward into the fire and inflicted a severe burn on one of his hands. The next morning he was cheered by bright sunshine, reached the shore of Yellowstone Lake before evening, kindled a fire on its sandy margin and had a night of refreshing sleep. On the following day he resumed his weary journey along the shore, and at noon found the camp last occupied by his friends on the lake. A thorough search for food in the ground and trees revealed nothing, and no notice to apprise him of their movements could be seen. A dinner fork, which he afterwards found of great service in

digging roots, and a half pint tin can which he converted into a drinking-cup and dinner-pot, were the only evidences that the spot had been visited by civilized man. He selected for a landmark the lowest notch in the Madison range, and two days of painful effort brought him near enough to it to discover that it was utterly impracticable. Nothing could be seen but an endless succession of inaccessible peaks and precipices rising thousands of feet sheer and bare above the plain. No friendly gorge or gully or cañon invited such an effort as he could make to scale the rocky barrier.

He turned back sad and discouraged toward the foot of Yellowstone Lake, and when cold and hungry on the afternoon of the fourth day after leaving the Madison range, he gathered the first food he had eaten in nearly five days (not finding even thistles), and lay down by a fire near the debouchure of the river, all hope of escape was nearly abandoned. He however used all the little strength still remaining in renewed efforts to get away by the route of the Yellowstone River valley. About this time Everts says: "I lost all sense of time. Days and nights came and went, and were numbered only by the growing consciousness that I was gradually starving. I felt no hunger, did not eat to appease appetite but to renew strength. I experienced but little pain. The gaping sores on my feet, the severe burn on my hip, the festering crevices at the joints of my fingers, all terrible in appearance, had ceased to give me the least concern. The roots which supplied my food had suspended the digestive power of the stomach, and their fibres were packed in it in a matted, compact mass. Not so with my hours of slumber. They were visited by the most luxurious dreams. I would apparently visit the most gorgeously decorated saloons of New York and Washington; sit down to immense tables spread with the most appetizing viands; partake of the richest oyster stews and plumpest pies; engage myself in the labor and preparation of curious dishes, and with them fill range upon range of elegantly furnished tables," &c.

At one time he found part of a gull's wing which may have been left by some bird of prey. He plucked the feathers, crushed the bones, and with the aid of his tin cup succeeded in making a little soup, which he found refreshing. At another he caught with his hands some minnows which were swarming in a small brook that issued from a hill-side, these were eaten raw and highly relished, but they proved unwholesome, causing sickness and great pain. He supposed they were poisoned by some mineral impregnation of the water in which they lived. As the weak and weary man persevered in the endeavor to escape, still clinging to the resolve that he would not perish in the wilderness, and still making a little progress towards the river, day followed day and nights of wretchedness suc-

ceeded each other. It was a cold gloomy day when he arrived in the vicinity of the falls. He says: "The sky was overcast, and the snow capped peaks rose chilly and bleak through the biting atmosphere. The moaning of the wind through the pines, mingling with the sullen roar of the falls, was strangely in unison with my own saddened feelings. I had no heart to gaze upon a scene which a few weeks before had inspired me with rapture and awe. One moment of sunshine was of more value to me than all the marvels amid which I was famishing, but the sun had hid his face and denied me all hope of obtaining fire. The only alternative was to seek shelter in a thicket. I penetrated the forest a long distance before finding one that suited me. Breaking and crowding my way into its very midst, I cleared a spot large enough to recline upon, interlaced the surrounding brushwood, gathered the fallen foliage into a bed, and lay down with a prayer for sleep and forgetfulness. Alas! neither came. The coldness increased through the night. Constant friction with my hands and unceasing beating with my legs and feet saved me from freezing."

When day began to dawn he found his limbs so stiffened with cold as to be almost immovable. Fearing lest he should become wholly paralyzed, he dragged himself through the woods to the river, and seated near the verge of the great cañon below the falls, anxiously awaited the appearance of the sun. "That great luminary," he says, "never looked so beautiful as when, a few moments afterwards, he emerged from the clouds and exposed his glowing beams to the concentrating powers of my lens. I kindled a mighty flame, fed it with every dry stick and broken tree-top I could find, and without motion, and almost without sense, remained beside it several hours. The great falls of the Yellowstone were roaring within three hundred yards, and the awful cañon yawned almost at my feet; but they had lost all charm for me."

At some of the streams on his route, hours were spent in endeavoring to catch trout, with a hook fashioned from the rim of his spectacles, but in no instance with success. The country abounded with game, he saw large herds of deer, elk, antelope, occasionally a bear and many smaller animals. Ducks, geese, swans and pelicans, inhabited the lakes and rivers, but with no means of securing any of them for sustenance, their presence was a perpetual aggravation.

One afternoon he came upon a large hollow tree which he recognized as the den of a bear. It was a most inviting place of rest. Gathering the needful supply of wood and brush, he lighted a circle of piles around the tree, crawled into it and passed a night of unbroken slumber. On rising the next morning he found that during the night the fires had communicated with the adjacent woods and burned a large space in all directions, doubt-

less intimidating the rightful proprietor of the nest, and saving him from another midnight danger.

(To be concluded.)

For "The Friend."

### Memoirs and Letters of Sarah Hillman.

(Continued from page 322.)

"Cherry Hill, 7th mo. 22d, 1848. \* \* \*

I know not that any thing strange has happened unto us, although so sorely proved. The disciples of Jesus of old have been accounted 'turners of the world upside down,' and have been accused of being deceivers while yet true, they have been a poor and an afflicted people, and have been desolate and tormented, yet through faith 'obtained promises, wrought righteousness, quenched the violence of fire, escaped the edge of the sword, waxed valiant in fight, turned to flight the armies of the aliens!

Let us then hold on, and hope ever, that thus we may with those of old, through faith overcome, and receive the end thereof, even the salvation of our souls."

"1849. \* \* \* Are not all these tribulations designed to wean us from sublunary enjoyments, even those of the higher order, which yet change; and to induce us to flee to the strong Tower, the refuge of the righteous in all ages of the world? Ah! methinks there are many up and down who have run to this Tower and are safe there, though the arrows of the arch enemy are shot thick about them; and at seasons these are delivered from the noise of archers and are constrained to rehearse the righteous acts of the Lord in the places of drawing water, not only towards us, but to our fathers in days of old. And are not such as these knit together by that which every joint supplieth, although outwardly separated, and enabled to sympathize one with another, yea and to bear one another's burdens, thus fulfilling the law of Christ."

"6th mo. 1852. \* \* \* A stricken deer I feel myself, but He of whom Cowper spake, 'who drew the arrows forth from his side, and healed and bade him live,' has in mercy condescended to sustain, and to the rolling wave has said 'thus far shalt thou come,' else my poor soul had sunk into the abyss. Can it be there ever was a time when the enemies of Truth were more busily employed in taunting, and saying 'what do these feeble Jews,' &c., methinks not; but as I dreamed night before last, so I think awake. It matters little what man's judgment respecting us be, if we can only in holy confidence look up as Hagar did to our Father in Heaven, saying, 'Thou, God, seest me.' Since Yearly Meeting my mind has been satisfied that the Good Shepherd was with us at that season, as a wall of fire round about, preserving from the jaws of the devourer; and at times there has a tribute of thankfulness arisen, I doubt not, from many hearts unto him for his goodness to us, poor unworthy dust as we are, and for his wonderful works to the children of men. And I cannot but believe, my beloved friend, that in the turnings and overturnings which have been permitted us as a people to pass under and through, his gracious design is to do us good, and eventually to work for the honor of his own glorious, holy name. It is written (and 'the gifts and callings of God are without repentance') 'the Lord will have war with Amalek from generation to generation.' There are many who seem willing to believe that Amalek is slain, the bitterness of death is

past; they are altogether insensible that Agag still lives and reigns, and the bleating of the sheep and the lowing of the oxen, is not discernible by them, because their ears are uncircumcised and they cannot hearken. Oh, I long for myself and for all of us, that we may come down into the littleness, the abasedness of self, where the voice of the true Shepherd is clearly distinguished, and that He would condescend to undertake for us, strip us, and gird us, yea make us quick of understanding in his fear? That we might know him as in the days of our youth, as in the day when in mercy infinite, ere we asked it of him, he took us as it were by the hand and led us up out of Egypt. Is he not the same that ever he was? 'The Lord, the Lord God merciful and gracious, long-suffering, and abundant in goodness and truth; keeping mercy for thousands, forgiving iniquity and transgression and sin, and that will by no means clear the guilty.' yea, surely; and doubtless he will keep that which we have been enabled to commit unto Him, though we may have to pass through the furnace again and again. For acceptable men are tried in the furnace of adversity; and have to drink the bitter water of affliction; yet their King and Saviour, their Rock in whom they trust is with them, and delivereth them out of all their tribulations, and gives them in the end to sing the song of victory."

"Philada., 10th mo. 7th, 1852. \* \* \* I have been thinking some of the bitter trials we have to pass through, known only to the full to our dear Father in heaven, are among the tribulations designed to work out for us a far more exceeding and eternal weight of glory. Let us press on, though faint, trusting in the same Chieftain, who led his people in days of old through the sea, who conquered Pharaoh and his mighty host, and gave Israel to sing on the banks of deliverance; who supported David by his rod and by his staff, and remains to be the King of saints, everlastingly worthy.

It seems to me that this people *shall be purified*: much dross and tin and reprobate silver will be purged away, and after that shall come a time when the watchmen will hear the command upon mount Ephraim, 'Arise ye,' and have to say unto their fellows 'let us go up to Zion unto the Lord our God.' Now many seem unwilling to believe the voice of the Shepherd, and of course believe not his servants; but sure as the records of Heaven fail not, there will be a time when all will have to bow, (may it be in the day of mercy,) lest the unbelievers should be ground to powder."

May our hearts cleave to him forever saith my soul, that we may find a refuge in the day of trouble, and having endured as seeing him who is invisible, the storms, the adverse winds, the deaths many, appointed the believers in Jesus, find anchorage ground at last in him, the Rock immovable, the Rock of Ages, on whom angels and arch angels, prophets and apostles, and the martyrs of every age and generation builded."

"11th mo. 26th, 1852. What though many and great are the trials and conflicts attendant upon us in this day of exercise, let us remember for our encouragement there has no new thing happened us. Afflictions have been the lot of the righteous from generation to generation; different in their nature perhaps from those we have to endure, yet not less trying to them, for all seem to have had

to pass through the fire and through the water, who have known a being 'washed and sanctified, and justified in the name of the Lord Jesus, and by the spirit of our God.' I then this be the blessed effect wrought upon each of us, my dear cousin, by our close proving conflicts, bereavements and tribulations we shall have to bless the name of Lord for all, for every stroke, even the severe."

No date. \* \* \* "If He who was before Abraham does not interpose for his people's sake what will become of our Society? methinks there is great occasion for us as ability is furnished to pray without ceasing, though we may not be able in everything to give thanks; yet possibly as we endeavor to possess our souls in patience, even this also may be experienced in the Lord's time. And if that day Jacob shall no more be ashamed neither shall his face then wax pale; but when he seeth his children, the work of the Lord's hand, in the midst, he will magnify the Name of Israel's unslumbering Shepherd, and trust Him for all that is to come. Ah, my dear friend, were it not that—

'Trials make the promise sweet,  
Trials give new life to prayer,  
Trials bring us to his feet,  
Lay us low and keep us there;'

should we not in some of our varied tribulations, be ready to say, we can struggle no longer, and cast away the shield as though it had not been anointed with oil? but this

'Faith in the dark  
Pursuing its mark  
Through many sharp trials of love,  
Is the sorrowful waste  
That is to be passed  
In the way to the Canaan above,'

dear Sarah Cresson used often to say; and when I remember her, and her many tribulations, with many many more who have entered the blissful abodes of the righteous, my heart desires to hold fast the shield, and that all my dear fellow pilgrims who have come to put their trust under the shadow of the wings of Immanuel, may persevere in the way and work of salvation, assuredly believing we shall reap in the end, if we faint not, a blessed recompense."

(To be continued.)

*Iguanas and Lizards.*—The road passed along a sandy ridge only a little elevated above the waters of the lake, and the ground on both sides was submerged. As we travelled on we were often startled by hearing sudden plunges into the water not far from us but our view was so obstructed by bushes that it was some time before we discovered the cause. At last we found that the noise was made by large iguana lizards, some of them three feet long, and very bulky, dropping from the branches of trees, on which they lay stretched, into the water. These iguanas are extremely ugly, but are said to be delicious eating, the Indians being extremely fond of them. The Carca Indians, who live in the forest seven miles from Santo Domingo, travel every year to the great lake to catch iguanas which abound on the dry hills near it. They seize them as they lie on the branches of the trees, with a loop at the end of a long stick. They then break the middle toe of each foot and tie the feet together, in pairs, by the broken toes, afterwards sewing up the mouth of the poor reptiles, and carrying them in this state back to their houses in the forest, where they are kept alive until required for food.

The racoon-like "pisoti" is also fond of them, but cannot so easily catch them. He has to climb every tree, and then, unless he can surprise them asleep, they drop from the branches to the ground and scuttle off to another tree. I once saw a solitary *pisoti* hunting for iguanas amongst some bushes near the lake where they were very numerous, but during the quarter of an hour that I watched him, he never caught one. It was like the game of "puss in the corner." He would ascend a small tree on which there were several; but down they would drop when he had nearly reached them, and rush off to another tree. Master "Pisoti," however, seemed to take all his disappointments with the greatest coolness, and continued the pursuit unflaggingly. Doubtless experience had taught him that his perseverance would ultimately be rewarded: that sooner or later he would surprise a corpulent iguana fast asleep on some branch, or too late in dropping from his resting place. In the forest I always saw the "pisoti" hunting in large bands, from which an iguana would have small chance of escape, for some were searching along the ground whilst others ranged over the branches of the trees.

Other tree lizards also try to escape their enemies by dropping from great heights to the ground. I was once standing near a large tree, the trunk of which rose fully fifty feet before it threw off a branch, when a green *Anolis* dropped past my face to the ground, followed by a long green snake that had been pursuing it amongst the foliage above, and had not hesitated to precipitate itself after its prey. The lizard alighted on its feet and hurried away, the snake fell like a coiled-up watch-spring, and opened out directly to continue the pursuit; but, on the spur of the moment, I struck at it with a switch and prevented it. I regretted afterwards not having allowed the chase to continue and watched the issue, but I doubt not that the lizard, active as it was, would have been caught by the swift-gliding snake, as several specimens of the latter that I opened contained lizards.

Lizards are also preyed upon by many birds, and I have taken a large one from the stomach of a great white hawk with its wings and tail barred with black (*Leucopternis ghisbreghtii*) that sits up on the trees in the forest quietly watching for them. Their means of defence are small, nor are they rapid enough in their movements to escape from their enemies by flight, and so they depend principally for their protection on their means of concealment. The different species of *Anolis* can change their color from a bright green to a dark brown, and so assimilate themselves in appearance to the foliage or bark of trees on which they lie; but another tree-lizard, not uncommon on the banks of the rivers, is not only of a beautiful green color, but has foliaceous expansions on its limbs and body, so that even when amongst the long grass it looks like a leafy shoot that has fallen from the trees above. I do not know of any lizard that enjoys impunity from attack by the secretion of any acrid or poisonous fluid from its skin, like the little red and blue frog that I have already described; but I was told of one that was said to be extremely venomous. As, however, besides being said to give off from the pores of its skin poisonous secretion, it was described to be of an inconspicuous brown color, and to hide under logs, I should require some confirmation of the story by an experi-

enced naturalist before believing it, for all my experience has led me to the opinion that any animal endowed with special means of protection from its enemies is always either conspicuously colored, or in other ways attracts attention, and does not seek concealment.—*Belt's Naturalist in Nicaragua.*

For "The Friend."

"The Harvest is ready, but who is to gather it."

(Concluded from page 335.)

It is not there is less for the faithful servant to do; it is there are so few who are obedient to the call, and willing to be prepared for the work, by such means as are needed to qualify them for the service allotted. And yet, such is His power and goodness, even toward those who have wandered far away upon the barren mountains of an empty profession, or, perhaps, in paths of open disobedience, that He does sometimes reveal Himself in mercy or in judgment with convicting authority to these, without the intervention of any instrumental means; that knowing His power to be over all the powers of darkness, will He not in His own due and appointed time, open a way in the hearts of His people, for the extension of His kingdom and cause.

Truly we are encompassed about with many infirmities, common to human nature, and not the least of these, is the desire to be known as having a part with others in their religious undertakings; such as are actively at work, and upon whom the public eye may be resting with favor. Their work may be within, or it may be beyond our Society, but if it is not of His preparing, it cannot prosper; and herein is the danger to which their sympathizing fellow members are exposed, of being led, under excitement, to engage with them, or to embark in something of *their own*, thinking a blessing could not fail to rest upon a labor so meritorious in itself. It is the Lord alone who can appoint and qualify for any work that is intended to promote His cause, and to such as are worthy to receive His call He will verify in their experience the ancient promise: "Fear thou not, for I am with thee; I will strengthen thee, yea I will uphold thee with the right hand of my righteousness."

Oh! if Friends had been careful in this one thing, to abide each in his own tent, how sweet would be our fellowship; we should have everywhere, been kept a united people, and the work which was so well commenced, of gathering souls that His name might be magnified, would have spread. We should have grown to be a spiritual landmark indeed, one of the greatest among the cedars of Lebanon, under whose ample shade many weary, worn seekers and pilgrims would have continued to come, as when we were first gathered from among the formal professors of that day. I long for such a consummation. That it was His design to make Friends more eminently instrumental in carrying forward His work in the earth, and that He will bring it to pass, I do not doubt; if not by us, others will be chosen. We have been abundantly favored as a people, and blessed beyond anything we deserve; light and knowledge; a free gospel ministry, yet upheld in many places; ample education for all; liberal institutions of government; and a generous feeling of respect and kindness maintained on the part of other professors; that we have great reason to number our blessings, and to renew our devotion to Him who has followed us in every

temptation, even when we have turned away and dishonored his cause. Therefore, should we not be hopeful; not looking too much to the sorrowful effects of our own disobedience; but leaving the things that are behind, press forward toward the mark for the prize, knowing, as we surely do, that His storehouse is filled with good things, and that He stands ready to dispense them. This Yearly Meeting, and its faithful members, I have no doubt, will always welcome honest-hearted Friends, from whatever quarter they may come, regardless of what may be the prevailing tendency of things in a religious point of view, in their own meetings at home, and I believe by thus putting ourselves in the way of knowing their trials, we shall help them and receive strength ourselves, and learn the better how to temper our own spirits to make a righteous warfare with those of our own household, who want to be known as Quakers, while they would overlook the restraints of the cross, and by specious argument, strive to wriggle out from under its keeping. And it is not enough, that we should be convinced of the value of any of our testimonies, that we are qualified vocally to defend them, or to reprove a brother who may have gone astray; we must be drawn thereto by a measure of the same love wherewith we are loved by Him who is the Light of the world. "Greater is he that ruleth his own spirit, than he that taketh a city." P. B.

Philadelphia, 5th mo. 23rd, 1874.

For "The Friend."

#### Scientific Notes.

*The Waves of the Sea.*—In a recent lecture at the Royal Institute, London, the lecturer pointed out that the advance of the wave was not necessarily or generally accompanied by any corresponding advance of the water itself. Large models of screws were exhibited, and the lecturer pointed out that when the barrel on which the screw was cut was simply turned round without advancing, the screw-thread appeared to advance like a series of waves. But when the screw worked in a nut, so that the screw advanced, then the screw-thread remained apparently at rest. In the same way, in sea-waves which appeared to advance rapidly the water had no sensible motion of advance; while in the series of waves which are often seen below a bridge or shoal in a rapid river the water did advance, and the waves stood still. What really constituted a wave was that each particle of water should go through the same little dance of its own, while the successive particles took up the dance in regular order. There would then be a wave or series of waves, whether there was any current or general movement of the water or not.

McFarlane has been experimenting upon the coloring matter used for tapers. The yellow and blue are harmless, being colored with chromate of lead, and ultramarine respectively. The red and green are highly poisonous, the former containing vermilion and the latter arsenious acid, which are dissipated in burning, and their dangerous fumes liable to be inhaled.

A natural deposit of Glauber's salts has recently been discovered in the Caucasus. In the trial hole that was sunk, the first foot furnished marl, then gray moist clay 2½ feet, dark gray bituminous salty clay 9 in., and pure Glauber's salts bored into 5 feet.

E. Mathieu and V. Urbian have found that when the serum of blood is completely freed from gas, an albuminous liquid is obtained which does not coagulate even at the boiling point of water. They show that carbonic acid is the agent which effects the coagulation of albumen under the influence of heat.

The stimulating and tonic effect of coffee alone is well-known, also the value of milk alone as an aliment. Moigno states that when mixed they form an indigestible compound. He attributes this to the fact that coffee is rich in tannin, and that its mixture with milk transforms the albumen and caseine into a leathery substance similar to that formed by placing skins of animals in a tan vat.

The Giant Puff-ball (*Lycoperdon giganteum*), is said to be one of the best of the edible mushrooms. It should be eaten while young and white—before it has perfected its spores. Recently, some of the spores were accidentally swallowed, and in an hour and a half afterwards, a sharp attack of illness with violent pains, followed, which did not yield till the ninth day. Medical authorities thought that the irritation was kept up by the spores.

A writer in the *Revue Industrielle*, has been making an analytic study of that colossal literary work (probably the largest in the world) the *Specifications of Patents for Inventions*, published by the Royal Commission of English Patents since the year 1617. It continues increasing at the rate of about 10 blue covered parts daily. The total number of specifications from 1617 to 31st 12th mo. 1870, is 72,586; the whole forming 2,533 thick 8vo. volumes, with a value of £2,448. In 1862 there was a change in the patent law; patents must thereafter apply to a single determinate invention; previously one patent might have several applications. During the first period of 235 years, the number of patents taken out was 20,669; and in the period 1862-69 it rose to 138,665; giving the enormous total of 159,334. Some curious facts appear on examining the classifications. There are some subjects that attract the attention of inventors in a constant way; such are apparatuses of precaution against accidents; they have furnished 1,347 patents. Improvements in brushes furnish 1,062; fire-arms, 1,877. The manufacture of needles properly dates from 1650; and the first patent relative to this useful implement has the date 1755. Notwithstanding the numerous improvements attested by 212 patents, the polishing (a process which victimises so many), continues to be done in Sheffield pretty much as in the past. The manufacture of pins dates from 1543, and the first patent is in 1795. Aeronautical science occupies a whole volume of the index; 91 patents refer to it. Artificial arms and legs date back to a patent of 1790, taken out by one Mann, of Alsacian origin. Machines for manufacture of tobacco furnish a contingent of 393 patents; lighting, 404; printing presses, 1,949; railway carriages 3,254; paper manufacture, 1,480; gutta-percha and caoutchouc, 1,927; gas apparatus, 1,091; electric machines, 1,010; telegraphy, 1,027; wheelwrights' work, 1,207; weaving, 5,009; spinning, 4,155; smoke consuming apparatus, 1,733; railway signals, 1,283; metallurgy, 6,217; steam engines, 3,197; boilers, 2,367; machines of compressed air, 91; and motor machines in general, 4,233.

When ill reports are spread of you, live so that nobody may believe them.

### THE CHILD'S HEART.

Selected.

The young child's heart! Oh! there is nought  
So full of Heaven on earth below,  
With its clear depths of earnest thought,  
Its pure affection's ardent glow;  
Its artless trust, its cloudless glee,  
Its guileless truth, its fancy free.

\* \* \* \*

Fell not the tenderest blessing spoken  
By holiest Lips, on childhood's head?  
When to His own the unerring token  
Those sacred lips announcing said,—  
"Who seeks me not with childlike heart,  
Hath in my Heavenly Realm no part."

Childhood, that boasts not to be wise  
Beyond its parent's word and will;  
That in its helplessness relies  
On stronger strength and higher skill;  
That pillows on its mother's breast,  
In its bright present safe and blest.

Childhood, whose love in love confides,  
Unreasoning and unquestioning;  
Whose breast no guilty secret hides;  
Whose pleasures have no serpent-sting;  
Whose every shade of look and tone,  
Is language from the heart alone.

On such Thy blessing? Saviour! yes!  
Of such Thy kingdom well may be—  
Nought doth this fallen world possess  
So near to Heaven, so near to Thee.  
And none may share Thy Heaven on earth,  
Till thus new-born in second birth.

Not for its free and joyous mien,  
Its ringing laugh, its sunny brow—  
Oh! not for these, from life's stern scene  
Would I return to childhood now;  
But for the heart that knew not yet,  
Beside the good the evil set,—

The heart that in a world of sin,  
Kept its first innocence unstained,  
Ere yet that traitor-guest within,  
By conquest sure his empire gained;—  
The conscience at whose lightest word  
The spirit's inmost depths were stirred.

And hast thou lost, Oh! child of toil!  
'Mid earth's low cares, this priceless gem?  
More precious than the jewelled spoil  
Of loftiest monarch's diadem,—  
Oh! grudge no cost—no sacrifice  
If haply to regain the prize.

And thou, whose young life's flowering spring  
Must give to radiant summer place,—  
Oh! cherish well that tender thing,  
And bear it onward thro' the race.  
A child thou canst not be again—  
The childlike heart thou may'st retain.

For 'twas for this that Christ the Lord,  
Himself a little child became;  
That from our fallen birth restored,  
Thro' faith in His atoning name,  
The child's heart, sanctified, subdued,  
Made meet his dwelling place to be,  
In Christian holiness renewed  
Beyond its infant purity;  
Kept by His power within us here,  
To Him hereafter called to soar,  
Once more that gracious word may hear,—  
"Of such my kingdom evermore."

H. Bowden.

For "The Friend."

### The Heart of Africa, by Dr. Schweinfurth.

(Continued from page 335.)

"Posts were driven into the ground, and long poles were fastened horizontally across them; then against this extemporized scaffolding were laid, or supported crosswise, hundreds of ornamental lances and spears, all of pure copper, and of every variety of form and shape. The gleam of the red metal caught the rays of the tropical noontide sun, and in the symmetry of their arrangement the rows of dazzling lance-heads shone with the glow

of flaming torches, making a background to the royal throne that was really magnificent. The display of wealth, which according to Central African tradition was incalculable was truly regal, and surpassed anything of the kind that I had conceived possible.

A little longer and the weapons are all arranged. The expected king has left his home. There is a running to and fro of heralds, marshals, and police. The thronging masses flock towards the entrance, and silence is proclaimed. The king is close at hand. There come the trumpeters flourishing away on their huge ivory horns; then the ringers swinging their cumbrous iron bells; and now, with a long firm stride, looking neither to the right nor to the left, wild, romantic, picturesque alike in mien and in attire, comes the tawny Cæsar himself! He was followed by a number of his favored wives. Without vouchsafing me a glance, he flung himself upon his unpretending chair of state, and sat with his eyes fixed upon his feet.

Agreeably to the national fashion a plumed hat rested on the top of his chignon, and soared a foot and a half above his head; this hat was a narrow cylinder of closely-plaited reeds; it was ornamented with three layers of red parrots' feathers, and crowned with a plume of the same; there was no brim, but the copper crescent projected from the front like the vizor of a Norman helmet. The muscles of Munza's ears were pierced, and copper bars as thick as the finger inserted in the cavities. The entire body was smeared with the native unguent of powdered camwood, which converted the original bright brown tint of his skin into the color that is so conspicuous in ancient Pompeian halls. With the exception of being of an unusually fine texture, his single garment differed in no respect from what was worn throughout the country; it consisted of a large piece of fig bark impregnated with the same dye that served as his cosmetic, and this, falling in graceful folds about his body, formed breeches and waistcoat all in one. Round thongs of buffalo-hide, with heavy copper balls attached to the ends, were fastened round the waist in a huge knot, and like a girdle held the coat, which was neatly-hemmed. The material of the coat was so carefully manipulated that it had quite the appearance of a rich *moiré antique*. Around the king's neck hung a copper ornament made in little points which radiated like beams all over his chest; on his bare arms were strange-looking pendants which in shape could only be compared to drumsticks with rings at the end. Halfway up the lower part of the arms and just below the knee were three bright, horny-looking circlets cut out of hippopotamus-hide, likewise tipped with copper. As a symbol of his dignity Munza wielded in his right hand the sickle-shaped Monbuttoo scimitar, in this case only an ornamental weapon, and made of pure copper.

As soon as the king had taken his seat, two little tables, beautifully carved, were placed on either side of his throne, and on these stood the dainties of which he continually partook, but which were carefully concealed by napkins of fig-bark; in addition to these tables, some really artistic flasks of porous clay were brought in, full of drinking water.

Such was Munza, the autocrat of the Monbuttoo, with whom I was now brought face

o face. He appeared as the type of those half-mythical potentates, a species of Mwata Janvo or Great Makoko, whose names alone have penetrated to Europe, a truly savage monarch, without a trace of anything European or Oriental in his attire, and with nothing fictitious or borrowed to be attributed to him."

After some conversation with his European visitor, and the reception of presents, the monarch entertained the stranger by musical performances, both instrumental and vocal, and by the tricks of professional jesters, like the court fools of the middle ages of European history. He afterwards delivered an oration, which was loudly applauded by the audience. One of the most remarkable things in the habits of the Monbuttoo, and especially so when we consider the degree of civilization they have attained to, is the prevalence among them of cannibalism. Of this, Dr. Schweinfurth remarks: "The cannibalism of the Monbuttoo is the most pronounced of all the known nations of Africa. Surrounded as they are by a number of people who are blacker than themselves, and who, being inferior to them in culture, are consequently held in great contempt, they have just the opportunity which they want for carrying on expeditions of war or plunder, which result in the acquisition of booty, which is especially coveted by them, consisting of human flesh. The carcases of all who fall in battle are distributed upon the battle-field, and are prepared by drying for transport to the homes of the conquerors.

Incontrovertible tokens and indirect evidences of the prevalence of cannibalism were constantly turning up at every step we took. On one occasion Mohammed and myself were in Munza's company, and Mohammed designedly turned the conversation to the topic of human flesh, and put the direct question to the king how it happened that just at this precise time while we were in the country here was no consumption of human food. Munza expressly said that being aware that such a practice was held in aversion by us, he had taken care that it should only be carried on in secret.

The numerous skulls now in the Anatomical Museum in Berlin are simply the remains of their repasts which I purchased one after another for bits of copper, and go far to prove that the cannibalism of the Monbuttoo is unsurpassed by any nation in the world. But with it all, the Monbuttoo are a noble race of men; men who display a certain national pride, and are endowed with an intellect and judgment such as few natives of the African wilderness can boast; men to whom one may put a reasonable question, and who will return a reasonable answer. The Nubians can never say enough in praise of their faithfulness in friendly intercourse and of the order and stability of their national life. According to the Nubians, too, the Monbuttoo were their superiors in the arts of war, and I often heard the resident soldiers contending with their companions and saying, 'Well, perhaps you are not afraid of the Monbuttoo, but I confess that I am; and I can tell you they are something to be afraid of.'

To those who brought the skulls, I thought it expedient to explain that we wanted them, so that in our far-off country we could learn all about the people who dwelt here, and that we were able, from the mere shape of the head, to tell all about people's tempers and

dispositions, their good qualities and their bad; and that for this purpose we gathered skulls together from every quarter of the globe. When the Khartoomers saw that the collection was now going on for a second year, they were only the more confirmed in their belief that I submitted them to a certain process by which I obtained a subtle poison. From the more dense and stupid natives, the idea could not be eradicated that I wanted all the bones for my food."

The Niam-Niams who live to the north of the Monbuttoo, are also addicted to cannibalism, but not to the same extent as their southern neighbors. The other African tribes with whom our author came in contact, look upon the practice with detestation.

For "The Friend."

### The Seed of the Kingdom in Man.

There surely never was a day wherein the minds of Friends needed more to be turned to the solid, weighty consideration of the following apophthegm by Robert Barclay, in reference to the seed of God and the things of the kingdom. For while man may put human reason in the place of heavenly light, and may apprehend in an outward, notional way a knowledge of God and spiritual things; it is at the same time highly important to remember the testimony of Holy Scripture: "The natural man receiveth not the things of the Spirit of God: for they are foolishness unto him: neither can he know them, because they are spiritually discerned." And, "In that hour Jesus rejoiced in spirit, and said, I thank thee, O Father, Lord of heaven and earth, that thou hast hid these things from the wise and prudent, and hast revealed them unto babes: even so, Father; for so it seemed good in thy sight." "Indeed," says R. Barclay in his Apology for the True Christian Divinity, "the great cause of the apostacy hath been, that man hath sought to fathom the things of God, in and by the natural and rational principle; and to build up a religion in it, neglecting and overlooking this principle and seed of God, in the heart: so that herein, in the most universal and catholic sense, hath *anti-Christ* in every man, set up himself, and sitteth in the temple of God, as God, and above every thing that is called God. For man being the temple of the Holy Ghost, as saith the apostle, 1 Cor. iii. 16, when the rational principle sets up itself there above the seed of God, to reign and rule as a prince in spiritual things, while the holy seed is bruised and wounded, there is *Antichrist* in every man, or somewhat exalted above and against Christ."

For "The Friend."

### Something more about Animal Character.

(Continued from page 334.)

The dog is acknowledged to be an exception to all others, in his unmistakable self-sacrificing love for his master under most circumstances. Yes, and a noble example is he often to the master, man himself; but whenever I have had opportunity of observing, the dog is the pet, much more than the cat. He is owned and valued by his master, provided with comfortable quarters, more carefully fed, treated with much more respect, and is much more noticed than the cat; while poor puss is much oftener left to shift for herself. And why it should be taken for granted that a cat's "caressing ways" are purely selfish is not very apparent—nor why a dog's may not

be partly so as well; they show no love for strangers, generally much the reverse. Who does not love most, where kindness and love are bestowed upon them? And *wherefore*, we would ask, *should* the cat love a dog or a horse with "a more tender sentiment than we have for foot-warmers?" It is very seldom, I imagine, that she has the chance of loving *them* for a similar reason. Woe betide her, indeed, should she often dare to snuggle up to the former for cosy comfort; unless in rare cases where they have been playmates from their babyhood. And how does the dog show his love for the cat? By snarls and growls, snatching her food from her, and the delight he takes in chasing and tormenting her? And the horse—he perfectly ignores her—kindly sees her not. It is well known that the dog too delights in "foot-warmer" comforts. I have seen indulged pet dogs twice the size of a cat, bound unbidden into the lap of their master or mistress, or any one who would kindly permit it—is it love induces them to do this? yes, just the same as prompts the cat—the love of being in a warm, cozy place. And I believe if he were encouraged he would seek it as often as the cat; and huge fellows where they are acquainted, will come bumping up against one to be patted and stroked, just because it feels good to them. In short I do believe that puss feels an affection for her friends. Our pet does not care often to be taken into the lap; (therefore he does not love us as "foot-warmers") this may be because he is seldom indulged in that way, as he would probably enjoy a soft warm place to lie in as well as any other cat, or as *the dog*, and he gives sufficient evidence in other ways of loving all who are kind to him. It is not I who take the charge of feeding him, but I have taken that of chastising him for any misdemeanor, and have repeatedly switched him pretty sharply; which he patiently submits to without scolding or scratching,—though I hold him fast the while,—only uttering a low, mournful "mou" of entreaty; and he seems to love me as well as if I did nothing but pet him and give him dainties. It is true I seldom meet him without giving him a kind word or two, with often a few strokes or pat on the head. He follows me about the house, runs to me when he hears my voice, welcoming me with the low trilling "cur-r-r!" with which mamma puss greets her kitten when she frisks into her arms; loving to be near me apparently, purring softly as he arches his back and looks dreamily into my face, now and then, while he walks round close at my feet; his demonstrations as expressive as those of the dog, but different; and we have yet to understand why it is to be taken for granted that one is less sincere than the other.

We have said it is impossible to understand the feelings of animals—the cat as well as many others. They evincing an intelligence at times so nearly allied to reason it is difficult to ascribe it to any other power. For instance, when I first gave our cat the opportunity of seeing his reflection in a mirror, he took it for another cat of course—was startled, first inclined to run off, and then to attack it. This was the case for a few times on allowing him to repeat his visits to the glass. But he soon appeared to come to the conclusion that it was a mystery he could not understand, and though not frightened, it seemed for a time to make him uneasy; he would not look at either himself or me, and struggled to get

away from me. But now one might think it offended his dignity, for no longer excited by it, he condescends to take one look while making a quiet effort to get away, with an air that seems to say—"Oh that is an old story, now let me get down." (It is probable most cats may act thus.) Some days since however, I held him close to the glass until his face touched his image—perfectly unmoved by this—but suddenly, while in this position, catching a sight of the reflection of the white draperies hanging on the bed cornice, not seen at first, he quickly turned his head round behind, looking brightly over my shoulder at the real thing with which he was familiar; then taking a peep back into the mirror, with a perfectly satisfied air, seemed to put thing and thing together, and at once wanted quietly to get down from my arms. What now are we to suppose passed through his brain, during the witnessing of these several mysterious appearances in the glass? Why should he not have continued to *think*, as he naturally did at first, that there was another cat somewhere behind? He did not know his own face, but he knew mine, and could recognize my whole person; and with the exception of the face, his own form was familiar enough, with the beautiful fur coat he had so often carried and polished. Who knows then but that he had come to *reason* thus?—"That somebody in there, looks just the same as my mistress—the cat in her arms has a coat on the very same as mine, and they both move at the very instant, and in the same manner that we do—and I do just believe that they are the images of her and me." Having thus some time before arrived at this logical conclusion, when on the last occasion he unexpectedly saw so large an object as a white curtained bedstead precisely like the one behind him, he quickly turned round to look for further confirmation to his former conclusion; was then satisfied, ready to dismiss the matter, and retreat.

A young cat we once had, apparently saw her own reflection for the first time in a large black waiter, the bright polished surface of which made a pretty good mirror. It was leaning up against the wall under a table in the room where she was capering about. The instant she saw the kitten in the waiter, she bounded up to have a good time with the new come playmate; but defeated and bewildered for a time, soon she concluded that little puss was on the other side—and then went, cautiously at first, round behind; only to be disappointed and come back amazed, on finding the vision still in the same place; gazed awhile, then dashed behind quickly, to make sure of catching the slippery little sprite—trying this several times to no purpose until utterly confounded, she seemed to take the mysterious matter into grave consideration; and who shall say, she may not like a rational being have reasoned upon it thus—"If there is a kitten behind there, I surely can feel her with my paw, if I can but stand where I can reach her, at the same time that I can see her face." For after pondering awhile, she deliberately walked up and stood by the very edge of the waiter, where by a little stretching of her neck she brought her face round in front, and could see the reflection of it, at the same moment,—which *doubtless* she *knew*,—that she was extending her *arm*, let it be called, on the under side far *beyond* the head she was so brightly gazing at. It did not take long to accomplish, and come to a decision

relative to these explorings in the dark; but what conclusions with regard to the mystery, this little searcher after truth, arrived at, we shall never be informed. It was evident however, that her experiment was entirely satisfactory to herself; for she very soon quietly withdrew, and never from that time condescended to notice the cat in the waiter. It was to me a most interesting exhibition. And I believe, could we suppose a child of even ten years of age to have been so situated, as never to have seen or heard of such reflections, we should consider it evidence of a bright inquiring mind should he act thus, on first witnessing his own.

We once had a tame canary bird, who was allowed his liberty in the room with us, and seemed much to enjoy amusing himself in various ways: sitting upon the head, and pulling at our hair—or picking at a crumb held towards him in the mouth, while he rested on our shoulder. But one of his greatest delights appeared to be the gazing at himself in the looking glass. The first time he saw his reflection, there is no doubt he took it for another bird. When however this conclusion proved unsatisfactory, he would often cling for a long time, to the edge of the lower part of the frame, and there entertain himself by "making faces" as children would say—twisting his pretty little head back and forth, right and left, opening his mouth, gaping and squirming his beak about in a manner exceedingly droll. Now, was this done "just for fun?" Or was it in part to test the matter, as the kitten did, in some measure to solve the mystery?

(To be continued.)

#### A Northern Sun-set.

Far away to the north, almost at the head of the Gulf of Bothnia, the river Lulea makes its way from the western or Swedish side into the gulf. At the mouth of this rugged stream stands the town of the same name, Lulea. As it lies nearly as far north as the arctic circle, the sun does not dip so much below the horizon in mid-summer as to cause a deeper darkness than a mild twilight. Thomas Shairp, who was there in the middle of the Seventh month, 1871, thus describes a sun-set he witnessed:

"Mjölkoberg [a hill near the town] is a bare rock of red granite, some ninety or a hundred feet high, rising directly out of a pine forest, which struggles to climb its inhospitable sides, but fails to find much footing in the hard and sterile stone. A devious and somewhat uncomfortable path winds from among the trees to the bald summit of the hill, whence may be obtained a glorious view of the surrounding country. Owing to the peculiar formation of the land on the sea-shore, which is intersected or indented with creeks and bays and gulfs in every imaginable manner, the mountain seems to be surrounded by an infinity of islands, itself forming one of an archipelago. Such, however, is not absolutely the case, although there are a great number of islets springing like oases in the desert, out of the brackish water of the Bothnian Gulf. Far away to the south you see the restless sea beating eternally the rock-bound coast; while on your right hand, over across the bay, the town seems hiding away from the fury of the waves, which in a great storm, such as often visits these shores, would dash almost over its entire area were it not protected by

higher land; while to the north you look over the interminable forests of pine which stretch for miles inland.

The sun has just gone down, dipped, as were, behind the forest, and great sheets of effulgent crimson stretch up to the highest extent of the vast ethereal concavity, the brightness brilliantly reflected on the sparkling water, and even repeated on the far-opposite horizon, until earth, sky, and water all seem one mass of ruby, bright and lustrous. To appreciate the beauty of sun-sets, such as one sees up in these northern latitudes, one must actually witness them—description cannot convey so vivid a picture to the mind's eye. They have, moreover, this charm—the while further in the south a sun-set, however grand, is seen for but half an hour at the most here they linger on for one, two, or three hours, and are only succeeded by the more brilliant, although not so gorgeous effect produced by the rising again of the great luminary of day.

Much is thought of the midnight sun, and travellers who happen to have seen it imagine that they have beheld one of the most beautiful effects that nature can produce. But it is a mistake. There are none of those grand and glorious tints cast upon the heavens when the sun is above the horizon, which appear when he has descended below. The sun at midnight is no doubt curious, and a thing worth a long journey to see; but for beautiful tints and glorious mysterious colorings, such as delight an artist, at the same time as they fill him with wonder, nothing can compare with a Lapland sun-set."—*Up in the North.*

*Faith.*—A late king of Sweden was, it seems under serious impressions for some time before his death. A peasant being once, on a particular occasion, admitted to his presence, the king, knowing him to be a person of singular piety, asked him what he took to be the true nature of faith. The peasant entered deeply into the subject, and much to the king's comfort and satisfaction. The king at last, lying on his death bed, had a return of his doubts and fears as to the safety of his soul; and still the same question was perpetually in his mouth to those about him, "What is real faith?" His attendants advised him to send for Archbishop Upsal; who, coming to the king's bedside, began in a learned, logical manner to enter into the scholastic definition of faith. The prelate's disquisition lasted a hour. When he had done, the king said, with much energy, "All this is ingenious, but not comfortable; it is not what I want. Nothing after all, but the farmer's faith will do for me." So true is that observation, that religion is a plain thing; and indeed it wants no metaphysical subtleties, no critical disquisitions, no laborious reasonings, to set it in clear light.—*Buck's Anecdotes.*

*Birds' nests.*—*Selection of site.*—On leaving Sontuli, the road led over mountain pasture and through woods of the evergreen oak draped from top to bottom with the green moss-like *Tullandsia*, which hung in long festoons from every branch, and was wound around the trunks, like garlands, by the wind the larger masses, waving in the breeze, hung down for four or five feet below the branches. The small birds build in them, and they form excellent hiding-places for their nests, where they are tolerably secure from the attacks of

numerous enemies. I had often, when in the tropics, to notice the great sagacity or instinct of the small birds in choosing places for their nests. So many animals: monkeys, wild-cats, racoons, opossums, and tree-rats, are constantly prowling about, looking out for eggs and young birds, that, unless placed with great care, their progeny would almost certainly be destroyed. The different species of Oropendula or Orioles (*Icteridae*) of tropical America choose high, smooth-barked trees, differing apart from others, from which to hang their pendulous nests. Monkeys cannot get at them from the tops of other trees, and a predatory mammal attempting to ascend the smooth trunks would be greatly exposed to the attacks of the birds armed, as they are, with strong sharp-pointed beaks. Several other birds in the forest suspend their nests from the small but tough air roots that hang down from the epiphytes growing on the ranches, where they often look like a natural bunch of moss growing on them. The various prickly bushes are much chosen, especially the bull's-horn thorn, which I have already described. Many birds hang their nests from the extremities of the branches, and a safer place could hardly be chosen, as with the sharp thorns and the stinging ants that inhabit them no mammal would, I think, dare to attempt the ascent of the tree. Stinging ants are not only insects whose protection birds secure by building near their nests. A small parrot builds constantly on the plains in a hole made in the nests of the termites, and a species of fly-catcher makes its nest alongside of that of one of the wasps. On the savannahs, between Coyapo and Nancital, there is a shrub with sharp curved prickles, called *Viena paraca*, (come here) by the Spaniards, because it is difficult to extricate oneself from its hold when the dress is caught: as one part is cleared another will be entangled. A yellow and brown fly-catcher builds its nest in these bushes, and generally places it alongside that of a banded wasp, so that with the prickles and the wasps it is well guarded. I witnessed, however, the death of one of the birds from the very means it had chosen for the protection of its young. Darting hurriedly out of its domed nest as we were passing, it was caught just under its bill by one of the curved hook-like thorns, and in trying to extricate itself got further entangled. Its fluttering disturbed the wasps, who flew down upon it, and in less than a minute stung it to death. We tried in vain to rescue it, for the wasps attacked us also, and one of our party was severely stung by them. We had to leave it hanging up dead in front of its nest, whilst its mate flew round and round screaming out terror and distress. I find that other travellers have noted the fact of birds building their nests near colonies of wasps for protection. Thus, according to Gosse, the grassquit of Jamaica (*Spermophila olivacea*) often selects a shrub on which wasps have built, and fixes the entrance to its domed nest close to their cells; and Prince Maximilian Neuwied states in his "Travels in Brazil," that he found the curious purse-shaped nest of one of the Todies constantly placed near the nests of wasps, and that the natives informed him that it did so to secure itself from the attacks of its enemies. I should have thought that when building their nests they would be very liable to be attacked by the wasps. The nests placed in these positions appear always to be domed, probably for

security against their unstable friends.—*Belt's Naturalist in Nicaragua.*

*Anecdote of Richard Jordan.*—In the prosecution of a religious visit, it happened that a minister who entertained a diffident opinion of herself, expected to pass through a part of the country, in which another who was noted for his much speaking had just been holding large crowded meetings. She apprehended that her services would be regarded with little esteem by those who measured ministry according to the number of words—and felt some discouragement at the prospect. On mentioning it to R. Jordan, he remarked, that a little with the Master's blessing would feed multitudes, but without that it required wagon loads.

## THE FRIEND.

SIXTH MONTH 13, 1874.

Desirous of doing no injustice to Augustine Jones, whose Discourse on the Principles, Methods, and History of the Society of Friends we noticed in our fortieth number, we comply with his request to publish the following from his pen. After reciting a part of our editorial he says:

"The words in the essay which are subjected to this criticism are these. 'But they [Friends] admitted three manifestations of one person. Therefore Jesus Christ, Christ-within, the Spirit and God, referred to the same person.'

It was intended to express in those words, 'that the Father, the Word, and the Holy Spirit are one, in divine being inseparable, one true, living, and eternal God blessed forever,' 'one essence,' 'one substance,' 'one nature,' 'one will,' 'one life,' 'one wisdom,' 'one power.'

Elisha Bates used the word *manifestations* in the same connection. He says 'I do not consider it proper to enter upon an inquiry into the Divine Nature or how it subsisted in its *different manifestations*.'—*Doctrines of Friends*, p. 115.

We find in Scripture that the Father, the Word and the Holy Spirit were and are manifested. 'God was manifested in the flesh,' 1 Tim. iii. 16. 'For this purpose the Son of God was manifested that he might destroy the works of the devil,' 1 John, iii. 8. 'But the manifestation of the Spirit is given to every man to profit withal,' 1 Cor. xii. 7.

The same word in the original is used in each of these texts, and its meaning is to manifest, bring to light, disclose, show forth, make known, reveal. The writer means probably Socinus and not Socinius.

Socinus taught that the Trinity was a pagan doctrine, and that Christ was a *created and inferior being* who had no existence before he was conceived by the Virgin Mary. And the Hicksites teach substantially the Socinian doctrines.

But the words of the essay do not admit of such construction; on the contrary they inculcate the doctrine of three revelations of the same being. The Father, the Word, and the Holy Spirit, one God blessed forever. That Christ was 'the Lamb slain from the foundation of the world,' who has been 'in every man of every capacity in every age of the world.'

The essay takes issue also with another error of the Hicksites respecting the authority of the Scriptures. It says 'the infallible Scripture is not contradicted.' Therefore, for these and other reasons *I must decline a place among the Hicksites.* I was a little surprised at this criticism from 'The Friend,' as only the week before I found my views excellently well stated in what I thought to be an editorial, in the issue of 5th mo. 16, 1874, pages 311, 312."

Again we object to what the author here says "the words of the essay" inculcate, as falling short of declaring what Friends believe on the points referred to, viz: "They inculcate the doctrine of three revelations of the same being, The Father, the Word, and the Holy Spirit, one God blessed forever. That Christ was 'the Lamb slain from the foundation of the world' who has been in every man of every capacity in every age of the world."

It is true that the three are one God, blessed forever; but Friends never believed the Three were mere *revelations* or *manifestations* of the triune God. They have always believed and taught there is a distinction between the Father, the Word, and the Holy Spirit, but have refused to depart from the language of Scripture in which the Holy Spirit has expressed that distinction and oneness, because the hypostatic union is beyond the comprehension of the finite powers of man.

Thus George Fox says "We believe concerning God the Father, Son and Spirit according to the testimony of Holy Scripture, which we receive and embrace as the most authentic and perfect declaration of Christian faith—being indited by the Holy Spirit of God that never errs. First, That there is one God and Father, of whom are all things. Secondly, That there is one Lord Jesus Christ, by whom all things were made; who was glorified with the Father before the world began, who is God over all blessed forever: that there is one Holy Spirit, the promise of the Father and the Son, the Leader, and Sanctifier, and Comforter of his people. And we further believe, as the Holy Scriptures soundly and sufficiently express, that these three are One, even the Father, the Word and the Spirit." This is very different from their being merely three revelations or manifestations. The latter part of the paragraph we have quoted is true in itself, but it does not set forth the belief of Friends on the points at issue, viz: the Atonement and Deity of Christ.

It is true that Christ is "the Lamb slain from the foundation of the world." That is, as the Apostle declares, "Who verily was foreordained before the foundation of the world, but was manifest in these last times for you," the believers, who were redeemed "with the precious blood of Christ, as of a Lamb without blemish and without spot." This redeeming sacrifice, the propitiation for the sins of the whole world, Friends have always believed was made when Jesus Christ was crucified without the gates of Jerusalem, and "bore our sins in his own body on the tree, that we being dead to sins should live unto righteousness; by whose stripes we are healed." It is true that a measure of the Holy Spirit, or Spirit of Christ is vouchsafed to every rational being to profit withal; but not as it was in Jesus Christ, who was God himself manifest in the flesh, having the God-head dwelling in him bodily; not merely a *manifestation* or *revelation* of the Holy Spirit,

as it is mercifully granted unto us. William Penn thus expresses the faith of Friends on this point.

"They never said that every divine illumination or manifestation of Christ in the hearts of men was whole God, Christ, or the Spirit, which might render them guilty of that gross and blasphemous absurdity, some would fasten upon them: but that God, who is light, or the Word, Christ, who is light, styled the second Adam, the Lord from Heaven, and the quickening Spirit, who is God over all, blessed forever, hath enlightened mankind with a measure of saving light; who said, I am the light of the world, and they that follow me shall not abide in darkness, but have the light of life. So that the illumination is from God, or Christ the Divine Word; but not therefore that whole God or Christ is in every man, any more than the whole sun or air is in every house or chamber. There are no such harsh and unscriptural words in their writings. It is only a frightful perversion of some of their enemies, to bring an odium upon their holy faith. Yet in a sense the Scriptures say it; and that is their sense, in which only they say the same thing. I will walk in them and dwell in them. He that dwelleth with you shall be in you. I will not leave you comfortless, I will come to you. I in them and thou in me. Christ in us the hope of Glory. Unless Christ be in you, ye are reprobates." Works, vol. ii, p. 780.

In like manner Robert Barclay after speaking of "a measure of Divine and glorious Life" being in all men, as a seed, continues:

"This is that Christ within which we are heard so much to speak and declare of, every where preaching him up and exhorting people to believe in the light and obey it, that they may come to know Christ in them to deliver them from all sin.' 'But by this we do not at all intend to equal ourselves to that holy man, the Lord Jesus Christ, who was born of the Virgin Mary, in whom all the fulness of the Godhead dwelt bodily; so neither do we destroy the reality of his present existence, as some have falsely calumniated us. For though we affirm that Christ dwells in us, yet not immediately but mediately, as He is in that seed which is in us: whereas He, to wit, the eternal Word which was with God, and was God, dwelt immediately in that holy man. He then is as the head, and we as the members. He the vine, and we the branches.'"—p. 137, 139.

On reading over the editorial of 5th mo. 16th, we can discover nothing that conveys views similar to those we have objected to in the "Discourse" as misrepresenting the belief of Friends.

#### SUMMARY OF EVENTS.

**FOREIGN.**—Party spirit runs high in France, and the political situation is considered critical. On the 4th inst. the electoral bill passed to a second reading by a vote of 393 to 318, notwithstanding the earnest opposition of the Republican members.

The Right Centre has issued a programme drawn up by the Duke de Broglie and others, favoring the immediate organization of the powers of President MacMahon for the continuance of the term of the President of the Republic and the maintenance of a political truce until the end of the present seven years' term; or in the event of the occurrence of a vacancy in the Presidency in the mean time.

The Republicans demand the proclamation of a definite republic, or a dissolution of the Assembly and the election of new members. They are also taking measures to warn the people against the designs of the Bonapartists. Documents exposing the sophistries and

recounting the fatal history of the imperialist party, will be thoroughly circulated in Paris and the provinces.

A Paris dispatch of the 8th says: The proposal for the dissolution of the Assembly has been signed by 125 Deputies, who have hopes of securing in addition the signatures of 195 members forming the Left Centre. The motion for dissolution will be presented in the Chamber at the earliest opportunity.

A Madrid dispatch of the 7th says: The *Gaceta* publishes a circular addressed by the Minister of Foreign Affairs to the diplomatic representatives of Spain. It promises the re-establishment of peace in Spain and Cuba, and when the present exceptional condition of affairs is terminated, the complete establishment of representative institutions will become a guarantee of moral order.

A Bayonne dispatch of the 7th says: Don Carlos has issued a decree authorizing the provinces now occupied by his forces to elect members of a council, which is to personally attend him in Spain. The Carlist troops are concentrating at Tudela to save Estella, and Concha is moving to attack them.

The recent military operations in the north of Spain have not been attended with any important results. San Sebastian was attacked by the Carlists, but reinforcements arrived in time to prevent its capture. San Vicenti Tarragona, was also attacked by them, but the assailants were repulsed.

Five hundred convicts who were engaged in the rebellion at Cartagena, have been embarked on a Spanish steamer at Oran, to be taken back to Spain. Over \$200,000 worth of money and other valuables were found in their possession.

The Bank of England rate of discount has been reduced from 3½ to 3 per cent. Loans are made at the Stock Exchange and in open market at still lower rates.

The labor troubles in England continue. The owners of the Durham collieries are evicting large numbers of their tenants who were working miners. Many of these being unable to find other dwellings are camping in the fields with their families.

The House of Commons has adopted the proposition of the Disraeli ministry that the public houses in London shall be kept open on week days from 7 o'clock in the morning until half an hour after midnight.

The House also, by a vote of 382 against 42, approved the government's proposal that such houses shall be open on the same days in towns having over 2500 inhabitants, from 7 A. M. to 11 P. M., and in towns of a less number of people from 6 A. M. to 10 P. M.

Some anxiety was felt in London on account of the unexplained disappearance of the Earl of Yarborough, who had been missing for a number of days. It is alleged that the Earl makes free use of intoxicating drinks.

London, 6th mo. 8th.—U. S. six per cent bonds, 108½; fives, 104½.

Liverpool.—Uplands cotton, 8½d.

The Catholic Episcopate of Bohemia has determined to resist the ecclesiastical laws of the Austrian empire. A Vienna dispatch reports an extensive inundation in the province of Banat and elsewhere in Hungary. Many villages have been swept away.

The Khedive of Egypt has entered upon the negotiation of commercial treaties with foreign powers independently of Turkey.

It is expected that the Czar Alexander will visit the Emperor of Germany, at Ems, the present month.

A dispatch from Bombay says that the wet season has fairly set in. The rains are heavy and there is much rejoicing at their prospective beneficial effect upon the crops.

An International Conference to discuss measures to prevent the spread of cholera, and for the regulation of quarantines, and to study the causes of that disease, was to meet in Vienna on the 15th inst. All the European powers have accepted invitations to send delegates.

**UNITED STATES.**—The nomination of General Bristow as Secretary of the Treasury, was promptly and unanimously confirmed by the Senate. That of the ex-Secretary, Judge Richardson, as Associate Justice of the Court of Claims, was not so well received, but was finally confirmed by a small majority.

President Grant has distinctly announced his opposition to any further increase of the paper circulation, and his desire that early measures should be taken for the restoration of a sound currency. It is understood that the new Secretary of the Treasury is in entire accord with the President's views on this subject.

The House of Representatives, by a vote of 159 to 55, has passed a bill reported by the Judiciary Committee in relation to courts and Judicial officers in Utah, the design of which is to render effective the provisions of

the common law against polygamy. Those who practise polygamy or believe in the rightfulness of the same are to be excluded from juries in cases arising under the operation of the law referred to. The House has also passed the bill for the admission of Colorado as State.

The National Convention of Brewers was recently in session at Boston. A number of statistical facts were put forth to show the great industrial importance of the brewing business. The number of barrels of fermented liquors brewed and sold in the United States during 1873, was 8,910,823, being an increase over 1872 of 910,854 barrels. The capital in breweries was stated to be about \$89,891,000, in maltings \$16,708,000. Land under cultivation for barley 1,113,853 acres, and for hops 40,099 acres.

The interments in New York city last week numbered 489, and in Philadelphia 264, including 55 consumption and inflammation of the lungs, 14 marasmus, and 10 drowned.

The suffering from the overflow has abated on the lower Mississippi, but is still severe in Atchafalaya, Lafourche, and Wachita valleys. On the 8th inst. the New Orleans relief committee was still issuing 40,000 daily rations.

**The Markets, &c.**—The following were the quotation on the 8th inst. *New York.*—American gold, 110½ U. S. sixes, 1881, registered, 116; do. coupons, 121; do. 1868, registered, 116½; coupons, 120; 5 per cents, registered and coupon, 113½ a 113¾. Superfine flour, \$4.8 a \$5.45; State extra, 26 a \$6.30; finer brands, \$7. \$10.25. No. 1 Chicago spring wheat, \$1.48; No. 2 do. \$1.43; No. 3, \$1.41; red western, \$1.56; white Michigan \$1.70. Canada barley, \$2.10. Oats, 62 a 69 cts. Rye \$1.07. Western mixed corn, \$1 a 83 cts.; white, 87. 89 cts. *Philadelphia.*—Cotton, 18½ a 19 cts. for upland and New Orleans. Superfine flour, \$4.75 a \$5.50; extras \$5.50 a \$6; finer brands, \$6.50 a \$10.25. Western red wheat, \$1.40 a \$1.48; Pennsylvania do., \$1.50 a \$1.55 amber, \$1.57; white spring, \$1.45. Rye, 95 cts. Yellow corn, 78 cts. Oats, 60 a 64 cts. Lard, 11½ a 11 cts. Sales of 2500 beef cattle, Common at 5 a 6 cts. per lb. gross; fair and extra, 6 a 7 cts., and a few choice at 7 cts. About 8000 sheep sold at 5 a 6½ cts. per lb. gross and 5000 hogs at \$8 a \$8.50 per 100 lb. net. *Baltimore.*—Superfine flour, \$4.50 a \$5.25; extra, \$5.50 a \$6.25 finer brands, \$7 a \$10. Choice white wheat, \$1.64 fair to prime do., \$1.50 a \$1.60; Penna. red, \$1.50 a \$1.60; western spring, \$1.35 a \$1.40. *Chicago.*—No. 1 spring wheat, \$1.20½; No. 2 do., \$1.19; No. 3 do. \$1.14 No. 2 mixed corn, 58 cts. No. 2 oats, 45 cts. Rye \$5 cts. Lard, \$10.90. *St. Louis.*—No. 3 red wheat \$1.25; No. 2 spring, \$1.01. No. 2 mixed corn, 57 cts No. 2 oats, 45½ cts. Lard, 10¾ cts. *Cincinnati.*—Wheat, \$1.27 a \$1.30. Corn, 65 a 67 cts. Oats, 50 a 51 cts. Rye, 98 cts. a \$1.

#### WESTTOWN BOARDING SCHOOL.

A Stated Meeting of the Committee having charge of the Boarding School at Westtown, will be held there on Fourth-day, the 17th inst., at 9.30 A. M.

The Committee on Admission will meet at 7.30 the same morning, and that on Instruction at 7 o'clock the preceding evening.

The Visiting Committee attend at the School on Seventh-day the 13th inst.

SAMUEL MORRIS,

Philada. 6th mo. 8th, 1874.

Clerk.

For the accommodation of the Committee conveyances will be at the Street Road Station to meet the trains that leave Philadelphia on Seventh-day, the 13th inst. at 2.30 and 4.45 P. M., on Third-day, the 16th, at 10 A. M., and 2.30 and 4.45 P. M., and on Fourth-day at 7.25 A. M.

#### HAVERFORD COLLEGE.

The next Term will commence on Fourth-day, 9th mo. 2nd, 1874. Applications for admissions should be addressed to SAMUEL J. GUMMERE, President, Haverford College, Montgomery Co., Pa.

#### THEATRICAL AMUSEMENTS AND HORSE-RACING.

A new edition of the above named Address has been struck off and is now at Friends' Book Store, No. 304 Arch street.

Friends in the country can obtain whatever number of copies may be needed for distribution in their respective neighborhoods.

WILLIAM H. PILE, PRINTER.

The Heart of Africa, by Dr. Schweinfurth.

(Continued from page 341.)

PYGMIES.

The ancient Greek writers refer to a race of pygmies occupying Central Africa; and as our author slowly ascended the Nile, his servants often conversed about such a race of men as still existing. His curiosity became much excited, but it was not till he reached the court of Munza, that an opportunity presented of seeing for himself that such a race were to be found. He thus describes his intercourse with them: "Several days elapsed after my taking up my residence by the palace of the Monbuttoo king without my having a chance to get a view of the dwarfs, whose name had so keenly excited my curiosity. My people, however, assured me that they had seen them. I remonstrated with them for not having secured me an opportunity of seeing for myself, and for not bringing them into contact with me. I obtained no other reply but that the dwarfs were too timid to come. After a few mornings my attention was arrested by a shouting in the camp, and I learned that Mohammed had surprised one of the Pygmies in attendance upon the king, and was conveying him, in spite of a strenuous resistance, straight to my tent. I looked up, and there, sure enough, was the strange little creature, perched upon Mohammed's right shoulder, nervously hugging his head, and casting glances of alarm in every direction. Mohammed soon deposited him in the seat of honor. A royal interpreter was stationed at his side. Thus, at last, was I able veritably to feast my eyes upon a living embodiment of the myths of some thousand years!

Eagerly, and without loss of time, I proceeded to take his portrait. I pressed him with innumerable questions, but to ask for information was an easier matter altogether than to get an answer. There was the greatest difficulty in inducing him to remain at rest, and I could only succeed by exhibiting a store of presents. Under the impression that the opportunity before me might not occur again, I bribed the interpreter to exercise his influence to pacify the little man, to set him at his ease, and to induce him to lay aside any fear of me that he might entertain. Altogether

we succeeded so well that in a couple of hours the Pygmy had been measured, sketched, feasted, presented with a variety of gifts, and subjected to a minute catechism of searching questions.

His name was Adimokoo. He was the head of a small colony, which was located about half a league from the royal residence. With his own lips I heard him assert that the name of his nation was Akka, and I further learnt that they inhabit large districts to the south of the Monbuttoo between lat. 2° and 1° N. A portion of them are subject to the Monbuttoo king, who, desirous of enhancing the splendor of his court by the addition of any available natural curiosities, had compelled several families of the Pygmies to settle in the vicinity.

My Niam-niam servants, sentence by sentence, interpreted to me everything that was said by Adimokoo to the Monbuttoo interpreter, who was acquainted with no dialects but those of his own land.

In reply to my question put to Adimokoo as to where his country was situated, pointing towards the S.S.E., he said, 'Two days' journey and you come to the village of Mummery; on the third day you will reach the River Nalobe; the fourth day you arrive at the first of the villages of the Akka.'

'What do you call the rivers of your country?'

'They are the Nalobe, the Namerikoo, and the Eddoopaa.'

'Have you any river as large as the Welle?'

'No; ours are small rivers, and they all flow into the Welle.'

'Are you all one people, or are you divided into separate tribes?'

To this inquiry Adimokoo replied by a sudden gesture, as if to indicate the vastness of their extent, and commenced enumerating the tribes one after another.

'How many kings?' I asked. 'Nine,' he said.

At length, after having submitted so long to my curious and persistent questionings, the patience of Adimokoo was thoroughly exhausted, and he made a frantic leap in his endeavor to escape from the tent. Surrounded, however, by a crowd of inquisitive Bongo and Nubians, he was unable to effect his purpose, and was compelled, against his will, to remain for a little longer. After a time a gentle persuasion was brought to bear, and he was induced to go through some of the characteristic evolutions of his war-dances. He was dressed, like the Monbuttoo, in a rokko-coat and plumed hat, and was armed with a miniature lance as well as with a bow and arrow. His height I found to be about 4 feet 10 inches, and this I reckon to be the average measurement of his race.

Although I had repeatedly been astonished at witnessing the war-dances of the Niam-niam, I confess that my amazement was greater than ever when I looked upon the

exhibition which the Pygmy afforded. Adimokoo's agility was perfectly marvellous, and I could not help wondering whether cranes would ever be likely to contend with such creatures. The little man's leaps and attitudes were accompanied by such lively and grotesque varieties of expression that the spectators shook again and held their sides with laughter.

Adimokoo returned home loaded with presents. I made him understand that I should be glad to see all his people, and promised that they should lose nothing by coming. On the following day I had the pleasure of a visit from two of the younger men.

After they had once got over their alarm, some or other of the Akka came to me almost every day. As exceptional cases, I observed that some individuals were of a taller stature; but upon investigation I always ascertained that this was the result of intermarriage with the Monbuttoo amongst whom they resided. My sudden departure from Munza's abode interrupted me completely in my study of this interesting people, and I was compelled to leave before I had fully mastered the details of their peculiarities. I regret that I never chanced to see one of the Akka women, and still more that my visit to their dwellings was postponed from day to day until the opportunity was lost altogether.

I am not likely to forget a *rencontre* which I had with several hundred Akka warriors, and could very heartily wish that the circumstances had permitted me to give a pictorial representation of the scene. King Munza's brother Mummery, who was a kind of viceroy in the southern section of his dominions, and to whom the Akka were tributary, was just returning to the court from a successful campaign against the black Momvoo. Accompanied by a large band of soldiers, amongst whom was included a corps of Pygmies, he was conveying the bulk of the booty to his royal master. It happened on the day in question that I had been making a long excursion with my Niam-niam servants, and had heard nothing of Mummery's arrival. Towards sunset I was passing along the extensive village on my return to my quarters, when, just as I reached the wide open space in front of the royal halls, I found myself surrounded by what I conjectured must be a crowd of impudent boys, who received me with a sort of bravado fight. They pointed their arrows towards me, and behaved generally in a manner at which I could not help feeling somewhat irritated, as it betokened unwarrantable liberty and intentional disrespect. My misapprehension was soon corrected by the Niam-niam people about me. 'They are Tikkitikki,' said they; 'you imagine that they are boys, but in truth they are men; nay, men that can fight.'

A brief account may now be given of the little Pygmy that I carried off and kept with me during the remainder of my wanderings till I was again in Nubia, who for a year and

a half became my companion, thriving under my care and growing almost as affectionate as a son.

Notwithstanding all my assiduity and attention, I am sorry to record that Nsewue died in Berber, from a prolonged attack of dysentery, originating not so much in any change of climate, or any alteration in his mode of living, as in his immoderate excess in eating, a propensity which no influence on my part was sufficient to control.

During the last ten months of his life, my *protege* did not make any growth at all. I think I may therefore presume that his height would never have exceeded 4 feet 7 inches, which was his measurement at the time of his death."

The Akka appear to be a branch of a series of dwarf races, which exhibit all the characteristics of an aboriginal stock, and extend along the equator entirely across Africa. They are probably closely allied to the Bushmen of South Africa.

### On Dress.

For "The Friend."

That devoted and faithful laborer in the Church of Christ, Sarah Grubb, writes thus: "From a fear of being instrumental in settling down young people especially, in the form of godliness without the power, and urging them to an appearance which might create self-complacence, and reconcile them to an apprehension that they are further advanced in the work of religion than is really the case, I have often forborne to drop such advice upon the subject of *dress* amongst those who were *inconsistent in their appearance*, as sometimes I felt the *testimony of Truth to dictate*; a departure from true simplicity herein being generally obvious. At large meetings particularly, where Friends from distant parts are collected, there is a *considerable appearance of inconsistency in clothing and demeanor which, with many other things, indicate a love of the world and a fellowship with it, but though a regulation herein is only a small part of the good tree, yet it is as assuredly a part, as the more striking constituents of a Christian.*" What will our young, fiery, Arminian Quakers reply to that.

Thos. Shillitoe relates an account of a young man, a member of the Society, appearing before a judge, in England, refused the oath, (as by the laws of England Friends only were allowed an affirmation), questioned whether a person fashionably attired could be one, when being assured thereof, he remarked: "*The time was when those people were known by their dress, but that it appeared no longer to be so.*" But alas! it is no longer with us as it was with Thos. Elwood at his first conviction (who as yet had not conformed to the simple plain dress), being taken at a meeting of Friends, and having on a fashionable mountaineer cap, was more hurt to hear the people remark, "They would warrant he was no Quaker," than he cared about imprisonment; nevertheless, "the tree is known by its fruit." O that the spirit of our predecessors may be revived, who were not ashamed of, but gloried in that cross by which they were crucified to the world and the world to them, for it is as we are faithful in these matters, that we shall grow stronger and stronger; but if we are unfaithful in small matters we shall not be accounted worthy of more. It is only as we pay attention to the drawings of the Spirit of Christ in our own hearts that we can be

Christ's, and he will prove us and try us, and eventually give us to sit with him in the heavenly places; yet only so as we are weaned as from the breast of the world, and our hearts and affections given up to him, to mould us and fashion us after his blessed self. We cannot serve two masters, we cannot be of the world and of Christ too; if we love the world and the ways of it, we cannot love him who came to redeem us therefrom. What if the world hate us, we shall be loved of God. To be esteemed by the Saviour, and to be permitted to lean on his bosom, is worth more than this world can give us. Let us be like Moses, who preferred the reproach of Christ much beyond all the riches and grandeur of Egypt. Moses never could have been the deliverer of Israel if he had not first refused to be called the son of Pharaoh's daughter, and cast his lot with the Lord's oppressed people; neither can any be valiant for Christ now, only as they thoroughly decide to manifest by all their actions that they are his; and I am not without hopes that the Lord will prepare a people, by whom the truth shall arise and spread, even as the orb of day dispels the darkness of the night, yet only so as we are made willing to give up all for his sake, and to be by a vain professing people, accounted as fools for Christ's sake; there is certainly a shaking in Babylon, she must fall, for the Lord hath said it. S. C.

For "The Friend."

### Sufferings of a Lost Man.

(Concluded from page 338.)

The melancholy narrative proceeds: "At 'Town Falls,' I spent the first half of a day in capturing a grasshopper, and the remainder in a fruitless effort to catch a mess of trout. In the agony of disappointment, I resolved to fish no more. A spirit of rebellion seized me. 'Why is it,' I asked of myself, 'that in the midst of abundance, every hour meeting with objects which would restore strength and vigor and energy, every moment contriving some device to procure the nourishment my wasting frame required, I should meet with these repeated and discouraging failures?' Thoughts of the early teachings of a pious mother suppressed these feelings. Oh! how often have the recollections of a loved New England home, and the memories of a happy childhood, cheered my sinking spirits, and dissipated the gathering gloom of despair! There were thoughts and feelings and mental anguishes without number, that visited me during my period of trial, that never can be known to any but my God and myself. Bitter as was my experience, it was not unrelieved by some of the most precious moments I have ever known."

Soon after leaving "Town Falls," Everts entered the open country. Pine forests and fallen timber were changed for sage brush and desolation, with occasional tracts of stunted verdure, barren hill-sides, and ravines filled with the rocky *debris* of the adjacent mountains. Rising one morning he found the ground white with snow, and the air filled with the falling flakes. He became bewildered and lost the course of travel. Nothing remained for him but to find the river and follow its current. After a few hours of stumbling and serambling among rocks he came to the side of the deep cañon through which

it ran, and with great difficulty descended to the margin. After drinking copiously he sat beside the river a long while, waiting for the storm to abate so that he could make a fire. Finally he concluded to return to the place he had spent the previous night, where he found a few embers in the ashes, and with persevering effort at last kindled a flame. Here, on this bleak mountain side, he thought he must have passed two nights beside the fire in the storm. Many times during each night, he crawled to the little clump of trees to gather wood and brush, and the broken limbs of fallen tree-tops. Before leaving the forest he had filled his pouches with thistle roots, knowing that he should not find any of them in the open country, and these formed the whole of his subsistence during the remainder of his wanderings. A few more days of anxiety and extreme suffering succeeded when at last, on the thirty-seventh day since he lost the exploring party, he was found by two men who were in search of him. The occurrences of the day of rescue must be given in Evert's own words. He says: "I resumed my journey the next morning, with the belief that I should make no more fires with my lens. I must save a brand, or perish. The day was raw and gusty; an east wind charged with storm, penetrated me with irritating keenness. After walking a few miles the storm came on, and a coldness unlike any other I had ever felt seized me. It entered all my bones. I attempted to build a fire but could not make it burn. Seizing a brand, I stumbled blindly on, stopping within the shadow of every rock and clump to renew energy for a final conflict for life. A solemn conviction that death was near, that at each pause my limbs would refuse further service and that I should sink helpless and dying in my path, overwhelmed me with terror. Amid all this tumult of the mind, I felt that I had done all that man could do. I knew that in two or three days more I could effect my deliverance, and I derived no little satisfaction from the thought, that, as I was now in the broad trail, my remains would be found, and my friends relieved of doubt as to my fate. Once only the thought flashed across my mind that I should be saved, and I seemed to hear a whispered command to 'struggle on.' Groping along the side of a hill, I became suddenly sensible of a sharp reflection, as of burnished steel. Looking up, through half closed eyes two rough but kindly faces met my gaze.

'Are you Mr. Everts?'

'Yes; all that is left of him.'

'We have come for you.'

'Who sent you?'

'Judge Lawrence and other friends.'

'God bless him and them, and you! I am saved!' and with these words, powerless of further effort, I fell forward into the arms of my preservers, in a state of unconsciousness. I was saved. On the very brink of the river which divides the known from the unknown strong arms snatched me from the final plunge and kind ministrations wooed me back to life.

Baronet and Priclette, my two preservers by the usual appliances, soon restored me to consciousness, made a camp on the spot, and while one went to Fort Ellis, a distance of seventy miles, to return with remedies to restore digestion, and an ambulance to convey me to that post, the other sat by my side, and with all the care, sympathy, and solicitude of a brother, ministered to my frequent necessi-

ies. In two days I was sufficiently recovered in strength to be moved twenty miles down the trail to the cabin of some miners who were prospecting in that vicinity. From these men I received every possible attention which their humane and generous natures could devise. A good bed was provided, game was killed to make broth, and the best stores of their larder placed at my command. For four days, at a time when every day's labor was invaluable in their pursuit, they abandoned their work to aid in my restoration. Owing to the protracted inaction of the system, and the long period which must transpire before Prichette's return with remedies, my friends had serious doubts of my recovery.

The night after my arrival at the cabin, while suffering the most excruciating agony, and thinking that I had only been saved to lie among friends, a loud knock was heard at the cabin door. An old man in mountain costume entered—a hunter, whose life was spent among the mountains. He was on his way to find a brother. He listened to the story of my sufferings, and tears rapidly coursed each other down his rough, weather-beaten face. But when he was told of my present necessity, brightening in a moment, he exclaimed:

'Why, Lord bless you, if that is all, I have the very remedy you need. In two hours' time all shall be well with you.'

He left the cabin, returning quickly with a sack filled with the fat of a bear which he had killed a few hours before. From this he rendered out a pint measure of oil. I drank the whole of it. It proved to be the needed remedy, and the next day, freed from pain, with appetite and digestion re-established, I felt that good food and plenty of it were only necessary for an early recovery.

In a day or two I took leave of my kind friends with a feeling of regret at parting, and of gratitude for their kindness, as enduring as life.

Meeting the carriage on my way, I proceeded to Boseman, where I remained among old friends who gave me every attention until my health was sufficiently restored to allow me to return to my home at Helena.

My heartfelt thanks are due to the members of the expedition, all of whom devoted seven, and some of them twelve days to the search for me before they left Yellowstone Lake; and to Judge Lawrence, of Helena, and the friends who co-operated with him in the offer of reward which sent Baronet and Prichette to my rescue.

My narrative is finished. In the course of events the time is not far distant when the wonders of the Yellowstone will be made accessible to all lovers of sublimity, grandeur and novelty in natural scenery, and its majestic waters become the abode of civilization and refinement; and when that arrives, I hope in happier mood and under more auspicious circumstances to revisit scenes fraught for me with such thrilling interest; to ramble along the glowing beach of Bessie Lake; to sit down among the hot springs under the shadow of Mount Everts; to thread unscared the mazy forests, retrace the dreary journey to the Madison Range, and with enraptured fancy gaze upon the mingled glories and terrors of the great falls and marvellous cañon, and to enjoy in happy contrast with the trials they recall, their power to delight, elevate, and overwhelm the mind with their wondrous and majestic beauty."

For "The Friend."

### Memoirs and Letters of Sarah Hillman.

(Continued from page 338.)

"7th mo. 2d, 1853. Oh! how few there are to whom we dare speak unreservedly in this day; really it does sink one's heart to see those we love, so ready to doubt the motives by which we are actuated, let us do as we may; however, one assurance comforts me, that 'the foundation of God standeth sure, having this seal, the Lord knoweth them that are his.' Let then our feeble endeavors for the promotion of the kingdom of our Blessed Redeemer, be judged of by criticizing, cavilling ones, who have little conception of the conflicts of our spirits, if we can only keep hold of the confidence that we have acted faithfully as in his sight (however feebly it may have been) we need not fear but that through mercy, support will be administered unto us, and strength according to our day.

Oh, would that everything that brings death might be purged away from our hearts individually, that we might become united together in the holy fear of the Lord, having one blessed point in view, that so the name of our Father in Heaven might be glorified in and amongst us; that that day might arrive, spoken of by the prophet, when 'Ephraim should not envy Judah, nor Judah vex Ephraim;' and nothing be found in all the Lord's holy mountain to hurt or destroy."

"Philada., 2d mo. 1st, 1853. \* \* \* Another champion for the blessed cause of truth and righteousness has ceased to lift up his voice among the sons of men. Will not some of the words spoken to and respecting dear Hinehman Haines, rise up again in remembrance in the minds of some, and cause bitter regret that an aged patriarch, who could say with Obadiah 'I, thy servant, fear the Lord from my youth,' should have one sleepless hour on account thereof? Oh, it would be well to remember that our Father in Heaven accepts what is done unto his children and servants, his poor, as done unto himself; inasmuch as ye did it, or did it not to one of the least of these my brethren, ye did or did not to Me. Sweetly and peacefully has he finished his course and joined the angelic throng around the mercy seat I have no doubt, in celebrating the praises of that God and Saviour whom he delighted to serve on earth, and who has honored him many times in the assemblies of his people, while he, dear man, could acknowledge 'I am all unworthy,' to thy name be the glory. He testified on one occasion lately the faith in which he had lived he hoped to die in; it was sufficient for him in life, and it would be sufficient in death. Oh, how tenderly were thy dear parents brought to my remembrance, as I sat and gazed upon his clay cold face. They have poured forth their souls together as water, thought I, for themselves and for Jerusalem's progeny, and now their work is finished, and they are together singing Alleluia, Alleluia!

The storm, methinks, has not spent its might, and the champions, valiant for the Truth, many of them, are called from the field. What remains for us to do? Ah, there is little any of us can do, but endeavor to watch unto prayer, and stand in readiness when the sound of the going is heard in the tops of the mulberry trees, to answer the call of the holy Captain who has a right to dispose of his servants as it pleaseth him, whether to remain as 'among the pots for a long season, or whether

to proclaim salvation. Perhaps the present dispensation through which our poor Society is passing, is as grievous as the time of Israel's bond service in Egypt; yet it is good to remember 'He (the Lord) brought them out of darkness and the shadow of death (when they cried unto him), and brake their bonds in sunder.'"

"Philada., 1st mo. 23d, 1854. \* \* \* It seems to me that the rich, and the great, and the wise of this world, are as much opposed to the simplicity of the truth as it is in Jesus, as they were in that day when our blessed Redeemer thanked his Father that he had hid the mysteries of the kingdom from them, and revealed them unto babes. And they would fain have a separate altar, and not mingle with any but the wise and great. Is he wealthy? Is he intellectual? or learned or talented, then we must keep caste. Well all this must die the death. The foundation of God standeth sure, having this seal affixed upon it, 'the Lord knoweth them that are his.' Oh, how precious is this seal. May it be fixed upon us, my dear friend, that with the apostle in holy confidence we may be enabled to say, 'Who shall separate us from the love of Christ?' even though we should have to suffer more than we have ever yet known; of being killed, as he said, all the day long, and accounted as sheep for the slaughter; if haply we may also be qualified to add as did the great apostle from living experience, 'in all these things we are more than conquerors through Him that loved us.'"

"Philada. 8th mo. 3d, 1854. \* \* How solemn are the sermons we daily meet; even many in a day. As Leighton says, the bill of mortality is truly very large. Though among our friends there is no sickness that I know of partaking of the nature of the epidemic.

'Leaves have their time to fall,  
And flowers to wither at the north wind's breath,  
And stars to set—but all,  
Thou hast all seasons for thine own, O Death!'

The poet's description is abundantly evinced in the experience of each one of us at this solemn season, when the Lord's voice is crying unto the city, and the men of wisdom will see his name. Oh, may we all hear the rod and Him who hath appointed it, that while his judgments are abroad in the earth the inhabitants of the world may learn righteousness; and thus by hearkening to the Lord's voice, as did the people of Nineveh, the threatening judgment may in mercy be averted, and many, many more be prepared to magnify the mercy of their dear Lord and Saviour, who bought us with his blood: even He who was spoken of by the loved disciple as 'the Lamb of God, who taketh away the sins of the world. Oh, how great is his goodness, how long-suffering his mercy! would that every precious soul might be brought unto His foot-stool, that we might obtain pardon and reconciliation with God the Father through him, and thus come to be numbered amongst the ransomed and redeemed ones, whose names are written in the Lamb's book of life.

No matter then how soon the tender thread of existence be severed, the life that never ends being secured, an inheritance among all them that are sanctified being obtained through grace. \* \* \* At seasons when it would seem as though faith would fail, it is good to bear in mind that 'our Redeemer is strong, the Lord of Hosts is his name; He will thoroughly plead the cause of his people,

and execute judgment for them, and although it may be long in coming, and many dark days of sorrow may precede, yet my heart is often comforted in mourning, from a little view of a better day to come. I may not live to see it, but it seems sealed upon my spirit that there shall come a time to the Lord's dear children when their garments of mourning shall be exchanged for those of gladness, and they shall sing with joy in their hearts of the dealings of the Lord with them, in the day when he led them as it were into darkness, but not into light.

It seems to me that dear ———, in his late trial, will be favored to see the hand of mercy. May it be sealed to his soul's salvation, and blessed to his house."

For "The Friend"

#### Scientific Notes.

At the border of the Lake of Geneva are observed occasional risings and sinkings of the water surface. These have been frequently studied at Geneva, and Vaucher (more especially in the beginning of the century) made a full investigation of the subject, in which he was led to the result that these variations are produced by changes in the air pressure, and so must occur in other lakes also. When at two different parts of the water-surface, the atmosphere pressure is different—when it diminishes at one part, while at another it remains unaltered or rises, the water at the former will rise, and at the latter it will sink. The time of the appearance of these changes, and their coincidence with sudden barometric variations harmonized perfectly with this explanation.

*Large Tunnels.*—The great tunnels in Germany have been all made for mining purposes. That at Freiberg is 24 miles long; the Ernst-August and Georg at Clausthal, 13½ and 10¾ miles, respectively; the Joseph II., at Schemnitz, 9¼ miles; the Rathschonberg, at Freiberg, 8 miles; the Mount Cenis, 7½ miles, which about completes the European list. In the United States, the Hoosac, in Massachusetts, is five miles long. The Sutro, in Nevada, for opening up the celebrated Comstock lode, although only four miles long, will, with its branches to the different mines, prove one of the most important in America. The Sierra Madre tunnel, at Black Hawk, commenced during the present year, will be 12 miles long.

*New Rubber Composition for Water-proofing.* John Macintosh, whose name is very familiar in connection with the use of water-proof fabrics, has recently patented a compound of India-rubber with carbon, which promises to be very useful. He mixes about four parts of carbon in a fine powder with one of caoutchouc. The mixture is accomplished by passing the materials through rollers heated to about 250°. These rollers are very powerful and fixed in strong bearings. They are provided with spiral cutters. The result is that the rubber will be cut, torn and masticated in contact with the dry carbon, and expelled from the delivering end of the machine in a hot, plastic, homogeneous mass, whence it may be conveyed to the feeding end, for a second and more complete treatment. It may then be applied directly to the surface of a textile fabric, such as canvass, by passing it under heavy pressure through heated rollers. By this process, the compound is forced into the interstices of the fabric, and so becomes as it were incorporated with it. The carbon

prevents the India-rubber from being affected by the heat of the summer sun, and tends to preserve it from the ordinary decomposing effects of the atmosphere.

*A new mode of noting the direction of the wind at any altitude.*—Waldner, Professor of Mathematics at Osthofen, Germany, while engaged in examining the solar spots some years ago, had his attention attracted to an immense number of small white particles, which suddenly came into view. He found that they were ice crystals or snow-flakes, floating like the clouds in aerial currents. In the lower part of the atmosphere there are suspended in the air particles of an organic nature, as may be seen by admitting a beam of sunlight into a darkened room. It is proposed by means of these floating matters to determine the direction and force of the wind at different altitudes on cloudless days, by simply adjusting a telescope so as to give a distinct vision at two, three or more thousand feet, and to note the direction and rapidity of the particles, which will then clearly be seen as they cross the field of view.

*The behavior of metals under strain.*—Serious weakness is often found in large masses of metals by what is termed internal strain. If a large iron casting is allowed to cool rapidly, the outer particles quickly become solid, and the crystallization of the interior particles is effected under the pressure and restraint of the solid exterior portions. The result is a degree of strain which often materially lessens the strength of the mass, and sometimes produces cracks in the casting. The same condition of things exists in a less degree even in wrought iron. Some time ago, steel rods, several inches in thickness were attempted to be used in the construction of a large bridge; but they were found to possess relatively but a small portion of the strength of the same steel cut into smaller bars. This subject has recently been investigated by Prof. Thurston, who finds the harder metals more affected by this source of weakness than the soft and ductile metals, probably because the particles of the latter more readily arrange themselves into such positions as to relieve the strain upon them. If a bar of metal is placed under the action of an external force, as the bearing of a heavy weight, some particles are more strained than others. If left in this condition the particles gradually shift positions, until the strain is equalized, and thus become capable of sustaining a pressure, which, if suddenly applied, would have broken the bar. On the other hand, serious loss of resistance is often the result of sudden strain, as that caused by blows.

*Vinegar-producing Polype.*—A present was lately made to the Jardin d'Acclimatation, in Paris, of a polype. The day after its introduction into the Aquarium it was found to have caused the death of all the animals around it. The explanation was had on analyzing the water of the vessel. The polype was one of those rare animals whose bodies, when immersed in pure water, change it into a solution of acetic acid.

Friendship, true friendship, is indeed a precious thing—a rare gem—hard to find. It is however, to be met with here below. It is unchangeable as the source from which it springs. Its value is equally known and appreciated in prosperity and in adversity.—*S. L. Grubb,*

#### BE OF GOOD CHEER—BE NOT AFRAID.

When the sky is dark and low'ring,  
And the tempest raging high,  
Billows swelling, breakers roaring,  
Christian, fear not—God is nigh.

Tossed amid the wild commotion,  
Winds nor waves can thee o'erwhelm;  
Thy frail bark shall stem the ocean—  
Christ is sitting at the helm.

What though mighty waves are rolling,  
And all human help is vain?  
There is one the storm controlling  
Over all thy God doth reign.

Child of God, thou'rt not forsaken;  
Thou art still thy Father's care;  
Let not faith in him be shaken,  
He doth hear and answer prayer.

'Tis in love that he doth chasten,  
To draw closer to his breast;  
Stormy winds thy voyage hasten  
To thy bright, eternal rest.

Soon shall end thy tribulation,  
Soon shall dawn a brighter day;  
Rest in Christ's sweet consolation,  
"Lo, I am with thee alway."

Yes, in safety he will guide thee  
Over life's tempestuous sea;  
He knows all that doth betide thee,  
And will thy sure refuge be.

Even now the coast thou'rt nearing;  
Soon thy feet shall touch the strand;  
See the mountain tops appearing,  
Bathed in light—Emmanuel's land.

Selected.

#### THE BIRTH RECORD.

Sitting to-night in my old arm-chair,  
With my Bible on my knee,  
I read from its record page of birth  
The names of children three;  
And written beneath, in the same strong hand,  
While the heart was breaking with pain,  
"The Lord hath given and taken away,"  
But "blessed be his name."

With two, the record of life was short,  
Like a summer's day of joy;  
I can see them now, with these dim old eyes,  
My little girl and boy;  
And I think of them when I read the words  
In an old, old book, which saith,  
"They were lovely and pleasant in their lives,  
And divided not in death."

For the other—"my baby" I call him still—  
Though he grew to manhood tall,  
When they told me God had taken him,  
I felt he had taken my all:  
And long I cherished rebellious thoughts,  
Before I could learn to say,  
"Blessed be the Lord. 'Twas he that gave,  
'Tis he that hath taken away."

So when I take this sacred Book  
Where God hath writ his will,  
I can read in peace my children's names  
While I say, "My heart, be still!"  
And the dear, dear hand that wrote those names  
Grasps mine in trust and love;  
"Dear wife, their names are also writ  
In the Book of Life above!"

*Palm-wine.*—On the warmer plains, the wine-palm (*Cocos butyracea*) is grown. I saw many of them near San Ubaldo. The wine is very simply prepared. The tree is felled, and an oblong hole cut into it, just below the crown of leaves. This hole is eight inches deep, passing nearly through the trunk. It is about a foot long and four inches broad; and in this hollow the juice of the tree immediately begins to collect, scarcely any running out at the butt where it has been cut off. This tendency of the sap to ascend is well shown in another plant, the water liana

To get the water from this it must be cut first as high as one can reach; then about a foot from the ground, and out of a length of about even feet, a pint of fine cool water will run; but if cut at the bottom first, the sap will ascend so rapidly that very little will be obtained. In three days after cutting the wine-palm the hollow will be filled with a clear yellowish wine, the fermented juice of the tree; and this will continue to secrete daily for twenty days, during which the tree will have yielded some gallons of wine. I was told that a very large grove of the trees was cut down by the Government near Grenada, on account of the excesses of the Indians, who used to assemble there on their festivals, and get drunk on the palm wine. The Indians of Nicaragua, when the Spaniards first came amongst them, objected to the preaching of the padres against intemperance. They said, "getting drunk did no man any harm."—*Belt's Naturalist in Nicaragua.*

### "Keep the Heart Alive."

The longer I live, the more expedient I find it to endeavor more and more to extend my sympathies and affections. The natural tendency of advancing years is to narrow and contract these feelings. I do not mean that I wish to form a new friendship every day, to increase my circle of intimates; these are very different affairs. But I find it conduces to my mental health and happiness to find out all I can which is amiable and lovable in those I come in contact with, and make the most of it. It may fall very far short of what I was once wont to dream of; it may not supply the place of what I have known, felt, and tasted, but it is better than nothing. It seems to keep the feelings and affections in exercise; it keeps the heart alive in its humanity; and until we shall all be spiritual this is alike our duty and our interest.—*Bernard Barton.*

For "The Friend."

### Something more about Animal Character.

(Continued from page 342.)

Speaking of cats exhibiting intelligence at times, as marked as other animals, I am reminded of one that lived in the family of one of my relatives who evinced frequent instances of it; and on repeated occasions at one time, she certainly showed remarkable shrewdness. They had been again and again annoyed by having the front door bell rung, and on its being promptly attended to, finding no one there. Concluding it was probably done by some runaway boys, one day when it had been repeated pretty quickly in succession, one of the family determined to watch from the parlor window, to detect, if he could, the offender. Soon the bell rang again, but no one had gone near the door step. The mystery was now to be solved in some other way; when one of the girls in the kitchen—which I think was in the basement—happened to observe that sometimes as soon as she opened the kitchen stair door, to attend to the ringing of the front door bell, puss would dash through, and up the stairs. They then feeling satisfied, that she was at least on the alert for these opportunities, she was watched; and was soon discovered climbing up to the top of a high wood pile in the cellar,—which communicated with the kitchen, the door being often opened,—over which the bell-wire passed; and jumping on it, or working at it in some way until the bell rang;

then she would quickly spring down, and be ready to run up the stairs, when the door at the foot of them was opened. Here then seemed to be reasoning and drawing conclusions. She had observed that when the bell in the kitchen was rung, the door was opened; and when on some occasion, indulging the cat propensity for climbing on high places, she had happened to ring the bell by bending the wire while walking on the top of the wood pile, she observed cause and effect; and soon my lady availed herself of her acquired knowledge and ability to profit by it, and rang the bell when she wished some one to wait upon, and open the door for her.

Though numerous instances are recorded of the intelligence of the dog, some so extraordinary, that they would be considered, had man been the actor, as no small evidence of the brightness of his intellect;—some indeed too much so to be attributed to his reasoning powers at all, but rather, to the immediate influence of an overruling Providence,—yet many more might doubtless be added to the list. I remember one instance which was related by the owner of the dog to a member of our family, which was certainly very remarkable. The dog one evening had been lying quietly before an open fire-place—apparently asleep. When he suddenly started up and stood for a short time as if listening. He then went to the door and seemed anxious to get out; on its being opened he immediately went through, and ran rapidly up the stairs all the way to the garret door. It being singular, and so rare for him to act thus, and being a very intelligent dog, he was followed; on opening the door, for which he was eagerly waiting, he went in paused awhile as if listening or dissatisfied, then soon came back, and dashed down the stairs again to the front door. Appearing impatient to go out, his master promptly opened it; when outside, he waited on the neighbor's step which joined that of his master, and seemed to entreat to have their door opened. His whole conduct was so unaccountable, that they at once rang the neighbor's bell—when he darted in without ceremony, running up their stairs as he had done up his master's, and was followed. I do not now remember what were his demonstrations when he was admitted into their garret room; but they were such as induced them to open the window; when the cause of his excitement and anxiety was soon made manifest, by the discovery of a man who was hiding behind the stack of chimneys between the two houses, where he had gone with the intention of entering one, or both of them for the purpose of robbery. How little could the robber have imagined, that the small noise he might make as he enscanted himself closely to the chimney, would be communicated by the flue to the parlor where the family sat. But that this dog should not only hear it, but should so promptly decide whence it proceeded—that there was something wrong connected with it—and then immediately, upon the readiest, yes the only way to detect it—that he should seem to know that by going up the stairs they might get out upon the roof to do this—and, finding when there the object of his search could not be reached, that he should forthwith infer from appearances, that the neighbor's chimney was attached to his master's, and without any delay come to the conclusion that the only way to accomplish his purpose was to proceed to the stair way,

and roof of his house, certainly exhibited altogether, a most remarkable train of apparent reasoning and decision, which would be no discredit to human intellect.

The account given in the first extracts from P. G. H. on animal character, of the cow who was so restive her owner could not milk her without letting her have a calf to lick, was somewhat curious. But there did not seem to me anything very remarkable about it, nor calculated to "grate on our sensibilities," that the cow, when she accidentally ripped open the bag made of the skin of her calf that had died,—which had been filled with hay, by her master, and given her to lick to keep her quiet,—should immediately eat the hay—the provender she was in the habit of feeding upon; the delicious fragrance of which would at once speak for its identity, though it was found in so queer a place; for I do not believe she took it for her calf at all. It died so soon—on the day of its birth—she could hardly have known it as her calf, certainly not long enough to be expected to love it. And just supposing the unnatural dismal looking lump, "without head or feet," had happened to have rolled towards her, it is most probable she would have been so startled, she would have attacked it with her horns. It is no wonder "mamma first opened enormous eyes," and *slowly* stooped her head towards it. But seeing that it laid still, and the *quite probably familiar smell*, bringing it home to her as it were, she with the enjoyment that cows seem to feel in licking each other, which we so often see, soon began to indulge her propensity with just the "delightful tenderness" she would feel in licking any calf not her own, or another cow—nothing more; (love apparently, often having nothing to do with it, though where love exists it may enhance the pleasure.) And she having taken such special delight in this soothing indulgence that, "a calf," not it would seem necessarily her own, had to be brought to keep her quiet when being milked. And why should she manifest "surprise" on finding the hay? The surprise was experienced, and *manifested*, when she first saw the strange looking mass—having a recognized smell, which may have influenced her rather sooner, under such odd circumstances, to indulge her inclination for licking her kind; but not because she really took it for a living calf, much less for her own offspring; and doubtless she was the more inclined to continue so doing from day to day, because she perceived the refreshing odor of the hay from the carelessly made bag, with the promise, or an indefinite hope of the coming feast from within.

(To be continued.)

*Extract from a Testimony of Miami Quarterly Meeting concerning John Simpson.*—A few days before his decease, he desired the following testimony to be taken down in writing, and spread among his friends, as his last legacy. He then observed, that "the nearer he drew to the close of life, the plainer he saw, and the clearer evidence he had, that the greatest deception Satan practised upon mankind was, he persuaded them that they could be Christians without *baptism*, that is, spiritual baptism, but it was his express desire, that they might not be deceived; but be willing to endure that baptism, which Christ was baptised with," frequently repeating, "there is no other way—there is no other way."

For "The Friend."

From a new English work on "The Universe," by Richard A. Procter, "recently confirmed by the chief astronomers of Great Britain," the following portions have been selected and offered for insertion in "The Friend." In selecting what is believed will most interest the general reader, it has been found necessary occasionally to change a few words in order to make suitable connection of different parts; but it is believed that in no case has any change of idea resulted. Many ideas and theories entirely new, are propounded respecting the construction of the starry heavens; and these are illustrated in so clear and forcible a manner, and withal in such strict accordance with recent discoveries, as cannot fail to render the work from which these selections are made, of great interest and value to those who are at all interested in the grand and noble science of astronomy.

### Star Streams.

To those who rightly appreciate its meaning, the Milky Way is the most magnificent of all astronomical phenomena. However opinions may vary as to the configuration of the star-streams composing this object, no doubt now exists among astronomers that the Milky Way consists really of suns, some doubtless falling short of our own sun in brilliancy, but many probably surpassing it. Around these suns, we may fairly conceive, there revolve systems of dependent orbs, each supporting its myriads of living creatures. We have afforded to us a noble theme for contemplation, in the consideration of the endless diversities of structure, and of arrangement, which must prevail throughout this immensity of systems.

I propose to examine what is known of this marvellous object, and to present some considerations which appear to me to have an important bearing on the views we should form of its structure.

Galileo was the first to prove, though earlier astronomers had entertained the notion, that the Milky Way is composed of a vast number of stars, crowded closely together. But no attempt was made to offer a theory of its structure until, in 1754, Thomas Wright, in his 'Theory of the Universe,' propounded views closely according with those entertained later by Sir W. Herschel. Wright, having examined a portion of the galaxy with a reflecting telescope, only one foot in focal length, came to the conclusion that our sun is in the midst of a vast stratum of stars; that it is when we look along the direction in which this stratum extends, that we see the zone of light constituting the Milky Way; and that as the line of sight is inclined at a greater and greater angle to the mean plane of the stratum, the apparent density of the star-grouping gradually diminishes.

But it is to Sir W. Herschel, and the supplementary labors of Sir J. Herschel, that we owe the more definite views now commonly entertained respecting the Via Lactea. The elder Herschel, whose nobly speculative views of nature were accompanied by practical common sense, and a wonderful power of patient observation, applied to the heavens his celebrated method of gauging. He assumed as a first principle, to be modified by the results of observation, that there is a tolerable uniformity in the distribution of stars through space. Directing his twenty feet reflector suc-

cessively towards different parts of the heavens, he counted the number of stars which were visible at any single view. The field of view of this reflector was 15' in diameter, so that the portion of the sky included in any one view was less than one-fourth of that covered by the moon. He found the number of stars visible in different parts of the heavens, in a field of view of this size to be very variable. Sometimes there were but two or three stars in the field; indeed, on one occasion he counted only three stars in four fields. In other parts of the heavens the whole field was crowded with stars. In the richer parts of the galaxy as many as 400 or 500 stars would be visible at once, and on one occasion he saw as many as 588. He calculated that in one quarter of an hour, 116,000 stars traversed the field of his telescope, when the richest part of the galaxy was under observation. Now, on the assumption above named, the number of stars visible when the telescope was pointed in any given direction was a criterion of the depth of the bed of stars in that direction. Thus, by combining a large number of observations, a conception—rough, indeed, but instructive—might be formed of the figure of that stratum of stars within which our sun is situated.

Herschel had noticed, so early as 1785, that there is a tendency in the Milky Way to cluster around definite regions of the heavens; and he saw that the fact of such clustering was sufficient to account for many irregularities of its figure, quite irrespectively of the absolute extent of the Milky Way in space. If we are looking from a height at the lights of a large town, we may fairly assume that a row of many lights very closely ranged, lies at a greater distance from us than another row containing lights more widely dispersed, if we have reason to suppose that throughout all the streets of the town the lights are separated by distances approximately equal. But if we have reason to suspect that there are some streets lighted more fully than others, the inference would be no longer valid. And again, Herschel suspected that there are stars so large as to bear a sort of sway among other stars by superior attractive influence. Here, then, was another element of difficulty, since it becomes clear (1) that the brilliancy of a star is no positive evidence of proximity; and (2) that there may be (besides the obvious clusterings already considered) laws of systematic distribution, which might largely modify the evidence afforded by star-gauging. For instance, returning to the illustration given above, if we have reason to suspect that there are many lights of superior brilliancy, in some parts of a town, and that further there are in some streets laws of arrangement among the lights, or that there are irregularities of surface-contour, which produce here and there a greater or less foreshortening than would result on a level ground, we should have to make allowance for these points in attempting to form an estimate of the distances at which the different parts of the town are removed from us.

Still, the results obtained by Sir W. Herschel have very properly been accepted as affording general evidence of high value.

Sir J. Herschel, during his residence at the Cape of Good Hope, carried out an extensive series of observations of the southern heavens. Applying his father's method of gauging, with a telescope of equal power, he obtained a re-

sult agreeing, in a most remarkable manner with those obtained by Sir William Herschel. It appeared, however, that the southern hemisphere is somewhat richer in stars than the northern, a result which has been accepted as indicating that our system is probably somewhat nearer the southern than the northern part of the galactic nebula. Moreover Sir J. Herschel was led to believe that the sidereal system forms a cloven flat ring rather than a disc.

Combining the results obtained by the two Herschels, we should assign to the stratum of stars a figure somewhat resembling that of a solid cloven disc.

The main difficulties in attempting to form an estimate of the real configuration of the galactic system are those which have been already mentioned. Have we evidence confirming or disproving (1) the tendency to clustering suggested by the elder Herschel (2) the possible variability among star-magnitudes, and (3) the action of influences exerted by large stars in guiding or swaying others? It appears to me that there are indications of a very obvious and important character, which have been either altogether unnoticed, or much less noticed than they deserve.

If any connection *should* appear between the configuration of our galaxy, and the arrangement of stars which are assumed to be much nearer to us than the Milky Way, it will be obvious that we must somewhat modify the views held by the two Herschels respecting the sidereal system.

Now, I think one can trace a connection between the stars readily visible to the naked eye, and that stream of nebulous light which the view we are examining teaches us to consider as at an enormous distance beyond those stars. In the northern portion, perhaps, the connection is not very remarkable. We see that a large number of the brighter stars lie on or near the Milky Way, but the relation is not so marked that we can regard this arrangement as positive evidence of aggregation. However, I think no one who has attentively examined the glories of Orion, the richly-jeweled Taurus, the singular festoon of stars in Perseus, and the closely set stars of Cassiopeia, but must have felt that the association of splendor along this streak of the heavens is not wholly accidental. The stars here seem to form a system, and a system which one can hardly conceive to be wholly unconnected with the neighboring stream of the Milky Way. But in the southern portion the arrangement is yet more remarkable and significant. From Scorpio, over the feet of the Centaur, over the keel of Argo, to Canis Major, there is a clustering of brilliant stars which it seems wholly impossible not to connect with the background of nebulous light. It is noteworthy, also, that this stream of stars merges into the stream commencing with the group of Orion already noticed. Nor is this all. It is impossible not to be struck by the marked absence of bright stars in the region of the heavens between Algol, Crux, and Corvus. One has the impression that the stars have been attracted towards the region of the stream indicated, so as to leave this space comparatively bare.

(To be continued.)

God will never fail those who truly rely and depend on Him to the end.

For "The Friend."

The following remarks upon the testimony of the early Methodists against a conformity with the spirit of the world, are taken from a late number of the *Christian Advocate*:

"It was especially in the departments of amusements and of dress, that 'old-fashioned Methodism' made its protests against the spirit and fashions of the world. To the superficial this may seem to indicate a narrowness of view, and capriciousness of selection, but closer observation will detect a deep religious philosophy in it. The temptations that most certainly lead Christians astray are those that come in the form of allurements to pleasure—the lusts of the flesh, the lusts of the eye, and the pride of life—and these all find their gratifications in amusements, and gay equipage. The depth of religious convictions, and the earnestness of purpose to lay hold on eternal life, which especially characterized the original Methodists, impelled them to get as far as possible out of the way of temptations by voiding whatever might draw them toward the world.

It was not, therefore, merely a blind superstition and asceticism that impelled them to the singularities that distinguished them. They dreaded the very appearance of evil, and carefully avoided its forms; and recognizing themselves as leading a life hid with Christ in God, they were not ashamed to appear as pilgrims and strangers in the sight of those who knew them not. The earnest desire, often amounting to a passion, manifested for costly array, and for fashionable amusements, with some professed Christians, are infallible indications of the decay of all deep religious conviction and earnest impulses toward the Christian life. It is only when the heart is without the rich consolations of religion that hungers and thirsts after the pleasures of the world. \* \* \* We are not of those who contemplate without painful alarm the prevalence of the spirit and the practices of worldly conformity among our people."

#### The Hero of Niagara.

The following detailed account of the recent accident at Niagara, and the gallant rescue of the victim, is given by the Buffalo Courier: William McCullough, a painter by trade, aged about sixty years, and a respected citizen of Niagara Falls, was engaged in painting the middle bridge which spans the torrent that rushes between the first and second of the Three Sister Islands. He occupied a position, with a companion, on a scaffold which had been swung down on the lower side of the bridge. Approaching his fellow-workman, he asked him for some putty, and, receiving the same, he stepped back just a little too far, and in an instant was on his back at the bottom of the torrent. The other workman and George E. Curtis, who witnessed the accident, and who were paralyzed by what seemed to be the inevitable fate of McCullough, watched the disappearing form till it was swept out of the more rapid current into a small eddy, from the midst of which rose a rock. Against this rock, which is fairly submerged, McCullough was thrown, having been rolled over on his face just before reaching it, and, with the instinct of a drowning man, he clung to it. At the rock the water is between four and five feet deep, and, although stunned by the fall and exhausted by the angry waters which had borne him about

fifteen hundred feet in the direction of a grave, he had strength enough remaining to enable him to climb the rock and to seat himself upon it.

The plan of a rescue was not easy to solve, and the question of the power of endurance remaining to the old man was a serious one. Fortunately Mr. Pettibone had informed the people at the Cave of the Winds that a man had fallen from the bridge, and Thomas Conroy, one of the guides, heard the remark. He knew he was the only man that could save McCullough. Some distance above the rock he found awaiting use a coil of rope, about an inch in thickness, and passed it into the hands of about a dozen or fifteen men. He consulted nobody—he asked no one's advice; but, with as much coolness as if he were proceeding to his dinner, he took one end of the rope in his left hand, told them to play it out to him, descended the bank, and proceeded into the river, only taking the precaution to divest himself of his boots.

About forty feet from the shore he discovered that the rocks over which he picked his way were too slippery in the strong current, and he returned. He sent to the Cave of the Winds for his felt shoes, and these were brought to him with the utmost despatch. These donned he again started on his perilous journey from a point about two hundred feet above the rock on which sat McCullough. Cautiously, but with imperturbable coolness, he moved out in an oblique direction till he had reached a point beyond the line of the rock, the waters at every step threatening to sweep him out of sight. Carefully he picked his way, now in shallow water and now in deep, and down with the angry tide he went till he reached the rock, and found awaiting his coming a man shivering, exhausted, and almost incapable of utterance.

He tied the rope about McCullough's waist, took hold of it himself with his left hand simply, and both started for the shore. For a hundred feet or so Conroy had not only to look out for himself, but for the enfeebled old man in his charge. It was hard work, but they made this distance without accident.

The end was not yet, however, for as they entered the torrent which ran between the shore and the rock both were swept off their feet and buried in the mad waters. The men on shore pulled the rope as rapidly as was safe, and McCullough and his rescuer were dragged ashore. The paper mill whistle blew the hour of noon just as Conroy and McCullough reached the bank, and simultaneously with this huzzas rent the air and ecstasy usurped the place of dread anxiety. The crowd, wishing to testify promptly and substantially to their appreciation of Conroy's heroism, took up a collection for him, and about \$200 were handed to him.

W. McCullough's condition was found to be quite serious, partial delirium having set in, but no fatal consequences are anticipated.

The hero was born in Ottawa, Canada, twenty-five years of age, of Irish parentage, but spent his early boyhood in Montreal. For seven years he was a sailor along the Newfoundland coast, and only about seven years have elapsed since he first became a citizen of Niagara Falls. In the fall of 1872 he made an excursion with Professor Tyndall under the Falls, in a report of which the eminent scientist showed his appreciation of Conroy's heroic qualities. He is a quarter of an inch

over six feet in height, and weighs now 209 pounds, although his full avoirdupois is 220. He has a powerful frame, a quiet pair of eyes, brown hair and sandy mustache.

He has enormous strength and unflinching courage, and seems unwitting of the possession of any great qualities of body, mind or heart, all of which are pre-eminently his. He has a wife and three children, of whom he is proud, and works hard as a guide at the Cave of the Winds for their maintenance.—*Late Paper.*

Selected.

I well remember, said an eminent minister in North Wales, that when the Spirit of God first convinced me of my sin and danger, and of the many difficulties and enemies I must encounter, if ever I intended reaching heaven, I was often to the last degree in fear; the prospect of the many strong temptations and allurements, to which my youthful years would unavoidably expose me, greatly discouraged me. I often used to tell an aged soldier of Christ, that I wished I had borne the burden and heat of the day like him. His usual reply was, that so long as I feared and was humbly dependent upon God, I should never fall, but certainly prevail. I have found it so. O, blessed be the Lord, that I can now raise up my Ebenezer, and say, "Hitherto hath the Lord helped me."—*Remarkable Providences.*

*Antiquarian Discovery in the Crimea.*—The Cologne Gazette says: "Last year, near Kertch, three catacombs were discovered. One of them is situated on the northern slope of the Mithridates Mount, and its interior is decorated with stucco work and pictures in fresco, in which various animals and hunting scenes are represented. At the entrance there are visible on the side walls, where the stucco has fallen off, symbols, monograms, and figures of animals, cut with sharp tools. Mr. Lucenko, the director of the Kertch Museum, has since opened two catacombs, which, however, have proved less interesting. In the opinion of antiquaries, the paintings found in the catacombs belong to an Oriental people. As evidence of this are pointed out the high headdresses and helmets of the warriors, and the short manes of the horses, which are represented as they are on the Assyrian monuments. As the bright colors of the pictures were becoming dimmed through contact with the damp atmosphere, the entrance to the catacombs has for a time been closed in order to protect the pictures from entire destruction. In the representations of battles, fighting men of two different nationalities are clearly distinguishable. One class have round beardless faces, and wear armor which covers the whole body and extends down to the ankles. Their arms consist of two lances and a round shield. The other class, their opponents, have beards and thick long hair. They are armed with bows, lances and square shields. The bearded men appear to be besieged, whence it may be concluded that these frescoes are the productions of their beardless assailants. On other pictures are represented bears, wild boars, stags, birds of various kinds, and plants with large broad leaves. Especially remarkable is a picture which represents an animal resembling a lion, and behind in the air a winged Cupid in a sort of Roman drapery. Besides these frescoes there have been found two small statuettes of clay, one of which represents the

sitting figure of a woman, who holds in her right hand a flat, cup shaped vessel, and wears a high three-cornered head dress. This figure has a remarkable resemblance to the stone figures of women found in the grave mounds of the steppes. The other statuette, also that of a woman, likewise wears a remarkable three-parted head dress."

**Ticks.**—No one who has not lived and moved about amongst the bush of the tropics can appreciate what a torment the different parasitical species of *acarus* or ticks are. On my first journey in northern Brazil, I had my legs inflamed and ulcerated from the ankles to the knees, from the irritation produced by a minute red tick that is brushed off the low shrubs, and attaches itself to the passer-by. This little insect is called the "Mocim" by the Brazilians, and is a great torment. It is so minute that except by careful searching it cannot be perceived, and it causes an intolerable itching. If the skin were thickly covered with hair, it would be next to impossible to get rid of it. Through all tropical America, during the dry season, a brown tick (*Ixodes bovis*), varying in size from a pin's head to a pea, is very abundant. In Nicaragua, in April, they are very small, and swarm upon the plains, so that the traveller often gets covered with them. They get up on the tips of the leaves, and shoots of low shrubs, and stand with their hind legs stretched out. Each foot has two hooks or claws, and with these it lays hold of any animal brushing past. All large land animals seem subject to their attacks. I have seen them on snakes and iguanas, on many of the large birds, especially on the curassows, and they abound on all the larger mammals, together with some of the small ones. Sick and weak animals are particularly infested with them, probably because they have not the strength to rub and pick them off, and they must often hasten, if they do not cause their death. The herdsmen or "vaequeros," keep a ball of soft wax at their houses, which they rub over their skin when they come in from the plains, the small "garapatos" sticking to it, whilst the larger ones are picked off.—*Bell's Naturalist in Nicaragua.*

To pass through life without sorrow, would naturally speaking be good; but patiently to bear sorrow, and profit by it, is still better; the former is a temporary good, the latter eternal.

## THE FRIEND.

SIXTH MONTH 20, 1874.

### SUMMARY OF EVENTS.

**FOREIGN.**—It is reported that the steamer Queen Elizabeth, recently lost near Gibraltar, had on board one of the most valuable cargoes ever shipped from Calcutta. The entire value of the cargo is estimated at \$2,540,000, including \$1,650,000 worth of indigo, \$250,000 worth of tea, and \$115,000 of silk, shellac, and other articles. The vessel was valued at \$135,000, making the aggregate loss \$2,775,000. The vessel and cargo were insured for nearly \$2,000,000.

The authorities of London, after careful scientific investigation, have concluded to pave the streets with wood and asphalt exclusively.

In the House of Commons, Gladstone has presented a petition to Parliament, signed by 86,000 laborers, asking for the assimilation of county and borough franchises.

In the House of Commons, Bourke, Under-Secretary for Foreign Affairs, in reply to a question from John

Simon, said the draft of a code sent by the government of Russia for consideration by the Congress upon International Law, soon to assemble at Brussels, relates to the exercise of military authority in an enemy's country, the distinction between combatants and non-combatants, various modes of warfare, reprisals, &c. Bourke added that the British government had not yet decided whether it would send delegates to the Congress.

An excellent registration system of births, marriages and deaths in the British isles enables the Registrar General to make an annual estimate of the population that is nearly as accurate as the regular census. For the year 1874 the estimate is 32,412,010, an increase of 928,319 since the last census in 1871. There is an increase of 936,363 in England and Wales, and 102,898 in Scotland, and a decrease of 111,093 in Ireland. The largest cities are London, with 3,400,700 inhabitants; Liverpool, 510,640; Glasgow, 508,109; Birmingham, 360,892; Manchester, 355,339; Dublin, 314,666; Leeds, 278,798; Sheffield, 261,029; Edinburg, 211,691; Bristol, 192,889.

A Calcutta dispatch of the 9th says: Advices from the famine-stricken districts are more favorable. Cases of actual starvation are now rare. Numbers of persons employed at various relief works are leaving in consequence of rains, which prevail everywhere.

The purchase of livings in the Established Church of England is once more the subject of much attention in that country. As at present, any man who has taken the necessary degree at the University, and has money enough, may buy a living, the consequence is that many men unfit for the position, obtain them in this manner.

The population of Sweden at the end of 1867 was 4,195,000; in 1869, only 4,158,000; 1870, 4,168,000, and in 1872, again 4,250,000.

London, 6th mo. 15th.—Consols 92½. U. S. sixes, 1865, 108½.

Liverpool.—Uplands cotton, 8 5-16d.

A Vienna dispatch of the 11th says: The International Sanitary Congress has been postponed until January 9, 1875.

The Spanish government has authorized its generals commanding the national forces in the north, to grant pardons to Carlists who give in their submission to the government.

A dispatch from the Spanish frontier says that numerous bands of the Basque provinces have revolted against Don Carlos, demanding peace. Don Carlos has ordered that upon capture they shall be shot.

A special to the Times from Spain says, General Concha and staff have left Logrono for Tiedela. Thirty thousand national troops are marching to the Comescas valley. The Carlist army under Dorregaray numbers 24,000 men.

It is reported that eighteen Carlist officers have been shot at Tolosa, by order of Don Carlos, for mutiny.

The French National Assembly continues violently excited. The feeling is especially bitter between the Bonapartists and Radical Republicans. It was necessary to place a strong guard on the train which conveyed the deputies from Versailles to Paris, the evening of the 10th inst., to protect the Bonapartists from Gambetta's supporters. The Imperialist journals contain violent attacks on the Left. On the return of the Deputies from Versailles, Count St. Croix struck Gambetta across the face with a stick, for which he was promptly arrested. For this outrage the Count was fined and sentenced to six month's imprisonment.

The Left claims 330 members, pledged to vote for the dissolution of the Assembly, and they only require 30 more to carry the motion, which they intend to introduce at an early day.

On the 10th the Assembly, by a vote of 348 to 337, adopted an amendment to the municipal electoral bill, fixing the age of electors at twenty-one instead of twenty-five years as proposed by the government, which was thus defeated on a vital provision of the bill.

On the 15th a constitutional bill prepared by the Left Centre was introduced by Casimir Perier, who moved its consideration be declared "urgent." He said the country denuded the termination of the provisional state. He urged union against Bonapartism and demagogues. Laboulaye supported the motion for "urgency." He said recent events had shown the dangers of a provisional condition. A monarchy was impossible, and the Empire would only lead to the invasion and oppression of France. The Republic was the government of all for all, and its establishment would inspire the country with confidence. The vote was then taken on the motion for urgency and it was agreed to, yeas 345, nays 341, all the ministers voting against it, but in their capacity as members of the Assembly only, the motion not being made a cabinet question.

After this vote a resolution from the extreme Right

was read amid profound silence. It declares that the government of France is a monarchy; the throne belongs to the head of the house of France; Marshal MacMahon may assume the title of Lieutenant of the kingdom, and the national constitution be determined by agreement between the king and national representatives. A motion that the resolution should be referred to a committee was defeated by a large majority.

**UNITED STATES.**—The House of Representatives has passed the bill appropriating \$500,000 for the relief of the sufferers by the floods in the Mississippi Alabama and Tombigbee rivers.

The Senate and House have been unable to agree on the currency bill. It seems to be well understood that any measure increasing the paper circulation will be vetoed by the President. The majority of Congress seems bent on inflation, while the President is fully committed against that course, and favors contraction as one of the steps toward a resumption of specie payments.

A recent law of Mississippi requires that no person shall be licensed to retail spirituous liquors until he has first secured the recommendation of more than half the men over twenty-one years of age, and more than half the women over eighteen years of age in the corporation or township where he desires the license.

There were 480 deaths in New York city last week, and 314 in Philadelphia.

The "Day Express" train on the Pennsylvania Railroad now leaves Pittsburg at 7.45 A. M., and arrives in Philadelphia at 6.40 P. M. There are two stops made at which the engines are changed, at Altoona and Harrisburg, the former being five minutes and the latter twenty minutes, so that the train actually runs this distance, 354 miles, in 10½ hours.

**The Markets, &c.**—The following were the quotations on the 15th inst. *New York.*—American gold, 110½. U. S. sixes, 1881, registered, 116½; coupons, 121; do. 1868, registered, 116½; coupons, 120½; U. S. 5 per cents, 113½. Superfine flour, \$4.85 a \$5.30; State extra, \$5.80 a \$6.25; finer brands, \$6.50 a \$10.25. No. 1 Chicago spring wheat, \$1.46; No. 2 do., \$1.40; No. 3, \$1.39; red western, \$1.50 a \$1.52; white Ohio, \$1.58. Oats, 64 a 71 cts. Western mixed corn, 84 a 86 cts.; yellow, 85 a 86½ cts.; white, 90 a 92 cts. Carolina rice, 8½ cts.; Rangoon, 6½ a 7¼ cts. *Philadelphia.*—Uplands and New Orleans cotton, 18½ a 18¾ cts. Superfine flour, \$4.75 a \$5.50; extras, \$5.50 a \$6; finer brands, \$6.50 a \$10.25. Penna. red wheat, \$1.50 a \$1.53; amber, \$1.57; western red \$1.40 a \$1.48; white spring, \$1.45; No. 1 spring, \$1.35. Rye, 95 cts. Yellow corn, 80 a 82 cts. Oats, 59 a 63 cts. Lard, 11½ a 11¾ cts. Clover-seed, 9¾ a 10½ cts. About 2600 beef cattle were sold at 7¼ a 7½ cts. per lb. gross for extra, 6¼ a 7 cts. for fair to good, and 5 a 6 cts. for common. Sheep sold at 5 a 6½ cts. per lb. gross. Receipts 8000 head. Corn fed hogs \$8.25 a \$8.50 per 100 lb. net. Receipts 4000 head. *Baltimore.*—Western superfine flour, \$4.50 a \$5.25; family flour, \$6.50 a \$8; finer brands, \$8 a \$11. Western red wheat, \$1.40 a \$1.46; western spring, \$1.30 a \$1.37. Southern white corn, 90 a 91 cts.; yellow, 81 a 82 cts. Oats, 66 a 72 cts. *Chicago.*—No. 1 spring wheat, \$1.20; No. 2 do., \$1.18. No. 2 mixed corn, 62 cts. Oats, 47 cts. No. 2 rye, 84 cts. *St. Louis.*—No. 3 fall wheat, \$1.20; No. 2 spring, \$1.08½. No. 2 mixed corn, 60 a 61 cts. Oats, 47 a 48 cts. Rye, 75 cts. *Cleveland.*—No. 1 red wheat, \$1.38; No. 2 do., \$1.30. Corn, 70 a 71 cts. Oats, 53 a 55 cts.

### RASPBERRY STREET COLORED SCHOOL FOR GIRLS.

Wanted, an energetic competent Teacher for the above School, to commence 9th month 1st. Apply to Eliza B. Edwards, 516 Spruce street, Rachel S. Maris, 127 South Fifth street, Sarah E. Smith, 1110 Pine street.

### Haverford College.

The next Term will commence on Fourth-day, 9th mo. 2nd, 1874. Applications for admissions should be addressed to SAMUEL J. GUMMERE, President, Haverford College, Montgomery Co., Pa.

## Star Streams.

(Continued from page 350.)

Now, this last circumstance would appear as remarkable if the paucity of stars here noticed were common also in parts of the heavens far removed from the Milky Way. But this is not the case. Beyond this very region, which we find so bare of stars, we come upon a region in which stars are clustered in considerable density, a region including Crater, Corvus, and Virgo, with the conspicuous stars Algores, Alkes, and Spica. But what is very remarkable, while we can trace a connection between the stream of bright stars over the Milky Way, and the stream of nebulous light in the background, it is obvious that the two streams are not absolutely coincident in direction. The stream lies on one side of the Milky Way near Scorpio, crosses in the neighborhood of Crux, and passes to the other side along Canis Major, Orion, and Aurus. Does the stream return to the Milky Way? It seems to me that there is clear evidence of a separation near Aldebaran, one branch curving through Auriga, Perseus, and Cassiopeia, the other proceeding (more nearly in the direction originally observed) through Pegasus (throwing out an outlier along the band of Pisces), over the square of Pegasus, and along the streams which the ancients compared to water from the urn of Aquarins (but which in our modern maps are divided between Aquarins and Grus). The stream-formation here is very marked, as is evident from the phenomenon having attracted the notice of astronomers so long ago. But modern travels have brought within our ken the continuation of the stream over Toucan, Hydrus, and Retikulum (the two latter names being doubtless suggested by the convolutions of the stream in this neighborhood). Here the stream seems to end in a sort of double loop, and it is not a little remarkable that the Nubecula Major lies within one loop, the Nubecula Minor within the other. It is also noteworthy that from the foot of Orion there is another remarkable stream of stars, recognised by the ancients under the name of the River Eridanus, which proceeds in a sinuous course towards this same region of the Nubeculae.

Having thus met with evidence—striking at least, if not decisive,—of a tendency to

aggregation into streams, let us consider if, in other parts of the heavens, similar traces may not be observable. We traced a stream from Scorpio towards Orion, and so round in a spiral to the Nubeculae. Let us now appear) in the contrary direction. Now although over the northern hemisphere star-streams are not nearly so marked as over the southern, yet there appears a decided indication of stream-formation along Serpens and Corona over the group on the left hand of Bootes to the Great Bear. A branch of this stream, starting from Corona, traverses the body of Bootes, Berenice's Hair, the Sickle in Leo, the Beehive in Cancer, passing over Castor and Pollux in Gemini, towards Capella. A branch from the feet of Gemini passes over Canis Minor, along Hydra (so named doubtless from the obvious tendency to stream-formation along the length of this constellation), and so to the right claw of Scorpio.

One other remarkable congeries of stars is to be mentioned. From the northern part of the Milky Way there will be noticed a projection towards the north pole from the head of Cepheus. This projection seems to merge itself in a complex convolution of stars forming the ancient constellation Draeo, which doubtless included the ancient (but probably less ancient) constellation Ursa Minor. After following the convolutions of Draco, we reach the bright stars Alwaid and Etanin of this constellation, and thence the stream passes to Lyra, where it seems to divide into two, one passing through Heracles, the other along Aquila, curving into the remarkable group Delphinus.

The streams here considered, include every conspicuous star in the heavens. But the question will at once suggest itself, whether we have not been following a merely fanciful scheme, whether all these apparent streams might not very well be supposed to result from mere accident. Now, from experiments I have made, I am inclined to believe that in any chance distribution of points over a surface, the chance against the occurrence of a single stream as marked as that which lies (in part) along the back of Grus, or as the curved stream of bright stars along Scorpio, is very great indeed. I am certain that the occurrence of many such streams is altogether improbable. And wherever one observes a tendency to stream-formation in objects apparently distributed wholly by chance, one is led to suspect, and thence often to detect the operation of law. I will take an illustration, very homely perhaps, but which will serve admirably to explain my meaning. In soapy water, left in a basin after washing, there will often be noticed a tendency to the formation of spiral whorls on the surface. In other cases there may be no definite spirality, but still a tendency to stream formation. Now, in this case, it is easy to see that the curved bottom of the basin has assisted to generate streams

in the water, either circulating in one direction, or opposing and modifying each other's effects, according to the accidental character of the disturbance given to the water in the basin. There can be no doubt of the cause of these phenomena; and I believe that in every case in which even a single marked stream is seen in any congeries of spots or points, a little consideration will suggest a regulating cause to which the peculiarity may be referred.

It is hardly necessary to say that, if the stream-formation I have indicated is considered to be really referable to systematic distribution, the theory of a stratum of stars distributed with any approach to uniformity, either as respects magnitude or distance, must be abandoned. It seems to me to be also quite clear that the immense extent of the galaxy as compared with the distances of the 'lucid' stars from us, could no longer be maintained. On this last point we have other evidence, which I will briefly consider.

First, there is the evidence afforded by clusterings in the Milky Way. I will select one which is well known to every telescopicist, namely, the magnificent cluster on the sword-hand of Perseus. No doubt can be entertained that this cluster belongs to the galactic system, that is, that it is not an *external* cluster: the evidence from the configuration of the spot and from the position it occupies, is conclusive on this point. Now, within this spot, which shows no stars to the naked eye, a telescope of moderate power reveals a multitude of brilliant stars, the brightest of which are of about the seventh magnitude. Around these there still appears a milky unresolved light. If a telescope of higher power be applied, more stars are seen, and around these there still remains a nebulous light. Increase power until the whole field blazes with almost unbearable light, yet still there remains an unresolved background. 'The illustrious Herschel,' says Professor Nichol, 'penetrated, on one occasion, into this spot, until he found himself among the depths, whose light could not have reached him in much less than 4,000 years; no marvel that he withdrew from the pursuit, conceiving that such abysses must be endless.' It is precisely this view that I wish to controvert. And I think it is no difficult matter to show at least a probability against the supposition that the milky light in the spot is removed at a vast distance behind the stars of the seventh magnitude seen in the same field.

The supposition amounts, in fact, to the highly improbable view that we are looking here at a range of stars extending in a cylindrical stratum directly from the eye—a stratum whose section is so very minute in comparison with its breadth, that, whereas the whole field within which the spot is included is but small, the distance separating the nearest parts of the group from the farthest, is equivalent to the immense distance supposed

to separate the sphere of seventh magnitude stars from the extreme limits of our galaxy. And the great improbability of this view is yet further increased, when it is observed that within this spot there is to be seen a very marked tendency to the formation of minor streams, around which the milky light seems to cling. It seems, therefore, wholly improbable that the cluster really has that indefinite longitudinal extension suggested by Professor Nichol. In fact, it becomes practically certain that the milky light comes from orbs really smaller than the seventh magnitude stars in the same field, and clustering round these stars in reality as well as in appearance.

The observations applied to globular clusters may be extended to a cluster is not globular in form, but exhibits, on examination, either (1) any tendency within its bounds to stream-formation, or (2) a uniform increase in density as we proceed from any part of the circumference towards the centre, it appears wholly inconceivable that the apparent cluster is, not really a cluster, but a long range of stars extending to an enormous distance directly from the eye of the observer. When, in such a case, many stars of the higher magnitudes appear within the cluster, we seem compelled to admit the probability that they belong to it; and, in any case, we cannot assign to the farthest parts of the cluster a distance greatly exceeding (*proportionally*) that of the nearest parts.

Of a like character is the evidence afforded by narrow streams and necks within the galaxy itself. If we consider the convolutions over Scorpio, it will seem highly improbable that in each of these we see, not a real convolution or stream but the edge of a *roll* of stars. For instance, if a spiral roll of paper be viewed from any point taken at random, the chances are thousands to one against its appearing as a spiral *curve*, and of course the chance against several such rolls so appearing is very much greater. The fact that we are assumed to be not very far from the supposed mean plane of the Milky Way would partly remove the difficulty here considered, if it were not that the thickness and extent of the stratum, as compared with the distances of the lucid stars, must necessarily be supposed very great, on the assumption of any approach to uniformity of distribution.

Evidence pointing the same way is afforded by circular apertures in the galaxy, or indeed by apertures of other forms, since a moment's reflection will show the improbability of any tunnelling (so to speak) through the star stratum, being so situate as to be discernible from the centre. Another peculiarity of these cavities is also noticeable; whereas on the borders of every one there are many lucid stars, or in some cases two or three very bright stars, *within* the cavity there is a marked paucity of stars. This phenomenon seems to indicate a much closer connection between the brighter stars, and the milky light beyond, than is supposed on the stratum theory. One can hardly conceive the phenomenon to be wholly accidental.

(To be continued.)

Being an acknowledged minister amongst Friends, and frequently engaged in Gospel labors for the good of others, Peter Yarnall found it needful to watch against his natural eloquence and the fervor of his own spirit in the Lord's cause.

For "The Friend."

### Something more about Animal Character.

(Concluded from page 349.)

We have in truth I believe, many sufficient evidences of the genuine affection of the cow, as well as most other animals of whose character we can form any estimate, not only for their offspring, but also for companions with whom they have been intimately associated; and it is cause of regret that any doubts should be suggested. Why does the cow, when her calf has been taken from her for slaughter, bewail her loss for many days, in tones so mournful as to sadden the human hearts of all the household who hear her; not only all the day long, but even through the ~~night~~ <sup>evening</sup>, when ~~she~~ <sup>she</sup> ~~is~~ <sup>is</sup> ~~at~~ <sup>at</sup> ~~rest~~ <sup>at rest</sup>, if it is not love for her offspring? Why does the hippopotamus stand still in the water, steadily opposing her huge body as a wall of defence for her young when attacked by the merciless hunter, man, until her sides are pierced all over with cruel bristling darts, if it is not love for her offspring? Patient, self-sacrificing love and endurance to save her child, which we should deem most touching and noble in a human mother. And the cat that discovered her four young kittens lying by the pond, where they had been drowned, what, if it was not love for her offspring, could have prompted her in her then weak state, to carry them one by one to her home, quite a long distance off, thus travelling eight times back and forth; so that when her painful task was done, she laid down by them, and died from suffering and exhaustion? Both well authenticated cases, and many more such might be related.

We had at one time a pair of canary birds, who appeared to be a very loving little couple, building their first nest in much harmony, the happy wife doing her part as faithfully, and showing herself as capable as her spouse; and ere long they reared a family of fine children. In due time, after harmoniously clearing out the old nest from their nurse basket, they proceeded to build a new one. But soon the little dame, for some unaccountable reason, began tossing out their building materials as soon as they had begun to re-arrange them. Her mate bearing this strange behavior, and helping her to begin anew to build, again and again, with a patience that we thought was truly commendable,—for her conduct seemed entirely inexcusable,—until finally it seemed to become past patient endurance any longer; and this little lord of his creation deemed it his right to exercise some authority; attempting by chastisement to compel her to do her work properly; and he pecked her several times pretty severely. Before she had time however to profit much by his corrections, evening came on, and they both went quietly to their perches to sleep for the night. But alas, when I first went to the cage the next morning, the poor little wife was crouching on the floor of it, the top of her head bare of feathers and bathed in blood, and her companion sitting mournfully on his perch. I immediately took her out, hoping she might not be seriously injured, and that some healing application might restore her. But before I could do anything for her, she made a sudden convulsive movement and died on my hand. I then took her back and put her into the cage. Her mate gazed at her a little while, then came down from his perch and first pecked gently at her

feathers—then took hold of her and pulled her a little, back and forth; but no, he could not arouse her; then he began running around her, while singing incessantly, until finding all his efforts were vain, he returned to his perch: from that time, all through the day he refused nourishment of any kind, and remained almost immovably with bowed head on his lonely resting place. The following morning I found him stretched out lifeless on his cage floor. Some, perhaps may say, this is not a very telling instance in support of: faith in true affection between animals. But I believe it is. This canary bird had been; kind, loving partner to his beautiful little mate; but her strange conduct about so important a business, was enough to wear out the patience of the best of husbands. Although I was sorely grieved, that he should have taken her life, I felt he was not to be condemned as unmerciful or unloving. He knew of but the one way to endeavor to convince her of her error—if she was demented, he was no judge of that—he “knew nothing of the anatomy” of the head, that pecking would bring out feathers, make the blood flow, &c.—and he was not aware that it would cause pain much less death, as he had never experienced it nor even witnessed it before. So that when he became conscious of his bereavement,—an possibly—that he had brought it upon himself,—he was overwhelmed with grief, refused to be comforted, and died of a broken heart.

So many instances have been known where it would appear that the peculiar conduct of animals could be attributed alone to the existence of strong affection for each other, it is not easy to understand why any should be willing to question it, merely because of some occasional apparent *inconsistencies*; at one drawing the inference therefrom, that they “entirely paint the brute;” instead of endeavoring to account for them in some other equally, if not more natural manner, and on that would not “grate upon our sensibilities.”

Seeing, as P. G. H. observes, “the impossibility of *knowing* the real sensations of animals,” let us rather encourage the belief, that the All-wise, Beneficent Creator, having constituted the nervous system of the *brute* animal, that he is not only alive to physical suffering, but also to painful feelings very nearly allied to mental sorrow—as is very often apparent—while conferring upon the *human*, in addition to the unspeakable blessing of spiritual consolation and joy, the sweet soothing happiness arising from our warm affections for each other, has also in his unbounded goodness, bestowed this last precious boon, this merciful compensation, upon the higher orders of the brute creation. That He has not so nearly limited their enjoyment to the grosser sensual pleasures of eating &c. Let us never believe otherwise than that they really *know* of the happiness of love. That the endearing tenderness always comes to the mother's heart, on the occurrence of “one of the most touching incidents in nature”; and it becomes a special source of happiness to her. That she knows, and loves her own because it is her own—though under some circumstances she may adopt another fondling—which, with many known cases, even different species of animals becoming strongly attached to each other, where they have been closely associated, is added evidence, that as their existence will terminate here, the merciful author of it has designed

that while they live—as far as their nature will admit—this world shall be to them a happy world.

Selected for "The Friend."

Fourth day, 4th of Third month, [1807.] We have now been nearly two weeks very closely engaged in our arduous service of visiting the families of Friends in Grace-Church-Street Monthly Meeting, and my beloved and honorable companion [Mary Pryor] and myself, have hitherto been enabled to move along in much harmony and concord. I feel it very relieving to my exercised, and often deeply tried mind, to have the company and help of one whose religious experience has been much larger than my own. One who, after so long a warfare under the banner of the Captain of salvation, can frequently testify that he is worthy to be obeyed to the utmost of our ability; that verily his "yoke is easy, and his burden light." Mat. xi. 30. I think I never could more feelingly subscribe to the same gracious truth, than since the commencement of the present engagement; for though, at times, the faithful laborer must be brought into a state of bondage, when and where the pure seed is kept in captivity; yet it is a favor to be found worthy to suffer with a suffering Lord. I believe all the exercises which dedicated minds may be permitted to pass through, for themselves and for others, are not so great as those which are often imposed, by the enemy of all good, upon such as are pursuing the vain and delusive pleasures of the world.—*Mary Alexander, Friends' Library, vol. xiii. page 88.*

#### Scientific Notes.

*How colds are caught.*—There are several well-known processes by which a cold may be caught. As a disease, there is nothing so common; and yet it is only very recently that anything like an approach to a knowledge of its pathology has been attained. There is now, however, a large accumulation of evidence which points very strongly in the direction that "taking cold" is actually "being cold."

Rosenthal has very carefully investigated the relations of the body-heat, and has demonstrated the existence of a central heat-producing area, and an external heat-radiating surface. A rise in temperature is due to the disturbance of the balance normally existing betwixt these two antagonistic areas. An excessive heat-production may produce fever; or this may be due to an impairment in the cooling processes, so that heat accumulates. Precisely the opposite of this leads to a lowering of the body-temperature: if the heat be lost more rapidly than it is produced, then a "chill" results.

Let us see how this applies to colds, so frequently caught from a wetting. The clothes we wear are good non-conductors of heat, and so prevent the loss of body-heat which would occur without them. But let them become moist or saturated with water, and then they become heat-conductors of a much more active character, and a rapid and excessive loss of body-heat follows. Nothing is more certain, however, than that prolonged exposure in wet clothes is commonly followed by no evil results; that is, so long as there is also active exercise. The loss of heat is then met by increased production of heat, and no harm results. But let the urchin who has been

drenched on his way to school sit in his wet clothes during school-hours, and a cold follows. No matter how inured to exposure the person may be who, when drenched, remains quiet and inert in his wet clothes, he takes a cold. Here there is an increased loss without a corresponding production of heat, and the temperature of the body is lowered, or the person "catches cold."

The effect of exercise in producing heat is well known. Unless the surrounding air be of a low temperature and the clothes light, the skin soon glows with the warm blood circulating in it, and then comes perspiration with its cooling action. Here there is a direct loss of heat induced to meet the increased production of heat. Exercise, then, in wet clothes, produces more or less a new balance, and obviates the evil consequences which would otherwise result.

The loss of heat is more certainly induced if the skin be previously glowing and the circulation through the skin, the cooling area, be active. Thus a person leaves a ball-room with his cutaneous vessels dilated, and a rapid loss of body-heat follows, unless there be a thick great coat or a brisk walk; if the clothes become moistened by rain or be saturated with perspiration, the radiation of heat is still more marked. Such is the causation of the cold commonly caught after leaving a heated ball-room. It is probable that exhaustion is not without its effect in lowering the tonicity of the vessels, and so those of the skin do not readily contract and arrest the loss of heat.

Rosenthal found that a rabbit exposed to a temperature of 100 deg. Fahr., for some time had a lowering of the body-temperature of no less than 2 deg. for two or three days afterwards. The dilated cutaneous vessels had not sufficiently recovered their tone to contract and arrest the loss of heat. Those who live in superheated rooms readily take cold on exposure. There exists a condition of the cutaneous vessels which gives a tendency to lose heat, and less exciting causes will induce a cold.

A damp bed gives a cold, because the moist bed-clothes are much better conductors of heat than are the same clothes when dry. The temperature of the body is lowered, and a cold results. Long exposure in bathing leads to similar consequences. The second feeling of cold in bathing tells that the body is becoming chilled, and that the production of heat is insufficient to meet the loss. A run on the river-bank, or a brisk walk after dressing, commonly restores the lost balance.

The plan of permitting the wet clothes to dry on the wearer is very objectionable. The abstraction of heat from the body by the evaporation of moisture in the clothes produces a marked depression of the body-temperature, and a severe cold. This is most strikingly seen in the effects of a wetting in the Tropics. The smart shower or downpour is quickly followed by a hot sun and a breeze, and the loss of heat under these circumstances is considerable. The person is "chilled to the bone," and the effects are felt for a long time afterwards. The effects of the evaporation under these circumstances is illustrated by the Tropical plan of placing water in a vessel of porous clay, wrapping a wet cloth round it, and exposing it to a breeze. The water becomes distinctly cold.

The effect of a strong impression is equivalent to a longer action which is not so marked.

So a sudden sharp cooling, and a longer and slower process, alike produce those lowered temperatures which lead to severe and often fatal consequences.

But if "taking cold" is "being cold," how, it may be asked, does a feverish condition result? It is the normal course of a cold to cause a high temperature and then to de-fervece. This is due to a want of promptness in the regulatory arrangements.

Where there are an increased loss and an increased production of heat simultaneously, they neutralise each other. When there is much muscular exercise, there is perspiration; where there is much loss of heat, there is increased production of heat. In those inured to exposure, an immediate increase in the production of heat probably exists. In others, a lack of promptness in the heat-producing processes occurs, a delay indeed, and then the chill and lowered temperature are followed by a time of increased production of heat, and a feverish condition results. Instead of the evolution of heat being instituted at the time of the excessive loss of heat, it comes on slowly and forms a reactionary disturbance—an oscillation of the balance; being much depressed, it rocks to an equal extent in the opposite direction. Habit endows the system with an educated power of maintaining the balance; disuse lessens the power. The more people take care, in the common way, against cold, the more susceptible they become, and the less exposure is sufficient to disturb their more mobile body-balance.

The practical considerations which are the out-comes of this review of the pathology of cold are these. Never to wear wet clothes after active muscular exertion has ceased, but to change them at once; to meet the loss of the body-heat by warm fluids and dry clothes; to avoid long sustained loss of heat which is not met by increased production of heat; to increase the tonicity of the vessels of the skin by cold baths, &c., so educating them to contract readily on exposure—by a partial adoption, indeed, of the "hardening" plan; to avoid too warm and debilitating rooms and temperatures; to take especial care against too great a loss of heat when the skin is glowing.

*Gentle Words.*—Who has not felt the influence of a gentle word? what person have they not overcome with a greater power than harsh words or taunting remarks? Yet how few are in the habit of using them. Persons of the most trying dispositions, breaking forth in loud exclamations of anger, without any regard for the feelings of the individual for whom they were intended, become as calm as a summer's day, when the answer in return was all gentleness; they become ashamed and humbled before their victim. Again, we see those who have met with others like themselves, answering each other tauntingly, and so keep up the controversy for hours, when a gentle word would have settled all difficulties. What worlds of luxury do they afford the weary culprit; he receives with heartfelt gratitude one little word in kindness spoken; they revive the better feelings of his heart. To the old they are a balm of consolation that will light up the aged features with a smile beautiful to behold. They bind the links of affection we have for our children nearer to our hearts, and cause their little breasts to palpitate with joy; so it is with every one, even

the most depraved. Why, then, should we not endeavor to smile sweetly upon all, and ever strive to use gentle words to those that surround us? They are little words that require neither wealth nor exertion upon our part to bestow.

NOT ALONE.

Not alone, however dreary,  
Sad and cruel seems my fate,  
Angels yet may hover near me,  
Spirits from the heavenly gate;  
And the cry which rose in sorrow  
From my heart, "I am alone,"  
Shall be stifled, if the morrow  
Give me wisdom to atone.

"Not alone," the flowers tell me;  
"Not alone," the birds declare,  
As with music they o'erwhelm me,  
Warbling in the perfumed air,  
Forest, mountain, glade and river,  
Studded firmament above,  
Whisper to my soul, "Ah! never  
Doubt thy Heavenly Father's love!"

Thus no more I'll sadly ponder  
On my short-lived earthly wrongs,  
But with faith, and love, and wonder,  
Seek that which to Heaven belongs.  
Man's oppression cannot hurt me;  
Jesus' love arrests my fear;  
Not alone, though men desert me;  
"Not alone," for God is near.

TEACH ME PATIENCE, LORD TO WAIT.

When beneath Thy chastening rod,  
Let me feel Thy love so great;  
Subject only to Thy will,  
Teach me patience, Lord, to wait.

Give me of Thy richest grace;  
Teach me all my sins to hate;  
Let my life be wrapt in Thee:  
Teach me patience, Lord, to wait.

When, forgetful of Thy care,  
Trial seemeth long and great;  
Teach me then, Thy time is best,  
Teach me patience, Lord, to wait.

Lord, for me Thy sufferings were;  
Without Thy trials, what my fate?  
A heaven, a crown is offered now;  
Teach me patience, Lord, to wait.

When at last Thy will is wrought,  
Open wide the golden gate;  
For rest, celestial joy and peace,  
Then shall I no longer wait.

The Acacia and its Ants.

One low tree, very characteristic of the dry savannahs, I have only incidentally mentioned before. It is a species of acacia, belonging to the section *Gummifera*, with bi-pinnate leaves, growing to a height of fifteen or twenty feet. The branches and trunk are covered with strong curved spines, set in pairs, from which it receives the name of the bull's-horn thorn, they having a very strong resemblance to the horns of that quadruped. These thorns are hollow, and are tenanted by ants, that make a small hole for their entrance and exit near one end of the thorn, and also burrow through the partition that separates the two horns; so that the one entrance serves for both. Here they rear their young, and in the wet season every one of the thorns is tenanted; and hundreds of ants are to be seen running about, especially over the young leaves. If one of these be touched, or a branch shaken, the little ants (*Pseudomyrma bicolor*, Guer.) swarm out from the hollow thorns, and attack the aggressor with jaws and sting. They sting severely, raising a little white lump that

does not disappear in less than twenty-four hours.

These ants form a most efficient standing army for the plant, which prevents not only the mammalia from browsing on the leaves, but delivers it from the attacks of a much more dangerous enemy—the leaf-cutting ants. For these services the ants are not only securely housed by the plant, but are provided with a bountiful supply of food; and to secure their attendance at the right time and place, this food is so arranged and distributed as to effect that object with wonderful perfection. The leaves are bi-pinnate. At the base of each pair of leaflets, on the mid-rib, is a crater-formed gland, which, when the leaves are young, secretes a honey-like liquid. Of this the ants are very fond; and they are constantly running about from one gland to another to sip up the honey as it is secreted. But this is not all; there is a still more wonderful provision of more solid food. At the end of each of the small divisions of the compound leaflet, there is, when the leaf first unfolds, a little yellow fruit-like body united by a point at its base to the end of the pinnule. Examined through a microscope, this little appendage looks like a golden pear. When the leaf first unfolds, the little pears are not quite ripe, and the ants are continually employed going from one to another, examining them. When an ant finds one sufficiently advanced, it bites the small point of attachment; then, bending down the fruit-like body, it breaks it off and bears it away in triumph to the nest. All the fruit-like bodies do not ripen at once, but successively, so that the ants are kept about the young leaf for some time after it unfolds. Thus the young leaf is always guarded by the ants; and no caterpillar or larger animal could attempt to injure them without being attacked by the little warriors. The fruit-like bodies are about one-twelfth of an inch long, and are about one-third of the size of the ants; so that the ant bearing one away is as heavily laden as a man bearing a large bunch of plantains.

Both in Brazil and Nicaragua I paid much attention to the relation between the presence of honey-secreting glands on plants, and the protection the latter secured by the attendance of ants attracted by the honey. I found many plants so protected; the glands being specially developed on the young leaves, and on the sepals of the flowers. Besides the bull's horn acacias, I, however, only met with two other genera of plants that furnished the ants with houses, namely, the *Cecropia* and some of the *Melastomæ*; but I have no doubt that there are many others. The stem of the *Cecropia*, or trumpet-tree, is hollow, and divided into cells by partitions that extend across the interior of the hollow trunk. The ants gain access by making a hole from the outside, and then burrow through the partitions, thus getting the run of the whole stem. They do not obtain their food directly from the tree, but keep brown scale-insects (*Coccidæ*) in the cells, which suck the juices from the tree, and secrete a honey-like fluid that exudes from a pore on the back, and is lapped up by the ants. In one cell eggs will be found, in another grubs, and in a third pupæ, all lying loosely. In another cell, by itself, a queen ant will be found, surrounded by walls made of a brown waxy-looking substance, along with about a dozen *coccidæ* to supply her with food. I suppose the eggs are removed as soon

as laid, for I never found any along with the queen-ant. If the tree be shaken, the ants rush out in myriads, and search about for the molester. This case is not like the last one, where the tree has provided food and shelter for the ants, but rather one where the ant has taken possession of the tree, and brought with it the *coccidæ*; but I believe that its presence must be beneficial. I have cut into some dozens of the *cecropia* trees, and never could find one that was not tenanted by ants. I noticed three different species, all, as far as I know, confined to the *cecropia*, and all farming scale-insects. As in the bull's-horn thorn, there is never more than one species of ant on the same tree.

In some species of *Melastomæ* there is a direct provision of houses for the ants. In each leaf, at the base of the laminae, the petiole, or stalk, is furnished with a couple of pouches, divided from each other by the midrib. Into each of these pouches there is an entrance from the lower side of the leaf. I noticed them first in Northern Brazil, in the province of Maranhão; and afterwards at Pará. Every pouch was occupied by a nest of small black ants; and if the leaf was shaken ever so little, they would rush out and scour all over it in search of the aggressor. I must have tested some hundreds of leaves, and never shook one without the ants coming out, excepting one sickly-looking plant at Pará.

Amongst the numerous plants that do not provide houses, but attract ants to their leaves and flower-buds by means of glands secreting a honey-like liquid, are many epiphytal orchids, and I think all the species of *Passiflora*. I had the common red passion-flower growing over the front of my verandah, where it was continually under my notice. It had honey-secreting glands on its young leaves and on the sepals of the flower-buds. For two years I noticed that the glands were constantly attended by a small ant (*Pheidole*), and, night and day, every young leaf and every flower-bud had a few on them. They did not sting, but attacked and bit my finger when I touched the plant. I have no doubt that the primary object of these honey-glands was to attract the ants, and keep them about the most tender and vulnerable parts of the plant, to prevent them being injured; and I further believe that one of the principal enemies that they serve to guard against in tropical America is the leaf-cutting ant, as I have noticed that the latter are very much afraid of the small black ants.

If the facts I have described are sufficient to show that some plants are benefited by supplying ants with honey from glands on their leaves and flower-buds, I shall not have much difficulty in proving that many plant-lice, scale-insects, and leaf-hoppers, that also attract ants by furnishing them with honey-like food, are similarly benefited. My pine-apples were greatly subject to the attacks of a small, soft-bodied, brown coccus, that was always guarded by a little, black, stinging ant (*Solenopsis*). This ant took great care of the scale-insects, and attacked savagely anyone interfering with them, as I often found to my cost, when trying to clear my pines, by being stung severely by them. Not content with watching over their cattle, the ants brought up grains of damp earth, and built domed galleries over them, in which, under the vigilant guard of their savage little attendants, the scale-insects must, I think, have been

secure from the attacks of all enemies.—*Belt's Naturalist in Nicaragua.*

### Chinese Etiquette.

The Flowery Land, as the inhabitants love to call it, gives to Europeans the idea of a colossal petrification; it is as unchanged in its customs and in its maxims as when the ports were first opened to our merchandise, and looks upon the barbarians with incredible scorn, very trying to an Englishman's self-esteem. It seems to have conquered space by the extent of its empire, and time by its duration, and to have been far above us in many inventions as well as in bringing its rules of social life to a high-bred standard. Some of the peculiarities in their manners shall be described for the amusement of our readers in the following papers.

The dinners given by the higher classes are very grand affairs, and consist of an incredible number of dishes. Such a feast must be preceded by three invitations, consisting of notes written to each invited guest. The first is sent the evening before, the second on the morning of the day of the repast, to remind the guests of the request made to them, and begging them not to fail; the third arrives when all is ready, and the master expresses his extreme impatience to receive them. Following their ancient customs the place of honor is given to strangers, the one from the greatest distance taking precedence, whilst the head of the house accepts the humblest position. He introduces his guests into the dining room, salutes them one after another, and, pouring wine into a china cup, makes a low bow to the highest in rank, and offers it to him. But the guest must, in all politeness, prevent his doing so, and, taking another cup of wine, try to carry it to the place occupied by the host, who in his turn hinders him with the usual terms of civility. When they sit down everything is reversed from our European fashion. A splendid dessert is handed round, all the beautiful fruits that grow in that warm climate, pines, oranges, apricots, plums, almonds, peaches, and many unknown to us. The steward, kneeling on one knee, begs everyone to enjoy themselves. At his request each one takes his cup of wine with both hands, and first raising it as high as his head, then lowering it below the table, afterwards drinks it slowly, the master finishing first, and showing them that his cup is empty, every one following his example. The courses of meat which succeed are indescribable; but as the Chinese generally excel in cooking, they are by no means objectionable to an English palate. There are birds' nests, worms of all kinds, fishes, entrails, lichens. Such are the simplest of the dishes; others are so minced and changed in character, that M. Ude himself would have been perplexed how to define them. At the beginning of the second course each guest has a small red paper bag brought to him by his own servant, which contains a little silver money as a fee for the cook, the steward, the comedians, and those who wait at table. More or less is given, according to the rank of the entertainer, but it is not expected unless the feast is accompanied by a comedy. Of course the host makes many objections to accepting the offering; but this is only one of the shams of social life, and never listened to. When all is over soup is handed round as a conclusion, and during the whole course of the dinner, which

lasts some two hours, large quantities of hot tea are drunk, and the fingers are wiped on pieces of paper instead of napkins.

These rules of politeness are all regulated at Peking by the tribunal of rites, who watch over their observance with as much jealous anxiety as a political body in Europe does over the maintenance of a constitution. In case you wish to pay a visit to a mandarin, the proper thing to do is to send in your card. This is a small piece of red paper on which your name is inscribed, followed by a polite sentence such as this: "The tender and sincere friend of your lordship, and the perpetual disciple of your doctrine, thus presents himself to pay his respects and to bow before you to the earth." If the mandarin is willing to receive you, he goes forward and asks you to pass before him. You are expected to make the humble reply "I dare not;" and after an infinity of gestures, which are all arranged, and obligatory phrases, the master of the house bows to a chair, and slightly dusts it with the corner of his robe, upon which you are at length seated. The difficulties are much increased when ten or a dozen mandarins call upon an Englishman at once, and, according to custom, tea is offered, beginning at the one of the highest rank. He pretends to offer it to the next, then to the third, and so on to the last. All having politely refused, he permits himself to drink it. The second, in his turn, has to offer his cup to the others, and thus the farce proceeds, until all have gone through the wearisome task. The whole scene passes with imperturbable gravity, and it requires the greatest self-command not to smile at such etiquette.

(To be concluded.)

For "The Friend."

### The Culture of a Strawberry-bed.

In my garden is a strawberry-bed which yields a bountiful supply of fruit. But it has furnished a full illustration of the truth of the common remark, that nothing valuable is to be obtained without corresponding labor and pains. The proper preparation of the ground, the selection and setting out of the plants, and their subsequent cultivation till they had overspread the plot assigned them, and had obtained the age and vigor requisite to enable them to produce a large amount of luscious berries, are not the only things that experience has shown to be needful. After the first full crop was borne, and the plants were left to throw out their runners, and renew their strength for the production of fruit in the following year, it soon became apparent that various unwelcome intruders had established themselves in the bed, and if not removed would overshadow the rightful occupants of the soil, hinder their growth, and rob them of their proper nourishment. The slender spears of grass of several varieties, the heads of clover, and the stems of weeds of many kinds, were to be seen thickly projecting above the leaves of the strawberry plants. Some of these were easily removed; others clung so tenaciously to the earth, and were so deeply rooted, that unskilful force merely detached the part above ground and left the subterranean portions still alive. One of the most troublesome was the common sheep-sorrel (*Rumex acetosella*), which throws out, just under the surface of the earth, long roots. These wander over the bed, and send up at intervals leaves and stems.

While removing these hurtful weeds, and thus assisting in the development of the future crop, the mind found some relief from the tediousness of the labor, by reflecting on the lessons which it naturally suggested. The sacred writings often compare the church and its members to outward and visible things—"A garden enclosed is my sister, my spouse." "The daughter of Zion is left as a cottage in a vineyard, as a lodge in a garden of cucumbers." "Thou shalt be like a watered garden." The Prophet Isaiah in figurative language speaks of the church as a vineyard, of which he says, "I the Lord do keep it; I will water it every moment: lest any hurt it, I will keep it night and day," and continuing the same metaphor he adds, "He shall cause them that come of Jacob to take root: Israel shall blossom and bud, and fill the face of the world with fruit."

My strawberry-bed might be compared to a church (or to an individual member of it,) which had experienced the operations of the Lord's hand, by which it had in measure been reclaimed from its former neglected condition. The fallow-ground has been broken up; the rampant growth of evil propensities, words and actions, has been cut down, and good seed has been sown in the heart, which under the fostering care of the Heavenly Gardener has taken root and grown. Through the aid of His Holy Spirit and the renewed visitations thereof, which descend on the soul as the dew and the rain, the plant of Heavenly origin has borne fruit, it may be of humility as shown in a meek and humble behavior, of kindness to all, of quiet submission to severe trials, or of more conspicuous, because public, labor for the religious welfare of others. Those who are thus exercised, especially those engaged in the great work of proclaiming the gospel of light and salvation, are exposed to some trials of a peculiar nature—and it is wise for such to prize and improve the intervals of rest from active service which are granted by the Lord of the vineyard. Let them, as well as all others, examine the gardens of their own hearts. They will find young weeds coming into view here and there among the good plants, which must be removed or they will soon grow and destroy the beauty, and lessen the fruitfulness of their fruit beds. They may discover that the kindness and sympathy of their friends, and the favor with which their ministrations have been received, have nourished a disposition to appropriate to themselves the honor which belongs only to the Giver of all our gifts; and that, like the sorrel, this hurtful weed has been secretly insinuating its fibres into their hearts, until it has so developed that its acid leaves are being shot up into sight. They may find that they have relaxed in that tenderness of conscience and watchful care to avoid the first approach to evil, into which they were led in the day of their espousals; when, yielding themselves fully into the Divine hand, they followed Him into the wilderness, and "Israel was holiness unto the Lord, and the first-fruits of his increase." From this neglect may have followed too much indulgence to the appetites of the body, too much latitude in the range of the thoughts, and too little restraint on the expressions of the tongue. The danger of this is especially great, if in earlier years they have yielded to corrupting influences. Through submission to Grace, they may have been enabled to remove all visible signs, and faith-

fully to reject all temptations to indulge in the sins, which at one time so easily beset them. But their roots remain long in the ground, and in an unguarded hour often manifest their presence. What sad examples have we seen of persons who for a series of years had maintained an unblemished reputation, and yet have afterwards yielded to temptations, which at one time they probably thought they had fully mastered! Let him that thinketh he standeth, take heed lest he fall; and let us all feel the importance of the apostolic injunction, to work out our salvation with fear and trembling—a fear lest by any means we should come short of that heavenly rest which has been set before us.

The evil seeds which grow in the heart of man are as multifold in number and form, as the weeds which spring up in our gardens. Some make their appearance in the early springtime of life, others flourish more luxuriantly in the meridian of our strength and vigor, and others again find a congenial climate in the autumnal period. There is no way in which our gardens can be kept clean, but by heeding the injunction which our Saviour has so emphatically given, as of universal application, "What I say unto you, I say unto all, Watch." As this holy watch is maintained, our eyes will be anointed to see, and strength will be given to remove those things which are of evil tendency. J.

For "The Friend."

### The Heart of Africa, by Dr. Schweinfurth.

(Continued from page 346.)

In the return of our travellers from the territories of the Monbutto, they passed through the country of the Niam-niam, and designed gathering up the ivory which they had purchased on their outward journey, and left in store to await their return. Wando, the chief in whose dominions the ivory had been deposited, determined to keep the ivory, and if possible destroy Aboo Sammat's party and possess himself of all their treasures. As the Nubians approached his dominions they found suspended over their pathway, a stalk of maize, a feather and an arrow, emblems of defiance, and an official declaration of war. Soon after entering the country they were met by some of his men, who professed that they could give them a safe conduct, and offered their services as guides. The result Dr. Schweinfurth thus describes.

Starting afresh, Mohammed led the way. He was himself unarmed, but he was attended by his young armor-bearers, and followed by a detachment of his black body guard. Next in order and close behind were the men whose mediation and offers of guidance had yesterday been accepted. Somehow or other I could not get rid of my presentiment that these fellows were not to be trusted, and accordingly, contrary to my custom, I took good care to keep my trusty rifle in my hand. It struck me as very remarkable that in the villages which we passed the men, women, and children were all assembled in crowds, and calmly watched our progress, just as though there was no rumor or thought of war.

After about half a league, I was at the head of a column of bearers, but I had fallen some hundred paces behind Mohammed. All at once several shots fired in rapid succession made me aware that something unusual had happened in front. Looking to the right I saw some natives rushing away at full speed

across the steppes; a hasty fire was opened upon the fugitives, and their savage yells of pain betrayed that some of them were wounded although they contrived to make good their escape. Another moment and I caught sight of Mohammed being carried back towards us with a broad streak of blood across his white sash, and close beside were the two little armor-bearers writhing with their faces to the ground, their backs pierced by the native lances. It was a ghastly sight. Dashing up to Mohammed I ripped up his clothes, and discovered at a glance that my poor friend had received a deep spear-cut in his thigh. I did not lose an instant in adopting what measures I could. I had a box of insect needles in my pocket. Water, of which we were always careful to have a supply, was close at hand. Mohammed's own muslin scarf was just the thing for a bandage. Having carefully been washed, and then bound together with half-a-dozen of the strongest of the pins, and finally enveloped in the scarf and tied with yarn, the gaping wound was completely dressed, and began to heal almost as soon as it was closed.

The sad event had occurred in this way. One of the pretended guides forced his way between Mohammed and his young shield bearers, and brandishing his lance cried out, "The people of Yuroo are for peace, we are for war." Mohammed instinctively made a sidelong movement to escape the falling blow, and thus probably saved his life. Meanwhile the other natives attacked the boys and stabbed them between the shoulders. Although Mohammed had escaped the direct blow that was designed, the huge lance, with its head a foot and a half in length, had sunk deep into his flesh. With the fortitude of desperation he dragged the murderous weapon from the wound, hurled it after the fugitive assassin, and then fell senseless to the earth. The injury caused by the barbs of the spear (which were an inch long) was miserably aggravated by the impetuous fury with which the weapon was extracted. The wound was broad and deep enough to admit my whole hand, and had only just escaped the kidney, which was visible through the open flesh.

In their first surprise at the sudden attack, Mohammed's personal retinue had fired almost at random after the fugitive traitors; but as their guns were only loaded with deer-shot, they for the most part hit the enemy without killing them. Immediately upon this there ensued a general chase, and during the time that I was engaged in binding up Mohammed's wound, I could hear the report of fire-arms along the whole line of our procession.

And now again a halt was ordered, the columns of bearers were collected, their loads were deposited in piles upon the ground, and the signal was given for a general plunder. Joyfully enough was the order hailed; it was especially welcome to the hungry Bongo after their scanty fare on the previous days.

By sundown the whole region about was clear of the enemy, and as darkness came on the bearers returned within the shelter of our abittis, laden richly with spoils that they had secured in the adjacent villages. Sentries and watch-fires were established, and the night was passed in a stillness that was rarely broken by a stray and distant shot. With the exception of a few Bongo bearers, who, yielding to their marauding propensities, had pushed too far into the hamlets, we had

suffered no loss. Two of the Nubians, however, had received severe lance-wounds, and had to be carried back to the camp on litters.

It was currently reported among the natives that Mohammed was mortally wounded. Encouraged by the accession of fresh contingents during the night, they once again made the woods re-echo with their savage war-cries amidst which could be heard the vilest and most abusive Arabic invectives that they seemed to have learnt for the mere purpose of vituperating their enemies. Mbahly's death, however, was the burden of their chorus. "Mbahly! Mbahly! Give us Mbahly. We want meat." Mohammed would not submit to these taunts. In spite of his weakness he insisted upon showing himself. With his wound firmly bandaged, he was conveyed beyond the camp to a white ant-hill, from whence he could be seen far around. For nearly a quarter of an hour he stood upon this elevation swinging his scimitar, and shouting with the full strength of his voice, "Here I am, Mbahly is not dead yet." He then challenged them to come with a hundred lances if they dare, and retorted upon them in jeering scorn their cry of, "Pushyo! pushyo!" (meat, meat), always using the Niam-niam dialect, in which he was tolerably fluent.

The tribe who had attacked them were the A-Bango. They had been instigated by Wando, and waited for his arrival with reinforcements. But Wando had had an unpropitious augury at the beginning of the fray, and had abandoned his scheme. The A-Bango therefore withdrew, and the Nubian party thus made their escape from the danger which had been so threatening, but much of their ivory remained in the hands of their enemies.

Another portion of Mohammed's men fell into an ambush in the Niam-niam country, and it was with difficulty that they made their escape after losing several of their number, and nearly all of their ivory, and having many wounded. Dr. Schweinfurth says:

It was while they were crossing one of the brooks overhung with the dense forests which now for so long I have designated as galleries that the fatal attack took place; the consternation of the defenceless bearers, and consequently the confusion of the whole party, would seem to have been very terrible. The first discharge of Niam-niam lances had strewn the ground with dead and wounded, the column of the unfortunate bearers furnishing the larger proportion of the victims. Previous to the attack not a native had been seen. Nothing could be more crafty than their ambush. Some of them had taken up their position behind the larger trees; some had concealed themselves in the middle of the bushes; whilst others, in order to get an aim from above, had ensconced themselves high up, contriving to lie full length upon the overhanging boughs where the network of creepers concealed them from the keenest vision. Badry's recital brought vividly to my mind the battles with the Indians in the primeval forests of America, where similar stratagems have been continually resorted to.

The soldiers kept up their fire with energetic vigor; they are accustomed to carry a number of cartridges arranged like a girdle right round their waist, and having their ammunition thus conveniently at hand they kept up their discharges unintermittingly until

they had collected their wounded; but the bodies of those who had been actually killed all fell into the hands of the assailants and were carried off without delay, all attempts at recovering them being utterly unavailing, because the irregularity of the ground prevented any organized plan of attack.

The bearers, meanwhile, had flung away their heavy loads, and in wild flight had retreated to an adjacent hill that rose above the teppe; here they were in a short time joined by the Nubians, who sought the eminence as commanding a view whence they might survey their position and concert measures for their future protection. Most of the deserted ivory, of course, had become the prey of the bee, but some of the Nubians had taken the precaution of burying the burdens in a swamp within the gallery, under the hope that they might recover it in the following year. Thus deprived of their proper occupation, the bearers were at liberty to carry the wounded, and a treaty was concluded with the enemy so that the party ventured to quit their quarters. The natives, however, were utterly treacherous; they were bent upon the annihilation of the intruders, and so, reinforced from the neighboring district, they made a fresh and savage attack. In consequence of this the Nubians were compelled to come to a stand in the open plain, and lost no time in collecting whatever faggots they could get to make an abattis.

Behind this abattis they had to hold out for three entire days. The excited Niam-niam persevered in harassing them with unwearied assaults; and as three independent chieftains had summoned their entire forces for the attack, the combined action was unusually formidable; not until the store of lances and arrows was all used up were the furious sallies brought to an end and the Nubians permitted to go upon their way. The enemy, it was said displayed such unabated energy that when all their ordinary lances had been spent they procured a supply of pointed sticks, which they proceeded to hurl with all their might against the Nubian band; it was, moreover, asserted that the quantity of shields and lances was so large that the besieged used no other fuel for their camp fires during the entire period of their detention. Besides the weapons that were burnt, the negroes attached to the caravan brought away a considerable number of lance-heads, which they had tied up in bundles of nearly a hundred and designed for trophies to decorate their own huts.

As one cause for the unusual hostility exhibited by the Niam-niam towards the ivory dealers, our author mentions the fact that the soldiers had carried off as slaves some of their women. This aroused them to the highest degree of exasperation, for the affection these people exhibit for their wives is most unbounded.

(To be continued.)

## THE FRIEND.

SIXTH MONTH 27, 1874.

We are not among those who believe, that since, what is called the canon of the Scriptures has been completed, there has nothing been written under the immediate inspiration of the Holy Spirit that dictated *them*; but while giving them the pre-eminence over all

other writings, we doubt not that good men and women who lived in obedience to the government of their Divine Master, have been influenced by Him at times to pen descriptions of their religious experiences, and to give instructions in righteousness, which have been made instrumental in throwing light on the path of the newly enlisted and unpractised traveller in the way towards the city of the great King, in confirming the faith of the sincere but doubting believer, and in comforting and strengthening those who were weary, and sorely tried with the difficulties and subtle temptations that beset their spiritual progress.

It is thus that the records of the lives and varied exercises of those servants of the Lord, who have felt themselves called to narrate in simplicity and faithfulness the dealings of the Lord with them in the great work of regeneration and sanctification, are often made useful to those who come after them, by giving them to see, when under suffering, stripping and manifold temptations, that no strange thing has happened to them, but that the fiery trial they have to endure has been the common lot of all who submit to Christ's baptism, and are thus made to partake of his sufferings; and thus incite them to persevere in the strait and narrow way, with the blessed hope that, like those who have gone before, they too shall experience, when his glory is revealed they will be glad also with exceeding joy.

Those who are familiar with the writings left by many of the men and women in our own religious Society, who attained to a firm establishment in the unchangeable Truth, must have observed as a striking feature in them, the uniform testimony they bear to the indispensable necessity of giving up every thing that springs from or ministers to the corrupt spirit of the world; which spirit fallen human nature is prone to worship and take delight in, as it and its products are congenial with its own carnal propensities and lusts. Thus the lessons given them in the school of Christ, though taught perhaps in ways differing according to their individual character, had the same object; to learn them to deny themselves—their own natural will and inclination—to take up the daily cross, and thus become as strangers and pilgrims, shunning the fashions and friendships of the world, which are at enmity with Him they desired to serve.

The fervent love with which their hearts glowed to Him who visited them with his Day-spring from on high, convinced them of sin, brought them under condemnation and heartfelt repentance therefor, and for His own mercy's sake forgave their past transgressions, made them willing to sell all and follow Him away from the forms and practices of religion, which unregenerate men have contrived as a substitute for the crucifying, heart-changing religion of Christ. Thus their state at times was analogous to that of the church when the Most High speaks of her in these words: "I will allure her, and bring her into the wilderness, and speak comfortably unto her. And I will give her her vineyards from thence, and the valley of Achor for a door of hope; and she shall sing there as in the days of her youth, and as in the day when she came up out of the land of Egypt."

It was to such as these, and often when under these dispensations, that the blessed Head of the church, not only gave a clear sight of their own condition and the service

He required of them, but revealed to them the condition of the church, and in times of adversity, the causes for which He covered the daughter of Zion with a cloud, and cast down from heaven unto the earth the beauty of Israel, and remembered not his footstool, in the day of his anger.

We have been instructed in reading some of the letters of that wise woman and deeply experienced handmaiden of the Lord, Deborah Bell, written near the beginning of the eighteenth century; showing the sense given her of the causes which were betraying the Society of Friends in England into the low state that marked its history a little later. Solomon truly says there is nothing new under the sun; the same causes, if allowed to act, produce the same effects, and perhaps some of our readers may be able to draw similar instruction as ourselves from the following extracts, and applying them to the state of things in the Society in our day.

"I think I do daily see more and more need to cry out, O! this inwardness, this inwardness, is what has been too much wanting in a general way, and is still wanting. For it seems to me, that many are in the high road to ruin for want of this true inward waiting to know the Spirit of Truth to leaven and subdue their own spirits, and also to open in them such things as might be serviceable and beneficial in the churches of Christ, both with respect to doctrine and discipline." "It is but a few in comparison, who have an ear open to bear what the Spirit doth say to the churches: but when the Spirit doth speak through any, O how do they kick, and even make a mock at it, and at such as are led and guided by the dictates thereof. So that things are in a lamentable condition, and it seems to me the true church is returning into the wilderness again, where she sits solitary and mournful. Yet the Lord sees her in her disconsolate state; and my faith is firm, that the time will come, in which He will bring her back, and she shall be seen to lean upon the breast of her beloved; for in him is all her hope and trust. Many who once were members of her have forsaken the Lord, and trusted to and leaned upon the arm of flesh; so that it may be said, with the prophet in former days, one has builded a wall, and another has daubed it with untempered mortar. And I believe the day is coming, in which the wall, which men have in their own wisdom and strength been building for a shelter to them, shall fall, and the foundation thereof shall be discovered; and both the builders and the daubers shall be confounded in that day. For the Lord will overturn all that is not upon the right foundation, in the day when He will arise in his power to cleanse his churches and purify his temple." \* \* \* \* \*

"The church is in my judgment in a poor condition, and many of her living members are almost overborne and crushed by those who are in such a state as renders them incapable of membership in that body which has a holy Head, and is made all holy by the virtue and power which flows from Him and circulates through every member. But such is the declension of this age, that I fear too many who are accounting themselves members of this holy body, know very little what holiness is, at least as to the practice of it. It is as if some now-a-days did not believe that text, 'Without holiness none shall see the Lord,' except they think holiness consists in talking

of good things now and then. Indeed, talking is the highest attainment some are come to, and by their fair speeches and feigned words they deceive the simple, but cannot deceive such as have a true discerning, and are minding more how they walk than how they talk." \* \* \* \*

"According to my sense and judgment, she [the church] is in a very mournful state, and is rather going into than returning out of the wilderness. And that which most deeply affects my heart, is, that too many who pretend to be watchmen upon her walls are exceedingly ignorant of her condition, and instead of giving a faithful warning of approaching danger, and seeking to make up the breach and stand in the gap, are with might and main seeking to make the breach wider. By this means a door is opened to let in a flood of wickedness, which if the Lord God of Zion do not, by a mighty hand, put a stop to, I am afraid will prove a flood of utter ruin to abundance [of persons.]" "The cross is very little borne now-a-days, except by a small remnant, and these are by the others accounted a narrow-spirited people, who say they make the way more narrow than there is need for. But sometimes I am ready to fear, such have either never entered in at the strait gate, or else after sometime have returned back into the broad way again. Such may well be numbered among some of old, whom the apostle calls foolish, because they did not obey the Truth after it was revealed, but having begun in the Spirit, sought to be made perfect by the flesh. This seems to be the state of many in our day; and what will be the consequence of these things is known unto Him that knows all."

#### SUMMARY OF EVENTS.

**FOREIGN.**—The 20th inst. being the thirty-seventh anniversary of Queen Victoria's accession to the throne of Great Britain, the day was observed by the usual noisy demonstrations, such as ringing of bells, firing of cannon, &c.

The success of the Congress of International Law, called to meet at Brussels, is said to be very doubtful. The governments of England, France and Austria, raise objections to the scheme, and Switzerland extends to it but feeble support.

The *London Observer* publishes the text of a resolution which Dr. Isaac Butt, M. P., for Limerick, proposes to move in the House of Commons on the 30th inst., in substance as follows: That in the opinion of the House it is expedient and just to restore to the Irish nation the power of managing exclusively Irish affairs in an Irish Parliament, provision being made at the same time for maintaining the integrity of the empire by leaving to the Imperial Parliament control of Imperial affairs.

The strike in which more than 10,000 miners were engaged in Cleveland, Yorkshire, has ended by the men accepting the master's terms, which impose a reduction of 12½ per cent. in wages.

The House of Commons has passed a licensing act by a vote of 328 to 39.

The British Ministry have decided to defer the recognition of the Spanish government until its reorganization has the appearance of greater permanency.

Liverpool, 6th mo. 22d.—Uplands cotton, 8½ a 8¾d. Breadstuffs firmer.

Recent votes in the French Assembly have encouraged the hopes of the Republican members, and probably the motion for a dissolution of the Assembly will not be urged at present. On the 19th an amendment to the municipal organization bill was adopted by a vote of 379 to 341, which completes the defeat of the measure. The amendment in effect maintains the existing system of municipal elections. This vote was unexpected and caused great surprise. A Paris dispatch says: "The Right" is deeply discouraged by the recent votes in the Assembly. It feels that its power is gone, and the majority which it was hitherto able to command is broken up.

On the 20th the municipal organization bill was again before the Assembly, and the Minister of the Interior announced that the government had accepted the amendment proposed to the bill, which extends for two years the operation of the present law providing that nominations for mayors shall be made by the government. The amendment was thereupon adopted by a vote of 358 to 329.

A Calcutta dispatch says, that the prospects for the future crops are greatly improved by copious rains now falling throughout the country. Three hundred thousand persons are still being fed by the government.

The steamer Africa has returned, after successfully submerging her section of the Brazilian cable. The line has been tested and found to work well. Telegraphic communication is now complete to the Cape Verde Islands, and thence to Brazil.

Advices from Rio Janeiro to the 6th inst., state that the yellow fever had broken out in Bahia, and was raging with great violence.

Military operations in the north of Spain have been temporarily suspended on account of inclement weather and sickness in the army of General Concha.

The frontier town of Fliqueras, in Gerona, is closely invested by the Carlists. They still hold Estalla with a strong force.

The Pope has delivered an address to the Cardinals, in which he renews his protest against the annexation of the Papal States by Italy, the abolition of religious corporations, and other usurpations. He says he has received overtures of reconciliation, but declares that he cannot make peace with enemies of the church. He exhorts the cardinals to imitate the conduct of foreign bishops, especially those of Germany and Brazil.

The Turkish vessel, Kars, was run into on the 19th, in the sea of Marmora, by an Egyptian vessel, the Behra, and sunk in a few minutes. There were 340 persons on board the Kars, only 20 of whom were saved.

On the 21st inst. a great water-spout formed in the harbor of Havana, and passed through the shipping causing much damage. The Russian bark Jenny was capsized, and several small boats were sunk. The column was dissolved by the firing of a ship of war.

A slave-ship, with 225 negroes aboard, from Mozambique bound for Madagascar, has been captured by an English man-of-war. The slaves were put aboard with only two days' provisions. The voyage was prolonged to eight days, and their sufferings were indescribable. Many died before they returned to Africa.

It appears that in the ten days ending the 10th inst., forty-five ships of the aggregate burden of seventy thousand tons, passed through the Suez Canal. The transit revenue collected in the same period amounted to \$171,200.

The Porte has prohibited the circulation of the Bible in Turkey.

**UNITED STATES.**—The two Houses of Congress have passed another bill in relation to the currency. The vote in the Senate was 43 to 19, and in the House of Representatives 221 to 40. The bill fixes the maximum issue of greenbacks at \$382,000,000, and requires that amount to be kept in circulation. It forbids further increase of the National Bank currency, and provides for the redistribution of \$55,000,000 of said currency to be taken from States having more than their fair proportion, and given to those which have less than their share. The bill makes no reference to a resumption of specie payments, or for the retirement under any circumstances of any portion of the government issues. The bill has been signed by the President.

Among the acts of the recent session was one to admit, free of duty, articles intended for the International Exhibition of 1876. The Senate and House disagreed on the Geneva award bill, and a committee of conference was appointed. The report of the committee as adopted, leaves out the insurance companies entirely and provides only for the payment of undisputed claims of ship owners, less the amount they have received for insurance. The provisions of this bill will not take more than four millions out of the fifteen awarded by the Geneva arbitrators and paid by England. The claims of the insurance companies must go over till next session.

On the 22d inst., which had been fixed as the day of adjournment, much business was hurried through, but so much still remained that it was found necessary to extend the session another day.

There were 399 deaths in New York city last week, and 270 in Philadelphia.

President Grant has laid before the U. S. Senate for consideration: "A treaty for the reciprocal regulations of the commerce and trade between the United States and Canada, with provisions for the enlargement of the Canadian canals, and for their use by the vessels of the

U. States on terms of equality with British vessels. It is understood that the President will call no extra session for the consideration of this treaty at present but that he will by proclamation, convene the Senate for that purpose about ten days before the meeting of Congress in the Twelfth month next.

**The Markets, &c.**—The following were the quotation on the 22d inst. *New York.*—American gold, 111½ U. S. sixes, 1881, registered, 116¾; do. coupons, 121¾; do. 5-20, registered, 1868, 117; do. coupons, 121; 5 per cents 114. Superfine flour, \$5 a \$5.55; State extra, \$5.8 a \$6.40; finer brands, \$7 a \$10.25. No. 1 Chicago spring wheat, \$1.47; No. 2 do., \$1.42; red western \$1.45 a \$1.52; white Indiana \$1.62. Oats, 62 a 67 cts. Western mixed corn, 81 a 82½ cts.; white, 90 cts. *Philadelphia.*—Middlings cotton, 17¾ a 18½ cts. for up lands and New Orleans. Superfine flour, \$4.75 a \$5.50 extras, \$5.50 a \$6; finer brands, \$6.50 a \$10.25. Amber wheat, \$1.58 a \$1.60; Penna. red \$1.50 a \$1.53; western red \$1.40 a \$1.45. Rye, 95 cts. Yellow corn, 80 cts. Oats, 58 a 63 cts. Sales of about 2500 beef cattle at 7¼ a 7½ cts. per lb. gross for extra, 8 cts. for a few choice, 6½ a 7 cts. for fair to good, and 5 a 6 cts. for common. About 8000 sheep sold at 4¼ a 6¼ cts. per lb. gross, and 4000 hogs at \$8.50 a \$8.75 per 100 lbs. net. *Chicago.*—No. 1 spring wheat, \$1.28; No. 2 do., \$1.22½; No. 3 do., \$1.17½. No. 2 mixed corn, 60½ cts. No. 2 oats 46 cts. No. 2 rye, 85 cts. Lard, 10-11 cts. *St. Louis.*—No. 2 winter red wheat, \$1.32; No. 2 spring, \$1.09 No. 2 corn, 59 cts. Oats, 45 cts. *Cincinnati.*—Mixed corn, 62 a 64 cts. Oats, 50 a 57 cts. Rye, 90 cts. Lard, 10½ cts. *Baltimore.*—Western red wheat, \$1.35 a \$1.45; western spring, \$1.30 a \$1.37. White corn, 87 a 90 cts. Oats, 65 a 67 cts.

#### RASPBERRY STREET COLORED SCHOOL FOR GIRLS.

Wanted, an energetic competent Teacher for the above School, to commence 9th month 1st. Apply to Eliza B. Edwards, 516 Spruce street, Rachel S. Maris, 127 South Fifth street, Sarah E. Smith, 1110 Pine street.

#### WANTED.

An unmarried Friend to take the position of Governor at Westtown Boarding School, on or before the close of the present session, in the 10th month next.

Apply to

Clarkson Sheppard, Greenwich, New Jersey,  
Joseph Walton, Moorstown, "  
Charles Evans, 702 Race street, Philadelphia.

#### WANTED

A young man of energy and perseverance, to take charge and oversight of the farm belonging to the Wyandott Mission, situated near Teneca, in the State of Missouri; also a woman well qualified to fill the place of Matron in the Boarding School. Friends would be preferred. For further information apply to John S. Stokes, Office of "The Friend," Fourth above Arch street.

**MARRIED,** on the 27th of Fifth mo. 1874, at Friends' Meeting-house, Flushing, Ohio, ULYSSES A. MCGREW, of Cedar Co., Iowa, to SUSAN, daughter of Aaron and Frances Branson, of Barnesville, Ohio.

**DIED,** on the 12th of the First month, 1874, aged seventy-two years, NATHAN HALL, a member and elder of Short Creek Monthly Meeting, Ohio. He was firmly attached to the doctrines and testimonies of the Gospel as held by Friends, and felt constrained to bear his testimony against the modern innovations thereon. His life and conversation were consistent with the profession he made, and though paralysis prevented communication by speech, his friends have a consoling belief that through the mercy of his Redeemer his end was peace.

—, at the residence of his son, Chester A. Weaver, Smyrna, Chenango Co., N. Y., JOHN H. WEAVER, formerly of Hopkinton, R. I., on the 3rd of Fifth month, 1874, being his ninety-fourth birth-day. He had long borne a testimony against the many innovations in our religious Society, often remarking thereon. He was a steady attender of meeting through nearly all his long life; though during the last two years he was able to meet with Friends but seldom. He spent much of his time in reading the Holy Scriptures and the Journals of Friends. One of his relatives remarking she was glad to see him so quiet and peaceful, he answered, "I have long tried to get into a lamb-like state." His friends have the consoling belief that his end was peace.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, SEVENTH MONTH 4, 1874.

NO. 46.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,  
PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

## Star-Streams.

(Continued from page 354.)

The stellar heavens present us with a problem of vast difficulty—the problem of determining the laws according to which those myriads of orbs which the unaided eyes can see, or which the telescope reveals, are distributed throughout space.

My purpose in the present paper is to pursue an inquiry (commenced by me some five years ago) into a certain peculiarity of the arrangement of objects within the star-depths, which appears to promise some insight into the real laws of stellar aggregation. I refer to the circumstance that there may be observed among the stars a tendency to arrangement in streams, of greater or less length, and more or less distinctly recognizable. We recognize so clearly within our solar system such motions and such laws of distribution as suggest a process of evolution, that the mind is led to inquire whether the motion of the stars and their arrangement throughout space may not indicate the action of a yet higher order of evolution. If the genesis of a solar system has been or is being revealed to us, may not the genesis of a galaxy be one day revealed in like manner?

Let us now turn to the disension of those observed facts, simply, which seem to show that the stars in certain regions have been gathered into streams.

The reader is aware that the six stars which ordinary powers of sight recognize in the Pleiades are but a few among a very large number which are seemingly collected towards one particular region of the heavens in this place. Now, if we consider *only* two stars of the Pleiades, considerably unequal in magnitude, it must be regarded as not only possible, but (on *à priori* considerations) highly probable, that these two orbs lie at very different distances from the earth, and are not physically associated. But we are not free to extend this reasoning, which is admissible in the case of two stars, to the whole group of the Pleiades, and to argue that, because we have no means whatever of determining the actual distances of the orbs in that group, we are not at liberty to assume that they form a real clustering aggregation of stars. In so doing, we should undoubtedly be losing sight of evi-

dence which absolutely demonstrates the clustering nature of the Pleiades. We have only to consider the mathematical probability that so many orbs would be gathered together within a certain portion of the heavens in the Pleiades, when the total number of stars between the same limits of magnitude is such and such, to see that we have not to do with an accidental phenomenon due merely to the apparent association of stars of many orders of distance in nearly the same direction, but with a real aggregation of stars into a definite cluster, surrounded on all sides by comparatively vacant regions. We know that William Mitchell, more than a hundred years ago, by simply considering the six brighter stars of the Pleiades, was able to show that the odds are about half a million to one against the association of these stars being apparent only.

Now it is worthy of notice that, even among stars of the first three or four orders of magnitude, signs of aggregation are discernible, which appear too marked to be due to mere chance distribution. For instance, if we take an equal surface (*isographic*) chart of the northern heavens, showing all stars down to the fourth magnitude inclusive, we are struck by the singular vacancy lying where modern astronomers place the constellation of the Camelopard. Within an oval space, having Polaris and Castor as the ends of its longer diameter, Dubhe and  $\delta$  Aurigæ as the ends of its shorter diameter, there are but three stars above the fifth magnitude, although this region extends over some fifty-eight degrees in length and about thirteen degrees in breadth.

But it is when we consider the stars down to the fifth magnitude inclusive that we first begin to recognize the existence of a marked tendency to stream-formation. It is among these stars, in fact, that we find those streams which the ancients recognized when they gave to certain star-groupings such names as Hydra, Draco, Serpens, the River Eridanus, and when they marked down among the constellation-pictures two streams from the water-can of Aquarius and a band connecting together the two fishes. The prolongations of some of these streams of lucid stars have been recognized by those modern astronomers who gave to certain southern star-groupings the names Hydrus, Reticulum, and the like.

Now, the chief question which has to be answered, in considering the evidences of stream-formation, is whether the streams are apparent only or real; and, in order to answer this question, we have to inquire what form or degree of streaminess (so to speak) might be expected among the 1,500 stars, down to the fifth magnitude inclusive, if these were really spread at random over the celestial sphere. In another of these essays I have indicated the means whereby I have tested this matter, and the conclusion to which I have been led—*this* namely, that although among 1,500 or 2,000 points distributed at random over a surface of any kind, certain groups re-

sembling streams might be recognized, such streams would not be nearly so well marked as the streams actually observed among the stars down to the fifth magnitude. But, on the other hand, it is not to be expected that the star streams actually recognized should be so exceedingly well marked and regular, or should be traceable over such great distances, that the reality of the stream-formation would be obvious at once. Had this been the case, indeed, the reasoning by which I have endeavored to establish the reality of the phenomenon would not have been required. The first astronomers would have recognized the phenomenon as clearly as we can do. Therefore I do not consider the arguments which have been chiefly urged against these streams of lucid stars, regarded as having a real existence, as needing refutation. It has been urged that the streams can only be traced over such and such distances; that they can be carried this way or that, according to fancy, and so on. This, however, was to be expected; if it were otherwise, the reality of the streams would long since have been recognized: and apart from this, remembering that we are looking into the depths of space, and that, supposing star streams really to exist, we must see them foreshortened—in many instances projected on a background of stars less systematically distributed, and in other cases *mixed up* seemingly with other streams, either nearer or farther off—the wonder rather is that any well-marked *portion* of any stream should be recognizable, than that no stream should be traceable over very large areas on the heavens, and still less from its beginning to its end. That the reader may form his own opinion as to the reality of the streams traceable among stars down to the fifth magnitude, I give the case of the stars forming the connecting band of Pisces, a star-group which is certainly not the most remarkable for streaminess, but chances to be more convenient for the purposes of illustration than most others. We have certain lines along which the stars are plentifully strewn, while the adjacent spaces are relatively vacant. This feature, recognizable not only in this case, but in others, and even more markedly in several instances, is one which cannot reasonably be ascribed to mere coincidence. Let it be noted, moreover, that whatever significance we attach to it, when considering the stars of the first five orders of magnitude, must be enhanced if, as we proceed, we recognize a similar feature, (on a different scale, however) among stars of lower orders of magnitude.

Before leaving the connecting band of Pisces, however, I would invite special attention to the manner in which the two star streams are conjoined. We see these streams converging upon a single star brighter than those which form the streams themselves; and we may also trace, not indistinctly, a certain general equality of distribution among the stars of the two streams. The former

feature is, however, the only one I care at present to dwell upon; and it is to this particular arrangement of streams—two or more (but usually two) proceeding from a single star—or of branches proceeding, as it were, from a single stem, that I have given the title of star sprays. In searching among the star-depths revealed by telescopes of considerable power, many cases may be noticed in which such star sprays exhibit a singular uniformity of structure. The stars of the leading magnitudes are too few in number to afford many well-marked instances. I may note, however, the arrangement of the stars in Coma Berenices as one illustration of this sort; the stars 7, 14 and 13, forming the stalk of the spray. Another illustration may be recognized in the stars forming the poop of Argo and the hind-quarters of Canis Major. The streams from the water-can of Aquarius form a more extensive, but perhaps less satisfactory, illustration of the same peculiarity.

I may say with confidence that it is wholly impossible to regard them as accidental; they indicate beyond all possibility of question the existence of some real cause which has led to a drifting of the stars towards certain regions.

(To be continued.)

*The Two Roses.*—Being with my friend in a garden, we gathered each of us a rose. He handled his tenderly; smelt to it but seldom, and sparingly. I always kept mine to my nose, or squeezed it in my hand; whereby, in a very short time it lost both its color and its sweetness; but his still remained as sweet and fragrant as if it had been growing upon its own root. These roses, said I, are the true emblems of the best and sweetest creature-enjoyments in the world—which, being moderately and cautiously used and enjoyed, may for a long time yield sweetness to the possessor of them; but if once the affections seize too greedily upon them, and squeeze them too hard, they quickly wither in our hands, and we lose the comfort of them; and that, either through the soul surfeiting upon them, or the Lord's righteous and just removal of them, because of the excess of our affections to them. It is a point of excellent wisdom, to keep the golden bridle of moderation upon all the affections we exercise on earthly things; and never to let slip the reins of the affections, unless they move towards God, in the love of whom there is no danger of excess.—*Flavel.*

### "No More Than You Can Avoid."

*Some observations on the utility of a "not."*

I have noticed for years that careful grammarians and good writers use this absurd expression, as thus: "Stay no longer than you can avoid," "Say no more than you can help," &c. A recent editorial article in one of the city morning papers wound up with advice to the sea-sick to "be as little below as you can possibly help."

The absurdity is perfectly evident on examination. One "can avoid" staying a lifetime, and he "can help" saying a great deal or being below deck the whole passage. The correct expression required by the meaning is "than you cannot avoid." This will be seen by sub-tituting "than you are compelled to," to which the latter expression is equivalent. Or analyze the sentence into two parts, and it will be plain that, for instance, "I remained no longer than I could not avoid," is correct, because the meaning is that I could

not avoid remaining (say) ten minutes, and I remained no longer than that time.

I have thought it worth while to call attention to this universal error because all with whom I have discussed it begin by ridiculing, and end by admitting it.—*Evening Post.*

For "The Friend."

### Memoirs and Letters of Sarah Hillman.

(Continued from page 345.)

"*Philada., 8th mo. 6th, 1854.* \* \* \* Gladly would I sit awhile with ——— and his sick daughter, were it practicable, feeling tender sympathy with him in his afflictions, which doubtless are in mercy designed for his furtherance in the way of life and salvation; and may they be blessed to his beloved companion, and to his tender offspring. I cannot but believe there is a blessing in it. There is but one way to the kingdom of Heaven, and that is the way of the 'weeping cross.' Oh, then, that his precious mind may be brought into holy resignation to the Divine will; may he be enabled to take the cup which his heavenly Father giveth him, that he may experience the peace of God which passeth all understanding to keep his heart and mind, and thus exemplify the blessed fruits of the religion of his dear Lord and Saviour, who 'came that we might have life, and that we might have it more abundantly.'

\* \* \* Surely it is good for us to be afflicted, if we may only be brought nearer to our Father in Heaven through this medium, and instead of trusting for consolation to creature comforts, which are mutable and will soon be removed, come to look to the Lord Jesus, the everlasting fountain of light and life and bliss. Very often do I remember some lines of Heber, where he says:

'Oh! help us Lord each hour of need,  
Thy heavenly succor give;  
Help us in thought and word and deed,  
Each hour on earth we live.  
Oh! help us when our spirits bleed,  
By contrite anguish sore;  
And when our hearts are cold and dead,  
Oh! help us Lord the more.  
Oh! help us through the prayer of faith  
More firmly to believe;  
For still the more the servant hath,  
The more shall he receive.  
If strangers to thy fold we call,  
Implo'ring at thy feet,  
The crumbs which from thy table fall,  
'Tis all we dare entreat.  
Yet be it Lord of Mercy all,  
So thou wilt grant but this,  
The crumbs which from thy table fall,  
Are light and life and bliss.  
Oh! help us Jesus from on high,  
We know no help but thee,  
Oh! help us so to live and die,  
As thine in Heaven to be.'

This is the ultimatum of our wishes. Let us then so run, so fight, so persevere in faith, that we may through mercy obtain the prize at the end of the race."

"*Philada., 9th mo. 10th, 1854.* \* \* Well, we have to know another separation in Ohio Yearly Meeting! Where these separations will end, or where land us all, is beyond the limits of my finite vision. One thing is certain, if the Lord do not help us, we shall find other helpers will fail. May He in his mercy arise and turn again our captivity. The circumstances and manner of it, are as yet so indefinitely known here, it is vain to make any attempt at delineation.\* Some perhaps

\* For a full and explicit account of this lamented separation, see "The Friend," Vol. XXVIII, pp. 7-8, 30-2, and 41-3.

are rejoicing, while it seems more accordan with the feelings of my poor spirit to cry 'Tell it not in Gath, publish it not in the streets of Askelon, lest the daughters of the Philistines rejoice, lest the children of the uncircumcised triumph!' Truly there is of this class among us uncircumcised in heart and ear, to whom the word of the Lord is a reproach, and they have no delight in it: who are laying wait for and watching for our halting. 'What will these do when God riseth up, and when he appeareth what will they answer him?' How we shall be affected by it is a question I cannot fathom; neither who will unite! Still my faith remains firm in Israel's unslumbering Shepherd, and surely he will sustain us if we cleave close to him, sometimes He hides his face from us when we can but mourn; and again he condescends to come as the clear shining after the rain, when His poor feeble, trembling, afflicted little one can sing praise to the springing up of the well-spring of the waters of life."

"*Philada., 1st mo. 10th, 1855.* \* \* \* Oh! how low and insignificant do all mundane things appear, in comparison of winning Christ Jesus, and being found of Him in peace. How I long to be able in my measure, small as it is to say 'The work which thou gavest me to do I have finished, through Christ strengthening me;' and yet, dear ———, my faith is so reduced I hardly dare believe it will be. My only hope is in the mercy of my dear Lord and Saviour, who I know can make up my deficiencies, and blot out of his book of remembrance all my sins of omission and of commission, as well as lead me in the path of righteousness, for his holy name's sake.

May we all, my dear friend, be brought into entire reliance upon his almighty Arm, who still worketh wonders for his people who trust in Him. Then I trust He will in his unutterable mercy make a way through the sea, and a path through the mighty waters, and say unto the proud waves 'Cease from your raging,' and Israel shall go over the sea dry shod."

"*Philada., 3d mo. 15th, 1855.* \* \* \* As I lie upon my sofa, my mind embraces a vast variety of concerns relative to the state of our Society, and the plaintive language arises, 'If the Lord do not help us, whence shall another do it?' Oh! were it not for the mercy of having access through our blessed Saviour to the Father of mercies in such times of treading down and perplexity, what should we do? Methinks the door is open wide for all the suppliants to come and plead and plead again for themselves and for their people: and Jesus the Saviour, the Sent, the Anointed, the Exalted One, is near to support all who cry unto him in faith, and the day is coming when such as have continued with Him, who have had to partake of vinegar mingled with myrrh, will have to sing of his everlasting loving-kindness to their poor souls; for the voice of rejoicing and salvation will be heard in the tabernacles of the righteous, while the City Shushan will be perplexed. \* \* May all the counsel of Abithophel be turned into foolishness, and that work only stand which is wrought by the appointment of the supreme Ruler of the universe, who saith, 'Hearken unto me my people,' &c., &c.

The approach of Yearly Meeting brings deep concern upon every truly sensible mind doubtless, and sleeping or waking, many are the aspirations of even the junior members

with the elder ones, that Jerusalem may be known to be a quiet habitation, and the tabernacles of robbers may not prosper: and it seems to me that some, of whom it might be said, 'Strangers have devoured his strength, and he knew it not,' begin to feel that it is so, and are desiring to find a resting place while the flood of waters is upon the earth. Oh, may they return to the ark where alone is safety. May each one of us be brought clearly to discover our real situation, and in humility and godly sincerity apply to the Physician of value for a remedy. There is but one sure way to the kingdom, one blessed Shepherd, and one true sheepfold."

"6th mo. 5th, 1855. \* \* \* Oh, to be enabled to keep the faith, and to fight the good fight thereof to the end of the race, let come what may, and at the conclusion of all terrestrial things, to be found of Him who is the King eternal, immortal, invisible in peace, what an unspeakable blessing; what a mercy will it be! Let us, my dear friend, press onward, and still onward; let us venture on his Mighty Name, who hath ent Rahab and wounded the dragon. He is able to deliver, and his love is still the same.

Samuel Leeds, I hear, is very poorly; so that we may perhaps never hear the sound of his voice again in our religious assemblies. But I trust his spirit will be centred forever with the myriads of the redeemed around the throne, uniting in the one unceasing song of praise to him who loved them, and hath washed them from their sins in his own precious blood, and hath made them kings and priests unto God and his Father. This is worth living for, and worth suffering for, and unto this glorious end are we called."

(To be concluded.)

### Chinese Etiquette.

(Concluded from page 357.)

In case you wish to write to a person of some rank, white paper must be used, folded ten or twelve times like a fan; the letter is begun on the second fold, and the signature is placed on the last. The smaller the character in which it is written, the more respectful is it considered. When finished, it is put in a small paper bag, outside which is written, "The letter is within." If it be a business paper sent to court, a feather is fastened to the paper; a symbol indicating to the messenger that he must have wings. Such minute formalism makes Europeans seem to these refined mandarins a people of very vulgar manners and incongruous mode of life. What astonishment they experience, for example, when we take off our hats to salute them! as the mere fact of uncovering the head they deem a serious impertinence. In order to conform to this usage, the Roman Catholic missionaries thought it necessary to send to the Pope for permission to adopt, whilst celebrating mass, a peculiar kind of cap, resembling the state head dress of the mandarins.

Amidst the general shipwreck of all kinds of belief that has taken place in China, obedience to parents, and the high value the children attach to preserving their remains, is very remarkable. The horrible crime of parricide is considered a public misfortune, and the flourishing town of Lou-tcheon has become deserted and the home of bandits, owing to this having occurred there. Not only do they throw down the cities which are polluted by it, but they go so far as to put to death the

mandarins for not having prevented it. These unfortunate beings are declared culpable for having allowed the hearts of the people to become depraved by their bad administration. A son who raises his hand against his father does more than outrage nature; he shakes with the same blow the political system, which stands on the double base of filial submission and of paternal authority. There arises from it, on the one side, the strictest dependence, and on the other, limitless and uncontrolled power, the consequences of which are almost insupportable in the family circle; but the doctrine is as dear to a Chinese as the idea of divine right was to our kings of old.

If it should happen that a man die at a distance from his home, a son would be disgraced, especially in his family, if he failed to bring the body to the tomb of his ancestors, and refused to place his name in the hall where they honor them. Thus it often occurs that you meet solemn convoys crossing various parts of the empire, and weighing with heavy burdens on the people, as they are compelled to offer the mandarins who accompany them gifts suitable to the rank of the corpse they are taking to its last resting place. During life it is the duty of each to prepare the coffin for the time of death, and the poor receive, with the warmest expressions of gratitude, a small present to go towards its purchase, which, if it bear the name of a celebrated maker, is a very costly luxury. Not unfrequently you will see the coffin already tenanted and placed in the outhouse where the pigs live, and close to the cooking apparatus, awaiting its burial. After the harvest is over, and time is more plentiful, as well as money to spend in the obsequies, the children will think about burying the father.

Travelling in China is not very agreeable, owing to the extremely dirty state of the inns; men and animals share the same filthy floor in miserable proximity. The manure heap charms the eye of this agricultural people without annoying their sense of smell; and they are too utilitarian in their ideas of its value to banish it to a reasonable distance. The Chinese themselves only stop at a hotel to sleep or to smoke opium; through the half-closed doors you may see, by the light of the little lamp from which the lover of the noxious drug never separates himself, men lying on a mat breathing the white vapor, which by its faint perfume seems almost to intoxicate the looker-on. Happy indeed is he who does not give way to the seductive vice; once begun, it seems as if it could not be conquered, and the wretched votaries entreat the European physicians to give them something which will help them to refuse it, but in vain. Sometimes the only beds in the hotels are couches of granite with sculptured pillows, on which travellers spread their own mattress, sheet, and eiderdown covering, which they manage to pack on their horses. The inn-keeper sometimes furnishes a straw mattress, which is a miserable substitute, as every traveller leaves his tribute of insects; these harbor and increase to such a degree that the clothes of the unfortunate occupier have to be boiled and his limbs rubbed with rice brandy, in which tobacco has been soaked, before he can continue his journey at his ease.

In ordinary cases the room for travellers is but a dark den, where a light must be burned at mid-day, and having no opening but into the stable. But occasionally something bet-

ter is found, when the rooms look on to a gallery running round an interior court. On one occasion the miseries and fatigues of the day were forgotten in such a comfortable resting place, and some one suggested that a bowl of punch should be attempted with the wretched brandy of the country. Setting it on fire the flame was blown about by the wind entering the cracks in the walls, and the passers by looking through the torn paper which covered the windows, and seeing a man with a long red beard stirring up a fantastic fire, which seemed to run over the table, took us for a party of sorcerers composing a philtre, and fled away in alarm. The innkeeper, hoping to gain the favor of strangers versed in the occult sciences, immediately began a serenade which is used in honor of the mandarins, and in which an old drum and iron pan were the chief instruments.

In the town of Hloch-tcheon the people were still celebrating the New Year, though ten days had already passed. It is a great festival with the Chinese. Triumphal arches of painted wood crossed the streets, rising at short intervals in the midst of a gaping crowd. The small low houses, the wooden fronts of which were decorated with many colored lanterns, had the appearance of booths hastily put up for a fair. An acrobat, with his face concealed by a grotesque mask, exhausted himself with contortions on a pyramid of trestles, but notwithstanding his efforts to retain his admirers, they all followed the more wonderful exhibition of real Europeans. Only too frequently they stone strangers, making it unsafe to traverse an inland town. The military mandarins and the soldiers do not show the same pride and disgust to foreigners as the literary ranks. Though the former have rude manners, they are ordinarily more humble, and not being familiar with the classics, they do not worship the past. They recognize fully our superiority in war, as well as in the excellence of our arms. It has cost them much to accede to this, and abandon the errors which their natural vanity led them into; but they console themselves by the thought that they still preserve an intellectual superiority. Yet those mandarins who have grown gray over their books, and have painfully arrived at the end of their career by writing and deciphering all the eighty thousand characters of their written language, guess that in scientific knowledge, and, above all, in our method of writing, we are far before them, and that if we were to substitute a system of phonetic writing, so that the young men in our schools could read English, French, and Chinese in the same characters, their influence would have passed away forever.

In a country like China, where an emperor has burned all the libraries, and thrown the learned men into the fire, it may be possible to hope that a wiser ruler may take under his protection a European alphabet, without consulting or caring for the desperate resistance of the learned men. Although this scarcely seems probable at present, they evidently anticipate it, hating us by instinct, and covertly encouraging the populace to break out in violent attacks on strangers.—*Church of England Magazine.*

A farmer was walking with a friend through a beautiful meadow, when he chanced to observe a thistle growing thriftily on the opposite side of the fence. Immediately he sprang

over and cut it off close to the ground. "Is that your field?" asked the other. "O, no; but bad weeds don't care much for fences. If I should leave that thistle to blossom in my neighbor's field I should soon have plenty in my own." His answer may serve as a hint to fathers and mothers. It is of importance to them how their neighbor's children turn out. Heart weeds care less than thistles for boundary fences. Boys and girls who go to the same school, or who live in the same neighborhood, catch many a trait from each other. It is our duty as well as our interest to do what we can for the benefit of our neighbors' children.—*Late Paper.*

#### The Nitrate of Soda District of Peru.

It very rarely rains at any point on the Peruvian coast, the nearest approach to it being a heavy mist, and there is in consequence scarcely a spot near the sea, away from the immediate banks of the few streams, that would not be, without irrigation, practically a desert. The soil is generally very prolific, and only needs irrigation to produce abundantly, but the lack of water supply confines the cultivated portion of the country west of the Cordilleras to narrow limits. In the province of Tarapaca, however, in which the nitrate of soda is now worked, the soil is apparently utterly barren, and the configuration of the country so peculiar, that it is hard to conceive of vegetation being possible, even with abundant irrigation or regular rain fall.

Between the ocean and the great pampa of Tamarugal, a distance of nearly thirty miles in a direct line, the country is very broken, consisting of small pampas with hills and mountains tossed up in endless confusion. The less elevated places and pampas are more pits than valleys. In former ages, as the sea subsided, it would appear that these pits formed a series of salt water lakes, pools, and marshes, in which the saline constituents of the sea accumulated, from which the nitrate of soda is supposed to have been derived through the agency of carbonate of lime and decomposing vegetable matters. No vegetation is met with in this region, with the exception of a few cacti which derive their support from the heavy fogs, which in the winter season hang for a large portion of the time at the top of high cliffs facing the sea. Its appearance is indescribably dreary and desolate, but there are spots nevertheless where the scenery is fine—even grand—and with certain lights, the mountains, barren as they are, with their many colored tints have a beauty of their own.

The western limits of the district on which the nitrate of soda is worked is generally ten miles from the coast, and extends for about twenty miles in width to the edge of the great pampa of Tamarugal. Its northern limit is about fifty miles north of Iquique, and its southern limit about thirty miles to the south of this point, which is the chief port through which it enters commerce. The deposits of the salt are supposed to extend still further south to the border of Bolivia; and a large district in the latter country is also known to contain it.

The excessive dryness of the atmosphere in this region is extraordinary; the days are almost invariably clear and very warm, timber and plank become warped in an astonishingly short space of time, and books, even with heavy covers, cannot be left exposed for

twenty-four hours on a table without their covers warping. This feature is also observed in the adjoining pampa of Tamarugal, which is in several respects quite remarkable. This plain is over 3000 feet above the sea level, is some thirty miles in width and over two hundred in length, and to the eye is as level as the ocean. It is bounded on the east by the Cordilleras, which rise abruptly to a height of 10,000 feet above the plain. The view on coming in sight of this pampa is very striking; the immense height of this long range of mountains, and the distinctness with which, on a clear day, they can be seen, even in their minute details, make it difficult for one to believe that they can be over five or six miles distant instead of thirty. Until the Cordillera are approached this pampa is as destitute of rain as the region nearer the coast, and parts of it are covered for miles in extent with a coating of common salt, so rough and angular in its surface, that it is almost impossible to take a horse or mule through it without laming them. In some spots, however, where the upper crust to a depth of one or two feet, has been removed, a very rich and fertile soil has been found, capable with irrigation, of raising vegetables and fruits.

The deposits of nitrate of soda are by no means continuous over this large district of 1500 square miles, in which it is now worked. It is generally obtained from the covering of earth, upon the bottoms or edges of the valleys or pits, or at the foot of the hills skirting the pampa of Tamarugal. But the deposit is very irregular, being more in a series of pockets than a continuous stratum.

Almost every where in the valleys, where the actual rock does not reach the surface, is found a layer of indurated gravel. Beneath this gravel is found the nitrate of soda stratum, which varies in thickness from the thinnest layers to beds of 12 feet deep. The amount of the salt contained in it differs greatly, being sometimes as much as seventy-five per cent., but the average quantity would probably not exceed fifty per cent. Its extraction is performed on the spot, by boiling the crude material for several hours, with water obtained from the deep wells sunk in the neighborhood of the factories. The turbid liquid is then run out to settle, and after the mud has been deposited the solution is drawn off into shallow crystallizers. After the nitrate of soda has been collected from these vessels, it is packed in bags, and transported to Iquique for shipment.—*Condensed from a paper by T. F. Flagg.*

*Be Careful in Old Age.*—An old man is like an old wagon; with light loading and careful usage it will last for years, but one heavy load or sudden strain will break it, and ruin it forever. Many people reach the age of fifty, sixty or even seventy, measurably free from most of the pains and infirmities of age, cheery in heart and sound in health, ripe in wisdom and experience, with sympathies mellowed by age, and with reasonable prospects and opportunities for continued usefulness in the world for a considerable time. Let such persons be thankful, but let them also be careful. An old constitution is like an old bone—broken with ease, mended with difficulty. A young tree bends to the gale, an old one snaps and falls before the blast. A single hard lift; an hour of heating work; an evening of exposure to rain or damp; a severe chill; an excess of

food; the unusual indulgence of any appetite or passion; a sudden fit of anger; an improper dose of medicine—any of these, or other similar things, may cut off a valuable life in an hour, and leave the fair hopes of usefulness and enjoyment but a shapeless wreck.—*Popular Science Monthly.*

Selected.

#### THE SECRET SPRING.

"He shall be as a tree planted, and that spreadeth out her roots by the river, and shall not see when heat cometh, but her leaf shall be green." Jer. xvii. 7, 8.

The gentle moon was silvering  
The outline of the trees,  
The lullaby of nature  
Was whispered in the breeze.  
'Twas not a time for talking,  
Or speculations high:  
I wanted to be quiet,  
And hear that lullaby.

I wanted to be silent,  
And watch the waving grass,  
So gracefully inclining  
To let the breezes pass.  
It seemed to grow in beauty,  
The more it bowed its head,  
Like penitential murmurs  
On saintly dying bed.

I marvelled at its beauty  
So manifold, so sweet,  
Like rainbow colors blending  
In harmony complete,  
And while I looked, and wondered  
What made it grow so high,  
The question rose within me,  
Is there a hid supply?

For it was taller, fairer,  
Than all the grass around;  
What made it thus to differ  
From cumberers of the ground?  
At last, the whispering breezes  
This answer seemed to bring,  
(Its echoes rang within me,)  
"There is a *Secret Spring!*"

Thou canst not see the waters  
By which the grass is fed;  
Thou canst not see the brooklet,  
Within its little bed;  
Thou canst not even hear it,  
So quiet is its flow;  
And yet, those hidden waters  
Have made the grass to grow!

Then "planted by the waters,"  
O Saviour, let me be,  
That I may thus be fruitful,  
And glory bring to Thee!  
Not unto me be glory!  
*Thy* praises would I sing:  
Yes, for the grass were nothing  
Without the *Secret Spring.*

Selected.

#### COME TO ME.

What strains of compassion are heard from above,  
Calling sinners to flee to the bosom of Love!  
'Tis the voice of the Saviour who speaks from on high—  
"Turn ye, turn ye, poor wanderers, O why will ye die?  
Turn, turn, ere ye perish, for judgment is nigh."

What a sweet invitation is heard from above,  
Calling children to fly to the bosom of Love!  
'Tis the voice of the Shepherd! how kind is its tone—  
"Come ye young ones to me, ere life's spring time be  
flown;  
I will take you and bless you, and make you mine own."

What accents of comfort are heard from above,  
Calling mourners to rest on the bosom of Love!  
'Tis the voice of our tender and faithful High Priest—  
"Come to me, ye who labor, with sorrows oppress'd:  
Come, and learning of me, your tired souls shall find  
rest."

What songs of rejoicing are rising above,  
From the blest who repose on the bosom of Love!  
'Tis the voice of the ransomed; how joyful the strain—  
Glory, blessing and power to the Lamb that was slain,  
For He suffer'd for us, and with Him we shall reign."  
*James G. Small.*

Selected.

[The following article is from the pen of the well-known entomologist, Rathvon, of Lancaster county, Pa.]

### The Colorado Potato Bug.

The Colorado potato bug, or *Doryphora decemlineata*, has for several years past made alarming ravages in the potato crops of the western section of this country. Some forty years ago, it was known in the Rocky Mountains, where it seemed to be indigenous, feeding upon the *rostratum*, or wild potato. When the common tuber was introduced in that region, the beetle soon attacked it, and spreading from one field to another, in 1859 it had reached a point one hundred miles west of Omaha. In 1861 it invaded Iowa, and crossed the Mississippi in 1864-65.

The beetle lays its eggs on the under side of the potato leaf. These are speedily hatched. The larvæ, when full grown, is over half an inch long, very thick in the middle, and tapering towards the head and tail. It is of a pale yellow color, often dusky or freckled on the back, with small blackish dots, and along each side are two rows of large black dots. The legs are black, and the head black and shining.

The mature insect, the beetle itself, is nearly half an inch long and a quarter of an inch wide. Its shape is oval, very convex above and flat beneath; of a hard crustaceous texture, smooth and shining, and of a bright straw color, the head and thorax being sometimes tawny yellow; head and thorax marked with black spots; the wing cases with black stripes arranged longitudinally, five on each case. The antennæ are twelve-jointed; the first five joints are pale or tawny yellow, the remaining joints black, the last joint being small, and sunk into the penultimate one. The legs are tawny yellow, the hips, knees and feet being usually black. It requires less than a month to pass from the egg to the beetle state.

Where the bug once gets a footing, it speedily destroys the entire crop. It is believed to effect all its transformations in fifteen days, so that a single pair would, if unmolested, produce sixty millions of progeny in a single season. Various modes of preventing its ravages have been suggested. Brushing or shaking the larvæ from the haulm into a vessel, is sometimes tried, but this is a laborious and dangerous operation. Dusting the leaves with white hellebore powder is an effective remedy when it is well done; the powder must, however, be freshly ground, as it loses its efficacy when kept too long. Paris green is also recommended, but both powders are irritating to those applying them, while the latter is extremely poisonous. Birds, it is said, will not destroy the bugs, as the emanations from their crushed bodies are noxious even to human beings, and, it is said, have caused several deaths. The symptoms resemble those caused by the bite of a rattlesnake. The beetle has several insect enemies, especially some varieties of ladybird, which prey upon its eggs and larvæ.

There has been considerable alarm in England lately, lest the pest should be imported thither in American potatoes, and official investigations have been made in order to determine the advisability of prohibiting importations of the vegetable. The report, however, points out that the larvæ of the parasite are not deposited in the tubers or conveyed

by them, and that with the exercise of proper care no danger need be apprehended from American potatoes imported into England.

S. S. Rathvon, the well known entomologist of Lancaster, has furnished the *Morning Review* with the following:

Without entering into a description or history of this scourge of the potato plant, we will give only a synopsis of the possibilities of its increase, and adduce what has, so far, been the most successful artificial remedy for its arrest and destruction.

In the latitude of Southern Pennsylvania this insect is capable of producing certainly two distinct broods during the spring and summer season, but it is more than probable it would produce three broods. Each female beetle, during her life-time, deposits one thousand eggs, at different times, within a period of about forty days. Applying the rule of simple multiplication, should a fertilizer—either by ordinary or extraordinary means—find her way into a thrifty potato field, the result would possibly be the following:

The *first brood* would be *five thousand*, the one-half of which would be females, and very probably more than one-half. Multiply one thousand by five hundred, and we have *five hundred thousand* as the *second brood*, all proceeding from a single female at the beginning of the season. But, suppose an early spring or a late autumn should occur, we might reasonably look for the development of a *third brood* which, by the simple rule above stated, would then reach the almost incredible number of *two hundred and fifty millions*. If these are the prolific possibilities originating in a single gravid female, what would the case be if ten, twenty, fifty, or a hundred such females were to be distributed over a potato field at the same time? That such an exaggerated result would not be likely to follow, is no more reason for the farmers of the country to be indifferent, or relax their efforts to destroy or check the increase of the insect than would be their omission to make any provisions for the future winter, on the ground that such a winter might not come, or to lead a life of moral indifference, on the ground that there *might* be no further tribunal before which an account is due.

To counteract these *possibilities*, there are some helps in the economy of nature, but the *probabilities* must be provided for by human energy, in the application of artificial remedies.

The *best* remedy thus far discovered, is "Paris Green," and the one that is chiefly relied on by those longest and best acquainted with the insect and its habits. This poison duly prepared for use, is kept for sale by the druggists of the Western States, but here in Pennsylvania the demand for it has not yet sprung up. There is very little use in trifling with other remedies, losing time and crop both, where the latter is seriously infested. Vigilant hand picking, early in the spring, before the eggs are laid would be very useful.

Take one pound of (good quality) Paris Green, and twenty pounds of wheat, rye, or buckwheat flour, and mix thoroughly until the poison is equally distributed. Take a common "tin cup," with a perforated lid or bottom to it, (like a common pepper box) and apply the remedy in the morning while the dew is on the plants, or after a shower of rain. It need not be applied, except where there are insects, and is sure to kill all it comes in

contact with. When the insects are yet young, they will be found in groups, and then a small quantity of the mixture will give them their quietus. When the weather is windy, the operator should have the wind blowing from him, in order not to inhale any of the dust. Paris Green may also be used in liquid suspension (it is insoluble in water) in the proportion of one tablespoonful of pure Green to an ordinary bucketful of water, and sprinkle over the plants with any instrument best adapted to that purpose. An instrument has been patented in the West, through which the liquid is blown in the form of spray. Although in this form the remedy is quite as effectual as it is in the form of powder, yet it is considered less economical, heavier to carry, and requires constant stirring, as the tendency of the Green is to settle on the bottom.

Ducks, geese and turkeys are said to feed on these insects, but of course it would not be prudent to allow fowls to enter a field where Paris Green had been used.

For "The Friend."

### The Comet.

As soon as the evening twilight has entirely vanished, when the sky is sufficiently free from cloud and haze, there may now be discerned in the northern part of the heavens, one of those mysterious visitants which we call comets. This stranger was first discovered by Coggia, at Marseilles, as long ago as the 17th of Fourth month. For the last ten days or two weeks it has been visible to the naked eye, except where the moonlight has been too bright for it. With the aid of a glass of low power, however, it can readily be seen even when the moon is shining. The writer has viewed it in this way almost every evening for a week past. It can be found at any time of the night by the following description of its position. The *North star*, the *star* of the "*Dipper*" nearest to the North star, and the *comet*, form very nearly an equilateral triangle. Calling the line joining the two *stars* the *base* of this triangle, then the comet or apex of the triangle is *below* the base in the evening and *to the right* of it in the morning. Its apparent position among the stars changes at present very slowly. Hence it is coming pretty directly towards us. Owing to this foreshortening of its path, there is as yet an uncertainty as to the exact course it is pursuing. According to some observations and the calculations founded thereon, the comet should pass its perihelion about the 18th or 20th of the Seventh month, and be nearest to the earth about the 4th of Eighth month; while other sets of observed positions indicate an orbit that would bring it to its perihelion about the 5th of Seventh month. This uncertainty is to be expected in undertaking to determine the track of a body so very distant under circumstances so unfavorable. We may then expect our comet to become brighter for a week or two, or perhaps for a month or more yet. Should it continue to approach us for a month, it will no doubt be quite a conspicuous object, as its brilliancy will in that case increase to some twelve or fifteen times its present brightness. This evening, the moonlight being out of the way, the comet is pretty distinctly visible to the unassisted eye, but, owing in part to a slight haze in the atmosphere, it is difficult to discern the faint brush of light above it which constitutes its tail.

Those elements of the orbit of Coggia's

Comet, which make its perihelion passage about the 4th of Eighth month, sufficiently resemble the elements of a comet observed in 1737 to render it possible that we are witnessing a return of that body. "If this be so," to quote from an article in an English periodical from which some of the above information is taken—"what strange changes have passed over this England of ours since this bright haze last shed its pale gleam over it! George the Second was then on the throne; Walpole was Prime Minister, and the elder William Pitt had just made his entry into political life. It would be vain to speculate as to the condition of things which will obtain when it shall next reveal itself to the gaze of the earth's inhabitants in the year 2011."

Philada. 6th mo. 30th, 1874.

## THE FRIEND.

SEVENTH MONTH 4, 1874.

### LONDON YEARLY MEETING.

The British Friend contains an account of the proceedings of, and the speeches made in, this Yearly Meeting; which occupies over thirty of its closely printed pages. There are two subjects, each of which called forth much discussion, that involve principles of primary importance to the well being, and we may say to the existence, of the religious Society of Friends, as the present representatives of the faith held by its founders, and preserved by the truly convinced and converted members in the succeeding generations, to the present day.

A Testimony respecting Edward Ash was sent up from Bristol and Somerset Quarterly Meeting. The endorsing of this by the Yearly Meeting was strongly opposed by several Friends, and as strongly advocated by a larger number. To furnish our readers with a correct view of the ground taken against and for the Yearly Meeting giving its usual sanction to this memorial, we give the following extracts.

"When I consider that the energy of this man had been exerted during his whole life (I mean, of course, since he became a public character) to overthrow the very foundation of our faith, and to bring into disrepute the most holy faith delivered to our forefathers, I am not less grieved than surprised to hear such a laudatory testimony presented concerning him. Would it be possible to say more for the most faithful member we ever had? We are told in the testimony that he was 'a faithful minister of Christ.' Friends, *I believe he was no such thing.* It cannot be; for he denied the very, and the only, means by which any man can ever rightly know God and Christ Jesus. How could he be a minister of Him whom he denies the power of knowing. He also flatly denied the universality of the love and grace of God. Can it be possible, that the Almighty Maker of us all will ever bring into existence a single human being, and such shall be without the circle of His love? Such a supposition is utterly untenable, and repugnant to our best feelings, being alike contrary to Holy Scripture, contrary to sound reason, contrary to common sense. We are told that he resigned his membership because he had 'very strong objections' to several parts of Barclay's 'Apology.' We are also told he was re-

instated in membership—but it is very carefully kept out of the testimony whether his views had changed, and he had confessed his error before such re-instatement. As to his doctrine, he is exactly on the same ground, and runs closely parallel with a bitter enemy to the Truth and Friends, who lived some 150 or 170 years ago, who wrote a book called Bennett's 'Confutation of Quakerism,' which was ably replied to by Benjamin Lindley and other early Friends. In this book are to be found passages almost exactly agreeing, *verbatim*, with some in E. Ash's last work—his attack on George Fox. Bennett tells us, 'As for immediate instructions from the month of God, there is no promise that the saints shall enjoy them.' Edward Ash says, 'Nothing is anywhere said in the New Testament which implies the continuance of immediate revelation to Christ's followers,' and so on. Now, if the Scriptures are to be believed, such doctrine is false; and yet this testimony is in adulation of the very man whose last work was to publish and circulate such doctrine! To let such a testimony go forth is to deny the testimony of the fathers in our Society, long since called to their everlasting rest; for if what E. Ash says is correct, their doctrine is false."

"Dr. Ash was not in unity with Friends, and was instrumental in drawing many from Friends. It was not possible to be a Friend and out of unity with the body. 'Barclay's Apology' came freshly to him every time he took it up."

One "referred to the term 'accurate knowledge of Holy Writ,' which the document mentioned as belonging to Dr. Ash as implying that his views were correct, or in harmony with those of Friends. It was afterwards explained that the possession of accurate knowledge was not the same as accurate views. He would have us to be consistent, and reminded us that we had not always printed the Testimonies."

"And as to our friend having been a good Christian, that would apply to the Archbishop of York. Our testimony against war, which Dr. Ash controverted, was a very important one."

"We authorize the publication of a document, and by so much we become responsible for it. Friends spoke of liberty of conscience! It is for that we desire to suffer, but it is a liberty in accordance with the ancient principles of this body. We were sitting within these walls to uphold the profession of truth which has been made by this body—not a profession which has been made by any other body. It was to support these views that we met—not to circulate testimonies concerning a man as a Christian minister, but as a minister holding the principles of our Society."

"Our late friend's mind was one of the finest texture, which could not accept at once what it had been taught, but was impelled to constant investigation. No man had lived more marked by humanity, charity, and conscientiousness of character. It was impossible to take any Friend from the Society whose loss would be more felt. There were many here now he might not quite unite with, and there were things which he had held, opinions which he had declared, and paragraphs he had written with which he could not agree. We must not expect that we all could agree. It was not intended. Our minds would not be so diverse as they are if it were. He could

not help saying to such Friends as had objected that when they got to heaven—for he hoped they would—they would find many persons there they never expected to meet. The testimony he thought admirable in every respect."

"Dr. Ash had been a faithful minister, sound in doctrine, and his clear bold writings had been a very great help to himself."

"Some Friends had impugned Dr. Ash's character because he did not agree with all that was in 'Barclay's Apology.' He (B. D.) hoped he was not bound to believe all that was in 'Barclay's Apology' to be a member of this Yearly Meeting; were it so, he would at once send in his resignation. He did not believe in some things written by Barclay, nor yet in other writings of the early Friends. What we had now to contend for was freedom of conscience. He would give Friends liberty to express their opinions in public. We had not to consider whether Dr. Ash's opinions were good, but was this Friend a true, good man—a faithful child of God. He was all through his life one of the most remarkable specimens of a real Christian the world had ever known. He would ask Friends to confine themselves to the question, 'Is this testimony true?'"

"George Fox never intended that he should be a pope, or that Barclay should be a pope. His object was, 'to lead men to Christ, and leave them there.' Such must be our language still. We must not be tied to the writings of the early Friends. Scripture was our outward guide, the Holy Spirit our inward guide."

"And since then [Dr. Ash resigning on account of the republication of Barclay's Apology] the Yearly meeting had come round to the exact conclusion which Dr. Ash at that time maintained. The Meeting for Sufferings was not publishing any books but those issued by the Yearly Meeting. He hoped the testimony would go down with the others."

"The Clerk stated that the preponderance of the judgment of Friends seemed to be in favor of dealing with this testimony in the usual way."

It appears to have been supposed that by many of the members saying they did not hold the views of Dr. Ash, the meeting, by its action in this peculiar case, might escape the imputation of officially endorsing all that Dr. Ash had written; but it certainly established the principle, that opposition to and controverting the doctrines and testimonies originally promulgated by Friends as fundamentals and heretofore accepted as the faith of Friends, do not disqualify a writer from being recognized as a worthy and consistent member, entitled to a memorial published by the Yearly Meeting, provided he was thought to be a good man.

The Clerk the next day, referring to the passing of this and other memorials, uttered, among other things, the following extraordinary sentiments.

"So far from regarding this diversity as something to be surprised at, or to stumble us, we should see in these very varied experiences the fullest assurance of the truth of the Gospel of Jesus Christ, applicable to very varying minds, and capable of bearing fruit in a great variety of ways. He had thought much yesterday of the wonderful description in the book of Revelation of the full chorus which gladdens the skies—the

voice not of one man, but of a great multitude—of great waters and mighty thunders, all uniting in one volume of praise in singing, 'Alleluia! the Lord God Omnipotent reigneth.' Surely this must be uttered by many voices. There were probably no two voices exactly alike, even in heaven, but all were attuned so that one chorus resulted; and on earth, as it were, there was but an imperfect rehearsal of this; so that there must be some voices out of tune, and some which did not keep time very well—some too fast, and some too slow. If God bears with these imperfections, his servants surely ought to do so also. While we remain here, our ears will hardly be so perfectly tuned with this heavenly music as to be able to say what is real discord and what is 'harmony not understood.' Hence we need charity."

This certainly is charity that will not only cover any multitude of sins against the faith of Friends, but prevent the church from deciding as to whether anything is "real discord" or merely "harmony not understood."

A proposition from Bristol and Somerset Quarterly Meeting that no written answers should hereafter be given to the 2d, 3d, 4th, 6th and 8th Queries, and a proposition from Durham of the same import in relation to all the Queries elicited much debate, and the whole subject of the Queries was referred to a conference to be composed of committees appointed by all the Quarterly Meetings.

When that portion of the report of the Conference which sat in the 11th month last, that refers to the reading of the Scriptures in meetings for worship, was under consideration, J. B. Braithwaite said: "He could not take single particle of the responsibility of introducing this question into our religious Society. He looked upon the basis of public worship as that which is our common standpoint—to present ourselves before the Lord in the name of our one Mediator. He would appeal to Friends to consider well before giving way from this platform. Every member in England, Ireland, and in that vast continent beyond the Atlantic, and in those rising Colonies, which will in future days represent the Anglo Saxon race, every member has a vested interest in the usages of two centuries, and has a right to believe that when he goes to a Friends' Meeting he can present himself before the Lord without the harmony of true worship being disturbed. Were we to think ourselves bold enough to enter into any scheme of alteration of our Christian practice?"

J. Bright, who appears to have taken unusual interest in the proceedings of the Yearly Meeting this year, and to have exerted much influence, remarked: "It would be almost childishness simply to endorse the report of the Conference, for it did not meet the views of any considerable portion of Friends. It would make the law more strict than ever on our morning meetings, while at the same time overturning the system of our afternoon meetings. At any rate, it gives to persons desirous of change in any meeting great influence, derived from the supposed opinion of the Yearly Meeting. Thus in many places it would introduce discord, which would be fatal, and which this Yearly Meeting would soon deeply regret. One thing was clear, that some Friends were dissatisfied with the present mode of conducting worship in our meetings; and that they were groping, if not in the dark, at any rate in the twilight, hoping to find

something better. If it was to be found at all, it would be found in process of time—in process of discussion—in our meetings and at our houses. But it was better, he thought, to let the question rest until that something had been found. The better course for the Yearly Meeting was to accept this portion of the Report of the Conference, and thus let it rest—not to sanction or endorse it in any way. The Conference had expressed our *first* thoughts on the subject: the Yearly Meeting is to represent our *second* thoughts. Almost every person present would agree that we were not in a condition to decide this question. There was a feeling in the Society that some change must take place. The whole question must be sifted, and sifted again, for a year—it might be some years—before it was decided. If you make any move in the direction which is proposed, you necessarily make a first step in a direction ending a very long way indeed from the point at which you start. He did not advise the Yearly Meeting by any means to take that step. He would therefore recommend the course proposed by T. Harvey—that we should accept but give no sanction to this portion of the Report; allowing whatever liberty now exists still to exist; allowing the good men and the good women in our meetings to take what steps may seem to them good in their own meetings. And then the time would some day come when some better decision could be arrived at."

J. Hodgkin said, "the prohibition of the reading of the Scriptures in Meetings for Worship would be a great infringement of liberty. Some had said that if they were thus opened, it would be inconsistent with the presidency of our Lord and Saviour. Did we disapprove of the example He had set us? There was nothing in His sayings, or in the writings of the apostles, which implied we were to be in a better spiritual state than they exhibited. He went with most of those who agreed with T. Harvey. A difference was implied between morning and evening meetings which he could not see right. The result must be rather of compromise than of spiritual judgment, and he hoped a minute would be made allowing liberty."

"A minute was read, saying the subject of the first part of the report from the Conference had been seriously considered, and had elicited large expression. While appreciating the Christian concern of the Conference, we did not see our way to adopt it. In some places, Friends had adopted the reading of a portion of Scripture in some of their Meetings for Worship. With regard to this practice, we had come to no united judgment, but there had been a prevalent desire not to interfere with any liberty in this respect rightly enjoyed amongst us. Nevertheless, we felt an earnest concern that Friends everywhere should be watchful that any liberty thus exercised be exercised in connection with a faithful upholding of our testimony to the nature of pure spiritual worship under the gospel of Christ."

After the reading of the minute a Friend proposed striking out all of it after the first two sentences. "It was," he said, "serious to recognize such a liberty in subordinate meetings. The only course for the Yearly Meeting was to ignore these innovations on the established mode of conducting our meetings for worship—these irregular proceedings under separate organizations."

J. Bright opposed alteration of the minute, and observed: "A very strict law either way would not be desirable. We must acknowledge what existed, and not condemn it as a violation of liberty. It went on to offer a warning to meetings in any changes they were making, to be very cautious that they were right. What was done in the country, depended on the country, not on the Yearly Meeting. Whether what was done were right or wrong depended on the wise judgment of Friends in individual meetings, and touched the matter just where it ought to be touched, and left it just where it ought to be left. The Yearly Meeting in passing the minute, therefore, could rely on the judgment of all that nothing extravagant and wide of the mark would be done. There were some meetings where it had been discussed; some objected to any change, and had great weight in their districts. Unless there was much unanimity in a meeting as to the practice, nothing would be done. When that took place, the Yearly Meeting would be in a very different position if it endeavored to withstand it."

J. B. Braithwaite remarked "that were this an Epistle to a meeting, it would have been carefully considered by a committee, yet have no influence on our testimony or practice except as a message from one church to another. Here, where there was no Second Chamber, where there was no 1st, 2d, or 3d reading, we seemed on occasions of this kind to be so undeliberate in the final utterance of what might affect, in such a Society as this, our children's children for many generations. Were we quite prepared for this? We must weigh well what might become the action of this meeting. If we were to consider this as the final judgment of this meeting, he trusted the observations made by our friend John Bright would have due weight. That part was carefully looked at in the Report of the Conference. Our arrangements as to church government were not congregationalist, but every meeting had a due relation and subordination to other meetings. This might be right or wrong; but if it were wrong, let it be deliberately considered and looked at in all its bearings before it were set aside. We knew where particular meetings, without consultation, had taken their own course in this matter; and after they had taken such a course it would require great wisdom, tenderness, and watchfulness to know what would be the right course for such meetings. Friends would, he hoped, act in forbearing love, and particular meetings should not think themselves justified by this minute in acting without the pretty unanimous concurrence of the meeting with which they were associated."

As this is the most important step yet taken by a Yearly Meeting, in abandoning the principles and practices of Friends, we have given more space in our columns to the notice of it, than we should otherwise have done; for as one Friend truly observed in reference to the compromise, "Let us pause before adopting it. If we did [adopt it] farewell to Quakerism, farewell to consistency, and—as had been said—we should prepare for dissolution in order to avert destruction."

The substance of the minute, as given in The British Friend, is a singular specimen of a record of inconsistent conclusions. The Yearly Meeting shrinks from the responsibility of sacrificing a fundamental principle in the system of Christianity as held by Friends,

by accepting the report, but clothes its component—and heretofore considered *inferior* meetings—with authority to do so, if a majority of their members so will, and at the same time cautions them against violating the testimony to spiritual worship.

Truly this is placing the Yearly Meeting and its authority on a low level. What J. Bright's proposed plan for elaborating a further change in Friends' mode of worshipping will produce, time will divulge.

#### SUMMARY OF EVENTS.

**FOREIGN.**—During the past fifteen years the armies of Russia, Germany, France, Austria and Italy, have grown from 4,229,950 to 6,110,690, an increase of 1,880,740 soldiers. The cost of the armies of Europe last year, when they were generally upon a peace footing, was more than one-fifth of the gross revenues of all the governments from every source.

The successful laying of the submarine cable bringing Brazil into telegraphic communication with Europe and the United States, has been the occasion of much rejoicing in the first named country. Messages of congratulation have passed between the Emperor and President Grant, and the governments of the principal countries of Europe.

According to the official agricultural statistics, it would seem that of the whole surface of England and Wales less than four per cent, or only 1,453,000 acres out of a total of 37,319,000 acres, is occupied by woods, coppices and plantations. The southeastern counties—Sussex, Hampshire, Kent and Surrey—are by far the most densely wooded.

Intelligence has been received in London of the loss of the emigrant ship British Admiral, 1743 tons, belonging to the British Shipowners' Company, and bound for Melbourne. Seventy-eight lives are said to have been lost, and only nine persons were saved.

The bill for the regulation of public worship has passed the British House of Lords. The measure was vehemently opposed by the Marquis of Salisbury and other Tory members who declared it useless and dangerous, affecting questions of doctrine unfavorably, attacking ritualists unfairly, and putting the union of Church and State in jeopardy.

It is now stated that the meeting of the Brussels Congress on International Law will take place. Great Britain has apparently waived her objection.

A deputation of 100 locked-out farm laborers started from New Market on the 29th ult., on a journey through the agricultural districts, in the course of which they will stop at the principal towns and plead the cause of the laborers.

Liverpool, 6th mo. 29th.—Uplands cotton, 8½ a 8¼d. Orleans, 8 5-16d.

The French National Assembly has passed a bill granting 26,000,000 francs indemnity to sufferers by the late war.

Courbet, the artist, has been condemned to pay the cost of the reconstruction of the Vendome column.

Domiciliary visits have been made by the police to the offices of the Imperialist journals and to the residences of prominent Bonapartists, and important documents have been seized.

The Budget Committee have rejected the bill submitted by M. Magne, Minister of Finance, providing for an increase of direct taxation, and have declared in favor of reducing payments to the Bank of France.

The *Journal Officiel* publishes a table of the receipts of French railways during the first quarter of the present year. They amount to 174,871,188f., or 8,184,646f. less than in 1873.

General Omandean will represent France in the Brussels Congress.

The Bonapartists are making vigorous efforts to influence public opinion and turn it to their own account. They are organizing committees in every department, establishing a newspaper organ, and distributing public documents and petitions urging the restoration of the empire. The government is doing something to check the bold proceedings of the Bonapartists. Several members of their committees in the Departments have been arrested. A government order has been issued prohibiting the distribution in France of photographs of the Prince Imperial.

In the Bavarian Chamber of Representatives the Ultramontain party attempted to carry an expression of censure against the Minister of Public Worship, by moving the rejection of his estimates, alleging that he was the author of the conflict between Church and

State in Bavaria. The motion was defeated by a small majority.

The Russian Emperor as a punishment to his nephew, the Grand Duke Nicholas, son of his brother Constantine, for the theft of his mother's diamonds, has banished him to the Caucasus for life, and deprived him of the cross of St. George, which was conferred upon him for his achievements in the Khiva campaign.

A Calcutta dispatch says: It is believed that the distress from famine has been stayed everywhere, and the hopes of the people are reviving.

Pullman palace cars are to be placed immediately on all trains and lines of railroad in upper Italy.

The relations between Turkey and Persia are not friendly. It appears the Persian government has refused to compel the return to Turkish territory of a tribe numbering 2000 families, which has been subject to the Porte, but escaped across the Persian frontier, and that a number of Turks have been maltreated by a band of Persian pilgrims. The Turkish government threatens to force Persia to give up the persons who have abused its subjects, and to surrender the revolting tribe. Unless an accommodation is speedily effected the relations of the two countries will become critical.

The reports of military operations in Spain vary according to the source from which they come. A Madrid dispatch of the 27th ult. states that 10,000 Carlists, under command of Prince Alphonso, had been defeated at Chalva, north-west of Valencia, by a smaller force of Republicans, and that General Concha had executed a successful flank movement on the Carlists resulting in the capture of several important positions. Advices from the Carlist head-quarters at Estella, on the contrary, say there had been some fighting but without important results.

On the 29th ult. intelligence of serious disasters to the Republican army reached Madrid. It appears that General Concha after forcing the Carlists from their first line of defences at Estella, attempted to carry by assault the heights immediately commanding that place. The attack failed and the assailants were repulsed with heavy loss. General Concha and other officers of high rank were killed. According to the Carlist reports the total loss of the Republicans in killed, wounded and missing was 4000, but the government dispatches estimate it at less than half that number.

A Paris dispatch says: The death of General Concha is considered here an event of great political importance. It is believed that Concha intended to proclaim Isabella's son, Prince Alphonso, king as soon as the campaign was brought to a successful issue. The Madrid government deeply mistrusted him.

Very destructive fires have occurred in the government of Volhigia, Russia. A fire one day destroyed 600 houses in a town inhabited chiefly by Jews. The next day nearly as many more dwellings were burned, and the following days the ravages were continued, making thousands of persons homeless.

**UNITED STATES.**—The interments in New York last week numbered 492, and in Philadelphia 240. Both cities have so far continued remarkably healthy notwithstanding the recent high temperature.

Postmaster General Creswell, after more than five years of faithful and efficient service, tendered his resignation to the President. It was accepted, and Eugene Hale, of Maine, was nominated to fill the position.

The Post-Office Department has been officially informed of the ratification of the postal convention between France and the United States, by the French Assembly. The charge for letters from France to the United States, will be ten cents for the third of an ounce, and from the United States to France nine cents per half ounce. Unpaid letters to pay the above rates with five cents additional.

A sad calamity occurred in Syracuse, N. York, the evening of the 23d. A strawberry festival was being held in a Baptist meeting-house in that city, when without any warning the floor gave way, precipitating those gathered into the room below which was also filled with people. Fourteen persons were killed instantly, and many more received injuries, some of which may probably prove fatal. More than one hundred persons altogether were injured. The building was of recent erection, and as the event shows was badly built.

Among the measures which failed to pass at the late session of Congress, for want of time to discuss and dispose of them in the regular course of proceedings, were the Supplementary Civil Rights bill, those for the admission of New Mexico and Colorado as States, for the reorganization of the army, for the construction and repairs of Mississippi levees and many others.

The appropriation bills were considerably reduced from last year. Thus the naval appropriation bill last year was \$22,150,000, and this year only \$16,750,000;

the army last year \$31,750,000, this year \$27,750,000 legislative last year \$23,750,000, this year \$20,500,000 The amount of retrenchment on all the bills aggregate \$27,763,787.

The finances of the government appear to be in more favorable condition than they were at the commencement of the year, so that it is considered probable the current expenditures will be more than met by the receipts. The customs duties have not as yet come up to the estimates, but the internal revenues have exceeded them.

**The Markets, &c.**—The following were the quotation on the 29th ult. *New York.*—American gold, 111½ U. S. sixes, 1881, registered, 117¼; do. coupons, 122; do. 1868, registered, 117; coupons, 120¾; do. 5 per cents 113¾ a 114¼. Superfine flour, \$5 a \$5.60; State extra \$5.80 a \$6.40; finer brands, \$6.50 a \$10.25. No. 1 Chicago spring wheat, \$1.44; No. 2 do., \$1.37½; red western, \$1.44; white Michigan, \$1.60. Oats, 61½; 66½ cts. Western mixed corn, 80 cts.; southern white \$1.02. Oats, 48 a 55 cts. Lard, 11½ a 11¾ cts.

#### FRIENDS' DISCIPLINE.

The Committee having charge of Friends' Library are desirous of procuring copies of the different editions of the Discipline of Baltimore Yearly Meeting. Also that of the late Yearly Meeting of Virginia. Any person who may be able to supply any of the above, will please communicate with EDWARD MARIS, M. D., 127 South Fifth St.

#### WANTED,

A woman Friend, competent for Principal of the Aimwell School. Apply to Sarah E. Smith, No. 1110 Pine St. Rebecca W. Fry, 908 North Fifth St. Rachel S. Maris, 127 South Fifth St. Mary D. Allen, 833 North Seventh St.

#### RASPBERRY STREET SCHOOL FOR COLORED GIRLS.

Wanted, an energetic competent Teacher for the above School, to commence 9th month 1st. Apply to Eliza B. Edwards, 516 Spruce street, Rachel S. Maris, 127 South Fifth street, Sarah E. Smith, 1110 Pine street.

#### WANTED.

An unmarried Friend to take the position of Governor at Westtown Boarding School, on or before the close of the present session, in the 10th month next.

Apply to Clarkson Sheppard, Greenwich, New Jersey, Joseph Walton, Morestown, Charles Evans, 702 Race street, Philadelphia.

#### WANTED

A young man of energy and perseverance, to take charge and oversight of the farm belonging to the Wyandott Mission, situated near Teneca, in the State of Missouri; also a woman well qualified to fill the place of Matron in the Boarding School. Friends would be preferred. For further information apply to John S. Stokes, Office of "The Friend," Fourth above Arch street.

#### HAVERFORD COLLEGE.

The next Term will commence on Fourth-day, 9th mo. 2nd, 1874. Applications for admissions should be addressed to SAMUEL J. GUMMERE, President, Haverford College, Montgomery Co., Pa.

MARRIED, on the 24th of Sixth mo. 1874, at Friends' Meeting-house, Twelfth Street, Philadelphia, THOMAS KIMBER to MARY E. SHEARMAN, both of this city.

DIED, Third month 28th, 1874, MARY W. REEVE, wife of William F. Reeve, in the 71st year of her age, a member of Salem Monthly Meeting of Friends, N. J.

WILLIAM H. PILE, PRINTER.

No. 422 Walnut Street.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, SEVENTH MONTH 11, 1874.

NO. 47.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

## Star Streams.

(Continued from page 362.)

Including both hemispheres, there are visible to the naked eye, under the most favorable circumstances, about 5,000, or at the most 6,000, fixed stars. If these and the fixed stars visible in the most powerful telescopes were to disappear, and the eye to acquire the light-gathering power of Herschel's 20-foot reflector, there would be seen scattered over the vault of heaven—instead of the fixed stars now visible—about as many nebulae—"feebly shining, cloud-like patches, often of strange and fantastic forms."

The faint illumination of nebulae, the close crowding of stars in many that are resolvable, and other circumstances, have appeared to confirm the view that these objects shine from distances far beyond those of the farthest fixed stars. It has been considered that nebulae are (for the most part, at least) aggregations of suns ("island-universes," as a German philosopher has expressively termed them), forming galaxies similar to our own "Milky Way," and reduced, notwithstanding the immensity of their dimensions, by a yet greater immensity of distance, to the appearance of faint specks of light, which the slightest haze in our skies is sufficient to conceal from us. The important discoveries effected by Dr. Huggins, which have shown that many nebulae are gaseous in composition—nineteen out of sixty observed presenting the spectrum of bright lines separated by dark spaces which indicates the gaseity of the source of light—have modified these views. Without giving absolute support to the speculations of Sir W. Herschel, respecting the condition and changes of condition of nebulae, Huggins's discoveries show that the views on which Herschel founded his speculations were well grounded. The distinctions Herschel drew between the different classes of nebulae have been confirmed, so far as spectrum analysis has yet proceeded. Every planetary nebula yet observed, for instance, has been proved to be gaseous. The process of generalization, which had been commenced by many eminent astronomers, and in which scarcely any distinctions but those depending on the resolvability of nebulae were recognized, has been abruptly checked. It is to be noticed, how-

ever, that many German astronomers, and some, at least, of our most distinguished English observers (amongst others, the late Admiral Smyth) had looked with more than doubt on the view that, with sufficient optical power, all nebulae are resolvable into stars.

The first point I shall dwell upon is the distribution of nebulae over the heavens. In the northern heavens there will be observed a very decided clustering in the region between 11h. and 14h. of R.A. This is the nebular region in Virgo, extending over Coma Berenices, and the tail of Leo, curving (to the right) over Canes Venatici, thence (to the left) over the tail and hind quarters of Ursa Major, to within about 12° of the pole near the tail of Draco. The borders of this stream or cluster of nebulae extend dispersedly over the two Leones, Cancer, Gemini, Lynx, and Ursa Major on one side, and over Bootes and Corona on the other. As there seems to be a decided break in the stream—or rather, perhaps, as the stream decidedly comes to an end near the pole—we must return to the point from which we commenced, and thence follow the streams in the contrary direction. The continuation of the stream presently divides into two, the right-hand stream passing over the left hand of Virgo, the tail of Hydra, and nearly the whole extent of Centaurus, to Crux and Musca; the left-hand stream passing over Crater, to Antlia, and the mast and sails of Argo. The gap which bounds the northern group seems continued, but not in quite so marked a manner, by the space comparatively clear of nebulae which runs round the right-hand stream (of the two just described) across the pole. Returning to the northern heavens we notice a less distinctly marked grouping over part of Perseus and Andromeda, passing (to the right) over the square in Pegasus to the southernmost of Pisces, and (to the left) over the band in Pisces, across Cetus, Eridanus, and Dorado, in a distinctly-marked stream leading to the Nubecula Major. The right-hand stream, which we had followed as far as Pisces, seems to have a continuation towards the Nubecula Minor, and also to throw out a convolution over the tail of Piscis Australis, over Indus et Pavo, towards Apus and Musca.

There remains to be noticed a clustering of nebulae towards the portion of the Milky Way occupied by Scorpio. Sir John Herschel considers that many of these nebulae belong to the Milky Way, as they are wanting in the gap between the two branches of the galaxy in this neighborhood.

The first inquiry which suggests itself, on a review of the distribution of nebulae, is the question, whether there is any indication of a connection between nebulae and fixed stars? The theory that nebulae are galaxies similar to our own Milky Way would, of course, require that we should dissociate nebulae from any connection with our galaxy, save a relation corresponding to that which holds be-

tween the fixed stars and the sun. And further, although it would not be impossible that a tendency to systematic arrangement should be apparent among the nebulae, yet the distances separating nebula from nebula would (on this theory) be so vast, compared with the distances separating star from star, or even with the dimensions of our galaxy, that it would clearly be very improbable that such arrangement should be discernable by terrestrial astronomers. As, however, the theory is very generally held, I shall present, as I proceed, some considerations which seem opposed to it. We seem, rather, to have evidence that most of the nebulae—if not all of them—are much nearer to us than has been commonly maintained.

When we consider those regions of the heavens in which nebulae are markedly deficient, we find an arrangement which cannot be wholly accidental. I refer to the zone, very marked in the northern hemisphere, and not indistinctly traceable in the southern, which has been already described. This zone is not quite coincident, in direction, with the Milky Way, but follows almost exactly a circular band, which includes more lucid stars than any corresponding band on the heavens.

Now, it appears to me that those who have speculated on the subject of nebulae have been too apt to content themselves by looking for zones and streams of aggregation, not noticing apparently that zones along which nebulae are sparingly distributed, may be as marked indications of systematic distribution as zones of aggregation. I consider that the zone mentioned in the preceding paragraph is a phenomenon scarcely less distinct in character than the zone of the Milky Way itself; and I look on the connection between the former zone and the zone of brilliant stars as a very noteworthy circumstance.

It has been already noted by astronomers that all nebulae of irregular form and great extent are found along a zone nearly coinciding in direction with the Milky Way. The great circle along which such nebulae are actually found is, in fact, no other than that along which nebulae in general are conspicuously wanting. It is also worth noticing that where this zone, and the zone of the Milky Way intersect, we find the singular nebula round  $\alpha$  Argus in one hemisphere, and in the other the remarkable nebular region in Cygnus.

The discovery that the great irregular nebula in Orion is gaseous, renders it probable that the other irregular nebulae are so likewise. Whether they are so or not, it is clear that they are totally different in character from regular nebulae. Therefore, we may look on their aggregation on the great circle along which few nebulae are found as a circumstance (1) not opposed to the evidence of systematic distribution founded on that peculiarity; (2) as itself indicative of a law associating nebulae with the stellar system.

One peculiarity of the irregular nebulae deserves to be especially dwelt upon. All of them exhibit a tendency to arrange themselves around fixed stars.

As respects the great nebula in Orion, while the proportion of stars whose connection with the nebula has not been traced is somewhat greater, yet nearly every marked condensation in the nebula is associated with conspicuous stars (that is, with stars conspicuous among those visible in the same field of view with the nebula). Every telescopic also is familiar with the fact, that the central condensation of the nebula clusters round the trapezium of stars, within which there is either no nebulous light or very little. The association is not likely to be an accidental one. Herschel himself remarks that the star  $\epsilon$  Orionis is involved in strong nebulosity, "probably connected with the great nebula," while he was able to trace a faint extension of the nebula as far as the double star  $\gamma$  Orionis, which it involves, so that the star is rendered nebulous.

Turn we now to the region of irregular nebulae of Sagittarius. The first nebula mentioned by Sir J. Herschel is described by him as "singularly trifid, consisting of three bright and irregularly formed nebulous masses, graduating away insensibly externally, but coming up to a great intensity of light at their interior edges, where they enclose and surround a sort of three-forked rift, or vacant area, abruptly and unaccountably crooked, and quite void of nebulous light. A beautiful triple star is situated precisely on the edge of one of these nebulous masses, just where the interior vacancy forks out into two channels. A fourth nebulous mass spreads like a fan or downy plume from a star, at a little distance from the triple nebula."

As respects the nebula of Cygnus, I may simply quote Sir J. Herschel. He describes the region as "consisting, first, of a long, narrow, curved, and forked streak, and secondly, of a cellular effusion of great extent, in which the nebula occurs intermixed with, and adhering to, stars around the borders of the cells, while their interior is free from nebula, and almost so from stars."

I have already drawn out this paper to a much greater length than I had proposed, and yet seem scarcely to have entered upon my subject. Let me, instead of proceeding to treat cursorily of the remaining branches of that subject, here pause and "report progress." We have found a law of aggregation of nebulae in regions removed from the Milky Way, and thus a law of contrast, which amounts in reality to a law of connection between nebulae and the starry system. We have found that, in the southern hemisphere, this law of contrast is further exhibited in an aggregation of nebulae over regions in which stars are wanting, and vice versa; lastly, we have seen that over a zone of the heavens in which nebulae are all but absolutely wanting, there is a marked aggregation of lucid stars, that on the same zone all the irregular nebulae are collected, and that these irregular nebulae, all occurring in regions very richly bestrewn with fixed stars, exhibit in their configuration a correspondence with the configuration of the fixed stars in the same field, which cannot be wholly accidental.

(To be continued.)

Use temporal things but desire eternal.

Selected for "The Friend."

Report of the Committee for the Civilization and Improvement of the Indians.

To the Yearly Meeting:—The Committee for the civilization and improvement of the Indian natives, Report: That for several months during the early and middle part of last year, the Institution at Tunessassa remained under the care of Abner Woolman, who took charge temporarily at the request of the Committee, upon the withdrawal of George W. Mott, and his wife, as mentioned in our last report. The duties of Matron were performed during the summer session by Catharine Battin, who several years previously had been acceptably engaged in the Institution. Since the Tenth month last, the stations of Superintendent and Matron have been filled by our friends Aaron P. Dewees and his wife Eunice Dewees, of Ohio, who under a sense of duty had offered themselves for this service. Mary Vail was released at her own request at the close of the winter session. Her place has been supplied by Miranda Dewees, whose husband, Aaron Dewees, Jr., has also been engaged to assist in the care and cultivation of the farm. The Friends last named, have entered upon their duties within the past few weeks.

The School has been continued under the efficient charge of Louisa Smith, who has remained at the Institution by the request of the Committee during the past winter, but who, it is expected, will return home in the early part of next month; a young woman Friend, having been engaged in her place to take charge of the school at the opening of the summer session. It is cause of encouragement that the several vacancies which have occurred, have thus been filled with less delay, than at some former periods, and that the Friends engaged have had their minds drawn to the respective services, with desires to be helpful to the Indians.

The largest number of children in attendance at the School at one time has been 29: viz. 24 girls and 5 boys; the average number of pupils during the past year has been 25, viz: 26 for the summer, and 24 for the winter session, which is 7 more than last year. At the close of the winter session, nearly all of the scholars were able to read, more than half had made some progress in geography and arithmetic, and several had studied elementary philosophy and grammar. Nearly all of the children were in the practice of committing portions of the Scriptures to memory. In addition to the instruction thus imparted, the girls acquire a knowledge of sewing and general housework, which may materially assist in rendering their homes comfortable, and improving their social condition in future years. We hope there is an increasing appreciation on the part of parents of the advantage to the children of placing them at the Institution.

Meetings for Divine worship are held on First and Fifth-day mornings, as heretofore; in which the conduct of the children has been generally satisfactory. The Holy Scriptures are read in the family daily, and Youthful Piety, and other religious books, occasionally, and we trust that profitable impressions have been, at times, made upon the minds of the children, in these opportunities.

Upon an examination of the Treasurer's account, it appears there was due him, Third month 1st, 1874, \$260.77, and that there are

securities in his hands, the par value of which is \$15,236.66, the same amount as last reported.

The receipts during the year have been: From interest on invested funds; one-third of the income of John Parrish's legacy, and contributions of three Friends, . . . . . \$1,671 90  
Estimated profit of saw and grist mill, . . . . . 150 90

Making a total of . . . . . 1,822 80

The expenditures have been: For Family Expenses, . \$1,457 73  
Salaries, and travelling expenses of Friends under appointment at the Institution, . . . . . 917 14  
Incidental Expenses, . . . . . 109 62  
Books and Stationery, . . . . . 28 30  
Repairs and Improvements 108 65  
Loss on Farm Account, . . . . . 33 62

Making the total expenses of the Institution, . . \$2,655 06

There has been paid for a stove for the school at the Corn Planter Settlement, &c., . . . . . 18 76

Making the total expenditures, . . . . . \$2,673 82

And showing a deficiency in the business of the year of . . . . . \$850 99

The Indians on the Allegheny Reservation have the opportunity of sending their children to the day schools, supported by the State of New York, of which there are several located upon their land. These are each attended by some of the children living in their respective neighborhoods; and two of them have been taught by Indians.

The general condition of the Indians upon this Reservation has not materially changed since the date of our last report. Although some land is cleared up annually, yet they continue to be slow in availing themselves of the advantages which steady industry would afford. It is often the case that the attention of many of the young men is diverted from agricultural pursuits during the planting season, by the high wages to be obtained at that time, by rafting lumber; and who thus lose the opportunity for the cultivation of the soil during an important period of the year, besides being thrown into company often of a demoralizing character. The less rapid improvement of the natives on this Reservation as compared with their brethren at Cattaraugus, may in part, we believe, be attributed to this cause.

The difficulties arising from the occupancy of their land by white settlers, under leases made to them in good faith by Indians, but which have been decided by the Courts to be illegal, remain in an unsettled condition, and continue to produce feelings of insecurity and apprehension to many. After the failure of the bill, containing several objectionable features, proposed to settle these difficulties as mentioned in our last report, a communication was received by the Councillors of the Seneca Nation, from a member of the Ogden Land Company, proposing the appointment of a Committee of the Councillors to confer with that company in reference to extinguishing this alleged claim to their lands. Upon the reception of this communication

our advice was requested by the President of the Nation; in reply to which an address was prepared, stating our reasons for not approving of such a course, and our views in relation to the plan which we thought should be pursued; all of which were in accordance with the advice previously given them on these subjects. This Address was presented by two of the Committee, who had several interviews with Councillors and other influential Indians, in which the questions now agitating them were freely discussed. A great want of unanimity was found to exist among them.

The advantages to be derived to the Indians individually, as well as in the settlement of their difficulties as a nation, by a division of their lands and holding them in severalty, under proper restrictions, have often been brought to their consideration by the Committee; and a considerable number on both Reservations appear to be fully aware of them. Others, however, influenced by the prejudices derived from their ancient customs and traditions, and the fear of losing their tribal organization, are still averse to this course; the unwillingness of whom retards their progress as a people in this direction.

The importance of action on their part to secure favorable legislation on several points affecting their interests, during the present session of Congress, induced the Committee to make another effort last autumn, to encourage them to memorialize that body for the enactment of a law under carefully guarded provisions to accomplish the ends in view; and two members of the Committee met the Indians in Council for that purpose in the Tenth month last. Owing, however, in part to the feelings to which we have alluded, only two of the eleven Councillors present appeared to be in favor of the course recommended; but, in announcing their decision not to take the advice which had been given them, they desired that Friends might not be discouraged from endeavoring to assist them, and requested the further efforts of the Committee for their welfare.

As had been expected, a bill has since been introduced into Congress, prepared in the special interest of the white settlers, to confirm the leases under which they now hold title from the Indians. It also provides for the division of their lands under the regulation of the Secretary of the Interior, and the extinguishment of the pre-emption claim by the United States. This bill has been referred to the Committee on Indian Affairs of the House of Representatives; and it is our intention to watch its progress with a view of remonstrating against its passage, should it, when reported, appear to be detrimental to the interest of the Indians.

A bill has also been introduced into the Senate of the United States, for the settlement of the claims of the New York Indians to lands in Kansas, on the basis of a settlement of similar claims with the Tonawandas, in 1857. This bill is intended to carry out the design of a Treaty for the adjustment of these claims made in 1868, but not ratified. As its terms are more favorable to the Indians than those of the Treaty alluded to, it will probably be satisfactory to them in this respect, if carried into effect.

The descendants of Corn Planter continue to be well satisfied with the late division of their land. The improvement made by different individuals since the allotment, is

very manifest, amounting it is thought, to as much as had been made for six or eight years previously. The school located on their tract has been regularly maintained, and more interest appears to be taken by the parents in promoting the instruction of their children.

Under the authority given by the Yearly Meeting last year, 50 acres of the land at Tunessassa has been sold.

Though the Indians are yet unwilling to adopt a course which appears so likely to contribute to their settlement and improvement as a people, there is no doubt that the assistance rendered them in various ways by the Committee has been, and will, under the Divine blessing, continue to be highly beneficial; and the confidence which they continue to feel in the integrity of our motives, affords ground for encouragement, to continue to labor for their prosperity both as individuals and collectively, as far as may be in our power.

On behalf and by direction of the Committee.

GEORGE J. SCATTERGOOD,  
Clerk for the day.

Philadelphia, 4th mo. 17th, 1874.

For "The Friend."

### Memoirs and Letters of Sarah Hillman.

(Concluded from page 363.)

"*Philada., 6th mo. 16th, 1855.* \* \* London Yearly Meeting read the epistle signed by J. Binns. The issue of all these things is seen by the great Almighty One, who seeth the end from the beginning; but methinks our poor finite vision, even the most enlightened, can only perceive as through a glass darkly, a very small part indeed; and well may we as between the porch and the altar, cry unto the Lord for help in this time of great tribulation. Surely this is the time of Jacob's trouble; if we be only made experimental witnesses of the truth of the promise, 'he shall be saved out of it,' it will be a great mercy, and call for humble thankfulness.

It seems as though it was the will of the great Controller of events, who holdeth the wind in his fist, who measureth the waters in the hollow of his hand, and meteth out the heavens with a span, to show forth his sovereign power while He thus unfoldeth unto us our total unworthiness and incapacity to do any thing. Ah! He can overturn the mountains, and set bounds to the sea, which it cannot pass; and although my faith is oft times ready to fail, and my heart to sink within me, there are seasons, my precious friend, when my poor spirit can rejoice in the renewed assurance that He who first raised up this people for the honor of his own Name, everlastingly glorious, and for the exaltation of his Truth, is and will be with them, and will yet raise up unto them princes and judges, prophets and rulers, taught of Him, and qualified to teach others the use of the bow, and send forth from among them many fishers and fowlers and hunters, to hunt the precious prey of the souls of men. So let us labor to hold on ourselves, and to attract others unto Christ, being clothed with such a measure of the meekness and gentleness which is in Him, the Blessed Head over all to his church, as it shall please him to clothe us with.

My poor tabernacle is as well as it is probable it ever will be; the cough is not as bad as in the spring; but oh! I pray that as the outward man decays, some degree of assurance may, through unutterable mercy, from time to time be granted that there is a house

not made with hands prepared for the immortal soul; and that faith to believe in the unfoldings of Divine wisdom, as to the measure of duty or of service called for at my hand may be furnished, so that as a servant in waiting, I may be found of my Lord, (if such a poor worm might say *my*), and obedience be yielded unto all his requisitions. For sure 'eye hath not seen nor ear heard, what He hath prepared for him that waiteth for him.'

We have now attained, my dear ———, to more than three score years, and the time is drawing nigh, when we must put off mortality. Doubtless as dear Richard Jordan and others of that generation\* who beheld in the visions of light the storm that was approaching, and expressed their willingness to continue on the stage a little longer, if haply they might see the church flourish again in brightness, so it is the heartfelt petition of some in these days, who are secretly saying, 'Spare thy people, O Lord, and give not thy heritage to reproach; at the same time that they are almost ready to desire with the prophet that their lives might be accepted for a prey.'

The "Memoirs and Letters of Sarah Hillman" having now been brought to a conclusion, it remains but for the compiler to add his little testimony to her inwardness, her straightforwardness, her faithfulness, her lively spiritual walk and warfare, as set forth in the preceding compendium. Though of a retiring, self-distrustful nature, yet when her dear Master's call was heard, and the way made plain before her, she was prompt and executive; and, in proportion to her feeble bodily ability, untiring in the required duty of her day. Going forth by day and by night, when called upon, to visit the sick and afflicted, or to help to soothe the dying pillow of such as she, through the grace that was given unto her of God, could thus become a fellow-helper unto through Him.

Though Sarah Hillman, as these Memoirs fail not to represent, had her baptisms and varied trials; even, spiritually, her "stripes," her "prisons," her "deaths oft," with moreover her "perils among false brethren;" yet we doubt not her experience, through the Redeemer's unfailing mercy, was like that of the Psalmist: "In the day when I cried Thou answeredst me, and strengthenedst me with strength in my soul;" and also like the promise of the Master to his Apostle: "My grace is sufficient for thee: for my strength is made perfect in weakness."

\* Richard Jordan died in the Tenth month of 1826. A short time previous to which, "his mind was much engaged in contemplating the present situation of the Society of Friends; lamenting with much feeling, the deviations from simplicity and plainness which were conspicuous in many of the members, the avidity with which they pursued the pleasures and riches of the world, and the apparent want of religious concern on their own account, and for the welfare of the church. Much labor, he remarked, had been bestowed upon them; spiritual and temporal blessings had been dispensed with a liberal hand, and yet disobedience and ingratitude had been too generally returned for all these favors; and he feared lest those who might be considered as the children of the kingdom, if they persisted in this course, would be cast out, and others raised up, as from the stones of the streets, to support the doctrines and testimonies given to Friends to bear. He however expressed, that gloomy as the prospect of a succession of upright standard bearers seemed, he had faith to believe, that those doctrines and testimonies never would fall to the ground; \* \* but that those who continued to maintain the ancient faith and discipline of Friends, would be preserved as a distinct body of Christian professors."

Thus in heights and in depths; "by evil report and good report;" "as sorrowful yet always rejoicing;" "as poor yet making many rich," "as having nothing, and yet possessing all things;" and finally having like those formerly "come out of great tribulation, and washed their robes, and made them white in the blood of the Lamb," it is believed that our dear friend was enabled to finish her course with joy, and at the close to adopt the precious, comprehensive language, "Thanks be to God who giveth us the victory through our Lord Jesus Christ."

She died on the 11th of the Ninth month, 1855, aged 61 years.

*Migration of Butterflies.*—As we rode along, great numbers of a brown tailed butterfly, (*Timetes chiron*) were flying over to the south-east. They occurred, as it were, in columns. The air would be comparatively clear of them for a few hundred yards, then we would pass through a band perhaps fifty yards in width, where hundreds were always in sight, and all travelling one way. I took the direction several times with a pocket compass, and it was always south-east. Amongst them were a few yellow butterflies, but these were not so numerous as in former years. In some seasons these migratory swarms of butterflies continue passing over to the south-east for three to five weeks, and must consist of millions upon millions of individuals, comprising many different species and genera. The beautiful green tailed and gilded day-flying moth (*Urania leilus*) also joins in this annual movement. When in Brazil, I observed similar flights of butterflies at Pernambuco and Maranhã, all travelling south-east. R. Spruce describes a migration which he witnessed on the Amazons, in November, 1849, of the common white and yellow butterflies. They were all passing to the south-south-east. Darwin mentions that several times when off the shores of Northern Patagonia, and at other times when some miles off the mouth of the Plata, the ship was surrounded by butterflies; so numerous were they on one occasion, that it was not possible to see a space free from them, and the seamen cried out that it was "snowing butterflies." These butterflies must also come from the westward. I know of no satisfactory explanation of these immense migrations. They occurred every year whilst I was in Chontales, and always in the same direction. I thought that some of the earlier flights in April might be caused by the vegetation of the Pacific side of the continent being still parched up, whilst on the Atlantic slope the forests were green and moist. But in June there had been abundant rains on the Pacific side, and vegetation was everywhere growing luxuriantly. Neither would their direction from the north-west bring them from the Pacific, but from the interior of Honduras and Guatemala. The difficulty is that there are no return swarms. If they travelled in one direction at one season of the year, and in an opposite at another, we might suppose that the vegetation on which the caterpillars feed was at one time more abundant in the north-west, at another in the south-east; but during the five years I was in Central America, I was always on the look-out for them, and never saw any return swarms of butterflies, so that their migration every year in one definite direction is quite unintelligible to me.—*Belt's Naturalist in Nicaragua.*

## LEAFLESS TREES.

Selected.

Leafless and stripped, yet are they whole  
 They mind me of a Christian soul,  
 Whose daily strife is almost o'er,  
 Waiting for entrance at the door.  
 Greenness and verdure underlies  
 What seems so poor to mortal eyes,  
 And what they are, or what have been  
 Is naught, if so the sap within  
 The roots, has grounded strong and firm,  
 'Gainst autumn blast, or winter storm.  
 How well defined their outlines lie  
 Against the back-ground of the sky!  
 And here again a type we see  
 Of what a Christian's course should be,  
*Distinct, and clear, that all may trace*  
 His shadow and abiding place.

Oh! leafless trees—unto my heart  
 How sweet the lessons ye impart,  
 The fragrance of your early spring,  
 Your summer days of blossoming;  
 The flushing of your Autumn dyes,  
 Ne'er brought you quite so near the skies  
 As now, when desolate you seem  
 Against the Heaven itself to lean,  
 Oh! all our crowns we cast aside,  
 All ornaments of human pride,  
 And passing underneath the rod,  
 Stand naked in the sight of God.  
 Not blasted, only stripped and bare,  
 That we may know how weak we are.

Oh! leafless trees, your strength renew,  
 For all the sunshine covers you;  
 Naught now your symmetry can mar,  
 Ye stand before us as ye are;  
 Your branches lifted as in prayer,  
 As tho' ye felt your need of care;  
 And from His treasury old and new  
 With garments God will dower you;  
 For when the keenest storm winds blow,  
 Your branches shall be wrapt in snow,  
 And ye shall stand within his sight  
 Serenely clad in robes of white;  
 While even the descending rain  
 Shall beat upon you not in vain.  
 For what more beautiful can be  
 Than wintry frost-work on the tree,  
 When cold and rain their work have done?  
 All glorious beneath the sun  
 Transparent in the risen light  
 Ye shine, e'en in the Father's sight.

Melt snow into the hardened bole,  
 As melts God's word into the soul,  
 Yet e'en the quickening germs of life  
 May sometimes need the pruning-knife;  
 For by their fruits alone we see  
 The value of the grafted tree,  
 "As by their fruits" alone ye know  
 God's children in this world below.

May seeking souls the lesson take,  
 And give up all for Christ's dear sake;  
 He asks the blossoms of your Spring,  
 First tithes of every offering;  
 Your Summer day in all its prime,  
 The glory of your Autumn time,—  
 For ye must stand beneath His eye,  
 Like leafless trees against the sky,  
 Disrobed of self, and shorn of pride,  
 Your sins laid on the Crucified.

Hannah Lloyd Neal.

For "The Friend."

## The Heart of Africa, by Dr. Schweinfurth.

(Continued from page 359.)

After Dr. Schweinfurth's return from his excursion to the south among the Niam-niam and the Monbutto, he established himself for a time in one of the Seribas belonging to Ghattas. In describing this, he says: "The colony consisted of about six hundred huts and sheds, which were built almost entirely of straw and bamboo. In the intervals between the huts were erected the large sun-screens known as "rokooba," which were made of the same materials; and, to separate allotment from allotment, there were long lines of fences, which were likewise composed

of straw, and these were arranged so close to each other that they scarcely admitted the narrowest of passages, perhaps but a few feet across, to run between them. Everything that human ingenuity could contrive seemed to have been done to insure that, with the cessation of the rainy season there should commence a period of the extremest peril, and for myself, I can avow that fear of fire became my bugbear by day and my terror by night. In spite of my remonstrances I saw the crowd ing together of the huts continually becoming more and more dense, and the enclosure packed full to the utmost limits of its capacity. It became a manifest impossibility in the case of the occurrence of fire, on however small a scale, to prevent it spreading into such a conflagration that the safety of the whole establishment must be imperilled. The material of the structures, dried in the tropical heat would accelerate and insure the devastation that must necessarily ensue.

The catastrophe, which I had dreaded with such ominous apprehension, befell us at mid-day on the 1st of December.

This most disastrous day of my life had opened in the accustomed carrying out of its routine. I had been engaged all the morning with my correspondence and in arranging the notes of the various occurrences that had transpired since the despatch of my previous budget. I had partaken of my frugal midday meal, and was just on the point of resuming my writing, when all at once I caught the sound of the excited Bongo shrieking out 'poddu, poddu' (fire, fire!) Long, how long none can tell, will the memory of this burst of alarm haunt my ear. It makes me shudder even now. Eager to know the truth, and to ascertain how far the ill-omened apparition of misfortune had already spread, I rushed to the doorway of my hut, and beheld that the devouring element was doing its work at a distance of only three huts from my own; the flame was rising fiercely from the top of a hut; there was no room for hope; just at that time of day the north-east wind always blew with its greatest violence, and it was only too plain that the direction of the gale was bringing the fire straight towards my residence. The space of a few minutes was all that remained for me to rescue what I could.

Without an instant's delay, my people flocked to the scene of the alarm. Without stopping to discuss what was most prudent or to consider what was most valuable, they laid hold upon anything that came to hand. The negro-boys took particular care of all the stuffs, and of their own clothes as being of the greatest consequence in their estimation, and by their means all my bedding and two of my leathern portmanteaus were carried safely out of the Seriba. I myself flung my manuscript into a great chest which had already been provided against any accident of the sort, but my care was of no avail. My servants succeeded in hastily conveying five of my largest boxes and two cases to the open space of the Seriba where the direction of the wind made us presume they were out of danger; but we only too soon learnt our mistake; the wind chopped and veered about, and the hot blasts fanned the flames in every direction till there was hardly a place to stand, and it was hopeless to reckon upon any more salvage. A prompt retreat became absolutely necessary; great masses of burning straw began to fall in every quarter, and the high fences of straw left but

narrow avenues by which we could escape. The flames sometimes seemed to rise to a height of a hundred feet above the combustible structures of dry grass, and then all at once they would descend, but only to lick with destructive fury some adjacent spot, while a perpetual shower of hot sparks glared again in the roaring air. The crowds, as they rushed away before the advancing flames, were like a swarm of flies buzzing around a lighted torch. I cast a look towards the remnant of my property which we had thought we had rescued, and to my horror I perceived that the chests were enveloped in smoke, and immediately afterwards were encircled by the flames. It was a moment of despair. How my heart sank at the sight none can imagine, for those chests contained all my manuscripts, journals, and records, in comparison with which the loss of all the effects in my hut appeared utterly insignificant, though they were the burdens of a hundred bearers. Regardless of the shower of sparks, which singed off my very hair, I made a frantic rush forward, the dogs, with their feet all scorched, howling at my side, and breathlessly stopped under a tree, where I found a shelter alike from the raging of the ardent flame and from the noonday glare. In the confusion of the flight I had been unable to get my hat, and was thus fully exposed to the midday heat.

After a while I succeeded in getting to my garden, which, bereft of the greater part of its recently-constructed hedge of bamboo, presented a truly melancholy aspect. As the sun sank low we began to make a search for anything that might have been spared amidst the still glowing embers of the huts. I had saved little beyond my life. I had lost all my clothes, my guns, and the best part of my instruments. I was without tea and without quinine. As I stood gazing upon the piles of ashes I could not help reckoning up the accumulation of my labors which had there, beneath them all, been buried in this hapless destiny. All my preparations for the projected expedition to the Niam-niam; all the produce of my recent journey; all the entomological collection that I had made with such constant interest; all the examples of native industry which I had procured by so much care; all my registers of meteorological events which had been kept day by day and without interruption ever since my first departure from Snakin, and in which I had inscribed some 7000 barometrical observations; all my journals, with their detailed narrative of the transactions of 825 days; all my elaborate measurements of the bodies of the natives, which I had been at so much pains and expense to induce them to permit; all my vocabularies, which it had been so tedious a business to compile; everything, in the course of a single hour: everything was gone, the plunder of the flames. It had been for the sake of better protection, as I thought, that I had resolved not to part with my journals, and had kept my collection of insects in my own possession; I had been afraid of any misadventure befalling them; but now they might just as well have been at the bottom of the Nile.

There I sat amongst my tobacco-shrubs upon my stock of bedding that had been rescued from the flames; but I fear that I could not boast of overmuch of the spirit of resignation. The entire remnant of my property was soon reckoned up; it consisted of a couple of chests, my three barometers, an

azimuth-compass, and the ironwork which survived from the different productions of the Niam-niam and Monbuttoo.

Evening drew on: just as usual, the cow with her calf came and provided me with two glasses of milk. I had a yam or two, a pickling from the inside of a half-burnt tuber, a morsel from a similarly half-burnt lump of pickled meat, and I had come to the end of my slender stock of provisions. My dogs kept up a continual howling; their sufferings from their burnt feet must have been excessive, and they whined in concert with the general desolation. The servants, however, were as calm and undisturbed as usual. Neither the Nubians nor the negroes seemed to be much concerned; and why should they? They had just nothing to lose."

This disastrous fire and the subsequent defeat of the Nubians in a second expedition into the Niam-niam country, convinced our author that there was no hope of his being able to penetrate further into the central regions of Africa. But as several months would elapse before the trading boats would start on their return journey down the Nile, he concluded to visit Dar Ferteet, which was to the west of his then residence, and accordingly started on his tour on the first day of the year 1871. Of this section of Africa he thus speaks:

"The uninhabited wilderness stretching to the west of the Pongo, a district long known to the inhabitants of Darfoor and Kordofan under the name of Dar Ferteet, represents one of the oldest domains of the slave-trade, and at the present day, as far as regards its aboriginal population, presents to the eye of a traveller the aspect of what may be described as 'a sold-out land.' Only within the last fifteen years have the Khartoom trading-companies penetrated into the district watered by the Gazelle, but long before that numbers of slave-dealers had already formed settlements in Dar Ferteet, then as now streaming into the country from Darfoor and Kordofan accompanied by hundreds of armed men, and coming, year after year, in the winter months so as to accomplish their business and get back to their homes before the rainy season again set in. Some of them, however, did not return, but remained permanently in the land, and, under the sanction of the more influential chieftains, founded large establishments (Dehms) to serve as marts or *depôts* for their black merchandize. As soon as the ivory-traders, with their enormous armed bands, made their appearance in the country, the Gellabbas received them with open arms; and the Nubians, in order to provide for the storing of their ivory and ammunition, forthwith combined their Seribas with the Dehms already established, so that in the course of time these places assumed the appearance of the market towns of the Soudan. The Gellabbas by remaining in their old quarters reaped a twofold advantage: in the first place, the large contingents of armed men that were now introduced into the country relieved them from the necessity of maintaining troops of their own; and, secondly, they were exonerated from the heavy imposts that they had been compelled to pay to the native Kredy chieftains, as these were very speedily reduced by the Nubians to the subordinate position of mere sheikhs or local overseers of the natives. In the course of my tour through Dar Ferteet I became acquainted with five of these towns,

which represented so many centres of the slave trade in this part of the country.

But although the various Khartoom companies who had thus taken up their quarters in the Dehms sent out expeditions every year to the remotest of the Kredy tribes in the west, and even penetrated beyond them to the Niam-niam in the south-west, it did not take them very long to discover that the annual produce of ivory was altogether inadequate to defray the expenses of equipping and maintaining their armed force. Finding, however, that the region offered every facility for the sale of slaves, they began gradually to introduce this unrighteous traffic into their commercial dealings, until at length it became, if not absolutely the prime, certainly one of the leading objects of their expeditions; thus the people whom the professional Gellabbas had at first hailed as friends grew up, ere long, to be their most formidable rivals. For example, Seebehr Rabama himself, who had to maintain a fighting force of a thousand men on his territories, had, as the result of his ivory expedition in the previous year, gained no more than 300 loads or 120 cwt., a quantity which realized but little over 2300*l.* at Khartoom; but at the same time he sent probably as many as 1800 slaves direct to Kordofan, there to be disposed of on his own account."

(To be continued.)

For "The Friend."

Respect for the departed is evidence of a Christian feeling pervading our minds, and may be properly manifested by refraining from much activity in our secular engagements, and endeavoring after inwardness and quietness of mind and body, during the time the lifeless tabernacle dwells in our midst. Abraham was permitted to mourn for his dead by a cessation from business; and time was granted to mourn for Moses, that faithful and devoted servant of the Most High; and shall we, who live under the purest and most perfect dispensation, not be so mindful of our bereavements as not to dwell at home in the quiet, endeavoring to profit by the lesson: "Oh that my people were wise, that they understood this, that they would consider their latter end."

For "The Friend."

The following letter has been sent to us for publication, many of our readers being interested in the writer as well as in the work in which he is engaged.

Wichita Agency, Indian Territory,  
Anadarko, 6th mo. 14th, 1874.

Thomas Wistar,—My Dear Friend:—Margaret and I reached the Agency in safety, last evening was a week. We came from Wichita in our own conveyance which met us there: and as there had been robberies committed on the road, recently, and it was reported that the "trail" was infested with horse thieves and desperadoes, we thought it prudent to join some freighters, with whom we were acquainted, and we came through, as far as the Cheyenne Agency, with them. We therefore travelled slowly, and were about two days longer on the road than we would have had we come alone. We were also detained one day at the Cheyenne Agency by high water.

I returned yesterday from a visit to Agent Haworth. I found them, there, in a state of anxiety. The friendly Indians reported "bad talk" at the "medicine dance," just held, by

the Cheyennes and some of the Comanches; and there have been some threatening demonstrations. Agent Haworth had his mules run of from his corral, and while I was at Sill there were persons (no doubt Indians) at the Post corral, but the "guard" firing a volley they left without accomplishing anything.

Asa-hab-it was here yesterday, before I came home, and left word for me to keep our stock well guarded, and to instruct our people not to expose themselves, by sitting at the windows after night, with the light burning. He said he would come to see me again to day. He reports three or four white men having been killed by Indians, at distant points. It appears they have been freely supplied with whisky, from some point—report saying that they have barrels of it at their "Medicine dance." The Kiowas' "Medicine dance" is just about to commence, and I am told it is doubtful what course Lone Wolf will take, as he is mourning for the death of his son. All the Apaches and the Penetethka Comanches are coming in and settling near together. Indeed, the most of them have remained at the places they have selected, within reach of the Agency, but the Apaches have left their fields and camped close to Asa-toyet. Asa-hab-it went there to attend the "dance" but when the pipe (for hostilities) was handed around he and a number of other chiefs left. They were followed by those who favored hostilities, with a view of making them return, and threatened to kill their horses. But I believe Asa-hab-it gave them to understand that *something else would be done first*, and they desisted.

2d day morning, the 15th.

A number of Indians met here yesterday and the appearance of things among the Cheyennes and Comanches was talked over. Nothing new was elicited—the Indians seem to think that there is no reason to apprehend any trouble, more than has occurred in preceding years.

Col. Davidson commanding at Fort Sill, informed that there were Indians at his corral, as I have above stated.

We are as well as usual and things are quiet. The Indian crops are encouraging, and the Indians are more than ordinarily interested in them.

I would just say that we do not feel alarmed at all, about the Indians depredating upon us, and I think we have a trust, that all will be wisely ordered.

I hesitate about sending this letter—it is defective and unsatisfactory—but the facts as stated are correct.

Very truly thy friend,  
JONA. RICHARDS.

*Arabic Names.*—Here in Syria we have the house of "Wolf," the house of "Stuffed Cabbage," Khowadji Leopard, the lady "Wolves," and one of our fellow villagers in Abeih where we spend the summer is Eman ed Deen "faith-of-religion," although he has neither faith nor religion.

Among the boys' names are Selim, Ibrahim, Moosa, Yakob, Ishoc, Mustafa, Hanna, Yusef, Ali, Saieed, Assaf, Giurgius, Faoor, and Abbas. I once met a boy at the Cedars of Lebanon, who was named Jidry, or "Small-pox," because that disease was raging in the village when he was born. It is very common to name babies from what is happening in the world when they are born. A friend of mine

in Tripoli had a daughter born when an American ship was in the harbor, so he called her America. When another daughter was born there was a Russian ship in port, so he called her Russia. There is a young woman in Sük el Ghurb named Fetneh or Civil War, and her sister is Hada, or Peace. An old lady lately died in Beirüt named Feinäs or Lautern. In the Beirüt school are and have been girls named Pearl, Diamond, Morning Dawn, Dew, Rose, Only One, and Mary Flea. That girl America's full name was America Wolves, a curious name for a Syrian lamb!

Sometimes children are named, and if after a few years they are sick, the parents change their names and give them new ones, thinking that the first name did not agree with them. A Druze told me that he named his son in infancy *Asaad* (or happier) but he was sickly, so they changed his name to *Ahmed* (Praised) and after that he grew better! He has now become a Christian, and has resumed his first name *Asaad*.

I once visited a man in the village of Brummana who had six daughters, whom he named *Sun, Morning, Zephyr breeze, Jewelry, Agate, and Emerald*. I know girls named *Star, Beauty, Sugar, One Eyed, and Christian Barbarian*. Some of the names are beautiful, as *Leila, Zarifeh, Lulu, Selma, Luciya, Miriam and Fereedy*.—*Women of the Arabs*.

#### Deborah Waring.

Selected.

In "Piety Promoted" there is a short account of this Friend, in which it is stated that she was a native of Alton, in Hampshshire, was religiously educated in the principles of truth, and being favored with an early visitation of its sanctifying influence, was, by yielding obedience thereto, qualified for public service. About the eighteenth year of her age, it pleased the Lord of the harvest to call her into the work of the ministry; in which service she was an unwearied laborer; and under the renewings of heavenly virtue, her doctrine frequently dropped like dew to the consolation of the right minded, and edification of the body in love. She was often led, in an awful manner, to press the necessity of a reverent waiting for the fresh opening of the spring of all good; that every individual might be brought from all exterior dependence, to know the Lord for themselves; and witness the revelation of his dear Son, the minister of the Sanctuary, in their own hearts; and she recommended this doctrine to others by her own example.

She was a very diligent attender of meetings, both for worship and discipline; and not only at home and in her own country, but under the prevailing influence of divine love, she was engaged at various times to visit Friends in other countries, having the unity of her Monthly Meeting in that weighty service; and, by some remarks of her own, it appears, that the Lord's blessed presence was with her, and strengthened her from day to day.

She was of a tender, sympathizing disposition, and was enabled to fill up the several relative duties in life with great propriety, and to continue fresh and lively in old age.

It having pleased the Lord to remove her husband Samuel Waring, (with whom she had long lived in much unity and affection) about a year before her, she was divinely supported under that great trial. Her health soon after

began to decline, and her faculties suffered an abatement of their usual strength. During six months gradual decline, she was preserved in much innocence; frequently aspiring after that which, from her youth up she had preferred to all created excellence, and desiring to be preserved to the end, in a sense of the power which had been her morning light, and her guide through the vicissitudes of life.

She one day observed, "My poor mind is tossed, and I long to be fixed, fixed, fixed. There is One who can walk upon the sea, and command a calm," and then commended herself to the compassionate regard of the Great Shepherd.

She quietly and peacefully departed, the 3d of the Second month, 1776, at the age of 78 years, having been a minister about sixty years.

#### Every-day Electricity.

A communication in the Louisville Courier Journal makes some interesting statement with regard to the aggravation of disease in city houses. The writer recalls the fact that Professor Loomis some years ago, in a series of scientific papers, called attention "to the effect of friction of shoe leather on wollen carpets in houses warmed by hot-air furnaces or steam in cold weather, in the production of negative electrical excitement," and he quotes from a book of Professor Silliman the assertion that the young people in the Professor's house found a source of amusement in cold weather in giving electrical shocks (by kisses and otherwise) to unwary friends, or in lighting the gas by a spark from a finger or key-handle after rubbing it briskly over the carpet. An anecdote of a lady in Frankfort Kentucky, who was able to light the gas by applying her knuckle to the burner, finishes the writer's stock of illustrations that electricity in large quantities enters into our systems under certain conditions when we are merely following the routine of our every-day lives. He then says: "It is possible that amid the learned labors that are going on touching the remedial uses of this powerful agent, the inmates of tens of thousands of American houses are being left to a baleful influence of it which is receiving no attention."

The physiological effects upon a child frolicking upon a carpet, in a furnace-heated or steam-heated house, or upon a lady traversing the house in her domestic duties, until charged with electricity sufficient to give a sensible shock to persons touched, or to ignite the gas, may be judged of somewhat by the effects upon a boy on a stool isolated by glass legs and electrified until able to ignite a cup of ether presented to his knuckles. He experiences a prickly heat and glow of the skin, his face flushes, his hair stands out from his head, he breaks into perspiration, a touch gives him a shock like touching the conductor of the electrical machine in action, and he feels afterward a lassitude like that subsequent to a strain of the muscles or excitement of the nerves of sensibility. When persons, young or old, are subjected to such a process almost daily for a long season, and often a number of times in a day, can it be without serious effects, for good or evil, upon the health and constitution?

When it is considered that a person electrified in this manner is not like the Leyden jar which gathers and holds the electricity,

nt is like the electrical machine constantly discharging the electricity silently in the atmosphere, the presence of such an amount at any one moment suggests how great a quantity must be emitted by a single person in such circumstances in a single day. Gathered into a battery of jars and discharged at once through a large animal, it would probably kill instantly, or would shiver a tough block of wood an inch in thickness. The statement of its chemical effects, although small comparatively to its mechanical effects and to the effects of electricity in other forms, could be made equally startling.

What now must be the influence of such an agent, experienced in such measure, upon the physical health and mental constitution of those daily subjected to it? The children in such homes encounter not merely the general enervating influence of luxury, but even a more formidable foe to health and intellectual strength. Compare this pale, precocious boy in your furnace-heated house with the bare-footed, rosy-cheeked boy in the laborer's cabin, or in the less luxurious country home. The difference is not all in the softer clothing and gentle rearing of your boy; upon his nerves a subtle and powerful agent is almost continuously at work to excite his sensibilities and waste his strength. Observe the distress that, with attention, may be read on the face of the fretful child in your electrical hot-bed, and give it the relief which nature craves, in the unadulterated air outside your doors."

*A Lost Life.*—The news of the abandonment of the French steamer *L'Amérique*, was followed by the announcement that the first officer had committed suicide. The act was foolish; it was a confession; but it was not unnatural. The unhappy man reflected; "I have lost all. I had a trust committed to me; I abandoned it; I did it needlessly. With it went honor, opportunity, prospects, all. All is lost, and all is my own fault." We may well imagine how maddening were these thoughts.

The remembrance of lost opportunity is always terrible. And how frightful must be the contemplation of a lost life. Suppose a man who has spent all his days in the pursuit of wealth, or in the quest of pleasure, or in the service of ambition, whether political, or literary, or social, or in seeking any other merely worldly end. He draws near to the end of life. He looks back upon his days. He says, "I have had opportunities. I have had life. It was given to me to use for God and for man. It was my only life. It was my all. And what have I done? I have lost it. It is gone; I have got nothing in exchange; I lost it needlessly; I can blame no one but myself: and now all is over; the mistake can never be corrected; the loss is irreparable."—*The National Baptist*.

There are many curious facts about vegetable life, says the Massachusetts Plowman. We can, for example, graft the apricot on the plum, and the peach on the apricot, and thus we may produce a tree with plum roots and almond leaves. The wood, however, of the stem will consist of four distinct varieties, though formed from one continuous layer. Below the almond wood and the bark we shall have perfect peach wood and bark, then perfect apricot wood and bark, and at the bottom perfect plum wood and bark. In this curious

instance we see the intimate correspondence between the bark and the leaf, for if we should remove the almond branches we might cause the several sorts of wood to develop buds and leafy twigs each of its own kind. Each section of the compound stem has its seat of life in the cambium layer, and the cambium of each reproduces cells of its own species out of a common nutrient fluid.

The Lord inspires counsel and courage, or sends infatuation and dismay as He pleases; so that the battle is not to the strong; but all calculations are strangely proved erroneous when this secret influence is not taken into account.—*T. Scott*.

The wonder at Winchendon, (Mass.) just now is a floating island of about five acres which is voyaging around Lake Monomonauk, a sheet of water of about 2500 acres in extent lying partly in Winchendon and partly in Rindge, N. H. It formerly claimed a residence in Winchendon, but toward the latter part of May the little island was one morning discovered to have changed its place and moved about two miles up the lake beyond the State line; then it floated back nearly to its old place, only, a day or two after, to sail north again. Its soil is firm, and many people have approached it by boats and travelled over it: the entire surface is covered by a thrifty vegetation; there are more than 400 trees by count, varying from 5 to 25 feet in height, scattered over its surface. Floating islands are not uncommon in the lakes of this region, but one so large as this, and given to so long voyages, is remarkable.—*Ledger*.

## THE FRIEND.

SEVENTH MONTH 11, 1874.

"Whether therefore ye eat or drink, or whatsoever ye do, do all to the glory of God." 1st Cor. x. 31.

The season usually devoted to relaxation from the cares of business and recreation by sea side and mountain has again arrived, in the course of the revolving year, to those whose means and duties will admit of such indulgence.

The ordinary routine of business life, with its absorbing cares, is no longer pursued, for a fortnight or so, and new channels of thought and action draw the mind with fresh force. How important to the spiritual life is it, under such circumstances, that we should keep in mind, that "we are not our own, but are bought with a price," and are bound to glorify God in our bodies and our spirits which are His. That *all* we do is to be directed to His honor. Thus we shall not feel at liberty to indulge in those hurtful pleasures that tend to close up the eye of faith, which should be daily directed towards its Leader, as the eye of the servant is to the hand of his master. If the love of Christ glows in the soul, the new scenes which are presented to the eye, as we wander amid Nature's wonders, will all conspire to fan the holy flame, and lead us to adore their Divine Author. What a beautiful apostrophe to his Maker the royal Psalmist has recorded, by the shores of the Mediterranean, whilst the grand peaks of Lebanon towered above him from the east! "Who laid the foundations of the earth that it should not be removed forever. Thou

coveredst it with the deep as with a garment. The waters stood above the mountains. At thy rebuke they fled; at the voice of thy thunder they basted away. They go up by the mountains, they go down by the valleys unto the place which thou hast founded for them. The trees of the Lord are full of sap, the cedars of Lebanon which he hath planted. O Lord, how manifold are thy works! in wisdom hast thou made them all: the earth is full of thy riches. So is this great and wide sea, wherein are things creeping innumerable, both small and great beasts. The glory of the Lord shall endure forever; the Lord shall rejoice in His works. I will sing unto the Lord as long as I live, I will sing praise to my God while I have my being. My meditation of Him shall be sweet, I will be glad in the Lord!" How different is the state of mind thus exhibited from that of mere pleasure seekers, who pace the ocean strand with eye intent on their apparel or that of their companions, and thought and conversation directed to idle gossip, or the vanities of the evening dance. Even those who are sober and careful in their home life may at times be tempted, when absent at summer resorts, to indulge in doubtful means of recreation. The readable romance is perhaps taken up as a pastime, which may be excused just now although condemned in general. A friendly game of tennpins or billiards may be thought allowable for exercise, whilst overlooking the poisoned fountain of evil that lurks near by in the drinking bar, and the effect of our mere presence at such places in giving countenance to gamblers and tipplers.

If the mind is truly transformed by the renewing influence of Divine Grace, it will be so deeply imbued with love and gratitude to Him who has purchased us with His own blood, that each opportunity of withdrawal from the necessary pursuits of business will find it seeking its central object of attraction. No sweeter relaxation, no more refreshing recreation than this will be desired by those who love Him with all their heart, understanding, and strength.

"Admitted once to His embrace,  
Thou shalt perceive that thou wast blind before:  
Thine eye shall be instructed; and thine heart  
Made pure shall relish, with divine delight  
'Till then unfelt, what hands divine have wrought."  
"These look from nature up to nature's God."  
"Whose eye they fill with tears of holy joy,  
Whose heart with praise, and whose exalted mind  
With worthy thoughts of that unwearied love  
That planned, and built, and still upholds a world  
So clothed with beauty, for rebellious man!"

The sentiments of gratitude thus instilled will not fail to bear practical fruit in works of charity and love to our less favored fellow beings. The suffering and needy will be sought out and cheered by the counsel, or relieved by the means, of those who feel themselves but stewards of the manifold grace of God. "A concern will be felt that others should taste and see that the Lord is good, and that a cross bearing life and conversation shall show forth the praises of Him who hath called us out of darkness into His marvellous light. The distribution of well selected Religious Tracts, when associating with others away from home, is one method of spreading the Truth—that may be adopted by the most humble and unassuming. A watchful concern that our conversation in public places should not degenerate into frivolity, or gossip

of a personal character, seems needful, where so much time is at our disposal. It may be laid down generally as a rule, that it is more elevating and free from dissipating influences to converse about *things* than *persons*. To dissect character and comment upon the actions of others may have a keener relish than literary observations, or the discussion of questions of science or statesmanship, but the former oft carry with them an edge of cutting criticism which may wound both speaker and listener. "Let your speech be always with grace, seasoned with salt." If we go abroad under such influences, not trusting to our own prudence or supposed religious attainments, but in humility watching daily unto prayer lest we enter into temptation, we may with innocent cheerfulness enjoy that repose which nature demands for bodily and mental recuperation, and gain renewed energy for future toil, whilst we hold forth a profitable example to others "in word, in conversation, in charity, in spirit, in faith, in purity."

#### SUMMARY OF EVENTS.

**FOREIGN.**—The new telegraph cable of the Anglo-American Company was completed on the 4th inst. The Great Eastern is to leave to lay the cable between Ireland and Newfoundland on the 27th inst.

On the first inst. Dr. Butt moved his resolve in the House of Commons in favor of home rule for Ireland. It met with little favor in the House, and after debate was defeated by a large majority, the vote being 458 to 61.

The emigration from Liverpool in the Fifth month was 17,293. In the corresponding month 1873, the number was 35,364, or more than double.

The cost of the London Metropolitan Police for the last official year was \$5,089,965, of which \$3,776,665 was for salaries and pay of policemen.

Liverpool, 7th mo. 6th.—Uplands cotton, 8½d.; Orleans, 8¾d. Sales of the day 15,000 bales. Bread-stuffs quiet.

A committee of the French Assembly have drawn up a new constitutional bill. The measure provides for the continuance of the title of "President of the Republic;" for the creation of a second Chamber; for the organization of a purely personal Septennat, which is to terminate with the expiration of President MacMahon's term, or sooner in case of his death or resignation. No provision is made for a successor to the President, and it is thought that the object of the omission is to leave an opportunity for the restoration of the monarchy, which may be possible when the Septennat ceases.

The Count de Chambord has issued a manifesto in which he places his right to the throne of France upon his birth, which he says made him its king. He will admit the existence of two Chambers, one nominated by the king and the other elected by the nation, according to legally established suffrage. He says, "I wish the representatives of the nation to be vigilant auxiliaries for the examination of questions submitted to them, but will not have barren parliamentary struggles from which a sovereign often issues powerless and weakened."

The French and English press generally consider that this manifesto of the grandson of Charles X., makes it impossible for him to become King of France. The Paris newspaper which first published Chambord's manifesto has been suspended for two weeks by order of the government. This step gives great offence to the Legitimists who will use every effort to unseat the present Ministry.

Passports are no longer required of Americans, who are placed on the same footing in this respect as subjects of countries adjacent to France.

The North German Gazette (official organ) pays a warm tribute to George Bancroft. It says the German government sees his departure with regret—a feeling which is lively and general in private as well as official circles—and declares that since Frederick the Great received Franklin, the mutual understanding between Germany and the United States has never been more profound than at present.

In the Bernese Jura, the manufacture of watches is continually increasing. Twelve thousand three hundred persons find employment through this industry.

The yearly production is 1,290,000 watches of the value of 20-25 francs, representing about 30,000,000 francs.

The situation in Spain does not appear to improve. The Carlists hold Estella with a force of 38,000 men, they have also again invested Bilboa on all sides except toward the sea. Don Carlos has fixed his residence at Tolosa, fifteen miles from San Sebastian.

The Madrid government propose making a fresh levy for the purpose of sending 30,000 men to reinforce the army in the north of Spain.

Dispatches of the 6th report great activity on the part of the Carlists, who now threaten Santander, Castro, and other places. On the 4th about 4000 of them attacked Ternel, but were repulsed with the loss of 300 men.

The British Minister at Constantinople has tendered his good offices as mediator between the Persians and Turks in the complications which have recently arisen.

**UNITED STATES.**—The Public Debt statement published on the first inst., shows a reduction of \$2,180,196 during the Sixth month. It now amounts, less cash in the Treasury, to \$2,143,088,241. The Treasurer held in coin \$74,205,304, and in currency \$14,576,010.

During the first six months of the present year the interments in Philadelphia consisted of 3894 males, and 3702 females—total 7596, which is 973 less than in the corresponding portion of 1873. There were 1177 deaths of consumption, and 657 inflammation of the lungs. The interments of the last week numbered 234.

The mean temperature of the Sixth month, by the Pennsylvania Hospital record, was 75.53 deg., the highest during the month 97.50 deg., and the lowest 55 deg. The amount of rain 2.66 inches. The average of the mean temperature of the Sixth month for the past 85 years, is stated to be 71.84 deg., the highest mean of temperature during that entire period was in 1870, 77.21 deg., and the lowest was in 1816, 55 deg. The rain fall of the first half of the present year has been 21.47 inches, against 23.73 inches in the first six months of 1873.

Engene Hale, who was nominated by the President to fill the office of Postmaster General, declined the appointment on account of impaired health. It was then tendered to Marshall Jewell, of Connecticut, at present Minister to Russia, who answered by telegraph that he accepted the position. The office will be filled until his return, by the first assistant in the Department.

The crevasses in the river bank of the Mississippi, above New Orleans, have at length been closed, the flood in the great river having subsided with the advance of the summer. Vast amounts of property have been destroyed by the inundation, which is said to have covered about one-fourth of Louisiana.

On the 4th inst. a new iron bridge across the Schuylkill, at Girard Avenue, Philadelphia, was opened for public use. This beautiful structure is 1000 feet in length and 100 feet wide, and was built at a cost of \$1,404,445. The same day the corner-stone of the great Public Buildings, at the intersection of Market and Broad Streets, was laid. The work upon this structure began nearly two years since, and many more will probably elapse before its entire completion. The building, which is to be of white marble and massive construction, is 486 feet from north to south, and 470 feet from east to west, and will probably cost not less than ten millions of dollars.

The assessed value of real and personal estate in the city and county of New York the present year, is \$1,754,000,000.

**The Markets, &c.**—The following were the quotations on the 6th inst. *New York.*—American gold, 110. U. S. sixes, 1881, registered, 116½; coupons, 116¾; do. 1868, 116¼ a 116½; do. 10-40 5 per cents, 113. Superfine flour, \$4.65 a \$5.10; State extra, \$5.60 a \$6; finer brands, \$6.50 a \$10.25. No. 1 Chicago spring wheat, \$1 37; No. 2 do., \$1.32; No. 3 do., \$1.28. West Canada barley, \$2. Oats, 59 a 64 cts. Western mixed corn, 75 a 76 cts.; yellow, 77 a 77½ cts.; white, 83 cts. *Philadelphia.*—Cotton, 17¾ a 18½ cts. for uplands and New Orleans middlings. Superfine flour, \$4 a \$4.50; extras, \$5 a \$6; finer brands, \$6.50 a \$9.50. Pennsylvania red wheat, \$1.40 a \$1.45; western red, \$1.25 a \$1.35; No. 1 spring, \$1.30. Rye, \$1. Yellow corn, 80 cts. Oats, 63 a 67 cts. Lard, 11½ a 12 cts. Clover-seed, 9¾ a 10½ cts. About 3300 beef cattle were sold at 7 a 7½ cts. per lb. gross for extra; 5½ a 6 cts. for fair to good, and 3½ a 5 cts. for common. Sales of 8000 sheep at 4 a 5½ cts. per lb. gross, and 5500 hogs at \$9 a \$9.25 per 100 lbs. net. *Chicago.*—No. 2 spring wheat, \$1.12; No. 3 do., \$1.06. No. 2 mixed corn, 59 a 60 cts. No. 2 oats, 43 a 43½ cts. No. 2 rye, 83 cts. Spring barley, \$1.10 a \$1.20. Lard, 11½ cts. *Cincinnati.*—Red wheat, \$1.10; white, \$1.20. Corn, 63 a 66 cts. Oats, 47 a 55 cts. *St. Louis.*—No. 1 mixed corn, 58½ cts. No. 2 oats, 53 cts.

#### SHELTER FOR COLORED ORPHANS.

Wanted, by the 1st of 10th mo. next, a suitable Friend for Matron for the above institution.

Application may be made to  
Hannah R. Newbold, 641 Franklin St.  
Mary Wood, 524 South Second St.  
Mary Randolph, 247 North Twelfth St.  
Anna W. Lippincott, 460 North Seventh St.

#### WANTED.

An unmarried Friend to take the position of Governor at Westtown Boarding School, on or before the close of the present session, in the 10th month next.

Apply to  
Clarkson Sheppard, Greenwich, New Jersey,  
Joseph Walton, Moorestown,  
Charles Evans, 702 Race street, Philadelphia.

#### WANTED

A young man of energy and perseverance, to take charge and oversight of the farm belonging to the Wyandott Mission, situated near Teneca, in the State of Missouri; also a woman well qualified to fill the place of Matron in the Boarding School. Friends would be preferred. For further information apply to John S. Stokes, Office of "The Friend," Fourth above Arch street.

#### FRIENDS' DISCIPLINE.

The Committee having charge of Friends' Library are desirous of procuring copies of the different editions of the Discipline of Baltimore Yearly Meeting. Also that of the late Yearly Meeting of Virginia. Any person who may be able to supply any of the above, will please communicate with EDWARD MARIS, M. D., 127 South Fifth St.

#### HAVERFORD COLLEGE.

The next Term will commence on Fourth-day, 9th mo. 2nd, 1874. Applications for admissions should be addressed to SAMUEL J. GUMMERE, *President*, Haverford College, Montgomery Co., Pa.

#### WANTED,

A woman Friend, competent for Principal of the Aimwell School. Apply to  
Sarah E. Smith, No. 1110 Pine St.  
Rebecca W. Fry, 908 North Fifth St.  
Rachel S. Maris, 127 South Fifth St.  
Mary D. Allen, 833 North Seventh St.

#### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia.  
Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

DIED, the 22d of 5th mo. 1874, MARTHA MARSHALL in the 58th year of her age, a member and elder of Kennett Monthly Meeting, and daughter of the late William Walter. This dear Friend was one who knew what it was to descend into deep baptisms of spirit, that she might know Christ and the power of His resurrection; and, by her humble consistent walking and dedicated life, as well as her peaceful close, we are induced to believe, that through His mercy, she has entered among those redeemed ones, "who have washed their robes and made them white in the blood of the Lamb; therefore are they before the throne of God, and serve Him day and night in His temple."

—, suddenly, at her residence in Westmoreland, Oneida Co., New York, on the morning of the 11th of 6th month, 1874, ELIZA D. NARAMORE, wife of David Naramore, and daughter of Henry A. and Mary Knowles, of Iowa, in the thirty-ninth year of her age, a beloved member and elder of Westmoreland Monthly Meeting. She had long been engaged to seek first the Kingdom of Heaven and the righteousness thereof. The last two or three years of her life she seemed ripening for the Kingdom, and more abundantly filled with that love that thinketh no evil, but is full of gentleness and good works. When the midnight call was suddenly heard, it found her ready to go forth with joy to meet the Bridegroom, speaking of the love and goodness of God, and resting in a full assurance of receiving, through mercy, an entrance into that blessed city whose walls are salvation and whose gates are praise.

WILLIAM H. PILE, PRINTER.

No. 422 Walnut Street.

For "The Friend."

## The Little Land of Appenzell.

Appenzell, a canton in the N. E. of Switzerland, has an area of 153 square miles, and in 1850 contained 54,869 inhabitants. The people are in general very industrious, contented and orderly, and strongly attached to their Alpine home. It was visited by Bayard Taylor a few years ago, and we have thought some of his observations respecting the Appenzellers, and their peculiar mode of government, might be interesting to our younger readers.

He says: "The traveller who first reaches the Lake of Constance at Lindau, or crosses that sheet of pale green water to one of the ports on the opposite Swiss shore, cannot fail to notice the bold heights to the southward which thrust themselves between the opening of the Rhine Valley, and the long, undulating ridges of the Canton Thurgau. These heights, broken by many a dimly hinted valley and ravine, appear to be the front of an Alpine table-land. Houses and villages, scattered over the steep ascending plane, present themselves distinctly to the eye; the various green of forest and pasture land is rarely interrupted by the gray of rocky walls; and the afternoon sun touches the topmost edge of each successive elevation with a sharp outline of golden light, through the rich gloom of the shaded slopes. Behind and over this region rise the serrated peaks of the Sentis Alp, standing in advance of the farther ice-fields of Glarus, like an outer fortress, garrisoned in summer by the merest forlorn hope of snow.

The green fronts nearest the lake, and the lower lands falling away to the right and left, belong to the Canton of St. Gall; but all aloft, beyond that frontier marked by the sinking sun, lies the 'Little Land of Appenzell.'

If, leaving the Lake of Constance by the Rhine Valley, you ascend to Ragatz and the baths of Pfeffers, thence turn westward to the Lake of Wallenstatt cross into the valley of the Toggenburg, and so make your way northward and eastward around the base of the mountains back to the starting point, you will have passed only through the territory of St. Gall. Appenzell is an Alpine island, wholly surrounded by the former canton. From whatever side you approach, you must climb

in order to get into it. It is a nearly circular tract, falling from the south towards the north, but lifted, at almost every point, over the adjoining lands. This altitude and isolation is an historical as well as a physical peculiarity. When the Abbots of St. Gall, after having reduced the entire population of what is now two cantons to serfdom, became more oppressive as their power increased, it was the mountain shepherds who, in the year 1403, struck the first blow for liberty. Once free, they kept their freedom, and established a rude democracy on the heights, similar in form and spirit to the league which the Forest Cantons had founded nearly a century before. An echo from the meadow of the Grütli reached the wild valleys around the Sentis, and Appenzell, by the middle of the fifteenth century, became one of the original states out of which Switzerland has grown.

I find something touching and admirable in this fragment of hardly noticed history. The people isolated themselves by their own act, held together, organized a simple yet sufficient government, and maintained their sturdy independence, while their brethren on every side, in the richer lands below them, were fast bound in the fetters of a priestly despotism. Individual liberty seems to be a condition inseparable from mountain life; that once attained, all other influences are conservative in their character. The cantons of Unterwalden, Schwytz, Glarus, and Appenzell, retain to-day the simple, primitive forms of democracy which had their origin in the spirit of the people nearly six hundred years ago.

Twice had I looked up at the little mountain republic from the lower lands to the northward, with the desire and the determination to climb one day the green buttresses which support it on every side; so, when I left St. Gall on a misty morning, in a little open carriage, bound for Trogen, it was with the pleasant knowledge that a land almost unknown to tourists lay before me. The only summer visitors are invalids, mostly from Eastern Switzerland and Germany, who go up to drink the whey of goats' milk; and, although the fabrics woven by the people are known to the world of fashion in all countries, few indeed are the travellers who turn aside from the near highways. The landlord in St. Gall told me that his guests were almost wholly commercial travellers, and my subsequent experience among an unspoiled people convinced me that I was almost a pioneer in the paths I traversed.

It was the last Saturday in April, and at least a month too soon for the proper enjoyment of the journey; but on the following day the Assembly of the People was to be held in Hundroyl, in the manner and with the ceremonies which have been annually observed for the last three or four hundred years. This circumstance determined the time of my visit. I wished to study the character of an Alpine democracy, so pure

that it has not yet adopted even the representative principle,—to be with and among a portion of the Swiss people at a time when they are most truly themselves, rather than look at them through the medium of conventional guides, in lines of travel which have now lost everything of Switzerland except the scenery."

He reached Hundroyl before evening and lodged there. The following morning the narrative continues: "In the village there were signs of preparation but not a dozen strangers had arrived. Wooden booths had been built against some of the houses, and the owners thereof were arranging their stores of gingerbread and coarse confectionery in the open, grassy square; in front of the parsonage stood a large platform, with a handsome railing around it, but the green slope of the hill in front was as deserted as an Alpine pasture. Looking westward over the valley, however, I could already see dark figures moving along the distant paths. The morning was overcast, but the Hundroyl Alp, streaked with snow stood clear, and there was a prospect of good weather for the important day. As I loitered about the village, talking with the people, who, busy as they were, always found time for a friendly word, the movement in the landscape increased. Out of firwood, and over the ridges, and out of the foldings of the hills, came the Appenzellers, growing into groups, and then into lines, until steady processions began to enter Hundroyl by every road. Every man was dressed in black, with a rusty stove-pipe hat on his head, and a sword and umbrella in his hand or under his arm.

From time to time the church bell chimed; a brass band played the old melodies of the Canton; on each side of the governing Landman's place on the platform stood a huge two-handed sword, centuries old, and the temper of the gathering crowd became earnest and solemn. Six old men, armed with pikes, walked about with an air of importance; their duty was to preserve order, but they had nothing to do. Policeman other than these or soldier was not to be seen; each man was a part of the government, and felt his responsibility. Carriages, light carts, and hay wagons, the latter filled with patriotic singers, now begun to arrive, and I took my way to the "Crown," in order to witness the arrival of the members of the Council.

In order to make the proceedings of the day more intelligible, I must first briefly sketch certain features of this little democracy, which it possesses in common with three other mountain cantons—the primitive form which the republican principle assumed in Switzerland. In the first place the government is only representative so far as is required for its permanent, practical operation. The highest power in the land is the General Assembly of the People, by whom the members of the Executive Council are elected, and who alone

can change, adopt or abolish any law. All citizens above the age of eighteen, and all other Swiss citizens after a year's residence in the Canton, are not only allowed, but required to attend the *Landsgemeinde*. There is a penalty for non-attendance. Outer-Rhoden (the larger division of Appenzell) contains 48,000 inhabitants, of whom 11,000 are under obligations to be present and vote, from beginning to end of the deliberations."

(To be continued.)

Selected for "The Friend."

*Report of the Committee who have charge of the Boarding School at Westtown.*

To the Yearly Meeting:—The Committee who have charge of the Boarding School at Westtown, report: That in the Summer term of 1873, there were 84 boys and 89 girls, and during the Winter session 124 boys and 79 girls who entered the School, exclusive of day-scholars. The average number of both sexes for the whole year being 188, which is an increase of three over the previous year. The new admissions were 47 boys and 46 girls.

The expenditures chargeable to the year ending on the 4th instant, were as follows:—

For Provisions, . . . . .	\$16,029 99
" Fuel, Gas and Laundry Expenses, . . . . .	5,004 04
" Furniture and Miscellaneous Family Expenses, . . . . .	2,226 33
" Salaries and Wages (exclusive of wages charged to the Laundry and Gas accounts), . . . . .	14,811 82
" Incidental Expenses, . . . . .	428 93
" Repairs and Improvements, . . . . .	2,012 79

Making together, . . . . . \$40,513 90

The average cost of each pupil for the year, obtained from the above data is \$215.50, which is \$5.37 less than last year.

The charges for board and tuition were, . . . . .	\$27,556 50
Profits on Books, Stationery and other Merchandise, . . . . .	566 60
Estimated Profits of the Farm, . . . . .	3,770 67
Rent of Tenements, . . . . .	150 00
Income from Grist and Saw Mills, . . . . .	587 77
Income of the Fund for general purposes, . . . . .	5,000 02
Income of the Fund for Paying Teachers' Salaries, . . . . .	684 82
Yearly Meeting Appropriation, . . . . .	3,000 00

Making the sum of . . . . . \$41,316 38

And showing a balance in favor of the Institution for the year, of \$802.48.

A want having long existed for residences suited to the married Teachers, and the building formerly erected for an Infirmary on the south side of the lane being of no practical use for its original purpose, the Committee resolved last year to convert it into two dwellings. This has accordingly been accomplished, and they were occupied by two of the men teachers and their families, during the winter. New back buildings of brick were added to each house, so that they contain seven rooms each, exclusive of basements, and are supplied with hydrant-water, baths, and other modern conveniences, making commodious and pleasant residences. The old Piazza in front, being found much decayed, it has been replaced by a new one. The cost of the whole improvement, including the introduction of the water from the Reservoir at the

School-house, and grading the ground, has been about \$6,460, which has been defrayed to the extent of \$5,000 from the Legacy of Jesse George, deceased.

The girls' play shed, being found too much exposed in the winter season, for the accommodation of the children during the performance of the physical exercises, which they practise at stated times for the benefit of their health, under the charge of one of the teachers, an enclosure of movable glass sash has been placed on the south side, which proves a satisfactory remedy.

Additional stoves and heating apparatus were provided in the autumn throughout those portions of the School buildings, which had proved deficient in heat during previous severe winters, and, it is believed, that no further difficulty in this respect need be felt in future, with ordinary care.

The average health of the pupils has been good during the past year; but one case of serious illness having occurred since last report.

The Committee have regretted to observe a growing practice of removing children from the School prior to the close of the sessions on the ground of ill health, or for other reasons, but sometimes without sufficient cause. During the summer of 1873, seventeen, and the past winter, thirteen girls were taken away before the close of the term.

The effect of this, is to unsettle the remaining pupils, and to interfere with the progress of the classes in their studies.

We would advise, that such removals should only be made on the recommendation of a Physician, and the concurrence of the Superintendent in its propriety, in accordance with the printed rule on the subject.

It is with satisfaction that we allude to the general good conduct of the pupils of both sexes since last report. Their progress in study has been satisfactory, and the industry and efficiency of the teachers in their several departments commendable.

The proposition to raise a fund for the increase of the Teachers' Salaries, as suggested to the Yearly Meeting in 1873, has been met with a generous response by many members of it, and in some Monthly Meetings, by quite general subscriptions. The sum of \$43,453 50 has been subscribed and reported up to this date, and \$35,273 50 has been paid into the Treasurer's hands, and invested. This timely aid has already enabled the Committee to increase the salaries of most of the teachers to a more satisfactory amount, and gives them the long-sought for opportunity to offer the incentive of a liberal remuneration to those who may exhibit proper qualifications as instructors of youth.

We would again call the attention of our young Friends to this vocation, as one justly claiming their consideration in the selection of a business. No more honorable or useful employment probably could be engaged in, and few that afford so large a scope for influence over others, and the exercise of varied talents.

We gratefully acknowledge the gift, by a Friend to the School, of securities to the amount of \$20,000. When the income on them becomes available, it is to be appropriated strictly for educational purposes; viz., the purchase of books for the library, text books for pupils, maps, philosophical apparatus, and salaries of teachers. The income

of a part of this fund, will be received by the School in the course of this year; on the balance it will be postponed for some years more. From another Friend, we have received an acceptable donation of \$20,000, in cash. The income only of this liberal gift is to be used, and is to be applied to the same purposes as the above.

Our friends Aaron and Susanna F. Sharpless, who have very acceptably filled the stations of Superintendent and Matron, since 1869, have now resigned their positions. It is with feelings of regret that we relinquish the valued services of these Friends. The fidelity and judgment with which they have discharged the responsible duties pertaining to those offices have been fully appreciated.

Benjamin W. and Rebecca G. Passmore, having offered to fill the vacancies thus occasioned, have been accepted by the Committee, and it is expected they will enter on the discharge of their duties at the opening of the Summer session.

A change has been made in the course of instruction, by combining branches of study of a similar character, heretofore taught by different teachers, more generally under one; so that each teacher has subjects of a kindred nature under his charge. This arrangement has proved advantageous.

The usual care has been bestowed by the Committee in stated visits to the Schools, as well as to the religious meetings regularly held on First and Fifth-days. Those meetings have also not unfrequently been visited at other times. We have been led into sympathy with both the officers and pupils when collected for the purpose of Divine worship, feeling the youth and inexperience of the children, and that such occasions are among the most solemn and important that we can engage in. An exercise has been felt from time to time, that those assembled may be impressed according to their capacity, with a due sense of the nature of true spiritual worship, and experience a preparation of heart to participate therein. That thus their assemblies may be owned and crowned by our great High Priest, and they reap the benefits of reverent waiting upon Him.

We trust that at seasons, the hearts of some of the children have been tendered on these and other occasions under the renewed visitations of heavenly love, and we may hope that the impressions thus made may prove lasting and result in a more general love for, and observance of our Christian principles and testimonies. The Institution will fail of one of its original objects, if the minds of the pupils are not so influenced. It is our continued desire, that there may be a united religious engagement on the part of those employed in its management, to conduct it in the fear of the Lord, watching against innovations in what may be esteemed small things by some, and to let their own example conform to their profession. As this is realised, we may humbly trust, the instruction received in it will continue to be of permanent benefit to many.

The Committee are satisfied that the labors of the care-takers would be much lessened, if there was a more hearty and united co-operation on the part of those who place their children at the School, in the maintenance of the necessary rules for its government. They would, therefore, encourage such to make themselves acquainted with them, and enjoin the observance of them upon their children.

Notwithstanding the difficulties which attend the conducting of this Seminary, where there is so great diversity of disposition and habits among the pupils, yet the beneficial influence which it has had upon the children of members of our Yearly Meeting, should encourage those to whose care it is committed, faithfully to maintain it in conformity with our religious principles and testimonies, not doubting as this is done in humility, the Divine blessing will continue to rest upon it.

On behalf of the Committee,

SAMUEL MORRIS, Clerk.

Philadelphia, 4th mo. 18th, 1874.

### Star Streams.

(Continued from page 370.)

At the end of the last century astronomers recognized in the solar system a mechanism of an uniform and symmetrical character. Around a central orb they saw revolving a family of dependent globes, vast in their absolute dimensions, but minute in comparison with the massive globe which sways their movements. Amongst these bodies they saw several attended upon by yet smaller globes, forming secondary systems, which resemble in many respects the great system of which the Sun is the controlling centre. The late discovery of Uranus had led them to recognize the possibility that beyond the known planets there may exist others, perhaps by no means the least important members of the solar system. Little was known, however, that differed in kind from what had been known to Aratus, Hipparchus, or Ptolemy. When we have named the ring of Saturn and a few periodic comets, which were looked on rather as accidental solar attendants than as forming a normal feature of the system, we have mentioned all that the last three centuries had revealed which differed in character from what had been recognized for two thousand years.

Very startling is the contrast when we turn to consider the views at present held respecting the solar domain. We no longer see a system which, however complex, might yet be very adequately represented by human mechanisms. We recognize, within a sphere exceeding manifold in diameter the orbit of distant Neptune, a variety and complexity of formation of which the human mind is unable to form adequate conceptions.

The increase in the number of primary attendants upon the Sun, though far from being the most remarkable discovery which has been made during the present century, is well worth dwelling upon for a moment. Lately the 98th asteroid was discovered (1869\*), and yet it was but on the opening day of the century that the first of these bodies was discovered. In these new members of the solar system we recognize characteristics which had not hitherto been presented to the notice of astronomers. We see a series of bodies, primaries of the planetary system, which yet, instead of travelling in distinct and widely-separated orbits, revolve in paths closely interwoven. Even when but forty had been discovered it was truly said that if each orbit were represented by a hoop, it would be impossible to lift any one of these hoops without lifting the whole set. We may fairly assume that for each discovered asteroid there are to be reckoned tens, perhaps hundreds, which will remain for ever undiscovered.

It has been found, also, that there exist within the solar system myriads of dependent comets. Revolving around the Sun in orbits of the most varied figure, differing among themselves in size and character, and presenting—some of them—the most singular phenomena that have ever rewarded astronomical observation, these objects remain among the mysteries of science. The only two which have as yet been submitted to the searching analysis of the spectroscope are found to consist of a gaseous nucleus attended by a coma which probably shines by reflected light; but whether this is the case with all or even the generality of comets it would be assuming too much to assert.

The most remarkable feature of modern astronomical discovery remains yet to be mentioned. A phenomenon which men had long been in the habit of looking upon as a meteorological one has been at length recognized in its true light, and has been found wonderfully to enhance our appreciation of the complexity of the systems which exist within the solar domain. Meteors, shooting-stars, and aerolites have taken their place among the attendants of the Sun; and in several instances the orbits they have followed before they reached the earth have been approximately determined.

But it is rather as members of systems than as individual bodies, that these objects acquire their chief interest and meaning. There was not much, perhaps, to attract attention to them when they were supposed to form one or two rings occupying a position in space very nearly coincident with that of the earth's orbit. But it has now been placed beyond a doubt that the earth encounters fifty-six systems, at least, of these small bodies. And these systems are found (in the only instances yet examined) to be—not circular rings—but ovals of great eccentricity extending far into space—even in some cases beyond the orbits of Uranus and Neptune. It is clear, then, that we can no longer look on these systems as resembling, in the remotest degree, the asteroidal zone. We are forced, too, to take into consideration an important question of probability. What is the likelihood that if there were but a few hundreds of such systems, the earth would encounter so many as fifty-six? The probability may be reckoned "almost at naked nothing." And therefore we are compelled to admit as a legitimate *a posteriori* deduction, the extreme probability, we may almost say the certainty, that such systems are to be reckoned—not by hundreds and thousands—but by millions on millions.

Nor is this all. Within the last few months the startling discovery has been made that two of the meteoric systems at least, and probably many others, coincide throughout their calculated extent with the orbits of known comets. Accordingly we are led to trace an intimate connection, if not an absolute identity, between comets and shooting-star systems. And when we find that a system, which has afforded such grand displays of star-falls as the well-known November shooting-star system, is identified—not with a large and conspicuous comet—but with one which has only lately been detected, though it must have been in close proximity to the earth some thirty times during the last thousand years, with a comet, in fact, which is absolutely invisible to the naked eye, and far from being a conspicuous object in powerful tele-

scopes, we are led to recognize the importance of such comets as Newton's, Halley's, and Donati's.

The result to which these considerations lead is clearly this:—

The interplanetary spaces, so far from being looked upon as untenanted, save by an occasional wandering comet, must be considered as crowded with various forms of cosmical matter. I would not be understood as using the term "crowded" in a sense implying absolute proximity between the various members of the cometic or meteoric systems. On the contrary, the evidence that we have assures us that the sum of the volumes of all the members of a system must bear an indefinitely small proportion to the total space occupied by the system. But if an eye, armed with new powers of vision, and placed at some far distant point, could see at one glance all the systems which occupy the solar domain, they would appear as a complicated network formed by interlacing streams of cosmical dust. And amidst the streams of misty light representing cometic or meteoric systems, the planets would shine forth as distinctly and as brilliantly as the brighter stars upon the background of the Milky Way.

There is no reason whatever for supposing that there are not multitudes of undetected comets whose perihelia lie far nearer to the Sun than any yet discovered. On the contrary, we have distinct evidence of a rapid increase in the number of perihelia, with decrease of distance down to and within the neighborhood of the earth's orbit; and, remembering the probability that comets whose perihelia lie nearer to the Sun would escape observation altogether, we have every reason for supposing that this law of increase is continued—as why should it change?—right up to the immediate neighborhood of the Sun. And further, we may confidently assume that that obedience to planetary laws which, as we have seen, begins to be exhibited by comets within the orbit of Saturn, becomes yet more marked among comets nearer to the Sun. Therefore, it seems highly probable that cometic orbits, and especially those which are nearest to the Sun, show a marked tendency towards aggregation near the medial plane of the solar system.

A celestial phenomenon, of which we have not hitherto spoken, appears to gain a far easier explanation from the considerations above adduced, than from the theories ordinarily adopted respecting it. The zodiacal light has been accounted for in three ways. There are some who hold that it is an atmosphere of the sun; others that it consists of a ring of cosmical particles, travelling around him in a nearly circular orbit; and others that it consists of a lenticular disc of cosmical dust, each portion of which travels in a nearly circular orbit. The remarkable phenomena presented by the zodiacal light, its strangely fluctuating figure, its varying position, and the singular increase and diminution noticed in its distinctness, are not accounted for by any of these theories. But if we recognize in the zodiacal light merely the effect of the above-considered aggregation among the cometic or meteoric systems which exist within the solar domain, the variations I have mentioned become readily explicable. A multitude of bodies travelling in orbits of every degree of ellipticity and magnitude, but with a marked aggregation in the neighborhood of

\* The number now known is 137.

the Sun, and with a yet more marked aggregation in the neighborhood of the medial plane of the solar system, would, in the first place, exhibit precisely such an appearance as the zodiacal light; and, in the second place, the general illumination resulting from the congregated comets would be liable to continual variation. Comets would be continually arriving within and passing away from the region within which their light would assist in forming the appearance we are considering. At one time the press of arrivals would temporarily increase the density of cometic aggregation; at another, the reverse would hold for a while, and the zodiacal light would wax and wane accordingly, precisely as it is observed to do. So also its figure and apparent position would be liable to changes corresponding to those which are actually presented. Therefore, without denying positively that the zodiacal light is caused by the existence of a multitude of minute bodies travelling in orbits of small eccentricity around the Sun, I hold that the phenomena correspond far more closely with those which would be presented if there is in the neighborhood of the Sun a great increase in the density with which cometic and meteoric systems are congregated together in the neighborhood of the medial plane of the solar system. And this correspondence becomes a strong argument in favor of such an increase of density when it is remembered that, as we have seen, there exist independent reasons for believing an aggregation of this sort to be not only possible, but highly probable.

But whatever opinion we may form on this and kindred questions, there is no dubiety whatever about the general results which have been presented above. Our conceptions of the solar domain are different, indeed, from those formed of old. "There was true prophecy," as has been well remarked by the late Professor Nichol, "in the exclamation of Laplace, who, although knowing more of the celestial mechanism than any man then living, said earnestly, on his death bed, 'That which we know is little; that which we know not is immense.'"

*Short account of Hannah Ludgater, taken from the 3d volume of Piety Promoted.*

This Friend, who was the wife of Robert Ludgater, of Coggeshall in Essex, had her education among Friends; but in her early days she left the Society, and frequented other places of worship. In this unsettled state, it pleased the Father of Mercies to enlighten her understanding; so that through the powerful operation of his love, she saw wherein she had missed her way, became again united to Friends, and in due time her mouth was opened to tell others what she had felt, and to invite them to come, taste, and see how good the Lord is. In this service she was engaged to travel both before and after her marriage.

She resided for some time in the Isle of Wight, and afterwards, on her first coming to London, lived as housekeeper with a person not in religious profession with Friends; where her innocent and virtuous deportment gained her much esteem, and the Society for her sake. She was an affectionate wife, and much concerned to promote the discipline of Friends among her own sex, and was a true

helper to her brethren; of a weighty and discerning spirit, accompanied with diligence in laboring for the advancement of Truth; though often pressing through great discouragements arising from bodily infirmities, which frequently rendered her incapable of attending meetings. She suffered great pain of body for the last six months of her life, under which trial her patience and resignation manifested the happy effects of faithful labor in the day of ability. Being steadfast in her dependence on the author of her faith, she had at times access to the fountain of life; under the sensible enjoyment whereof, she said, "O how I long to be relieved; I have no doubt but I shall be mercifully relieved." To a friend who visited her, she said, "I have been in a good degree faithful in our meetings, and have not to charge myself with omitting one journey, when it was made known to be my duty. O how have we gone forth poor and empty; yet we have not lacked: the Supporter hath been near and richly furnished."

She departed this life the 28th of Third month, aged about sixty-five years.

#### Shipping Elephants.

A Calcutta newspaper says; The hoisting into the air and lowering elephants into the hold of a ship is not only an unusual sight to most men, but also a strange experience to most elephants. They were lashed with strong ropes, slung as far as practicable in slings, hoisted up with crane with three-foot tackle, and lowered into the steamer's hold like a bale of cotton. When in the hold, they were placed in pens built of strong teak timber bulks, bolted to the ship's side to prevent them breaking loose. The fear the animals suffered was the only pain they underwent, and by watching the eyes of the poor beasts their terror was very manifest. Tears trickled down their mild countenances, and they roared with dread, more especially when being lowered into the hold, the bottom of which was sanded for them to stand upon. We are told that one female elephant actually fainted, and was brought to with a fan and many gallons of water. At sea it appears that they got into a curious habit of occasionally—evidently with a preconcerted signal—setting to work rocking the ship from side to side, by giving themselves, simultaneously, a swing motion as they stood athwart the ship, the vessel rolling heavily, as if in a seaway. This they would do for a spell of an hour or more, and then desist for several hours until the strange freak took them again. When they reached port they were hoisted out of the hold and swam on shore, thirty-five being thus safely landed without any accident whatever. When they were released from the slings it was a supreme moment for the mahout, who was always on the elephant's neck from the time of its touching the water to letting go. As the word was given to let go, each of the elephants, either from lightness of his heart at being freed from his floating prison, or from his own weight, we are not sure which—lightness of heart, like lightness of head, causes elephants and men to play pranks—plunged down deep into the water, the mahout on his neck. The anxiety on the face of the mahout just one second before the plunge was a study; so, too, was it when elephant and man rose to the surface again, the former blowing water from his trunk and the latter from his nose.

#### TOO LATE.

Morn's palpitating wings did smite  
And fan to flame  
The starry embers of the night.

From sun-rise hills surpassing sweet  
New throbs of air  
Poured over me from head to feet.

An angel whispered: "It is morn,  
Get to thy work,  
And gather in God's golden corn!"

"Go hind the yellow sheaves of love  
For Him who keeps  
The limitless garner-house above."

But wrapped in sweet repose I lay  
Delightedly  
Through the full measure of the day.

Then, as night came, my languor fled,  
I sprang to work:  
"There's naught to do," the angel said,  
"For the strong reapers of the morn  
Have swept the fields,  
And now bear home God's golden corn."

#### "SPEAK, LORD, THY SERVANT HEARS."

Speak, Lord, Thy servant heareth,  
Thy gentle voice I know,  
Thou dost not chasten gladly,  
Thou bear'st Thy children's woe,  
And often midst their anguish,  
And thro' their falling tears,  
The quick reply is ready—  
"Speak, Lord, Thy servant hears."

The waves of sorrow gather,  
The tempest thickens round,  
The mountain tops are covered,  
No olive-leaf is found:  
Yet still will we remember  
Thy love in former years,  
We listen for Thy still, small voice—  
"Speak, Lord, Thy servant hears."

There is an Ark of refuge,  
There is the Sacred Dove—  
Thy Holy Spirit, o'er the soul  
Is breathing words of love:  
And tho' the night continueth long,  
We hope amid our fears,  
Thy "Peace, be still," will soon go forth,  
"Speak, Lord, Thy servant hears."

How often when Thy voice is heard,  
Amid the cares of life,  
We lose its gentle teaching  
Mid restlessness and strife;  
Then in the hallowed chamber  
Thy watchful care appears;  
All hushed the spirit learns to say  
"Speak, Lord, Thy servant hears."

We thank Thee, Heavenly Father,  
That thus Thou deigns to guide,  
When in the silence of the soul  
No voice is heard beside.  
Oh! teach us still to follow on  
Alike through smiles and tears,  
And still in childlike trust reply,  
"Speak, Lord, Thy servant hears."

On leaving Bath, I was persuaded that notwithstanding the great dissipation abounding in the place, the Lord hath a considerable number of sincere hearted, seeking children there, though our Society is indeed, at a very low ebb. Looking back at my visit among the people, thankfulness covered my mind, that the Lord had preserved me, as I humbly hope, from wounding the blessed cause of Truth, which is at times, above all things dear to me. I had dreaded going there, but was convinced that the Lord is sufficient for his own work.—*William Savery, 1798.*

Blessed be the Lord God, the God of Israel, who only doeth wondrous things.

### New Remedy for Hydrophobia.

A new, simple, and, as it is stated, infallible remedy for hydrophobia has been recently published in the *Salut Publique* of Lyons, and its author is a physician (Dr. Buisson), it probably merits more attention than the numerous remedies which crop up perennially, like buttercups in a meadow. The terrible disease which apparently invariably follows sooner or later the bite of a mad dog, is as seemingly fatal as the envenomed fang of the cobra di capello; for it has defied alike the skill of the physician and the surgeon, and the *Materia Medica* has been ransacked in vain for a drug to counteract the effects of the virus upon the blood. Under these circumstances, it is not surprising that every village barber and the gossips of the countryside have in abiding faith in that one of the hundred remedies which they have heard described as infallible by their ancestors, and the marvelous cures effected by which they are never tired of repeating. Many of these so-called remedies are of the most ridiculous character, and we are afraid that a majority of those who read the description of Dr. Buisson's remedy will regard it as equally ridiculous. But the rationale of Dr. Buisson's method seems based on something more than its simplicity. It consists, in effect, of eliminating the poison, or, at least, rendering it inert by putting the patient into a profuse perspiration. Thus, his directions are that when a person has been bitten by a mad dog he must, for seven successive days, take a vapor bath of 57 to 63° C. (134 to 144° Fabr.) This he calls the preventive remedy. When, however, the disease has declared itself, which we presume will in future happen only when the preventive remedy has been neglected, he states that it is sufficient to take one vapor bath in which the temperature is made to rise rapidly to 37° C. (98° Fabr.) and then slowly to 53° C. (127° Fabr.), the patient keeping his room till the cure is complete. The simplest form of vapor-bath is quite as effectual as the most elaborate. A few red-hot bricks placed in a pail of water over which the patient sits on a cane-bottomed chair, a large blanket covering him in, from his shoulders down to the floor, is both simple and handy, and will answer the purpose admirably.

Dr. Buisson's remedy is the outcome of his own experience, for he is personally acquainted with the first stage of hydrophobia, and with the marvellous effects of the bath. It seems that he once attended a female patient in the last stage of the madness, and imprudently wiped his hands on a handkerchief impregnated with her saliva. A slight abrasion on one of his fingers warned him of his carelessness; but confident in the powers of his bath, he merely washed the part with water, and believing, as he then did, that the malady would not declare itself till the fortieth day, he performed his usual routine of visits, &c. On the ninth day, however, he began to suffer the consequences of his neglect; for he felt a pain in his throat, and a greater one in his eyes. His body seemed so light that he felt he could jump a prodigious height, or that if thrown out of the window, he would be able to sustain himself in the air. Saliva kept forming in his mouth continuously; even a slight movement of the air inflicted pain upon him, and he was compelled to avoid the sight of brilliant objects. He had a desire to run and bite, not human beings, but animals and

objects near him. He drank with difficulty, and observed that the sight of water distressed him more than the pain in his throat; whence he thinks that by shutting the eyes any one suffering from hydrophobia can always drink. The fits came on every five minutes, and thinking his course was then preservative, not curative, he took a bath, and found that when it had reached a temperature of 52° C. (125° Fahr.), the symptoms disappeared as if by magic, and never reappeared. Since then, he has attended more than 80 persons bitten by mad animals, and has not lost a single case. In his own case, this evidence is, of course, of the negative character; for there is no proof of an attack of rabies, but merely symptoms of it, which might have yielded to other remedies. Still, of the 80 cases mentioned it is not possible to assume that they were all of this character; and bearing in mind the number of deaths that do occur from the bites of mad animals, we must allow that a percentage of these cases were *bona-fide* cases of hydrophobia, and were consequently cured by the vapor bath. The effects of violent exercise and profuse perspiration in enabling the constitution to throw off the effect of poisons are well known, for instances are on record of fever patients and others being cured by the violent exercise they have taken during delirium. The effects of the bite of the Tarantula are said to be overcome by dancing, and amongst the cases mentioned by Dr. Buisson is that of an American who, while some eight leagues(?) from home, was bitten by a rattlesnake, and, wishing to die in the bosom of his family, ran the greater part of the distance, and on getting to bed, perspired profusely, and found himself cured. We do not, however, put much faith in these alleged "cures;" still, Dr. Buisson's remedy is so simple that there is no trouble in trying it; and if the result is not satisfactory to the patient, that is only what is to be expected from any of the other suggested remedies.—*Eng. Mechanic.*

I have been led to think that the only substantial source of consolation in times of trouble, is a firm and abiding faith in our Maker and Redeemer. Whatever anguish a sincere Christian may groan under, whatever wretchedness is permitted to come upon him, yet, "let him trust in the name of the Lord and stay upon his God." Let us then, in the midst of the most acute and poignant grief, never despair, but rather with upright Job, let us endeavor to attain to that lowly, submissive frame of soul, which leads us to commit ourselves to the disposal of an Almighty Creator and Merciful Father.—*J. Barclay.*

*Michael Laby* who lately graduated from the Pittsfield high school at the age of twenty-one is a remarkable young man. When a child, while playing on the railroad track, he was run over by a train and it was necessary to amputate both arms so close to the shoulder that no perceptible stumps are left. Nevertheless he has persevered in his studies, has not been absent or tardy once in his four years' course at the high school, and has become a proficient in the highest branches there taught, turning the leaves of his book with his tongue. He has also acquired a very legible and even handsome style of penmanship—which he executes with his mouth. E. F. Curtis, his teacher, obtained a reputation in teaching soldiers who had lost their right

hands to write with the left, but until he tried he did not conceive it possible to teach Laby, who had neither right nor left, to use the pen. Laby has for years been a reader of the most useful books in the library at the Athenæum, and having bravely and patiently done all he could to fit himself for life, is now seeking an opportunity to earn a livelihood.

### Silk Culture in California.

The San Jose (Cal.) *Mercury*, gives the following description of the silk culture, as carried on in Santa Clara County of that State.

"William Paul's ranch of 260 acres is located on the northwestern border of the town. It contains 7,000 mulberry trees, 250 fruit trees of different varieties, 2,000 grapevines, about 50 acres in grain, and the remainder in hay and pasture. For several years Wm. Paul has made a specialty of silk growing, for which business this soil and climate is specially adapted. A short description of the process may not be uninteresting. We are to suppose that the mulberry trees are sufficiently grown to furnish food for the worms.

"The first thing is to hatch the eggs. This is accomplished by placing them in a case with a tin bottom, arranged with shelves like a bookcase; this case is heated by means of a spirit-lamp placed underneath, at first to 20 degrees Centigrade or 75 degrees Fahrenheit; the temperature is increased each day by placing a sheet of paper under the lamp, thus gradually elevating it until the thermometer marks the required heat. If the eggs are good they will hatch in from ten to twelve days. When they begin to hatch they will nearly all come out in one day; a few, however, will not hatch until the second day. If the eggs have been exposed to variable temperature during the winter, a longer time will be required. Before the eggs are placed in the case, however, they must be lathed. This is done by placing them in salt water, in the proportion of half a pound of salt to a gallon of water, if the eggs are old; if new, the proportion of salt is reduced one-half. They remain in the bath about five hours, and then are rinsed in fresh water seven or eight times.

"After the young worms are out they are placed on shelves in a well-ventilated apartment, with the temperature kept uniform at from 18 to 20 degrees Reaumur, and fed every three hours during the day, and at least once in every four hours during the night. In feeding young worms the mulberry leaves must be cut up almost as fine as hair; as they get older and stronger the leaves are fed with little or no cutting. The leaves are picked at least twelve hours before feeding. Every day or two a quantity of refuse leaves accumulates on the shelves and must be removed. This is done by laying over the worms sheets of thick paper perforated with holes large enough for them to pass through. On the top of the paper leaves are spread and the worms coming up through the holes to get the feed, can be lifted to one side and the shelf cleaned out. This process also serves to separate the healthy from the unhealthy worms; if a worm is not in good condition it will not have energy enough to go through the holes, and can by this means be detected and rejected.

"After the worms have been fed eighteen or twenty days they will begin to spin; this time is indicated by the appearance of the worm. If, on holding one up to the light he

appears full of water, this is the time for making the web. Mustard stalks, with the brush on them, are set up between the shelves, the worms crawl up on them, spin a web, roll themselves up in it and spin another web on the inside, thus forming the cocoon. With good attention and under favorable circumstances this process requires about twelve or thirteen days; if the weather is very warm it will require about eighteen days. This can be ascertained by shaking the cocoon; if it rattles the worm has finished it; if not it is either unfinished or the worm is dead; and by opening one or two cocoons you can tell what is the matter. If silk is the object, the cocoons are then picked and placed in an oven with a sufficient temperature to kill the chrysalis; but if it is intended to raise eggs, the cocoons are placed on a table, the ragged ends of silk picked off carefully, and the butterfly allowed to eat its way out. As the butterflies come out the males and females are pared off and placed in a dark, cool room, on sheets of paper, letting them remain about six hours. The males are then destroyed, and the females placed on linen cloth, stretched vertically. They are placed on the upper edge of the cloth, about a quarter of an inch apart, and lay their eggs as they descend; each piece of cloth is marked with its weight before the eggs are placed on it, and by weighing it after the eggs are deposited, the weight of the eggs can be ascertained. The butterflies should be handled only by boys or girls, their hands being more tender than those of adults. They are allowed to remain on the cloth but one day. One butterfly will produce about 500 eggs, and there are about 50,000 eggs in an ounce. These eggs will keep several years, and, if they are known to be good, can be readily sold for \$8 per ounce; but if they are not well known, cannot generally be sold at any price. Three average trees will furnish feed for an ounce of eggs. The superintendent of Wm. Paul's silk business, is Signor Paolo Consonno, whose family in Milan, before the Garibaldian troubles, constituted the first silk house in Italy.

"He says the climate and soil in this locality is much better adapted to sericulture than that of France or Italy; that our leaves contain more sugar and resin, two primary elements, than those of any other country. It is necessary for every farmer to set out a few trees, and either raise his own cocoons or sell the leaves to others. By doing a little every year the country would in a short time work into an industry that would give profitable employment to thousands of men, women and children, and add immensely to our general wealth. He estimates that an average boy can thoroughly learn all the details of silk-growing in two seasons. If one member of each family should take the trouble to do this, he could take charge of a few worms and trees on his home place, and teach other members of the family, until in a very short time the whole household will be skilful sericulturists. This is the way it is done in Europe, and is the only way in which silk-growing and silk manufacturing can become an industry of the country. We understand that Mr. Larco will set up in Mayfield this fall a machine for reeling silk."

"Young persons should not only embrace the admonitions of the aged, but also imitate their virtues and shun their vices."

#### Mary Somerville and "Mecanique Celeste."

The "Personal Recollections" of Mrs. Somerville have doubtless revived the interest of the public in this remarkable woman. It is our purpose in the present article to trace the history of this lady in her mathematical studies, by which she qualified herself to read, understand, and explain the "Mecanique Celeste"—a work of extraordinary merit and unparalleled difficulty, the product of the greatest mathematical genius of the ages. This is the more important since Mrs. Somerville's great fame and subsequent success mainly rest on her successful accomplishment of this work.

Lord Brougham in the year 1827, in the very month in which La Place, the renowned author of the above mentioned work, died, requested Dr. Somerville to prevail on his wife to write an account of the celebrated work of the French mathematician for the "Society for Diffusing Useful Knowledge." In his letter he pays a high tribute to her rare ability in the following words: "In England there are not twenty people who know this great work, except by name, and not a hundred who know it even by name. My firm belief is that Mrs. Somerville could add two ciphers to each of these figures." This request and the flattering terms in which it was made, greatly surprised Mrs. Somerville, and led her to think that Lord Brougham had mistaken her abilities. She consented, however, and set about the task on certain conditions, which bespoke her great modesty. She remarks: "Thus suddenly and unexpectedly the whole character and course of my future life was changed." The result was the appearance in due time of her work entitled "Mechanism of the Heavens," which placed her in the front ranks of the scientific world. She was courted and feted on every hand. Everybody was enthusiastic over this wonderful achievement of woman's genius.

This work was commenced in the forty-seventh year of her age, amid the responsibilities of domestic life. It seems from her "Recollections" that she did not enter on the study of the higher mathematics, which was necessary to qualify her to feel her way through the intricate formulæ of Celestial Mechanics, till she was about thirty-three years of age. Earlier in life she had been perplexed to find out the meaning of the strange word "Algebra." "I saw strange looking lines mixed up with letters, chiefly x's and y's." Still later she was devouring Euclid with avidity, while probably the Freshmen of Oxford and Cambridge were engaged in the "burial service." She says: "I arose early, played on the piano, and painted during the time I could spare in the day-light hours, but I sat up very late reading Euclid." The servant told her mother, "It was no wonder the stock of candles was soon exhausted, for Miss Mary sat up reading till a very late hour." (What do the young ladies of the present generation read by gas light at a late hour?) Whereupon an order was given to take away her candle as soon as she was in bed. She had gone through the six books of Euclid at this time. She says:

"I was thrown on my memory, which I exercised by beginning at the first book, and demonstrating in my mind a certain number of problems every night, till I could nearly go through the whole." Her father became alarmed, and said to his wife, "Pog, we must

put a stop to this, or we shall have Mary in a strait-jacket one of these days." During her first married life she seems not to have accomplished much in her studies. At the commencement of her first widowhood, at the age of twenty-seven, she had studied plane and spherical trigonometry, conic sections, and Fergusson's Astronomy. She now resumed her studies with new vigor. She plunged into "Newton's Principia," but found it difficult. She returned to her task, or rather diversion, with great assiduity, wrote numerous notes and observations on the work. She had not, however, as yet found the key to the mysteries of La Place. The English mathematicians, out of regard for Newton still clung to the geometrical methods rather than adopt the analytical methods of Continental astronomers. The Calculus as a means of mathematical investigation of the problems of physical astronomy had proved its superiority. Soon after this, on the recommendation of Professor Wallace, of the University of Edinburgh, she secured among other works of higher mathematics, La Croix' "Algebra and Differential and Integral Calculus."

Having conquered these, she was prepared to wade through the interminable formulæ and leap the awful chasms found in "Mecanique Celeste." She engaged Professor Wallace's brother to read with her this work, but soon found that she understood the subject as well as he. This gave her confidence in her abilities and courage to persevere. She had advanced but little in this work before her marriage with Mr. Somerville put an end to scientific pursuits for a time.

In her second husband she found a companion who sympathized with her in her studies, though she was not free from interference from some of his relatives. One of her husband's sisters, younger than herself, wrote her an impertinent letter, saying "she hoped she would give up her foolish manne of life and studies, and make a respectable and useful wife to her brother." As might be expected, she resented such impertinence.

We know not how soon after her marriage she resumed her great work. We find her cultivating the fine arts, taking lessons in mineralogy and botany. She is mingling in the society of the greatest astronomers, J. Herschel and Caroline Herschel. She gives a remark of Veitch, who was somewhat annoyed by the various questions of his many visitors who were not skilled in science: "What should they do but ask silly questions, when they spend their lives in doing nothing but 'spatting muslin?'"

About five years after her marriage at the age of thirty-seven, she seems to have completed the reading of "Mecanique Celeste" Arago and Biot, distinguished French philosophers, were in London, and Mrs. Somerville was invited to meet them. They had been told of her turn for science, and that she had read the works of La Place. Biot expressed his surprise at her youth. Sometime after this she had the great pleasure, while on a visit to France, to make the acquaintance of the celebrated man whose genius she was prepared to appreciate after years of study of his works. Arago had told La Place also that Mrs. Somerville had read the "Mecanique Celeste." "So they had a great deal of conversation about astronomy."

We find her at this time in the midst of

brilliant constellation of French savans, among whom she seems to be a star of the first magnitude. Besides La Place, Biot, Lagrange, Bouvard, Poisson, and others make up the company. Such were the training, the hardships, the successes, which prepared Mrs. Somerville to accept of the invitation of Lord Brougham to write a work on Celestial Mechanics, which has given her a lasting fame, not only as a woman of extraordinary genius, but as an eminent scientist.

She was perfectly astonished at her success. Honors and commendatory letters poured in upon her from every quarter. The professors of astronomy at Cambridge set about making arrangements to introduce her book in the curriculum of the University. Among her many honors she esteemed none more highly than that of being elected honorary member of the "Royal Astronomical Society" at the same time as Caroline Herschel, herself a distinguished astronomer. And what is perhaps most remarkable of all, is the fact that she retained her wonderful mathematical powers after she had entered her nineties. It is refreshing to find in these days of scientific skepticism that Mrs. Somerville maintained a profound belief in the truths of religion. "Nothing has afforded me so convincing a proof of the unity of the Deity as these purely mental conceptions of numerical and mathematical science which have been by slow degrees vouchsafed to man, and are still granted in these latter times by the Differential Calculus, now superseded by the Higher Algebra, all of which must have existed in that sublimely omniscient Mind from eternity."—*The Christian Advocate*.

Selected.

Glory not in riches, though they increase upon thee; nor in thy friends, because they are powerful; but glory in God, who giveth thee riches, and friends, and all things; and, what is more than all, desireth to give thee himself. Be not vain of the gracefulness, strength, and beauty of thy body, which a little sickness can weaken and deform. Please not thyself with flattering reflections on the tenderness of thy natural wit, and the sweetness of thy natural disposition, lest thou displeasest God, who is the author of all the good that nature can dispense. Do not think thou art better than others, lest, in the sight of God, who only knoweth what is in man, thou be found worse. Be not proud of that in which thou art supposed to excel, however honored and esteemed by men; for the judgment of God and the judgment of men are infinitely different; and that displeaseth Him which is commonly pleasing to them. Whatever good thou art truly conscious of, think more highly of the good of others, that thou mayest preserve the humility of thy spirit; to place thyself lower than all mankind, can do thee no hurt; but much hurt may be done, by preferring thyself to a single individual. Perpetual peace dwelleth with the humble, but envy, indignation, and wrath, distract the heart of the proud.—*Thomas A' Kempis*.

"Our birthright in the Society of Friends, and the privileges which attach to it, may justly be compared to a precious inheritance purchased for us by the stripes and sufferings of our ancestors: it becomes us therefore, to set a proportionate value upon it, and permit nothing to rob us of so rich a treasure."

From "The National Baptist."

### The "Heathen Chinee" and the Jewel Consistency.

Sixteen thousand citizens of California have sent by their senator a petition to Congress, praying it to take such measures as will prevent Chinese immigration. Mr. Sargent, in presenting the petition enlarged upon the evils of paganism, and foretold the time when the government would find it necessary to act in relation to it.

It does not appear that he referred to the fact that Christian cannon blew open the gates of pagan China, and that these heathen hordes were let out by the same policy which let us in.

To them we were the barbarians, and our religion the unclean thing which threatened contamination and defilement.

We did not think it worth while to consult their prejudices, or to heed their laws. We were resolved on their conversion, and we sent in one missionary, with the military power of Great Britain and the United States at his back, to teach the natives the peaceable ways of righteousness.

We have found it a good thing to establish trading posts in the cities and sea-ports of China and Japan, and to make snug little fortunes from the products of John's land and labor. John has learned that it is a good thing for him to come to us to wash our shirts at \$1.50 per dozen, or to work upon our highways for a moderate compensation.

Well, we are a people zealous for the Lord, and a pure faith. We were not alarmed when our black heathen were imported direct from Africa, with their superstitions and their idolatries. We were even amused at the knowledge that they practiced somewhat secretly their ancient rites; but then, we trusted that might be the Lord's method of bringing about their salvation, and a heathen that is worth from \$1,000 to \$1,500 in open market, is not a bad piece of property. John keeps his money in his own pocket, and there always was and always will be a difference "Twixt tweedledum and tweedledee."

We have recently read a letter from a Chinese resident in the United States to a lady in our city, and, as the views of one who speaks from within may be of interest to those who look at the question from without, we have obtained permission to make an extract.

The writer says: "I am connected with the Chinese Government Educational Mission. After twenty years' persuading that government to establish such a mission, to send youths to this country to be instructed in the arts and sciences of the Western world, we at last succeeded, and this is the result of our effort—one hundred and twenty youths are to spend fifteen years in this country for the completion of their studies. One million and a half of money have been appropriated for this purpose. These boys are doing well in their studies. I expect to remain with them all these years, and superintend their education. Our students are not selected from any one city or province. Some are from Canton, some from Ningpo, and others from Shanghai. Government calls upon the gentry everywhere to send their sons. I think the Chinese government taking such an important step as this, is one of the greatest epochs in the history of China. Do think of a body of men all highly educated (as would be the natural consequence) in law, in engineering,

in military and naval tactics, in ship-building, in medicine, chemistry, and in other useful knowledge, to be the officers who shall exert an influence in that great empire. These will be the pioneers in Chinese civilization. After I see these young men, one by one, return to their native land, I can take up the language of old Simeon, and say: 'Now lettest thou thy servant depart, for mine eyes have seen thy salvation.' Besides, these youth will carry back with them pure Christian principle, as well as arts and sciences. Can any one doubt China's future destiny?" Of the writer's sons, one is soon to enter Harvard, and another the scientific school at Yale College.

When we get ready to drive out the industrious thousands from our Western coasts, what shall we do with the hundred and twenty who are distributed among our institutions of learning? And what will the "Brother of the Star" think of our Christian philanthropy?

A good man showeth favor and lendeth; he will guide his affairs with discretion. Surely he shall not be moved forever; the righteous shall be in everlasting remembrance. He shall not be afraid of evil tidings: his heart is fixed, trusting in the Lord.

## THE FRIEND.

SEVENTH MONTH 18, 1874.

In the editorial columns of our last issue, attention was drawn to the importance of keeping our hearts open to the influences of the Holy Spirit, and living always as in the Divine Presence. This was especially pressed on those who are absent from their usual homes, seeking relaxation and renewal of physical strength at the mountains, or sea shore, or other places of summer resort—not that such care is unnecessary to those who remain at their ordinary places of abode, but because there is greater temptation to travelers to relax in that watchful frame of spirit, which is the only safe dwelling place for the Christian. Since those remarks were written and printed, a sad occurrence has covered the minds of a large circle of relatives and friends with sorrowful and solemn feelings. We allude to the drowning at Atlantic City on the 10th inst., of five of our fellow beings, who were on a sailing excursion on the ocean. The high wind and heavy seas rendered the boat unmanagable as it was crossing, on its return to shore, a bar which projects far out from the land. The boat was overturned, and of eight persons in it, only three were rescued by the vessel sent out for that purpose. The others, after holding on for a time, were overpowered by the beating of the waves, and lost, before the arrival of assistance. Four of these were of one family—father, mother, son and daughter. The other was a young woman who had been invited to accompany them in the excursion.

A few minutes before this blow fell upon them, it is probable, not one of those who were lost felt themselves to be in any especial danger—at least such is the testimony in regard to herself of the only woman who was rescued. How forcibly should this solemn and striking event press home upon our hearts the injunctions of our Saviour, "In such an hour as ye think not, the Son of man cometh." "What

I say unto you, I say unto all, Watch." "Watch and pray." He who has yielded to the drawings of the Spirit of God, and given up his heart to love and serve his Redeemer, and is endeavoring in his daily walk to live under a sense of the Divine Presence, and so to act as may be well-pleasing in His sight, may go wherever duty calls him; in humble reliance upon Him whom the winds and the seas obey, and who will enable His dependent and faithful children to accomplish all that He designs they should perform. This reliance will not lead them rashly to incur needless danger, but will sustain their minds in every position into which they are rightly brought; for though they may feel that their lives are in peril, and that the work of their redemption from sin has not yet been effected, yet their trust is in Him who is all powerful, and who can preserve them in every danger, and accomplish His gracious designs for their everlasting good. Sincerely do we desire that such may be the lesson taught to many by this solemn occurrence; and that the bereaved relatives and friends of the deceased may be enabled to bow in true resignation to the Divine will, and thus come to feel the sustaining help of Him, who, when on earth, wept by the grave of Lazarus, and was touched with the feeling of our infirmities.

#### SUMMARY OF EVENTS.

**FOREIGN.**—By a late collision on the Lancashire and Yorkshire Railway, five persons were killed and several others injured.

The London Standard, reviewing the proposed reciprocity treaty between the United States and Canada, says, if adopted it will establish a separate North American Zollverein in regard to all essential articles of trade between the United States and the Dominion, excluding England from the Canadian markets like foreign and less favored nations. The Canadian frontier will be virtually obliterated, and the absorption of the British North American Provinces by the United States becomes only a question of time.

Heavy rains have fallen in England greatly benefiting the growing crops. A violent thunder storm passed over London on the 11th inst., causing some fatal accidents.

London, 7th mo. 13th.—U. S. bonds, 1867, 108½. The rate for money at the Stock Exchange on government securities is two per cent.

Liverpool.—Red western spring wheat, 10s. 2d. a 10s. 11d. per 100 lbs. Uplands cotton, 8½d.

Political excitement still runs high in France. An article in the *Figaro's* issue of the 11th inciting a revolt against the decisions of the Assembly, occasioned much irritation among the Deputies. There was a warm debate on the subject, during which it was announced that the *Figaro* had been suspended for two weeks. A member of the extreme Left moved that the writer of the objectionable article be called to the bar of the House, and accused the government of partiality in its punishment of offending journals. The motion was rejected after a speech by Gambetta, in which he intimated that the Assembly was a corpse fit for the grave digger.

The Left Centre anticipates a majority of fifteen for Cassimir Perrier's bill which proposes the organization of a definite Republic.

The Committee of Thirty have appointed sub-committees to draw up bills on the organization of the executive powers and the establishment of a Senate.

The *London Times'* special dispatch from Paris says, that the Right and Left Centres have agreed upon the order of the day declaring that the Assembly is determined to defend Marshal MacMahon's powers from every attack of their opponents.

The Cabinet still has a majority of fifty in the Assembly, but the Bonapartists and a portion of the Moderate Rights, who are able to turn the scale, are wavering. If the government is defeated a dissolution of the Assembly is inevitable.

Duva's demand for urgency on his motion for a dissolution of the Assembly after voting on the bills, received only 180 votes.

President MacMahon sent a message to the Assembly on the 9th inst., in which he says: "The country de-

mands the organization of public powers, and questions which were reserved must be settled; further delays will depress trade and hamper the prosperity of the country. I hope the Assembly will not fail to fulfil its obligations. I adjure it in the name of the highest interest in the country to deliberate without delay upon questions which must no longer remain in suspense.

"The Assembly and the government are jointly responsible. I am desirous of accomplishing all my duties, and my most imperative duty is to insure to the country definite institutions, security and calm."

Hostilities continue in the north of Spain, but the recent military operations have been mostly unimportant. It is evident that no progress has been made towards suppressing the Carlist insurrection.

A Constantinople dispatch says: The Sultan has written to the Khedive of Egypt in terms cordially confirming the good relations between the Porte and Egypt.

A Postal Congress is to be held in Switzerland in the 9th month, in which fifteen governments will be represented. The delegates from France and Denmark have already been appointed.

Statistics recently published concerning the ascent of Mont Blanc show that from the time of the first ascent by Balmat in 1786, 724 persons have reached the summit, but for some years after the earliest attempts by Balmat and De Saussure long intervals elapsed during which no one ventured upon the hazardous enterprise. There were no ascents between 1788 and 1802, and between 1802 and 1809. Since 1850, however, the summit has in no year been altogether unvisited.

The German Emperor is on a visit to Bavaria. He reached Munich the 13th inst., where he was received by the king and escorted to the royal palace.

On the 13th an attempt was made to assassinate Prince Bismarck as he was driving in the country near Kissingen, by a man named Kullman who belongs to Magdeburg. The ball aimed at Bismarck grazed his wrist, inflicting a slight wound. Kullman was quickly arrested.

**UNITED STATES.**—The interments in Philadelphia last week numbered 368, including 63 deaths from cholera infantum, and 156 children under one year old.

According to the Auditor General's report, the cost of building the fifteen Passenger Railways of Philada., was \$7,202,085; length of miles 214; cars 851; horses 5,066; passengers carried last year 73,771,995; expenses \$3,356,436; gross receipts \$4,622,331; nominal profits \$1,265,915, or more than 17 per cent. on the cost of the roads.

On the 10th inst., during a violent thunder storm, the lightning struck an oil tank at the Weehawken Oil Works, New Jersey, opposite Thirty-fourth street, New York. The effect was to set this tank and an adjoining one on fire, instantly causing both to explode with terrific force. The fire spread until all the tanks, numbering seventeen, were destroyed, with about three millions of gallons of petroleum. It is estimated that the loss will be about \$700,000, including damage to adjacent property.

The steamship *Grenada* arrived at San Francisco on the 10th inst., from Hong Kong and Yokohama, Japan, making the actual running time from Japan to San Francisco in seventeen days and nine hours, which is the shortest voyage yet made.

A terrible calamity has befallen the people in the northern part of Minnesota, the locusts having devoured every kind of crop and left the country in many places perfectly bare.

The Union Pacific Railroad Company has bored six artesian wells in the arid districts to obtain water supplies for their locomotives. All of them were successful, and from several the water rises above the surface. At Rock Springs the water rises from a depth of 1145 feet, twenty-six feet above the surface, and discharges 571 gallons per hour, and at the surface 916 gallons.

During the six months ending on the first inst., 1101 buildings were erected in St. Louis, at a cost of \$7,360,000.

Much damage has been caused in western Massachusetts by heavy rains on the 11th and 12th inst., which caused a rapid rise of the rivers, the destruction of bridges and buildings, and in two instances the breaking of large reservoirs in which water was stored for the use of manufactories. No lives were lost. The total loss is estimated between three hundred and four hundred thousand dollars.

**The Markets, &c.**—The following were the quotations on the 13th inst. *New York*.—American gold, 109½. U. S. sixes, 1881, registered, 115½; do. coupons, 117; do. 1868, 116 a 116½; do. 5 per cents, 112½. Superfine flour, \$4.90 a \$5.50; State extra, 5.80 a \$6.15; finer brands, \$6.50 a \$10.25. No. 1 Chicago spring wheat, \$1.39; No. 2 do., \$1.35 a \$1.37; No. 3 do., \$1.33;

White Ohio, \$1.45. Canada barley, \$1.95 a \$2. Oa 61 a 67 cts. Yellow corn, 80 a 83 cts.; western mixe 78 a 79 cts. *Philadelphia*.—Uplands and New Orleans cotton, 17½ a 18 cts. Superfine flour, \$3 50 a \$4; extra \$4 a \$4.50; finer brands, 5 a \$9.50. Amber wheat, \$1. a \$1.47; Penna. red wheat, \$1.40; No. 1 spring, \$1.2 Rye, \$1. Western mixed corn, 80 cts.; yellow, 81 82 cts. Oats, 65 a 69 cts. Lard, 11½ a 12 cts. Clove seed, 10 a 11 cts. The cattle market was dull. Sal of 3500 beef cattle at prices ranging from 3¼ cts. per lb gross to 7¼ cts. About 8000 sheep sold at 4½ a 5¼ ct per lb. gross, and 4500 hogs at \$9.37½ a \$9.75 per 10 lbs. net. *Chicago*.—No. 2 spring wheat, \$1.16; No. do., \$1.08 a \$1.10. Corn, 61¾ cts. No. 2 oats, 48 ct Rye, 86 a 88 cts. *Baltimore*.—Choice white whea \$1.45 a \$1.50; fair to prime red, \$1.35 a \$1.43; Penn old, \$1.45 a \$1.52. Yellow corn, 82 a 83 cts.; whi 93 a 95 cts.

#### SHELTER FOR COLORED ORPHANS.

Wanted, by the 1st of 10th mo. next, a suitable Friend for Matron for the above institution.

Application may be made to

Hannah R. Newbold, 641 Franklin St.  
Mary Wood, 524 South Second St.  
Mary Randolph, 247 North Twelfth St.  
Anna W. Lippincott, 460 North Seventh St.

#### WANTED.

An unmarried Friend to take the position of Govern at Westtown Boarding School, on or before the close of the present session, in the 10th month next.

Apply to

Clarkson Sheppard, Greenwich, New Jersey,  
Joseph Walton, Moorestown, "  
Charles Evans, 702 Race street, Philadelphia.

#### WANTED

A young man of energy and perseverance, to take charge and oversight of the farm belonging to the Wyandott Mission, situated near Seneca, in the State of Missouri; also a woman well qualified to fill the place of Matron in the Boarding School. Friend would be preferred. For further information apply to John S. Stokes, Office of "The Friend," Fourth above Arch street.

#### HAVERFORD COLLEGE.

The next Term will commence on Fourth-day, 9th mo. 2nd, 1874. Applications for admissions should be addressed to SAMUEL J. GUMMERE, *President*, Haverford College, Montgomery Co., Pa.

#### WANTED,

A woman Friend, competent for Principal of the Aimwell School. Apply to

Sarah E. Smith, No. 1110 Pine St.  
Rebecca W. Fry, 908 North Fifth St.  
Rachel S. Maris, 127 South Fifth St.  
Mary D. Allen, 833 North Seventh St.

**MARRIED**, on the 9th of 4th mo. 1874, at Friends Meeting-house, Germantown, BENJAMIN C. SATTER THWAITE, of Bucks County, Pa., and ELIZABETH C. FRENCH, of Philadelphia.

**DIED**, Sixth month 15th, 1874, LUKE W. MORRIS, aged 16 years, son of Samuel and Lydia S. Morris of Olney, Philadelphia. This dear youth had attached himself to a large circle of friends by the integrity of his character, his consideration for the comfort of others and a genial disposition. Yet while mourning his early removal from a life which gave promise of virtue and usefulness, they "sorrow not as those who have no hope;" for during the protracted sickness which I pleased Infinite Wisdom to dispense, the touching patience with which he bore his sufferings, his resignation to the Divine will, together with his prayers for Heavenly help, and his remarks as made from time to time, have afforded a grateful evidence that the work of purification was steadily going on within. Thus we reverently believe that, through the redeeming mercy of that Saviour whom, to use his own expression, "he often felt to be very near him," he has obtained a blessed "inheritance among all them that are sanctified."

WILLIAM H. PILE, PRINTER.

No. 422 Walnut Street.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, SEVENTH MONTH 25, 1874.

NO. 49.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,  
PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

For "The Friend."

## The Little Land of Appenzell.

(Continued from page 378.)

In Glarus and Unterwalden, where the population is smaller, the right of discussions is still retained by these assemblies, but in Appenzell it has been found expedient to abolish it. Any change in the law, however, is first discussed in public meetings in the several communities, then put into form by the Council, published, read from all the pulpits for a month previous to the coming together of the *Landsgemeinde*, and then voted upon. But if the Council refuses to act upon the suggestion of any citizen, and he honestly considers the matter one of importance, he is allowed to propose it directly to the people, provided he do so briefly and in an orderly manner. The Council, which may be called the executive power, consists of the governing Landamman and six associates, one of whom has the functions of the treasurer, another of military commander,—in fact a ministry on a small scale. The service of the persons elected to the Council is obligatory, and they receive no salaries. There is, it is true, a secondary Council, composed of the first, and representatives of the communities, one for every thousand inhabitants, in order to administer more intelligently the various departments of education, religion, justice, roads, the military system, the poor, &c.; but the Assembly of the People can at any time reject or reverse its action. All citizens are not only equal before the law, but are assured liberty of conscience, of speech, and of labor. The right of support only belongs to those who are born citizens of the Canton. The old restriction to this class of the claim to be supported at the expense of the community in case of need, prevails all over Switzerland. In Appenzell a stranger can only acquire the right, which is really the right of citizenship, by paying twelve hundred francs into the cantonal treasury.

The governing Landamman is elected for two years, but the other members of the Council may be re-elected from year to year, as often as the people see fit. The obligation to serve, therefore, may sometimes seriously incommode the person chosen; he cannot resign, and his only chance of escape lies in

leaving the Canton temporarily, and publishing his intention of quitting it altogether in case the people refuse to release him from office. This year it happened that two members of the Council had already taken this step, while three others had appealed to the people not to reelect them. The Assembly of the People was now to decide upon all these applications, and therefore promised to be of more than usual interest. The people had had time to consider the matter, and it was supposed had generally made up their minds; yet I found no one willing to give me a hint of their action in advance.

The two remaining members presently made their appearance, accompanied by the Chancellor to whom I was recommended. The latter kindly offered to accompany me to the parsonage, the windows of which, directly in the rear of the platform, would enable me to hear as well as see the proceedings. The clergyman, who was preparing for the service which precedes the opening, showed me the nail upon which hung the key of his study, and gave me liberty to take possession at any time. The clock now struck nine, and a solemn peal of bells announced the time of service. A little procession formed in front of the inn, first the music, then the clergyman and the few members of the government bare-headed and followed by the two apparitors, who wore long mantles, the right half white, and the left half black. The old pikemen walked on either side. The people uncovered as the dignitaries took their way around to the chancel door; then as many as could be accommodated entered at the front.

I entered with them taking my place on the men's side,—the sexes being divided, as is usual in Germany. After the hymn and the prayer, the clergyman took a text from Corinthians, and proceeded to preach a good sound political sermon. I noticed with surprise that most of the men put on their hats at the close of the prayer. Only once did they remove them afterwards—when the clergyman, after describing the duties before them, and the evils and difficulties which beset every good work, suddenly said, "Let us pray to God to help and direct us!" and interpolated a short prayer in the midst of his sermon. The effect was all the more impressive, because, though so unexpected, it was entirely simple and natural. \* \* \*

When the service was over, I could scarcely make my way through the throng which had meanwhile collected. The sun had come out hot above the Hundroyl Alp, and turned the sides of the valley into slopes of dazzling sheen. Already every table in the inns was filled, every window crowded with heads, the square a dark mass of voters of all ages and classes, lawyers and clergymen being packed together with grooms and brown Alpine herdsmen; and after the government had been solemnly escorted to its private chamber, four musicians in antique costume announced with

drum and fife, the speedy opening of the Assembly.

I took my place in the pastor's study, and inspected the crowd. On the steep slope of the village square and the rising field beyond, more than ten thousand men were gathered, packed as closely as they could stand. The law requires them to appear armed and "respectably dressed." The short swords, very much like our marine cutlasses, which they carried, were intended for show rather than service. Very few wore them; sometimes they were tied up with umbrellas, but generally carried loose in the hand or under the arm. The rich manufacturers of Trogen and Herisau and Tenfen, had belts and silver-mounted dress swords. With scarce an exception, every man was habited in black, and wore a stove-pipe hat, but the latter was in most cases brown and battered. Both circumstances were thus explained to me: as the people vote with the uplifted hand, the hat must be of a dark color as a back-ground to bring out the hands more distinctly; then since rain would spoil a good hat (and it rains much at this season), they generally take an old one. I could now understand the advertisements of "second hand cylinder hats for sale," which I had noticed the day before in newspapers of the Canton. The slope of the hill was such that the hats of the lower ranks concealed the faces of those immediately behind, and the assembly was the darkest and densest I ever beheld.

With solemn music, and attended by the apparitors in their two colored mantles, and the ancient pikemen, the few officials ascended the platform. The chief of the two Landamman present took his station in front, between the two-handed swords, and began to address the assembly. Suddenly a dark cloud seemed to roll away from the faces of the people; commencing in front of the platform, and spreading rapidly to the edges of the compact throng, the hats disappeared, and the ten thousand faces in the full light of the sun, blended into a ruddy mass. But no; each head retained its separate character, and the most surprising circumstance of the scene was the distinctness with each human being held fast to his individuality in the multitude. Nature has drawn no object with so firm a hand, nor painted it with such tenacious clearness of color, as the face of man. The inverted crescent of sharp light had a different curve on each individual brow before me; the little illuminated dot on the end of the nose under it, hinted at the form of the nostrils in shadow. As the hats had before concealed the faces, so now each face was relieved against the breast of the man beyond, and in front of me were thousands of heads to be seen, touching each other like so many ovals drawn on a dark plane.

The address was neither so brief nor so practical as it might have been. Earnest, well meant, and apparently well received,

there was nevertheless much in it which the plain half educated men in the assembly could not possibly have comprehended; as, for instance, "May a garland of confidence be twined around your deliberations!" At the close the speaker said, "Let us pray!" and for a few moments there were bowed heads and utter silence. The first business was the financial report for the year, which had been printed and distributed among the people weeks before. They were now asked whether they would appoint a commission to test its accuracy, but they unanimously declined to do so. The question was put by one of the apparitors, who first removed his cocked hat, and cried in a tremendous voice, "Faithful and beloved fellow-citizens, and brethren of the Union!"

(To be concluded.)

Selected.

"We will not hide them from their children, showing to the generation to come the praises of the Lord, and his strength and his wonderful works that He hath done."

As an individual I confess that I have derived much instruction, comfort and strength, from the living memorials left us by many Christian brethren and sisters now removed from works to rewards; not only from their Journals and from Memoirs of them, but even from testimonies of Monthly Meetings. But especially I have to notice, that the expressions of those who have arrived near the confines of the invisible world, have sunk deep in my remembrance; nor do I know any other instrumental means, that have proved to me so searching, softening, effectual and abiding as that last mentioned description of memorial. I believe that the profitable impressions which are made, particularly on the minds of well disposed children and young persons, remain with them for the most part, through life; so that many amongst us, now grown up, can testify, that incidents and sayings, which in childhood they had heard or read, of truly excellent characters, do even at this day continue to have a beneficial effect on their minds; and even in cases where young people have wandered far from the line of duty, these things not unfrequently arise in their remembrance. I speak from some degree of experience, however small it may be, compared with that of some others; for I have been a wanderer in my time, yet can testify that even when most widely separated by wickedness, from the Author of all good, the recurrence of the wisdom of the wise and of the sayings of the dying, to my thoughtless heart, has not been either infrequent or unseasonable. But the advantages which my soul has received in recent times, are still more decided. Many may think themselves unfit to tell of the Lord's goodness to them in their early youth, as well as under trials and troubles and great variety of circumstances, even to their old age; but such humble-hearted ones are the very persons who are perhaps most fit, or most called upon, to make mention in some form or other, of the providences and mercies and many deliverances which they have met with. Often when I hear of the death of eminent servants of the Lord, I long that their wisdom and the weight of their long experience may not die with them, but that some memorial may have been left by them, for the instruction of those who are still travelling on their wearisome way.—  
*John Barclay.*

For "The Friend."

### The Heart of Africa, by Dr. Schweinfurth.

(Concluded from page 373.)

With some further extracts referring to the same trade, as observed by our author, we will dismiss this valuable and interesting book. He says:

"The sheikh Seebehr complained bitterly of the great rush of Gellahbas to his establishment, and told me that his corn was so nearly exhausted that his land was threatened with famine. From his own mouth I learnt that during the winter two large caravans had come through Shekka, and had brought into the country the enormous quantity of 2000 of these petty adventurers; by the middle of January the number was still larger, and at the beginning of February was swollen again by 600 or 700 more.

All these traders break their journeys across the steppes of the Baggara by making a lengthened stay at Shekka, for the purpose of purchasing oxen both for riding and for carrying burdens; here also it is their practice to lay in a stock of butter for bartering in the Seribas, where it is in great demand. The goods that they bring into the Seriba districts are principally calico, 'trumba,' a coarse material woven in Sennaar, and English cotton of two sorts, 'amerikani and damoor'; they also make a market of a number of firearms, mostly ordinary double-barrelled guns, of Belgian manufacture, worth from ten to twenty dollars apiece; in addition to these they frequently carry on a brisk trade in all kinds of knick-knacks—pipes, looking glasses, Turkish slippers, red fezzes, and carpets.

Every Gellahba, according to his means, takes into his service a number of the Baggara, to whom he entrusts the training and management of his cattle. Camels invariably succumb to the climate in a very short time, and are consequently but rarely used as a means of transport. All the traders ride asses, and it may safely be asserted that they pass the greater part of their lives on the backs of these animals; in fact, a petty pedlar of the Soudan without his donkey would be a sight almost as remarkable as a Samoyede without his reindeer. Besides its rider the donkey will carry not much less than ten pieces of cotton; if it survives the journey it is exchanged in the Seribas for a slave, or perhaps for two; its load of goods will bring in three more, and thus, under favorable circumstances, a speculative vagrant, who has started with nothing beyond his donkey and five pounds' worth of goods, will find himself in possession of at least four slaves, which may be disposed of in Khartoom for 250 dollars (50*l.*) The return journey is always made on foot, and the unfortunate slaves have to carry all the articles necessary for travelling.

But quite apart from these pettifogging traders, whose innate propensity for trafficking in human beings can only be compared to the ineradicable love of usury that characterises the itinerant Polish Jews, there are numbers of more important investors, who, protected by a large retinue of armed slaves and accompanied by long trains of loaded oxen and asses, carry on a business which brings many hundreds of their fellow-creatures into the market. These more wholesale dealers have their partners or agents permanently settled in regular establishments in the large Seribas. More frequently than not these agents are priests, or Fakis as they are called,

though strictly the term Faki belongs only to those whose profession it is to explain the Scriptures; it is, however, an indisputable fact that the slave-trade is included amongst the secondary occupations of this class, and, as matter of fact, they are all more or less soiled with the defilements of this scandalous business. In the larger towns, and especially in Khartoom, there is every opportunity for observing their doings, and things often come to light which, except they were actually witnessed, would seem perfectly incredible. Never did I see slaves so mercilessly treated as by these fanatics, and yet they would confer upon the poor souls, whom they had purchased like stolen goods, for a mere bagatelle, the most religious of names, such as 'Allagabo' (*i. e.* given by God.)

The history of Islamism has ever been a history of crime, and to Christian morality alone do we owe all the social good that we enjoy.

It must not, however, be supposed that the minor retail trade in slaves is uniformly lucrative. The smaller Gellahbas are exposed to numberless mischances; if their ox or ass should die upon the journey, they must at once dispose of their other property at any price; then, again, they are liable to suffer from a lack of corn during their journey across the wilderness; and, what is perhaps the sorest disaster that can befall them, their slaves so frequently run away, that their profits are dispersed before they are realised. Their powers of endurance are truly wonderful. I repeatedly asked them what induced them to leave their homes, to change their mode of living, and to suffer the greatest hardships in a strange land, all for the sake of pursuing an occupation that only in the rarest cases would keep them from absolute want. 'We want "groosh"' (piastres), they would reply; 'so why should we live at home?' And when I further urged that they had far better lead respectable lives, and either grow corn or breed cattle, they answered, 'No, that wouldn't answer our purpose; when we are at home, we are exhausted by the demands of the Government, and corn doesn't bring us in any money.' Not that the Government is really so hard upon the people as they assert; the fact is that they are incorrigibly lazy, and have so great a dislike to work of any sort that they do not care to be able to pay their taxes, which do not much exceed those that are usually demanded in Egypt proper. To expect that these slave-traders should renounce of their own accord the business which suits them so completely, and for which they will endure any amount of hardship, would be almost as unreasonable as to expect Esquimaux to grow melons.

All trade is undeniably in a very stagnant condition in the Egyptian Soudan; the rich man gives nothing away, but lives like a dog, and has no desire beyond that of privately amassing wealth; of domestic comfort, or luxury even on the limited Oriental scale, he has not the faintest conception. There is consequently no demand for labor, no circulation of money in wages, and it is manifestly impossible for trade to flourish as long as the rich man consumes nothing; and equally impossible for the poor man to thrive while the rich man keeps his retinue of slaves, who do all he wants without requiring payment. Thus slavery itself ever reproduces slavery.

One material alleviation to the position of

the Gellahbas is the open hospitality they meet with in all the Seribas. Besides the mercenaries of the various ivory companies—the controllers, clerks, agents, storekeepers, and other officials—they find numbers of their compatriots and brethren in the faith who have taken up their abode in these lands, and who subsist free of expense on what is gained by the sweat of the negroes; mere idle drones, as it were, living on the produce of the workers. The rabble thus collected consists partly of escaped convicts and partly of refugees or outlaws who are evading their proper punishment, and if they could be swept from off the face of the land, there would then be food enough for half a score of regiments, should the Egyptian Government determine to station them in the country.

Just in the same way as in the Egyptian Soudan, the actual cost of travelling in these lands is next to nothing; every new comer to a Scriba is treated to kissere and melah, and his slaves and donkey are provided with corn enough to keep them from starvation. Whenever they go the Gellahbas may stay as long as they please, and accordingly they wander all over the district from the west to the east, as far as the Rohl and the Dyemit, and only just before the commencement of the rainy season they re-assemble at their common place of rendezvous in Seebehr's Seriba, where they re-organize their caravans, and make their final preparations for starting for Kordofan.

The worst feature in the case is the depopulation of Africa. I have myself seen whole tracts of country in Dar Fertet turned into barren, uninhabited wildernesses, simply because all the young girls have been carried out of the country. Turks and Arabs will urge that they are only drawing off useless blood, that if these people are allowed to increase and multiply, they will only turn round and kill one another. But the truth is far otherwise. The time has come when the vast continent of Africa can no longer be dispensed with; it must take its share in the commerce of the world, and this cannot be effected until slavery is abolished. Sooner than the natives should be exterminated, I would see all Turks, Arabs, or whatever else these apathetic nations may be called, vanish from the face of the earth; they are only occupying the place of their betters; and negroes, if they only work, are their betters.

I travelled in the Nile countries from 1863 to 1866, and again from 1868 to 1871; on my first journey I visited all the great markets of the slave trade, Cairo, Siout, Djiddah, Suakin, Matamma in Gallabat, Khartoom, and Berber; in my second I reached its sources in the lands to the south of Darfoor and Kordofan. Throughout my wanderings I was ever puzzling out schemes for setting bounds to this inhuman traffic. The traveller in these lands is kept in one perpetual state of irritation by what he sees; on every road he meets long troops of slaves; on the sea and round the coasts he comes in contact with Arab boats crammed full of the same miserable creatures.

Whilst exploring the coasts of Nubia and Egypt in 1864 and 1865, I spent eight months on the Red Sea. The slave-trade there was then in a flourishing condition, but the accounts of what I saw attracted no more attention than the complaints made by my predecessors. The consuls in Djiddah and other ports on the Red Sea were afraid to take any measures that were not sanctioned by Euro-

pean policy, and consequently Arabs were allowed to carry on that which amongst Spaniards and Portuguese would have been considered piracy. Not a man-of-war was to be seen cruising on the water, and yet one single gunboat would have sufficed to keep a check upon the intercourse between the opposite coasts, and to make the slave-trade an impossibility. A change has now been effected, and all the Powers that are interested in the matter have done their utmost to remedy the evil; but even on the Red Sea there still remains much to be done, and even now there are far too many secret landing-places and loopholes which escape the vigilance of the authorities.

Many a time, under the consciousness that alone I was utterly powerless as a vindicator of humanity, I have restrained myself from the temptation to rescue slaves with my own hands. Once, between Khartoom and Berber, a lot of slaves was being brought from Kordofan, and I cut in two the leather thongs that bound them to their sheyba; but an ugly squabble was all that resulted from my interference. At other times I have vehemently remonstrated with the slave-dealers, when I have been a witness of any cruelty in their treatment of their property; but all to no purpose. It may therefore be imagined that a traveller in his fury and disgust will be led to devise all manner of schemes for eradicating the system.

The dark cloud of barbarism still lowers over the innermost regions of Africa, and Egypt, the oldest and richest land of the historical world, has its mission to perform. A great revolution has already begun, and although at present it affects only the surface, there is scarcely any reason to doubt that progress, alike spiritual and humane, will ultimately claim the victory. But the task is gigantic, and no one can be more sensible of this than the traveller who has lingered at any of the sources of the slave-trade. One point there is in which all are unanimous—that from Islamism no help can be expected, and that with Islamism no compact can be made. The second Sura of the Koran begins with the prescription: 'To open the way of God, slay all those who would slay you; but be not yourselves the first to commence hostilities, for God loves not sinners; slay them wherever you meet them; drive them away from the spot from which they would drive you, for temptation is worse than a death-blow.' Islamism, the child of the deserts, has everywhere spread desolation, and wherever it has penetrated, deserts have arisen bleak and bare as the rocks of Nubia and Arabia, and under its influence every nation from Morocco to the Isles of Sunda has congealed into a homogeneous mass; inexorably it brings all to one level, remorselessly obliterating all traces of nationality or race."

Selected for "The Friend."

#### Thomas Rutter.

This Friend, who was an inhabitant of Bristol, England, departed this life in a lively hope of the mercy of Christ, the 2nd of the Ninth month, 1803, aged 59 years. He had been a minister from his youth, having first come forth in obedience to what he regarded as a requiring of the Lord for that service when he was about eighteen years of age. Previously to this, in his quite early days, he had fallen into the paths of vice and folly, and

a contempt of serious things and serious persons. In compliance with his father's wishes, he however continued to attend religious meetings, in one of which his attention was caught by a preacher, whose subject was the passage from 1 Pet. iv. 18: "If the righteous scarcely be saved, where shall the ungodly and the sinner appear." He was immediately filled with awe, and with a light which discovered to him clearly his sinful condition; and he was broken into many tears. He soon after attempted to shake off these impressions; but in vain; he sunk under the contest and then was tempted to despair. He confessed however in his mind, that he had been divinely visited; and being sensible that nothing short of the arm of Omnipotence could save him from being lost, he sought it earnestly with humble supplication. He read the Scriptures, often sought retirement, and was very diligent in public worship; but his soul was long detained in a mournful state.

At length his mind was gradually enlarged; the ministry of two Friends was useful to him and he made them a visit, supposing that they would feel for his state, and would comfort and instruct him, but being disappointed he was led to cry, "Lord, if thou help me not I perish; for vain is the help of man." When after this gradual preparation, it pleased Infinite Kindness to afford him a sense of favor, the current of love was so strong, that he knew not how to forbear calling on every creature to join him in the song of praise. For a time he felt no evil, had an almost continual sense of the Lord's presence, and hastily concluded that the work of regeneration was complete. But temptations again beset him, and he soon felt the further necessity of daily watchfulness and prayer. Religion appeared to be a very deep work, but he was supported in the path of patience by some portion of comfort, and by the secret presence of the Almighty.

It was not long after he was brought into this watchful state, that he felt his mind strongly impressed to speak by way of exhortation to others. From this service he was very averse; and endeavored, with contrition and tears to examine his call, and, like Gideon, to try the fleece. The more he examined, the more the evidence was confirmed, till after various baptisms, he gave up to obey, should further requirements be manifested. This was not, however speedily the case. He underwent a further trial of apparent desertion, which he humbly received as a chastisement for his delay; but at length more full resignation brought peace, and he found an engagement to come forth with these words:—"Christ's sheep hear his voice. Let us wait to hear the voice of Christ." After this also he sunk very low in his mind, but was gradually enlarged, and soon became a zealous, reaching and acceptable minister. In the exercise of his gift he travelled in most parts of England and Wales, where there are Friends, and was twice in Ireland.

During his last illness which was painful, and borne with Christian fortitude, he uttered many expressions, showing his faith and his resignation; and he bemoaned the situation of such as defer to the time of sickness, the important concerns of their soul's well-being. "The pains of the body," said he, "are enough to struggle with." Speaking of himself, he said, "I have nothing to glory in but my infirmities. I have known something of that

law of grace, whereby boasting is excluded. No merit in me: All of grace! All of the pardon and favor which are in Christ. Oh! that I had the tongue of an archangel, to sound forth this glorious truth, that it is 'not by works of righteousness, which we have done; but according to his mercy he saved us, by the washing of regeneration, and renewing of the Holy Ghost.'

He frequently said, "I never was more deeply sensible of my own unworthiness; and that all is of merey, mere merey!" A little before his departure he signified his assurance of an admittance into the kingdom of eternal rest; and at his close was mercifully favored with an easy release from the pains of mortality.

*The Perforating Power of Roots.*—It is indeed wonderful how easily the roots of plants and trees bore through hard, impacted soils in search of nourishment. They use for this purpose a sort of awl, of immense power, situated at the end of the root, and capable, with the aid of the other root machinery, of thrusting aside heavy weights and getting through almost any obstruction. Yet the awl consists only of a mass of microscopic absorbent cells formed by protoplasm or vegetable mucus—the fluid in which vital action is first set up. The roots of the elm and the maple will bore through the hardest soil of walks or streets, enter drains, twine about waper pipes, and penetrate through the seams of stone and brick structures. The roots of some plants have been known to pass through eighteen inches of solid brick-work, and make their appearance in a wine-cellar below. Plants have a vast power in overcoming obstacles, when foraging for food. They are like a hungry animal which no fences can restrain when there is food beyond. The movements of roots in soils proceed on certain principles of utility in connection with the welfare of the plant. Some need much more moisture than others, and the roots will drive through rocks to obtain it; others need silicious food, and will penetrate through a clay bank to reach the desired foraging ground. The urgency with which nature drives plants and animals in pursuit of food is almost irresistible.—*Journal of Chemistry.*

Shall not *we* who are parents, endeavor to see in the light which deceiveth not, how it is in our own families, as well as in the church? And is it not for us to labor with our dear children, to bring them to a just sense of the necessity of taking up their daily cross, if they would have a crown of everlasting righteousness and joy; and if indeed they would be owned by the Saviour upon earth, as his people? I often fear lest I should not say, in the loud language of example, "Follow ye me, as I follow Christ;" yet it is my earnest desire to bear about in this body the dying of the Lord Jesus, that his blessed life may also be made manifest in my mortal flesh. Nothing will do after all our speculations, but a dying to self and living that life, of which an eminent christian speaks, "I live; yet not I, but Christ liveth in me." If *we* are without this knowledge of the great work of regeneration, it will nevertheless manifest itself through *others*; for the true church must take the place of the false, and all that appertains to "Mystery Babylon" must fall, as certainly as God

is true, righteous, and just. My heart feels interested in those I have long loved, that they may be found walking worthy of the high vocation wherewith we are called.—*S. L. Grubb.*

## WATCHING.\*

BY CELIA THAXTER.

In childhood's season fair,  
On many a balmy, moonless summer night  
While wheeled the light-house arms of dark and bright  
Far through the humid air.

How patient have I been,  
Sitting alone, a happy little maid,  
Waiting to see, careless and unafraid,  
My father's boat come in.

Close to the water's edge,  
Holding a tiny spark, that he might steer  
(So dangerous the landing far and near)  
Safe past the ragged ledge.

I had no fears—not one;  
The wild, wide waste of water leagues around  
Washed ceaselessly; there was no human sound  
And I was all alone.

But Nature was so kind!  
Like a dear friend I loved the loneliness;  
My heart rose glad as at some sweet caress  
When passed the wandering wind.

Yet it was joy to hear  
From out the darkness, sounds grow clear at last,  
Of rattling row-lock, and of creaking mast,  
And voices drawing near!

"Is't thou, dear father? Say!"  
What well known shout resounded in reply,  
As loomed the tall sail smitten suddenly  
With the great light-house ray!

I will be patient now,  
Dear Heavenly Father, waiting here for Thee  
I know the darkness holds Thee, shall I be  
Afraid, when it is Thou?

On Thy eternal shore  
In pauses, when life's tide is at its prime  
I hear the everlasting rote of Time  
Beating forevermore.

Shall I not then rejoice?  
Oh never lost or sad should child of thine  
Sit waiting, fearing lest there come no sign,  
No whisper of thy voice.

## WORDS.

The cruel and the bitter word  
That wounded as it fell,  
The chilling want of sympathy,  
We feel, but never tell.  
The hard repulse that chills the heart,  
Whose hopes were bounding high,  
In an unfading record kept,—  
These things shall never die.

Let nothing pass; for every hand  
Must find some work to do;  
Lose not a chance to waken love;  
Be firm and just and true.  
So shall a light that cannot fade  
Beam on thee from on high,  
And angel voices say to thee,  
"These things shall never die!"

*All the Year Round.*

\* The light-house referred to stands upon White Island, one of a group constituting the Isles of Shoals, lying in the Atlantic, about ten miles east of Portsmouth, New Hampshire, where years ago, before the building of this house, many vessels were lost. Celia Thaxter dwelt here when a child with her father, mother, and two brothers; and her fondness for nature in the vast and the minute, appears to have been great as we learn from her own account of her childhood, spent upon this and neighboring islands. She speaks of frequently waiting alone on the rocks with a lantern in her hand for her father's boat. The bright rays from the tower above her, reaching far into the ocean, seeming to make the darkness below greater.

## Recreations of the Brain-Workers.

Those who toil hard with brain and pen are those who especially need, not minutes, but hours of agreeable recreation. Change of employment is not always sufficient for this purpose. You need, as the country parson says, in substance, sometimes to sit on a fence and look down and see how green the grass is, and look up and observe how blue the sky is. Let the mind lie as perfectly at rest as it is in your power to do. But most brain-workers need besides some active physical exercise to restore the exhausted powers.

A great translator, after his eight hours of study, would busy himself in the cultivation of trees. Dr. Samuel Clarke used to amuse himself by jumping over chairs and tables—a very vigorous style of gymnastics, and one that might have made common lookers-on a little suspicious of the good man's sanity, but it served his purpose well.

Dean Swift took a rather milder form of a similar exercise. He would run up and down the steps of his deanery, even when almost broken down with age and infirmity.

A learned father, who was engaged in most profound studies for many hours each day, made it a rule to rise methodically at the end of every second hour and twirl his chair for five minutes. What amusement he got out of that it would be hard to see; but tastes and fancies are as varied as the people who indulge them.

The poet Shelly had a passion for making little boats of twisted paper, and sending them afloat upon the water. His pockets were rifled of all their contents to furnish materials for the sport. The correspondence of his friends was his main stock. Then came the fly leaves of the books which he made companions of his rambles; but learning was too sacred for him to encroach upon the printed pages. Once, it is said, he found himself on the banks of a river without a scrap of paper except a fifty-pound bank note. He hesitated long, but finally twisted it up with the greatest care, and set it afloat, watching anxiously on the opposite shore for it to touch the bank, which it did at last, to his extreme satisfaction. He had a double excitement and consequent enjoyment in that day's sport. But it was a lottery in which he would not like often to take chances.

Many good and great men have enjoyed an hour of hearty recreation with their children after hours of severe study, and have found it very conducive to their own and the children's well-being.

Cowper, in his hours of leisure, took great delight in the care and training of his pet hares.

A celebrated painter kept a colony of cats for his diversion, and took his meals in company with them. He seldom worked without his favorite, Minnette, sitting by his side, or snuggled down in the back of his neck.

A great book-worm, and a man of the most remarkable memory, would never allow a spider's web in his room to be touched, and his couch was heavily tapestried by these industrious weavers, whose habits he watched with the deepest interest and friendliness. His visitors were not always as considerate, and his first charge to them usually was, "not to hurt his spiders." As out of taste as we might regard such a fancy, it was better than the recreation of Spinoza, who used to train spiders to fight with each other. So interested

lid he grow in these contests, that he was often heard to break out into immoderate fits of laughter, as one or another gained an advantage over its adversary.

In the matter of recreation, as in everything else, good common sense is an excellent guide. As a general thing, physical exercise of a moderate character is the best restorer of the system's equilibrium after severe mental toil. A good brisk walk with a pleasant companion is perhaps the best of all. Wholesome, nourishing food, taken in very moderate quantities, is also a vital point with them who would recruit the exhausted brain-power. To do its work the food should be appetizing. Because some great man studied and wrote well on oat-meal porridge, it is no sign that you can do the same. A fine bit of broiled steak, with a round of nice toast and a cup of coffee, are much more likely to do the business for you. But if you add on to the toast and beef because it pleases the palate, you will probably find your mind effectually clouded and benumbed for that day. Each one should study his own system and observe what habits of body and mind are most useful in his own case, and then strictly adhere to them. Every one should make the most of the powers which God has given him, and not consider anything a trifle that will help to develop those powers in the highest degree.—*Southern Observer.*

For "The Friend."

### The Lost Child.

As I passed along the streets of our city today, I was startled by the sudden out-cry of a little child. The tones indicated that the heart was filled with terror. Instinctively turning to see who it was, and what was the cause of its alarm, I found that its older caretaker had turned the corner of a street, so as to be out of sight of the infant; and the sense of desertion and the feeling of being without a protector, had nigh overpowered the feelings of the little one, and brought forth the passionate cry which was at once the expression of its fright, and the appeal for relief.

How vividly does the course of this little one recall our own spiritual steps. Like it we are sent out into the world with a Guide and Companion ever near to help and direct us. That Holy Spirit, which our Saviour promised to send to his disciples, and which should lead them into all truth, is indeed as Wm. Penn expresses, "God's gift for man's salvation." It raises the warning voice when we are in danger of being led astray by any temptation, exciting a feeling of uneasiness in the mind, which, if heeded, would preserve us from evil. The more watchfully we observe its monitions, and the more faithfully we heed them, the more fully will our lives be under its influence, and the more safely will we move through the varied snares and dangers that may await us. But it too often happens, that like a child following its care-taker, we are diverted by some of the pleasing things that life presents; our eye is withdrawn from our Leader; the gentle warnings given us are unheeded amid the loud calls of the world that surrounds us; we stop in our onward path to partake in the amusements and excitements that abound; until we seem entirely to have lost sight of our Heavenly Guide, and our thoughts are absorbed in our temporal matters, and we come to live almost as if there was nothing beyond this present world. We recognize in words the claims of religion, but it has no

ruling power in our hearts. We do not daily and hourly bring our thoughts, words and actions to be tried by the test: "Is it well-pleasing to my Heavenly Father." That most precious language of the Psalmist: "May the words of my mouth, and the meditations of my heart, be acceptable in thy sight, O Lord, my strength and my Redeemer," is no longer the breathing of our spirits. Thus we sometimes go on for a long time, really walking in the "Broad Way" that leads to destruction, though we may be unwilling to admit it even to ourselves; and having wandered far from that path that leads Zionward. It is in the infinite mercy of Him, who willeth not the death of the sinner, but that all men should return, repent and live, that His love reaches to us even in this state of wandering and forgetfulness of God. Sometimes He permits heavy outward calamities to assail us—our business prospects may be blasted, disease may invade our powers, or the dearest of our earthly companions may be taken away. At other times his judgments may be more in the secret of our own hearts. Our sins may be set in order before us, and the awful consciousness that we have been rejecting the proffered mercies of our God, may press heavily upon us. We are awakened to a sense of our condition, we feel that we have lost our Guide, and that there is no other who can help us or save us from the consequences of our own foolish ways. What then is left for us, but like the lost child, to cry out from the depth of the heart for the return of our Guide, and to say: "Lord be merciful to me a sinner."

So great is the Divine goodness, that such a cry, uttered in sincerity, is never unheard; but He who puts the prayer into the heart, is ready to answer it in His own way and time. For "joy shall be in Heaven over one sinner that repenteth, more than over ninety and nine just persons which need no repentance."

### The Pressure of the Armor.

The leading statesman of Hungary, M. Francis Deak, recently remarked to Henry Richard, when the latter called upon him at Buda-Pesth: "The present condition of Europe, with its enormous armaments, reminds me of the state of things in the Middle Ages, when men wore coats of mail, which, in the supposed necessity of more effectual self-defence, they went on increasing in weight, until at last they became so crushingly heavy as to weigh down their wearers altogether, and then, from sheer necessity, the custom was abandoned." The burden of the present gigantic system of peace-armaments in Europe is indeed very generally felt to be approximating that condition when, according to a familiar proverb, "The last straw breaks the camel's back."

The grand total of the offensive and defensive armies of Europe, in 1874, amounts to 5,094,370 men—equivalent to the population of Ireland, or of Belgium—all able-bodied and vigorous, the very flower of the population, and representing all the bread-winners of some *twenty million* people, at the very lowest estimate. All the homes of people equal to those of five cities, each the size of the vast British Metropolis, are thus obliged to yield up all their adult males to military service, temporarily or permanently! Five millions represents all the adult and efficient male population of England and Wales (population twenty-three millions), or double that of the

vast empire of Brazil (ten millions). Estimating the cost of each soldier at only £30 per annum (whilst under arms), those armies swallow up, in a totally unproductive way, double the revenue of the United Kingdom of Great Britain and Ireland.

In addition to all this, is the cost of guns, war-ships, barracks, armor-plate, and a score of other descriptions of military and naval apparatus. Herr Krupp, of Germany, is raising a loan of some millions to enable his workshops to turn out an increasing number of big guns. England, not content with producing the "Woolwich Infant," a huge 35-ton gun (loaded with an enormous cone of 700 lbs. weight and 112 inches in area at the base), is now preparing an 81-ton gun. One of its projectiles will weigh half-a-ton, and every time it is fired will consume *two barrels of gunpowder!* It will leave the gun with a momentum of *fifteen thousand tons!*

So exhausting is the drain upon the toiling populations whose bread-winners are compelled, literally in millions, to abandon home for the army, and so cruel is the strain upon the peaceful tax-payers, that a deep low groan, as of despair, is beginning to make itself heard throughout the nations.

It is this sense of intense dissatisfaction which caused Henry Richard to be received with such enthusiasm in some of the Continental cities, during his late journey in the interest of peace and international arbitration.

The diffusion of the same feeling is also making itself known in ways which are forcing themselves upon the attention of the leading journalists and statesmen of the world. The *Times* newspaper remarks that "the spectacle we now witness is one of needless preparation on all sides, where no danger threatens, or rather where the only danger is such as arises necessarily from mistaken efforts of security. If such a state of things is permitted to continue, it will be a disgrace to European statesmen." The Belgian correspondent of the same journal remarks that the military pressure now weighs upon every family on the Continent. In many countries the rich too, as well as the poor, are beginning to feel the pinch severely, through the abolition of substitutes, and the establishment of universally compulsory service.

Even the manly martial Germans are flinching visibly from the screw. Scores of thousands are emigrating and fleeing from their loved homes and kindred, to America or Great Britain, to escape conscription. Their journals are altering their tone, too, towards the advocates of peace, despite the despotic military censorship and espionage exercised by the Bismarck type of officials. The Berlin *Exchange Gazette*, in a recent article, advocates a Court of International Arbitration, because it would take away many of the excuses that are apt to be raised by ambitious or quarrelsome nations. It remarks,—"None of the belligerent powers could any longer place their hands upon their hearts and exclaim: The war is not our fault?" For such an International Court would, as the editor observes, take away the excuse for wars by offering a reasonable and legal substitute. Another German journal says "These Peace Societies and Leagues have their importance, however those who doubt and ridicule them, may shake their heads." The Italian journals are far more united and outspoken, than

the German, in their appreciation of movements for the relief of war burdens. But everywhere throughout Europe, it is manifest that the old spirit of ridicule and scorn towards such movements is steadily giving way to a respectful regard, even where the stage of sympathetic union has not yet been attained.

Another significant sign is the increase of Conferences and Congresses for amelioration of the existing evils. The meetings at Ghent and Brussels last year, brought together some of the foremost jurists of Europe. Now we hear of another Brussels Conference originated by the "Alliance Universelle," and sanctioned by the chief courts and diplomatists of Europe, who will send representatives. Its object is to seek to obtain a general consent of the various Governments to rules for a more humane treatment of prisoners of war. From another quarter we hear that the North German merchants have held a Congress at Bremen, and have memorialized Prince Bismarck in favor of a convention of the Maritime Powers to draw up an international code of Maritime Law. And there is reason to believe that the German Government is disposed to take some practical steps in this direction.

These and various similar movements of the present time show that whilst, on the one hand, there is a deepening and very pressing sense of the burdens of peace armaments, there is growing up, collaterally, a widely extended desire for any movement in the direction of relief, and an increased appreciation of the value of international conferences and combined efforts for the amelioration of the crushing evils of the great armaments and the war system in general.—*The Herald of Peace.*

Selected.

I would just remark, that in some of the counties in which I have been, some dear young people, who were libertine in the show of pride and finery of the world, became sober, solid and exemplary. One young woman in particular was so reached, as I sat in a Friend's house, though I had nothing by way of testimony in words to her condition; yet the weight and exercise attending my mind at that time, so reached her understanding, she became a plain solid Friend, and before I left England, I heard her in the ministry at a meeting, and as I thought, to the general satisfaction of Friends present.—*Journal of Daniel Stanton.*

#### Scientific Notes.

According to a Government report there are more than two and a half millions of Cinchona trees in the plantations on the Neilgherry Hills. From these about 80,000 pounds of bark are obtained annually.

A patent has recently been obtained for utilizing asbestos. This remarkable mineral is found (often associated with serpentine) in the form of slender, silk-like fibers; and is almost indestructible in fire. Its want of tenacity alone prevents it from being spun and woven into a cloth, which would be exceedingly useful in situations exposed to heat. The patent is for associating the asbestos with metallic wire or plates which shall furnish the strength in which this mineral is deficient. The asbestos is fastened upon the wire by pressure through grooved rollers, or the mineral may be ground into a gummy pulp, which will adhere to the wire, and being submitted to the requisite pressure, will form a firm and

continuous coating. The inventor suggests numerous applications of his invention, which he thinks will be useful.

A letter has recently been published on the utilization of the sewage of Dantzic. The land on which it is applied is nearly pure sand, and the yield of the Sugar Beet grown on it is described as "enormous," while the percentage of sugar is equal to that obtained from roots grown in the best soil in Germany. The decrease in the death-rate of the town is considerable, and waste lands have been made to bear a remunerative crop.

A new plant, known to the Indians of Brazil as Jaborandi, has been introduced into the Paris Pharmacopœia. It is said to be of especial benefit in cases of fever, producing profuse perspiration in a more beneficial manner than other known drugs.

An Anglo-Swiss company are manufacturing preserved milk, near Lucerne, Switzerland. They use the milk of 2000 cows, which is furnished by the peasants owning them, under a contract. The concentrated milk contains one-third of its weight of sugar. Several of the tin cases, in which it is packed, were opened for analysis, and kept open and exposed for several months. A crystalline crust formed at the surface, owing to the drying, but the mass underwent no change, and the taste was as good as ever.

It appears from statistical documents (says *Les Mondes*) that the eleven principal commercial nations of the world, viz: Great Britain, United States, France, Germany, Belgium, Austria, Russia, Italy, Spain, Holland and Sweden, have more than doubled their commerce in less than twenty years. Their exterior commerce in 1855, was about \$4,000,000,000; in 1872 it was \$9,000,000,000. The population of the same countries was in 1865, 271,443,000; in 1872 it was 311,620,000. Gladstone recently said he supposed that during the last 15 years, Great Britain had accumulated more wealth than during the whole period of her history.

The *Strait Times* says that the natives of Java use the poison of the Bamboo against their enemies, and obtain it by cutting the bamboo at a joint, and detaching from the saucer-shaped cavity, formed by the cane at such portions, some small black filaments, which are covered with almost imperceptible needles. The filaments constitute the venom. When swallowed, instead of passing through the stomach, they appear to catch in the throat and work their way to the respiratory organs, where they produce a violent cough, followed by inflammation of the lungs.

Helmholtz, in detailing his experiences of "hay fever," says he has detected vibrios in the nasal secretions at that period of the year, which were not to be found at other times. They required a good microscope for their observation. This suggested the application of a weak neutral solution of sulphate of quinine to the nasal cavities, which always gave him immediate though temporary relief.

*Weatherwise.*—That there is a sensitiveness to atmospheric changes in the leech is generally admitted; and the idea of using this little creature as a sort of weather glass arose long ago, we have evidence, in one of the early volumes of the *Gentleman's Magazine*. A correspondent of that venerable journal stated that if a leech be kept in a phial or bottle, partly filled with water, it will indicate ap-

proaching changes in the weather. He placed on a window-ledge an eight-ounce phial containing a leech and about six ounces of water, and watched it daily. According to his description, when the weather continued serene and beautiful, the leech lay motionless at the bottom of the phial, rolled in a spiral form. When it began to rain at noon, or a little before or after, the leech was found at the top of its lodging, where it remained until the weather became settled. When wind was approaching, the leech galloped about its limpid habitation with great liveliness, seldom resting until the wind became violent. When a thunderstorm was about to appear, the animal sought a lodgement above the level of the water, displayed great uneasiness, and moved about in convulsive-like threads. In clear frost, as in fine summer weather, it lay constantly at the bottom; whereas, in snowy weather, like as in rain, it dwelt at the very mouth of the phial. The observer covered the mouth of the phial with a piece of linen, and changed the water every week or two. He seems to have had faith in the correctness of his own observations and conclusions; but went no further in the attempt at explanation than to say, "What reasons may be assigned for these movements, I must leave philosophers to determine; though one thing is evident to everybody—that the leech must be affected in the same way as the mercury and spirit in the weather-glass; and has doubtless a very surprising sensation, that change of weather, even days before, makes visible alteration in its manner of living." This leech-philosophy appears to have had many believers in the last century.

In a letter to Lady Hesketh, dated 1789, Cowper wrote in one of his (too-rare) cheerful moods, and among other gossip said: "Mrs. Throckmorton carries us to-morrow in her chaise to Chicheley. The event must, however, be supposed to depend on the elements, at least on the state of the atmosphere, which is turbulent beyond measure. Saturday it thundered, last night it lightened, and at three this morning I saw the sky red as a city in flames could have made it. I have a leech in a bottle that foretells all these prodigies and convulsions of nature; not, as you will naturally conjecture, by articulate utterances of oracular notices, but by a variety of gesticulation, which here I have not room to give an account of.

Suffice it to say that no change of weather surprises him, and that, in point of the earliest and most reliable intelligence, he is worth all the barometers in the world. None of them all, indeed, can make the least pretence to foretell thunder, a species of capacity of which he has given the most unequivocal evidence. I gave but sixpence for him, which is a great more than the market price; though he is, in fact, or rather would be, if leeches were not found in every ditch, an invaluable acquisition."—*Chambers' Journal.*

Be not troubled at disappointment, for if they may be recovered, do it, if they cannot trouble is vain, if you could not have helped it be content; there is often peace and profit in submitting to Providence, for afflictions make wise. If you could have helped it, let not your trouble exceed instruction for another time; these rules will carry you with firmness and comfort through this inconstant world.—*W. Penn.*

We have been requested to insert the following notice :

The fire in Chicago on the 14th of this month, destroyed not only the homes of a large number of the colored people, but three of their meeting-houses. Several Friends have been engaged in First-day schools in connection with them. The people are very poor, and aid in rebuilding the houses or furnishing books, &c., for the schools, will be very acceptable.

Friends disposed to contribute for either of these purposes may send to RICHARD CAURY, 221 Chestnut St., Philadelphia.

## THE FRIEND.

SEVENTH MONTH 25, 1874.

A pamphlet has recently been published in this city with the title, "George Fox, an apostle of evangelical spiritual christianity," in which a number of extracts from the Journal and writings of that eminent man are brought forward.

We believe that much advantage would arise from the circulation at the present time of a selection from the writings of George Fox, which would exhibit in a clear and condensed form the prominent features of his mission and teachings, and give to its readers at such a view of his doctrines as they might acquire from an honest, serious and intelligent perusal of his collected works. As the pamphlet alluded to gives but a one-sided view of his religious faith, we do not think this can be said of it.

In the introductory remarks, occurs the following passage :

"One great cause of the present confused condition of this branch of the Christian Church, in our land, has been the recent introduction of partial and modified editions of the lives and writings of members of our Society, who have long passed away.

"However excellent the intentions of these modern compilers may have been, their practice has resulted in great detriment to the truth itself, as well as in the most serious injustice to the characters of the parties so unintentionally misrepresented. Nay more, the injury has been lasting and widespread, to all those who have attempted to follow these imaginary examples, and to govern their own action, or to modify their own views, by an inflexible adherence to certain precise standards of doctrine and practice, thus incorrectly held forth for our imitation.

"To such an extent has this been done that, instead of our forefathers being shown to us as they really were, (and, as Paul and Barnabas declared to the men of Lystra, they were also,) 'men of like passions as ourselves,' these eminent patterns of our human nature have been almost canonized as saints, and have been forced to appear in one uniform and impossible character.

"Like the bed of Proenstes, this ideal standard of these compilers must be conformed to by all their subjects; if they were too short for it, they were lovingly stretched to fit it, if they were too long, they were judiciously clipped to the needed measure until all individuality of character and independence of thought, seemed to have been lost sight of, in

this artificial manipulation, by the modern biographers of our early Friends."

This is a most serious charge, and one we believe to be untrue, and unsupported by the contents of the works referred to. As to the "causes of the present confused condition" of the Society of Friends, they are, the inculcation and spread among its members of doctrines widely differing from those of early Friends; and a departure of many from that, which the Society from its origin down to a very recent period, has always held and acknowledged; and also the unfaithfulness in practice of those who are doctrinally sound. This departure has not arisen from "partial and modified editions of the lives and writings of members of our Society;" on the contrary, those who were among the earlier advocates of "modified Quakerism," felt the inconsistency of their views with the writings referred to, and more or less openly endeavored to controvert some of the Scriptural truths advocated in them. This effort at change has increased, until it is notorious that for years past, open opposition has been made in some quarters to the well known and repeatedly endorsed work, Barclay's Apology, which from the earliest period of our history, has been recognized and sanctioned as a fair statement of the religious doctrines of Friends; showing, that in proportion as a people decline from their primitive purity in faith and practice, they become prepared to disregard or lightly esteem the writings which uphold the original standard.

Of course, we do not certainly know what "partial and modified editions of the lives and writings of members of our Society, who have long passed away," may have been in the mind of the writer of this pamphlet, but as he speaks of them as "recent," it seems probable that he refers to the series published some years ago under authority of Philadelphia Meeting for Sufferings by William and Thomas Evans, under the title of "The Friends' Library." This is the only extensive reprint of latter time, though there have been several isolated Journals separately printed. If the charge is meant to refer to this series, we believe it safe to say, that it exhibits a recklessness of statement on serious matters, which is very surprising. In reprinting the Journals of our early Friends, there was some abridgment, but this was principally in the omission of legal documents pertaining to their persecutions and imprisonments, and in an allowable condensation, which would render certain portions of them less tedious to the general reader. There was no attempt to "modify" their views, or to "stretch" or to "clip" them to suit any "ideal standard," or "bed of Proenstes;" and so far from "serious injustice to the characters" of our early Friends, having been done by whatever abridgments were made, we are well satisfied that a careful reading and comparison of the original editions and the reprint, would not in any one of their Journals or Works, show any difference in the religious doctrines maintained by the authors, as exhibited in the respective editions.

We consider therefore, the charge of "artificial manipulation," grossly unjust, if it is meant to be so applied; if it is not meant to be so applied it ought to have been more cautiously worded.

The pamphlet contains numerous quotations from the writings of George Fox, to

show how fully and unreservedly he accepted the doctrine of reconciliation with God, through the death and sufferings of our Saviour, Jesus Christ; and no doubt these might have been much increased, if it had been needful; or if the pamphlet was designed for circulation among those of Unitarian tendencies. We suppose there are few, indeed, of those who are members of our Society, who need to be convinced of the views of Friends on this fundamental doctrine. The members of Philadelphia Yearly Meeting at least, would be without excuse for ignorance, since the official documents of that body, from the early recollection of the present generation down to the present time, contain numerous avowals of Friends' belief in it.

But when we come to the vitally important question, of how we, as individuals, are to participate in the saving effects of the offering of Christ, the teaching of the pamphlet is not satisfactory. It considers it a tincture of Unitarian heresy to believe that by the aid of the Light within, men can work out their own salvation; and its tendency is to uphold the doctrine which Philadelphia Yearly Meeting cautioned its members against, by an epistle issued in 1870,—that we may experience conversion and forgiveness of our sins, through such a belief, and trust in the merits and offering of Christ, as may exist in the mind, without the heart being turned from sin and brought into a degree of union with God, through the work of the Holy Spirit.

George Fox himself says: "The Lord God opened to me by His invisible power, how 'every man was enlightened by the divine Light of Christ.' I saw it shine through all, and that they that believed in it came out of condemnation to the Light of life, and became the children of it; but they that hated it, and did not believe in it, were condemned by it, though they made a profession of Christ."

"I saw Christ died for all men, was a propitiation for all, and enlightened all men and women with His divine and saving Light; and that none could be true believers, but those who believed therein."

In an address to magistrates issued in 1656, he says: "Every man of you being enlightened with a light that cometh from Christ, the Saviour of people's souls, to this Light all take heed, that with it ye may see Christ, from whom the Light cometh; you may see Him to be your Saviour, by whom the world was made, who saith, 'Learn of me.' But if ye hate this Light, ye hate Christ, who doth enlighten you all, that through Him ye might believe. *This Light is your way to salvation*, if you walk in it; and this Light is your condemnation, if you reject and hate it. You can never come to Christ, the Second Priest, until you come to the Light, which the Second Priest hath enlightened you withal."

Indeed, it may be truly said that the great mission of George Fox to the world, was to call their attention to the Light of Christ in the heart, as the appointed way by which they were to be led out of sin to Christ, to know Him in all his offices, and to receive power to become the sons of God. Hundreds of passages might be cited to prove this, for it pervades all his writings and teachings. Without obeying and uniting with this Divine Light, and thus being led into practical holiness, he taught that we could not experience the forgiveness of our sins. Thus in his reply to Philip Taverner, he says: "So far as

a man is sanctified, so far is he justified, and no farther, for the same that sanctifies a man justifies him."

### SUMMARY OF EVENTS.

**FOREIGN.**—The Atlantic cable laid in 1866, and which for a considerable time had been unserviceable, was repaired on the 14th inst., and is said to be now in perfect working order.

A serious break occurred in the canal near Glasgow on the 15th inst. The waters overflowed the neighborhood causing damage to the amount of \$500,000.

The Admiralty Court has awarded the owner of the steamer Spray \$77,000; E. T. Barry \$10,000, and the Auburn \$2500, salvage for towing into port the abandoned French steamship Amerique.

In the House of Commons the Earl of Caernarvon, Colonial Minister, has stated that the government is ready to accept the cession of the Fiji Islands, if made unconditionally, but sixteen conditions proposed by Fiji were not acceptable. The Governor of New South Wales had been instructed to submit the views of the English government to the king and inhabitants of the Fiji Islands.

The House of Commons has passed a bill abolishing church patronage in Scotland.

An explosion took place in a colliery at Wigan on the 18th inst., by which fifteen miners were killed.

The Queen has sent a message to Parliament asking for a grant for her son Leopold, who attained his majority several months since.

London, 7th mo. 20th.—Consols 92½. The rate of discount in the open market for three months bills is 2¼ per cent. per annum, which is ¼ per cent. below the Bank of England rate.

Liverpool.—Uplands cotton, 8½ a 8¼d.

The French Assembly has rejected a proposal to increase the tax on salt, made by Magne, Minister of Finance. This caused the resignation of Magne. Fourton, Minister of the Interior, has also resigned. It is stated that the latter differed with his colleagues in regard to the policy determined upon by them of constituting a definite government until the expiration of MacMahon's term.

The Committee of Thirty has reported on the various constitutional propositions referred to the committee. The report states that the committee recognizes the irrevocability of President MacMahon's powers, but declares the septennate merely a peace to parties for seven years. The committee decides to set aside Perrier's bill and substitute their own, which consists of six clauses. The first maintains the title of President of the Republic; second establishes ministerial responsibility; third confers legislative power upon the two Chambers, the appointment of members of the Upper House or Senate to be the subject of a future bill. The fourth provides that the President alone is authorized to dissolve the Lower House, or Chamber of Deputies; fifth prescribes that a Congress of both Chambers shall provide for the continuance of the government in case Marshal MacMahon dies, resigns or reaches the end of his term of office.

The sixth says that no modification of constitutional laws is to be allowed unless first proposed by the President. It is not believed the plan of the committee will be adopted, as it pleases neither Republicans nor Legitimists.

An official note was published in Paris on the 15th inst., warning agriculturists and others against emigrating without making inquiry of the administration in reference thereto. It is stated in the note that this course is taken because a number of emigrants have made application to the government for assistance to enable them to return to France, having discovered that they had been greatly deceived by emigration agents.

On the 20th the Assembly was notified that the vacancies in the French Ministry had been filled. There are now no Bonapartists in the Cabinet.

Madrid dispatches say that sickness is prevalent among the national troops, causing a delay in active operations. Cuenca, 84 miles southeast of Madrid, has been attacked by the Carlists. At Puycorda, near the base of the Pyrennees, the Carlists suffered a repulse and abandoned the siege of the town. The blockade of Bilbao by land is complete and stringently maintained by the Carlist forces.

Decrees have been issued in Madrid declaring all Spain in a state of siege; sequestering the property of Carlists whose estates will be sold, liable to heavy penalty to the relatives of Republicans slain, and finally creating a special reserve of 120,000 men. Charges of sedition or conspiracy against the State will be tried

by court-martial, and persons convicted of interfering with the railways and telegraphs shall suffer death.

A fire broke out in Galata, a suburb of Constantinople, the 16th inst., and destroyed about 200 houses. The loss by the fire is estimated at \$2,000,000.

Kullman, who attempted to shoot Prince Bismarck, has had an interview with the latter, in which he asserts that he had no accomplices and was not instigated by any one. His statement is not believed to be true. The Berlin press declare that this attempted assassination proves the necessity of repressing ultramontane teachings. The government has already taken measures for further restricting ultramontane agitations, and keeping a close watch on disloyal clubs. Bismarck has received upwards of a thousand telegrams congratulating him upon his escape. The wound upon his wrist though superficial, caused suffering and inconvenience for a few days.

A Carlist telegram from Bayonne, received in London the 20th, declares that Don Alphonso entered Cuenca on the 16th inst., and levied a contribution of £32,000 sterling. Two thousand of the garrison fell prisoners into his hands.

A Calcutta dispatch of the 19th says: The rivers from Assam to Oude have overflowed their banks, and the country is flooded. The damage done is very great.

Mexican advices say there are now ninety-eight Protestant churches in Mexico: five years ago there were only six.

**UNITED STATES.**—Chicago has suffered from another terrible conflagration which burned over an area about half a mile long and a little less in width. The burned district contained a number of large and valuable buildings, but most of those destroyed were wooden houses of no great value. The district which has been laid in ruins was one of the worst left by the great fire, and contained a vast number of low drinking houses. The fire broke out on the afternoon of the 14th inst., and was extinguished early next day. Only seven persons are known to have perished. The total loss amounts to four millions of dollars, more than half of which is covered by insurance.

During the fiscal year just closed the issues of postage stamps, stamped envelopes and postal cards amounted in value to \$23,837,526.62, an increase of \$3,001,046.85, or 14.40 per cent. over the previous fiscal year.

The published reports of a large number of leading railway companies in the United States, show a decrease for the Sixth month of \$449,832 in the gross earnings.

The foreign imports at the port of New York, for the six months ending 6th mo. 30th, were \$218,572,998, as compared with a total of \$221,047,982 in the corresponding period of the year 1873. The revenue from customs at New York for the last six months was \$56,887,853, as compared with \$61,981,516 for the same period last year. The exports from New York to foreign ports, in the half year ending 6th mo. 30th last, amounted to \$193,050,275, which is \$25,743,110 greater than in the first half of 1873.

The rapid increase of population in the State of Illinois is shown by the census returns. In 1830 it had 157,445 inhabitants; in 1840, 476,183; 1850, 851,470; 1860, 1,711,961; 1870, 2,539,891. In 1874 they doubtless number more than three millions. The settlement of this large and fertile State has been promoted by its ample railroad facilities, which have been extended to nearly every part of the country.

Marshall Jewell, the retiring Minister at St. Petersburg, left that city on the 19th on his return to the U. States to assume the duties of Postmaster General. He expected to sail from Liverpool for New York on the first of Eighth month.

The interments in Philadelphia for the week ending on the 18th inst. numbered 416, including 238 children under two years. There were 106 deaths of cholera infantum, and 24 marasmus.

*The Markets, &c.*—The following were the quotations on the 20th inst. *New York.*—American gold, 110½. U. S. sixes, 1881, registered, 116; do. coupons, 118; do. 1868, reg., 116½; coupon, 117½; do. 10-40 5 per cents, 112 a 112½. Superfine flour, \$4.90 a \$5.25; State extra, \$5.70 a \$6.25; finer brands, \$6.50 a \$9.25. No. 1 Chicago spring wheat, \$1.33; red western, \$1.32 a \$1.33; new do., \$1.40. Oats, 63½ a 69 cts. Yellow corn, 80 cts.; white, 88 a 89 cts. *Philadelphia.*—Cotton, 17½ a 17¾ cts. for uplands and New Orleans. Superfine flour, \$3.50 a \$4; extras, \$4 a \$4.50; finer brands, -5 a \$9.50. Western red wheat, \$1.25 a \$1.40; Pennsylvania, \$1.40; amber, \$1.45 a \$1.50; No. 1 spring, \$1.30. Rye, \$1. Western mixed corn, 82 cts.; yellow, 84 cts. Oats, 70 a 73 cts. Carolina rice, 8½ a 8¾ cts. Lard, 11½ a 12 cts. Sales of 2600 beef cattle, common, 5 a 5½ cts. per lb. gross, and choice 7 a 7¾ cts. About 14,000 sheep sold at 3½ a 5½ cts. per lb. gross, and 5000

hogs at \$9.62 a \$9.75 per 100 lbs. net for corn fed *Chicago.*—No. 2 spring wheat, \$1.11 a \$1.12; No. 3 do. \$1.04. No. 2 mixed corn, 62½ cts. No. 2 oats, 52 ct. No. 2 rye, 80 cts. Spring barley, \$1. Lard, \$11½ per 100 lb. *St. Louis.*—No. 2 winter red wheat, \$1.1 a \$1.20; No. 3 do., \$1.08 a \$1.10. No. 2 mixed cor 64 a 65 cts. Oats, 60 a 62 cts. No. 2 spring barle \$1.12. Rye, \$1 a \$1.05. *Baltimore.*—Choice whi wheat, \$1.45; good to prime red, \$1.35 a \$1.42. Whi corn, 92 a 93 cts.; yellow, 83 cts. Oats, 63 a 75 cts.

### WANTED.

A suitable Friend to take the position of Writing Teacher and Assistant Governor at Westtown Boarding School—for next Session. Apply to

Charles Evans, 702 Race street, Philadelphia,  
Clarkson Sheppard, Greenwich, New Jersey,  
Joseph Walton, Moorestown, New Jersey.

### SHELTER FOR COLORED ORPHANS.

Wanted, by the 1st of 10th mo. next, a suitable Friend for Matron for the above institution.

Application may be made to

Hannah R. Newbold, 641 Franklin St.  
Mary Wood, 524 South Second St.  
Mary Randolph, 247 North Twelfth St.  
Anna W. Lippincott, 460 North Seventh St.

### WANTED.

An unmarried Friend to take the position of Governor at Westtown Boarding School, on or before the close of the present session, in the 10th month next.

Apply to

Clarkson Sheppard, Greenwich, New Jersey,  
Joseph Walton, Moorestown, "  
Charles Evans, 702 Race street, Philadelphia.

### HAVERFORD COLLEGE.

The next Term will commence on Fourth-day, 9th mo. 2nd, 1874. Applications for admissions should be addressed to SAMUEL J. GUMMERE, President, Haverford College, Montgomery Co., Pa.

### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

MARRIED, on the 22d of Fifth month, 1874, a Friends' Meeting-house, New Garden, Columbia Co., Ohio, ELISHA B. STEER, of Colerain, Belmont Co., Ohio to ELLEN C. GILBERT, of the former place.

DIED, on the 26th of Sixth month, 1874, WILLIAM R. TATUM, in the 63d year of his age, a beloved member of Woodbury Monthly Meeting, N. J. Though the final call came at an unexpected moment, we have the consoling belief that he was found as one waiting for his Lord. A few weeks previously he remarked that he had "a comfortable assurance that if taken suddenly all would be well. He was not anxious about the time, but would leave it all in the hands of his Saviour." He was beloved and respected in a marked degree by the community in which his life had been passed. The widow and the orphan ever found in him a sympathising friend. "Given to hospitality," in his house the stranger found a welcome, especially such as had gone forth in the service of their Lord; and the everyday claims and cares of life were cheerfully put aside to help these on their way. As was justly said at his funeral, he was "endowed with the gifts of a meek and quiet spirit, and of christian courtesy, and was enabled to wear these ornaments to the praise of the Giver."

—, at the residence of his son-in-law, Joseph P. Lupton, Belmont Co., Ohio, on the 27th of Sixth month, 1874, JAMES STEER, a member and elder of Short Creek Monthly and Concord Particular Meeting, having nearly completed his ninety-third year. This dear Friend was concerned to maintain the doctrines and testimonies of our religious Society, as upheld by early Friends. He appeared entirely aware of his situation, and conscious until near the close; he did not express much, but bore his sufferings with great patience and calmness. His friends feel that they have a well-grounded hope that after a long life of usefulness he has been permitted, through the mercy of God in Christ Jesus, to enter one of the many mansions prepared for the righteous of all generations.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, EIGHTH MONTH 1, 1874.

NO. 50.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

For "The Friend."

## A New Theory of the Universe.

(Continued from page 350.)

There are other features of the sidereal system which are well deserving of a careful scrutiny. The existence of variable stars, and of binary and multiple systems, the sudden blazing forth of temporary stars, some of which have excelled even Sirius in splendor, the reputed existence of dark orbs,—all these and many other evidences suffice to show how much variety there is amongst the denizens of stellar regions. That there should be such variety is what our contemplation of the solar system leads us to expect. And indeed, when we remember how largely the resources of astronomy have been taxed for the detection of the known peculiarities of the solar system, and that, for aught we know, not a tithe of the various orders of bodies which form that system have yet been revealed to us, surely it seems little likely that what we know of the sidereal system affords the faintest conception of the wondrously varied forms of creation which doubtless exist within the stellar spaces.

But we have yet to consider those mysteries of mysteries—the nebulae.

According to one view, which was maintained until quite recently as by far the most probable theory, nebulae were looked upon as in reality composed of suns, resembling our own in magnitude and splendor, and separated from each other by distances comparable to, perhaps, surpassing, the distances which separate our sun from neighboring fixed stars. Nebulae, in fact, were looked upon as galaxies resembling our own, some exceeding it, others falling short of it, in richness and splendor: but all of them "island universes," to use Humboldt's expressive verbiage, and all of them—even the nearest—removed from us by distances which exceed, in an enormous proportion, the dimensions of our galaxy. The resolvable clusters were of course considered to be the nearest of the outlying universes. Accordingly, when it is remembered that some of these are clearly resolved by pigmy tubes, while there exist irresolvable nebulae of great apparent extent, which have defied the power of the great Parsonstown reflector, it will be seen how largely—on the hypothesis we are consider-

ing—the "island universes" vary in their distances from us, and in their own dimensions.

According to the other hypothesis, multitudes of the nebulae are outlying universes, but not all of them. Admitting that the majority of the nebulae are aggregations of suns, rendered nebulous only through excessive distance, Herschel was led to the belief that many nebulae are formed in reality—as in appearance—from eosmical vapor. He pointed out the remarkable contrast that exists between the small yet easily resolved clusters, and such objects as the great Orion nebula, and the "queen of the nebulae" in Andromeda. Both of these are distinctly visible to the naked eye, and are yet absolutely irresolvable even in those monster tubes which the Herschels directed towards the heavens.

Herschel propounded the hypothesis that many of these unresolved nebulae are not sidereal systems, but are formed of a nebulous fluid resembling in some respects that which is assumed to form the substance of comets. He held, as a natural corollary to this view, the opinion that nebulae thus composed are not necessarily far removed beyond the limits of our own galaxy, but may be situated amidst the interstellar spaces. He showed further how there may be traced among the different orders of vaporous or fluid nebulae the stages of a process of development leading upwards, he held, to the formation of suns resembling our own.

But the marvellous revelations afforded by the spectroscope, in the able hands of Dr. Huggins, have shown that the one great mistake into which it had been assumed that Herschel had fallen, was in reality one of the most remarkable of his many anticipations of modern discoveries. We cannot, indeed, assert that Herschel's speculations respecting the genesis of stars have been confirmed. They have not, however, been disproved. And the great fact which he considered as the legitimate deduction from his observations has been placed beyond a doubt. The spectroscope tells us, in a manner which admits neither of doubt nor cavil, that many of the nebulae are composed of luminous gas, and amongst these are to be included the Orion nebula and all the planetary nebulae which have as yet been observed. The Andromeda nebula, about which Herschel expressed no decided opinion, is found to shine with stellar light. The same is the case with all the cluster-nebulae which have yet been examined with the spectroscope.

In dealing with the accepted views respecting the sidereal and nebular systems, I have treated the two systems separately. In fact, according to the received opinions—whether we take the theory of those who look upon all nebulae as "island universes," or that of those who consider that some few are to be excepted—the sidereal system is but a member of the nebular system. Just as the Sun

is one among the stars, so the Milky Way is held to be one among the nebulae.

In presenting the views I have been led to entertain respecting the constitution of the universe, I shall consider the two systems together—for this reason, simply, that I believe them to form but one system.

I would not be understood to assert that all the nebulae lie within the confines of the Milky Way. There may be some few which really are external systems. For instance, I think it not improbable that the spiral nebulae are galaxies resembling our own. But that the majority of the nebulae, and especially such objects as the great star-cluster in Hercules, are to be looked upon as external universes, I am disposed wholly to deny.

I think, indeed, that I shall be able at once to show the extreme improbability that even such an object as the Andromeda nebula is an external universe on the assumption that the accepted view of the sidereal system is the true one. Let us consider. In the Milky Way we are supposed to have an aggregation of suns separated from each other—throughout the whole extent of the galaxy—by distances comparable with the distance which separates our Sun from the nearest fixed stars. But so widely are the outer parts of the Milky Way separated from us, that—though composed in this manner—they appear even in our most powerful telescopes as mere patches of filmy light. Now if the outer parts of the sidereal disc, removed from us by only the radius of the disc, present so faint an appearance to us as has been described above, how inconceivable would be the faintness of the whole disc when removed to a distance exceeding its own diameter many hundreds of times. It would not only not be resolvable into discrete stars by any telescope yet constructed, but it would be absolutely invisible in a telescope exceeding the Parsonstown reflector a hundred-fold in power.

We must therefore either admit that the outer parts of our galaxy differ wholly in constitution from the parts which lie in our neighborhood, or we must deny that the assumed external clusters bear the slightest resemblance to our own sidereal system.

The irregular nebulae are objects differing altogether in character from all other nebulae. They cover a far larger space on the celestial vault, and are associated in the most singular manner with fixed stars in the same field of view. The wisps and sprays of nebulous light which stream from the central convolutions of such nebulae, correspond, quite closely in many instances, with streams of small fixed stars. In many of these nebulae, also, there are streams of faint nebulosity extending towards fixed stars, and acquiring a sudden brightness around them. Now it seems to me that we cannot without utter improbability consider such an arrangement as accidental. For instance, if the bright stars  $\epsilon$  and  $\delta$  Orionis were wholly disconnected with the great

nebula in Orion, how enormous would be the antecedent improbability that these orbs should appear—as they do—involved in strong nebulosity, connected by streams of faint nebulosity with the great nebula. And even if we assumed this to be possibly due to the effects of chance-distribution, how should we explain the fact that similar phenomena are observed in the other irregular nebulae, and notably in that mysterious object which surrounds Eta Argus, the most remarkable variable in the heavens.

I pass over the association often observable between those remarkable objects the double nebulae and double stars, though the phenomenon is sufficiently significant. But there is one other well-established phenomenon which deserves attentive consideration. Nebulae have been observed to vary in light, or even to disappear. Hind, d'Arrest, and Schmidt record many such instances. Are we to suppose that whole galaxies of suns have suffered in this manner total or partial extinction? Such a supposition is absolutely incredible. Nor can I look on the alternative that some opaque or semi-opaque substance has intervened between us and these objects as having any reasonable claim to acceptance.

The phenomena I have been discussing seems to point to conclusions very different from those which have been usually accepted respecting the visible universe. Instead of separating the stars and nebulae into distinct systems, or rather of looking on the stellar system as a member of the system of nebulae, we seem compelled to look on almost every object visible even in the most powerful telescope as a portion of one system, which comprises within its range single, multiple, and clustering stars, irresolvable nebulae, gaseous bodies of symmetrical and unsymmetrical figure, and in all probability myriads of other forms of matter as yet undetected.

(To be continued.)

For "The Friend."

Selections from the New Testament and from several Authors, on the pursuit of riches and love of the world.

It is written "the mouth of the just bringeth forth wisdom." May we duly heed the precepts not only primarily of the Saviour and His apostles but of those, our contemporaries or of a generation preceding, who opened their mouths with wisdom, viz: a Woolman, a Shillitoe, a Scott, and a Barclay. It truly becomes a solemn inquiry for us individually to make, whether we are not pandering to the spirit of this world, even in what are termed its lawful things, and, under proper restrictions, allowable pursuits; its business, its cares, its profits, its honors, its amusements! It was the testimony of the Saviour respecting the seed of the kingdom which fell among thorns, that *the cares of this world, and the deceitfulness of riches, and the lusts of other things* within us, choked the word and it became unfruitful. Seeing which, another testimony of our Divine Lawgiver was never more safe, never more needed: "Watch and pray lest ye enter into temptation."

The extracts are subjoined:—

"Lay not up for yourselves treasures upon earth, where moth and rust doth corrupt, and where thieves break through and steal; but lay up for yourselves treasures in heaven, where neither moth nor rust doth corrupt, and where thieves do not break through nor

steal: for *where your treasure is, there will your heart be also.*" Matt. vi. 19—21.

"Godliness with contentment is great gain. For we brought nothing into this world, and it is certain we can carry nothing out. And having food and raiment, let us be therewith content. But they that will be rich, fall into temptation, and a snare, and into many foolish and hurtful lusts, which drown men in destruction and perdition. For the love of money is the root of all evil; which while some coveted after, they have erred from the faith, and pierced themselves through with many sorrows."—*The Apostle Paul.*

"Charge them that are rich in this world, that they be not high-minded, nor trust in uncertain riches, but in the living God, who giveth us richly all things to enjoy."—*Ibid.*

*No man that warreth entangleth himself with the affairs of this life; that he may please him who hath chosen him to be a soldier.*"—*Ibid.*

"O that our eyes may be *single to the Lord!* may we reverently wait on him for strength to lay aside all unnecessary expense of every kind, and *learn contentment in a plain simple life.* May we in lowliness submit to the leadings of his Spirit, and enter upon *any* outward employ which he graciously *points out* to us, and then whatever difficulties arise in consequence of our faithfulness, I trust they will work for our good. Small treasure to a *resigned mind* is sufficient. How happy is it to be *content with a little*, to live in humility, and feel that in us, which breathes out this language, Abba! Father." "As our understandings are opened by the pure light, we experience that through an inward approaching to God, the mind is strengthened in obedience; and that *by gratifying those desires which are not of his begetting*, these approaches to him are obstructed, and the deceivable spirit gains strength." "I often feel pure love beget longings in my heart, for the exaltation of the peaceable kingdom of Christ, and an engagement to labor according to the gift bestowed on me, for promoting an humble, plain, temperate way of living: a life where no unnecessary cares or expenses may encumber our minds, or lessen our ability to do good; where no desires after riches or greatness may lead into hard dealing; where no connexions with worldly minded men, may *abate our love to God, or weaken a true zeal for righteousness*: a life wherein we may diligently labor for *resignedness* to do and suffer whatever our Heavenly Father may allot for us, in reconciling the world to himself."—*John Woolman.*

"The world hated our first Friends, because they maintained a faithful protest against its spirit, its maxims and manners; but in proportion as we put away from us the weapons of the Christian's warfare, and join in league with the world, a wider door of admittance into all companies and all societies will be opened to us. Thus we have, indeed, occasion to look well to our steppings and standing; remembering, that *so far* as we join ourselves to the world in any respect we shall be condemned with the world. 'If ye were of the world,' said our blessed Lord to his immediate followers, 'the world would love its own; but because ye are not of the world, but I have chosen you out of the world, therefore the world hateth you.'" "How should our conduct give proof of our belief in this incontrovertible truth, that a man's life or the true enjoyment of it, consisteth not in the abund-

ance of the things which he possesseth. Let us learn that *essential lesson of contentment with little things as to this world*, remembering that He, whom we profess to take for our leader, declared respecting himself, although Lord of the whole world, 'The foxes have holes and the birds of the air have nests, but the Son of man hath not where to lay his head,' so void was he of any earthly inheritance."—*Thomas Shillitoe.*

"My weary soul abhors the idea, that a Christian can ever be at liberty, while under the influence of Heavenly good, to seek, or even desire, much wealth; though this disposition, in direct opposition to the life and doctrine of Christ, has gone far towards the destruction of true spiritual religion, I believe, in almost every religious society in the world."—*Job Scott.*

"It was the remarkable testimony of an eminent elder in the Truth, 'Not all the persecutions, not all the apostates, nor all the open or private enemies we have ever had, have done us, as a Christian Society, the damage that riches have done.' And the justness of this observation has been in succeeding times most abundantly verified and illustrated on every hand, in the desolation that has generally followed the inordinate pursuit of riches and worldly greatness, both to the victims of this snare and to their posterity."—*John Barclay.*

*Palm-oil.*—The process of obtaining the oil is as follows. When the nuts are ripe they are about the size of a walnut, of an orange color, and full of oil. They are gathered and thrown into troughs made by marking off a small area, generally about six feet square, beating the earth smooth with wooden mattocks, and raising a wall of swish about eighteen inches high round the floor thus prepared. When the pit is about one-third full the kernels are extracted from the husk, and a workman, or workwoman, getting into it, slaps the husks with her feet. This process is continued until the oil and husks are mingled and smashed into a kind of pudding, when the mass is put into vessels containing water and a fire lighted beneath. The oil separating from the husks rises to the top, and is skimmed off into earthen chatties containing about five gallons. The husk is used for tinder and manure, and not unfrequently is twisted up to form lamp wicks. The oil thus obtained is sometimes again clarified and used for cooking purposes; but the bulk is sold to Europeans and is used in the manufacture of soap, candles, and railway grease.

*Tree of Bats.*—On the far side of this square are several huge cotton-trees, amongst which is the celebrated "Tree of Bats;" although no one tree can appropriately receive this appellation, since there are several cotton-trees in Whydah which are the constant resort of bats. The species is nearly three feet across the expanded wings, and the body is as large as that of a small chicken. They hang in clusters from the branches of the trees, frequently two or three deep, and when a greater number than usual attach themselves to a branch, their weight will often break off the limb, although as thick as a man's leg. The trees they frequent are entirely stripped of leaves, although in the day-time they appear to an observer at a distance to be covered with grey foliage, owing to the immense number of bats upon them. The head of the species bears a

considerable resemblance to that of a fox, and the whole build of the animal denotes considerable strength. The bats roost all day upon the trees, rarely flying about unless disturbed by a snake, and about sunset commence a series of mazy wheelings round the trees. At this time they utter a sharp chirrup, something like the squeak of a rat, but very much higher in pitch, so high, indeed, that I have frequently come across individuals whose acoustic powers had not sufficient range to permit of their hearing the note, and on more than one occasion I have said to Beecham, "What a noise those bats are making;" upon which he has observed to me, "Bats have no mouths for talking," he being perfectly unconscious of their vocal powers.

*The Snake Temple.*—Opposite Agauli, hidden from profane eyes by a thick grove of fig-trees, which form but a mere undergrowth when compared with several tall bombaxes in their midst, is the far-famed snake house, or "*Dahn hweh*," as it is usually called. The name is derived from *Dahn*, a snake, and *Hweh*, a residence. It is sometimes called *Vodun-hweh*, i. e., the fetiche house; and, again, "*Danhgbwe-hweh*," or the big snake (python) house. I was much disappointed at this renowned fetiche, for instead of a respectable temple, I found nothing but a circular swish hut, with a conical roof; in fact, an enlarged model of the parian inkstand to be seen in every toy-shop. There was a narrow doorway on the eastern side leading to the interior, the floor of which was raised a foot above the street. The walls and floor were whitewashed, and there were a few rude attempts at reliefs in swish. From the roof there depended several pieces of colored cotton yarn, and several small pots containing water were distributed about the floor. The roof was raised above the circular walls by short projecting pieces of bamboo; and, coiled up on the top of the wall, or twining round the rafters, were twenty-two pythons. The creatures were the ordinary brown and pale yellow reptiles, whose greatest length is about eight feet. They were the sacred *Danhgbwes*, whose power was relied upon to save the kingdom from the conquering armies of Agajah. It was the tutelary saint of Whydah, and when that kingdom was conquered, was introduced into the Dahoman Pantheon.

So recent as the late king's reign, if a native had the misfortune to accidentally (for no one would have the temerity to purposely) kill a *Danhgbwe*, he was at once sacrificed, and his wives and property confiscated to the church. At the present time, the defaulter has to undergo a foretaste of the sufferings of his portion hereafter. A meeting of all the fetichists in the neighborhood is convened, and a hut of sticks, thatched with long dry grass, is erected in the open space before the snake-house. Within this structure the victim is seated, his clothes and body being well daubed with palm-oil mixed with the fat of the murdered deity. At a given signal the hut is fired, and as the materials are dry as tinder, the whole edifice is at once in a blaze, while the clothes of the victim of this salamandrine rite are soon on fire. The poor wretch rushes out of the blazing hut and makes for the nearest water with all speed, but the "*Danhgbwe-no*," snake mothers, or "*Danh-si*," snake wives, i. e., fetiche priests, are prepared with sticks, pellets of swish, and other missiles, to mercilessly belabor the luckless offender the whole

of the distance. Few are able to run the gauntlet, but are literally clubbed to death by the furious priests. No wonder the people stand in awe of a creature, the killing of which entails so fearful a punishment.

"*The "omnipotent" cloth.*"—The mats covering the massive basket that had been brought in by the Tononun were then removed, and a gigantic piece of patchwork was unrolled. This was the *Nun-u-pwe-to*, or "omnipotent" cloth, formed of samples of every kind of textile fabric that is imported into the kingdom. It is the duty of the Degan, or custom-house officers, to *levy* a piece of every different kind of cloth, to augment this "able-to-do anything" robe. Its formation was commenced by Gèzu, and it has assumed the enormous length of four hundred yards and a breadth of about ten feet. The pieces are not of uniform size, varying from a square foot to a full-sized piece, three feet by nine. The various kinds of cloth, such as denhams, chintzes, silks, vento-pullams, velvets, &c., are arranged hap-hazard, and are of every hue and design that can be imagined. Reds, blues, greens, yellows, browns, blacks, and whites are mingled indiscriminately; while striped, checked, plaid, and figured patterns add to the medley.—*Dahomey as it is.*

For "The Friend."

#### Reform School at Jamesburg, N. J.

Some years ago a few benevolent individuals became interested in the condition of those young people in New Jersey, many of them mere children, who were brought before the Courts of Justice for petty stealing and other offences against the laws. To commit them to the ordinary prisons for detention, where they would be associated with older criminals, and would be almost destitute of mental or moral training, seemed almost like consigning them to hopeless degradation. An attempt had already been made to establish an institution for the care of such, under the authority of the State, but had failed through mismanagement or from becoming involved in party politics. After making some preliminary inquiries and consultations, a few friends called on Joel Parker, at that time the Governor of the State, and urged him to introduce into his message to the Legislature, a paragraph calling attention to the urgent need which existed for action on this subject. His message had already been written and sent to the printer; but influenced by the representations made to him by disinterested men, who were evidently actuated by no partisan motives, he recalled the message, and added a few lines as he had been requested. This was in the First month of 1864. The proposition was favorably received and a commission of three persons appointed, who visited institutions established elsewhere for similar purposes, and collected such information as enabled them to make a report to the Legislature recommending the founding of a Reform School under the care of the State, for the reception of juvenile criminals. An act was passed almost without opposition, in accordance therewith, Trustees appointed, and \$15,000 appropriated to carry out the scheme. After mature deliberation, a farm of 500 acres was selected near Jamesburg, on an open, elevated, and gently rolling country, a building site chosen near the centre of the tract, and an additional appropriation of \$60,000 obtained from the State. The school was opened for the reception of inmates in the summer of 1867.

The writer was much interested in a recent visit to this institution. There were about 160 boys there, of whom some 10 were colored. In addition to the main building, there were two large dwellings, containing each a school-room, lodging rooms, &c. One of these was yet unfinished. The other was occupied by a man and his wife, who had in their family about 40 of the boys, who by their good conduct had been deemed worthy of being so favored. It is designed to extend these family arrangements, so as to bring more and more of the boys under a home-like influence. The rooms were light, well ventilated, and cheerful. The windows were not obstructed with bars and gratings, and there were no indications of physical restraint. The buildings were constructed, and the family arrangements made as in any ordinary boarding school. The personal influence of the officers, the restraining effect of regular discipline, the kind but firm treatment of the boys, and the comforts with which they were surrounded, appeared to be relied on, instead of bars and bolts, to prevent them from leaving the place. Occasionally, one of them becomes unsettled and runs away; but these cases are not numerous, and the absconding one is generally soon brought back. The great mass of the children probably live in much greater comfort and happiness than they enjoyed before coming to the institution, and they seem to regard it as their home and to identify themselves in measure with its interests.

Nearly all of the work of the farm, the care of the house, and much of the cooking is done by the boys. This furnishes employment for many of them. Others are engaged in caning chair seats, shoemaking and sewing. The time appropriated to school is about three hours a day.

It was late in the afternoon when we reached the place. One company of boys was working in the long lane that leads from the public road to the buildings. They had been cutting the grass on the road-side, gathering it up to be hauled to the barn, and giving the whole lane a neat and clean appearance. Others were hauling in hay from the more distant fields. They had already housed about 100 tons. On the play-grounds, a number were amusing themselves at base-ball, and others lying in groups on the ground conversing, or watching the players.

When supper-time came, all those on the play-ground formed into a line, and all the absentees were accounted for. Then at a given signal, the whole line faced towards the school building, and at a second signal each with regular and measured step, quietly moved onward. This systematic movement is carried out in all their collections and in changing from one room to another, and greatly helps in the prevention of confusion and the preservation of good order among so large a company.

The schools were taught by women, so far as we observed, though it is probable the superintendent and his assistant may help in them. The children are graded according to their degree of advancement.

When collected in the large room, prior to being dismissed to their beds, the first thing done is the reading of the reports from the different rooms, showing the marks for merit or demerit which have been earned during the day. These marks form an important item in the influences brought to bear on the chil-

dren, since their average represents the general character of the boy, and to some extent regulates the amount of privileges allowed him. On this occasion, one colored boy received 25 marks of merit, for being the best behaved boy in his class; others, a smaller number for especial proficiency in their lessons; and some had from 5 to 10 marks of demerit for lying, and tearing their clothes through carelessness or rough play. This is usually following by religious exercises of some kind. On the present occasion, the Superintendent, who had been absent for a few days, made a short speech expressing his gladness to see them once more, &c. A time of silence followed, after which some remarks of a religious nature were made.

Nothing like disorder or insubordination was witnessed during any part of our stay, and the general impression made upon us was decidedly favorable. When one considers the comparatively favorable situation in which these boys are placed, their opportunities for intellectual and moral improvement, the practical business training they receive, and the health-giving effect of open air and regular, abundant and simple food—and compares it with the former lot of the same class of children, shut up in the common jails in contact with hardened criminals; a feeling of satisfaction arises at the progress of reform in this direction, and of respect for those individuals whose persistent effort, thoughtful study and watchful care have brought the institution thus far on its path of usefulness.

Selected.

The following Poem is from the pen of Celia Thaxter, whose father had charge of the light-house on White Island, one of the Isles of Shoals, off New Hampshire. C. T. often assisted her father in lighting the lamps, and the poem alludes to the wreck of the brig Pochontas, lost on the neighboring shore.

I lit the lamps in the light-house tower,  
For the sun dropped down, and the day was dead,  
They shone like a glorious clustered flower,  
Ten golden and five red.

Looking across, where the line of coast  
Stretched darkly, shrinking away from the sea,  
The lights sprang out at its edge,—almost  
They seemed to answer me.

O warning lights, burn bright and clear,  
Hither the storm comes! Leagues away  
It moans and thunders low and drear,—  
Burn till the break of day!

Good night! I called to the gulls that sailed  
Slow past me thro' the evening sky;  
And my comrades, answering shrilly, hailed  
Me back with boding cry.

A mournful breeze began to blow,  
Weird music it drew thro' the iron bars,  
The sullen billows boiled below,  
And dimly peered the stars;

The sails that flecked the ocean floor  
From east to west, leaned low, and fled;  
They knew what came in the distant roar  
That filled the air with dread!

Flung by a fitful gust, there beat  
Against the window a dash of rain,  
Steady as tramp of marching feet  
Strode on the hurricane.

It smote the waves for a moment still,  
Level and deadly white for fear;  
The bare rock shuddered,—an awful thrill  
Shook even my tower of cheer.

Like all the demons loosed at last,  
Whistling and shrieking, wild and wide,  
The mad wind raged, and strong and fast  
Rolled in the rising tide.

And soon in ponderous showers the spray,  
Struck from the granite, reared and sprung,  
And clutched at tower and cottage grey,  
Where overwhelmed they clung

Half drowning, to the naked rock;  
But still burned on the faithful light,  
Nor flattered at the tempest's shock,  
Through all the fearful night.

Was it in vain? That knew not we,  
We seemed, in that confusion vast  
Of rushing wind, and roaring sea,  
One point whereon was cast

The whole Atlantic's weight of brine.  
Heaven help the ship should drift our way!  
No matter how the light might shine  
Far on into the day.

When morning dawned above the din  
Of gale and breaker, boomed a gun!  
Another! We who sat within,  
Answered with cries each one.

Into each other's eyes with fear  
We looked, thro' helpless tears, as still,  
One after one, near and more near,  
The signals pealed, until

The thick storm seemed to break apart,  
To show us, staggering to her grave,  
The fated brig. We had no heart  
To look, for naught could save!

One glimpse of black hull, heaving slow,  
Then closed the mists o'er canvass torn  
And tangled ropes, swept to and fro  
From masts that raked forlorn.

Weeks after, yet ringed round with spray,  
Our island lay, and none might land;  
Though blue the waters of the bay  
Stretched calm on either hand.

And when at last from the distant shore  
A little boat stole out to reach  
Our loneliness, and bring once more  
Fresh human thought and speech,

We told our tale, and the boatman cried  
"Twas the Pochontas,—all were lost!  
For miles along the coast the tide  
Her shattered timbers tost."

Then I looked the whole horizon round,—  
So beautiful the ocean spread  
About us, o'er those sailors drowned!  
"Father in Heaven," I said,

A child's grief struggling in my breast,  
"Do purposely thy creatures meet  
Such bitter death? How was it best  
These hearts should cease to beat?"

"O, wherefore! Are we naught to thee?  
Like senseless weeds that rise and fall  
Upon thine awful sea, are we  
No more then, after all?"

And I shut the beauty from my sight,  
For I thought of the dead that lay below;  
From the bright air faded the warmth and light,  
And there came a chill like snow.

Then I heard the far-off rote resound,  
Where the breakers slow and slumberous rolled,  
And a subtle sense of thought profound  
Touched me with power untold.

And like a voice eternal spake  
That wondrous rhythm, and "Peace be still,"  
It murmured; "bow thy head, and take  
Life's rapture and life's ill,

And wait. At last all shall be clear."  
The long, low, mellow music rose  
And fell, and soothed my dreaming ear  
With infinite repose.

Sighing, I climbed the light-house stair,  
Half forgetting my grief and pain;  
And while the day died, sweet and fair,  
I lit the lamps again.

It is of the Lord's mercies that we are not consumed, because his compassions fail not. They are new every morning; great is thy faithfulness.

*Ancient Ruins in Arizona.*—A letter to the *St. Louis Republican* gives the following interesting account of some ruins recently discovered in Arizona:

"A careful examination of extensive ruins, found some miles east of Florence, on the Gila River, has been made. Lieutenant Ward was the first explorer who came upon the desolate remains of a once imposing architectural pile. It has been deserted perhaps for more than a thousand years, and has been crumbling away in the wilderness. The Apache even never pitched his tent upon the spot so thickly strewn with fragments of the work of a perished race. The principal ruin is a parallelogram fortification, six hundred feet in width by sixteen hundred feet in length. The walls, which were built of stone, have long been overthrown and are overgrown by trees and vines. In many places a mere ridge indicates the line of the wall, the stones having disappeared beneath the surface. Within the inclosed area are the remains of a greater structure, 200 by 260 feet, constructed of roughly-hewn stones. In some places the walls remain almost perfect to a height of some twelve feet above the surface. On the east side of the *granda casa* there are two openings of an oval shape which doubtless served the purpose of windows. On the inner sides of the walls of the palace, for such it doubtless was, there are yet perfectly distinct tracings of the image of the sun. There are two towers, at the southeast and southwest corners of the great enclosures, still standing, one of which is twenty-six and the other thirty-one feet high. These have evidently been much higher, as the broken tops and the amount of debris near their base indicate. A few copper implements, some small golden ornaments—one being an image of the sun with a perforation in the middle—and some stone utensils, and two rudely-carved stone vases, much like those found at Zupetaro and Copan, in Central America, are all the works of art yet discovered. No excavations have been made as yet to determine fully the extent and character of these ruins.

"The ruins are situated in a small plain, elevated nearly two hundred feet above the bed of the Gila. Just west of the walls of the fortification there is a beautiful stream of water having its source in the mountains, which crosses the plain, and by a series of cataracts falls into the Gila about two miles below. The fragments of pottery and polished stone reveal a condition of civilization among the builders of these ruins analogous to that of the ancient Peruvian, Central American and Mexican nations. The country in the vicinity is particularly wild and unusually desolate. No clue to the builders of this great fortified palace, with its towers and moat, has been, or is likely ever to be discovered. One thing, however, is apparent, that this whole country was once peopled by a race having a higher grade of civilization than is found among any of the native tribes of the later ages. But whether this race were the ancestors of the Pimos, or some extinct people, is not, and cannot certainly be known. The ruins on the Gila are another uncovered Palenque, another Copan, an Atlan exposed at last to bewilder and confound. It is understood that these extensive ruins will be thoroughly explored within the present year."

Believers faith is more precious than gold.

### The Phenomena of Sleep.

Dr. Egbert Guernsey, in the Medical Union, thus discourses of sleep, from a physician's point of view.

How is sleep induced, and what is the condition of the brain during this period of rest which occupies nearly one-third of our lives, are questions not merely of curiosity but of real practical use. Either the nervous mass as a whole is quiescent, undisturbed by currents of nervous energy, or currents are still kept up, but at an even, unaltering pace. The latter conclusion seems the most plausible, and is more distinctly borne out by facts. The nervous system is seldom allowed to fall into entire somnolence, but however profound the slumber, the mind still seems to retain waking impressions, and is to a certain extent under their influence even in sleep. A person even very much fatigued, who has previously accustomed himself to that self-discipline, will fall into a deep and sound slumber, and yet wake up promptly at a time specified in his waking moments, notwithstanding he might have slumbered for hours had it not been for this act of the will. A gentleman, who in the prosecution of his business is obliged to travel constantly, taking the train at all hours, and catching his sleep when and where he can get it, informs me he never has any trouble, however much fatigued he may be, in waking at any specified time. Even without this strong exercise of the will power, the brain, however profoundly quiescent, is keenly alive to certain sounds, however oblivious it may be to others. The physician bears the first tap of his night-bell, though he might sleep on undisturbed while a band of music was playing in front of his windows, or the roar of the thunder or the crash of artillery was making the windows rattle and the bed tremble beneath him. The mother starts from her deep slumber at the first cry of her child, her ear quickly catching, however profound may be her sleep, almost its altered breathing.

It is said of a young man, a midshipman, wishing to commend himself to the commander, spent eighteen hours out of the twenty-four, in watching and recording the signals, only retiring to rest when utterly exhausted. Then his slumber was so profound that the loudest noise would produce no impression, but simply whisper in his ear the word "signal," and in an instant he was on his feet, wide awake and ready for duty. We are all familiar with a kind of waking sleep, in which a perfect stillness or some monotonous sound lulls us into a kind of semi-unconsciousness. Any disturbing element may rouse up the currents of nerve force into full activity, but without them consciousness gradually disappears, according as the nerve currents are unvaried in their degree, until sleep, more or less profound, is produced.

Facts such as we have stated are in favor of a certain low degree of nerve action as existing under every variety of state, from the light sleep to the most profound. On this hypothesis, when all the currents of the brain are equally balanced and continue at the same pitch, when no one is commencing, increasing or abating, consciousness or feeling is null and the mind is quiescent. A disturbance of this state of things wakens up the consciousness for a time; the variety of stimula in the waking state forbidding this perfect equilibrium from being attained. \* \* \* \* \*

Sleep is a positive necessity. It is a period

of recuperation, during which there is a restoration of what has suffered collapse, waste or disturbance during the period of waking activity. The tired brain and the aching muscles regain, by rest, strength and power to obey the mandates of the will. The demands of the material form for rest are so great as often to defy the action of the mind. During the cholera summer of 1849, while practicing in the country, so constant and fatiguing were my professional labors that I have often ridden for miles on horseback sound asleep. Almost every physician in active practice during periods of epidemics, when his strength was taxed to the utmost, has dropped into a sleep, as I have done many times, while walking in the streets.

During the battle of the Nile many of the boys engaged in handling ammunition fell asleep even while the roar of the battle was going on around them. It is said in the retreat to Corunna whole battalions of infantry slept while in rapid march. Even the most acute bodily sufferings are not always sufficient to prevent sleep. The worn-out frame of the victim of the Inquisition has yielded to its influence in the pause of his tortures upon the rack, and for a moment he has forgotten his sufferings. The Indian burned at the stake, in the interval between the preliminary torture and the lighting of the fire, has sweetly slumbered, and been only aroused by the flame which was to consume him curling around him.

*Three Good Lessons.*—"One of my first lessons," said Sturgis, the eminent merchant, "was in 1813, when I was eleven years old. My grandfather had a fine flock of sheep, which were carefully tended during the war of those times. I was the shepherd boy, and my business was to watch the sheep in the fields. A boy who was more fond of his book than the sheep was sent with me, but left the work to me, while he lay under the trees and read. I did not like that, and finally went to my grandfather and complained of it. I shall never forget the kind smile of the old gentleman as he said:

"Never mind, Jonathan, my boy; if you watch the sheep you will have the sheep."

"What does grandfather mean by that?" I said to myself. 'I don't expect to have sheep.' My desires were moderate, and a fine buck was worth a hundred dollars. I could not exactly make out in my mind what it was, but I had great confidence in him, for he was a judge, and had been to Congress in Washington's time; so I concluded it was all right, and I went back contentedly to the sheep. After I got into the field I could not keep his words out of my head. Then I thought of Sunday's lesson: 'Thou has been faithful over a few things; I will make thee ruler over many things.' I began to see through it. 'Never you mind who neglects his duty; be you faithful, and you will have your reward.'

"I received a second lesson soon after I came to New York as a clerk to the late Lyman Reed. A merchant from Ohio, who knew me, came to buy goods, and said: 'Make yourself so useful that they cannot do without you.' I took his meaning quicker than I did that of my grandfather.

"Well, I worked upon these two ideas until Lyman Reed offered me a partnership in the business. The first morning after the part-

nership was made known, James Geery, the old tea merchant, called to congratulate me, and he said: 'You are all right now. I have only one word of advice to give you. Be careful who you walk the streets with.' That was lesson number three.

And what valuable lessons they are! Fidelity in all things; do your best for your employers; carefulness about your associates. Let every boy take these lessons home and study them well. They are the foundation stones of character and honorable success.

For "The Friend."

### The Little Land of Appenzell.

(Concluded from page 386.)

Now came the question of releasing the tired Landamman of the previous year from office. The first application in order was that of the governing Landamman, Dr. Zürcher. The people voted directly thereupon; there was a strong division of sentiment, but the majority allowed him to resign. His place was therefore to be filled at once. The names of candidates were called out by the crowd. There were six in all; and as both the members of the Council were among them, the latter summoned six well known citizens upon the platform, to decide the election. The first vote reduced the number of candidates to two, and the voting was then repeated until one of these received an undoubted majority. Dr. Roth, of Teufen, was the fortunate man. As soon as the decision was announced several swords were held up in the crowd to indicate where the new governor was to be found. The musicians and pike men made a lane to him through the multitude, and he was conducted to the platform with the sound of fife and drum. He at once took his place between the swords, and made an address, which the people heard with uncovered heads. He did not yet, however, assume the black silk mantle which belongs to his office. He was a man of good presence, prompt, and self possessed in manner, and conducted the business of the day very successfully.

The election of the remaining members occupied much more time. All the five applicants were released from service, and with scarcely a dissenting hand; wherein I thought the people showed very good sense. The case of one of these officials, Euler, the treasurer, was rather hard. The law makes him personally responsible for every farthing which passes through his hands. Having, with the consent of the Council, invested thirty thousand francs in a banking-house at Rheineck, the failure of the house obliged him to pay this sum out of his own pocket. He did so, and then made preparations to leave the Canton in case his resignation was not accepted.

For most of the places, from ten to fourteen candidates were named, and when these were reduced to two, nearly equally balanced in popular favor, the voting became very spirited. The apparitor, who was chosen on account of his strength of voice, had hard work that day. The same formula must be repeated before every vote, in this wise: "Herr, Landamman, gentlemen, faithful and beloved fellow citizens and brethren of the Union, if it seems good to you to choose so-and-so as your treasurer for the coming year, so lift up your hands!" Then, all over the dark mass, thousands of hands flew into the sunshine, rested a moment, and gradually sank, with a fluttering motion, which made me think of leaves flying

from a hill side forest in the autumn winds. As each election was decided, and the choice was announced, swords were lifted up to show the location of the new official in the crowd, and he was then brought upon the platform, with fife and drum. Nearly two hours elapsed before the gaps were filled, and the government was again complete.

Then followed the election of judges for the judicial districts, who in most cases were almost unanimously re-elected. These are repeated from year to year, so long as the people are satisfied. Nearly all the citizens of Outer Rhoden were before me; I could distinctly see three-fourths of their faces, and I detected no expression except that of a grave conscientious interest in the proceedings. Their patience was remarkable. Closely packed, man against man, in the hot, still sunshine, they stood quietly for nearly three hours, and voted two hundred and seven times before the business of the day was completed. A few old men on the edges of the crowd slipped away for a quarter of an hour, and some of the younger fellows also, but they generally returned and resumed their places as soon as refreshed.

The close of the Landsgemeinde was one of the most impressive spectacles I ever witnessed. When the elections were over, and no further duty remained, the Pastor Etter of Hundroyl ascended the platform. The governing Landamman assumed his black mantle of office, and after a brief prayer, took the oath of inauguration from the clergyman. He swore to further the prosperity and honor of the land, to ward off misfortune from it, to uphold the constitution and laws, to protect the widows and orphans, and to secure the equal rights of all, nor through favor, hostility, gifts or promises, to be turned aside from doing the same. The clergyman repeated the oath, sentence by sentence, both holding up the oath-fingers of the right hand, the people looking on, silent and uncovered.

The governing Landamman now turned to the assembly, and read them their oath, that they likewise should further the honor and prosperity of the land, preserve its freedom and its equal rights, obey the laws, protect the council and the judges, take no gift or favor from any prince or potentate, and that each one should accept and perform, to the best of his ability, any service to which he might be chosen. After this had been read, the Landamman lifted his right hand, with the oath-fingers extended; his colleagues on the platform, and every man of the ten or eleven thousand present did the same. The silence was so profound that the chirp of a bird on the hill side took entire possession of the air. Then the Landamman slowly and solemnly spoke these words: "I have well understood that—which has been read to me;—I will always and exactly observe it,—faithfully and without reservation,—so truly as I wish and pray—that God help me!" At each pause, the same words were repeated by every man, in a low, subdued tone. The hush was so complete, the words were spoken with such measured firmness, that I caught each as it came, not as from the lips of men, but from a vast supernatural murmur in the air. The effect was indescribable. Far off on the horizon was the white vision of an Alp, but all the hidden majesty of those supreme mountains was as nothing to the scene before me. When the last words had been spoken, the

hands sank slowly, and the crowd stood a moment locked together, with grave faces and gleaming eyes, until the feeling that had descended upon them passed. Then they dissolved; the Landsgemeinde was over. \* \* \*

Since the business was over, I judged that the people would be less reserved—which indeed was the case. Nearly all with whom I spoke, expressed their satisfaction with the day's work. I walked through the crowds in all directions, vainly seeking for personal beauty. There were few women present, but I was surprised at the great proportion of undersized men; only weaving in close rooms, for several generations, could have produced so many squat bodies and short legs. The Appenzellers are neither a handsome nor a picturesque race, and their language harmonizes with their features; but I learned, during that day at Hundroyl, to like and respect them.

The people of each parish, I learned, elect their own pastor, and pay him his salary. In municipal matters, the same democratic system prevails as in the Cantonal government. Education is well provided for, and the morals of the community are watched and guarded by a committee, consisting of the pastor and two officials elected by the people. Outer-Rhoden is almost exclusively Protestant, while Inner-Rhoden—the mountain region around the Sents—is Catholic. Although thus geographically and politically connected, there was formerly little intercourse between the inhabitants of the two parts of the Canton, owing to their religious differences; but now they come together in a friendly way, and are beginning to intermarry.

Taking a weaver of the place as guide, I set off early the next morning for the village of Appenzell, the capital of Inner-Rhoden. The way led me back into the valley of the Sitter, thence up towards the Sents Alp, winding around and over a multitude of hills. The same smooth, even, velvety carpet of grass was spread upon the landscape, covering every undulation of the surface, except where the rocks had frayed themselves through. There is no greener land upon the earth. The grass, from centuries of cultivation, has become so rich and nutritious, that the inhabitants can no longer spare even a little patch of ground for a vegetable garden, for the reason that the same space produces more profit in hay. The green comes up to their very doors, and they grudge even the foot-paths which connect them with their neighbors. Their vegetables are brought up from the lower valleys of Thurgau. The first mowing had commenced at the time of my visit, and the farmers were employing irrigation and manure to bring on the second crop. By this means they are enabled to mow the same fields every five or six weeks. The process gives the whole region a smoothness, a mellow splendor of color, such as I never saw elsewhere, not even in England. \* \* \*

Early in May the herdsmen leave their winter homes in the valleys, and go with their cattle to the lofty mountain pastures. The most intelligent cows, selected as leaders for the herd, march, in advance, with enormous bells, sometimes a foot in diameter, suspended to their necks by bands of embroidered leather; then follow the others, and the bull, who, singularly enough, carries the milking pail garlanded with flowers, between his horns, brings up the rear."

The Appenzeller goes joyously up to his summer labor and makes his herb-cheese on the heights, while his wife weaves and embroiders muslin in the valley until his return.

*Rushing to Death.*—Returning from an enjoyable trip to the country, accompanied by a lady friend, we had the misfortune to lose the train, arriving at the depot just in time to see it moving off; whereupon my friend, with an agility which might have delighted me under other circumstances, risked her life by attempting to spring on the steps of the rear car. Perhaps her leap might have ended successfully; perhaps life or limb been endangered; but I frustrated the rash attempt and edified her with a moral lecture concerning the suicide while we waited for the next train. I think that it is better to lose twenty minutes, or even half an hour, than to risk a life; yet we everywhere read of people who run these fearful risks too often unsuccessfully. Very recently a distinguished graduate of a Virginia university wanted to deposit a letter in the post-office on the other side of the railroad track. A locomotive was approaching, he thought he could cross before the ponderous engine could come along. He miscalculated the speed. In another moment he was a shapeless mass. Had he waited two minutes—half a minute—the train would have passed along, and he could have deposited his letter. A young lady wished to show her friends how easily she could cross in front of a locomotive; she did cross, but her streaming dress caught in the passing wheels, drawing her back under its crushing weight.

One day a young wife looked from her chamber-window and saw her husband leave the cars, which daily passed her home. She ran down the stairs to greet him at the door, but when she reached it he was not there. She thought he was playing her a little trick; she called for him playfully, but there was no answer. She saw a crowd of men approach the gate, open it, come up the path with her dead husband. He did alight from the cars and safely step upon the platform before the station. There was a train in an opposite direction; he thought he had plenty of time to cross in front of it, and did cross except by one single inch; the wheel struck the heel of his boot, wheeled him around under the cars, and all was over; one minute longer and he could have crossed with the locomotive behind him. Limbs are broken, lives are lost every year, in any large city, by attempting to cross in front of moving horses or vehicles. And all this foolhardy daring that a few moments of time may be saved.—*N. A. and U. S. Gazette.*

*Gospel Love.*—Oh, that every awakened soul would daily seek after the sweet influences of gospel love! It sweetens society; it begets its likeness in others; it excites gratitude; and even if bestowed on the ungrateful (as saith our dear Redeemer, love's holy and exhaustless fountain, the rain falls on the just and on the unjust,) it brings its own sweet reward with it; for it attracts the approbation of God. Where then will be contempt? where the indulgence of evil surmisings and hard thoughts? where, either studied or careless, detraction? where, even the needless disclosure of real failings? where the least place for any enmity?

*The Hermit Bird.*—Francis Leguat, flying from France with a Protestant party, came in 1691 to the Island of Rodriguez, till then unexplored, and lived there two years. The story of our compatriot's "Travels and Adventures" has been published; we find in it the description of the fine bird called by him the hermit (*Pezophaps solitarius*). Of all the birds in Rodriguez Island, Leguat says this is the most remarkable species. The males are variously feathered with gray and brown, with the feet of a turkey, and the bill shaped like a turkey's also, but a little more hooked. They are almost tailless, and their rump is rounded and covered with feathers, higher on the legs than the turkey; they have a straight and rather long neck, a black sparkling eye, and a head without crest or tuft. The female, our traveller says, is admirably beautiful; there are blondes and brunettes among them, marked on the forehead with a stripe like a widow's band, and on the breast with plumage whiter than the rest of the body. They walk with such a mingling of pride and gracefulness that one cannot avoid admiring and loving them, so that their good looks often saves their lives. Not a feather lies uneven on their whole body, such pains do they take to smooth and arrange their plumage with their bills. These hermit-birds do not fly; they only use their wings, which are too small to bear the weight of the body, either in fighting or drumming when calling each other. Leguat adds that they are taken with great difficulty in the woods; but in open places it is easy to run them down, as they are not very swift.

From March to September they are extremely fat, and the taste, especially of the young ones, excellent. Some among the males are found weighing forty-five pounds. These birds, intending to build a nest, choose a clear spot, collect a few palm leaves, and raise the structure a foot and a half above the surface; they hatch but one egg at a time, and the male and female sit alternately during seven weeks, the period of incubation, and for some months longer the young bird needs assistance from the old ones. These beautiful birds, called hermits because they seldom go in flocks, were abundant in the island at the end of the 17th century, when the French naturalist expressed such admiration for them. In a few years they have all perished, and nothing but bones crusted with stalagmite permitted us to ascertain that the species described by Leguat was of a kind unknown elsewhere. When an English explorer, Newton, undertook to examine the caves and boggy lands of the island, more than 2000 fragments, the last traces of the extinct bird, were collected.

The study of these relics was made with the greatest care, and we now know that the hermit-bird represented a special type, having close affinities with the dodo and the pigeon. A singular detail leads us to place full reliance on Leguat's observations. Our traveller had said, in speaking of the males of this bird: "The wing of the pinion thickens at its end, and forms a little round mass like a musket ball under the feathers, this, with the bill, is the bird's chief defence." This little round mass has been found in the shape of a bony prominence on that part of the limb called the metacarpus.—*Popular Science Monthly.*

The testimony of our Society to a simple, useful and not expensive manner of dressing

and living, is grounded in the Truth, and innovations will never be able to sap the foundation, or overthrow it.—*H. Hall.*

*Underground London.*—Underground the city of London is certainly the most wonderful in the world. It is a labyrinth of drain-pipes, water-pipes, gas-pipes and underground railways. There are points in the soil of London where it would be extremely difficult to find room for another pipe. One company alone—the Gas-light and Coke Company—supplies two districts with nearly four hundred miles of pipes, varying in diameter from three inches to four feet. These are the main pipes merely, and from them every house and street lamp receives on an average six or eight feet of small piping. In addition to these, and the underground telegraph wires, there are no less than twenty-five hundred miles of drain pipes of various dimensions. Less familiar to us, but no less important, are the lead and iron tubes—leaden pipes with outer casings of iron—along which written messages, packed in gutta percha cases, are blown from station to station. The convenience of these messages is immense. A steam-engine forces in a blast of air, and in about a minute it travels a distance of nine hundred and eighty yards. There are at present thirteen stations on the underground railway; and as the people walk upon the streets of London electricity is flashing messages above their heads, and little missives are whizzing and darting just under their feet. As many as fifteen hundred messages pass to and fro in a day. The drainage system of London presents a world of underground streets, some two or three thousand miles in extent. All the drains empty into three great sewers running parallel with the Thames, which sewers connect in the neighborhood of Victoria Park, and through Barking creek discharge into the river. Men are constantly employed keeping these drains in repair. Londoners never pour a pail of water down a drain but at the depths of that mysterious aperture somebody is making way for it. A stranger, properly costumed, can explore these depths, which resemble vaulted galleries, in the sides of which are traps forming various small channels. When the storm waters come, as they sometimes do during a thunder-plump, the torrent is fearful—so much so that upon several occasions men have lost their lives.—*Late Paper.*

## THE FRIEND.

EIGHTH MONTH 1, 1874.

We find in the number of *The British Friend* for 7th month, the following editorial remarks on the proceedings of the late London Yearly Meeting. We welcome it as a testimony to the spiritual character of the worship enjoined by our Saviour, and preached in later times by George Fox and his true successors in the church. We believe there is need for this testimony to be repeatedly held up to the view of many, who are in danger of substituting for it, or mingling with it, such outward performances as may interest the intellect, or excite the emotional feelings, and thus relieve them of that patient waiting for the spirit of Christ to operate on their hearts, which has become irksome to many superficial professors. Without this inwardness of spirit is

maintained, we are in danger of running without being sent, and of warming ourselves with sparks of our own kindling—the end of which is sorrow. The feeling of religious exercise, which only qualifies to enter into public labor for the good of others, is one that is not at our own command. He who has been rightly taught in the school of Christ, even though he may often have been commissioned to speak to the people, will endeavor on every such occasion to wait on his Divine Master for spiritual food for himself or others; and he will not venture to break the silence of a meeting, unless he is sensible that the Heavenly Shepherd breaks the bread and gives it to him to hand forth to the people. As our worthy elder, George Fox, declared: "The intent of all speaking is to bring into the life, and to walk in, and to possess the same, and to live in and enjoy it, and to feel God's presence, and that is in the silence, (not in the wandering, whirling, tempestuous part of man or woman) for there is the flock lying down at noon-day, and feeding of the bread of life, and drinking at the springs of life, when they do not speak words; for words declared are to bring people to it, and confessing God's goodness and love, as they are moved by the eternal God and His Spirit."

The remarks referred to are as follows:—

"There has always been and there still is a liberty to read a portion of Scripture in meetings for worship, just the same as there is a liberty for any one rightly called and qualified to speak as a minister—that is, under the leading and guiding of the Head of the Church, through the Spirit. But we submit there is no authority for making reading a necessary and formal part of a meeting for worship. The principle of Friends, as we conceive, is this—to come together to wait upon the Lord, and to be led according to His will both as to silence and utterance, neither predetermined to be silent, read, or to speak. There is no question that acceptable worship may arise at other times—in family or individual silent retirement, or in social Scripture reading—but it is to be specially borne in mind, in considering this subject, that the Society of Friends has a special testimony to uphold before the Christian world to the spiritual nature of Gospel worship, as opposed to all merely human contrivances and formal exercises, whether reading or lecturing on Scripture, preaching, praying, or singing.

"A number of Friends objected to the recommendation in the Conference Report respecting First-day Morning Meetings, since the 'liberty,' spoken of was equally available in these as in afternoon or evening meetings. But we apprehend this liberty was never used at any period in the Society's history in the way now desired by some, viz, the reading of Scripture as a formal and necessary part of public worship. Those who advocate this course cannot assume a higher veneration for the inspired records than those who are opposed to it, because the latter are favorable to the reading of Scripture on all suitable occasions, both private and public, provided simply that it does not contravene the testimony to the spirituality of worship as heretofore held by Friends.

"After a very full expression of opinion, a minute was made to the effect that the meeting did not adopt the recommendation of the Conference in regard to the manner of holding meetings for worship; that, while pro-

nouncing no opinion on the practice in some localities of Scripture reading in these meetings, and being unwilling to interfere with any liberty *rightly* enjoyed amongst us, an earnest concern had prevailed that this liberty should be exercised in connection with a faithful upholding of the Society's Scriptural testimony to the nature of pure spiritual worship under the Gospel dispensation.

"We doubt not, it would have been more satisfactory had the minute defined the liberty which was so much contended for, there being reason to fear its being supposed that, provided Friends are only pretty unanimous in any place, they are left to do as they choose. Unanimity is good, but not in every case; people may be unanimous in what is wrong, as well as in what is right."

#### SUMMARY OF EVENTS.

**FOREIGN.**—The Committee of the Agricultural Laborer's Union advise the locked-out laborers in the eastern counties of England to emigrate. The committee is negotiating for easier terms of emigration to Canada.

The estimated value of all the diamonds which have been taken from the diamond fields of South Africa during the last three years, does not fall far short of \$50,000,000. Many of the gems are of inferior quality. The value of diamonds in the European market has been greatly depreciated by the great number sent from the Cape of Good Hope.

In the House of Lords Earl Russell asked whether the government had made any remonstrance to France against the connivance of her authorities in violations of the Spanish frontier by the Carlists. He also urged the formal recognition of the Spanish government by Great Britain. Lord Derby replied that Spain had not asked England to interfere. He considered the recognition of the Spanish government at present premature. When the time arrived it would be better that such recognition should be the collective act of the European powers.

In the House of Commons, Disraeli moved an annual grant to Prince Leopold of \$75,000. Gladstone seconded the motion, which was adopted almost unanimously. The annual payments to Queen Victoria and her children aggregate \$3,091,745, beside which the Queen has an income of several hundred thousand dollars from other sources.

London, 7th mo. 27th.—Consols 92½. U. S. 5 per cents, 104½ a 105½.

Liverpool.—Uplands cotton, 8½ a 8¼d.; Orleans, 3¾d. A Vienna dispatch gives an account of a fearful storm in Moravia, in which the town of Azagra was overwhelmed by a torrent and many of the inhabitants perished.

The International Congress convened in Brussels the 27th ult., and decided that its sittings should be held with closed doors.

Dispatches from Kissingen state that the wound of Bismarck is still unhealed, but his health was improving. He is unable to write.

The Bishop of Posen has been arrested for violation of the ecclesiastical laws, and condemned to fifteen months imprisonment.

A Berlin dispatch says: Marshall Jewell, the newly appointed Postmaster General of the United States, has arrived here on his way home. He is engaged in inspecting the German postal service, and says he finds some arrangements which may be applied with advantage to the American postal system. He leaves shortly for Paris.

The North German Gazette says, the German squadron now off Rye, England, has been ordered to cruise off the northern coast of Spain, and that these orders were given in consequence of the shooting of Captain Schmidt, a German newspaper correspondent, and other German subjects by the Carlists. The Daily Telegraph's special from Berlin says it is reported that the German Government is making strenuous endeavors to stop supplies, weapons and money to the Carlists, and has called the attention of the Versailles Government to the subject.

The dispatches from India say that the prospect of the crops is favorable notwithstanding the recent floods. Many deaths from cholera are reported in Baridnap.

A recent article in the *Imparcial*, of Madrid, favoring an Iberian union, has developed the existence of a

strong opposition to that project in Portugal. Lisbon advices state that the article of the *Imparcial* was received there with the greatest disfavor.

Don Carlos has issued a manifesto guaranteeing toleration, engaging not to disturb the sales of church property at present completed, promising representative but not revolutionary government, undertaking to restore the finances of the country, and insuring liberty so far as it is consistent with order.

The Carlists did not effect the capture of Cuenca without a severe struggle. They report their losses at 150 men killed and 700 wounded. After the town was taken they sacked and burned many houses, levied heavy contributions and destroyed the fortifications. The volunteers who surrendered were decimated, and every tenth man was put to death.

According to Madrid dispatches the Carlists have suffered severely in several recent encounters with the government forces.

It is anticipated that the French budget will occupy the Assembly until 8th mo. 8th, at which time the House will adjourn for more than three months.

The Deputies in favor of dissolution are confident of success after the recess, as their opponents now control only a bare majority of the Assembly. The Committee of Thirty have adopted, and the government has accepted, the proposition of Pages-Dupont, introduced in the Assembly on the 15th ult., for the creation of a Senate, which provides that the Senate shall consist of 100 members nominated by the President, and 130 selected from and by the Assembly; cardinals, marshals and admirals to be members *ex-officio*; also that the President of the Senate shall become Provisional President of the Republic in the event of a vacancy, and that the President of the Republic be empowered to dissolve the Assembly with the approval of the Senate. It is not however supposed that this or any other bill making constitutional changes can be adopted by the Assembly as it is now constituted.

**UNITED STATES.**—The interments in New York for the week ending the 25th ult., numbered 873, and in Philadelphia 469, including 154 of cholera infantum. This great increase of mortality is attributed to the heat, which has been attended with the usual summer diseases cholera infantum, cholera morbus, &c.

In the week ending the 18th ult., the total of anthracite and bituminous coal sent to market was 318,964 tons, and for the year 11,559,858 tons, against 11,833,096 tons to the same time last year, being a decrease of 323,318 tons.

The 27th anniversary of the arrival of the Mormons in Utah, was celebrated at Salt Lake City the 25th ult. The great Tabernacle was crowded, there being, it is stated, 10,000 school children in the body of the building, and 3000 spectators in the galleries.

A water-spout burst in Nevada on the 24th ult., destroying considerable property in the town of Eureka, and causing the death of from 25 to 30 persons. The same deluge of water wrecked an emigrant train on the Central Pacific Railroad. The track was washed away and five passengers lost their lives.

On the 22d ult. another fire in Chicago destroyed property to the value of \$250,000.

It appears from returns to the Department of Agriculture, that an increase in the area cultivated in Indian corn is apparent of fully 2,000,000 acres. The increase is chiefly in the South and West.

Returns received from all parts of Minnesota show that the grasshoppers have already destroyed about 1,500,000 bushels of wheat, and may probably destroy another half million.

The U. S. Secretary of the Treasury has received proposals for the balance of the 5 per cent. funded loan. The total amount of formal bids was \$76,000,000; but many of them did not conform to the Treasury circular or had conditions which made them inadmissible. Bids were accepted for \$10,118,550, chiefly for home investment. It is supposed some of the others will be modified to meet the requirements of the circular.

Pittsburg dispatches of the 27th ult. state that a tremendous rain storm, the previous night, had caused great destruction of property and loss of life, in and near that city. The deluge of rain which fell caused a rapid rise of all the streams, converting rills into rivers, and sweeping away houses with all their inhabitants. The total loss of life had not been ascertained. At Butcher's run and Allegheny City, it is stated that 219 persons were drowned.

**The Markets, &c.**—The following were the quotations 7th mo. 27th. *New York.*—American gold, 109½. U. S. sixes, 1881, registered, 117; coupons, 118½; do. 1868, registered, 116; coupon, 118; do. 10-40 5 per cents, 112½ a 113½. Superfine flour, \$4.85 a \$5.15; State extra, \$5.55 a \$6; finer brands, \$6.50 a \$9.20.

No. 1 Chicago spring wheat, \$1.34; No. 2 do., \$1.29 a \$1.30; red western, \$1.32; amber, \$1.36; white Kentucky, \$1.50. Oats, 68 a 75 cts. Rye, 96 a 98 cts. Western mixed corn, 79 a 80 cts.; yellow, 80 a 80½ cts.; white, 90 cts. *Philadelphia.*—Cotton, 17¼ a 17½ cts. for uplands and New Orleans. Superfine flour, \$3 50 a \$4; extras, \$4 a \$4.50; finer brands, \$5 a \$9.50. No. 1 spring wheat, \$1.30; white spring, \$1.35; amber wheat, \$1.45 a \$1.50; Western red, \$1.25 a \$1.37. Rye, \$1.04. Yellow corn, 83 a 84 cts. Oats, 70 a 79 cts. Lard, 12½ a 12¾ cts. Clover-seed, 10 a 11 cts. The receipts of beef cattle were large, reaching about 3500 head. The market in consequence was dull and prices lower. Sales of fair and extra at 6½ a 7¼ cts. per lb. gross, and common 4 a 6 cts. Sheep sold at 5½ a 5¾ cts. per lb. gross. Receipts, 16,000 head. About 4500 hogs sold at \$10 a \$10.25 per 100 lbs. net for corn fed. *Chicago.*—No. 1 spring wheat, \$1.11½; No. 2 do., \$1.08. No. 3 do., \$1.01 a \$1.02. No. 2 mixed corn, 63 cts. No. 2 oats, 47 cts. Rye, 90 cts. Barley, \$1.05. Lard, \$11.90 per 100 lbs. *Baltimore.*—Choice white wheat, \$1.40 a \$1.45; good to prime red, \$1.30 a \$1.38; Ohio and Indiana, \$1.20 a \$1.30. Oats, 55 a 58 cts. *St. Louis.*—Choice fall wheat, \$1.20 a \$1.25; medium, \$1.08 a \$1.10. Corn, 62 cts. Oats, 40 a 41 cts.

#### WANTED.

A suitable Friend to fill the station of Governess at Westtown Boarding School. Apply to Elizabeth C. Scattergood, West Chester, Pa. Lydia L. Walton, Moorestown, N. J. Hannah Evans, 322 Union St., Philadelphia.

#### WANTED.

A suitable Friend to take the position of Writing Teacher and Assistant Governor at Westtown Boarding School—for next Session. Apply to Charles Evans, 702 Race street, Philadelphia, Clarkson Sheppard, Greenwich, New Jersey, Joseph Walton, Moorestown, New Jersey.

#### SHELTER FOR COLORED ORPHANS.

Wanted, by the 1st of 10th mo. next, a suitable Friend for Matron for the above institution.

Application may be made to Hannah R. Newbold, 643 Franklin St. Mary Wood, 524 South Second St. Mary Randolph, 247 North Twelfth St. Anna W. Lippincott, 460 North Seventh St.

#### WANTED.

An unmarried Friend to take the position of Governor at Westtown Boarding School, on or before the close of the present session, in the 10th month next.

Apply to Clarkson Sheppard, Greenwich, New Jersey, Joseph Walton, Moorestown, " Charles Evans, 702 Race street, Philadelphia.

#### HAVERFORD COLLEGE.

The next Term will commence on Fourth-day, 9th mo. 2nd, 1874. Applications for admissions should be addressed to SAMUEL J. GUMMERE, *President*, Haverford College, Montgomery Co., Pa.

#### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

DIED, at the residence of his son, in Perry City, Schuylers Co., New York, on the 14th ult., JOSEPH TRIPP, in the eighty-ninth year of his age, a minister in the Society of Friends from early life.

—, on the 15th of 7th mo., at her residence in Chester Co., Pa., SALLIE E., wife of Abiah Cope, and daughter of William and Margaretta Windle, in the 28th year of her age, a member of New Garden Monthly and West Grove Particular Meeting. This dear young Friend possessed a loving and cheerful disposition, which greatly endeared her to her family and friends, to whom she was strongly attached; but by submission to the sanctifying operations of Divine Grace in her heart, she was enabled to resign all into the hands of her Heavenly Father, and to experience a preparation for an entrance into the Heavenly City, of which a blessed foretaste was mercifully given her.

WILLIAM H. PILE, PRINTER.

No. 422 Walnut Street.

# THE FRIEND.

A RELIGIOUS AND LITERARY JOURNAL.

VOL. XLVII.

SEVENTH-DAY, EIGHTH MONTH 8, 1874.

NO. 51.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,  
PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

## Star-Drift.

(Continued from page 394.)

Of all the discoveries effected by Sir W. Herschel, none gave greater evidence of his skill in dealing with observed facts than his discovery that the solar system is sweeping onwards with enormous velocity through intersidereal space. The problem had been attacked a year or two before by an eminent German astronomer without success. Mayer had, indeed, announced definitively that the stellar motions afford no evidence to countenance the view that our sun is speeding through space. No other evidence lay before Herschel than Mayer had possessed, nor was there any flaw in Mayer's mode of reasoning. Undoubtedly the full evidence which Herschel had to deal with was unfavorable to the idea of solar motion. But no one knew better than Sir William Herschel that in questions of this sort old Hesiod's proverb is applicable, that "Half is often more than the whole." By throwing aside half the evidence, though that evidence already seemed sufficiently meagre, he deduced a result which all the exact and recon-dite processes of recent inquiry have scarcely been able to improve upon. He pointed to a certain region among the stars as that towards which our Sun is travelling, and around that region all the best determinations of modern times have ranged themselves.

The only evidence we can have respecting the movements of the Sun is that to be derived from the apparent motions of the objects which surround him. There is no irregularity in his stately progress through space to impress upon us who move with him the fact that he is not at rest. But the stars which lie on all sides around his path, must be affected with apparent motions unless they travel with him, not only in the same direction, but at equal speed. To the unaided eye no signs of stellar motion are apparent. There are not, indeed, ten stars in the heavens whose motion in a thousand years would cover an arc that the naked eye could estimate. But the skilfully constructed instruments in use in modern observatories enable the astronomer to measure even the seemingly evanescent movements of the so-called fixed stars. In ten years, or in twenty, no change in position

may be apparent; but when the observations of our day come to be compared with those which were made a hundred years ago, the traces of stellar motion become in many instances unmistakable.

Our Sun, sweeping ever onwards through space, tells us of a great law of motion to which his fellow-suns also must be subject. He is but one among many, when viewed in relation to the galactic system. Nay, it is doubtful even whether among the suns which shine upon us from beyond the vast domain over which our own Sun bears sway, there be not many which as far surpass him in magnitude as the giant members of the solar scheme—Uranus and Neptune, Saturn and Jupiter—surpass our tiny Earth and its fellows among the minor planets. Nor is there aught in the Sun's position to lead us to ascribe to him alone swift motion throughout space. That, as we view the galaxy, he seems to occupy a central position is true enough; but it is conceivable, if not certain, that there is not a single sun among all the stars which deck our skies, from which the same sort of scene is not visible as that which is presented to the inhabitants of our Earth.

And this is not all. The very evidence Sir William Herschel had made use of proved that our Sun is not the sole moving star of the galaxy. Had he been able, by assigning a certain direction to the Sun's motion, to have accounted for the motions of all the stars his processes dealt with, he might then indeed have inferred the possibility that those stars at least are at rest. But this was not the case. The direction he assigned to the Sun's motion was that which accounted best for the stars' motions, not that which explained them fully. The balance of motion which remained unaccounted for could be explained only by supposing that the stars Herschel had considered were themselves sweeping rapidly through space. This view was directly involved in the statements Sir William Herschel laid before the scientific world.

If the Sun is moving now in a definite direction, it can by no means be inferred that this motion will always continue to be directed towards the same region of space. All the analogies which surround us teach us to believe rather that his path is of the nature of a gigantic curve re-entering into itself mayhap like the planetary orbits, or possibly of a complex figure, resembling the paths of those comets which belong indeed to the solar scheme, but are swayed continually into new orbits by the attractions of the larger planets. Whichever of these views is correct, it is certain that the part of his path which the Sun is at present describing, must be looked upon as a portion of a gigantic circle. For, no matter what the figure of an orbit may be, any small portion of the curve may always be regarded as belonging to some definite circle. And astronomers have set themselves to inquire into the nature of the vast circle on

which, for present purposes, we are to regard the Sun as travelling.

The ingenious German astronomer Mädler, by a process of inquiry into which I need not here enter, has been led to regard the star Aleyone, the "brilliant" of the Pleiades, as the true centre of the Sun's motion.

Here then, if his assumptions were correct, we were to recognize the central orb of the sidereal scheme; not indeed, the central orb in the sense which our Sun is the central orb of the solar scheme; not a globe which, by its magnitude, could be held to sway the motions of all the stars which lie around it. Aleyone, according to Mädler's theory, is simply the star which occupies the centre of the sidereal scheme, but without rule or governance over its fellow-stars.

These speculations of Mädler's form, I believe, the sole attempt which has yet been made to co-ordinate the motions of the stars into one systematic whole. They have not been looked upon as successful, nor has the consideration of the subject led astronomers to believe that the problem Mädler attacked is one which can be mastered in the present state of our knowledge.

As the apparent motions of the stars were examined with greater and greater care, it became more and more evident that every star is rushing swiftly through space; for, although every fresh determination of the nature of the Sun's motion showed a general agreement with Herschel's result, yet there was a sufficient divergence to prove that some causes other than variations in the method of calculation are at work in causing the discordance.

But it is only in comparatively recent times that it has been shown demonstratively, how largely the apparent motions of the stars are due to the real movements of these bodies in space. Mr. Airy argued that, if we are to obtain a really conclusive answer to the great question of the Sun's motion in space, we must remember that the stellar motions, though apparently taking place upon the celestial sphere, have really no relation at all to that imaginary surface. We must look upon them, he said, as taking place in reality in space, and apply to them the mathematical processes which result from that consideration.

The point towards which the Sun was found to be moving, accorded most satisfactorily with the results which had been obtained by other methods. The rate assigned to the solar motion was also in close accordance with that which the younger Struve had obtained by a different process. It appears from the researches of Otto Struve on the one part, and those of the Astronomer Royal and Mr. Dunkin on the other, that the Sun is moving at the rate of about a hundred and fifty millions of miles per annum. Although this velocity seems enormous, it is in reality smaller than the velocities we notice in many parts of the solar system. Our own Earth moves more

than three times as fast in her orbit, as the Sun on his path through space. Indeed, the diameter of the Earth's orbit is thirty millions of miles greater than the distance annually traversed by the Sun.

In some regions large groups of stars are seen to be drifting bodily in a definite direction. The most remarkable instance of this sort occurs in the stars which form the constellations Gemini and Cancer. All these, amounting in number to seventy or eighty, are drifting towards the neighboring part of the Milky Way, with the exception of three stars, which seem to belong to another system.

Of the seven bright stars in the Great Bear, five are travelling in a common direction with uniform velocity. The other two are travelling in another direction and also with a common velocity. We cannot doubt that the first five, at any rate, form a system, drifting along bodily. For let us sum up the evidence. First, we have the comparatively weak evidence derived from the general equality of the five stars, a peculiarity which has in all ages led observant men to entertain the impression that these stars are in some way associated. Next, we have the fact that the five stars are travelling in the same apparent direction, and the significance of this point it is easy to estimate, because the antecedent probability that, taking the direction of one star of the five as a standard of reference, the other four would be found to be travelling in the same direction, is demonstrably minute. Lastly, we have the evidence derived from the equality of the motions of the five stars, and here again the antecedent probability of the coincidence is so minute as to force upon us the opinion that the actual coincidence is not accidental. The combination of the three lines of evidence leads to a feeling of absolute certainty that the five stars are associated into a single scheme or system.

That this whole system revolves around its centre of gravity is of course certain. But there are numberless ways in which the revolution may take place, depending on the relations between the weight and velocity of the different orbs forming the system. Any two of the five may really form a pair, any three may form a triplet. We cannot tell where the centre of gravity of the scheme may be. We have no knowledge of the true relative positions of the five orbs. We cannot guess what the real direction of their orbital motions may be. We are, in fact, altogether in doubt on every subject connected with the system, except the main fact that the whole system has a drift carrying it bodily forwards at the rate of many millions of miles per annum. It is in this connection that the appearance of such systems as these in the heavens, seems to me so interesting—I may almost say, so imposing a phenomenon. The life of man is a period too short to tell us anything even of the subordinate motions of such a scheme; but the duration of the human race, nay, of the solar system itself, may be outlasted by a single revolution of the great star-system placed out yonder in the celestial depths. From the far-off times of the Chaldean shepherds the great Septentrion star-system has looked down with seemingly unchanging aspect on the rise and fall of many nations and races of men. When the human race has perished from this globe, when the earth has become what the moon now is, a

scene of utter barrenness and desolation, the star-system will doubtless have exhibited many changes. But only when millions of æons have passed, and the earth is nearing the scene of its final absorption beneath the solar oceans, will the stately motions of the star-system have begun to work out the full series of cyclic changes appertaining to a scheme so extensive and so complicated.

But the star-drift in Ursa Major is only one instance out of many. Looking more closely than we have yet done into the sidereal scheme of which our Sun is a member, we see it breaking up into subordinate star systems of greater or less extent. Our Sun himself may not be a solitary star as has been commonly supposed. From among the orbs which deck our skies, there may be some which are our Sun's companions on his path through space, though countless ages perhaps must pass before the signs of such companionship will be rendered discernible. On every side we see drifting star-schemes, and comparatively few stars are to be recognized as voyaging in solitary state through space.

(To be continued.)

For "The Friend."

#### False Shepherds.

The following is condensed from an article with the above title, published recently in *The Episcopalian* of this city. It is pleasant and cheering to meet with sound doctrine, especially when it comes from those, who in some points may differ from us.

"Among many grave charges brought by the Lord against the shepherds in Ezekiel's day, we have them summed in these words, 'The diseased or wounded have ye not strengthened, neither have ye healed that which was sick, neither have ye bound up that which was broken.' God's people in all ages answer to this description. When the spirit of the Lord begins to work in them, they are wounded, sick, broken. True, they know not what is the matter; they cannot believe God is at work in their soul; on the contrary, they think death and hell await them, that God abhors them, that they are too vile to be saved. Not for a moment does it enter the mind that this is the beginning of blessing. At this crisis in the experience of a believer it is made wonderfully manifest that there is a distinction between false and true shepherds, between those who have felt the terrors of the law and the burden of sin; and the formal professor, who has no vital experience. Some tell the sinner to believe, to take the promise, to embrace Christ, to come to the blood, to receive the atonement, just as one might tell another to perform any physical act he was perfectly capable of doing. Then they shelter themselves under the word of God, in such wise as, 'Believe on the Lord Jesus Christ, and thou shalt be saved.' To set poor convinced sinners right as to the method and way of salvation, is widely different from the usual mode of turning Gospel into law, and telling sinners to believe, receive, and enjoy Christ. There are loads of big and little books circulated now, the aim of which is to comfort distressed souls, but from which, taken on the whole, we venture to say, law-condemned, spirit-quickened souls will never find peace. The drift of these books is to urge the distressed sinner into peace by the *letter of the word, without the power of the Spirit.*

"We cull a few extracts from a small book

that professes to remove all difficulties out of a seeking sinner's way. Having reached the fifty-eighth thousand, we may accept it as a fair sample of popular divinity, a pattern book among a large number of the Christian community, who wish their own or their neighbor's soul's difficulties to be removed. But this is only one of a numerous tribe of little books and leaflets, the drift of which is to make people comfortable, and to heal 'the diseased, the wounded, the sick,' in the Church of God. A few quotations will show us the way in which the great majority of teachers imagine this is to be brought about:—

"In the death of Jesus there is mercy proclaimed wide and far to any one who wishes for it. You may at once, without delay, accept it. You may believe that God's mercy is even now toward you, for He has declared it in not sparing His own Son."

Again we read thus:—

"If once you are assured that the Lord Jesus, God's blessed Son, was given by God Himself, even unto death, in order that full payment and satisfaction might be made in that death for your innumerable sins, then you will have the feeling of rest and peace that you desire, for if you believe that all is settled in Christ's death, you cannot have a feeling of doubt and uncertainty." Again,

"Be strong in the assurance of God's wondrous love and power on your behalf. Cast away doubts and uncertainties, because they are dishonoring to Him, and weakening to yourself; meet every whisper of Satan by the fact that Christ has died and risen again. You have but to know yourself a sinner, you have only to plead your complete ruin and your consciousness of that very ruin is, upon God's authority, your title to say Christ Jesus came into the world to save you. The Apostle Paul himself realized the value of this faithful saying, and was resolved to put himself down in the list of those for whom Christ died."

"That all this is a most speedy and comfortable way of travelling to heaven for professors and letter-informed religionists, no one can deny. Facts of Scriptures believed, and the letter or written word of promise duly received into the mind, may afford immense support and comfort to an unexercised heart. It will set a man high above the profane, or the tremblers in Zion, who are passing through the valley of humiliation and crying out under the power and weight of an awakened conscience. 'God be merciful to me a sinner;' but a faith in facts, and a belief in the printed letter of the word, will never stand a storm. Satan, the world, and the power of evil, will prove too strong for such a faith as this.

"But, say some, where lies the error in these and kindred statements, that one hears and reads every day, when sinners, under awakenings of some sort or other, are addressed. It lies here, the absence of the work of God the Spirit in all these and such like statements. Man in ignorance, or enlightened to feel his awful condition as a sinner before God, is appealed to in all these sorts of addresses, as if *he* could do the work, and was equal to the task of quickening or comforting his own soul. 'No man can come unto me except the Father draw him,' was our Lord's declaration, and the promise of the Spirit is on this wise: 'He shall take of mine, and show it unto you.' But in all these and similar statements, as quoted, where do we find recog-

nized the sovereignty of God in 'the drawings of the Father,' and the power, and Godhead of the Spirit, in revealing the things of Christ to sinners? To supply the place of the Holy Ghost, the man is addressed as if he needed no help beyond his eyes to read the word, and his natural intellect to receive and understand it to his comfort.

"But, say some, are there not marks and evidences in the Bible to which distressed souls may be directed for comfort, and through these ascertained marks, may not peace be obtained? The answer we resign to abler hands, in an extract from the writings of an old and blessed divine of former years, who says,

"Men do puzzle themselves extremely, while they go about to satisfy their own spirits by marks and signs, that, if they deal faithfully with themselves, will never resolve the case fully to give true and well grounded rest unto their souls.

"The revealing evidence is the great evidence which determines the question, and puts an end to all objections, even the voice of God, the Spirit speaking particularly to the heart of a person: 'Son, be of good cheer, thy sins are forgiven thee,' or the like. When He saith this to the soul, there shall be never an objection worth a rush, while this voice is received, to disquiet and disturb it. Till the Spirit of the Lord come immediately Himself and speak thus to a soul, all the world shall never be able to satisfy it. In brief, you shall know that your sins are laid upon Christ by the Spirit of the Lord speaking this to you; and, till He do this, all the signs and marks in the world are mere darkness, mere riddles, nor can a soul understand them."

For "The Friend."

### Indian Affairs.

Most of the readers of "The Friend," may remember reading the subjoined telegram in the public newspapers on the day after its despatch to Washington. As it marks an important phase of affairs among four of the tribes which are under the care of Friends in the Indian Territory, we think it may be interesting to those who have not read it, to publish it, and add some information respecting the consequent action taken by the associated Executive Committee of the different Yearly Meetings on Indian Affairs. The telegram is as follows:

"From Washington. Washington, July 7. Hostilities in the Indian Territory.

The Commissioner of Indian Affairs to-day received the following important telegram, bringing news of a serious outbreak among the Indians in the Indian Territory.

'Osage City, Kansas, July 7.—Hon. E. P. Smith, Commissioner, Washington. Just arrived from Cheyenne and Arrapahoe Agency, north fork of Canadian river. Hostile Cheyennes, Comanches and Kiowas made their appearance in the vicinity of the Agency on the 2nd inst., and on the same day killed William Watkins, 30 miles north of the Agency. Five war parties seemed moving in the direction of the trail from the Agency to Caldwell, Kansas. I at once despatched a courier to Fort Sill for troops to protect the Agency, which were temporarily granted.

'On the morning of the 5th we mustered a small party of employees, to escort through to Caldwell. Hostile Indians had been seen

at King Fisher's ranche, and proceeded north. We took all the men and stock to Lee & Reynolds's ranche, on Turkey Creek, and on July 7, the Indians attacked this ranche, but were repulsed, getting only some horses. Four miles north of Baker's ranche we found four men, Pat Hennessey, George Ford, Thomas Callaway, and one unknown, lying murdered in the road. They had three wagons, loaded with sugar and coffee for Agent Haworth, all of which was destroyed or taken away. All the men were scalped. Hennessey had been tied to his wagon and burned. The fire was still burning. We gave them a hasty burial and proceeded to the next ranche, where we found teamsters, stages, &c., concentrated. They reported a war party of about 100 having passed north and east that morning. The ranche men had driven them off. We took a woman and child from this place, and gave the men all the ammunition we could spare.

'The next ranche was reached after dark. The Indians had gone into camp four miles east on Skeleton creek. I advised all the ranchmen and freightmen to abandon their places, which they did, and by making good use of the night, we reached Caldwell yesterday at noon. We found Latlin's ox train at Pond Creek, 25 miles south of Caldwell, and I fear this train, loaded with subsistence for three agencies, will be captured, as we saw nine hostile Indians in that vicinity, and the party had only three guns. My chief clerk is in command of the party.

'There are now but two ranches occupied on this road, and we fear their fate before help can reach them. I have no doubt the Indians will clean every thing until repulsed. This is their proclamation. I have offered my own life in passing through their lines to save others, and now I ask, and shall expect to receive at once, two or three companies of cavalry, one to be stationed at Baker's ranche, to protect Government interests on this road, and one at the Agency.

'These troops should be despatched as quickly as possible to Wichita by railroad, and no hostile Indians shall be quartered at the Agency, and I must have the troops to back it up. Let the hostile element be struck, and with such power as shall make our work quick and effectual. I now go to Leavenworth, awaiting instructions, and ready to consult with General Pope. Signed,

JOHN D. MILES, Indian Agent.'

Miles is a Quaker, and is considered by the Interior Department to be a cool and thoroughly reliable agent. His request for troops has been endorsed and recommended for immediate attention by the military authorities of the war department.

The hostile Indians referred to are estimated to number 2000, composing about one-fourth of the Cheyenne, Kiowa and Arrapahoe tribes.

It will be remembered that Commissioner Smith recommended last year that these tribes who had then been raiding extensively in Texas, should be brought into thorough subjection, and compelled to give up their raiding leaders. This was not done, and trouble now proceeds from the same turbulent portions of the tribes, three-fourths of whom are peaceably located at Fort Sill reservation, where also Satanta, Big Tree, and their other prominent chiefs are still remaining in compliance with their agreement."

The warlike tone of this telegram, coming as it did from a member of the Society of

Friends, and circulated throughout the land by the public press, naturally excited much uneasiness in the minds of those Friends who had taken an interest in the peaceable mission among the Indians delegated to our Society a few years ago by President Grant.

The members of the executive committee felt it their duty to consult with each other upon the occasion, and a meeting of that body was accordingly called, at Lawrence, Kansas, on the 15th of the 7th month. Eleven Friends from eight yearly meetings met at the time appointed. The feeling among them was unanimous that the sentiments expressed by the telegram were inconsistent entirely with the views always entertained by our religious Society, respecting a resort to military force, and in contravention of the spirit in which we had undertaken the task of bringing the red man within the influence of peaceful industry and Christian kindness.

They felt it to be due to the Society and the public to repudiate all responsibility for the acts of agent Miles, in calling for troops and recommending retaliatory warfare, as signified by his despatch, and to this end the following minute was unanimously agreed upon.

"While we recognize the exigencies of the situation in which our agent, John D. Miles has been placed, as set forth in the telegram of the 7th instant to the commissioner of Indian affairs, and consider that great allowance is due to him under these trying circumstances, in judging of his course, yet it is the conclusion of this committee, after having given him a full personal hearing, that some of his actions, and the warlike tenor of the despatch above referred to, show that he is not sufficiently in harmony with the principles upon which our work among the Indians is based, and hence we would kindly request his resignation.

It is with great regret that the committee have been forced to the above conclusion, and they desire in communicating it to him to assure him of their feelings of personal kindness.

Information received shows that of the tribes under their charge, a large proportion are in a prosperous condition, civil order is well preserved among them, schools and industrial operations are flourishing. In the three southwestern agencies, chiefly owing to the intrusion of white men who kill buffalo, trade in whisky and steal horses, some of the chiefs and young men of a few of the tribes, have resolved upon retaliation. Small war parties have attacked one train, a few ranches, and the buffalo hunters in the pan-handle of Texas.

We are hopeful that order and quiet may soon return."

By direction of the Committee,  
CYRUS BEEDE, Clerk pro tem.

(To be continued.)

"The strongest argument for the truth of Christianity is the true Christian; the man filled with the spirit of Christ. The best proof of Christ's resurrection is a living Church, which itself is walking in new life, and drawing life from Him, who hath overcome death. Before such arguments, ancient Rome herself, the mightiest empire of the world, and the most hostile to Christianity, could not stand. Let us live in like manner, and then, though hell should have a shortlived triumph, eventually must be fulfilled what St. Augustine

says, 'Love is the fulfilling of the truth.'—*Professor Christlieb at the Christian Alliance, New York, 1873.*

### The California Wood-rat.

The following statement respecting the singular habits of the California Wood-rat, is published in the last number of *Silliman's Journal*. It is from a letter written by A. W. Chase, Assistant U. S. Coast Survey, to B. Silliman, dated "Anaheim, California, May 27, 1874."

"While on the northern coast I noticed a fact in natural history to me quite curious, regarding the habits of the so-called California wood-rat. I am not sufficiently versed in such matters to give you the name of this interesting creature. It is a little larger than an ordinary Norway rat, dark-brown in color, with large lustrous eyes, and a tail covered with thin hairs. I should call it intermediate between a squirrel and rat. This creature builds its nest in the woods, sometimes on the ground, more frequently in the lower branches of trees. They accumulate a surprising quantity of dried twigs, which they interlace to form a dome-shaped structure, often ten or twelve feet high and six or eight feet in diameter.

Openings in the mass lead to the centre, where is found the nest, consisting of the finely divided bark of trees, dried grass, &c. But it is to the peculiar thievish propensity of this little creature that I wish to call attention.

To make my story intelligible, I would first state that I am partial owner of some property on the Oregon coast, on which a saw-mill had been placed, but which, owing to various causes, has never been in operation. On this property was a dwelling house for the hands, in which, on work being discontinued, were stored a quantity of stuff, tools, packing for the engine, six or seven kegs of large spikes; in the closets, knives, forks, spoons, &c. A large cooking stove was left in one of the rooms.

This house was left uninhabited for two years, and, being at some distance from the little settlement it was frequently broken into by tramps who sought a shelter for the night. When I entered this house I was astonished to see an immense rat's nest on the empty stove. On examining this nest, which was about five feet in height, and occupied the whole top of the stove (a large range), I found the outside to be composed entirely of *spikes*, all laid with symmetry so as to present the points of the nails outward. In the centre of this mass was the nest, composed of finely divided fibers of the hemp packing. Interlaced with the spikes, we found the following: About three dozen knives, forks and spoons, all the butcher knives, three in number, a large carving knife, fork and steel; several large plugs of *tobacco*; the outside casing of a silver watch was disposed of in one part of the pile, the glass of the same watch in another, and the works in still another; an old purse containing some silver, matches and tobacco; nearly all the small tools from the tool closets, among them several large augers. Altogether, it was a very curious mixture of different articles, all of which must have been transported some distance, as they were originally stored in different parts of the house.

The ingenuity and skill displayed in the construction of this nest and the curious taste

for articles of iron, many of them heavy, for component parts, struck me with surprise. The articles of value were I think stolen from the men who had broken into the house for temporary lodging. I have preserved a sketch of this *iron-clad* nest, which I think unique in natural history.

Many curious facts have since been related to me, concerning the habits of this little creature. A miner told me the following: He once, during the mining excitement in Siskiyou county, became in California parlance 'dead broke,' and applied for and obtained employment in a mining camp, where the owners, hands and all slept in the same cabin. Shortly after his arrival small articles commenced to disappear; if a whole plug of tobacco were left on the table, it would be gone in the morning. Finally a bag, containing one hundred or more dollars in gold dust, was taken from a small table at the head of a "bunk," in which one of the proprietors of the claim slept. Suspicion fell on the new comer, and he would perhaps have fared hardly; for, with those rough miners, punishment is short and sharp; but, just in time, a large rat's nest was discovered in the garret of the cabin, and in it was found the missing money, as well as the tobacco and other articles supposed to have been stolen."

### THE COMET.

Original.

Stupendous orb! with wonder and surprise  
We see thy flaming train illumine the skies,  
As thou intent on thy ethereal race,  
Careerest through the realms of boundless space—  
Proclaiming to earth's tribes as in amaze  
They on thy radiant form astonished gaze,  
That there is an Almighty God above,  
The source of power, of goodness, light and love,  
Who wheels thy rapid flight among the spheres  
And marks thy round of centuries of years,  
Where worlds o'er worlds in beauteous order roll,  
Obedient unto His supreme control.

For "The Friend."

### The Cross.

From the time the rich man came running to Jesus to know what he should do to inherit eternal life, to the present, the cross has been a stumbling and an offence to poor fallen human nature. The honors, the riches, and the false pleasures of this perishing world seem to stand in the way of taking up the daily cross and walking in the strait and narrow way that leadeth unto life eternal. But the answer that was made to that young man formerly, is made to us—to sell all that we have, to part with all for Him, give all up to his disposal, not only our outward substance, but our own wills, our lives, our time and the talents that He has committed unto us; and take up the cross and follow Him as he is pleased to lead. All must be given up. This may seem hard to flesh and blood, but this is nevertheless still the way to eternal life. Yet there are now, as there ever have been, in every age of the world, those who, when they hear these conditions of entering into life eternal, go away very sorrowful, and say, Who then can be saved? They take the perishing things of this world for their portion, and follow their own wills and ways. And also in every age there will be found some, who, like Moses, will choose rather to suffer affliction with the people of God, than to enjoy the pleasures of sin for a season, esteeming the reproach of Christ greater riches than the treasures of Egypt, having respect unto

the recompence of the reward. In the early days of our Society—the cross seemed heavy, especially to the rich and great—who had the riches and honors of this world before them—as was the case with Wm. Penn, and many in that time, who seemed to have to part with all, when they joined in fellowship with the poor despised Quakers, who were every where spoken against, calumniated and persecuted. They indeed gave up all to follow their Lord and Master, and sold all they had to purchase the Pearl of great price.

Yet in that day, there were some convinced of the truth of their principles who did not publicly espouse their cause before the world; and I believe there are many such now, who are striving to find some easier way, so as to evade the cross and still be considered Quakers. Instead of saying with Peter to our Lord and Master, "lo! we have left all to follow thee," they are ashamed to be accounted fools for Christ's sake, and so like Nicodemus formerly, they would be willing to come to Jesus by night, when no one would see them, but would not be seen by the world or the chief priests following the carpenter's Son in the light of day. But in order to attain to eternal life, the cross must be borne openly before the world. Not those little crosses that the Papists invented, made out of wood or metal, that could be carried in the pocket and could be taken out and used when it was convenient, but the cross that Paul referred to, when he said, "God forbid that I should glory—save in the cross of our Lord Jesus Christ, by whom the world is crucified unto me and I unto the world," and again, "I am crucified with Christ: nevertheless I live, yet not I, but Christ liveth in me—and the life which I now live in the flesh, I live by the faith of the Son of God, who loved me, and gave himself for me."

We must deny ourselves the sinful gratifications of time and sense, and even some things which may be accounted by others of not much consequence; as conforming to the world in making use of the world's language and compliments, instead of the plain language made use of in scripture by the holy men and women of old; and using the names of heathen deities in designating the days of the week and months of the year; and also in following the vain and changeable fashions of the world in our apparel; and having gay and costly furniture in our houses, and an expensive style of living in our families, providing expensive marriage entertainments; and other things that might be enumerated, that do not become a disciple of a meek and crucified Lord and Master, who wore a seamless garment and had not where to lay his head, though he was Lord of all. We must be willing to take up the cross in these things, as well as in those that may be accounted of greater moment. We must be willing to own Him and his cause before men, for it is said he that is "ashamed of me, and of my words, in this adulterous and sinful generation, of him also shall the Son of man be ashamed when he cometh in the glory of his Father with the holy angels."

It is not so much acknowledging Christ in words, that is needed, as in our lives and our daily walk and conversation before the world; in our example is the way to let our light shine. It is a contradiction to say that we have renounced the world, when at the same time we are conforming ourselves to it, in its

fashions, its follies and its sinful gratifications; for he that loveth the world the love of the Father is not in him. The Apostle Paul says, I am not ashamed of the Gospel of Christ, for it is the power of God unto salvation to every one that believeth. Then let us not be ashamed to own Christ and his Gospel before men by our lives and conversation, and to show by our walk before men that we are indeed His followers, who said, my kingdom is not of this world. And we, as a Society, and as individual members thereof, should not be ashamed to own our principles, and to walk conformably thereto; though it may be in the cross to our natural inclinations: for I believe the principles of Friends, as originally held by our predecessors in the Society, and by faithful Friends down to the present time, are the principles of the Gospel of Christ, and are still worth suffering for. No part thereof should be let fall, but all should be faithfully maintained.

The cross seems to stand in the way of some who admit the truth of those principles, for they seem to think we might dispense with what they call our minor testimonies, which seem to be a great cross to them. They think these are not needed in this enlightened age of the world, but I do not see but what they are as much needed now as they ever were as a testimony against the sinful practices of the world that still "lieth in wickedness." Those who think them little things should remember that our Saviour says, "He that is faithful in that which is least is faithful also in much, and he that is unjust in the least is unjust also in much." In accordance with this, experience has shown in our Society that those that are unfaithful in what they term these smaller testimonies, are often unfaithful in the rest. They consider one thing small and let it drop; and after awhile something else is deemed a small matter, and so they progress, until they finally consider there is not much in any of our principles, and leave the Society altogether, or, if they stay with us, are dead weights to those who do stand faithful.

If the principles of the Society of Friends are maintained at all by this and succeeding generations, in a Society capacity, they must be, as a whole, not by parts; for there is such a connection between the different parts of those principles, that to take one part away, weakens the entire structure. Therefore, Friends, let us faithfully uphold those principles in all their parts. J. H.

Ohio, 7th month 23th, 1874.

For "The Friend."

#### Curious Observations on the Pitcher Plant.

The leaves of the *Sarracenia variolaris*, or pitcher plant, of the Southern States, have long been known to act as a kind of fly trap. Some recent observations made by Dr. Melli-champ, of South Carolina, indicate the existence of some peculiarities in the plant which are certainly very curious, and show an adaptation of structure for the apparent purpose of entrapping insects, not hitherto suspected. A watery fluid has long been known to collect in the bottom of the pitcher shaped leaf, in which the insects found there were supposed to have been drowned, which, it is ascertained, is a true secretion of the plant, bland and mucilaginous in taste, but leaving in the mouth a peculiar astringency, resembling in degree that of the root. This secretion was

found to have upon insects inebriating or narcotic properties. By collecting from each leaf its few drops of juice, Dr. M. procured a sufficient quantity of it, with which to test its intoxicating effects with houseflies and other insects. He says, "some twenty flies were experimented with. At first the fly makes an effort to escape, though apparently he never uses his wings in doing so, the fluid though seemingly not very tenacious, seems quickly to saturate them, and so clings to them and clogs them as to render flight impossible. A fly when thrown in water is very apt to escape, as the fluid seems to run from its wings; but none of these escaped from the bath of the *Sarracenia* secretion. In their efforts to escape they soon get unsteady in their movements, and tumble sometimes on their backs; they make more active and frantic efforts, but very quickly stupor seems to overtake them, and they then turn upon their sides either dead, (as I at first supposed,) or in profound anæsthesia." After some time the insects recovered from the stupor, and when placed in a convenient position were able to crawl away. From the peculiar form of the cup in which this secretion accumulates, no opportunity would present for the escape of the insects, who thus form in time a mass of decomposing matter, fitted to nourish the plant.

One of the objects of the secretion, however, appeared to be to act as a macerating liquid, in which the bodies of the insects might be more readily decomposed, and assimilated to that condition in which they could aid in promoting the growth of the plant; forming in fact a liquid fertilizer.

Another interesting feature of this plant is a sugary exudation near the top of the pitcher shaped leaf, which was very attractive to insects, and as far as was observed, not poisonous. This appears to act the part of a lure, to entice them into the cup, which on the inside is covered with a coating of hairs, soft and delicate near the top, and pointing downwards, but more rigid and bristly below, and from which, when once entered, it appeared almost impossible to escape. This sugary exudation was also found to extend along the outside of the leaf, nearly if not quite to the ground. "One can now readily understand why ants should so frequently be found among the earliest macerated insects at the base of the tube. Their fondness for saccharine juices is well known, and while reconnoitering at the base of the leaf and bent on plunder, they are doubtless soon attracted by the sweets of this honeyed path lying right before them, along which they may eat as they march, until the mouth is reached, where certain destruction awaits them." "This honeyed pathway leading from the ground up to the larger feeding ground to which the ants are thus enticed, may well be compared with the trail of corn with which hunters are wont to entice wild turkeys into their trap. One cannot imagine anything more curious."

In reference to the entrapment of the insects by reason of the peculiar conformation of the leaf, Dr. M. remarks: "The nectar being found below the lower lip for a half inch or more, when the fly is satiated and makes for flight, he must do so immediately upward for a very short distance, and then somewhat at right angles to get through the outlet—a somewhat difficult flight, which perhaps of all insects a fly might be capable of, but which

even he probably is not." In their flight they "strike themselves against the opposite sides of the prison house, either upward or downward, generally the former. Obtaining no perch or foothold they rebound off from this velvety, 'microscopic *cheveux de frise*,' which lines the inner surface still lower, until by a series of zigzag generally downward falling flights, they finally reach the coarser and more bristly pubescence of the lower chamber, where entangled somewhat, they struggle frantically, and eventually slide into the pool of death. And even here, though they may cease to struggle, and seem dead, like 'drowned flies,' yet are they only asphyxiated. After continued asphyxia they die, and after maceration they add to the vigor and sustenance of the plant. And this seems to be the true use of this fluid, for it does not seem to be at all necessary to the killing of the insects, although it does possess that power, the conformation of the tunnel of the fly trap is sufficient to destroy them. They only die the sooner, and the sooner become liquid manure."

For "The Friend."

#### Drought and Rain.

Many portions of our country in the vicinity of Philadelphia, as well as in other situations, have experienced during the present summer the effects of a prolonged withholding of those refreshing showers, which are so essential to the maintenance of vegetable life, and the health and comfort of us all. In some neighborhoods, the broad leaves of the Indian corn had rolled up, and presented that parched aspect so distressing to the farmer; the pasture fields had become brown and dry, and furnished but little food for the animals that fed in them; and the cucumber, melon and similar vines wilted under the hot suns. In many of the fields, near the lines of the different railroads, the grass was set on fire by the sparks of the passing engines, and partially consumed. One who listened to the conversation of those who met in rural districts, would hear sage comments on the weather, doubts as to the future of the potatoe and tomato crops, and discussions as to the amount of drought that corn would bear, and the necessity of moisture when the silk and tassel appeared on it, and the grain was about developing. Even those not directly interested in farming concerns, could not but enter into sympathy with their friends and neighbors. It often required some effort to refrain from indulging in *impatient* longings for rain, and to maintain that state of quiet submission to the Divine will, which, when associated with due diligence in the performance of our allotted labors, is the safest resting place for short-sighted, dependent mortals.

The rains which have recently reached us, have made a great change. A fresher greenness clothes the fields of grass, and the curled corn-blades open out their broad surfaces as they feel the influence of this "sweet reviver of the famished land." The spirits of the people are as much enlivened as their fields, and they now look forward with confident hopes of receiving a reward for their labors and care.

Can we not see in all these things an emblem of the condition into which the church is sometimes brought? There are times when little apparent fruit is seen from the most earnest labors of the spiritual husbandmen.

The seed which is sown, remains in the hearts apparently without germinating—the soil appears to be without moisture, and no growth is visible. The hoe of church discipline may indeed cut down the weeds that spring up, but it cannot supply that penetrating and all-powerful Grace, which alone gives spiritual greenness and life to the plants. Disheartening as it may seem to the workman in such a field, it is still his duty faithfully to stir the ground, prune the straggling branches, watch over and care for the poor shrivelled plants, as the Master of the vineyard may direct. In the vicissitudes of the heavenly seasons, the rains will descend and water the ground—there will come a time when it will please the Lord of the harvest, not only to send forth laborers, but to visit His Church with a renewed outpouring of His Grace and good Spirit. Then indeed the toiling husbandmen will see of the travail of their souls and be satisfied. Sons and daughters, who had wandered far from the safe inclosure of the sheepfold, will be brought back; new growth will be developed in some who had seemed like stunted plants; and heavenly life and beauty will again adorn the garden of the Lord.

#### The "Challenger" Expedition.

This lecture was delivered at S. George's Hall, Langham-place, London, by Dr. W. B. Carpenter, F.R.S., on the "First Fruits of the Challenger Expedition—Temperature Survey of the Atlantic." The lecturer commenced by stating that among the objects of the Challenger expedition sent out in the beginning of last year, none was more important than the examination of the temperature of the various ocean basins, not merely at the surface and the bottom, but at different ocean depths, in order to collect data for the different ocean currents. The chief great movement is that which brings warm water from the S. W. to our shores and to the Hebrides and Norway, which is commonly supposed to be brought by the Gulf Stream, but it will be shown that the real Gulf Stream dies away in the mid-Atlantic. The first great principle of the movement of ocean water is horizontal by wind. If we take a circular vessel of water and introduce a current of air in a side direction, it will drive the water round the vessel, and though some of its force will be expended in striking against the walls of the vessel, its movement will continue towards the point whence it started; and thus if the wind in certain parts of the ocean blow away the water, this is constantly replaced by return currents. But if we blow the air straight across the circular vessel, its effect will be to turn the water right and left at the opposite side, and these two currents will again meet at the point where the air was introduced. This is important to remember, as it explains many of the ocean currents, and is applicable to the surface of the Atlantic, where the trade winds blow continually from Africa to America, and in the Pacific from America to China and Japan. These trade winds impel a strong current, known as the equatorial current, which reaches from the Equator to lat. 20° or 23°, the variation depending upon the season. This current flowing from the Bight of Biafra strikes the coast line of South America, and only a projecting small portion goes to the south, while the greater part slants to the north; the result is that an enormous

body of water flows from Cape S. Roque to the Carribean Sea, turns round into the Gulf of Mexico between Cuba and Yucatan, and comes out between Florida and the Bahamas propelled onwards by a *vis a tergo*, or force from behind, of the Equatorial Current, which the Challenger proves to be very shallow and confined to the surface, not extending below one hundred fathoms. But part of the Equatorial Current does not enter the Gulf of Mexico, but makes a circulation of its own, and only returns to the Bight of Biafra, encountering on its way that vast bed of seaweed known as the Sargasso Sea, which so dismayed the mariners of Columbus, and whose large area of vegetation doubtless plays an important part in nourishing the animals below. The South Atlantic has no Gulf Stream, and the current after its divergence at Cape S. Roque goes southward under the name of the Brazil Current, and as the Connecting Current returns to the Bight of Biafra. In inquiring the reason of this movement we find that it is helped by wind, and that the current recrosses the Atlantic in that direction because of the anti-trade winds, and their prevalent direction being from west to east they produce a movement in that direction. If we turn a terrestrial globe the point on the Equator moves faster than any other part, therefore anything passing from the Equator would carry with it an excess by easterly momentum, and conversely a body of water coming from the Pole towards the Equator would have a deficiency of easterly momentum, and would turn to the west. At Africa the prevalent wind is from the south, and renders the circulation complete. The same principle prevails in the Pacific, where the Equatorial current rolls from South America to the Indian Archipelago, and is deflected into the Japan Current towards Behring straits and returns by Mexico to whence it came. The common saying that the Gulf Stream passes through the Mid-Atlantic, striking the shores of Britain, and moving up to Iceland, is based on the unquestionable fact of the gradual movement of a body of warm water, and which according to the isothermal lines (lines of equal heat) drawn by Dr. Petermann, passes nearly straight across the Atlantic, turning upwards after passing Newfoundland, and is as warm at lat. 70 as at Newfoundland; these lines follow the coast lines, and thus the harbors of Norway are never blocked by ice in the winter, though there is often ice in the port of New York; the harbors on one side of Iceland are also open, though those of Greenland are often blocked even in summer. Some assert this warm current to be the Gulf Stream, but after passing Halifax and Nova Scotia the Gulf Stream spreads out into a thin superficial film.

Dr. Carpenter proceeded to state that before the departure of the Challenger he put forth certain general conclusions and predictions, one hypothesis being that in the great ocean beds are two strata, one, the deeper, moving from the Pole to the Equator and moving quickly; the other at the top, moving slowly from the Equator to the Pole. The sustaining force is found in the heaviness of the water induced by Polar cold, which produces a downward movement, and the excess of lateral pressure causes an outflow of water from the bottom towards the Equator, which also occasions a surface indraught. The lec-

turer stated that he had illustrated this by an experiment of a glass trough, placing at one end a hot plate, at the other a metal box of freezing mixture. If a coloring substance be dropped into the water midway between the two ends it flows to the cold end, then drops to the bottom, and rises when it comes beneath the hot plate. We find that the South Atlantic ocean bed is colder than the northern, for in the north the communication with the Polar area is narrow, the only channel being between Greenland and Iceland. But in the Antarctic region there is nothing to interfere with the free flow, and thus the temperature of the bottom of the South Atlantic is lower, and there is a greater evidence of the Polar flow and of Polar water close to the Equator.

The first section of the Challenger's voyage was from Teneriffe (lat. 28 N.) to S. Thomas (18 N.) and when they found water at a temperature so low as 34 there were suspicions of Antarctic water, which it seems flows as far north of the Equator as S. Thomas. It must be remembered that depth has nothing to do with temperature, the temperature being determined by the mean winter temperature of the locality or by the coldest water that can get in. This is well proved by the uniformity of the Mediterranean, where only the surface is affected by the summer sun, the temperature from 50 fathoms downwards remaining at 54° all the year. Why should the water in the Mediterranean be 55° while that of the Atlantic, only just outside it, is at exactly the same depth 35°, if the water did not come from a Polar basin? From S. Thomas the Challenger went to Bermuda, and just one hundred miles due north of S. Thomas found the deepest water she had yet met with, 3,875 fathoms, both thermometers being crushed by the extraordinary pressure of 4½ tons on the square inch. From the Bermudas she passed to New York and Nova Scotia, passing a broad band of about 60°, which contains the turn of the equatorial current, bringing heat, although it be not the Gulf Stream. Between the Gulf Stream and the coast line is a band of cold water called the "cold wall," and so sharp is the line of division that a ship may have her stem in the one water and her stern in the other. In the Equatorial section of the Challenger's explorations there was found at Paul's Rock (lying almost on the Equator in long. 30° W.) an extraordinary thinness of surface water, while the low temperature of the bottom water shows that it must be purely Antarctic water; therefore at the Equator the water has the hottest surface and the coldest bottom. The question now remains how the heat of the Atlantic current acts upon us. Off Portugal it is rather below the normal temperature, but as it moves northward it carries its temperature with it, and only the heat of the surface is lowered, the rest retaining its temperature as far as the Faroe Isles (where it is above the winter temperature of the islands, themselves,) thus carrying an enormous body of heat, and 500 fathoms is a more effective heater than a film of 50 fathoms, such as the Gulf Stream would be, even though it might be hotter water. Another instance where a cold stratum of water comes up to the surface was observed by Dr. Meyer, who has given much attention to the Baltic and North Sea. The North Sea is exceedingly shallow, never exceeding 100 fathoms except in one channel extending along the

south coast of Norway as far as the Skagerack. Along the west side of this channel flows a cold stream from the Arctic Ocean. This continues over the bed of the North Sea up to Dogger Bank, where in a very short space there is a difference of 15° Fahrenheit between the eastern and western slopes. An effect of these movements, more important than the amelioration of climate, is to prevent stagnation. In the bottom of the Mediterranean the whole is a stagnant mass of water, destitute of animal life. Dr. Carpenter added that on his first visit to the Mediterranean he expected to find a large fauna, and on reasoning on his disappointment concluded that this absence of life was due to a deficiency of oxygen for want of aeration to remove the carbonic acid. Accordingly on his second visit he took instruments to analyse the gases, and found that where oxygen was in the Atlantic in proportion of 20 to 100 it was but 5 in the Mediterranean, and where carbonic acid in the former was 45 in the latter it was 60. The vertical circulation prevailing in the Atlantic brings every drop of bottom water to the top, and, still more important, carries every drop of surface water to the bottom, thus carrying nutrition from the Sargasso to animal life in the depths. The *Challenger* observations have also discovered that according to the indications of specific gravity the surface water and the bottom water correspond much more closely at the Equator than at any other place. This affords a very striking indication of the ascent of bottom water toward the surface, which on the theory of the vertical circulation would take place in the Equatorial region where the two underflows from the Poles meet. The lecturer concluded by remarking that the *Challenger* was now pursuing a prosperous voyage in the South Pacific, her latest researches being between Melbourne and Kerguelen's Land.—*English Mechanic*.

For "The Friend."

The following extracts are taken from a letter recently received by a Friend in this city. It was written by Friends who belong to a distant Yearly Meeting, and not long since were with us on a religious account. It is believed that it may prove interesting and encouraging to others, as well as to those to whom it was addressed.

"When He putteth forth his own he goeth before them and prepares the way." This is a lesson that many in our Society are slow to learn in this day of intellectual activity. They seem to think that certain things must be accomplished, and that they have the power and qualifications within themselves to bring about desirable results; and hence going forth in this spirit, and relying on their own strength to carry them through, they meet with obstructions, and confusion is their portion.

"We often feel for a class of young Friends who are at times heard to speak in our meetings, and some of whom have been under the Lord's preparing hand for service; yet by coming under the influence of this restless spirit, and giving heed to the urgent entreaties of others to engage in work now, without waiting for the call and renewed qualification for every respective service, they have not grown in their gifts, but are a burden to Society. The wild fire has to a large extent swept over our Society in this part of the

country, but there are several that have not come under its influence, but are still standing for the principles of the Gospel as professed by Friends."

*History of Stoves.*—During the seventeenth century in England, as well as this continent, although great fires blazed in the royal chambers and halls, and the parlors of the wealthy, the domestics were almost perishing with cold. This discomfort did not proceed from selfish or stingy housekeeping, but rather from an affectation of hardihood, particularly among the lower classes, where effeminacy was reckoned a reproach. This may account, in part, for the slow introduction of chimneys. Walls were rarely lathed and plastered, ceilings were just beginning to be boarded in the best houses; doors, sash, and window-shutters were of the most wretched fit; and tongue floor boards did not come into use until 1670. About the same time, from Germany, came the grand invention of hanging, by a cord, weight and pulleys, the lower sash of a window.

In 1658 Sir John Winter invented a fire-box for burning coal or coke inside a chimney-place, with a hole above, covered with a moveable plate. This was similar to one suggested by Savot, in France, and was probably the origin of the first coal grate. An improvement was made on this by Jorévin de Rochford, in London, whereby greater economy was obtained, and the smoke better disposed of; but this was again exceeded by the one placed in his chamber by Prince Rupert, in 1768. In this, instead of a hole directly over the grate, the draught went out at the back, until the fire was well kindled, when a damper in the flue was pulled forward, which forced the smoke down a short distance, and then allowed it to rise in the chimney, behind a low partition in the middle of the flue.

The first of all our present coal stoves seems to have been one described by M. Justel to the Royal Society as the invention of M. Dalesme, and which was exhibited at the fair of St. Germain, near Paris, in 1680. It was made of wrought iron, and consisted of a deep basin or vase, seated on and connected with a square box, and from the rear part of the latter a curved pipe rose into the chimney at a height considerably above the top of the vase. On starting the fire the iron pipe required to be first well heated to make a downward draft through the coals. Justel is quite enthusiastic about it. Beside its ventilating a room, he says: "The most fetid things, matters which stink abominably when taken out of the fire, in this engine make no ill scent; neither do red herrings broiled thereon." That was the *experimentum crucis* verily, and we don't wonder he liked the new "engine."

Glauber, who discovered the salt which bears his name, claims the discovery of the front cover or "blower" for a grate, leaving space below for the air to enter. This was a great triumph, and the vocation of the bellows was ended. He declared that so disgusted was he with the puffing of fires and the smells and drudgery of his laboratory, that he was about to discard it forever, when he made the happy discovery; and he ends with a devout prayer of thanks to heaven for the same.—*Late Paper*.

*Gradual Temptations the Most Powerful.*—Seldom will Satan come to the Christian at

first with a gross temptation. A large log and a candle may safely be left together. But, bring a few *shavings*, and then some *small sticks*, and then some *larger*, and soon you may bring the green log to ashes.

Leave thy fatherless children, I will preserve them alive, and let thy widows trust in Me.

## THE FRIEND.

EIGHTH MONTH 8, 1874.

"The Journal of William Penn, while visiting Holland and Germany in 1677." This is the title of one of William Penn's smaller works, recently re-printed by the Meeting for Sufferings, in a neat duodecimo form, and bound in cloth. It is for sale at the Bookstore, No. 304 Arch St., at the low price of 40 cents.

The narrative is an interesting one, especially that part of it connected with the visit to the Court of Princess Elizabeth at Herwerden. The lively account of his religious exercises, of which he has preserved a record, is calculated to be useful to young and old.

The republication at this time of this little book, is the result mainly of a concern for the younger branches of our Society; that in reading it, they may see the way in which the Spirit of the Lord worked on the hearts of a former generation, led them into the Heavenly fold, enriched them with spiritual blessings, and clothed them with a dignity surpassing that of mere rank or station. Happy indeed will it be for them, if they are in any measure influenced thereby, to yield their hearts to the gracious visitations of Divine love, and so to walk in the footsteps of the flock of Christ's companions. This path is thus beautifully pointed out by Wm. Penn in an epistle contained in this journal:

"It is the exhortation of my life at this time, in the earnest and fervent motion of the power and Spirit of Jesus, to beseech you all, who are turned to the Light of Christ, which shineth in your hearts, and believe in it; that you carefully and faithfully walk in it, in the same dread, awe and fear in which you began; that that holy poverty of spirit, which is precious in the eyes of the Lord, and was in the days of your first love, may dwell and rest with you; that you may daily feel the same heavenly hunger and thirst, the same lowliness and humility of mind, the same zeal and tenderness, and the same sincerity and love unfeigned; that God may fill you out of His heavenly treasure with the riches of life, and crown you with holy victory and dominion over the god and spirit of this world; that your alpha may be your omega, and your author your finisher, and your first love your last love; that so none may make shipwreck of faith and of a good conscience, nor faint by the way."

The presenting of such a book to a young friend, may have a useful effect, in manifesting that interest in their welfare which seeks to draw them to the Heavenly fold; and may also be of advantage to the giver in strengthening, by exercise, that sympathy and care which ought to be extended by the older to the younger members of the church.

The Book Committee have also recently

had printed and bound in muslin, the "1st and 2nd Propositions of Barclay's Apology on the True Foundation of Knowledge and Immediate Revelation," price 10 cents; and also the "5th and 6th Propositions on Universal and Saving Light," price 15 cents. This was done in compliance with a request from concerned Friends in one of our western Yearly Meetings; who desired to have something in a concise form for circulation among those of their members who needed information as to the principles of our Society on some points.

#### SUMMARY OF EVENTS.

**FOREIGN.**—On the 28th ult., in the House of Commons, Disraeli said the government had received satisfactory assurances from the conferring Powers in regard to the Brussels Congress, and delegates had been sent on behalf of Great Britain under instructions already made known to the House.

R. Bourke, Under Secretary of State for Foreign Affairs, said it was believed that a German squadron had been sent to the coast of Spain merely to protect German residents.

The King of Ashantee has paid a further instalment to Great Britain on the war indemnity.

A destructive fire occurred in Liverpool the 28th ult. by which the Prince's Dock landing stages were entirely destroyed. The damage is estimated at \$1,000,000.

The Bank of England rate of discount has been raised to 3 per cent., but loans are made in open market at much lower rates.

The public worship regulation bill has passed its third reading in the House of Commons.

Liverpool.—Uplands cotton,  $8\frac{1}{2}d$ ; Orleans,  $8\frac{3}{4}d$ .

A Brussels dispatch says: It is understood that a majority of the delegates to the International Congress favor the exclusion of all points relating to naval war, and a strict adherence to matters strictly connected with the amelioration of human suffering in time of war.

The damage done by the recent storms in Moravia, far exceeds the earlier estimates. Eleven villages and two towns were devastated. The government will extend aid to the inhabitants.

It is stated that Italy has made a demand upon France for the recall of the war ship *Orenoque*, which has been permanently stationed at Civita Vecchia, as a refuge for the Pope in case of necessity.

The Pope, in a recent address, intimated that he had been offered an asylum in America, but said he should remain in Rome "until the moment when God himself will make known His will and the order of Providence."

Vienna journals say Austria has received a circular note from Germany, urging the great Powers to combine to prevent the continuance of Carlist atrocities in Spain, and has given a favorable reply.

The *Morning Post* asserts that Germany will propose in the Brussels Congress the recognition of the present government of Spain.

The *Cologne Gazette* says Prince Hohenlohe, the German Minister at Paris, has unofficially informed the Duke de Cazes that if France fails to act stringently toward the Carlists, a German squadron will be sent to the Spanish coast, and Germany is resolved to take measures against the Carlists.

The *Imparcial*, of Madrid, specifies the following among other grounds of complaint against France. Arms bearing the royal initials of Don Carlos have been publicly sold at Bayonne; a manufactory at Bordeaux has been allowed to make contracts for supplying the Carlist army with boots and shoes. The Prefect of the Department of the Lower Pyrenees, who permitted the public entry of Carlists into Spain, is still retained in office, and thousands of armed recruits for the Carlists have crossed the frontier. Finally two cargoes of arms from France have been landed in Spain for the Carlists.

The Spanish delegates to the Brussels Congress have been instructed from Madrid not to participate in the deliberations because the government is yet unrecognized by the European Powers.

The Carlists claim a great victory over the Republicans, between Castle Folliet and Figueras, near the frontier. The losses were heavy on each side. The Carlists deny the truth of the reports charging them with atrocities at Cuenca and other places.

The telegraph office at Santander has refused to accept any dispatches relating to military operations and events of the war.

The Portuguese authorities have taken active measures to prevent any violation of the frontier by the Carlists.

The French Assembly on the 29th, voted on a resolution for dissolving the chamber. It was defeated by 332 yeas to 374 nays. After much excited discussion during successive days, it was finally voted by a large majority to adjourn from 8th mo. 6th to 11th mo. 30th. The permanent committee of the Assembly, which is to sit during the recess, has been elected. It is composed of six Legitimists, ten members of the Moderate Right and Right Centre, and nine of the left. The Bonapartists are wholly excluded.

**UNITED STATES.**—Negotiations for the balance of the five per cent. funded loan have been concluded by the Secretary of the Treasury with August Belmont & Co., in behalf of the Rothschilds of London, and I. & L. Seligman & Co., on behalf of themselves and their associates. These parties make an absolute subscription for forty-five millions of dollars, coupled with the option of taking the remainder of the loan at any time within six months. The loan is taken at par to be paid for in coin or six per cent. bonds. The balance of the loan, which it is supposed will be taken by the same parties, is \$124,000,000. If the proposed substitution of 5 per cent. bonds for those bearing 6 per cent. takes place to the extent anticipated, it will effect a reduction of \$1,790,000 annually in the interest charges.

The *San Francisco Bulletin* says: The surplus wheat for export this year from California will hardly be less than 600,000 tons. Probably about 1,000 tons is an average cargo. A fleet of six hundred ships will therefore be required to export this surplus. A large number of ships to arrive have already been chartered at \$4 per ton and upward. At this rate the freight money to be paid on this wheat will amount to \$2,400,000.

The grasshoppers or locusts continue their devastations in various parts of Minnesota, but are now moving eastwards. Great numbers of this destructive insect have also appeared in western and south-western Kansas, where they devour every green thing in their line of movement.

The Public Debt of the United States, less cash in the Treasury, amounted on the 1st inst. to \$2,141,805,375, having been reduced \$1,282,866 during the preceding month. The interest on the public debt paid during the year ending 6th mo. 30th last, was \$107,119,815.

The interments in Philadelphia for the week ending 8th mo. 1st, were 365, including 201 children under two years.

The mean temperature of the Seventh month by the Pennsylvania Hospital record, was 78.48 deg., which is one degree less than that of the Seventh mo. 1873. The highest temperature during the month was 94 deg., and the lowest 64 deg. The amount of rain 2.75 inches. The rain fall of the first seven months of this year has been 24.22 inches, against 29.28 inches in the corresponding months 1873. The average of the mean temperature of the Seventh month for the past 85 years is stated to be 75.98 deg., the highest mean during that entire period occurred in 1872, and was 82.31 deg., the lowest 68 deg., was in 1816.

**The Markets, &c.**—The following were the quotations on the 3d inst. *New York.*—American gold, 109 $\frac{3}{4}$ . U. S. sixes, 1881, registered, 117 $\frac{1}{2}$ ; do. coupons, 118 $\frac{1}{2}$ ; do. 5-20, 1868, registered, 110; do. coupon, 113 $\frac{1}{2}$ ; do. 5 per cents, 111 $\frac{1}{2}$  a 111 $\frac{3}{4}$ . Superfine flour, \$4.70 a \$5; State extra, \$5.40 a \$5.80; finer brands, \$6 a \$9.20. No. 1 Chicago spring wheat, \$1.29; No. 2 do., \$1.25; amber Tennessee, \$1.34; white Kentucky, \$1.45 a \$1.50. Old oats, 80 a 87 cts.; new, 65 a 70 cts. Rye, 94 cts. Mixed and yellow corn, 78 a 79 cts.; white, 89 a 90 cts. *Philadelphia.*—Cotton, 17 $\frac{1}{2}$  a 17 $\frac{3}{4}$  cts. for uplands and New Orleans. Superfine flour, \$3.50 a \$4; extras, \$4.50 a \$5; finer brands, \$5.50 a \$9.50. Western red wheat, \$1.25 a \$1.30; Pennsylvania, \$1.40; do. amber, \$1.45 a \$1.50; No. 1 spring wheat, \$1.20. Rye, 93 a 95 cts. Yellow corn, 81 a 82 cts. Old oats, 78 a 80 cts.; new, 72 a 73 cts. Lard, 12 $\frac{1}{2}$  cts. Clover-seed, 10 a 11 cts. The market for beef cattle was better. Sales of 1700 head at 7 $\frac{1}{2}$  a 7 $\frac{3}{4}$  cts. per lb. gross, for choice, 6 $\frac{3}{4}$  a 7 $\frac{1}{2}$  cts. for fair to good, and common 4 $\frac{3}{4}$  a 6 $\frac{1}{2}$  cts. Sheep sold at 4 $\frac{1}{2}$  a 5 $\frac{1}{2}$  cts. per lb. gross for fair to good. Receipts, 16,000 head. Corn fed hogs sold at \$10.50 a \$10.75 per 100 lbs. net. *Chicago.*—No. 1 spring wheat, \$1.06; No. 2 do., \$1.02. No. 2 mixed corn, 63 cts. New oats, 46 cts. Rye, 70 cts. Spring barley, \$1.05. Lard, 12 $\frac{1}{2}$  cts. *Cincinnati.*—Family flour, \$5.10 a \$5.40. Red wheat, \$1.03 a \$1.05. Corn, 65 a 67 cts. New oats, 48 a 52 cts. Lard, 13 cts. *Baltimore.*—Choice white wheat, \$1.40 a \$1.45; prime red, \$1.35 a \$1.40. Southern white corn, 90 a 92 cts.; yellow, 82 a 83 cts. Oats, 65 cts.

#### WANTED.

A suitable Friend to fill the station of Governess at Westtown Boarding School. Apply to Elizabeth C. Scattergood, West Chester, Pa. Lydia L. Walton, Moorestown, N. J. Hannah Evans, 322 Union St., Philadelphia. Hannah Richardson, Wilmington, Del.

#### WANTED.

A suitable Friend to take the position of Writing Teacher and Assistant Governor at Westtown Boarding School—for next Session. Apply to Charles Evans, 702 Race street, Philadelphia, Clarkson Sheppard, Greenwich, New Jersey, Joseph Walton, Moorestown, New Jersey.

#### SHELTER FOR COLORED ORPHANS.

Wanted, by the 1st of 10th mo. next, a suitable Friend for Matron for the above institution.

Application may be made to

Hannah R. Newbold, 643 Franklin St.  
Mary Wood, 524 South Second St.  
Mary Randolph, 247 North Twelfth St.  
Anna W. Lippincott, 460 North Seventh St.

#### WANTED.

An unmarried Friend to take the position of Governor at Westtown Boarding School, on or before the close of the present session, in the 10th month next.

Apply to

Clarkson Sheppard, Greenwich, New Jersey,  
Joseph Walton, Moorestown, "  
Charles Evans, 702 Race street, Philadelphia.

#### HAVERFORD COLLEGE.

The next Term will commence on Fourth-day, 9th mo. 2nd, 1874. Applications for admissions should be addressed to SAMUEL J. GUMMERE, *President*, Haverford College, Montgomery Co., Pa.

#### FRIENDS' ASYLUM FOR THE INSANE.

Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

DIED, at Jamestown, Rhode Island, on 3rd mo. 13th, 1874, after a short illness, SARAH FOSTER, wife of George W. Carr, aged sixty-six years. Of whose meekness and unassuming piety it might be said, "diligent in business, serving the Lord," to whom the principles of Friends in their purity were very precious. Calm and resigned to the last, we believe her end was peace.

—, at Flushing, Ohio, on the 1st of 4th mo. 1874, REBECCA, wife of Wm. C. Williams, in the 61st year of her age, a member of Flushing Monthly and Particular Meeting. She was as a mother affectionate and firm, as a neighbor kind and helpful, as a wife loving and faithful in an eminent degree. She expressed at times that she believed her work was done, and she saw nothing stand in her way, and had nothing to do but watch and wait her Master's time. This dear Friend was firmly attached to the doctrines and testimonies of the Society of Friends, and exemplified the same in an humble and Christian walk among men. She maintained her faculties to the last, and was favored to view with Christian fortitude the approach of the pale messenger, supplicating just at the last moment, that her gracious Master might be pleased to say that it is enough; which was mercifully granted. Her friends have a well grounded hope that her end was peace.

—, on the 16th of 5th mo. 1874, in the 75th year of his age, CHARLES ELLIS, a beloved member of the Western District Monthly Meeting, Philadelphia. His natural amiability and politeness, sanctified by the Holy Spirit, formed a character of more than usual loveliness. The afflicted, whether of body or mind, found in him a sympathizing friend. Toward all who loved the Lord Jesus Christ in sincerity, whatever their doctrinal creed or church connection, his love was manifested freely; yet his attachment to the principles of our own religious Society was strong. His summons to leave this life was sudden, yet we believe was joyfully received. He trusted not in works of righteousness, but in the atoning blood of Christ, in whom his faith had long been fixed. "Blessed is that servant whom his Lord, when he cometh, shall find so doing."

WILLIAM H. PILE, PRINTER.

VOL. XLVII.

SEVENTH-DAY, EIGHTH MONTH 15, 1874.

NO. 52.

PUBLISHED WEEKLY.

Price Two Dollars per annum, if paid in advance. Two dollars and fifty cents, if not paid in advance.

Subscriptions and Payments received by

JOHN S. STOKES,

AT NO. 116 NORTH FOURTH STREET, UP STAIRS,

PHILADELPHIA.

Postage, when paid quarterly in advance, five cents.

For "The Friend."

News from the Stars.

(Concluded from page 402.)

Nearly four years ago, Dr. Huggins succeeded in showing that the bright star Sirius is travelling at an enormously rapid rate away from us. In other words, besides that rapid thwart motion which is shifting the place of this star upon the heavens, the star has a rapid motion of recession. I propose here briefly to describe and explain the method.

Conceive that a person, standing on the edge of a steadily-flowing stream, throws corks into it at regular intervals—say one cork per second. These would float down the stream, remaining always separated by a constant distance. Thus, if the stream were flowing three feet per second, the corks would be a yard apart (supposing, for convenience of illustration, that each cork was thrown with exactly the same force and in exactly the same direction.) Now, if a person a mile or so down the stream saw these corks thus floating past, he could infer that they had been thrown in at regular intervals; and, moreover, if he knew the rate of the stream, and that the corks were thrown in by a person standing at the river's edge, he would know that the interval between the throwing of successive corks was one second. But, *vice versa*, if he knew the rate of the stream, and that the corks were thrown in at intervals of one second, he could infer that the person throwing them was standing still. For let us consider what would happen, if the cork-thrower sauntered up-stream or down-stream while throwing corks at intervals of one second. Suppose he moved up-stream at the rate of a foot per second; then, when he has thrown one cork, he moves a foot up-stream before he throws the next; and the first cork has floated three feet down stream; hence the second cork falls four feet behind the first. Thus the common distance between the corks is now four feet instead of three feet. Next suppose he saunters down-stream at the rate of a foot per second; then, when he has thrown one cork, he moves a foot down-stream before he throws the next; and the first cork has floated three feet down-stream; hence the second cork falls only two feet behind the first. Thus the common distance between the

corks is now two feet instead of three feet. It is clear, then, that the person standing a mile or so down-stream, if he knows that the stream is flowing three feet per second, and that his friend up stream is throwing one cork in per second, can be quite sure that his friend is standing still if the corks come past with a common interval of three feet between them. Moreover, he can be equally sure that his friend is sauntering up-stream if the corks come past with a common interval exceeding three feet; and that he is sauntering down-stream, if the common interval is less than three feet. And if, by some process of measuring, he can find out exactly *how much* greater or how much less than three feet the interval is, he can tell exactly how fast his friend is sauntering up-stream or down stream. It would not matter how far down-stream the observer might be, so long as the stream's rate of flow remained unchanged; nor, indeed, would it matter, even though the stream flowed at a different rate past the observer than past the cork-thrower, so long as neither of these two rates were liable to alteration.

Now, we may compare the emission of light-waves by a luminous object to the throwing of corks in our illustrative case. The rate of flow for light-waves is indeed infinitely faster than that of any river, being no less than 185,000 miles per second. The successive light-waves are set in motion at infinitely shorter time-intervals, since for extreme red light there are no less than 458,000,000,000 undulations per second, and for extreme violet no less than 727,000,000,000,000; but these specific differences do not affect the exactness of the illustration. It is obvious that all that is necessary to make the parallel complete is that the flow of light-waves shall reach the observer at a constant rate (which is the actual case), and that he shall know, in the case of any particular and distinguishable kind of light, what is the rate at which the wave-action is successively excited, and be able to compare with this known rate the rate at which they successively reach him. If they come in quicker succession than from a luminous body at rest, he will know that the source of light is approaching as certainly as our observer down-stream would know that his friend was sauntering towards him if the corks came two feet apart instead of three feet. If, on the contrary, the light-waves of a particular kind come in slower succession than from a body at rest, the observer will know that the source of light is receding, precisely as the river side observer would know that his friend was travelling away from him if the corks came past him four feet apart instead of three.

Now, the stellar spectroscopist can distinguish among the light waves of varied length which reach him, those which have a particular normal length. He analyses star-light with his spectroscope, and gets from it a rainbow-tinted streak crossed by dark lines.

These dark lines belong to definite parts of the spectrum; that is, to such and such parts of its red, or orange, or yellow, or green, or blue, or indigo, or violet portion. Thus they correspond to light having a particular wavelength. And *many* of these lines in stellar spectra are identifiable with the lines due to known elements. For instance, in the spectrum of Sirius there are four strong dark lines corresponding to the known bright lines of the spectrum of hydrogen. Thus the wavelength corresponding to any one of these dark lines is perfectly well known to the spectroscopist from what he has already learned by examining the bright lines of hydrogen. Now, if Sirius were receding very rapidly, the wavelength corresponding to one of these lines would be lengthened; it would correspond, in fact, to a part of the spectrum nearer the red end or the region of longer light-waves, and thus the dark line would be shifted towards the red end of the spectrum; whereas, on the contrary, if Sirius were very rapidly approaching, the dark line would be shifted towards the violet end of the spectrum. All that would be necessary would be that the rate of approach or recession should bear an appreciable proportion to the rate at which light travels, or 185,000 miles per second. For, reverting to our cork-thrower, it is clear that if he travelled up-stream or down-stream at a rate exceedingly minute compared with the stream's rate of flow, it would be impossible for the observer down stream to be aware of the cork-thrower's motion in either direction, unless, indeed, he had some very exact means of measuring the interval between the successive corks.

Now the spectrum of a star can be made longer or shorter according to the dispersive power employed. The longer it is, the fainter its light will be; but, so long as the dark lines can be seen, the longer the spectrum is, the greater is the shift due to stellar recession or approach; and therefore the more readily may such recession or approach be detected. But, with the instrument used by Dr. Huggins four years ago, it was hopeless, save in the case of the brilliant Sirius (giving more than five times as much light as any other star visible in our northern heavens), to look for any displacement due to a lower rate of recession than some hundred miles per second (little more than the two-thousandth part of the velocity of light). What was to be done, then, was to provide a much more powerful telescope, so that the stellar-spectra would bear a considerably greater degree of dispersion. With admirable promptitude the Royal Society devoted a large sum of money to the construction of such an instrument, to be lent to Dr. Huggins for the prosecution of his researches into stellar motions of approach and recession. This telescope, with an aperture of fifteen inches, and a light-gathering power somewhat exceeding that usual with such an aperture, was accordingly completed, and pro-

vided with the necessary spectroscopic appliances. Many months have not passed since all the arrangements were complete.

In the meantime, I had arrived at certain inferences respecting the proper motions of the stars, on which Dr. Huggins's researches by the new method seemed likely to throw an important light.

I had constructed a chart in which the proper motions of about 1 200 stars were pictured. To each star a minute arrow was affixed, the length of the arrow indicating the rate at which the star is moving on the celestial vault, while the direction in which the arrow pointed shows the direction of the star's apparent motion. This being done, it was possible to study the proper motions much more agreeably and satisfactorily than when they were simply presented in catalogue. And certain features, hitherto unrecognized, at once became apparent. Amongst these was the peculiarity which I have denominated "star-drift;" the fact, namely, that certain groups of stars are travelling in a common direction. This was indicated, in certain cases, in too significant a manner to be regarded as due merely to chance distribution in these stellar motions; and I was able to select certain instances in which I asserted that the drift was unmistakable and real.

Amongst these instances was the one before alluded to of a very remarkable kind in the "seven stars" of Ursa Major. Now when the proper motions of these seven stars had been mapped, I found that whereas Alpha and Eta are moving much as they would if the Sun's motion were alone in question, the other five are all moving at one and the same rate, in almost the exactly opposite direction. Moreover, a small star close by Zeta, is moving in the same direction and at the same rate as the rest of this set. And besides this star Zeta has a telescopic companion which accompanies him in his motion on the celestial sphere.

It remained, however, that the crucial test of motion-measurement should be applied.

In the middle of May last (1872), I received a letter from Dr. Huggins announcing that the *five* are all receding from the earth. He found that Alpha is *approaching*. As to Eta he was uncertain as to the direction of motion, and mentioned that "the star was to be observed again." He subsequently found that this star is receding. But whereas all the five are receding at the enormous rate of 20 miles per second, Eta's recession was so much smaller that, as we have seen, Dr. Huggins was unable to satisfy himself at a single observation that the star was receding at all.

We have at length, then, evidence, which admits of no question—so obviously conclusive is it—to show not only that star-drift is a reality but that subordinate systems exist within the sidereal system. We moreover recognize an unquestionable instance of a characteristic peculiarity of structure in a certain part of the heavens. For, though star-drift exists elsewhere, yet every instance of star-drift is quite distinct in character—the drift in Cancer unlike that in Ursa, and both these drifts unlike the drifts in Taurus, and equally unlike the drift in Aries or Leo. Much more, indeed, is contained in the fact now placed beyond question, than appears on the surface. Rightly understood, it exhibits the sidereal system itself as a scheme utterly unlike what has hitherto been imagined. The

vastness of extent, the variety of structure, the complexity of detail, and the amazing vitality, on which I have long insisted, are all implied in that single and, as it were, local feature which I had set as a crucial test of my theories.

#### Fidelity Hull.

For "The Friend."

The following interesting account of one who was called in early life from the trials and temptations of time to a better inheritance, is given in the third volume of *Piety Promoted*.

"She was the daughter of Thomas and Elizabeth Stark, and in her early years she was in some degree inclined to indulge herself in a deviation from the simplicity of her religious profession; yet not by any means in such a degree as is usually termed gay or extravagant. This deviation her more enlightened judgment afterwards disapproved. About the twentieth year of her age she was married to Samuel Hull, of Uxbridge, Eng., and became the mother of two children, from whom, however, she was soon separated, a period of declining health ending in death, about the twenty-third year of her age.

Early in her illness her heart became more and more disposed to seek for the knowledge of the Lord; and when her disease gained ground, she entertained much doubt of recovery; yet said that she should not much mind the leaving of this world, if she had an assurance of happiness hereafter.

She now saw the vanity of indulging in dress; also the pernicious tendency, to young people, of reading novels and similar productions. Pernicious indeed is this practice. Simply considered it is a waste of time. It likewise indisposes the mind for the serious concerns of real life; and for its truest, greatest concern, the preparation for a better, through the grace and redemption of Jesus Christ our Lord. Her anxiety on this account was manifested by a letter which she wrote to a relation; in which she entreated her, that if she had any such books, they might be destroyed for the sake of her children. Similar advice she also left in writing, for such as might have committed to them the care of her own son and daughter.

A few months before her decease, a Friend called to visit her; and believed it right to address her with a few words of encouragement. She was at that time preserved in a good degree of resignation, though she had not yet that full assurance of happiness which she had longed for. Nevertheless, at the time, his words were particularly consoling; and in a subsequent opportunity, he was made instrumental of more complete relief to her much tried mind. She broke out as it were in rapture, 'Why does the Lord deal thus bountifully with me, a poor sinful creature, underserving the least of his mercies? What is this I feel? Thou hast healed me of all my maladies, both inwardly and outwardly. O my Lord, and my God, how sweet is thy presence! What shall I render unto thee? Oh! this is what I wanted. Now I am happy. I thank thee, O Lord; for thou indeed art good.'

She then paused; but soon she turned her eyes affectionately on her mother, saying, 'Thou hast no need to sorrow for me, for it will be well with me.' Nor was this merely a sudden perception of unexpected relief, and a transient effusion of joy. The next day she

told some visitors of her favored state, and expressed herself in a very tender manner. 'The Lord,' said she, 'is good. Yesterday was a memorable day to me. I think I shall never forget it. My bonds are unloosed. There is balm in Gilead. I feel more sweetness than I can express in words.' She also expressed her hope that her visiting friends could feel something of the same; and she entreated her husband to give her up freely.

But although her consolation was thus great, and at one time, as we have seen, so transcendent as to supersede her sense of bodily infirmity and pain; her disease advanced, and her consequent suffering was often felt and acknowledged, though not repined at. She once said, 'My tribulation is great. Oh, how careful we had need be, to make the Lord our friend; for if I did not feel him near I could not support myself under this great affliction.' Nevertheless, she had a word of encouragement to most of those who visited her, and she often exclaimed that God is love; and that those who dwell in him, dwell in love.

She had once an opportunity of conference with two Friends. They were encouraging her not to withhold any thing she might have to communicate to them. Making a pause, she replied to this effect: 'I cannot speak unless power is given to me. I have felt at this season much stripped, and expect to be tried with the buffetings of Satan. What can I say to the Lord's servants; but that they should hold on their way, and they will experience peace and joy for evermore.'

Various admonitory and encouraging remarks were written or uttered by her in the course of her illness. She told some of her relations, by letter, that if they could feel the peace which she felt, they would leave all the transitory enjoyments of this world to endeavor after it. She often earnestly desired those about her to keep near to the Almighty, and said that he would do great things for them. Once she said, 'It is clearly presented to my view that the gates of heaven are open to receive me.' She frequently remarked, that the peace and comfort of her mind overbalanced her very great bodily afflictions and infirmities.

Once when some of her relations returned from meeting, she addressed them thus: 'I hope you have had a comfortable opportunity together;' and she remarked that though for some time she had been prevented from going to meeting, yet she was often comforted by the divine presence. \* \* \*

About three days before she departed, her husband's father and other relatives being present, after a solemn pause, she was raised in a wonderful manner in praises and prayer to the Almighty; and gave such good admonitions to those around her, as were the means of greatly humbling and contriting their minds. She departed in great peace the 15th of the Third month, 1792."

#### The Earthworm.

About twenty years since, an eminent naturalist, while visiting a friend in the country, was surprised to hear from his host, that on some pasture-land which he possessed, an unaccountable change had taken place in the character of the soil, which in various fields had, without apparent cause, materially increased in depth during the previous years, and that cinders and other substances, which

had originally been thrown upon the surface, had apparently sunk to a considerable depth in the soil. Curiosity induced him to try a few experiments in order to ascertain the cause of this strange phenomenon, and with this view he dug several holes in different fields; in these he found similar indications of a gradually increasing thickness in the surface-soil, and beneath, an accumulation of pebbles, cinders and lime, which had originally been deposited on the surface. In one field, for instance, the cinders which had been thrown on the surface three years previously, were buried to the depth of an inch; in another they were buried three inches deep, and formed a layer an inch in thickness. But let us give the narrative in his own words:—

"The appearance in all the above cases was as if (in the language of farmers who are acquainted with these facts) the fragments had 'worked themselves down.' It is, however, scarcely possible that cinders or pebbles, and still less powdered quicklime, could sink through compact earth and a layer of matted roots of vegetables, to a depth of some inches. The explanation of these facts which occurred to Mr. Wedgewood" (his host), "though it may appear trivial at first, I have no doubt is the correct one, namely that the whole operation is due to the digestive process in the common earthworm. On carefully examining between the blades of grass in the fields above described, I found scarcely a space of two inches square without a little heap of cylindrical castings of worms. It is well known that worms in their excavations swallow earthy matter, and that, having separated the portion which serves for their nutriment, they eject at the mouth of their burrows the remainder in little intestine-shaped heaps. These partly retain their form until the rain and thaws of winter spread the matter uniformly over the surface. The worm is unable to swallow coarse particles, and as it would naturally avoid pure or caustic lime, the finer earth, lying beneath the cinders, burnt marl or lime, would be removed by a slow process to the surface. This supposition is not imaginary, for in the field in which the cinders had been spread out only half a year before, I actually saw the castings of the worms heaped on the smaller fragments. Nor, I repeat, is the agency so trivial as at first it might be thought, the great number of earthworms, as every one must be aware who has ever dug in a grass-field, making up for the insignificant quantity of the work which each performs.

"On the idea of the superficial mould having been thus prepared, the advantage of old pasture-land, which, it is well known, farmers in England are particularly averse to break up, is explained, for the length of time required to form a thick stratum must be considerable. In the peaty field, in the course of fifteen years, about  $3\frac{1}{2}$  inches had been well prepared; but it is probable that the process is continued, though at a very slow rate, to a much greater depth. Every time a worm is driven, by dry weather or any other cause, to descend deep, it must bring to the surface, when it empties the contents of its body, a few particles of fresh earth. Thus the manures added by man, as well as the constituent parts of the soil, become thoroughly mingled, and a nearly homogeneous character is given to the soil. Although the conclusion may appear at first startling, it will be difficult to

deny the probability, that every particle of earth, forming the bed from which the turf in old pasture-land springs, has passed through the intestines of worms, and hence the term 'animal mould' would in some respects be more appropriate than that of 'vegetable mould.'" He concludes by remarking, "that the agriculturist, in ploughing the ground, follows a method strictly natural; he only imitates in a rude manner, without being able either to bury the pebbles, or to sift the fine from the coarse earth, the work which Nature is daily performing by the agency of the earthworm."

With regard to the latter portion of these remarks, exemplifying, as they do, in a forcible manner the principle to which we have more than once alluded in the course of this short history, namely that Nature has not bestowed all these pains on the formation of the worm without some useful end, we would now also add a few words in concluding this section of our treatise.

Those who know what astonishing results are produced by the labors of the minute and (compared with the worm) still more humble Madrepore polyp, commonly known as the Coral insect; how in the course of ages it builds up continents in the midst of the ocean; will not for an instant be inclined to doubt that the worm aids in the deposition of the surface-soil, simply on the score of its apparent insignificance; and although the traces of the Annelide in the geological formations of past ages are but slight, yet it is believed by reflecting observers that the little creature has (as in the case of the polyp just referred to) pursued its labors from a very early period in the earth's history.

But be that as it may; suppose its operations have only been confined to the deposition of a portion of the existing mould, a circumstance which we believe to be placed beyond doubt; still our assertion holds good, that its history affords a striking exemplification of the divine truth, that no creature has been formed without its special ends, and that the humblest are frequently selected to carry out the most gigantic natural operations.—*The Earthworm and Housefly.*

For "The Friend."

The following narrative has been prepared for the readers of "The Friend," in hopes it may be of use to some in this day who are looking outward for that which alone will be found within.

In the eastern part of the State of Ohio there lived a young man in the year 1842, who at that time had not quite reached the twenty-first year of his age, and during this critical period of his life, he was much exposed to the corrupting influence of the world, and was led away by the example of those around him, into many things inconsistent with the conduct of a true christian. Though he had a birth-right membership in the Society of Friends, yet, living some miles from any meeting of Friends, he at that time seldom attended their meetings; but still he did not feel satisfied without some kind of religion, and sometimes attended the meetings of other religious professors, and was quite taken with their preaching and performances, and at times felt almost ready to join in with them. About this time our beloved Friend Wm. Evans, visited the meetings of Ohio Yearly Meeting, and was at the meeting nearest to where this

young man lived, and in the evening stopped at his mother's, who was then a widow, to stay over night. Though an entire stranger to the family, he seemed soon to be brought under exercise, and before they retired for the night he spoke at considerable length to some one in the little company present, in a particular manner, and quoted the saying of our Saviour, who, in answer to the query, when the kingdom of God should come, replied: "The kingdom of God cometh not with observation, neither shall they say, Lo! here, or, lo! there, for behold the kingdom of God is within you." He said that there were many saying, as it were, in this day, lo! here is Christ, and lo! he is there; but go not after them, nor follow them, for the seed of the kingdom will be found within, and not by outward observation. Religion did not consist in outward performances, but in knowing the heart-changing power of the Holy Spirit. There was in this day too much of a looking outward for that which only would be found within. He added much more on this subject, which is not now remembered, and, in the morning, when he was about starting away, he again spoke, for the most part on the same subject, which made a lasting impression on that young man's mind, which he remembers distinctly to this day. It was the beginning of a change in his life, which still continues, for he is now, and long has been, endeavoring to walk in that strait and narrow way that leadeth unto life eternal, though he has nothing to boast of.

Wm. Evans in his Journal says but little in regard to the circumstance, merely stating that he staid that night with a widow, and had some service in the morning, before he left, and said he realized the truth of the saying: he that watereth others shall be watered himself. He, no doubt, was divinely commissioned to speak to that young man, and was sent to that house for that purpose.

J. H.

Ohio, 7th month 30th, 1874.

#### Mecanique Celeste.

Those who took the trouble to read in a recent number of the *Advocate* an article entitled "Mary Somerville and Mecanique Celeste," may wish to know something about the great work of M. La Place, bearing the above title. It is hardly to be presumed that the statement of Lord Brougham relative to the ignorance concerning this book and its contents holds true at the present time; yet it is a fact that very few even among scholars know any thing about it except the name, and only a very small fraction of this number are acquainted with the merit and extent of the work. *Mecanique Celeste* may be regarded as a comprehensive commentary on the law of gravitation, reducing all the known phenomena of the motions of the heavenly bodies to this wonderful law of nature, the grandest generalization of the human mind. The work is divided into two parts. In the first are given the methods and formulæ for determining the motions of the centers of gravity of the heavenly bodies, their figures, the oscillations of the fluids which are spread over them, and the motions about their centers of gravity. In the second part, these formulæ are applied to the planets, the satellites, and the comets.

The celebrated problem of these bodies is investigated in all its detail. Each planet

and satellite is tracked through the heavenly spaces, notwithstanding it is influenced by all the rest, directly as the mass, and inversely as the square, of their distance from it. The solution of this problem enables the astronomer to give the position of a heavenly body at any time past, or predict its place during the ages to come. The perturbations of the heavenly bodies, giving rise to changes in the position of their orbits in space, also the form of the orbits, are calculated. These elements, which in ordinary descriptive astronomy, are regarded as fixed and constant, are subject to slow changes, running through vast ages. To investigate the laws, periods and limitations of these changes taxed the highest powers of the human mind.

The solution of this difficult problem by La Grange and La Place furnishes one of the most interesting chapters in Celestial Mechanics. By it we learn that the stability of the solar system is secured for all time. Newton predicted the ultimate wreck of our system in consequence of these changes running on indefinitely in one direction.

The secular inequalities of the motions of Jupiter and Saturn, may serve to illustrate the remarkable law of equilibrium prevailing among the celestial bodies. The orbits of these planets gradually approach to and recede from each other, making a complete vibration by returning to the same relative position in space in about 50,000 years. The variation of the nodes and inclinations are confined within narrow limits.

The eccentricities of these planets are also subject to secular changes, which, if continued in one direction would eventually entirely change their climate. The cycle is completed in about 70,000 years. These changes are likewise confined within certain narrow limits. The elliptical orbit of the earth for thousands of years has been approaching a circle, by virtue of which the moon's mean motion has been accelerated for a corresponding time. After a while it will reach its limit and then begin its return.

The rotary motion of the heavenly bodies has caused them to assume a spheroidal form. This figure, deviating slightly from the sphere, has given rise to many interesting phenomena, such as the precession of the equinox, which makes a complete revolution in about 25,000 years; also the libration and mutation of the moon. Thus the figure of the heavenly bodies gives rise to many interesting problems in physical astronomy.

The theory of the moon, which investigates the many inequalities in the motion of that luminary in consequence of the powerful attraction of the sun as the disturbing body, fills one book. The comparison of the preceding theories with observation is interesting as showing the correctness of theory and the truthfulness of the law of gravitation, on which it is founded.

The theory of the satellites of Jupiter, filling another book, is interesting and important. On account of the quickness of their revolutions, all the great changes which time would not develop, except with great slowness, in the planetary system, are passed through in a few years, thus enabling the astronomer to test the correctness of theory by observation. The theories of cometary motion and Saturn's rings are developed in all their fullness.

Such are some of the most important sub-

jects discussed in the "Mecanique Celeste." In the original there are ten books and half as many volumes. In this country we have a translation, with very extended comments and expositions, by Nathaniel Bowditch, one of the most eminent mathematicians our country has produced. This translation makes four large quarto volumes of about 90 pages each. In order to read this translation, so fully elucidated, the graduate from our colleges will find it necessary to go farther in trigonometry and calculus than his professors have taken him. He will then need all his resources in mathematical science, and a measure of mathematical genius besides.

Let it be remembered, therefore, that Mrs. Somerville, without the aids afforded the student of the present day, by the force of her incomparable genius, not only read but wrote an account of this ponderous and abstruse work. Without aid from other mathematical minds she leaped the immense chasms left by La Place in his equations and formulae, and which Bowditch has bridged for the benefit of other students of physical astronomy. No wonder the simple fact that she had accomplished such a task made her famous in the eyes of those who were at all qualified to appreciate the magnitude and difficulty of her achievement.—*Christian Advocate*.

#### A Plain Exterior.

"To accuse any Monthly Meeting of frequently preferring individuals for service in the church, simply or chiefly for their exterior plain appearance, is very unjustifiable. We imagine no one can possibly suppose that a plain exterior is *in itself*, sufficient qualification [for service in the church]; but other things being equal, there can be no question of its being a recommendation—if it does not qualify, neither of itself, does it *disqualify*. Whereas a fashionable exterior, with or without the requisite essentials, must be, in itself, a forbidden element in the character."—*British Friend*, vol. xxiv. p. 119.

#### Taxation that Kills.

In a recent number of *Scribner's Magazine*, Dr. S. G. Holland makes the following comments upon the statistics contained in the report for 1873, of Ruffner, Superintendent of Public Instruction in Virginia: showing the destructive effects upon its prosperity, in every sense, of the consumption of ardent spirits, within its limits. He says: "There are 2856 retail liquor shops in the State. If these shops sell the average amount of liquor sold by the liquor shops of the United States, and there is no reason to suppose they do not, the annual amount consumed is \$10,622,888. There are additions to be made to this from wholesale dealers and patent medicines which are bought and consumed for their alcohol, that raise the aggregate to \$12,000,000. There is no doubt that the sum total exceeds these terrific figures, which leave out entirely the alcohol used for mechanical and manufacturing purposes. This sum exceeds the total value of all the farm productions, increase in live stock, and value of improvements, of the year 1870, according to the U. S. Census, in the seven best counties of the State, and by just about the same amount, the value of the productions of forty-five smaller counties during the same year. The wheat crop of Vir-

ginia, for 1870, was, in round numbers, 8,000,000 bushels. This, at \$1.50 per bushel, which is more than was received, makes exactly, \$12,000,000. In brief, Virginia drank up its entire wheat crop to the last gill!

Ruffner presents other illustrative estimates, but nothing can add to the force of those which we have cited. He then goes on to show that the total taxation for State purposes, including legislation, salaries, courts, institutions for dumb, blind, and insane, public schools and interest on the public debt only reaches the sum of \$3,500,000, while to add to this sum all the local taxation, would not equal the burden which the people voluntarily lay upon themselves. But this is not all. The injury done to public order, and to private health and enterprise, is to be taken into account. Ruffner believes that the time wasted, the injury done to business, and the cost of crime, pauperism, insanity and litigation resulting from intemperance, would be more costly than the liquor itself. Then the Superintendent, with figures furnished by the distinguished actuary, Neison, in the interests of life insurance, shows how much valuable life is thrown away in the State. Between fifteen and twenty years of age the number of deaths of temperate and intemperate persons, is as 10 to 18; between twenty-one and thirty, 10 to 51; between thirty and forty, 10 to 40. At twenty years of age a temperate person's chance for life is 44.2 years—intemperate, 15.6; at thirty, the temperate man's chance is for 36.5 years, intemperate, 13.8; at forty years, the proportionate chances are 18.8 to 11.6 years. Thus money, health, morality, industry, good order, and life itself, in enormous sums, go into this bottomless caldron. Is their any return of good for all this expenditure? None. The loss is entire, and irredeemable. If the whole had gone over Niagara Falls, something would be picked up, on the shore below, but nothing is left from this waste. A bushel of grain transformed into alcohol, and swallowed as a beverage, is a bushel of grain annihilated. If all that is spent for liquor were put into a huge furnace, and burned, we should have the ashes; but as it is, we have no ashes except such as, with shame and tears, we are obliged to bury.

We have not displayed these figures for the special purpose of reading a lesson to Virginia, for that State is no worse than the rest of the States of the Union; but one of her faithful officers has brought out the statistics, and the country ought to feel very much obliged to him for them. They give us the facts that account for all our public distress. We consume as a nation, \$600,000,000 a year in spirituous liquors, a sum which only needs a very few multiplications to pay the whole public debt of the country. Liquor is at the bottom of all our poverty. If the tax for it were lifted, there would not need to be a man, woman or child without bread. If it could be lifted from the Southern States alone, it would not take five years to make them not only prosperous but rich."

The business in which we cannot ask the protection and assistance of God, cannot be an innocent pursuit; the amusement for which we *dare not* thank Him, cannot be an innocent pleasure.

Stand in awe and sin not: commune with your own heart upon your bed and be still.

For "The Friend."

## Indian Affairs.

(Continued from page 403.)

The present unsettled condition of some of the tribes of Indians in the Territories, has attracted public attention to this subject, and the fragmentary incidents related in the newspapers from week to week, whilst exciting general interest, have also tended in some measure to produce confused ideas of the whole truth respecting these people, and especially of what is known as the "peace policy," inaugurated by President Grant in 1869, and partially entrusted to the Society of Friends to put in practice in governing the Aborigines. With the hope of spreading some information before the readers of "The Friend," on the subject, it is proposed to give an outline of the origin and progress of the "mission work" and government agency now being carried on by the Society of Friends in this connection. In doing this, a brief sketch of the history of the Indian tribes west of the Mississippi since 1851, seems necessary for a clear understanding of the subject. The following extracts from the Annual American Cyclopædia for 1867, will furnish this information.

"Up to the year 1851, the vast uninhabited plains eastward of the Rocky Mountains were admitted to be *Indian territories*, and numerous tribes roamed at will from Texas and Mexico to the northern boundary of the territory of the United States. At that time the discovery of gold in California drew a tide of immigration across this wide reservation; and it was found necessary to make a treaty with several tribes, according to the provisions of which a broad highway was opened to California, and the tribes restricted within certain limits, but with the privilege of ranging over the belt reserved as a route of travel, in their hunting-excursions. The Government, moreover, agreed to pay the Indians \$50,000 a year, for fifteen years, in consideration of the privilege granted to immigrants to cross the plains without molestation.

"The boundaries assigned by this treaty to the Cheyennes and Arrapahoes included the larger part of the present Territory of Colorado, while the Crows and Sioux were to occupy the tract of land now traversed by the Powder River route to Montana. Some years after the treaty above mentioned was made, gold and silver were discovered in Colorado upon the Indian reservations, and settlers poured in regardless of the rights of these tribes; and when the lands were in great part taken up by the intruders, another treaty was made to secure them in their possessions. This took place on the 18th of February, 1861. By this new treaty these Indians gave up a large extent of territory, and agreed to confine themselves to a small district, situated upon both sides of the Arkansas River, and along the northern boundary of New Mexico; and the United States was to protect them in these possessions, and pay an annuity of \$30,000 to each tribe for fifteen years, and to furnish them with stock and agricultural implements. From this time to April, 1864, no difficulties occurred between these tribes and the white inhabitants of Colorado.

"During the summer of 1864 complaints were made of Indian depredations and robberies upon the property of settlers. Colonel Chivington, who had command of the troops stationed at Denver, permitted a subordinate officer to set out with a detachment of men to

punish the Indians for this offence. The Cheyenne village of Cedar Bluffs was attacked, and 26 Indians killed, 30 wounded, and their property distributed as plunder among the soldiers. After this petty hostilities were kept up during the summer and fall, but the Indians professed a desire for peace, and applied to the commander of Fort Lyon, Major Wynkoop, to negotiate a treaty to secure it. The Indians were commanded by that officer to collect their people about the fort, and were assured of safety. They gathered about 500 men, women and children to this place, and while there, under promise of protection, these defenceless people were attacked by Colonel Chivington and slaughtered without mercy. This atrocious affair, known as the Sand Creek massacre, was perpetrated on the 29th of November, 1864. A war with these tribes immediately ensued, which drew 8,000 men from the forces then engaged in suppressing the insurrection in the South, and absorbed \$30,000,000 of the treasure of the country. No more than fifteen or twenty Indians were killed during the entire campaign of 1865, and the attempt to obtain peace by means of war proved utterly futile. Commissioners were accordingly appointed in the autumn of that year (1865), to procure a council with the hostile tribes, and, if possible, settle upon the terms of a treaty. The Commissioners met the chiefs of the Cheyennes and Arrapahoes, and other tribes of that region, at the mouth of the Little Arkansas, in October, 1865, and induced them to give up their reservation upon the Arkansas, and accept another in the State of Kansas, with the privilege of ranging over the uninhabited plains which had formerly been their own. When this treaty came before the Senate for ratification, it was so amended as to exclude these tribes entirely from the State of Kansas, and they were left with nothing but their hunting privileges on the unsettled lands of the plains. Notwithstanding this material defect in the ratified treaty, the peace was strictly preserved by these southern tribes through the year 1866.

"During the fifteen years for which annuities had been promised by the treaty of 1851, the Sioux and Crows to the north of the great line of overland travel remained unmolested by the whites. The Crows had been driven into Montana by the Sioux, and the latter tribe now occupied the wide range of territory originally assigned to both. Territories to the south had become populous with immigrants, and civilization was crowding toward them from the East, when wild rumors of rich mines in Montana, beyond them to the northwest, attracted the fatal stream of immigration across their lands. Their rich hunting-grounds were now narrowed down to the valley from the north of which flowed the Powder River. Their annuity from the Government of the United States had ceased, and it was more than ever important that the remnant of their hunting-ranges should remain undisturbed, for they would be dependent on them altogether for subsistence.

"At this juncture of their affairs, orders were issued by the commanding officers of the Military Departments of the Missouri and of Platte, to establish several military posts along the new route of travel to the Territory of Montana. On the 15th of June, 1866, the necessary orders were given to garrison Forts Reno, Phil Kearney, and C. F. Smith. Fort

Phil. Kearney was established on the 15th of July, and C. F. Smith on the 2d of August. The Indians notified the troops from the first, that the occupation of this territory would be resisted. Their warning was disregarded, and a sharp warfare raged all along this route through the late summer and the autumn of this year, culminating in the slaughter of a detachment of soldiers at Fort Phil. Kearney on the 21st of December. A wagon train had been sent a short distance from the fort, attended by an escort, to procure lumber, when they were set upon by a party of Indians. Brevet-Lieutenant-Colonel W. J. Fetterman was then ordered out with forty-nine men to the rescue of the wagon train, and the whole company, including its commander, were killed.

"Associated with these hostile tribes engaged in the Sioux war in the north, was a tribe of Cheyennes related to the Cheyennes of the south; and no sooner did the news of the open hostilities on the Powder River trail reach the kindred tribes of Nebraska and Colorado, than the greatest apprehension prevailed that war would be kindled also on the line of the Pacific Railroad. When this excitement first began, General St. George Cook, in command at Omaha, forbade the sale of arms and ammunition to the Indians within the limits under his command. This only increased the irritation of the Cheyennes and Arrapahoes, for they depended upon their regular supplies of ammunition for the uses of the chase.

"Such was the state of things at the opening of the year 1867. The Sioux and Cheyennes of the north had exasperated and alarmed the troops on the Powder River route, and offers which had been made to treat with them, they would not listen to, until the forces should be withdrawn. In the south the Cheyennes and Arrapahoes, and the kindred tribes of the Kiowas, Camanches, and Apaches, had not yet forgotten the cruel massacre of Sand Creek. They had been forced from the rich lands of Colorado, they had been left with only the poor privilege of ranging the plains for buffalo and other game; and finally this privilege was rendered worthless by the order forbidding the sale of arms and ammunition, which was made early in January at the Arkansas posts also. There was a feeling of mutual distrust, and threats were muttered by the leading chiefs of the Indian tribes of a general warfare at the opening of spring.

"The United States forces were under the command of Lieutenant-General William T. Sherman, of the Military Division of the Missouri. This division was divided into three departments, that of Dakota to the north, commanded by General A. H. Terry; that of the Platte, in the middle, commanded by General C. C. Augur; and that of the Missouri, to the south, commanded by General W. S. Hancock.

"The Indians engaged in the war were the northern Cheyennes and Arrapahoes, about 800 warriors; and various bands of the great Sioux tribe, numbering 1,200 or 1,300; these were engaged in the north, and were responsible for the Fort Phil. Kearney slaughter. On the plains to the south were about 500 warriors of the southern Cheyennes and Arrapahoes. The Kiowas, Camanches and Apaches, have substantially observed the stipulations of the treaty of 1865.

"Military operations against these tribes

were entirely ineffectual in suppressing hostilities; and according to the testimony of General Sherman, 50 Indians could 'check-mate' 3,000 soldiers. The same officer recommended peaceful negotiations as the only means of putting an end to the ravages on the plains.

"An act of Congress was passed on the 29th of March, in which there was a provision for repealing 'all laws allowing the President, the Secretary of the Interior, or the Commissioner of Indian Affairs to enter into treaties with any Indian tribe;' but this part of the act was repealed in June following, and on the 20th of July an act was passed 'to establish peace with certain hostile Indian tribes,' which provided for the appointment of commissioners, with a view to the following objects:

"1. To remove if possible, the causes of war.

"2. To secure, as far as practicable, our frontier settlements, and the safe building of the railroads looking to the Pacific.

"3. To suggest or inaugurate some plan for the civilization of those Indians.

"The northern tribes of Indians to the east of the Rocky Mountains number upwards of 60,000, and include the powerful bands of the Sioux, Crows, northern Cheyennes and Arapahoes, besides numerous less important nations. The southern tribes include the large nations of the Cherokees, Creeks, and the Choctaws, as well as the Kiowas, Camanches, and southern Cheyennes and Arapahoes, and various lesser bands, forming a sum total of more than 85,000. Each of these two grand divisions is collected on a reservation of their own; the northern district bounded on the north by the 46th parallel, east by the Missouri river, south by Nebraska and west by the 104th meridian; the southern district bounded north by the State of Kansas, east by Arkansas and Missouri, south by Texas, and west by the 100th or 101st meridian."

(To be continued.)

For "The Friend."

Listen, youthful reader, to the voice that is mightier than the noise of many waters. Art thou faithful in little things? or art thou seeking to do something great, and to accomplish much in thy own way? Art thou willing to take up thy cross daily in the paths of self denial, and follow a crucified Saviour whithersoever He may lead; for He has cast up a holy way for all his humble, faithful disciples to walk in. Art thou obedient like Moses, who when the command was given, "put off thy shoes from off thy feet, for the place whereon thou standest is holy ground," obeyed the word of the Lord. There may be a covering of the mind, not acceptable in the Divine sight, and the command to thee may be to put it off from thee. My youthful reader! remember, "obedience is better than sacrifice, and to hearken to the voice of the Lord, than the fat of rams."

Q. U.

*The Life of an Indigo Planter.*—For some six months in the year the indigo planter in India is in the saddle from six o'clock in the morning until noon, superintending the ploughing, the sowing, the weeding and the reaping. About the end of June, says the London News, "Mahaye" begins, and lasts until the beginning of September. "Mahaye" is the manufacture of the indigo, the mashing and beating of it in great vats, the running off of the

water into other vats, and the treatment of the stuff through various stages until it emerges from the "presses" veritable indigo, worth ever so many rupees a pound. "Mahaye" occurs in the very hottest part of the Indian year; but the indigo planter must disregard the heat if he is to keep up his character and earn commission. He spends hours every day in a little shed perched high over his vats, whence he can superintend the labors of the coolies, and see for himself that the mashing is thorough and the running off takes place in the nick of time. He must generally pervade the press-house, and it will not do for him to be dainty over a stain of blue on his hands or face. He must superintend the storing, for the mild Hindoo is not proverbial for honesty, and feels sorely tempted when the chance offers to carry off a piece of indigo which will hardly make a knot in his cummerbund, and yet for which he can realize a rupee. When "Mahaye" is over the cold weather is thinking of setting in, and then, after giving a start to his cultivation, the indigo planter feels himself a free man for a season. His holiday time has come.—*Late Paper.*

Selected.

We know of nothing more apt to lead a young man into an evil course than a prize at a Church fair. When in place of a dollar he gains an article worth twenty, and is congratulated on every hand on his good fortune, he is led to suppose himself born under a "lucky star," and to think the securing of a fortune by a lottery ticket a far better way than the painful plodding of earnest industry. And when the Church has told him it was right in her service to ignore his conscience concerning raffling, can it blame him if he does it for his own, and when, perhaps, he promises himself that in case of success the Church shall largely share the benefit?

*Salt in Sickness.*—Dr. Seudder remarks: "I am satisfied that I have seen patients die from deprivation of common salt during a protracted illness. It is a common impression that the food for the sick should not be seasoned, and, whatever slop may be given, it is almost innocent of this essential of life. In the milk diet that I recommend in sickness, common salt is used freely, the milk being boiled and given hot. And if the patient cannot take the usual quantity in his food, I have it given in his drink. This matter is so important that it cannot be repeated too often, or dwelt upon too long. The most marked example of this want of common salt I have ever noticed has been in surgical disease, especially in open wounds. Without a supply of salt the tongue would become broad, pallid, puffy, with a tenacious, pasty coat, the secretions arrested, the circulation feeble, the effusion at the point of injury serous, with an unpleasant watery pus, which at last becomes a mere sanies or ichor. A few days of a free allowance of salt would change all this, and the patient get along well."

Paper flour barrels are being made in Iowa. They are said to be air-tight and waterproof, to weigh much less than the ordinary wooden barrels, and to be able to stand more rough usage. One of the manufacturers predicts that in five years every barrel of western flour will be sent east in barrels made from the straw the wheat grew on.—*Late Paper.*

## THE FRIEND.

EIGHTH MONTH 15, 1874.

In the "Christian Worker" for 7th mo 15th, there is published an article by Luke Woodard, entitled "Ecclesiastical Impachment," in which exception is taken to some remarks made in Philadelphia Yearly Meeting, as shown by the account thereof contained in this journal under date 5th mo. 2d. The passage which is made the subject of comment is that, where it speaks of what are called "General Meetings" having been held, "in which, however sincere the actors might be, the proceedings were entirely at variance with the principles of Friends. In those meetings, singing was practised, scores of persons were stated to be on their knees at the same time, and large numbers were induced to come forward and place themselves on what were called the anxious benches."

The author of the article appears to understand the expression, "the proceedings were entirely at variance with the principles of Friends," to mean, that *everything* connected with those meetings was inconsistent with our principles; and he hence draws the conclusion that Philadelphia Yearly Meeting condemns "the intervals of silence, vocal prayer by a single individual at a time, vocal ministry, including doctrinal exhortation," &c., which were found in them, "in addition" to the specific matters objected to. One might reasonably have supposed that the immediate context, in which "singing," "anxious benches," and the practice of scores of persons falling on their knees at the same time, are specified, would have shown L. W. that the meaning of the speaker was to condemn *those* practices as entirely at variance with our principles; and not to censure other matters connected with the meetings, to which no allusion was made or intended. Before drawing such an inference, it would have been well to have practised some of that "charity" to which he refers, of which it is said, "It thinketh no evil."

It is satisfactory to find that he admits the correctness of the description given of what has taken place at these General Meetings. In reference to the first thing mentioned,—the practice of singing in them—he attempts to justify it, by quoting as follows from Robert Barelay: "We acknowledge this to be a part of God's worship, very sweet and refreshing." There is no comment made on this, and he leaves the reader to infer that singing as now practised was a customary part of the worship of our early Friends, which is entirely "at variance" with the truth. The words quoted are the commencement of a sentence, and the qualifying clause which immediately follows, and is essential to a proper understanding of what precedes it, is omitted. In view of the importance of this subject at the present time, we quote the greater part of this section from The Apology:

"As to the *singing of psalms*, there will not be need of any long discourse; for that the case is just the same as in the two former of *preaching* and *prayer*. We confess this to be a part of God's worship, and very sweet and refreshing, when it proceeds from a true sense of God's love in the heart, and arises from the divine influence of the Spirit, which leads souls to breathe forth either a sweet harmony,

or words suitable to the present condition; whether they be words formerly used by the saints, and recorded in scripture, such as the Psalms of David, or other words; as were the hymns and songs of Zacharias, Simeon, and the blessed Virgin Mary. But as for the formal, customary way of *singing*, it has no foundation in scripture, nor any ground in true Christianity: yea, besides all the abuses incident to *prayer* and *preaching*, it hath this more peculiar, that oftentimes great and horrid lies are said in the sight of God: for all manner of wicked, profane people, take upon them to personate the experience and conditions of blessed David; which are not only false, as to them, but also as to some of more sobriety, who utter them forth; . . . such *singing* doth more please the carnal ears of men, than the pure ears of the Lord, who abhors all lying and hypocrisy.

"That *singing* then that pleaseth him must proceed from that which is PURE in the heart (even from the *Word of Life* therein) in and by which, richly dwelling in us, spiritual songs and hymns are returned to the Lord, according to that of the apostle, Col. iii. 16.

"But as to their *artificial music*, either by organs, or other instruments, or *voice*, we have neither example nor precept for it in the New Testament."

Robert Barclay would not have used such language if *artificial music* by *voice* (which is the ordinary way of singing) had been customary or approved among his fellow professors. The writings of our early Friends contain numerous passages in which the practice of formal singing in meetings is condemned as being inconsistent with the spiritual nature of Divine worship as proclaimed by our Saviour himself. Such a practice seems never to have been introduced among them, and it is not sanctioned by the very few examples on record, where persons were led "from a true sense of God's love in the heart," "to breathe forth a sweet harmony." The following are the principal instances of this which now come to remembrance.

During the cruel persecution of Friends in Scotland, when many of them were imprisoned at Aberdeen, the poor sufferers were favored with a remarkable visitation of Heavenly love, which appears to have been accompanied with a breathing forth of that "sweet harmony" to which R. Barclay refers. There is nothing to show that any words were uttered. Andrew Jaffray, one of the number, thus speaks of it. "When thirty or forty of our ancient Friends were shut up in prison, I cannot but remember this particular instance, that when we were all met in the low Tolbooth, and not a word had been spoken among us, either in prayer or preaching,—we breathing in our hearts for power to do the Lord's will;—his power at last broke in among us as in a wonderful manner, to the melting and tendering our hearts. And though I was kept very empty a long time, yet at last the glorious power of God broke over the whole meeting, and upon me also, and ravished my heart,—yea, did appear as a ray of Divine glory to the ravishing of my soul, and all the living ones in the meeting. So that some of those in the town council above us, confessed to some of our number with tears, that the breaking in of that power, even among them, made them say one to another, 'O! how astonishing it is, that our ministers should say, the Quakers have no psalms in their meetings;

for such an heavenly sound we never heard in either old or new church.'"

George Fox, when a prisoner at Carlisle, was cruelly treated by his gaoler. He says in his journal: "Once he came in a great rage and beat me with his cudgel, and as he beat me, he cried, come out of the window; though I was then far from it. While he struck me, I was moved to sing in the Lord's power, which made him rage the more. Then he fetched a fiddle and set him to play, thinking to vex me; but while he played, I was moved in the everlasting power of the Lord God to sing; and my voice drowned the noise of the fiddle, struck and confounded them, and made them give over fiddling and go their way."

There is another passage in his writings, in which he mentions that some Friends in prison were moved to sing; no doubt to the confusion of their persecutors, who saw these innocent victims of cruel usage thus rejoicing in tribulation from a sense of the Divine love extended to them; even as Paul and Silas, when they had been beaten and thrust into the inner prison, sang praises to the Lord.

We think, therefore, that neither the precepts nor the example of our predecessors in religious profession, can justly be brought forward to defend the introduction of singing into our meetings for worship, as has been in some cases attempted of latter times; and that the Friend who spoke of it in Philadelphia Yearly Meeting as one of the evidences of departure from our principles, was justified in so considering it.

With reference to scores of persons falling on their knees at one time, L. Woodard considers it as simply a return to primitive practice, and that such persons are merely showing by the gesture of their bodies that they concur in an act of prayer. In other words, they merely kneel instead of standing up in time of prayer. The practice of the congregation rising when a minister kneels in prayer, has so long been established among us, that it seems undesirable to make any change therein, unless for some manifest advantage; yet we know not that there is any point of principle involved in the special attitude adopted. But this has nothing to do with the case before us. That which was justly condemned, was, not that many kneeled to express their unity with some vocal address to the Throne of grace, but that a state of mental excitement was indulged and fostered which led scores to prostrate themselves at one time in attempted prayer—contrary to the advice of the Apostle that "all things be done decently and in order." For God is not the author of confusion.

The same evasive style of reasoning is exhibited by L. W. in commenting on the objection made to persons being "induced to come forward and place themselves on what were called *anxious benches*." That we may not seem to do him injustice, we quote his own language: "This is but a repetition of the former charge, varied a little in language, and referring to this point of difference: instead of kneeling at their seats, the individuals who, as Barclay says, felt 'that they could pray together with one accord,' came together in some convenient place, which of course must be in one of the aisles. How any infraction of the principles of Friends is involved in this unconstrained choice of individuals, with reference to a particular locality in the meeting-house, I am unable to see."

It is difficult to see how a person familiar with the customs of our Society, could suppose, that the Friend who made the remarks which led to the article written by L. W., had any reference to persons occupying any particular part of the house for the usual and proper purposes of a meeting of Friends. The real objection is to the imitation of a practice in use among the Methodists, and perhaps some other religious denominations, where persons are encouraged to come forward and place themselves in view of the congregation, and be made recipients of the advice, exhortations, and prayers of all interested, with the expectation that they will then and there experience conversion and forgiveness, and become the redeemed children of God. Whatever of sincerity may exist in the minds of those who thus act, and in whatever degree that sincerity may be owned by the Searcher of all hearts, we cannot unite with such innovations; for their effect is almost inevitably to encourage a state of sympathetic mental excitement, having its root in our natural faculties, and not proceeding from the Spirit of Grace; and to direct the attention outward to our fellow beings for help, instead of looking to Christ as revealed in the heart, by whom only the work of redemption can be accomplished.

The practice of Friends has ever been on such occasions to retire inward, and endeavor to feel the presence of the Lord; and to wait in true submission on him, so that they may receive such degrees of spiritual light and refreshment as He sees meet to administer. In such a gathered state, they are prepared to derive comfort and help from such outward ministry as proceeds from the Divine gift in others, and is owned by the Spirit of Truth in themselves; but all other ministry they experience to have a scattering and withering effect. For, as Isaac Pennington says, "There is a spirit of delusion as well as of truth; this works in the heart as a minister of righteousness, in a seeming light, and warming the heart with a wrong fire, brings it into a wrong bed of rest, and administers to it a wrong peace, hope and joy; setting up there a wrong sense, belief and judgment concerning itself and others."

The defence of the truth, in the present instance, has been felt to be a painful duty, for it is far more pleasant to speak in the language of praise than of reproof; to find evidences of unity, than of disagreement. And we have also been sensible, that the difficulties in our Society, of which some of the proceedings above considered are only a partial exemplification, are not to be removed by argument. In the language of Samuel Fothergill, "There is a spirit that is gone forth into the camp, and is splendidly delusive. This spirit leads into notions, it snuffs up the wind, and lives in commotions itself raises." There is but one power that is able to keep us from being led astray, even "that Holy Spirit which was and is the ground of truth forever." May all be brought under its guidance, and preserved therein.

Our subscribers are reminded that with the present number, the Forty-seventh volume ends, and that our terms are Two dollars a year, payable *in advance*. Remittances may be made to the Agent, JOHN S. STOKES, No. 116 North Fourth St., either direct, or by post-office money order.

SUMMARY OF EVENTS.

FOREIGN.—The British Parliament was prorogued on the 7th inst. by a message from the Queen, which was read by royal commission. The Queen thanks both Houses for voting the annual grant to her son Prince Leopold. She states that the relations with all foreign Powers are friendly. She laments the condition of Spain, and earnestly desires the restoration of peace and order in that country, but considers non-interference as most conducive thereto. The message proceeds to congratulate Parliament upon its work, and expresses pleasure because of the reduction of taxation; at the passage of the factory act, by which the health of women and children will be promoted; at the passage of the act reforming church patronage in Scotland, which will conduce to the religious welfare of the people, because it removes the cause of controversy; and at the passage of the public worship regulation bill, which will settle the form of worship of the Established Church. The gross public income of the United Kingdom in the year ending 6th mo. 30th last, was £77,327,063. The total ordinary expenditure amounted to £74,974,891. The balance in the exchequer at that date was £5,314,879.

There has been a terrible gale off the coast of Scotland. Hundreds of fishing boats are over due, and it is feared that many of them have been lost.

Before the British government consented to be represented in the Brussels conference, it was stipulated that there shall be no change in the recognized rules of international law, and that no restrictions shall be placed upon the conduct of naval operations. England reserves the right to accept or reject any recommendations which the conference may make.

The Bank of England rate of discount has been advanced from 3 to 4 per cent.

The British government intend immediately to effect a complete re-armament of the fortresses of Gibraltar and Malta.

A serious riot occurred in Portsmouth the 5th inst., in consequence of the pier authorities closing a thoroughfare. Several thousand persons were engaged in the riot which was finally suppressed by the military.

Advices from New Zealand state that six thousand emigrants from Great Britain arrive in that colony every month.

Liverpool, 8th mo. 10th.—Uplands cotton, 8½d.; Orleans, 8½ a 8½d.

London.—Consols 92½. U. S. sixes, 1865, 108½; new five per cents, 104½.

A Paris dispatch of the 7th says: The attitude of the Spanish representatives here is most conciliatory, and difficulties with Spain are at an end. Senor Castelar is expected at Versailles, charged with the mission of negotiating for the recognition of the Republic of Spain. The Duke De Cazes, French Minister of Foreign Affairs, denies absolutely the Spanish charges of connivance with the Carlists. The Duke says, Lizarraga's escape from arrest while passing from Bayonne to Perpignan, was due to a misunderstanding of the local authorities. The Carlist officers seen in uniform at Bayonne, and elsewhere in French territory, had passports signed by the Spanish authorities. The Carlists obtained their supplies of arms and other war material by sea, through the remissness of the Spaniards in watching the coast.

The Duke, in conclusion, assures Spain that the instructions to the prefects of the southern departments to be vigilant have been explicitly renewed, and the government will see that the interior authorities scrupulously respect them.

A special dispatch to the *Daily News* says the French government has seized 32,000 cartridges on the Spanish frontier destined for the Carlists.

The wife of Don Carlos has arrived at Bordeaux. It is said the French troops guarding the Spanish frontier have been reinforced, and vigorous measures are ordered to prevent uniformed Carlists from crossing the boundary.

A Versailles dispatch of the 6th says: The government has informed the permanent committee of Assembly that it will communicate immediately the details of any serious foreign question that may arise during the Legislative recess.

The *Cologne Gazette* publishes a telegram from Paris stating that in a superior council of war General De Cissey, Minister of War, demanded an immediate credit of 4,000,000 francs, and an eventual credit of 1,000,000,000 francs (one milliard) for army purposes.

A Madrid dispatch of the 6th says: The circular note in relation to the Carlist insurrection has been sent to the different European Powers by Ulloa, Minister of Foreign Affairs, and is published to-day. Ulloa says that the Carlists, under pretext of defending religion, are guilty of incendiarism, assassination and pillage,

and in support of this statement instances the massacres at Cuenca and Olof.

According to a Bayonne dispatch of the 10th, the Carlist General Dorregay has captured the town of Laguardia, and is advancing on Puebla, with the intention of cutting the railway between Miranda and Logrono.

The *Popolo Romano* newspaper says that the Cabinet of the Vatican is negotiating to obtain from the governments of Austria, France and Portugal the renunciation of their right of excluding candidates at the Papal elections.

The *Cologne Gazette* says the French government has agreed to recall the war ship *Orenoque* from Civita Vecchia, and that the vessel will forthwith quit the station she has so long occupied.

The *London Daily Telegraph* says it is reported that Russia has consented to recognize the Republic of Spain, and that all the other Powers will follow.

It is also reported that the German government has notified its representatives abroad that the time has arrived to recognize the Spanish Republic.

A Vienna dispatch states that a circular note had been received from the German government proposing that the great Powers take under consideration the expediency of recognizing the Spanish government.

On the 10th inst. the inhabitants of Barcelona were greatly alarmed in consequence of the approach of large bodies of Carlists, and there being no force in readiness to oppose them.

UNITED STATES.—In New York city last week there were 721 interments.

The mortality in Philadelphia numbered 346, including 183 children under two years. During the Seventh month 1,562,602,586 gallons of water were pumped at the several water-works belonging to the city. The Fairmount works furnished about half of the total supply.

The wool clip of the State of Michigan this year amounts to about 6,000,000 pounds.

The steamer *Pat Rogers* was burned on the Ohio river on the 5th inst., near Aurora, Indiana. The disaster was attended with great loss of life, no less than 47 persons, mostly women, having perished. The boat and cargo, the latter consisting of cotton, cattle, sheep, &c., were totally destroyed. The fire commenced in the cotton, which it is supposed took fire from sparks that fell from the chimneys.

The devastation committed by locusts on the crops is causing a great deal of suffering among the poorer class of settlers in northwestern Iowa.

The imports into the U. States for the ten months ending 4th mo. 30th last, were merchandize \$469,769,679, and specie and bullion \$25,534,697: total \$495,304,376. During the corresponding period, 1873, the total imports were \$556,567,409. The exports for the ten months referred to in 1874 were, merchandize \$479,775,710, and specie and bullion \$39,175,676: total \$518,951,386, which is \$23,647,010 more than the imports in that period.

The Bureau of Statistics publishes the following statement in relation to the foreign trade: Number and tonnage of vessels engaged in the foreign trade which entered into and cleared from the United States during the twelve months ended April 30th, 1874 and 1873.

	Entered.		Cleared.	
	No.	Tons.	No.	Tons.
1874.				
American vessels,	11,808	3,877,634	12,032	3,984,661
Foreign vessels,	21,023	9,147,504	20,989	9,071,316
Total . . .	32,831	13,025,138	33,021	13,055,977
1873.				
American vessels,	12,073	3,609,420	11,227	3,743,497
Foreign vessels,	19,655	7,831,577	19,875	7,875,011
Total . . .	30,728	11,440,997	31,102	11,618,505

The *Markets, &c.*—The following were the quotations on the 10th inst. *New York*.—American gold, 109½. U. S. sixes, 1881, registered, 117½; do. coupons, 118½; do. 1868, registered, 116; coupon, 117½; 5 per cents, 111½. Superfine flour, \$4.80 a \$5.10; State extra, \$5.40 a \$5.75; finer brands, \$6 a \$10. No. 1 Chicago spring wheat, \$1.30; No. 2 do., \$1.24; new amber western, \$1.33; white Kentucky, \$1.38. Old white oats, 82 a 85 cts.; new mixed, 60 a 65 cts. Western mixed corn, 82 cts.; white, 91 a 92 cts. Carolina rice, 8½ a 9½ cts. Rangoon, 6½ a 6¾ cts. *Philadelphia*.—Middling uplands and New Orleans cotton, 17½ a 17¾ cts. Superfine flour, \$3.50 a \$4.25; extras, \$4.50 a \$5.75; finer brands, \$6 a \$9.25. Old amber wheat, \$1.50; new red, \$1.29. Rye, 88 a 91 cts. Yellow corn, 84 cts. Oats, 50 a 53 cts. The receipts of beef cattle were 3505 head. The range of prices was from 4½ to 7½ cts. per lb. gross.

Of sheep 16,000 sold at 4½ a 5½ cts. per lb. gross for fair to choice. Hogs, \$10.56 a \$10.75 per 100 lbs. net for corn fed. Receipts, 4500 head. *Baltimore*.—Superfine flour, \$4 a \$4.75; extra, \$5 a \$5.75; family flour, \$7.25 a \$9.25. Choice white and amber wheat, \$1.40 a \$1.43; good to prime red, \$1.30 a \$1.38; Pennsylvania red, \$1.28 a \$1.32. Yellow corn, 81 a 82 cts.; white, 89 a 92 cts. Oats, 50 a 55 cts. *Chicago*.—No. 1 spring wheat, \$1.10; No. 2 do., \$1.04½; No. 3 do., \$1.01. Corn, 66 cts. No. 2 oats, 41½ cts. *St. Louis*.—No. 2 red wheat, \$1.16 a \$1.17; No. 3 do., \$1.08 a \$1.10. No. 2 corn, 55 cts. Oats, 48 cts. Lard, 14½ cts.

RECEIPTS.

Received from William Hancock, Pa., \$2, vol. 48; from S. E. Haines, Pa., \$2, vol. 48, and for Jesse Haines, \$2, vol. 48; from Sarah Ann Corse, Del., per W. H. Corse, \$2, vol. 48; from Samuel Chadbourne, N. Y., \$2, vol. 48; from Isaac Child, Io., \$2, vol. 48; from Dr. George Thomas, Pa., \$2, to No. 24, vol. 49, and for J. Preston Thomas, \$2, to No. 23, vol. 49, and Richard M. Thomas, Enos Morris, John Webster, and Jonah Ogilbe, \$2 each, vol. 48; from Thomas S. Pike, N. J., per G. J. S., \$2, vol. 48.

WANTED.

A suitable Friend to take the position of Writing Teacher and Assistant Governor at Westtown Boarding School—for next Session. Apply to Charles Evans, 702 Race street, Philadelphia, Clarkson Sheppard, Greenwich, New Jersey, Joseph Walton, Moorestown, New Jersey.

SHELTER FOR COLORED ORPHANS.

Wanted, by the 1st of 10th mo. next, a suitable Friend for Matron for the above institution. Application may be made to Hannah R. Newbold, 643 Franklin St. Mary Wood, 524 South Second St. Mary Randolph, 247 North Twelfth St. Anna W. Lippincott, 460 North Seventh St.

WANTED.

An unmarried Friend to take the position of Governor at Westtown Boarding School, on or before the close of the present session, in the 10th month next. Apply to Clarkson Sheppard, Greenwich, New Jersey, Joseph Walton, Moorestown, Charles Evans, 702 Race street, Philadelphia.

Haverford College.

The next Term will commence on Fourth-day, 9th mo. 2nd, 1874. Applications for admissions should be addressed to SAMUEL J. GUMMERE, President, Haverford College, Montgomery Co., Pa.

FRIENDS' ASYLUM FOR THE INSANE. Near Frankford, (Twenty-third Ward,) Philadelphia. Physician and Superintendent—JOSHUA H. WORTHINGTON, M. D.

Applications for the Admission of Patients may be made to the Superintendent, or to any of the Board of Managers.

DIED, on the 3d of 7th month, 1874, at her late residence in Medford, N. J., MARY S. LIPPINCOTT, an elder and overseer of Upper Evesham Monthly Meeting, in the 83rd year of her age. This dear Friend was under severe physical affliction during the last nine years of her life. This she endured with much christian resignation, not the slightest murmur being made against what she accepted as the Divine will concerning her. She was diligent in the attendance of her religious meetings when able, and even when reduced to comparative helplessness, she solicited and obtained the assistance of others to enable her to perform this important duty, saying, "I must do what I can." In her last illness she was engaged in earnest supplications for a mansion in Heaven, saying, "Oh! Holy Father, be pleased to look down upon me with an eye of pity;" and an evidence was granted her that He who careth for his children, however little in their own eyes, was with her, shielding her with His arm of Almighty power. Very near the close with a peaceful and serene countenance, she raised her feeble arms and sweetly said, "Come, come, come very quickly." "Blessed are the pure in heart, for they shall see God."

WILLIAM H. PILE, PRINTER. No. 422 Walnut Street.
